

## Heaven 501

Chapter 501: S.L.U.T. Group. Valeria's Majesty.

Tatyana then asked Cecile to go with the two S.L.U.T. fans to find the others and see if they were still around.

Cecile nodded and left together with Kali. Kali was now one of the strongest combatants, as she had increased a level and multiplied her might.

Moreover, the recently nourished Valeria was extremely powerful. As she was now, she could best Tatyana or Mirrory.

"Kali, we need to exit from Torrent City stealthily. Do you or Valeria have any stealth spells? I can more or less distort the space around us, but any strong cultivators can see through my stealth easily."

Kali shook her head. "I don't have any. What about you, Valeria?"

Valeria commented. "I could summon a plant that's an expert in that if you want. However, if I were not here, how would you leave this City silently, Cecile?"

Cecile answered. "I have a few formations made by Angel. Even If there were no formations to help me, I've mastered my space skills enough to teleport to a distant point. I can't move other people with me yet, but I could move on my own."

Valeria nodded. "That's really good. What is the distance of your skill?"

Cecile commented. "If I'm mid-combat, my [Blink] skill can instantly move me between a hundred and five hundred meters. It depends on the energy fluctuations on the battlefield. With unlimited time, I hit my maximum distance in about five minutes, about twenty kilometers."

"Very good. Please wait for a second until I summon it. That way, you don't have to spend the stealth formations you have."

The two S.L.U.T. members behind them also stayed silent.

After a few seconds, Valeria's voice sounded like a distant yet all-reaching whisper. "[Nature Queen's Parade: Ethereal Blossom]."

They saw the space before their eyes fluctuate, but they felt nothing. It would've been impossible to sense if they weren't looking right at that point.

Cecile and Kali blinked and looked around, not seeing anything.

"Cecile, Kali, do you see anything?" Questioned fan number one.

"I also can't see anything." Commented fan number two.

Cecile asked. "Um, Valeria, are we hidden?"

"Hm? Of course, don't you see that little thing creating an aura around you two?"

They couldn't help but feel the enormous difference in strength right at that moment.

If Valeria used this thing to sneak attack them, they would be dead before they could have even reacted.

Kali coughed. "We can't see it, Valeria."

"Oh? Show yourself for them to see, child."

The space before them distorted again as a cute human-shaped grey plant monster appeared. It had a leaf-woven cape that hid its body, only showing its face.

The face was simple, with big black pearly eyes, a small mouth, and a cute bob of black leaves as hair. It complemented the grey body quite nicely.

It was a bit creepy but very cute. Kali wanted to pat it. "It is so cute~."

"Cute?" Valeria asked.

Cecile nodded. "Well, it looks good."

"Open your mouth, [Ethereal Blossom]."

The four of them saw the body tear apart from the middle as an enormous mouth filled with salivating razor-sharp teeth appeared.

Their hearts almost jumped out of their chest.

"[Ethereal Blossom] is a plant that hides and then swallows its prey whole, mincing them with their powerful maws. It can probably pierce through Yaseenia's scales in her dragon form."

Kali's intention to pet the cute thing disappeared like smoke.

"S-Should we go, Valeria?"

"Eh? I thought you wanted to pat it."

"Don't worry. I don't feel like it anymore."

One thing was looking past appearances. The other was not feeling horrified when a horror out of a nightmare opened its scary mouth right before you.

"I see. Then, let's go."

They walked outside the inn and saw that everyone was ignoring them.

The [Ethereal Blossom] approached a few beast humans, making our girls sweat, but Valeria would summon a spectral staff and smack its head before it opened its mouth. "I already told you that they are not food yet!"

Kali blinked. "Yet?"

Valeria laughed. "Well, dear Yaseenia seems to intend to kill many beast humans. They can become fertilizer later."

The four looked at the little thing and subconsciously gave a prayer for the unfortunate people that would die in the [Ethereal Blossom]'s maw.

"However," Kali trailed her words as they observed the cute little thing skipping as the cape and leafy hair bobbed with its cheery steps. "...When the mouth is closed, it is adorable."

"Hm, I agree." Answered Cecile.

"I can't say no to that, Kali. Look how its hair jumps up and down, quite a cute little grey horrific monstrous thing."

"I never thought anything would be described with the combination of those adjectives, yet the little thing before us fits it perfectly."

With [Ethereal Blossom]'s help, they just walked out of the city.

Kali turned around and stupidly looked at the giant gate that led inside Torrent City. "Just like that?"

Cecile sighed. "Well, they are not our seniors for nothing."

Kali nodded. "You are right. We are quite lucky that we can learn from such powerful seniors."

Valeria giggled. "Oh, you girls, if you praise me so much, I'm going to blush."

Cecile blinked. "Do you blush red?"

"No, I think I become greener. I don't remember, in any case. It has been too long since I last blushed. I don't even remember why I blushed...."

Kali consoled her. "Well, you'll have many interactions with Yasenya and me, Valeria. I hope we make your heart skip a beat and make you feel bashful sometime soon, hahaha."

Valeria smiled. "Yes, I hope so too."

Cecile and Kali took out their flying swords, and Kali picked [Ethereal Blossom] after Valeria said it wouldn't bite her.

The two fans stood behind them and hugged their waists.

Then, while Kali carried the adorably monstrous [Ethereal Blossom], they sped toward where the other fans might be.

After flying for almost an hour, they reached where they were hiding not too long ago.

After all, these two had been captured only a few days before, so they might still be around.

After they arrived, one of them asked. "Cecile, Kali, do you have any communication devices? The normal ones that are sold at the Academy's shops."

Kali nodded. "I had to buy a few to test how to create ours. Here."

The woman smiled and took it. Then, she activated it and changed the energy signature to the one they used to communicate with each other.

After waiting a few seconds, the device's connecting sound was heard.

Kali smiled. "Oh, this is a pleasant surprise."

Cecile nodded. "Good news."

Then, the woman on the other side of the device said. "We love our Peerless Divine Dragoness."

Cecile's and Kali's smiling expressions broke, and they looked at the device, flabbergasted.

Yet, this was just the beginning.

The S.L.U.T. member beside them asked. "Do you love her, or do you like her?"

The other woman said with a solemn tone. "I want her children!"

Cecile almost broke something, and Kali began coughing.

Then, the person on the other side shouted. "Sister! You are back. I thought you were captured."

"I was captured, but a benefactor saved me. Guess who it is."

"Guess? How can I guess something like that? Are you stupid? Did they hit your head too hard?"

"Hahaha, today I don't care about your insults since it was Lady Yassenia herself who saved me!"

"..."

The other side was silent for a moment, and when Cecile and Kali thought the other person would scream in excitement, they heard a sniff and a person sobbing. 'What the hell?'

The woman cried. "Have they broken you so much during these three days that you started hallucinating!? Sister, come back to your senses! How could our Lady be here? We are not even in the same world!"

Then, while our girls were stunned, the woman said with righteous indignation. "Those bastards! I'm going to kill them for their sins! I swear on the Peerless tits of the Divine Peerless Celestial Dragoness of the skies that I'll cut off their dicks!"

Cecile's veins almost popped. "Shut up and quickly tell us where you are before I freeze you into an ice cube."

The woman said with a startled voice. "This cold voice that is enough to make oneself feel unworthy and also makes me want to end our miserable life... Cecile!?"

Kali burst into laughter and spoke softly. "Yes, we are here. Tell us your coordinates."

"Oh! This gentle and soft voice makes me want to be hugged and loved... Kali!"

Cecile almost threw the communication device flying. "Your position, quickly!"

"Right, right, we are hidden in a cave twenty kilometers in the direction of the fallen trees."

Cecile and Kali looked at the two fan members and saw them nod.

Then, they heard the woman speak. "By the way, we are fighting against a few beast humans."

Kali hastily asked for the two women to lead the way and followed behind. Then, she reprimanded the woman while running in that direction. "Why didn't you say it earlier? We are here to help you, not to speak about Yassenia's tits or anything like that!"

"Oh, we are holding up just fine. We should be able to kill them in another twenty minutes. Also, Kali, I know you can even suck them and drink from them, but her tits are a way of life for us."

Cecile was already numb and didn't react, while Kali looked at the device with a wry expression.

Cecile and Kali were surprised and arrived a minute later.

The scene was chaotic as a group of twenty-eight human women fought against five wounded Ape kin.

They had thick arms and strong bodies, and their cultivation was on the mid-level of the Ethereal Soul Body realm.

However, even before this strength, the twenty-eight girls worked with seamless cultivation as attacks of different elements flew and sliced into the five Ape kin.

The ape kin tried to punch a woman, but the woman jumped backward, another two taking her place to slip past the arm and swing their swords against his body.

The swords collided but only sliced superficial skin. The ape kin roared in anger and punched one of them when that one used a movement technique and easily avoided the hit. Then, another woman fell from the sky with fierce eyes as her sword shone with the brilliance of the light element.

The ape kin's face was sliced with a flash, but he managed to avoid losing his eye.

He was about to follow, but the floor beneath him sunk, making his standing platform collapse and his stance crumble. Darkness flowed from between the rocks and attacked the sliced skin, making the wounds larger.

The ape kin could not counterattack as a perfect combination of attack and defense interlocked into a beautiful constant assault.

Cecile and Kali didn't even hesitate to join the battle. "You two, hide and ambush from behind."

The two of them nodded and moved through the forest to a pincer attack them.

The five apes saw two beast humans, Kali and Cecile, approaching, and they laughed. "Humans, now you don't have a chance! With them added to us, you won't be able to last long enough."

Before anyone else could continue speaking, the forest's energy seemed to converge into a single point in the air as a three-meter-tall lady with a wooden staff appeared, wearing a gorgeous floral dress that showed her perfect curves without looking seductive.

She looked like the manifestation of nature, looking down at the world with her green eyes and golden slit pupils.

Her aura was gentle, profound, and all-encompassing but carried an undeniable majesty.

The staff she held with one arm looked ancient and elegant. It appeared like three branches coiling up and creating an open top with a golden sphere floating on top of it.

Valeria spun her staff as she flew down across the air. Then, together with her voice, a monstrous wave of Life energy covered the forest. "[Life Intent Level Nine], [Divine Spirit Empress Arts: Cradle of Life]."

The titanic wave of Life energy encompassed all twenty-eight women in an instant.

Their wounds and bodies instantly healed, and all the fatigue disappeared as all the girls fighting were bathed in the breath of the Spirit Queen.

Everyone but Kali and Cecile was so shocked that they stopped fighting momentarily.

The majesty and power Valeria commanded were utterly abnormal.

"Don't worry, children. With me here, you can't get hurt."

Valeria's voice seemed to encompass the world, making the twenty-eight women feel like they had a guardian goddess behind them.

"FIGHT!"

Their shout echoed as they charged toward the five Apes at fivefold their previous speeds, leaving behind green energy trails.

Chapter 502: Fight against Five Beast Human.

Valeria's aura increased everyone's strength multiple times, so the ensuing battle became much more on one side.

All battles happened simultaneously as they massacred the apes.

Cecile approached one of the Apes at tremendous speed and appeared below him.

The Ape looked down and saw Cecile's cold and indifferent gaze.

He lifted his thick arm to punch downward, but Cecile was much faster as she kicked up and slammed into his stomach.

The human-shaped ape with fur on the arms felt Cecile's foot sinking into his stomach, and then the kick's momentum transferred to him, sending him flying. "Gah!"

Cecile tensed her bow as the Ape flew, and everything around her instantly froze. Then, she chanted, her breath creating a small but visible cloud. "[Lunar Freezing Catastrophe]."

The action was quick. As Cecile tensed her bow, the phantom image of a giant silver bow materialized behind her. In it, three arrows were locked. One was silver, the other green, the last one black.

Cecile released the bowstring, and the three arrows flew off the phantom bow with a powerful shockwave. They combined mid-air, tearing through space and arriving before the Ape who had just landed from her kick.

The silver arrow with green and black markings impacted him and exploded in a massive hurricane of Wind, Moon, and Spatial energies.

The ape-man shouted as his body was torn apart chunk by chunk by Cecile's potent attack. Cecile did not stop her attack.

She knew that these body cultivators were highly resilient, so she flapped her large silver wings and flew high up into the air. She locked on him and mercilessly chanted the name of one of her innate skills. "[Moon Phoenix's Lonesome Elegance]."

It was a battle dance skill that allowed Cecile to move at high speeds while firing a barrage of one of the most potent arrow skills she knew at that moment. This time, it was a barrage of [Flashing Moon Arrows], a high-velocity attack that used Spatial and Moon attributes to tear apart her enemies.

Cecile's body flashed in the air as her arrows looked like silver laser beams flashing down to the Earth.

