

HEROIC KING

Chapter 2: Monster siege attack

The battle map was an open space full of black soil, which was the most suitable corrosive terrain for the cemetery tribe to fight. Not far from Lin Han, two piles of skeletons were slowly approaching him.

Skeletons are only the lowest class of the cemetery family, and their attributes are not very good. However, their special ability to evade long-range attacks is quite disgusting. During the previous battle, Lin Han tried to dodge all 3 consecutive attacks, but Not bad this time, the Skeleton Archer hit the first attack.

"attack!"

In the face of those skeletons, Lin Han gave the order to attack after a little calculation. The attack of 20 skeleton archers was not bad. He killed 3 skeletons in the first time and seriously injured several. This is also thanks to him. The addition of this lord's talent.

"Skull Archer: The cemetery family's first- and second-level elite troops. Skeletons are more powerful creatures after training in the skeleton training ground, and have long-range attack capabilities. Damage: 2-5, defense: 1, health 20, movement Speed: 1 meter per second, attack speed: once every 2.5 seconds, range: 15 meters. Ammo: 6 rounds. Special ability: Weakened shooter unit [This unit can perform long-range attacks, but the range is closer than ordinary shooter units, and also Penalized by the shooter unit, but the damage of enemies outside the attack range or close range will be reduced by 50%.] 2. Skeleton body [The skeleton body possessed by skeletons can have a certain chance to evade long-range attacks, and a 33% chance to evade the long-range attack when receiving long-range attacks. attack]"

"Dark Blasphemy, Level 1 Cemetery Clan Lord, Occupation: Commander [Command troops to fight, commander value and attack and defense attributes are increased.], Attack Talent: 3, Defense Talent: 2, Wisdom Talent: 2, Spiritual Power Talent: 2, Commander Value: 150 points, Initial Skills: Primary Offensive, Primary Defense, Primary Archery. Racial Skills: None [Randomly obtained after level 10 when you transfer to another class], Equipped with: None."

There are also 2 types of lords. The first type is a commander like Lin Han, who is mainly used to command troops to fight. Each upgrade will increase the commander value, defense talent, and attack talent. The second is the spell caster. This kind of lord mainly uses spells to strengthen troops or attack the enemy on the battlefield. Each upgrade greatly improves the talent of wisdom and spiritual power. There are two different lords, and the final development route is also different.

But if you really want to say that in the later stage, the commander can completely suppress the caster. Even if the caster has a terrifying group damage skill, the magic power consumed by using the skill is huge, as long as it does not cause damage to the commander's troops once Fatal damage, then what awaits the caster is the commander's frantic attack.

The lord's attributes are directly added to the troops, and the lord's attribute bonus is about 1 point of attack to increase the damage of the troops by 1%, and 2 points of defense to increase the defense of the troops by 1%. As for wisdom, it increases the lord's magic power. , while mental power is linked to skill damage, which is also used by caster-type lords.

In addition, there are 3 basic skills that can increase the combat effectiveness of the troops. The primary offensive technique can increase the damage of the melee arms of the troops by 5%, the primary defense technique can increase the defense power of the troops by 5%, and the primary archery can increase

the damage of the troops by 5%. 5% ranged damage for ranged units, but this effect does not increase magic damage.

At the beginning of the battle, Lin Han directly controlled the skeleton archer to attack the skeleton on the opposite side, and then controlled 3 teams of 1 skeleton to move forward. At the same time, the 20-unit skeleton of the team blocked in front of the skeleton archer. Even if the enemy rushed over, he would definitely There is no way to threaten the Skeleton Archer.

This is Lin Han's tactic, using a skeleton to attract firepower to slowly consume the enemy. In the early stage, the enemy does not have the wisdom of the hero, and they don't know the tactics at all. When the enemy is close to them, they will pay attention to it. In the consciousness of the approaching enemy, this can give the Skeleton Archer enough time to output.

"Ding! The battle is over, you have gained 120 experience points, you have gained 80 gold coins, you have obtained 3 units of stone, your armour-skeleton has gained 129 experience, and your arm-skeletal archer has gained 115 experience. You got 9 units of bones."

Looking at the experience value of the skeleton, the current skeleton has reached 20% of the experience value, so it only takes 3 more fights to upgrade to the level 2 skeleton, and he only lost 1 skeleton in the battle just now, Level 2 skeletons can be trained through the skeleton training ground. However, it is still a bit difficult for Lin Han to build a skeleton training ground. The biggest difficulty is the lack of resources.

However, this problem is not difficult to solve. There are a lot of scattered resources around the cemetery. The guards of these resources are basically a small number of skeletons (the number is 1-10), and occasionally some more skeletons appear. [Quantity 10-30], and these more skeleton guards have more resources. Lin Han made a preliminary estimate and collected all these

resources. He can build his skeleton training ground, and the remaining resources Also enough to build a blacksmith shop.

"Ding, your Wraith Tower has been built, and your castle has attracted the attention of surrounding creatures. After 3 minutes, monsters will attack your castle in 5 waves. Please pay attention to the defense. If the defense fails, you will lose 80%. resources with an existing random building."

At the same time as the reminder of the Tower of Wraith's construction came, another reminder that Lin Han didn't want to hear came, and there was a second monster siege so early. The city wall was built, and with the Tower of Wraith, it could cause a lot of damage to the monsters attacking the city.

Of course, this is secondary. If he can defend, Lin Han can obtain a lot of resources. You must know that in the siege defense battle, every time a monster is killed, that monster will have a chance to drop certain resources. Also a very good source of resources.

"Build a base camp, build a smithy."

Not daring to stay any longer, Lin Han quickly returned to the castle. At this time, the castle was surrounded by a circle of black marble city walls. Above the city walls, two black towers constantly exuded dark green Light, this is the Tower of Wraith.

