

## Hammer God 590

### Chapter 590 Shiny

'Where was I?' Kyle thought as he reached the Yin-Wind again. 'It was something about atoms, right? Hydrogen, helium, and stuff.'

'Right! I remember thinking about the fact that Yin-Wind can easily be combined with all kinds of things. I think I was thinking about resonance or something.'

'I should take a closer look at that.'

Kyle continued experimenting with Yin-Wind while thinking about it in a different way.

What if Yin-Wind was kind of like Neutral Energy, but different?

Neutral Energy could combine with all kinds of things and make them stronger, while Yin-Wind could also combine with lots of stuff. However, Yin-Wind changed things instead of just strengthening them.

Yin-Wind couldn't change the Metal-Earth Stone, but it could change other things.

It had the power to turn Yang-Elements into Yin-Elements.

This time, Kyle wasn't disturbed in his Law Comprehension.

As expected, this planet had been the turf of the team they had killed.

Most likely, the enemy team had scouted this planet, searching for a new batch of contestants for an easy True Battle.

Sadly, they just had to meet Kyle's team.

Honestly, their plan hadn't been bad. If the team hadn't already gone through a dangerous True Battle against the mole and the bird, they might have died.

Kyle had comprehended the Law of Body during his last fight, and without it, he wouldn't have been able to charge through the enemy's attacks like this.

At the very least, Swamp Dragon and Warp Space would have died.

As Kyle kept looking at Yin-Wind, he realized that the concepts came to him far quicker than usual.

After all, he had undergone two True Battles since he had comprehended Yin-Fire.

On top of that, his Karmic Luck had also increased significantly.

Within just a couple of years, Kyle finally managed to comprehend the Fragment of Yin-Wind's Composition.

'Yep, it works via resonance. It's like Yin-Wind is a mirror. It absorbs the wave of Energy and turns it into a mirror image.'

'At the same time, it is also a mirror image of Yang-Wind.'

'Now that I know how Yin-Wind works, roughly, I should go deeper inside and focus on the other aspects.'

Kyle went deeper into the stream of Yin-Wind to focus on the other Auxiliary Fragments.

Once more, he wasn't disturbed.

Kyle lost himself in Law Comprehension, and the Fragments quickly appeared in his mind.

Of course, quickly was only relative. It still took him a couple of years. The Fragments of Expansion and Focus came quickly.

The Fragment of Expansion had been the Base Fragment for the normal Law of Wind, but there was not a lot of difference between the Yang and the Yin versions of the Fragment.

However, they were just as complex. It was just that the complexity of the Yin-version went into a Level Two Law.

In general, the Base Fragment of a Law, one level lower than another Law of the same Element, was about as complex as an Auxiliary Fragment of the higher Law.

While Kyle was focusing on the Fragment of Yin-Wind's Movement, he noticed something.

His emblem was shining.

'Oh, somebody is in danger,' Kyle thought as he looked at the emblem.

When the emblem was shining like this, it meant that one of their teammates was in a True Battle.

Since teams were only allowed to fight each other as a group, this meant that somebody was fighting a beast.

'Probably Warp Space,' Kyle thought. 'Not sure if she got jumped by a beast or if she sought it out herself.'

Any person in a fight could call the entire team.

If Warp Space wanted to call the team over, they would be teleported to her location immediately.

The shining of the emblem acted as a warning.

The team should get ready for a battle.

Kyle watched the emblem shine for a couple of seconds.

Then, it slowly became silent again.

They had not been called over for a battle.

'Seems like Warp Space won and didn't need our help,' Kyle thought.

Just to make sure, Kyle activated the function that told him where his teammates were.

Both arrows were pointing up with slightly different angles.

'Well, since both arrows are still there, it means that both of them are still alive. Warp Space survived her True Battle. Good for her!'

Kyle closed his eyes again and resumed his comprehension.

An unknown period of time passed before the emblem started to shine again.

'Again?' he thought as he looked at it.

Kyle readied himself for a battle.

Seconds passed.

Ten seconds passed.

'This is a long battle,' Kyle thought.

Usually, difficult fights between Transcendents were finished in just five seconds or so.

After all, they were so fast that they could launch several attacks within a single second.

The emblem didn't stop shining.

Eventually, over 30 seconds passed.

'Brah, what? What the fuck is Warp Space fighting? Also, why hasn't she called for help yet?'

The battle between the team and the bird had only taken a bit more than ten seconds. Finally, after over 40 seconds, the emblem stopped shining.

Kyle activated the function again and saw only one arrow.

For just a moment, Kyle's heart raced, but then, he noticed that there were actually two arrows.

They were just almost perfectly overlapping.

'Ah, I see. That explains things. I think that was Swamp Dragon. If he fights a sufficiently powerful beast, his poison takes a long time to kill it. Most likely, he fought something just a bit above his level, and he ran over to Warp Space. They're probably both on the beast planet.'

'Wonder why he suddenly decided to go back to the beast planet.'

'Anyway, back to my-'

The emblem started to shine again.

'Seriously?!'

'What the fuck are they doing?!'

This time, the emblem needed about eight seconds to calm down again.

'Still alive?' Kyle thought as he checked the arrows. 'Still alive.'

'Anyway, back to-'

The emblem shone again.

"What the-"

BOOOOOM!

"FAAAAAART(UUUUUUCK)!" Kyle shouted as his lower abdomen and legs were suddenly blasted off by a dense wave of metallic spears.

"Help!" Warp Space's voice appeared in Kyle's mind as his body crashed onto an insanely hard wall.

Naturally, Kyle had been called over by his team.
