

# HEROIC KING

## Chapter 3: Crazy siege and racial skills

However, as long as he survived the first wave of attacks, Lin Han will feel more comfortable in the next time. He cleaned the battlefield. Now all the resources outside the city are scattered gold coins, wood, stones and other resources. Although there are not many, but all The accumulation is enough for Lin Han to build 3 more towers of resentful spirits.

Of course, the biggest gain in this battle is not only this. After killing so many skeletons and bones, Lin Han unexpectedly obtained 2 class cards.

"Army Card - Skeleton [30 Units]: After use, 30 units of skeletons can be summoned to fight for you. You can also use this card and other cards to synthesize an augmented magic circle to enhance the productivity and defense capabilities of the town."

"Army Card - Skeleton [20 Units]: After use, you can summon 20 skeletons to fight for you. You can also use this card and other cards to synthesize an augmented magic circle to strengthen the productivity and defense capabilities of the town."

Arm cards are a very special item in the Eternal Kingdom. They can be used directly to summon a large number of arms, but there is a more effective way to use them—combine them into an augmented magic circle.

In Lin Han's memory, the augmented magic circle is far more powerful than the direct summoning of troops. The formed augmented magic circle can last for 3-10 days. During these 10 days, the resource production and the production of arms of all the cities of the combinator are All will be increased, and this is the most powerful place for the Magic Array to increase.

However, now Lin Han doesn't have so much time to think about how to maximize the effect of these cards. What he lacks the most now is troops. He doesn't think this will be the case in the next few waves.

"Continue to build 1 Wraith Tower in the south and 1 Wraith Tower in the north, and strengthen the 4 Wraith Towers built before!"

Although it is possible to build a base camp and a blacksmith shop, Lin Han did not choose these two things. He has one. The monster siege he triggered is definitely not as simple as an ordinary monster siege. It was triggered once, but that attack was not so terrifying. The first wave of enemies almost reached 200 units. Lin Han was afraid that his city wall would not be able to support it.

"The second wave of enemies appears to the north. The number of enemies is 100 skeletons, 100 skeletons, 80 skeletons, 80 skeletons, and 50 skeleton archers. Please pay attention."

The reminder that came again made Lin Han's heart cold. With 410 units of enemies, if this trend continues, in the 5th wave, he may face close to 1,000 units of enemies.

"Damn, how can you be so rude!"

When he thought that he would face 1,000 units of enemies, Lin Han felt depressed for a while. With so many enemies, if he didn't pay attention, his castle would be completely scrapped.

However, this round of the enemy's attack is not dangerous. After all, the damage of the Tower of Wraith is there, and a few salvos from the Tower of Wraith can kill more than ten skeletons. However, this time, in order to block The attack of the skeletons, Lin Han pulled 50 units of skeletons out, of which 38 units were killed, which made Lin Han go crazy. Of course, when the battle report appeared, he laughed again.

"Your troops cleaned the battlefield, you got 21 units of wood, you got 15 units of stone, you got 8 units of ore, you got 2143 gold coins, you got a class card - bones [20 units] x2, you Obtained a class card - Skeleton Archer [10 units] x1."

I exchanged 38 units of skeletons for 40 units of skeletons, and 10 units of skeleton archers. I brought a lot of resources and gold coins. It's not a loss to sell it!

Moreover, after this battle, Lin Han also directly upgraded, not only the attributes have been improved, but also 2 skills can be selected. Although the experience gained by the player in the defense mission is less than the experience of killing wild creatures, but But he couldn't stand the number. He thought that when he really survived the fifth wave, he could be promoted to level 4 lord.

"Ding! Your level has increased. Current level: LV2, experience: 1522000. Your attack talent +2, defense talent +1, you can now choose a racial skill and an enhanced skill."

At the same time as the prompt came, four different kinds of icons appeared in front of Lin Han. The two icons above represented racial skills, and the two icons below represented enhanced skills.

Racial skills are unique skills for each race, such as the cemetery family, their racial skills are related to the undead troops, such as bone strengthening, carrion regeneration, etc., and the orcs may be resistant skins. Yes, let's say, this time Lin Han really encountered the racial skill of bone strengthening.

"Primary Skeleton Enhancement: Graveyard Race Skill, which increases the HP of all Bone-type units by 10%, and increases the Attack Power and Defense Power by 1 point at the same time."