"Primary City Wall LV1: Defense: 10, Armor Type: Enhanced Armor [Reduces all attack damage by 40%.] Durability: 400400."

"Tower of Wraiths LV1: Attack 20-35, Attack Type: Piercing Attack [Add 20% damage to normal armored and unarmored units] Attack Speed: 1 time in 2 seconds. Defense: 5, Armor Type: Strengthened Type armor, durability 200200, range: 40 meters."

Although the number of attacks this time was 5 waves, looking at the attributes of the city wall and the Tower of Wraiths, Lin Han was not very

afraid. After all, the primary city wall in the early stage was a bug. For the attack of 1-9 points, 10 points of defense is basically the same as a bastard, and there is no other possibility other than the basic deduction of 1 point of fixed damage for each attack.

The enhanced armor can reduce damage by 40%. Although it is said that the siege attack method will cause 250% damage to the enhanced armor, but in the early stage, before the level 4 town heart appeared, it was possible to have a siege. Players of the earth-like arms are estimated to have nothing. As for wild monsters, it is even more impossible.

"Ding! Your town-Dark City enters the monster siege state, the town enters the city battle mode, and the first wave of enemies will appear at 30!"

The battle prompt began to sound, and Lin Han was also preparing for the last step.

"Upgrade the primary city wall and upgrade the Tower of Wraith."

It is very important to strengthen your long-range combat power and defense power on the eve of the city battle. Moreover, it only takes 100 gold coins and 5 units of stone to strengthen the Tower of Wraiths from LV1 to LV2, but it will increase the damage to 30-75, and it will last for a long time. The degree will also be increased to 500500.

Compared with the Tower of Wraith, the city wall is much more monotonous. The upgrade from LV1 to LV2 only increases the city wall's defense power by 2 points and 200 points of durability. However, during the city battle, the resources consumed by repairing the city wall will increase a lot. , it is still very good to increase the defense power in advance.

"Woo~~~~~"

As if someone was blowing a horn in his ear, a low horn sounded in Lin Han's ear, and in the distance, a large number of enemies began to appear.

"Ding! The first wave of enemies: 30 skeletons, 30 skeletons, 30 skeletons, 40 skeletons, 40 skeletons."

When he saw the situation of the first wave of enemies, Lin Han was completely spartan, and there were a lot of bones in the distance. Speechless. Is this the first wave of enemies? This lineup, 90 units of skeletons, 80 units of skeletons, isn't this **** shit!

"Bone: The cemetery family's first-order and second-level enhanced arms, ordinary skeletons, will gain more powerful abilities after many battles. Damage: 2-4, defense 2, HP 30, movement speed: 1 meter per second, attack Speed once every 3 seconds. Special abilities: 1. Skeleton body [The skeleton body possessed by skeletons has a certain chance to evade long-range attacks, and a 33% chance to evade the attack when receiving a long-range attack]. 2. Skeleton regeneration [After each round, the team will Arms will restore a certain amount of health, and the specific recovery amount is the number of arms x2, this effect cannot revive dead units.]"

"Master, it's a lot of fun now!"

Seeing the 5 teams of skeletons on the opposite side start to move slowly, Lin Han suddenly felt a chill in his heart.

The intensity of monster siege increases with the number of waves. If the number of siege monsters in the first wave reaches 170, then in the fifth wave, the number of siege monsters will reach a terrifying level of 1,000 or even more than 1,200.

"There is no other way, only to hold on to this wave first, and then strengthen the tower of resentful spirits with speed."

Looking at his resources, after building the base camp and blacksmith shop, he strengthened the Tower of Wraiths and the city wall. Now he only has the resources to build at most one tower of Wraiths. However, Lin Han knew that

just relying on such a few resources would definitely not be enough. The current wave is coming from the east of the city of darkness, which is a plain, and the next few waves may attack from the south and north of the city of darkness. , As for the west side, this is no problem. The west side is a lake area, and there are basically no aquatic monsters. This is the reason why Lin Han was able to pass the defense mission quickly and highly. Without a monster, he can deal with it more easily, at least Don't run around.

"Cancel the construction of the blacksmith shop and base camp."

After thinking about it, Lin Han still canceled the construction of the blacksmith shop and the base camp. Although 20% of the resources would be lost in this way, but now he has no other way.

Following Lin Han's order, 4 Towers of Wraiths began to be built, two in the north and two in the south, and because of the range of the Towers of Wraiths, enemies located 20 meters in front of the western city wall could also attack, so that It can greatly reduce the attack power of the enemy.

"The Skeleton Squad is advancing!"

Above the city wall, Lin Han began to control the advance of the skeleton army. After returning to the castle, he immediately recruited 15 skeletons in the Land of Bones, and at the same time sent out all the remaining 18 skeletons in his hand, and began to attract the attention of skeletons and skeletons in different directions.

During the city battle, use these 33 teams of skeletons to delay the enemy, and then let the Tower of Wraith and the skeleton archers take turns to attack, constantly killing the enemy's troops. Only in this way can he have a chance to win. As for the rest in his hands The 18 skeletons can be upgraded to level 1 and level 2 skeletons immediately, but unfortunately he has no time to wait for the level up!

"Ding! The first wave of monster siege is over, you have 2 minutes to repair, 2 minutes later, the second wave of monster siege will come, please pay attention!"

When Lin Han's skeletons were killed by Team 14, the Tower of Wrath and the Skeleton Archers also wiped out all the enemies. The damage caused by the defense towers to the troops will not be evaded, so it can be said that this time Lin The cold land is quite lucky. If he didn't build a defense tower and only rely on the city wall, he would never have survived the first wave of attacks.
