

## **Hammer God 608**

### Chapter 608 Last Infused Body

The golden man quickly fucked off and left Kyle alone.

The golden man quickly went to his teammates and the yellow teams under their command to inform them.

"A wolf team just entered our Moon," he said.

The others took deep breaths and sighed.

Teams like the one Kyle belonged to were rare but not unprecedented.

Sometimes, it happened that a team mainly fought beasts, reaching levels of power that put them far beyond the norm.

These teams were called wolf teams, named after the phrase "a wolf in sheep's clothing".

Almost every team that challenged a wolf team died.

Wolf teams had the unique advantage of being able to go wherever they wanted.

After all, only powerful red teams and the average black team had the power to win against Kyle's team, but they didn't have the permission to challenge his team.

Kyle's team could freely choose their enemy without the disadvantage of being chosen themselves.

The other teams on the Metal Moon avoided Kyle's location since they didn't want to end up as food for the wolf.

This left Kyle alone to comprehend all the materials he wanted to comprehend.

It just took Kyle a month to gather all the necessary Advanced Transcendent Materials to condense his Fragment of Advanced Transcendent Rank Metal Materials.

Comprehending that Fragment hadn't been hard at all.

After he was done with this Fragment, he went on to the next.

Luckily, the Metal Moon teemed with materials, and he never had to search for more than a couple of minutes to get his materials.

However, comprehending the next Fragment was a bit harder than the last one, but still much easier than a Level Two or 2.5 Complex Law.

Kyle just needed about one year to comprehend his next Fragment, the Fulfilled Transcendent Metal Material Fragment.

'Finally,' Kyle thought.

The next moment, Kyle gathered all his Metal Energy and started to condense several powerful hammers.

Creating the materials for a hammer took a long time.

During battle, Kyle either rebuilt his hammer out of its broken pieces or simply pulled a new one out of his Soul Space.

At any given moment, Kyle was running around with over ten hammers in his Soul Space, and whenever one of them broke, he simply pulled out a new one.

Luckily, this would no longer be an issue.

After Kyle finished building his new hammer, he smiled.

'Finally, it feels heavy again! I kinda hated how light it felt.'

Kyle recreated his Yin-Metal Body and grabbed his hammer.

Then, he struck the Metal Moon again.

BOOOOOOM!

This time, the destruction was even greater. After all, the force of his attack no longer dispersed randomly.

Now, he could finally unleash his full power again!

Kyle thought back to the time his hammer had been cut into pieces by the toxic spider silk.

'Let me see you try to destroy my hammer again!'

If he were pitted against the spider silk again, he would be able to break through it.

However...

'It's better, but not unbreakable. While it could get through the silk, the spider could probably still crack or even break it if it struck it with its legs, but it would have to be a really strong strike with all of its weight and strength behind it.'

'Yeah, well, even if it happens, it's still much better, and I would just pull out another one.'

Kyle created over ten additional hammers, which he all stored in his Soul Space.

When he was done creating his new set of hammers, Kyle left the Metal Moon and traveled back to the beast planet.

Since he was going to resume his comprehension of his Complex Law, he wanted to be in a spot he knew.

After he returned, Kyle dispersed his Yin-Fire Body and summoned his Yin-Wind Essence.

'Last one!' he thought. 'And when I'm done with this, the hard part will start.'

Kyle started to incorporate his Yin-Wind Essence into his body.

His progress was even faster than before.

Within just 20 years, he was at four Fragments.

After a total of 40 years, he was at six Fragments.

Now, the hard part started.

After a total of 55 years, he finally reached eight Fragments.

The remaining Fragments came relatively quickly.

After a total of 65 years, Kyle managed to Infuse his Law of Body with the entire Essence of Yin-Wind.

Kyle's body transformed once again.

This time, his skin turned a dark green, and his hair turned long and shiny.

'I look dirty and greasy,' Kyle thought.

Meanwhile, his body bulged with power, and within moments, he looked like a roided-out power lifter.

'I mean, I get it's all muscle, but I still kinda look fat,' Kyle thought as he looked at his massive belly.

'Green, greasy, fat... man, I sure look unhealthy.'

Kyle hit his belly with his fist.

'Brah, I felt nothing!'

The next moment, Kyle charged forward.

His speed...

Had not increased a lot.

It was barely different from his normal speed without any Infused Laws.

However...

Kyle swung his hammer. BOOOOOM!

The thick chunk of ore he couldn't destroy during his last test exploded into pieces, confirming that it had been made of Low Primal Metal.

'My attacking power is off the charts! My hammer almost feels too light again.'

'Even more...'

Kyle touched one of the stones beside him, and the stone immediately exploded into different forms of Energy.

Water, Fire, Wind, Metal, and so on.

'My body has a dissolving effect on Energy. Any kind of ethereal attack would disperse into different kinds of Energy. Sure, I would still be hit by the different forces, but they wouldn't be focused anymore.'

'I'm essentially turning a metal slug into buckshot, if we're talking about shotguns.'

'This will severely weaken any enemy's ethereal attacks, and my defense also increased significantly against physical attacks.'

After thinking about all his different Infused Bodies, Kyle saw a pattern.

Yin-Wind increased his defense and attack while not increasing his speed by a lot.

Yin-Metal increased his attack and speed while not increasing his defense by a lot.

Yin-Fire increased his speed and defense while not increasing his attack by a lot.

Kyle smirked.

'Wonder how the final thing will look like!'