Before the ape knew what was happening, he felt his body lighter and looked down for one last time. The final image in his retina was the sight of his body, which was filled with giant holes.

Cecile shot one final arrow, erasing his head with it. Her indifferent eyes looked around at the battle around her.

Kali saw how Cecile kicked the Ape away from the ground and then shot a terribly strong arrow, creating a giant hurricane of energies far away from them.

She also didn't lose time, as her eyes shone while Wood, Nature, and Life energies gathered around her.

She summoned a robust and sturdy vine that latched around the leg of one of them and threw him away from the group. Then, Kali used her innate three Tail skills.

Her large rightmost tail tapped the ground behind Kali as she focused on the area around the Ape.

"[First Tail: Nascent Life]."

The ape was quick to react and charged toward Kali, but the forest around him came to life as every plant lifeform followed Kali's command and attacked him.

He was quickly tangled and roared in frustration. "Release me, woman!"

Kali ignored him as she focused on the movement of energy inside her meridians, which were currently working at their limits as they moved waves of energy inside her dantian around her body.

"[Second Tail: Blooming Life]."

Kali's second tail gently tapped the ground behind her, creating a ripple that spread far out.

The Ape ripped apart some of the plants latching onto him when the ground around him trembled, and all the plants grew nonsensically fast.

The strength increased, and he began feeling his body being more and more constricted.

He wanted to shout, but a tree used a thick branch to latch around his neck and squeeze hard, making breathing almost impossible.

"[Third Tail: Developing Life]."

As Kali used almost a tenth of her total energy pool, all life plants Kali was currently feeding transformed quickly, gaining thorns, mouths, poisonous spores, and many more evolutions.

The silently resisting ape man suddenly screamed at the top of his lungs as every plant creature became a fearsome predatory monster and began devouring him.

Kali tapped the ground with the tip of her foot and chanted one last time. "[Overgrowth]."

The plant life roared and created a low and terrifying sound as their strength increased many folds and tore the ape into pieces, consuming him and leaving nothing behind.

Kali deactivated her skills and nodded.

"That's really powerful, Kali."

Cecile's indifferent voice echoed in her mind, making her smile gently. "Thanks, let's help the others if they need to."

Valeria saw how Kali and Cecile chose their opponents, so she stopped hovering above the battlefield and swooped down like an eagle. "[Ethereal Blossom], eat one of them. Leave the last one to the group of human women."

Valeria landed before the third ape, making the floor crack like a spider web because of her strength.

The ape-man had to look up because of Valeria's height, but that didn't deter him from punching at her without holding back.

Valeria extended her arm and placed her palm before the fist.

**\*BANG!\***

Valeria's long green hair was blown with the wind produced by the attack, but her body stayed in place. Not even the floor below her was further damaged. "Hm, not bad. You are physically stronger than all of our children but Yasenia. Hm? Why did you stop attacking? Continue."

The ape man's face was filled with horror as he looked at Valeria. "W-Who are you? Why are you defending these women?"

Valeria said indifferently, looking directly into his soul. "Is it important? Attack me or die."

The Ape man felt that Valeria's gaze was infinitely profound, and he began attacking out of pure terror.

Valeria stopped his attacks easily with one hand and got thoughtful. 'I see. We may have overestimated their strength a little bit. Either way, Epoch Core Realm Cultivators should still be out of bounds. However, as long as our little girls reach the third or fourth level of the Unification Realm, they should be able to face any Beast Human in the Ethereal Soul Body realm.'

After receiving attacks for twenty seconds and not moving from her standing place, Valeria nodded.

The Ape was shouting with despair as he attacked with everything he had. "WHAT ARE YOU!? WHY WON'T YOU DIE!?"

"It is irrelevant to you. You can die."

Valeria spun her ancient and elegant staff and lightly smashed the back against his chest. "[Divine Spirit Empress Arts: Decay of Life], [Decay Intent Level Nine]."

Her luxurious wooden staff seemed to harmonize with the world around Valeria as it smashed the ape's chest, creating a sonorous bang.

The ape's chest caved inward because of Valeria's monstrous strength, and as blood poured out of his mouth and eyes, he flew away.

The ape's body began decaying the next instant, and he quickly became a rotting corpse.

While Valeria used this one as an experiment, [Ethereal Blossom] had sneaked behind the fourth Ape and tangled him with its vines, while the grotesque mouth opened and it began devouring him alive.

While he was devoured alive, the ape's sounds were terrifying.

[Ethereal Blossom] saw the ape fighting Valeria flying away and ran after it while delightfully munching the one in its mouth.

It didn't care that it was rotting as it also poured into his mouth, mixing the semi-alive and rotting corpse into a mess that made [Ethereal Blossom] delightfully squint.

The way of dying was gruesome, to say the least.

The last ape reacted and jumped away with pure terror, trying to escape.

His speed was the highest he had reached in his life. "What kind of monsters did I encounter?"

Cecile and Kali looked over and hovered around. Valeria appeared behind them while carrying the again cute-looking [Ethereal Blossom].

"You won't help them?"

Cecile shook her head. "If they can't deal with him quickly, I will have to educate them when we return."

Kali laughed. "It should be a quick death. Oh, he stepped into the trap."

The last ape man suddenly saw two human women appearing with their swords at hand and slashing their swords while creating wind hales and ice pikes.

He didn't dare stop and placed his arms before him to use his sturdy body to push through.

The attacks collided, creating gashes and making blood bloom like roses. However, the wounds weren't strong enough to make him falter.

Yet, stopping him was not what they aimed for. When he lost his vision and lifted his arms, ten of them appeared from the sides and released a barrage of elemental attacks.

The spiritual sense range of Body Cultivators was smaller since the size was related to soul strength. However, the perception inside was connected to the body's strength, so they were a small but highly efficient spiritual sense. Perfect for combat.

He felt the wave of attacks near him and used a skill to harden his body and continue running.

**\*BANG!\***

His body's skin and bones cracked, but that was far from enough to make him stop.

The twelve girls didn't even follow and looked at his back indifferently.

When the ape-man stepped into a glade, the remaining twenty women were waiting for him.

They had charged their most powerful attacks and released them without mercy.

**"HUMAN SCUM, YOUR END WON'T BE PEACEFUL!"**

The ape-man couldn't dodge the massive attack created by twenty Unification Realm Experts, and it landed on him in a gigantic explosion.

The power of the attack basically disintegrated the beast human and left behind only a deep crater.

Valeria nodded. "They could've attacked him in waves and killed him quicker, but they planned a situation to create an attack that would one hundred percent kill him. I think they are very good."

Cecile nodded. "Let's recover the rings of the three other apes. The one with mine and that one didn't survive the blast."

Kali opened her hand. "They are here already."

Cecile landed before the thirty women and said indifferently. "Good job. However, next time you are in a situation like this one, be quick to inform others if you can. The way you joked around instead of telling us the situation right away was not something you should've done."

The leader of the group, a gorgeous black-haired woman, nodded. "Sorry, girls. I was too excited. I took into account our chances of winning while doing so. However, I know I'm wrong. It won't happen again."

Cecile nodded, and she couldn't help but find this woman familiar. However, she didn't have time to ask for names and presentations. Without delay, she began giving orders.

Chapter 503: Cecile's suggestion. Emerald Fury.

Cecile nodded, and she couldn't help but find this woman familiar. However, she didn't have time to ask for names and presentations. Without delay, she began giving orders. "We are leaving from here. We don't know if they have items similar to Soul tablets, so we must be careful."

Soul Tablets are items that can show the well-being of a person through an object. The cultivator must detach and place a strand of their soul in it to use them. If the cultivator dies, the strand of the soul dissipates, and the tablet breaks.

There are many types and of different qualities. The highest quality ones can show even the emotions of the person connected to them. The top-tier ones would even be able to use that strand of the soul to find the killer of the cultivator connected to it.

However, the last ones didn't even exist in the Sky Continent and were items of a much higher level.

By the way, Tatyana has one for Yasenias, but it is with Tatyana's main body and not this one.

Cecile's order was swiftly carried away, and they all left quickly.

Cecile turned toward Valeria and asked. "Valeria, could you use your skills to hide the battle around this area?"

Valeria waved her staff, and the ground trembled as the vegetation proliferated, making the semi-destroyed forest lush with giant trees and abundant vegetation.

It didn't look completely natural. However, even if they inspected the forest, the thing they would find that a large amount of Life energy recently nourished the forest.

Any other battle scars left on the earth would have disappeared, leaving behind a mystery.

Cecile and Kali had a formation with similar effects, something essential to carry around, but since Valeria could do it quickly, they didn't bother to use it.

Our girls were always prepared for most scenarios because Yasenias insisted that they always carry around these things. Even with their giant rings, all the items Yasenias forced them to carry almost occupied ten percent of the spatial items.

Remember that their rings were as large as 100,000 cubic meters. To have ten percent of that filled with different items for many different situations was a lot.

Also, the items were gathered in the Secret Realm and also created by them. Our girls used one hour daily to create small miscellaneous items for themselves, like cleansing, concealing, and shielding formations; one-time-use weapons, shields, or armors; healing, poisoning, antidote, energy-gathering pills; and many more.

They didn't need them since their combat equipment was above mid-level Heaven ranked. However, even when they thought they had too many things, Yasenia would always appear with a smile and ask. "Are you girls working on things to protect yourselves?"

So, these sweet attacks of concern made them work extra hard during that hour. They have accumulated quite a lot after working for more than a year on these items since Yasenia had been asking for them during their time in the Academy.

Most were earth ranked if you searched, with a tiny minority of heaven-ranked items. Each time they looked at that pile, they knew ninety-nine percent of them were mostly useless, but if Yasenia caught them while getting rid of them... Well, their nights would become quite extreme.

Anyway, after leaving no trails behind and moving far away to a safe place, Cecile looked at the time and commented. "Kali, return to Torrent City. Your competition is coming up soon."

Kali frowned. "But I can't leave you behind alone. It is too dangerous not having a senior to look over you and the girls. Also, what are we going to do with them?"

Cecile nodded. "They are a bit more than we expected. Therefore, I've thought of transforming into my Phoenix form and flying back to Koran City with them. My body is already recognizable, and if I tie them up and we give them a debilitating and aura-masking poison, I can easily say they are new slaves I caught up to be maids. Either way, they have a pleasant appearance."

Kali turned her head up and asked the three-meter-tall Lady. "Valeria, what do you think?"

Valeria nodded. "It is a good plan. I see nothing wrong with it. You can't carry them back to Torrent City after killing those apes. It would be too suspicious. If Cecile were to carry them back as slaves, there is no way they would think they are powerful enough to fight against them. Tying the clues together is basically impossible unless they are paranoid. Even then, proving what they are saying is the truth is even more difficult, as Yasenia has already established herself as a female human-slave collector."

Cecile nodded. "Perfect. Let's go with this plan, then."

Suddenly one person asked. "Kali, I remember you having two tails. Where did the third one come from?"

Kali smiled. "Of course, Yasenia and Valeria helped me grow it."

Their eyes turned toward the Spirit Queen, and they nodded. "Your summon has become so powerful and intelligent. It's like she is another whole person."

"Hmm, I really like Kali's summon. That body makes me remember Yasenia."

"Right. Those pair of giant green melons are quite the sight, especially since the dress does little to hide the shape being that tight and open."

"Are you girls stupid? Haven't you heard Cecile and Kali call her senior? Moreover, her demeanor is exceptional. Have a bit of respect!" Said the group leader, the same charming woman Cecile found familiar.

Kali smiled. "If we have time in the future, I don't mind explaining. However, you girls should get going as fast as possible. I'll return now with Valeria. Goodbye ~."

They all waved their hands. "Goodbye, Kali."

"Give our greetings to Yasenias."

"Say to her that we love her."

"Yes, yes. Say to her that we want her children."

**\*BANG!\***

The woman flew in a beautiful parabola.

Cecile smiled coldly and asked. "Are you going to continue bantering around or not?"

They all tensed and answered. "No, we won't, ma'am!"

Valeria commented. "By the way, Cecile. I'll leave [Ethereal Blossom] with you for the moment. I'll use another plant creature to carry Luna here. When she arrives, you can send Luna back with the group. [Ethereal Blossom] and the other will return to me easily."

Cecile nodded. "With [Ethereal blossom], hiding won't be a problem. Thank you, Valeria."

Then, Kali and Valeria returned to the city.

With Valeria's help, sneaking around was as easy as turning the palm of your hand.

Once she arrived back at the inn, three hours had passed.

When she approached the door, she somehow felt Yasenias's presence on the other side of the door.

However, It wasn't through her spiritual sense, but something more profound, deep in her soul.

'Hmm? What's this feeling?'

