

## Gods Daily 275

Chapter 275: The Legendary Warrior Suvorov

The Emperor Points gathered from this battle were more than enough to elevate some of the summoned unit powers to level 12!

Aurek focused his mind, communicating with the Emperor's Scepter to check the upgrade information.

To upgrade the Destruction Summon Power to level 11, it required: 20 trillion Emperor Points.

To upgrade the Space Summon Power to level 10, it required: 3.85 trillion Emperor Points.

To upgrade the Life Summon Power to level 9, it required: 650 billion Emperor Points.

To upgrade the Diamond Summon Power to level 9, it required: 750 billion Emperor Points.

To upgrade the Elemental Summon Power to level 9, it required: 800 billion Emperor Points.

To upgrade the Giant Summon Power to level 10, it required: 4 trillion Emperor Points.

...

[Emperor Points are sufficient, would you like to upgrade your powers?]

[Yes] [No]

All powers can be upgraded!

Although it's impossible to level them all to level 11 or 12 at once, Aurek decided to prioritize upgrading Titan and Void Warlock, and then consider Doomsday Warrior and Elemental Assassin.

Mountain Shieldbearer and Life Sorcerer would be upgraded later.

It wasn't that the latter two weren't useful, but their abilities wouldn't provide an immediate impact on the current battle.

For example, Life Sorcerers required a vast amount of magical plants and rare materials to create higher-tier potions.

Aurek first spent 4 trillion Emperor Points to level Titan to level 10.

To upgrade it to level 11 would require 30 trillion Emperor Points.

To upgrade it to level 12 would require 330 trillion Emperor Points!

But he didn't hesitate.

Titan was a pure strength-based combat unit, and upgrading it to level 12 would certainly have a huge impact.

...

[Titan has been upgraded to level 12. You can now summon 25,600 level 12 Titans per day.]

[The Emperor Points needed for the next upgrade: 410 trillion.]

[Note: A level 12 Titan's power is comparable to a God Fire rank level 6.]

[Unlocks army technique: World-shattering Power]

Aurek's heart skipped a beat!

Though the points consumed were astronomical, summoning more than 25,000 warriors comparable to God Fire rank level 6 in a single day was absolutely worth it!

Suppressing his excitement, he continued with the upgrades.

Considering the Emperor Points acquired from conquering Goldflow Empire, there were still plenty left. Aurek decided to upgrade all attribute-based warriors as much as possible.

[Destruction Summon Power has been upgraded to level 11. You can now summon 12,800 level 11 Domsday Warriors per day.]

[The Emperor Points needed for the next upgrade: 250 trillion.]

[Note: A level 11 Domsday Warrior's power is comparable to a Divine Envoy rank level 5.]

...

[Space Summon Power has been upgraded to level 10. You can now summon 6,400 level 10 Void Warlocks per day.]

[The Emperor Points needed for the next upgrade: 50 trillion.]

[Unlocks army technique: Dimensional Reversal]

...

[Elemental Summon Power has been upgraded to level 10. You can now summon 6,400 level 10 Elemental Assassins per day.]

[The Emperor Points needed for the next upgrade: 20 trillion.]

...

[Diamond Summon Power has been upgraded to level 10. You can now summon 6,400 level 10 Mountain Shieldbearers per day.]

[The Emperor Points needed for the next upgrade: 20 trillion.]

...

[Life Sorcerer has been upgraded to level 9. You can now summon 3,200 level 9 Life Sorcerers per day.]

[The Emperor Points needed for the next upgrade: 160 billion.]

[Additional abilities unlocked: Holy Healing, Hymn of Life]

...

With 30 trillion Emperor Points remaining, Aurek withdrew his gaze from the Emperor's Scepter and immediately appeared in the Royal Training Grounds.

[The Emperor's Scepter is full of energy. Would you like to conduct today's summons?]

Aurek chose Yes without hesitation.

All six summon powers responded simultaneously, and the sky above the training grounds erupted with light!

A total of 60,800 new, powerful attribute warriors were summoned in an instant!

This included 25,600 Titans, comparable to God Fire rank level 6!

12,800 Doomsday Warriors, comparable to Divine Envoy rank level 5!

And all other summoned forces, except for the Life Sorcerers, were at sage rank or higher!

"This battle is a game-changer, not just for the Eastern Domain, but for the entire continent!"

Feeling the unprecedented expansion of his forces, Aurek was filled with an exhilarating sense of control over everything.

[You have gained a special attribute unit!]

[Name: Blood Conqueror]

[Level: 13]

[Abilities: Legion Domain, Death Sovereignty, Judgment Swordsmanship]

[Note: The promotion speed is ten times that of regular attribute warriors. Life, Destruction, Space, and Power attributes are enhanced tenfold. Holds the Judgment Blade. Within the Legion Domain, it can absorb the enemy's life force to strengthen its own combat power, becoming stronger the longer the battle continues until the war ends. Level 13 strength is comparable to Divine Cleric rank level 4.]

...

"My lord."

A tall figure, with flowing hair and a commanding presence, stepped forward and bowed reverently to Aurek.

He was cold and composed, his gaze sharp like an eagle's, and his entire being radiated a blend of iron-will and authority, reminiscent of an undefeated war god from an epic.

Aurek stared at him, and a name appeared in his mind—Alexander!

Aurek knew just how powerful and extraordinary this special being was!

"I bestow upon you the name Suvorov, and command you to lead all the empire's legions."

This was a Divine Cleric-level being, with a growth rate ten times that of regular attribute warriors—truly rare.

This was undoubtedly a tremendously powerful existence!

The power of God Fire rank could already shake the heavens, making the Eastern Domain tremble.

And the Divine Cleric rank was an even more terrifying existence, one of the most powerful on the Eura continent!

Suvorov's body was surrounded by divine radiance and inscriptions, having already transcended ordinary life.

The power he wielded was no longer simple magical energy but magic of a higher dimension.

Even if he were placed in the upper god realm right now, he would be an awe-inspiring figure.

In fact, with the current levels of the various summon powers, if enough Divine Cleric-level beings were stationed, Aurek might even dare to direct his legions toward lands beyond the Eura continent!

The stronger the enemies he killed, the more Emperor Points he would gain.

With this thought, Aurek resolved to focus on training higher-level strong beings.

Golden Armor, Harry, and others were special units with growth potential far surpassing that of regular legions.

They could level up through combat by absorbing energy or through meditation.

Aurek was determined to seize more resources to fuel their growth!

Training top-tier strong beings would ensure that, in the future, when facing threats from the upper god realm, he wouldn't be forced to rely only on the numbers of his legions.

Now that the external environment had stabilized, only the core resources were left to be acquired.

As for Aurek himself, the 30 trillion Emperor Points would be enough to advance him to God Fire rank, or even higher!

After this battle, he would also have to accelerate his own ascension.

Just then—

Boom!

A loud crash suddenly resonated from outside the palace, triggering the Divine Mystical Barrier!

Aurek's gaze shifted toward Jade City Gate.

The Divine Envoy rank protector guarding Eryndor City had been secretly keeping an eye on the two suspicious travelers.

Seeing that they had passed through with no trouble and arrived at the palace gates, he immediately realized something was wrong. Without waiting for them to approach, he took action.

"How dare these ants block our way?"

The two middle-aged men simply waved their hands casually, and an overwhelming aura spread instantly.

It seemed to have summoned the very forces of heaven and earth, sending the Divine Envoy flying with no resistance!

The burst of power activated the Divine Mystical Barrier!
