

Heaven 39

Chapter 39

After their date, Andrea moved into their house occupying the free room. Yaseenia made a welcoming dinner. She has already asked about their favorite dishes so she made small portions of everything they like.

When they finished the dinner Angel and Andrea spoke to Yaseenia. Andrea started, "Yaseenia, I have been speaking with Angel and both of us don't mind doing it at the same time."

Angel nodded, "You don't have to worry about us!"

However, Yaseenia denied them. "I will do it on turns. First, I want both of you to become closer. You two are still getting to know each other, moreover, we don't have any haste. That is why I won't make love with both of you at the same time yet."

Angel and Andrea looked at each other and nodded.

Angel asked timidly, "Then... Who will you sleep with?"

Yaseenia tilted her head confused, and answered "With both."

Andrea asked, "So we won't have sex until Angel and I become closer?"

Yaseenia couldn't understand what they were implying and looked at them even more strangely, "Why?"

Angel said with a red face, "How are you going to have s-sex with both separately and then sleep with the two of us together?"

It finally dawned on Yaseenia, 'Do they think I will only have sex with one of them per night?'

Her lips raised seductively, making both of them swallow, "We normally take from 20 minutes to 50 minutes each session depending on how we want to do it, so... I knock out one of you, then the other, and carry both of you to the same bed to sleep. As simple as that~"

Their eyes widen completely stunned. But after thinking about it... It seems that she was right. Yaseenia had the... Strength to do that.

Yaseenia did what she promised! She first made wild love to Andrea in her room. Yaseenia cleaned Andrea and laid her in Yaseenia's bedroom.

Then, she went to Angel's room and ate her clean too. She also cleaned her and carried her to the same bedroom. Yaseenia laid beside Andrea and put Angel on top of her like always. Like that, the dragoness slept with both satisfied and 'full' girls on her side.

The next morning Andrea was the first to wake up. 'I could say that she ate me clean... Her mouth and breasts were very soft and enveloped my whole length- Stop! You will get aroused if you continue those thoughts!'

She looked at the side and seeing their sleeping posture she involuntarily smiled. She saw Angel on top of Yaseenia with her head using her breast as a pillow. Angel was drooling completely relaxed. Yaseenia had her arms protectively around Angel and her tail circled both of them making sure that Angel didn't fall off her. 'They are so cute!'

Yasenia was the next one that woke up, but like always she only opened her eyes and didn't move. She looked down and seeing the drooling sleeping face she smiled full of satisfaction. After that, she looked at the side and saw Andrea looking at them gently with her light-green eyes. She smiled at her and mouthed 'Kiss' Andrea complied and without waking up Angel, she approached and kissed Yasenia.

Yasenia and Andrea kissed softly for a while. Yasenia stopped and looked down at Angel. Then, they waited for her to wake up looking at Angel's face. Five minutes later her little baby stirred. Like always, when she woke up she took a deep breath and smelled that familiar sweet floral scent 'Waking up on top of Yasenia is the best~'

Then, she rubbed her face on her breast and mewled "Good morning Yasenia~ I love you~"

Angel heard two laughs instead of one and lifted her head groggily. She saw a charming and seductive face, and a heroic and beautiful face smiling gently at her. Angel registered the teasing smile on the charming and seductive face and she felt extremely embarrassed. To escape their stares, she buried like an ostrich again between Yasenia's breasts.

This time Yasenia laughed loudly making her bountiful chest bounce. "How can you be so cute, baby? I love you a ton!"

Then she lifted her up and started kissing and tickling her like Angel liked, "Hahaha stop it *kiss* stop it! Hahaha *kiss* Yasenia!!"

Andrea shook her head and thought with a smile, 'Waking up like this... Is truly good.'

Their days continued normally, because of the Yin energy that Andrea gave her added to the Yin energy from Angel, her cultivation was now advancing even faster. Instead of two days before the excursion, she broke through to the eighth level four days before! This breakthrough made her already monstrous strength explode again.

Yasenia used these four days to complete the three techniques she has been working on with the help of Madeleine. Yasenia didn't advance in the relationship between her and Evelyn, she knew that Evelyn wanted to go a little more slowly. However, they had their little moments.

Cecile, on the other hand, was still debating whether to join or not. She liked Yasenia, but she didn't know how to decide. She also was waiting to confirm something, if this thing was true... She may not be able to join Yasenia's harem.

When she told Yasenia, Yasenia was completely understanding. She even lowered her intimate actions with the other three when Cecile was present. This made Cecile feel less pressure and have peace of mind and time to think about it more clearly.

Thanks to the training grounds, Madeleine's guidance, and Yasenia's high comprehension she managed to create the three techniques before the day of the excursion. Their names were, [Sun charge], [Moon charge], and [Star charge]. As the name implies, they are unidirectional charges with the respective attributes.

When Madeleine saw their effects she was completely awed at Yasenia's comprehension speed and ability to create these skills. She only took a little more than a month to create them! Madeleine looked at the seriously training dragoness and thought, 'At this pace, she will evolve her energy

coat in less than a year... She is completely abnormal. Moreover, if what Andrea told me is the truth...'

The [Sun charge] is the most destructive. When Yasenias makes contact with her target, the Sun energy will explode outwards making scorching damage. The charging speed can be increased the more Sun energy accumulation she has.