At that moment, Yasenias opened the door and yanked the fox inside, closing the door right after.

Kali fell into a warm and soft embrace and then heard Yasenias sniffing around her body as her hands checked every corner of her body. "Honey, you are home. Sniff, sniff. Did you girls find something dangerous? Sniff, sniff. I can feel that you've fought against someone. Sniff, sniff, sniff. Are you okay? Are you hurt? Where is Cecile? Did something happen?"

Kali laughed aloud and took off her veil to kiss her Dragoness. She wanted to separate and speak, but the long tongue of her reptile lover invaded her mouth and wreaked havoc inside, making Kali feel soft all over.

Valeria summoned another plant creature that focused on stealth and speed, and after explaining things while Yasenias ate her fox, she sent Luna away.

Luna understood that nothing would happen, but being set apart from Evelyn made her feel stuffy and uncomfortable.

Evelyn patted Luna's head and spoke. "I promise you'll see me soon if you behave, okay?"

Luna grabbed her clothes and nodded.

"Very good. Now, answer with your words."

Luna opened her mouth and stuttered. "I... under....stand."

Evelyn smiled widely. "Perfect."

Luna blinked twice and stepped forward to hug Evelyn. Her giant breasts squished against Evelyn's chest, making our little pervert's smile widen.

Evelyn patted her back and then said to Valeria. "Carry her away."

Valeria nodded and sent her away.

The dark quadrupedal plant creature opened a white flower on its back, and Luna stepped inside after Evelyn told her to do so.

Then, the flower closed, and the creature melded with the shadows as it left the inn unnoticed.

Then, Valeria turned into a green light and sunk into Kali again.

Kali managed to separate from the kiss after Luna left. "Love, stop, or I'll melt in your embrace~."

Yasenia smiled and licked her cheek softly. "Did you like it?"

Kali giggled. "Loved it. Also, love, don't worry. I'm perfectly fine. There were just a few bothersome monkeys that were attacking your fan members. We killed them and saved all of them. Cecile is waiting for Luna to return to Koran City with them."

Kali proceeded to explain what had happened and their plans.

Yasenia blinked twice and nodded. "No wonder I felt you getting closer while Cecile was still far away. I thought something dangerous had happened and was about to rush out."

Kali asked with a lifted brow, remembering the strange sensation. "How did you feel me?"

Yasenia smirked and passed her arms over her shoulders, leaning her mouth right beside her ear. "How about you look inside your soul? You may feel something interesting."

Kali's legs almost buckled after such a sensual whisper. She followed Yasenia's words while her face was buried in the dragoness's neck and looked deep inside her soul.

Once there, Kali felt that strange connection once again.

It was a one-way connection, but the channel attached to her allowed her to go in reverse and feel the other person.

Kali was more than surprised to find that, although it was faint, a connection with Yasenia across that channel allowed her to feel Yasenia on a spiritual level existed.

Her body was petrified, and her eyes widened to the limits. "Huh!? What happened? Isn't this a soulmate connection!?"

Yasenia separated and looked at Kali with deep love. Then, she spoke as she bit the scarred lips of her fox while purring. "I discovered in the past that my drop of blood essence can open a connection

if it is absorbed during a transformation and assimilated. While you were biting my neck during the transformation, I allowed the drop of blood essence to slip inside you."

Kali's eyes widened more, but unlike the happy look the dragoness expected, she next saw Kali's eyes shining while deep anger blazed alight in her verdant green eyes.

"You used your blood essence during this dangerous time!? I'm going to! I'm going to!!! Argh! I don't even know how to punish you!"

Yasenia was stunned at Kali's outburst, and she began stuttering. "Don't be angry, honey. I did it for you. I even discussed it with Valeria...."

Kali's aura burst from her, and Yasenia went to her knees and sat on them like a good girl, her back dripping with cold sweat while her tail curled in fear.

Kali was basically snarling as she spoke. "YOU ARE TELLING ME THAT YOU TOLD THIS TO VALERIA, AND SHE DIDN'T STOP YOU!?"

Yasenia quickly nodded twice.

"VALERIA, YOU BETTER COME OUT AT THIS INSTANT!"

Valeria appeared and sat on her knees beside Yasenia with an obedient expression. "Did you call Kali?"

Kali smiled angrily, her beautiful verdant green eyes shining like a pair of emeralds through her anger.

"Did I call you? Hahahaha. Oh, I sure did, Valeria."

One Ancient senior and one unprecedentedly talented dragoness felt their bodies shivering as the fox's woman's green eyes shone and the three tails behind waved with a wind that shouldn't appear indoors.

The other girls gulped. 'Mommy, the gentle ones are the scariest when they get angry.'

Chapter 504: Kali's compromise. Angel's shock.

After Valeria appeared, she sat on her knees beside Yasenia with an obedient expression. Not really knowing how to face her angry Master, she smiled and asked. "Did you call Kali?"

Kali smiled angrily, her beautiful verdant green eyes shining like emeralds through her anger.

"Did I call you? Hahahaha. Oh, I sure did, Valeria."

Valeria and Yasenia flinched.

"You see. I've heard quite a funny thing from Yasenia. Something about you allowing her to use her blood essence to help me? It would be funny if it were true, right, Valeria?"

Valeria smiled, her lips twitching. "Well, I did do that, but."

"But what?"

The flat tone made Yasenia and Valeria feel intimidated. Yasenia was internally crying. 'Honey is not being nice. I want her pampering, not her lessons.'

Valeria was thinking. 'How do I calm her down? I should explain things as they are, right?'

Kali stepped forward, her three tails waving menacingly, and smiled widely. "Why did you allow Yasenia to do something so stupid?"

Valeria stammered. "Kali, listen to us. Yasenia won't be affected by this drop."

Kali's large fox ears stood up straight in rage as her three tails waved dangerously. Then, she snarled at Valeria with fury. "She wouldn't be deeply affected even if someone slices her stomach out! But that does not mean it is correct to do so! If Valeria were to feed us her flesh because it is nutritious, oh, ohohoho, you best believe I would smack Yasenia's butt so hard her personality would turn into Evelyn's!"

Yasenia felt guilty, but she didn't regret it.

It was true that she was not too affected. At most, her cultivation speed would drop by ten percent for a year.

This can be prevented by cultivating longer. Either way, she uses too much time to sleep and can use those moments to grow instead.

Yasenia sighed and smiled. 'I should calm her down now that she vented.'

Yasenia stepped forward and hugged her furious fox.

Kali's anger deflated by half once she fell into her lover's soft and comforting arms. "Uhh... Yasenia, hugging me is cheating."

Yasenia kissed her forehead and spoke softly. "Kali, love. The effects are only a negligible amount of slowdown in cultivation speed. I'll cultivate for more time daily and make up for it, so don't be angry. Not only that, I'll let you supervise my cultivation hours daily, okay?"

Kali looked up at Yasenia's softly smiling face and felt defeated.

The others looked at how Yasenia tried to console her, and they all smiled.

Andrea decided to step forward and help Yasenia. "Kali, you are now like Angel, having a deeper connection with Yasenia. So, I think you should be happy."

Yasenia looked at Andrea and smiled tenderly.

Kali sighed while Yasenia nuzzled her cheek and commented. "Andrea, you know that I'm very happy. However, we can't spoil this behavior."

Kali patted the dragoness rubbing on her, and sighed. "You all know that our dear will go to any lengths for us, so we must be firm and make Yasenia understand that doing these things is not right unless it is a life-and-death situation. Is the tournament that important? Evelyn's and Angel's performance is more than enough to reach our objectives."

Yasenia looked at Kali, and Kali lifted a hand to caress her cheek. "Love, I know you want to give us everything. I know you want to pamper us with all your soul. However, giving blood essence is at the level of feeding us your flesh because it is nutritious. Would you do something like that?"

Yasenia shook her head. "That's a bottom line I don't want to cross."

Kali nodded. "Then, add your blood essence into that bottom line, okay?"

Yasenia sighed and nodded. "I understand. Sorry for making you angry, Kali."

Kali laughed and used her arms to make Yasenia lean down so that she could kiss her. 'My love is so tall~.'

After kissing, Kali suddenly commented. "Not to mention, unlike Cecile's connection with you, Angel's and my connection with you is not permanent, so I don't feel it is worth it."

Angel's eyes opened wide as she became a shocked statue. Yasenia was also surprised.

Kali frowned and asked. "You didn't know? I can feel that the Blood Essence inside me will eventually dissolve and disappear. This will probably end the connection between us in the future."

Yasenia turned to look at Angel and saw her baby's aura and entire body gain the 'wilted eggplant' feeling of an abandoned puppy.

Yasenia's heart squeezed. 'Oh no, my baby!'

Yasenia's tail stretched and latched onto her little dear, pulling her between Kali and herself and squeezing her face between her breasts. "Oh, baby. Don't be sad."

Tatyana was also surprised. "It isn't permanent? I was sure it was. How can you feel that it isn't?"

Tatyana stood up and approached the three of them, using her senses to analyze it deeper.

Kali used her tails to surround Angel and Yasenia and make the little girl more comfortable, then explained it. "I can't guess how long it will last, but something inside tells me it isn't permanent. The aura of the blood essence is not completely fused with my bloodstream, and it will eventually be digested."

Yasenia sighed while kissing the top of Angel's head. "Well, I found it strange that I could mark more than one person besides Cecile. Even if I'm an exception, marking is something that it's difficult to do, even with rituals."

Andrea asked. "Is it that difficult?"

Yasenia chuckled. "If it weren't, my soulmate wouldn't be Cecile but Mom. Do you think she is someone who would give up that position easily?"

Kali sighed, and she used her hand to pat Angel's blonde hair. "Don't worry, Angel. It will last a lot of time and will slowly dissipate. We probably won't even feel it was gone since the process will be very gradual and across many years."

Yasenia nodded but was busy consoling her baby. "Oh, my baby, don't be so sad. My heart breaks when I see you so upset."

Angel lifted her head, and Yasenia was startled to see tears falling down her cheeks. "But I want to be your soulmate! Why must it disappear? I don't want to!"

Yasenia separated from Kali and hugged just Angel closely, picking her up and kissing her lips softly. "Don't cry, love. Don't cry."

The dragoness looked at the hour and commented. "Let me alone with her for twenty minutes. We should have enough time to make it for the competition."

Then, she carried Angel in her arms and went to a room on the side.

Evelyn sighed. "Sadly, we'll miss the Tattoo Masters competition. I was really looking forward to it."

Tatyana asked. "Do you girls want to go ahead?"

They all shook their head. Andrea answered. "No need. What is more important than Yasenia and Angel? We'll have plenty of opportunities to see something like that."

Tatyana nodded, and they all leaned on the sofa, waiting for Angel and Yasenia to exit the room.

Inside, Angel was kissed softly while she cried as they both lay on the bed side by side.

Yasenia tasted Angel's salty tears and wanted to make her baby sink into her body to console her sadness. "Baby, why are you so sad? We will continue to be lovers forever and ever. The soulmate connection is just an added thing. I love you with all my heart, dear. I love you so much I feel my heart in pain when seeing your saddened tears."

Angel was crying so hard that her words were interrupted by her sobs. "But I wanted to be your soulmate! I, I want to know how you feel inside and to know if you are in danger or safe."

Yasenia felt like a knife stabbed her heart, and someone twisted it deeply.

She turned Angel on her back and landed on top of her, lowering her face to taste her salty lips.

Angel was crying, but she still hugged Yasenia and answered between sobs.

Yasenia looked into her baby's reddish eyes with a tender smile, filling Angel's sight with her loving expression and loving eyes. "Baby, we will refresh the connection in the future, okay?"

Angel couldn't instantly stop crying, but her cries slowly stopped. As she hiccupped between intermittent sobs, she asked. "Really? How would we do that? I-I don't want you to hurt yourself."

Yasenia nuzzled her face with Angel's and spoke softly. "I won't hurt myself, baby. However, I'll make sure to find a way to make our connection permanent."

Angel's saddened eyes glittered, and she asked. "Really?"

Yasenia laughed and softly kissed her eyes. "How about I'll give you my blood essence each time it is about to disappear? I'll make sure to develop with Kali a pill that helps me negate the effects; that way, we'll be soulmates forever."

Angel hugged Yasenia's neck and asked with hope. "But that sounds really difficult."

Yasenia smiled. "Have I ever lied to you?"

Angel shook her head firmly.

Yasenia's golden eyes looked tender as she consoled her again. "We still have fifteen minutes. Let me cheer you up, okay?"

Angel felt her clothes, and Yasenia's disappear, and their naked bodies touched together since Yasenia was still on top of her.

The little girl felt her heart speed up as a deep blush appeared on her cheeks. Yasenia saw Angel's blushing face, with tear traces and reddish eyes from just crying, and she gulped.

