

HEROIC KING

Chapter 1: Again, the eternal kingdom

"Hey, Lin Han, do you know that new game? It's the eternal kingdom."

In the self-study class, the teacher sat helplessly and looked at the following group of students who were talking about it. They didn't know what to say.

They were all discussing a game that was about to appear, a game called the most perfect war strategy in history. Game - "Eternal Realm". Thinking of this, the teacher couldn't help but think, what role should I create at that time? It is said that the elves' arms MM is very attractive.

"what?!"

Lin Han, who was in deep thought, looked helplessly and looked at his best friend Zhang Liang with excitement, not knowing what to say.

"No, you must know, you are a fan of Heroes of Invincibility and Warcraft 3, you must know right? What race do you want to choose? Human? It doesn't seem to suit you, orc? That's probably good, actually I think Hell clan is quite suitable for you, cemetery clan is also good."

Regardless of Lin Han's feelings, Zhang Liang began to talk to himself. At their age, they are curious about new things. It is understandable that Zhang Liang is so excited about such a brand new game.

"get out of class has ended!"

When the bell rang, almost all the students were boiling. In less than a minute, more than 100 people in the entire study room walked away. Almost all the students were discussing eternity. The game of the kingdom shows how attractive this game is to them.

"Hey, Lin Han, remember to add me as a friend in the game, I'm still that name, you know!"

Because Lin Han lived outside alone, he didn't go back to the dormitory with Zhang Liang. This guy who was about to go crazy didn't forget to tell Lin Han before he left. It seemed that he was really stuck.

"Crack!"

Back in the small apartment where he lived, Lin Han entered the bathroom, opened the hood and let the water soak him all over. Looking at him in the mist in the mirror, he suddenly smashed the mirror with a punch, and the fragments were scattered all over the place. , his right hand was dripping with blood, but he didn't feel much.

"It's not a dream."

Seeing the blood oozing out of his right hand, Lin Han took a deep breath and said to himself. When he woke up this morning, he found himself lying on the bed in the university apartment, and the phone on the desk clearly told him that it was 2015, not 2017 before he went to bed.

Sleep until 2 years ago? Most of the other people probably wouldn't believe this, but it was actually the case. When he walked into the familiar study room again and looked at the group of classmates who had long since lost contact with him, his Reason was telling him that it was true.

November 21, 2015 is a date that many people will not forget. After 2 years of development, the super-large virtual strategy game-Eternal Kingdom global public beta jointly developed by more than ten large-scale games such as Ubisoft and Blizzard , the real game command is carried out by a virtual helmet. The player plays a lord in it, who slowly develops from a small town at the beginning, and finally rules the continent and competes in the world.

The emergence of this game has completely changed the game pattern of the whole world. Almost all gamers in the world have chosen Eternal Kingdom. Some people joked that since the game of Eternal Kingdom, there will be almost no dangerous events in the city at night. Yes, because they are all fighting in the eternal kingdom.

After wiping his body clean, Lin Han walked out of the bathroom, sat on the bed, picked up the gaming helmet on the side, and looked at the eight digits representing the purchase number on the helmet. The order he chose for the first time after knowing the news, his order was also out of ten million.

After connecting the game helmet to the power supply, Lin Han lay on the bed and took a deep breath, then put the game helmet on his head, his eyes suddenly darkened, and then he appeared in a huge golden hall.

"Identity confirmation, player Lin Han, welcome to the eternal world, please confirm your game name."

A huge fluorescent screen slowly appeared on the golden hall, and a majestic voice sounded in Lin Han's ears.

"Dark Blasphemy."

After choosing again and again, Lin Han finally used the name he used in the previous life, and when he confirmed the name, a pair of huge white wings and a pair of black fallen wings appeared on the fluorescent screen. This is the faction that the player chooses. In Eternal Realm, players are divided into two factions, light and dark. In the last life, Lin Han was a player in the dark camp, and this life will of course be no exception.

"The player's camp is determined - the Dark Council, please choose a race."

"The cemetery family."

"Players are asked to choose the shape."

"Graveyard Dark Knight."

"The race is confirmed. The player information is confirmed, the player Lin Han, the image - the black warrior, the name - the dark blasphemy, the lord of the dark council cemetery clan, is entering the game."