The [Moon Charge] charge can be used in any direction. This means that she can charge upwards and she will become airborne. Its strength and speed are similar to the [Sun charge], but it won't explode in contact. This charge will leave a trail with chilling moon energy that will damage even after Yasenias has passed.

The [Star Charge] can be the weakest or strongest charge. The strength and speed will grow depending on the amount of stars Yasenias has gathered with [Starry Sky]. The gathered stars will rotate around her sword while she charges exploding on contact. Perfect charge against a group of enemies.

The day of the excursion arrived! This excursion wasn't only a thing for the violet class. Everyone from the blue class and above participated in this. The rest, from the green class and below, went to a more normal place instead of a forbidden place.

Becoming a cultivator was cruel, and if the students die, they won't care too much, but this didn't mean they should send a newborn calf against a tiger.

The teachers from each class and some from the medical hall were going this time. One class has a minimum of 100 students and there were more than 70 teachers, you can imagine the number of people participating in this.

To go to the cloud layers, they were using a single and enormous flying battle ship. It also had spatial formations that made the space inside bigger than what it seemed on the outside. The strength of this ship was above a mortal realm cultivator and it was specialized in fighting against armies. A miracle of formations, alchemy, and blacksmithing engineering and one of the five of its kind. Three of these behemoths were owned by the academy, the other by the Heavenly Sect, and the last one by the Demon Sect.

In some part of the battleship, a woman with green hair was speaking with a woman with silvery hair. "Tch, that beast-woman has integrated nicely. A monster in human skin attending our noble Academy, truly a disgrace."

The woman with silver hair answered, "I don't think she is that bad... But she didn't even want to give me one massage..."

The woman with green hair spoke at this moment, "How about... We teach her a little lesson? When she is cornered you will appear and save her. I'm sure that she will give you all the massages you want."

Seeing the silver-haired woman's thoughtful expression she persuaded. "Maybe you can snatch her from the other girls~ She just entered the violet class so she shouldn't be too powerful. Their group only has Angel and Cecile as their strong cultivators."

The woman with silvery hair asked, "Aren't Cecile and Angel strong? Even if the rest are newcomers... Those two are absurd. Moreover, didn't Yasenias win against that senior?"

The other girl just said, "Don't worry! We separate them, then we aim at the people that were left alone, and I'm sure Yasenias will appear. If we manage to separate Angel... She is her mate, right? We can harm her a little and I'm sure that the beast-human will become mad."

The green-haired woman said with a smile, "Moreover, with Cecile as the group leader, their routes will become very predictable. She will choose the most efficient routes."

The woman with silver hair nodded but frowned a little, "Do not overdo it, I will let you use some of my people for this. You have to tell me when to act. Also, do not play any tricks. Moreover, forget about hurting them, just make it an act."

The other woman nodded hastily showing submission on her face. However, after the woman with silver hair disappeared, a sneer flashed on her face. She looked at one place marked on her map, it was Yasenias and the others starting point! "Yasenias, Angel, Cecile, don't blame me for being ruthless. Blame yourselves for being more talented and beautiful than me. Worse, you snatching my rightful place as the number one! Even if you enter the cloud layers... I won't let you leave them!"

In another place of the battleship, Yasenias and the others were chatting and looking at the map. They will be thrown in a dangerous place, but opportunities near this place are abundant. Cecile was the head of the group and the main decision-maker. "We will take this route, and avoid the fourth rank beasts. If we are locked by one of them, we are the same as dead. The third-ranked beasts are dangerous, but if we coordinate well like we did these two weeks of training, we can defeat them without major problems."

Yasenias, however, asked with frowned eyebrows, "Won't it be too easy to track us? The other teams are going to be able to follow us easily if we take this predictable path."

Cecile tilted her head and asked. "Why take precautions against our classmates?" Yasenias was stumped.

Yasenias patted her head and said, "Cecile, don't you find it strange that you were ambushed by someone of the Thousand Poisons Sect outside the Academy grounds?"

Cecile nodded, Yasenias continued while thinking 'Is she naive? Or she just doesn't care about anything that is not cultivation?'

"Cecile, that ambush was most likely set up by a classmate or someone close to you. We have to be on guard against our classmates more because, unlike beasts, classmates are unpredictable. Let us change the route."

Cecile thought for a moment, then nodded. Yasenias smiled and patted her head with her tail making Cecile half-close her eyes in comfort. In truth, Cecile wasn't naive, she was indifferent. She had the mentality of taking the bull from its horns and beating it up instead of dodging it.

Then, they changed their route. Now although they can meet with a rank three beast easier, they won't be easy to track.

The two days of the journey in the battleship finished and they reached the "entrance" to the cloud layers. It was a giant tunnel on a cloud that seem to go on forever. The ship was like small fish going inside the mouth of a Whale. When the battleship was passing that tunnel some beasts appeared from the clouds with terrible auras. Yasenias couldn't even feel their strength, only an instinctual fear that made her want to run and hide.

Mason stepped forwards and appeared on the bow of the ship. He took his two-meter-long sword and seemingly slashed it once. *CRACRACRACRASH!* The space before him was literally shattered like glass in multiple directions mincing all the strongest beasts that were attacking the ship. The ship attacked the rest surviving beasts and in just two minutes not a single beast was left!

Yasenia looked at that attack and thought ‘As expected, cultivators that have passed the mortal realms are in a completely different league. I heard mom say once, “All cultivators under transcendent level are ants!” Seeing teacher Mason’s power... That statement seems to be true.’