Yasenia had to take a deep breath not to begin a wild session.

'Control yourself, Yaseenia. Now it's not the time for that.'

Then, unlike the sex Angel expected, Yaseenia cuddled her and shared skin-to-skin contact. The dragoness leaned on her side and nestled Angel between her arms and legs.

Angel's body fell into the soft, sweet-smelling embrace as their body parts touched closely together. However, the sensation was very different than when they were about to have sex.

Her mind, body, and soul felt like they had fallen into a pond filled with love as her body sank into Yaseenia's careful and loving arms.

Angel blinked as her face was buried between Yaseenia's naked breasts.

Her voice was still a bit brittle as she asked. "We won't do it?"

Yaseenia's low and tender laugh entered her ears. "Silly baby, a connection is not all about sex. Take a deep breath, feel my body warmth, my love for you, feel my skin and passion for you through our connection, and close your eyes. You'll see how silly your fears are."

Angel surrounded Yaseenia's waist with her arms and closed the distance further. Then, she followed her dragoness's words and closed her eyes.

Chapter 505: Yaseenia's profound love. Alchemy Competition starts!

Angel followed Yaseenia's words and sensed the dragoness's presence.

She felt how her arms sank into her body, how one of Yaseenia's long legs went over her waist and pressed their lower bodies close enough to feel each other closely.

Yaseenia's height also allowed Angel to feel snug and comfortable in her arms. Yaseenia could easily cover her entire body and surround her.

Then, with the help of the smooth and long tail, Angel was wholly hidden from the outside world.

'Heavenly~.'

Her nose twitched with Yaseenia's sweet scent, and her ears were blessed with Yaseenia's low and mellow voice. "Do you feel it, baby? Look deeply inside, and you'll understand even further."

Angel dove deeper into her soul and fused with their temporary soul connection. Mirrory helped a bit and amplified Angel's soul-reading powers for this short moment.

When Mirrory interfered, Angel opened her eyes wide as Yaseenia's heart appeared as transparent as glass before herself.

The deep feelings of care, love, devotion, warmth, and protectiveness flooded her like a gentle wave.

Her inexplicably sad heart because of the inability to continue being her soulmate dissipated as her body was filled with an ocean of warmth and love coming from Yaseenia, making her want to cry.

Angel felt it so clearly that a sense of shame grew in her heart. Yaseenia separated Angel's face from her breasts and leaned down to kiss her softly. "Did you feel it, baby? I adore you so much that I can't help myself when pampering you. Do you still feel sad? Do you still feel like you would lose something if our connection disappears?"

Angel's tears fell, and she shook her head. Then, she sniffed. "S-Sorry, I-"

Yasenia interrupted with a kiss. "Don't say sorry, love. I don't really understand why, but I can feel that all of you have a small fear deep within about losing my affection."

Yasenia pressed her forehead with hers and smiled, her reptilian golden eyes glowing affectionately. "Dear, I can't make promises that my feelings will be eternal. I can't make promises that things can't change since time is merciless."

"However, whether they change or not, my feelings won't be influenced by external factors. I love you too much for that. Therefore, as long as you love me, baby, I'm confident in loving you forever. You girls are my treasure, my most precious and beloved treasure."

Angel nodded quickly.

In truth, Angel was not confident in herself. She has never been a confident girl.

Becoming Yasenia's soulmate had always been her dream, so when she achieved it, she felt like nothing could separate her from Yasenia.

It felt surreal. The soul connection had eased her previous insecurities and made Angel feel like living a dream.

However, in the corner of Angel's heart, this connection became something that held back her feelings. Angel's feelings slowly began shifting from pure love to love because of this.

Hearing that it could disappear made her afraid from the bottom of her heart that the probability of Yasenia leaving her had reappeared.

Even if it was minuscule, it was no longer zero. Therefore, a fear like no other gushed inside her. Hence, her previous reaction.

But after feeling Yasenia's heart, she felt silly.

Angel could only blame it on herself if love as deep and profound as Yasenia's disappeared.

The feeling of Yasenia's love was like lying on a bed of care and being covered in a blanket of happiness while the dragoness sang you the most beautiful of love songs and cradled you in dreams and hope for the future.

The dragoness's affection was like that, and everyone felt it deeply at that moment.

Mirrory used a unique technique to create a ripple that spread through the inn's room and resonated with every girl's soul.

They all felt it deeply in their hearts, and they felt a lump in their throats for a few moments.

"I love you, Yasenia. I love you so much."

Yasenia felt her cleavage getting wet again, but she didn't say anything this time as she could feel her baby's happiness.

Yasenia smiled and kissed the top of her head. "Baby, my baby. I love you all so much. I would remember you even if I lost my memories. Even if I reincarnate or my soul disappears into the void. I will always, always love all of you dearly."

Angel cried and nodded while tightly hugging Yasenia.

The others outside had heard and felt the aura from Yasenia, and they were all sobbing a bit.

Even Tatyana felt her nose a little sour, even though she showed nothing on the outside.

Far away, Cecile could also feel everything thanks to the deep connection with Yassenia. However, unlike the others, she didn't get emotional.

Cecile knew all of this as Yassenia's soul was always as clear as Angel saw it a moment ago for her.

Cecile flapped her phoenix wings, carrying every girl in a transport she held with her phoenix talons. "I hope they are all a bit more aware of how deeply Yassenia cares for all of us."

Fifteen minutes later, Yassenia appeared while carrying Angel. The little girl's cheeks were red as an apple while happiness emanated from every pore of her body.

Yassenia looked at them and asked. "Shall we go, dears? We have to make it for Kali's tournament. My honey must show everyone how talented she is."

They all nodded with loving smiles and walked outside.

During the journey, the girls stayed one step closer than usual to Yassenia, and every person that saw them could feel the harmonious aura they emanated together.

Without delays, they arrived at the tournament area for alchemists. Kali muttered. "If we speed up, we may be able to see the Tattoo master final. Do you want to go, Yassenia?"

"No need. I briefly looked at it on the outside screens while searching for the alchemy arena. There aren't humans as models, but other beast humans. The enhancements seem to require a minimum level of body strength to support them."

"Therefore, it isn't necessary to go in person as I don't need to check the humans there. We can hire one and tell them to work for us in the future. There is no haste in learning everything in this tournament."

The place in the stands they walked towards was where Jorey commented them to come yesterday.

As Yassenia expected, the elders from the Nine sects were waiting for her with Jorey. This time, there were extra people.

Even the Fu Clan was present among the clans, and Yassenia greeted everyone.

The dragoness could also spot Young Master Fu on the side.

It was not strange since he would participate in the alchemy competition. He was also very talented compared to juniors around the Distancia continent. That was why the Alchemy Nine Sect wanted to make him an inner disciple.

'Hmm. It is difficult to find an opening in their guard and kill him. We used spy formation yesterday to scout the area, and the security was too tight to sneak in safely without any risks. Should we act while returning to Koran City?'

Yassenia frowned. 'But that would make me a clear suspect. They don't need any laws to incriminate me if it is too clear. Moreover, killing that brat is a good excuse for the Fu family to wage War against us. I lack the resources to win if the true seniors help them. Even if they don't, their current strength is difficult to gauge accurately.'

Yassenia sighed, and Andrea walked behind her to massage her shoulders. 'Killing him is much more dangerous than leaving him alive, love. Why don't we ignore him?'

Yasenia mumbled. 'But it is too bothersome having him around. He is even meddling with our affairs back in Koran City.'

Tatyana suggested. 'How about using Cecile and the small human army to ambush him? Cecile should still be midway toward Koran City. They can ambush him on the way back.'

Yasenia frowned and thought about it.

Then, she took out the communication device and activated it.

She had tried connecting with Angel's sister, Lidia, with it. However, it failed. No one of the ones she gave the device to could be contacted.

Yasenia guessed that the spatial turbulences destroyed them or the connection range was insufficient.

No matter which option, this device's connection range was gigantic, so she was sure they weren't near her.

Either way, when she connected with Cecile, she began discussing the plans.

Cecile commented. "What if the Fu family returns with you?"

Yasenia blinked. "That's right... Hmm. I need to think about this deeply. Cecile, have the device always on you. I'll contact you later to finalize details, just in case."

"Sure, my love. Take care, and don't do anything stupid."

Yasenia looked at the stadium and saw the competition's judge stepping onto the stage at the edge. He looked old but gentle.

Yasenia asked. 'Mom, why do alchemy practitioners look more elderly than others?'

Tatyana answered. 'Well, those who truly devote themselves to alchemy don't usually mind their appearance. I bet that the old man there could look much younger if he took a year to cultivate properly. However, alchemy masters are usually entrapped in the complex and interesting art, so they look like they age faster.'

Kali's three tails stiffened. 'I mustn't forget my cultivation. The last thing I want is to become uglier than I currently am.'

Valeria commented. 'Your scars are cute.'

'They are truly not. Only you and Yasenia are weird enough to find them cute, hahaha.' Kali laughed, but her heart felt warm.

Elder Mu asked. "Junior Kali, you'll be participating in this one, right?"

Kali nodded with a smile under her veil. "I will."

"I did not expect the creator of the [Soul Enhancing Pill] to be this young... Sigh, truly the young beat the old."

Kali smiled. "I was not the creator, Elder Mu. Since our human girls have masters, why would you think that I, a beast human, would not have one?"

Elder Mu realized. "Right, such an oversight."

Yasenia smiled. "Her master is really powerful. I dare to say that no one in this continent is stronger than her Alchemy-wise."

Elder Mu squinted. "Those words are too big, Lady Yasenia."

Yasenia shrugged. "You should already understand me by now. I don't say anything I'm not confident at."

If Dr. Avalonia and Elder Frederick from the Academy appeared on this continent, they would truly be unmatched. Even the third one, which was comparably weaker, was nothing to scoff at. Flora, a literal dryad that mastered the craft, would make any Alchemist in this continent feel like a junior.

"Welcome to the Alchemy Competition. I'm grateful for all of you to have come to see our juniors perform one of the oldest crafts in our world, Alchemy."

"Please, juniors, come down to the arena."

Kali hugged Yasenia and kissed her over the veil. Yasenia laughed happily, and her tail wagged. "Go for it, love. Don't be merciful because you are getting fond of Elder Mu."

Elder Mu chuckled. "Oh my. Disciples, don't go easy on Kali, or you'll suffer."

They all had already learned that those from the Astral Sky Clan were mighty competitors and maybe out of their reach. However, none of them lost their motivation and shouted. "We'll do our best, Master Mu!"

Yasenia looked at Fu Yu sideways and saw him jump behind Kali, looking at her fox's back with curiosity and something else she didn't fully catch.

Yasenia spoke aloud. "Fu Yu, I know you are not a fan of us. However, I hope you don't do anything funny, or I won't care anymore about being low-key."

The cold and indifferent voice of the dragoness reached the deepest parts of everyone who heard it, making them shiver.

Fu Yu looked up and met with Yasenia's golden irises and thinned black vertical pupils. The warning was clear.

Fu Yu was arrogant, but Yasenia's gaze was too terrifying, so any little thoughts that took root in his mind dissipated.

Once the juniors left, Yasenia turned toward the seniors from the Fu clan and spoke. "Sorry for that, seniors. I know your clan is to be respected, but you should understand the behavior of your juniors. Before anything bad happens that makes us irreconcilable enemies, I rather stop it and cut it from the roots. I hope this offense is acceptable after listening to me."

Their frowning faces eased up. Yasenia has also not said this softly, so almost all those who heard her previously heard this. Naturally, our dragoness made sure Fu Yu didn't hear her.

One of them nodded. "After hearing this explanation, I truly feel better. Sigh, Lady Yasenia, you are truly someone worth being allied with. However, our young master is too narrow-minded. I hope you can be a little tolerant in the future."

Yasenia smiled. "If he does something like that, I'll do my best." In her mind, she finished the sentence. 'To kill him and everyone related without getting caught as painfully and slowly as possible.'

Then, the Alchemy competition started.

Chapter 506: First Part of the Alchemy Competition. Kali's charm.

"The Alchemy Competition is divided into five steps. The first one will be theoretical knowledge; the second one will be sensory sensitivity; the third will be about flame control; the fourth we'll check your visual knowledge while spotting different varieties of plants; finally, we'll give you a recipe and ask you to create the pill in the time stipulated."

Kali listened attentively. Since she was a beast human, no one bothered her as they did with the other girls.

Moreover, her quiet and distant aura made her unapproachable. Hence, Elder Mu's junior didn't come to speak with her as they did with Andrea.

