

## Hammer God 611

Chapter 611 Wolf

Naturally, since Warp Space and Swamp Dragon had been prepared for the True Battle for a long time already, they had already found a suitable opponent.

Once again, it was a beast.

Originally, they wanted to fight a black team since fighting humans made the fight much more chaotic. After all, the enemy could also advance and become a Unique Transcendent.

However, the issue was that they were in the Star Seeking.

As soon as someone became a Unique Transcendent, the person would be pulled out of the battle. Turning the battle into a 2v3.

In that sense, becoming stronger and growing in the battle would be a detriment to one's teammates.

The beast they had found was a Level Six Primal Beast, but this time, they chose one that would counter them.

The last Level Six Primal Beast they had fought was the spider, and they had essentially countered it.

As Kyle saw their target, he took a deep breath.

It was a lone silver wolf that was only about 200 meters tall, which was very small for such a powerful beast.

However, this thing was terrifying.

Even though it was on the same level as the spider, this wolf could probably kill that spider relatively easily.

The reason for that was how it fought.

As a wolf, it already belonged to the faster half of beasts.

Additionally, its small size made it more agile.

Lastly, it had a Lightning Affinity, boosting its speed even more.

It was clear that this wolf preferred close-quarter combat with its supreme speed.

Speed had always been the team's biggest issue while fighting beasts.

As the wolf walked around, it looked at the team of three with disregard.

The three of them obviously were not a threat, and killing them wouldn't give the wolf anything of value.

At that moment, Kyle summoned three Essences and fused several parts of them together.

In the end, he took the created Essence and Infused his Law of Body with it.

While the Law was only a bit more than halfway done, it was still more powerful than his other Complex Laws.

Kyle's body barely changed on the outside, but deep inside, he had incorporated several parts of his created Essence.

Sadly, his half-finished Law didn't have any special abilities.

It simply increased his physical power a lot.

Swamp Dragon and Warp Space also pulled out their weapons.

Warp Space was planning on fusing over ten Fragments of Space, Time, and Gravity to create her own Complex Law.

Naturally, many of these Fragments were of very high levels. At least five of them were Fragments with the complexity of Fragments of Level Three Laws.

Meanwhile, Swamp Dragon had almost completely infused his body with his new Essence.

He was stuck at around 85%.

With a proper battle, he would be able to condense his Complex Law.

Sadly, since his new Infused Law included almost all of his other Laws, he couldn't use his Laws in the battle.

As of this moment, Swamp Dragon's new Complex Law had the power of one of Kyle's Complex Laws, while it wasn't even done.

It was clear that his new Complex Law would turn him into a Unique Transcendent.

It wasn't certain if Warp Space would become a Unique Transcendent after she had finished her Complex Law. After all, it wasn't easy to gauge a Complex Law's power when it was made of individual Fragments.

Swamp Dragon pulled out his bow and readied several arrows.

Usually, Swamp Dragon condensed whatever arrows he needed with his Complex Law, but his old Complex Law couldn't be used since several of its components were Infused in his Law of Body right now.

Luckily, the team had Kyle. He had simply created a bunch of powerful arrows for Swamp Dragon.

Sadly, Swamp Dragon had only created a couple of vials of toxin in advance.

Coating the arrows in the toxin severely reduced its potency. After all, his self-made arrows were completely made of toxin and would be dumped into the body, while this was just a coating.

Kyle looked at the wolf.

He was not the biggest fan of this battle since there was no way it would condense his Complex Law. In a way, this battle felt a bit like a waste.

'Well, it will still help me. Might not be enough to push me all the way to the goal, but it should push me closer. If I manage to get past the 75% to 80% range, I might not even need to have another True Battle. Although I'm not certain how much this specific battle will push me, considering...'

Kyle sighed. 'Anyway, if I play this right, I might be able to reduce the Array of Stars' suspicion of my identity.'

'It's not such a bad thing that I can't officially create my Complex Law. After all, I'm supposed to act like I don't want to join.'

Kyle shook his head.

'Focus! You're about to enter battle!'

Kyle released a deep breath as his eyes narrowed.

Then, his Momentum activated.

The world around the wolf became darker, and its gaze immediately shot towards the group.

The wolf showed its teeth as it growled.

It didn't want to fight them, but if they decided to attack, it would still kill them.

BANG!

Kyle and Swamp Dragon shot forward.

Usually, Swamp Dragon liked to fight from a long range, but with his new Complex Law, his preferences had changed.

Now, he wanted to fight from a medium range to make more use of his physical power.

More of his attacking power now came from the physical power of his shots, and arrows lost a lot of power the farther they had to travel to the target.

Kyle and Swamp Dragon shot towards the enemy at the same speed.

While they were doing so, lightning gathered around the wolf's body.

The lightning arced to the different trees around it, cutting them apart.

BANG!

And the wolf shot forward.

Inside you there are 2 wolves.

You are Gay.
