

## **Hammer God 605**

Chapter 605 Brittle

Kyle started to incorporate the Essence of Yin-Metal into his Law of Body.

As always, funny stuff started happening.

His arms turned into explosions of blades.

His legs detonated like an explosion but without heat.

Sometimes, there were explosions with heat.

In a way, Yin-Metal could be turned into almost all kinds of Energy that wasn't Neutral Energy.

Kyle just used it as an extra attack since his basic attack damage was already so high.

Since he had already learned how to incorporate one Essence into his Law of Body, his progress was much faster this time.

Within just 30 years, he managed to Infuse four Fragments with the Essence of Yin-Metal.

Last time, he needed 50 years just to Infuse three.

A lot of the processes were similar, but there were also some differences.

Since everyone was focusing on their Complex Laws, Kyle wouldn't be disturbed anytime soon.

He could fully focus on his own comprehension.

Within a total of 60 years, he was already as far as he was with the Yin-Fire Infusion near the end.

He just needed a bit more.

Kyle started to think back to the time he had fully comprehended his Yin-Fire Infusion.

While he had been delirious during that time, he could still somewhat make out what happened.

The last step had been completed by essentially going all in.

He had given power to the Yin-Fire.

If it killed him, it killed him.

He had simply accepted his fate.

Sadly, doing that under normal circumstances was not a smart choice.

Back then, he had allowed the world and his instincts to guide him, but this was not that easy.

A mind always tried to take control of everything. After all, it was the mind. It was the smartest part in the body, and it knew best what to do.

But that wasn't always the best thing to do.

Sometimes, emotions and instinctual actions created better results.

If Kyle simply allowed his body to take over, there was a high chance that his mind would get involved in the creation of his Infused Law.

If he just changed a small part, he would die.

Sadly, this meant that he couldn't just rely on the world and his instincts.

This time, he had to do everything himself.

Luckily, things were different during this iteration of comprehension.

Last time, he hadn't had a successful Infusion, and his Momentum had also been weaker.

With the additional Momentum, things became clearer to Kyle.

Sometimes, he saw the result of what he wanted and just needed to get there. Additionally, he took inspiration from his last success.

Because of that, Kyle didn't remain stuck.

After a collective 60 years, he got to eight Fragments.

After a collective 75 years, he got to nine Fragments.

Now, he truly only needed a tiny part.

Just a little bit.

Luckily, his improved Fragments gave him enough stability to survive any accidents involving the last Fragment.

Getting past seven Fragments had been the most difficult part.

When he reached nine Fragments, he only needed seven more years.

As he Infused all ten Fragments with Yin-Metal, his body started to change.

It became light grey, and his hair started to turn prickly.

Kyle felt his power improving tremendously.

His physical power was shooting through the roof, and things became clearer in his mind.

But at the same time, his physical stature became gaunter.

Moments later, he looked like a weak and malnourished basement dweller.

Yet, Kyle didn't feel weak.

He looked at his hand with a smile.

'This is amazing!' he thought as he felt the power in it.

His physical power was just as powerful as when he used his Yin-Fire Infusion.

From what he could see, the physical power improved equally as much with any Infusion of the Second Level.

The power came from his Law of Body, which received the power of a Level 2.5 Law.

At the same time, the aspects of the origin Element of the Essence also improved by half a level.

On top of that, Kyle had received the attributes of his chosen Essence.

Kyle stood up and lightly touched one of the walls.

BOOOOOM!

The wall exploded, releasing a terrifying shockwave.

This shockwave was just as powerful as the Yin-Metal attack that always followed his hammer strikes.

However, one had to remember one thing.

Kyle hadn't attacked with his hammer just now.

'This is so cool!' Kyle thought with an excited smile. 'I can transform my physical power into all kinds of forces!'

Just now, when he had touched the wall, all his physical power had been turned into blunt force.

So, while Kyle hadn't punched with a lot of power, the physical power inside his entire body had been gathered on his fingers and released.

With this body, it didn't matter how hard he hit or with what he hit the enemy with.

His entire physical power would be transformed into whatever kind of force he wanted.

Kyle touched another wall, and within an instant, the wall turned into gas.

This time, he had transformed his physical power into pure heat.

Kyle smirked and started to run through the underground.

As he stepped on something, all his physical power was transformed into a pushing force directed towards his body.

Within an instant, he had reached the maximum speed that his Law of Meteor allowed him to reach.

As he charged through the underground, Kyle pulled out his hammer.

Meteor Energy gathered around him and his hammer, and his speed increased even more.

Then, he swung at a random chunk of ore.

All his physical power was transformed into forward momentum for his hammer, and it swung at speeds it had never achieved before.

CRACK!

The powerful chunk of ore vibrated, and Kyle's hammer broke.

Kyle's smile vanished, and he just sighed when he saw his destroyed hammer.

'This thing has been breaking more and more recently.'

'Sadly, there's nothing I can do about it.'

'I already comprehended the Standard Transcendent Materials, which were the Rank S Materials in the Tertiary World. Since I managed to incorporate the Fragment into my Law of Metal, I can push it up to the Fulfilled Transcendent Rank.'

'Sadly, being at the Fulfilled Transcendent Rank means that 99% of Fulfilled Transcendents can't break the material, but the remaining one percent can still break it.'

'The beasts we've been fighting have far more power.'

'With just my Law of Meteor, my hammer was still strong enough. My Law of Meteor only pushed me to the middle or upper middle of the Fulfilled Transcendents in terms of pure attacking power.'

'The addition of my Law of Body pushed me into the top 5%. It was still barely enough.'

'But now, I'm using two Complex Level 2.5 Laws at the same time, and both of them have a lot of attacking power.'

'I'm well within the top one percent.'

'My hammer can't take my own attack anymore.'

'As soon as I attack with my full power...'

'My hammer will break into pieces.'