Kali waited beside her desk and heard the judge explain. "On your tables, you'll see a small book. That is the question book. From this moment forward, you are allowed to open it and answer every question in the book. If the answer is exactly the theoretical one, it will be automatically checked. If it is not, we have a team of five seniors, including me, who will help correct all questions answered."

Kali approached the book calmly and took the writing pen to the side. Then, she read the first question.

"What plant grows in poisonous biomes but helps purify the air? Note: The color of this plant is pink, and it has six flower petals arranged like a cup."

Kali answered instantly. "[Lifeline Dream Whisper]."

Her letters changed from black to blue. "The beginning guideline says this is an automatically correct answer. Purple means that it is still on hold. Black means that it is an incorrect answer."

Valeria looked from Kali's soul and smiled. 'Should I help you?'

Kali laughed. 'If you help, it loses its meaning. Although, if they correct me incorrectly, you are more than welcome to inform me.'

Valeria nodded and looked closely.

Kali continued answering questions, and some were marked as purple. However, she didn't mind and continued writing.

When she finished, the final note out of 500 appeared on the book's cover.

Kali looked and saw a 455 appearing. 'Huh? So low?'

Valeria said. 'Check the book.'

Kali did so, and they found the first incorrect answer. The question was. "Is the mixing of [Whispering rose] and [Mourning Lily] possible?"

Kali answered positively to the question. However, they marked it as wrong, puzzling Kali and Valeria.

Kali and Valeria realized that most of Kali's "mistakes" were incorrectly marked as incorrect. Valeria only identified two correct corrections among all the marked answers.

Therefore, Kali's final score out of 500 should be 498, not 455.

Kali looked in Yasenia's direction and sent a mental message. 'Yasenia.'

'Hm? What's wrong, love? How did you do in the first exam?'

'455.'

Yasenia frowned. 'Ha? That low? Are you feeling okay, honey? Do you feel weary from yesterday night?'

Kali laughed. 'Not at all. Valeria and I checked, and I should have a 498. Do we tell the judge that they are mistaken?'

Yasenia was surprised and frowned. Finally, she said. 'Do not correct them. Your position is honestly redundant since Angel has achieved our goals already. Moreover, even if they evaluate you incorrectly, you can finish in the top group and show your strength properly.'

Kali was about to nod when she heard Yasenia continue. 'Of course, if you feel slighted, that changes everything. I can even speak with those seniors and tell them about it.'

Feeling surprised was her first reaction, but soon she laughed.

Valeria also chuckled. 'She is so cute.'

Kali agreed. 'She really is.'

Then, she answered Yasenia. 'No need, love. Thank you.'

Yasenia smiled and nodded.

"What are you smiling about, Lady Yasenia?"

Yasenia heard Jorey's voice and answered without turning her head. "I was thinking that my fox looks very charming."

The average result of the first round was 421.

"Hmm, good. Everyone below 421 points is eliminated."

The judge heard many gasps, but he ignored them.

There was a taste, smell, and hearing test for the second one.

On the tasting one, they should know if the medicine was rotten and write down as many ingredients as possible from that tasting sample. The tournament had even prepared unique mixes that are barely noticeable when they go bad.

Kali saw the medicine cup, and even without tasting it, she knew that hers was okay. She took a sip not to stand out too much and then wrote her answer, which immediately glowed blue. She had to take a second sip for the ingredients, but compared with others that were drinking almost half the cup, it was very impressive.

After writing down a list of thirteen ingredients, she went to the second test.

The judge's gaze moved toward Kali and checked the first test results. He frowned a bit and lost interest quickly.

The scent test used a box that only allowed the smell of the herb to leak. The trial was about identifying as many scents as possible and writing down the name of that herb.

Naturally, they were unique scents, even if they were rare.

Of the six different smells Kali proficiently detected, she knew four. The other two, she wasn't sure.

'Do you want my answer, Kali?'

'No need. I want a proper evaluation.'

'Even when the first test was so unjust?'

'Yes. I want a proper evaluation of my skills for this continent. How skilled am I with their standards?'

'I see. I don't understand why you would want that, but sure. You can do as you please.'

Kali smiled. 'Thank you for supporting me, Valeria.'

Valeria felt happy and continued observing Kali's performance.

The third and fourth tests were much easier as they were visual tests, and Kali got a perfect score.

Kali's Alchemy Flame control was exquisite to the point that many were almost mesmerized by her dancing flames.

Her visual knowledge was also extensive, and she answered easily and quickly.

The judge, who had ignored Kali, began paying attention again.

'If it weren't because of her poor performance in the theoretical tests, she would be ranked first by now. Now, her pill-making skills must be exceptional if she wants a high position.'

The judge looked at Kali and spoke. "Junior, if you put more effort into studying theory, you will reach very far."

Kali's lips twitched, but she nodded calmly because she knew he had good intentions. "I understand. Thank you, senior."

To be honest, Kali's skill in Alchemy was leagues ahead of everyone participating. Even these judges were below her skill-wise. Our fox could already create Heaven-ranked pills consistently, yet these people were still stuck in the peak of Earth Realm Alchemy.

Even if these people had been researching alchemy for centuries, the vast difference was the same as Angel's absolute dominance.

Sky Continent's knowledge was much more thorough and developed. The difference was like the distance between Heaven and Earth, like studying from children's books for the profession against learning from high-level ones.

After a few words, Kali received the recipe.

Kali looked at the recipe presented for the last section of the alchemy competition and lifted an eyebrow.

The judge commented. "This is a precious Peak-level Earth-Grade recipe. Finishing one set of pills with purity above sixty percent will give you six hundred points."

Each of the previous tests cost 500 hundred, and the disciples would be ranked by their total score. Giving 600 points just for creating a sixty percent purity pill was far more points than what Kali expected.

The judge continued. "The maximum number of points for this last test is one thousand. We won't explain how to get this total amount of points. However, know that the more pills and better quality in one batch, the better. You have limited ingredients on your tables, so be careful."

"Can we use our own ingredients?" Asked a junior.

"No, you must use the ones we provided." Answered the judge.

"Will we be counted for the last or best of pills batch created?" Asked another person.

"We'll take into account the best batch created. If you are lucky, then that's that."

Kali looked at the table and asked Valeria. 'How many should I create? This [Earth Solid Body Pill] is quite an interesting one, to be honest.'

'I've been observing your competitors, and there are seven that you should be aware of. Four of these seven are Elder Mu's disciples. From them, the strongest is her eldest disciple. That child is very talented compared to everyone here.'

'If he has shown all his strength, we should be able to win as long as you create five peak-level Earth-grade pills with more than seventy percent purity in a single batch.'

Kali nodded. 'I see. Do you think I should brag and do my best?'

Valeria said thoughtfully. 'I think what I said is enough to show skill. If you want, you can create them as low-level Heaven-grade pills. Heaven-grade items are already a rarity. If you really try, you might create mid-level Heaven-grade pills with eighty percent purity with this recipe. It would be too much, and you would gather too much attention.'

Kali nodded and began to work.

She had already prepared the ingredients while they were talking, so only mixing and throwing the items in the cauldron was left.

Kali's movements were leisurely and easy, and her face under her veil didn't change.

The items on the vials and the unprocessed herbs slowly transformed into fluids, powders, and bubbling mixes.

Her ease and proficiency didn't escape the old Alchemy Masters; many eyes began gathering on the three-tailed fox lady.

'Hmm, and with this. Everything is prepared.'

Kali opened the lid of the half-a-person tall cauldron and threw two-thirds of the ingredients inside.

They didn't fall to the bottom as soon as they fell but floated inside. Kali created a film on the mouth of the cauldron with energy and ignited her alchemy flames below with a flick of her fingers.

With the sound of air being ignited, an ordinary orange flame appeared below the cauldron, covering the base.

'Now, I have to wait a few minutes for it to heat up to the proper temperature. I need to check the ingredients to avoid boiling the liquids.'

Kali concentrated, and after two minutes, she nodded. 'Perfect.'

Kali's alchemy flame was nothing out of the ordinary.

The thing different from others was her insane precision and control over it.

The cauldron's inside was heated with such precision that different parts would have different temperatures, slowly processing herbs with varying boiling temperatures simultaneously.

Kali's three tails swished as she focused on extracting the purest essence from the ingredients and burning the rest.

'Perfect. After five minutes of slow-burning, I should be able to continue the process if everything goes as I pictured it.'

Valeria looked from the side and smiled. 'You are doing great, Kali.'

Kali nodded and continued her work.

The spectators had long spotted the skilled fox, and many couldn't help but appreciate her.

Yasenia looked at the attentive Elder Mu and chuckled. "Aren't you going to look at your disciple, Elder Mu? You've been looking at my fox for a while."

Elder Mu laughed. "Don't blame me, Lady Yasenia. She is exceptionally skilled. I'm honestly impressed that she is below the age of acceptance for this tournament. If you said nothing about it, I would've thought that girl was three hundred years old."

Yasenia looked around and saw many gazes of infatuation from many men and even some women while looking at Kali.

Seeing an alchemy work was not exciting, but how the flames would change and move around was beautiful. Moreover, Kali's figure was stunning.

For those that don't remember, our fox even managed to enter the beauty ranking of the Academy, the reason all of what happened to her happened.

Our fox had a very curvy and beautiful body, but instead of looking seductive, she gave a gentle and motherly feeling.

Her gestures, aura, and movement were careful and soothing. Looking at Kali's working figure gave the spectators the same feeling as a mother cooking for her children with a soft smile.

Yasenia chuckled helplessly and continued observing Kali.

'As expected, a gem will shine when exposed to light.'

Chapter 507: Kali's Pill Concoction.

Meanwhile, enough time had passed for Kali to throw the last ingredients inside.

Once the last ingredient was inside the cauldron, Kali closed it with the lid.

Then, she sunk her consciousness into the and manipulated everything closely.

Inside the cauldron was a mix of the ingredient's essence and impurities and a few solid ones that had yet to be processed.

With tremendous accuracy, Kali began purifying everything into its most primal state and essence.

'Hmm, this [Steel Black Tree Bark] is taking a bit to heat up without messing with the rest of the ingredients. I need to move it to the side and control the impurities from not mixing while I heat it.'

On the outside, they suddenly saw Kali's tame, gentle flames whooshing with strength and power as they consumed half of the cauldron.

Inside, temperatures rose exponentially as Kali's energy walls and control over the matter lessened.

The glow of her flame made the white-wearing fox appear ethereal.

The tree bark gained temperature quickly, heating up like a metal and gaining a white glow because of the heat.

Kali pushed her energy further, and the standard orange flames became lighter colored as the temperature increased, changing to a yellowish color.

The change didn't stop there as the color lightened more and more.

The tree bark was already melting, the only ingredient left to vaporize. However, Kali needed more heat.

Kali's face became serious as she saw all the other gases begin to try to fuse at the wrong time.

Even though she was using deep and profound techniques to keep the temperature lower on that side, Kali could not wholly avoid the temperature rise.

'Ho? I see why they used this recipe. This ingredient is quite tough; without expert control, everything can go to waste easily.'

Kali's verdant green eyes gained a slight glow, shining like precious emeralds. 'But I've worked with worse. Let's finish this.'

Then, the flames that only reached a quarter of the height of the cauldron blazed with strength and engulfed three-quarters of it, changing the color from the previous yellow to a pure white color.

The heat from the flames took aback many people as the first wave of heat spread around and reached even the stands.

Andrea whistled. "Those are temperatures I use to melt my materials."

The judge and other Alchemy masters frowned. 'How can she control the inside with such a powerful flame? She will fail without a doubt.'

Kali's forehead began to sweat as her energy was doing its best to redirect the powerful heat and energy release her ingredients were doing.

This extra heat purified the previous ingredients even further. However, if she didn't control the impurities released and the tree bark's process simultaneously, everything would fail instantly.

'Well, I admit. You are a tough ingredient, but this is it.'

Then, the liquid tree bark bubbled and puffed into pure energy dust in what seemed an instant.

Kali used her soul power together with her energy to slowly guide everything inside the cauldron.

Valeria was watching with amazement. She has seen a much stronger alchemist at work.

Nonetheless, for Kali's level, her feat was exceptional. 'My~, if she didn't have to hold back the results, these pills would end up being high-level Heaven-grade pills with more than eighty-five percent purity. It is certainly one of the bests pills she has ever concocted.'

Kali didn't lose focus for a second as her spiritual sense and eyes moved around quickly while her brain processed the torrents of information quickly and efficiently.

Kali waved her white sleeve, and the white flame rotated down the cauldron, becoming darker each second until it reached a yellow color.

Then, Kali maintained the flame there.

Kali smiled under the veil. 'I got it~.'

Then, our fox separated the essence into five different clouds and began spinning everything rapidly, with the center of each colorful cloud as a core.