Like primary attack skills, there are several levels of racial skills. The gap between the lowest level and the highest legendary level is terrifying. Lin Han can remember that there was such a great man in his previous life, who strengthened his bones. Raised to the legendary level, and then frantically summoned the bone dragon, almost completed the feat of one person singled out a large guild.

Lin Han still remembered that he had seen this guy's legendary skeleton enhancement, which could increase the health of all skeleton units by 100%, at the same time increase the attack and defense power of skeleton units by 50%, and increase the attack speed of skeleton units. With movement speed, it is simply a bug-like skill!

Of course, just like this, it's nothing. After all, skeletons, bones, and other arms can't be doubled, but the problem is that this game sets the bone dragon and its advanced arms as the skeleton type. , that's really terrible, imagine that dozens or even hundreds of strengthened bone dragons or even advanced arms enter your home to attack frantically. What is the concept?

It can be said that if the guy hadn't provoked a large guild in the end, he might have really become an invincible player alone.

If it was normal, Lin Han would definitely choose this racial skill, but his eyes were completely attracted by another skill, and he couldn't move at all.

"Primary Death Summoning Mastery: Graveyard Race Skills, Limited Occupation - Commander, every time you enter the battle space, the Commander randomly summons 10 units of Graveyard Race creatures, and the creature's strength cannot exceed the summoning skill level + 2 , the summoned creatures will disappear after each battle."

Death Summoning is proficient. This skill will only appear in the commander's skill tree of the cemetery family. It can be said to be a unique skill of the

commander. Although it is randomly summoned in every battle, Lin Han knows that when this skill is promoted to master At level, the summoner can specify a certain type of unit to be summoned.

In the previous life, there were players who upgraded this skill to the legendary level, and in the legendary level, this skill will become another brand-new skill - the door of the dead, which opens the door between the world of death and the present world. Call upon the undead to fight for it.

And that player is known as the first person in the death group, the man known as the undead monarch, but in this life, Lin Han has a crazy idea, the undead monarch, this title must belong to him!

"Choose Primary Death Summon Mastery!"

With this crazy idea, Lin Han chose the primary death summoning mastery without hesitation. At the same time, he also had a choice for the following two enhanced skills.

One of the two enhancement skills is Primary High Yield, which increases the output of all your own resources. In the primary level, the normal resources increase by 2 units + 5% of the total output every day. The next players will choose the primary high yield. The increase of resources means rapid development in the early stage, but Lin Han is extremely lacking in strength now. Besides, he really lacks resources, but he has many ways to obtain it.

"Choose the primary force of death!"

Lin Han had just made a choice. Countless black rays of light fell from the sky and shone on all his troops. Lin Han clearly saw that all the troops had expanded a little, which also meant that the effect of the primary death force had begun to take effect. .

"Phew." Lin Han took a deep breath, exhaled heavily, and walked slowly up the city wall. The city wall was densely populated with skeleton archers.

Defensive battles also have the advantage of defensive battles. After each battle, the skeleton archers' The ammunition will be restored. As long as the Skeleton Archer can output steadily, Lin Han can hope to complete these 5 waves of defense.

37 units of skeleton archers, this number is not too much, but it is really good for defense. The city wall has a 50% increase in the range of long-range troops, which means that the current group of skeleton archers can attack. Approach an enemy 23 meters away.

The increase in the range means that the enemy can be attacked more quickly. The towers of the Wraith have all risen, and the dark black light is circulating on the tall minaret. When the enemy approaches, the light will fly out and hit the enemy. After upgrading The attack of the Wraith Tower is more powerful. Tier 1 units are simply not enough for these defensive towers to attack at one time. If Lin Han can now upgrade the base camp to level 3, he can also upgrade the Wraith Tower to an advanced Frost Wraith Tower. Or the Tower of the Wraith of Death, which is more destructive.

"The third wave of enemies appears in the south of the castle: 150 skeletons, 150 skeletons, 150 skeletons, 100 skeleton archers, 50 zombies."

"Your primary death summon mastery is activated, the dead are awakened from the darkness by you, and 10 ghosts join the battle."

Two reminders came one after another, and Lin Han's face finally looked a lot better. The number of enemies in the third wave was 600 units. Although the minimum monsters were skeletons, the number was very small. The defense ability of skeletons was stronger than that of skeletons. Quite a lot, but in front of the Tower of Resentful Spirits, they are all masters one at a time. Lin Hanba doesn't need to use more advanced units, so he will be much easier to fight like this.