The majestic voice changed to a sweet female voice, and the scenery in front of Lin Han suddenly changed. He jumped from the golden hall to the dark cemetery town, the dark land, the pale bones. Skeletons, everything proves that this is a town that belongs to the dead.

"Ding! Please note that a group of monsters is entering your town. You must defend against three waves of monsters attacking the city, which will be of great help to your next development."

Just like his memory, every player will encounter three waves of monsters attacking the city after entering the game. This is not only a test, but also the game allows players to adapt to the game. In Lin Han's memory, after completing the defense task, the player will get a rating, the higher the rating, the higher the reward.

"If that's the case, then I won't be polite!"

Looking at the skeletons that kept pouring in outside the city, Lin Han showed a smile. Since he was reborn, he would no longer be an unknown player like in the previous life. In this life, he will conquer his own world. In this life, He wants the whole game to tremble for him!

"Ding! The battle is over, you get 14 experience points, you get 21 gold coins, you get 1 unit of wood, your troops - skeletons get 29 experience points, and your troops - skeleton archers get 15 points of experience. You Obtained 3 units of skeleton."

"I'll go, I've finally killed it, it's still so hard to fight."

After retreating from the battle space, Lin Han finally breathed a sigh of relief. Every lord who builds his own castle will be attacked by 3 waves of wild monsters within 10 minutes of entering the game, and the number of attacks in each wave will be higher than before. There were many more waves, but fortunately, when each lord entered the game, the system would give a certain amount of troops, otherwise Lin Han doubted that he would not even be able to defend the first wave.

"Ding! You have completed the novice defense mission. Your castle permissions are all enabled, you have gained 1000 units of gold coins, you have acquired 10 units of resources, and you have obtained the architectural blueprint - Land of Bones. Your defense mission is rated as A, You've got an extra reward - Architectural Drawings - Skeleton Training Ground."

"It really is."

Seeing the extra blueprints in the backpack, Lin Han was instantly happy. Although he said that the defensive battle that had just started was very difficult, there were also good rewards after completion. Of course, for many lords who have just entered the game, the most reward is 10-100 gold coins or a few units of resources, but for Lin Han, the rebirth, this task means at least one special architectural blueprint reward.

"Bone training ground: Special architectural drawings for the cemetery family. Prerequisite buildings are required - necropolis, base camp, and the land of bones. Ordinary skeletons can be trained into more powerful ones, but it will consume resources and equipment."

At the Skeleton Training Ground, Lin Han remembered that few people had this thing back then. This reward must at least be obtained in the defense mission, with a rating of B+ or higher. That is not a simple matter. It can be said that in the entire game, in this region of Asia, there are at most less than

100 players who can get this evaluation, and those are almost all born strategists.

As the prompt sound ended, Lin Han appeared in a huge cemetery. Behind him, a huge floating cemetery-like building continued to shine with green light, and Lin Han's feet began to turn black. The black area is still expanding.

"Ding! You are on the unique ground of the cemetery family - the rotten land, you have gained 10% movement speed and an additional 3 points of health recovery bonus per second."

The rotten earth is the unique terrain of the cemetery clan. After each cemetery clan's building is constructed, the surrounding ground will be corroded into this terrain, and the cemetery clan's buildings can only be built on the rotten earth.

Walking to the ground of the cemetery, a green light was cast from the sky cemetery, and Lin Han began to slowly lift off into the cemetery. In the center of the necropolis, a green ball of light is constantly jumping. This is the heart of the town of the cemetery family. The buildings of the cemetery family are all supported by this. Many cemetery buildings.

However, it is not easy to improve the heart of the town. In addition to a lot of resources, it is also necessary to obtain a higher level of the heart of the town. There are several players with level 8 towns. At this time, players in level 8 towns are basically peak-level characters. Each of them is the guild leader who can occupy an area in the game. Only they have so many resources. Ability to upgrade towns to level 8.

However, in this life, maybe there will be one more player in the 8th-level town. Although Lin Han did not have a large number of players to support him, in the last life, as an ordinary player, his biggest hobby was to play in the forum. He remembered all kinds of hidden rewards, quests, treasure chests,

and even heroes. Unfortunately, when the quests were announced at that time, they were basically completed by others, but in this life, these quests have not yet been discovered.

"Give me details of the town."

Putting his hand on the town's heart, Lin Han gave an order to the town's heart. As the order was issued, a green virtual light screen appeared in mid-air.