The centrifugal force created a sphere, and Kali's energy and soul pushed everything together, fighting that centrifugal force.

The impurities were gathered at the side into a black cloud, taking very little space.

Because they were Heaven-ranked, the energy in the surrounding was attracted by the rich treasure and absorbed into the cauldron.

This extra energy helped Kali push against the nature of things.

Alchemy and most professions were practices that went against the heaven order, and that's why the last step of energy conductivity, or in an Alchemist's case, compressing the pills into a ball and making every ingredient blend, was so hard.

The energy absorption event was quickly noticed.

Valeria looked around and commented. 'Kali, if you continue, it will end up above ninety percent purity, and with a mid-level grade, add a few impurities and stop absorbing so much energy to feed them.'

Kali frowned. She didn't really like holding back while creating pills. The other girls were the same.

However, she understood the necessity. Therefore, with an uncomfortable heart, she opened the barrier containing the impurities for a second and saw a bit of that nasty black gas blending with the slowly-forming pills.

'Tsk, what a shame.'

After Kali allowed a few strands of the black smoke she had separated to mix with her pills, she continued the process.

The rotation speed increased as the volume of the sphere reduced, and Kali's energy usage was also accelerated.

Valeria carefully used her energy to clean the sweat that almost dripped in Kali's eyes while looking over her.

After ten minutes of focus, Kali's aura swelled for a second as she compressed the air in the cauldron to create the final result.

The powder was harshly squeezed, creating a small explosion of aura that the alchemist had to compress.

Then, she felt relaxed as the pills stopped fighting back and fell to the bottom of the cauldron.

After a few seconds, Kali stopped and smiled. With a sigh of exhaustion, she laughed. "Finished."

Everyone saw her stopping, so they looked over.

Elder Mu commented. "They should be very high level."

Yasenia nodded. "Yes."

She was acting calmly, but she was smiling wryly inside. 'I hope honey has remembered to hold back. She gets too immersed when doing alchemy.'

The fox opened the lid, and a cloud of dark grey-colored substances floated upwards, escaping the confinement.

The darker the cloud, the more impurities the alchemist could keep from mixing with the final result. Therefore, the color of the clouds that formed after the alchemist finished was a general telling if the results were good or bad.

Many alchemists nodded after seeing the dark grey-colored cloud.

"She managed to expel quite a lot of impurities."

"You are right. The result must be good."

"Do you think she has reached seventy percent purity?"

"With the dark color of the cloud, it may have even reached eighty!"

"Eighty percent for a peak-level Earth-ranked pill? That's impressive."

"How many pills do you think she has created?"

"I guess she has created three."

"Three pills of that quality at once? That's something only a senior can do! Her participation is a bit unfair if she has created so many."

"Unfair? You are too young."

Yasenia heard the surroundings, and her lips twitched. 'Honey, I hope you held back, or you will have a hectic life in the future. I can already imagine many powers flocking to you to create their pills.'

The judge warned. "Participant Kali, do not touch the cauldron. We'll be scoping out the result to avoid any manipulation."

People using tricks were many, so they were cautious.

Kali nodded and took a step back. "Please, go ahead."

The judge nodded and approached. Then, he used his hand to scope out the pills inside. His eyes couldn't help but widen when he felt five rounded items touching his hand.

The spectators watching leaned forward, trying to see the results. However, the judge froze briefly, making it impossible to see.

He looked down at the items in his hand and saw five perfectly spherical and beautiful green pills. 'Huh? This is my first time seeing such a beautifully rounded and smooth shape. They look like marble balls.'

He finally took them out, and the highest-level people could see them before he placed them in a container to measure purity and level.

Elder Mu paused and blinked twice, her old face looking surprised. 'Did I see right?'

This woman has visited the Alchemy section in the Astral Sky Shop and seen the beautiful and perfectly rounded pills. Many shops would round the pills artificially with proper items to make them look more appetizing.

Elder Mu didn't like that practice, but she didn't hate it. She understood why someone would do it, even though she would never do something like that.

The old senior thought Yaseenia was doing the same. Yet, under her nose, the fox junior has created a pill that can be classified as artistic.

Yaseenia also spotted them, but she was accustomed to that shape, so she didn't find it strange. Even her pills were round when she created them. Although purity was a problem for our dragoness, shaping them relied on technique and spiritual strength. Hence, our dragoness could compress them perfectly and quickly.

When the judge saw the machine's results, his eyes widened. 'Is the thing broken?'

The judge even blinked a few times and looked again, trying to see if he was seeing things, but the results didn't change.

"Oy, Judge! Say the results already!"

"That's right, what are you looking at so dumbly? Be quick!"

"Are you trying to act mysterious or something? See if I don't mysteriously make your life disappear!"

Tatyana saw the results from afar and patted Yaseenia's hand. 'Don't worry, she held back.'

Yaseenia breathed a sigh of relief.

The judge announced. "Five low-level Heaven-grade pills, eighty-two percent purity!"

The stadium was silent for a second. Then, an explosion of exclamations of surprise was heard all around.

"What!? Did I hear right?"

"I must be dreaming. Since when could Earth-ranked recipes turn into Heaven Ranked pills!?"

"Did he say five pills? A junior has concocted five Heaven-ranked pills at once!?"

Yasenia looked around, and her lips twitched. 'Is even her holding back this impressive?'

The announcement was so shocking that a few participants lost concentration, and the insides of their cauldrons exploded, creating a mess.

"Fuck!"

"Crappy judge, can't you announce it later!?"

"Those were my last set of ingredients! Shit!"

"Why are you all fuckers shouting!? I lost concentration because of that!"

Our girls almost laughed aloud. Well, Valeria didn't hold back since nobody could hear her. 'Kali, you beat a quarter of the competitors even before the official announcements were made, hahaha.'

Kali sighed. 'Losing concentration over this is a big mistake.'

As Kali said that to Valeria, the judge's face became gloomy as he shouted. "Shut up! If you can get distracted by a simple announcement, you deserve to be last in the competition! The next person that complains, I'll throw them out of the competition even if you have more materials to continue trying!"

Everybody got silent, even if their faces were a bit resentful. Although silence was a formal setting for these tournaments, it was not obligatory.

There were a few shameless people who would not hold back and talk aloud in the middle of the concoction to distract others.

Naturally, not many did it since it would spell disaster if they offended an influential person.

Elder Mu was not impressed and muttered. "So low quality? The process, the feelings, the aura, the speed, and the technique of impurity retention I saw should have created a better result."

Yasenia's sharp ears heard her mutter, and she was impressed. 'As expected of a senior. Yet, she can't really prove it, nor will she dive into it because a junior creating something better than this within this time frame would be pretty absurd.'

Yasenia smiled contentedly. 'A good result all around. With this, Kali's high ranking should be guaranteed.'

The rest of the competitors finished their work, and the judge announced the results.

Chapter 508: Alchemy Tournament Results.

"After discussing it with my fellow judges, we've ranked the top one hundred as such. If any of you have any complaints, we'll hear them later. We have recorded every single result from every participant. Therefore, revising the results is simple and quick."

The judge paused and looked around. Nobody spoke, so he went ahead and started naming the ranks of the top one hundred participants."

"On the one-hundredth position, the Alchemy Herb Bazar, represented by Du Jian. On the ninety-ninth position, the Exotic Flower Sect...."

Yasenia and the others listened attentively. Jorey heard her junior land in the thirtieth position and nodded, satisfied.

Elder Mu asked. "Who do you think will win it?"

Yasenia lifted her beautiful eyebrow. "Your disciples are strong and talented, Elder Mu. However, you've already seen my little fox's performance. If the last competition didn't count double, it would be close. But I believe that Kali took the first position this time."

Elder Mu laughed. "Honesty is a good thing. I thought you would act humble and say that the results weren't definitive."

Yasenia shook her head. "How could I do that? That would be insulting your eye and experience in the trade. Acting humble this time would be inappropriate."

Elder Mu smiled and nodded. "Well said."

The judge continued for a while until he reached the last three. "In the third position, Golden Alchemy Shop, represented by Joseph. He managed to create five peak-ranked Earth-grade pills with seventy percent quality! Give him a big howl."

A few beast humans roared and howled, similar to applauding in other places. It was uncommon to do so, but a few judges would encourage the public.

"In the second position, The Nine Herb Fragrance Sect, represented by Mu Yang. This junior has performed exceptionally, creating a single low-level Heaven-ranked pill in the last batch! An excellent reversal against Joseph, stealing the second place right before his nose! Excellent courage and skill, worthy of a nine sect!"

Yasenia heard more howls and roars, so she smirked playfully. "Is it okay if I roar?"

Jorey remembered Yasenia's dragon roar when leaving the city and gulped. "Lady Yasenia, control yourself. I don't want our juniors to fall face-first onto the ground."

Elder Mu laughed. "It would be amusing if they did so. How about giving us your best roar?"

Yasenia chuckled and shook her head. "I rather control myself. Stealing the limelight too much will attract unwanted attention."

Unaware, Kali waited for her first position, slightly dissatisfied. 'I won without trying. The level of competition was slightly below my expectations.'

'Well, at least you've gathered honor for Yasenia, right?'

Kali looked around at the roaring beast humans and asked. 'Do you think Yasenia will roar?'

'Do you want her to?'

Kali smiled a bit. 'It would make me happy.'

Valeria smiled and didn't speak anymore.

"Finally, the competition's winner! A competitor no one expected to win. She had a rough start. Yet, she showed her high skills in the following tests. Finally, she blew all our minds away in the last

production category by creating five low-level Heaven-ranked pills in a single batch! The Astral Sky Clan, represented by Kali Dravory!"

Yasenia took a deep breath and roared to the sky.

**\*ROAR!!\***

Yasenia's deep and low dragon roar carried unmatched pride and authority as it reverberated between the other howls.

It didn't overpower them. Yasenia's dragon cry guided every beast human present to follow her example, making the stadium explode with the cheer of thousands of beasts.

Jorey and the other's felt a chill and an impulse to roar with her. 'Her roar sounds so powerful!'

Yasenia stopped after a few seconds and looked at Kali with a smile. Kali was also looking at her while grabbing the prize. Even with her veil, Yasenia could feel Kali's happiness.

Elder Mu sighed and smiled. "You win this time, Lady Yasenia."

Yasenia smiled politely. "Your disciple also created low-level Heaven-ranked pills, so it was well-fought. Elder Mu. Sadly, this time, Kali was present, hahaha."

Hearing the unconcealed bragging tone, they couldn't be mad. Seeing the usually calm, cold, and collected dragoness showing such a smirk was quite cute.

After grabbing the price, a low-level Heaven-ranked cauldron, our fox lady didn't store it. She returned it back to the judge and whispered the previous deal Yasenia had made to allow Andrea to finish her armor in peace.

Many were confused, but nobody asked since Kali quickly jumped up and flew through the arena, softly landing before Yasenia a moment later.

After lifting her veil, the dragoness welcomed her honey with a tight hug and a deep kiss. "Congratulations, honey. You've done fantastic."

Kali laughed sweetly and snuggled in her lover's embrace. 'Ha... I'm so lucky to have her.'

Kali had tied a small knot on her third tail to place it together and hide her third tail. However, that knot had snapped because of the previous heat, making her three tails sway distinctively behind her.

Kali didn't bother much about hiding the fact. She just used that thing lightly. If it broke, then it broke.

Naturally, the third tail fell into the eyes of everyone present, making those who knew her previously stunned.

Elder Song asked with a flabbergasted tone. "Huh? Why does Kali have a third tail!?"

Yasenia didn't bother because she was too comfortable tasting the delicious lips of her fox.

Kali laughed and moved her face to the side, dodging Yasenia's kiss and letting it fall on her cheek, where the dragoness didn't give up and began suckling.

Kali answered in this position. "I absorbed a unique treasure Yasenia gave me and managed to have my bloodline purified. There wasn't a change before I went to bed yesterday. Then, when I woke up, I had a third tail. I'm as confused as you all are."

Kali looked at Yasenia playfully and asked. "So, what did you feed me? I usually trust you, so I don't really care about it. However, this third tail is strange no matter how you look at it."

Yasenia was stunned when the fox directly placed the pot on her head.

Kali looked at her with a raised eyebrow. She knew Yasenia could see her gestures.

The dragoness's lips arched in a wry smile. 'Is this revenge because I used my Blood Essence?'

'What are you waiting for, my love? They are waiting for the answer~.'

Yasenia didn't free the fox from her arms, using her hands sneakily to grope her plump behind and almost making Kali yelp.

Yasenia spoke calmly as Kali's cheeks blushed. "This is my fault. I fed Kali a [One Thousand Years Old Golden Spirit Flower], and this happened. I really didn't expect the effect to be so drastic, even if it is a legendary herb."

Elder Mu asked with a confused expression. "A what?"

No one recognized this plant.

Yasenia knew it because this plant was from the Sky Continent.

Moreover, it was a high-level Transcendent-ranked flower, a mythical herb that appeared once every ten thousand years under the right conditions and was almost impossible to store away.

Tatyana laughed after hearing the name. 'Not even I have one of those, little treasure.'

The girls were stunned.

Mirrory snorted. 'That basic flower is precious for you? I saw a person with a garden made of those.'

Tatyana rolled her eyes. 'Are you comparing immortals and gods with us? Please, things they throw into the garbage are infinitely precious treasures for the lower realms.'

Valeria coughed. 'If I knew it was that precious, I would've taken a few from the lake.'

Tatyana's eyebrow twitched. 'Didn't you say you took the most precious plants?'

Valeria smiled. 'I did. That plant is nothing with a few of the ones I collected.'

Angel felt her little heart was about to be humbled excessively, so she changed the subject. 'Not even your subordinates have one of those, Mommy Tatyana?'

Tatyana shook her head. 'As far as I know, only three people have one. The leader of the Heavenly Sect, the leader of the Thousand Poison Valley, and the leader of the Medicine Valley.'

Mirrory: 'They escaped the conversation.'

Valeria: 'We should keep quiet in the future.'

Mirrory: 'Tsk, commoners.'

Valeria: '...'

The girls: '...'

Yasenia coughed and commented. 'I remembered it because you didn't have one, Mom. That's why I gambled with that one.'

Tatyana nodded. 'Its quality makes it impossible for it to grow in this continent. However, be careful, little treasure. Sometimes, the conditions of certain places can create miracles.'

Yasenia nodded. 'I'll keep it in mind. Either way, this plant would benefit honey if she consumed it, so even if there are, it isn't a big deal. If any effects don't match up, I'll account them to Kali's bloodline. I don't believe there is anything remotely close to her bloodline.'

As Yasenia communicated mentally, she didn't stop speaking on the outside.

Yasenia smiled. "I don't know if there is a second one in the continent. However, I couldn't plant it after plucking it, so I had to use it before it lost effectiveness. The day it began losing effectiveness was in a week. Therefore, I fed it to Kali. Her bloodline is related to nature, and I knew it would be effective."

Yasenia used her tail to caress Kali's three tails, quite an intimate gesture, and laughed. "I didn't expect to have her grow a third fluffy and beautiful tail."

The discussion changed from Kali's tails to that plant. Elder Mu was curious about it.

Yasenia didn't hold back and spoke about the flower all she knew.

She explained that she found it in a secret realm exploration a few years ago.

After a few questions, Yasenia convinced them it may have been the only one, making them give up on it for the moment.

For the rest of the day, there weren't any more interesting events. Moreover, since the point system was mostly automated, the results of the final winners came just an hour after the last combat between juniors happened.

Yasenia looked at the winner, a dragon man with a handsome appearance, golden scales, wings, and beautiful horns.

Angel's jealousy spiked as Yasenia observed the attractive and handsome man. "Does he look good?"

Yasenia blinked and gathered Angel in her arms. "Well, he is a good-looking child."

Every person waiting for a response felt that answer in their bones. They collectively thought. "That guy has no chance.'

Angel's face also relaxed in a second and agreed. "He is indeed a good-looking child."

The other people almost spat blood. 'Weren't you about to cut your lover's tail!? Why are you agreeing now!?''

After the day went by, the tournament's final results were about to be broadcasted.

Yasenia met with all the people that came to Torrent City together from Koran City. All the clans were present.

Jorey spoke to all of them. "Good luck."

The other powers also spoke and politely encouraged the others.

Yasenia was holding Kaleina between her arms and also said a few words. "The juniors have done their best. The final result is up to the Heavens."

The small dragoness coiled up Yasenia's arm and used her arms to hug Yasenia's face as she looked around with her curious golden eyes. Everybody looking could see the resemblance in the mother-daughter's eyes.

Jorey couldn't resist laughing. "Although the dragon shape is different. Those eyes are inherited right from her mama dragon. They are like jewels."

Yasenia and Kaleina blinked synchronously and looked at Jorey, their golden slit eyes moving simultaneously.

That cute subconscious interaction was so precious that a few people clutched their hearts.

Yasenia then smiled. "Thank you, Jorey. Your black fur is also silky and beautiful."

Jorey used a tissue to clean her nosebleed and made a thumbs-up gesture. "You two are the best."

The gesture was taught by Yasenia, who was slowly integrating her culture into theirs for comfort. At the end of the day, she thought gestures from the Sky Continent were much more straightforward and universal.

Of course, it was a subjective thought, but it wouldn't stop her from trying.

Chapter 509: Final results of the Tournament.

While discussing things, the one presenting the tournament's final results slowly descended.

His tall and muscular body and robe were familiar to Yasenia, especially those tiger ears and tail.

His aura was profound and vast, far above Yasenia's strength. The presence of the Epoch Core cultivator was like a vast ocean with deep waters that didn't let you see the bottom.

Everyone in the arena got silent, as his absolute presence overwhelmed almost everyone.

The tiger kin Patriarch spoke aloud. "I'll start by thanking all the powers participating in our annual event. I understand that this tournament is one of the core events of the year. Therefore, I, Huo Yang, Patriarch of the [Azure Sky Tigers], will be your host during this final presentation."

A few beasts cheered, and others howled in respect. The people in the stands felt respect for being able to see one of the leaders from the Thirty-Three clans. Even if the Azur Sky Tigers were in the 22nd position, they were the representative of most beast humans of the continent.

Huo Yang continued. "This year's tournament has been full of surprises and interesting situations. All the powers that participated did their best, and their juniors performed to their best capabilities. A few were unlucky, and the opposite also happened. New alliances were created, and new enmities were born. It doesn't matter what happened. It is something developed and created out of the strong competitive nature of the beast human race."

"Our race was not influential. Humans oppressed our races. However, we managed to stand back up by following our hero, and now we live in peace with each other."

Yasenia's eyebrow lifted. "It may not be a direct attack, but it can make me look bad. Was it planned? Or is every year's speech similar?"

Tatyana commented. 'I couldn't see any strange expressions on the ones beside you, so unless it is also their first time attending, this should be customary.'

'I see.'

Huo Yang floated up, so everyone could see him clearly, and continued his speech. "Now, our juniors can show their superior talent. They can show their infinite potential. The previous years, this year, and the following years will show this to us. Show that we deserve everything we have today."

Yasenia felt the speech was too elitist, but she didn't say nor show anything.

The tiger Patriarch's speech lasted fifteen more minutes. Yasenia listened attentively to the propaganda that promulgated beast humans and bashed humans to the point of making them look diabolical.

'No wonder the human race is treated like shit. If all events had revered seniors preaching this ideology, a World without human discrimination is impossible to achieve. To end the discrimination of the human race, the thing to be done is not to promulge rights but to make it obvious and expected for them to be part of society. Both sides are bad. Making it a big deal will attract enmity, and naturally bashing it is also not an option.'

Yasenia blinked, thinking of many scenarios. Ultimately, she shook her head. 'Well, it's not my problem. It is more than enough as long as I can keep my dears safe.'

Evelyn commented. 'Well, making the conditions of the humans better can also help with that, right?'

Yasenia nodded. 'You are right. It is much riskier, though. People will eventually recognize what we are doing, and if the things get discovered before we are prepared, we'll have the whole Distancia continent after us.'

Kali asked. 'I understand your standpoint. But is it really impossible for humans to have better living conditions?'

Yasenia sighed. 'Honey. I understand you feel empathy. However, how many people we are, even if we include our clan. A thousand?'

Yasenia continued. 'This World is estimated to have at least one hundred billion beast humans. And that's just on land. What if we add aquatic creatures? The numbers are much crazier. We literally can't do anything to influence so many people to change ways taught for thousands of years. We can create small safe heavens, but unless I become strong enough to sweep the continent, kill all seniors, and then leave young humans and beast humans that have proper relationships with each other to reign the continent and develop, it is an unrealistic dream only achievable in unreal scenarios.'

Angel asked. 'Is it that hard?'

Yasenia. 'You have to consider their history, the current number of humans, their strength to resist, the general acceptance of the populace who have been fed with propaganda for generations, etc. The fact that all of you are now nicely treated is only because their impression is that you are all under my control. If any of you were rogue humans, you would either be dead or captured.'

Andrea commented. 'However, love. Distancia, the hero, managed to do what you said.'

Yasenia nodded. 'He did. That person must have had extreme motivation, ridiculous potential, luck, and methods to fight the human lords of that time one at a time. Yet, instead of creating a continent with all races living equally, he demonized humans and created this hell for them.'

Yasenia wondered. 'He had enough strength, resources, and time to create an equal World. However, he didn't do that. Why is that? Did he have a grudge against the human race? For example, I would do the same if one of you was severely wounded or worse by someone.'

Yasenia concluded. 'Either way, I do not know his life story. I do not know his motives. I do not know his objectives. Therefore, I can't judge anything more than the consequences of his actions with an objective heart.'

Tatyana nodded. 'He may have thought it was funny.'

They all looked at Tatyana weirdly. Kali asked with a horrified tone. 'Make a whole race become cattle and live a generational torture because he thinks it is funny? Is there anyone who would do something that insane?'

Tatyana blinked twice and smiled. 'You are right.'

Yasenia's lips twitched wildly. She was the one who knew this person best, and that reaction meant the following. "Well, I did something similar, but since your reactions are so extreme, I'll act as if it was just an extreme comment."

To not give hints, Yasenia focused on Huo Yang.

"Without further ado, let's rank the top one hundred powers! Depending on the position in the events, points were distributed. We've qualified the ranking by points, and if there was someone who had the same amount, the one above would be ranked by the highest position reached by their juniors."

"For example, if two powers have one hundred points, one by achieving two fiftieth places, and another by achieving one first place, the power with the first place would be ranked higher."

"It is easy to understand, so let's begin with the one-hundredth power! [Thunder Fawn Rain]. Congratulations to them. Their juniors..."

Yasenia then listened attentively to every power's presentation, memorizing their strengths for later.

After a few minutes, our girls heard the Patriarch smirk and shout. "...On the seventy-seventh position, Yasenia Dravory and her Astral Sky Clan! This upstart power has impressed many with its highly advanced crafts. Their ranking would have been much higher if a few complications hadn't occurred! They are situated in Koran City and will soon expand."

Yasenia lifted an eyebrow. 'Not bad publicity.'

Then, Huo Yang continued. "On the seventy-sixth position..."

Yasenia spoke aloud, not hiding her pleasant surprise at her high ranking. "That's not bad for participating in three out of the ten events."

Jorey smiled and nodded. "Your girls ended up very high ranked. There are extra points and such they don't explain for ending high in a tournament. Yet, the point advantage is not that much. With a

first place, a second place, and a twenty-first-place, ranking in the top thirty should've been no problem."

Kali realized. "Right, although first place receives 100 points, second place receives 99 points, and so on."

Elder Mao commented. "The thing is that powers usually can't focus on many professions simultaneously. Hence, consistently being in the top section for each event is hard. More so when the ones participating are juniors."

Elder Hao added. "Moreover, your group hasn't participated in combat, which gives triple the points. All combat participants ranked sixty-sixth and above gained more than ninety-nine points."

Yasenia nodded. "I understand. That's why I'm pleasantly surprised. I did not expect to rank in the top one hundred."

Elder Yu laughed. "It would be strange if you didn't rank in the top one hundred. They should have also added a few points to your clan because of Andrea's work. It was such a beautiful masterpiece made by a junior. If they do not qualify it, it would be dumb."

Yasenia giggled. "Elder Yu is praising us too much. I think they didn't do so. Either way, the fact that our clan's name was said makes me satisfied. Thanks a lot for all the support during these three days."

Those that were friendly smiled back and nodded.

The top fifteen comprised seven of the nine sects, five of the thirty-three clans, and the three empires. The five clans were also in the top ten clans among the thirty-three clans.

Yasenia asked. "How is this ranking compared to the power ranking of the continent?"

Elder Mao answered. "Similar enough."

Elder Song added. "Sects focusing on combat are ranked much lower in this competition. Therefore, the top positions are usually occupied by our sects, which are big enough to have a wider variety of teachers and alumni. For example, [Five Shadow Fangs] has ranked below your clan. However, strength-wise, they are just a bit weaker than a top second-rank sect. I'm still unaware of the full potential of the [Astral Sky Clan], but you should be careful with them."

Yasenia nodded. "I was wondering about that. The senior I met from that power was not that weak."