"Castle Name - Dark City, Castle Race - Cemetery Clan. Castle Level: Level 1. Resources: 1432 Gold Coins, 10 Units of Level 1 Wood, 10 Units of Level 1 Ore, 10 Units of Level 1 Stone. Special Resources: 27 Unit Skeleton. Owned Building: Level 1 Necropolis. Owned Troops: 23 Skeletons, 20 Skeleton Archers."

This is all that Lin Han has now. After each lord player is born, he will get 25 units of skeletons and 20 units of skeleton archers. Of course, this is the army of the cemetery family, and the troops of other races are also different.

There are many races for players to choose from in the game of Eternal Kingdom. Moreover, the races of players in this game are also divided into 2 opposing camps, consisting of human race, night elves, elves, towers, and fortresses. The Holy Light Alliance, and the Dark Council composed of the cemetery clan, the orc clan, the dark elves clan, the swamp clan, and the **** clan, the two camps are located on two different continents. A battle will break out, and both players and NPCs will join the battle. Defeating the enemy in the battle will gain a lot of experience points and camp reputation. Faction battles are very lively, and a large number of players will work hard here for the blueprints of arms and buildings.

However, this issue is not about Lin Han yet. The first faction battle started about a month after the game's public beta. Before that, Lin Han still had a lot of time to develop his troops.

"Build the Land of Bones, build the primary city walls, and build 2 Wraith Towers."

After estimating his own resources, Lin Han began to give orders.

"Under construction, the Land of Bones is still 2 minutes away from the end of construction, the primary city wall is still 3 minutes away from the end of construction, and the Tower of Wraiths is still 5 minutes away from the end of construction."

A cold reminder sounded, and a bunch of skeletons appeared on the cemetery. These skeletons began to be scattered around the cemetery, building the buildings that Lin Han ordered.

"Now, it's almost time to start planning."

After determining the construction time, Lin Han began to clean up the wild monsters around the castle. The number of these monsters is small, which can provide players with some initial resources and experience. Although not many, mosquito legs are also meat. For Lin Han, who has just started to develop Said, even if it is 1 unit of resources, we have to fight for it.

However, these monsters are not Lin Han's main target. While cleaning these monsters, he is still looking for some special things, such as wild monster nests.

Wild monster lair, this is a very special building. They appear randomly in the wild and are fixed in a certain place. Generally speaking, there are many such lair in the wild, but the level of troops that can be recruited is not high, and the number of troops is also high. Not much, but if you can find several such wild nests, it can also provide players with a good source of troops.

"found it."

After killing several piles of skeletons in a row, Lin Han finally saw a huge cemetery. This is a special terrain. In the cemetery terrain, the attributes of the cemetery family will be improved, and there will definitely be wild monster nests in this terrain.

However, for the current Lin Han, this cemetery cannot be entered rashly. Generally speaking, there are a lot of monsters in a cemetery, and the monsters in the cemetery are refreshed very quickly. The most important thing is, the safe range of monsters here. It is 50 meters. Once they are 50 meters away, they will be involved in the battle space. If several monsters are continuously spawned around Lin Han, he is likely to be caught in the wheel battle. For ordinary skeletons, he can't afford to fight wheel battles.

"Ding! You have entered the skeleton's hatred range, you have entered the battle space. You do not have any battlefield skills, the battlefield is the original size, enemy troops: 15 units of skeletons, 15 units of skeletons, your troops: 23 units of skeletons, 20 skeleton archers unit."

Lin Han's luck is not very good. Just when he hesitated, a skeleton has been refreshed around him. There is no doubt that he will be dragged into the battlefield by this skeleton the next moment.

The terrain of the necropolis is similar to a small open-air dungeon. There are quite a lot of monsters in it. For example, the skeleton team that Lin Han met has a full 30 units. On the way before, Lin Han met Skeletons are 2-7, occasionally encounter a 10, are quite rare.

"Skull: The first-order and first-level troops of the cemetery family, the most common undead soldier in the cemetery family, although fragile, but the number is their biggest advantage. Damage: 1-3, defense 1, health 15, movement speed: 1 meter per second. Attack speed once every 3 seconds.

Special abilities: 1. Skeleton body [The skeleton body possessed by a skeleton can have a certain chance to evade a long-range attack, and a 33% chance to evade the attack when receiving a long-range attack].”