'[Five Shadow Fangs]. We almost got into a conflict with them. I managed to ease the situation that day while speaking with them, but we must be attentive. They are not famous for being good people, after all. Luna also came from them... Sigh. Tiptoeing around is a bit frustrating. Sometimes I have the urge to change into my dragon form and raze everything to the ground.'

The other girls listening had their eyelids twitching. 'Thankfully, our love is a rational dragon, or we would be in trouble.'

Jorey added to the previous subject. "You also have to count that not all powers have come. Most of the aquatic clans are not here. A few land powers also did not bother coming because of enmities and other reasons."

Yasenia nodded.

After the rewards were divided, Yasenia and the rest left the stadium, ready to go back. The reward for ranking seventy-seventh was an earth-grade item Yasenia threw in her ring without an extra look after seeing it was useless for her.

There wasn't anything out of the ordinary in Torren City other than the giant coliseum. Therefore, Yasenia's plan of staying here for a few days was pointless.

After discussing it with the other powers, the time to return was agreed to be the following day, leaving the night free to relax and look around.

Chapter 510: Plans before returning to Koran City.

After exiting the coliseum, Yasenia looked at the setting Sun and got thoughtful. "So, what do you want to do, girls?"

Evelyn was about to speak when Yasenia commented. "Anything besides intercourse is okay."

Evelyn almost choked. "Why!?"

Yasenia rolled her eyes. "Dear, do you really want to spend our last night in this City making love?"

Evelyn nodded seriously. "Yes."

Yasenia chuckled and hugged her. "You are helpless, dear."

Evelyn felt Yasenia's arms smoothly going over her shoulders, and she hugged her lover's waist, burying her face in the comfortable softness.

The dragoness looked around and tilted her head. "So, what should we do?"

Andrea asked curiously. "Oh? You won't agree with her?"

Yasenia shook her head and patted Evelyn's head. "Although I wouldn't mind in normal circumstances. I really don't want to waste our night making love. We can do many other things."

Evelyn looked up and pouted. "What about doing it just one time?"

Yasenia smiled softly and leaned down to kiss her forehead. "Not tonight, okay, love?"

Looking at her dragoness's expression, Evelyn sighed and nodded. "Okay."

Yasenia smiled happily and suggested. "How about we have a night date together?"

Andrea commented. "Sure, that sounds fun."

Kali asked. "Where should we go? Besides the coliseum, there are no other touristic attractions at night."

Angel grabbed one of Yasenia's hands and offered. "We can go to a scenic spot!"

Evelyn commented. "I saw a restaurant with tasty-looking dishes in that direction. We can visit it."

Yasenia rubbed her blue hair and suggested. "How about a restaurant with a scenic spot?"

Andrea took out a map and looked for such a place. "According to the map Elder Song gave you, this restaurant should be like that."

Yasenia approached, waddling over because she had Evelyn between her arms and Angel grabbing one of her arms. Andrea showed her the map and pointed at one location.

Yasenia nodded. "Looks good. Let's go."

Evelyn moved to Yasenia's side and grabbed her other hand as they walked.

While making a small conversation about the tournament, they arrived.

Yasenia walked in first with Kali by her side, and the other four girls walked behind with a formal stance.

"Good evening. Do you have a table for six?"

The receptionist looked over, and the dragoness stole his breath away. Yasenia sensed that his strength was meager, so she didn't find faults with his behavior and asked politely one more time.

"Excuse me. Could you please answer my question?"

The man snapped back and coughed. His skin was dark, so Yasenia couldn't spot any blush. However, she could feel with her passive senses that his temperature increased.

The man spoke. "We have a table for six, beautiful lady. Do you prefer a VIP room or a common room?"

Yasenia smiled. "We want to have a good view of the sunset. Do you have a table like that?"

The man quickly nodded. "Yes, please, this way."

Yasenia followed, attracting gazes, and finally arrived at the table. It was on the third floor and with floor-to-ceiling windows that took the entire wall, showing a gorgeous view of the sunset and city.

After sitting down, they all ordered food.

The waiters were so focused on Yasenia's beauty that they didn't realize the other girls were humans. Moreover, a person needed a minimum strength to sense the human aura coming from them.

Yasenia waited for Kali and Valeria to analyze the food, just in case, and then they began eating.

Yasenia asked for a dish she had never seen before. The others also asked for local dishes.

Tatyana cut the piece of meat elegantly and asked. "Do you have any other intention besides going for a walk?"

Yasenia tasted the food and didn't have a change of face. "What do you suggest, Mom?"

Tatyana smiled and asked. "What, you don't like the food?"

Yasenia laughed. "It's not bad, but nothing out of the ordinary."

Angel commented without shame. "You cook much better, Yasenia!"

Yasenia used her tail to pat her head. Tatyana spoke. "I can suggest something, but I rather you think about it."

Yasenia blinked twice and calmly masticated. "Hmm... Ah! We can set up something for Fu Yu."

Angel blinked and asked. "Fu Yu?"

Yasenia laughed and placed her little baby on her lap. Angel didn't lose a fraction of a second to hug her. "I'm speaking about Young Master Fu, baby."

Angel realized. "Oh!"

"Open your mouth~."

Angel opened it, and Yasenia fed her slowly while her tail wagged. She really loved taking care of her little dear.

Evelyn chortled and commented. "Angel's brain is really strange."

Angel stopped munching and gulped with a frown, her face scowling at her comment. "Whose brain is strange!? If someone has a strange brain is you who wanted to go to bed today!"

Evelyn lifted an eyebrow and snorted. "Let me ask you some things, then. Remember, you have to answer quickly, and you can't ask Yasenia for help."

Angel crossed her arms below her breasts and tilted her chin upward. "Ask away!"

Yasenia couldn't help but kiss her baby's cheek.

\*Squeak!\*

Yasenia's attention was caught by her second dear, who had crawled out of her breasts. Then, as Evelyn and Angel spoke, Yasenia focused on Kaleina.

Evelyn started. "Which mineral reacts best with [Purple Silver Meteorite] to create Formation Ink?"

"[Deep Sea Iron Core]."

Angel answered instantly.

Evelyn nodded. "Which is Yasenia's favorite snack to eat while relaxing outside?"

Angel didn't blink before she started answering. "A small plate of Almond Brownies with the chocolate still half done so that the chocolate is still liquid inside the brownie."

Yasenia licked her lips. "I must do another one soon. We are almost running out of it."

Kali commented. "I'm impressed you can store a brownie like that. I thought the middle would solidify over time."

"The spatial ring's qualities help a lot."

Angel asked. "What's the point of these easy questions?"

Evelyn said. "Wait, I'm getting there. Two more questions. Which hand does Yasenia usually use to move the heavy items when she works in metallurgy?"

Angel frowned. "She doesn't use her hands, Evelyn. She uses her tail!"

Evelyn nodded again. "That's correct."

The others were curious as to where Evelyn's questions were going.

Finally, Evelyn asked. "So, what is the name of the City Lord of Koran City who is currently a threat to us?"

Angel was about to answer confidently, but she stopped before speaking. Her brows scrunched, and everyone could see that she didn't remember.

Yasenia, Andrea, and Kali burst into laughter.

Evelyn also laughed. "See? How can you remember those things but not something like that?"

Angel pouted and looked at Yasenia with a pitiful gaze, her big round eyes looking a bit watery as she softly whined. "Evelyn is bullying me!"

Our blue-haired girl choked on her laughter, looking at Angel incredulously. "Oy! Complaining to Yasenia is not fair!"

Yasenia gave Evelyn a side eye, making her flinch. Evelyn wanted to cry. "Yasenia, you can't be this partial."

Yasenia was laughing internally but maintained her calm outside and began consoling Angel.

Yasenia patted Angel's head and smiled. "It doesn't matter if you don't know about these complicated things, baby. I'll tell you about it if it is important. You just have to be happy and do whatever you want. Here, a kiss for you to be happy again."

Yasenia kissed Angel's lips softly and then smiled

Angel's pout quickly changed to a sweet smile as she hugged Yasenia's chest and buried her face in her neck. "I love you!"

Yasenia then looked at Evelyn and winked. The deadly and seductive wink from the dragoness almost K.O.ed the perverted girl. 'So fucking gorgeous.'

They continued speaking during the half an hour that took their dinner, with the Sun soon hiding below the horizon.

They all discussed methods of setting up an ambush for Fu Yu. Yasenia even called Cecile with the communication device.

Yasenia's first question was if her arrival had any complications, to which the Phoenix answered no.

After a few conversation points, Yasenia decided that having Cecile ambushing was too dangerous, so she asked her to wait at home.

Cecile was disgruntled, but she understood that she would not be able to participate this time.

After paying for the meal, Yasenia and company walked outside the restaurant and returned to the inn.

"Perfect. Now that every person monitoring us thinks we are here, let's use stealth skills to exit the city."

With Yasenia's order, the three seniors joined hands and made the girls disappear.

Yasenia and company moved on the dimly lit streets and walked toward the outside of the city without any problems.

The plans for setting out were discussed beforehand with the other sects. They decided to meet on the east side at seven in the morning to fly back to Koran City.

Setting an ambush was not out of the question as long as these plans didn't change.

Yasenia looked at a map with the nearby cities on it and asked. "Where is the best place to do it?"

Andrea hugged Yasenia from behind and placed her chin on her shoulder. "Hmm, this map you bought two days ago is quite useful. How about in this area? We should consider the distance and altitude we will fly, so the mountains here may be the best spot."

Tatyana asked. "Should I help?"

Yasenia nodded. "Yes, but let us plan first and think about how to set it up. Then, correct our proposal and tell us why your way is better. Mirrory and Valeria, you two also participate. This time, I want to see the power of my three darling seniors working together."

Mirrory and Valeria materialized.

"Oy, who are you calling darling senior?"

"My~, since dear Yasenia is asking, I'll do my best."

Sierra and Ebirah also materialized.

Ebirah stretched her pincers and legs and smiled. "It's been a few days since I came out!"

Sierra's body flashed with lighting as she stretched, and then she shook her body. "You are right. Although being inside Evelyn's soul is comfortable, I really want to stretch my limbs and run around occasionally."

Evelyn asked the seniors. "Can she do so?"

Valeria summoned [Ethereal Blossom] and said. "Here, carry this cutie and run around as you like, Sierra."

Sierra bowed respectfully. "Thank you, Spirit Queen."

Valeria chuckled. "No need for formalities between family."

Sierra smiled elegantly and nodded. Evelyn was awed. "Woah, to be able to smile elegantly with a wolf face, you truly are a woman, Sierra. I really hope you are big-breasted when you transform into a human form."

**\*BANG!\***

Evelyn was struck by a white fluffy tail and sent flying.

Andrea looked at Ebirah and lifted her eyebrow. "You've grown quite a bit. Now I can look at your eyes without barely moving my neck."

The previous one-and-a-half-meter-tall, hermit-crab-like, purple-golden lobster was now almost two meters tall.

Her black pearly eyes shone beautifully and were at Yasenia's eye level.

Her aura was also on the verge of a breakthrough.

"Oh! You are right!" Ebirah clacked her pincers proudly. "Soon, I'll be taller than you, Andrea!"

Andrea smiled and caressed her between her pearly black eyes, making Ebirah's eyes dance with joy as her thin legs tapped the ground happily.

Tatyana commented. "This little lobster princess should completely mature once she breaks through."

Andrea was pleasantly surprised. "Oh? Is she about to gain her complete beast body and human form?"

Valeria agreed with Tatyana. "Yes. This child is about to change from a girl to a woman, hahaha. It is always a treat seeing living beings mature."

Ebirah pouted (don't ask how a lobster can pout) and complained. "Will you not pamper me anymore when I grow up, Andrea?"

Andrea hugged her and laughed. "How could that be? You are a princess, Ebirah. You will be pampered all your life or until you want to become a Queen!"

Ebirah giggled happily and hugged Andrea back. "Yay!"

Angel laughed. "Ebirah, you are so cute!"

Ebirah quickly approached her best friend, and both little girls at heart began conversing about their things.

Andrea was more like a big sister or another parent for Ebirah, while Angel felt like a friend for our lobster princess.

Evelyn returned from being blasted away by the powerful Wolf Queen and commented. "Should we move? We don't have that much time, after all."

Yasenia nodded with a smile; she liked observing her dears interact. "Sure, let's go to this area and find the best spot to set up an ambush."

Sierra returned from running around and threw Evelyn onto her back.

Yasenia and her girls moved toward Koran City for an hour and stopped near a mountain range.

There were less than two hours for midnight to arrive.

Kali commented. "I remember flying near this mountain while coming to Torrent City. How about we choose that mountain peak? It is quite tall."

Nobody disagreed, and they all began making plans.
