

# HEROIC KING

## Chapter 5: Leader-level creatures are coming!

"Upgrade all Skeleton Archers to Skeleton Heavy Crossbowmen."

Taking the team of skeleton archers to the entrance of the cave, Lin Han gave an order to upgrade, and suddenly a bright dim light broke out in the cave, and all the skeleton archers were absorbed by the light, and soon there was a click from the cave. With the sound of clattering bones, a whole new army of troops appeared in front of Lin Han.

This team of skeletal heavy crossbowmen held a huge black heavy crossbow, a cage of crossbow arrows on their backs, and a small black cloth cap on their heads. It looked a bit funny, but these guys are funny, they are powerful But not to be underestimated!

"Bone Heavy Crossbowmen: The Graveyard Clan's Tier 1 and 4 Elite-level Enhanced Arms. When Skeleton Archers go through many battles, they can be trained into Bone Heavy Crossbowmen. When a large number of Bone Heavy Crossbowmen appear on the battlefield, At this time, there will be unimaginable fear for the enemy. Damage: 4-9, Defense: 2, HP 50, Movement Speed: 0.6 meters per second, Attack Speed: Once every 2 seconds, Range: 30 meters. Ammunition: 8 rounds. Special ability: Shooter unit [This unit can perform long-range attacks, but the damage of enemies outside the attack range or close to it will be reduced by 50%.] 2 Skeleton Body [The skeleton body possessed by skeletons can have a certain chance to evade long-range attacks and be affected by long-range attacks. 33% chance to evade the attack when attacking] 3. Penetration [When the Skeleton Heavy

Crossbowman attacks a target, if there is an enemy 5 meters behind the target, it will take up to 66% damage. Cut by 33%, the minimum is 33%].”

Compared with the Skeleton Archer, the Skeleton Heavy Crossbowman's attack is more than a little higher, and the range is also greatly improved compared to the Skeleton Archer. The most important thing is that this guy has an additional penetration ability, which can be used in a large number of enemies. When gathering, this penetrating ability will cause extremely high damage to the enemy!

With such a team of 30-unit Skeleton Heavy Crossbowmen, Lin Han's confidence was immediately strong. The damage of 4-9 was enough to cause enough damage to any unit below Tier 3, plus the increase of the primary death force. Achievements are 5-10! This attack has already exceeded the attack power of the third-level and second-level troops ghosts.

"Please pay attention! The fourth wave of monsters will appear after 1 minute. After the death of the leader-level creatures, treasures will be dropped. At the same time, there will be a certain bonus to the evaluation after completing the defense!"

Another prompt popped up. Lin Feikuai placed the Skeleton Heavy Crossbowmen on the city wall. A large number of Skeleton Heavy Crossbowmen locked all the heavy crossbows on the city wall. The heavy crossbowman's range reached an astonishing 45 meters, farther than the Tower of Wraiths.

"Ding! The fourth wave of monsters appeared in the north of the castle. The monster siege failed several times in a row. The Skeleton Archer King has become angry. He will attack with his troops. Please note that killing the Skeleton King will get additional treasures. Enemy troops: Skeleton 200 units, Skeleton 200 units, Skeleton Archer 100 units, Boss-level creature - Skeleton Archer King, Skeleton Archer 100 units, Skeleton 200 units."

"Depend on!"

When the huge skeleton figure appeared in Lin Han's field of vision, the corners of Lin Han's mouth began to twitch. The Skeleton Archer King, Lin Han had imagined many boss-level creatures, and the last thing he wanted to meet was this guy, because this guy was the most disgusting among the low-level boss-level creatures.

"King of Skeleton Archer: 1st-tier troops, 4th-level leader-level creature, damage: 50-80, defense 5, health: 7000, magic power: 1000, movement speed: 1.5 meters per second, attack speed: once every 2 seconds, range: 40 Rice, Ammo: 30 rounds. Special abilities: 1. Archer unit, 2. Skeleton body, 3. Penetration, 4. Frost arrow [The attack of the Skeleton Archer will be accompanied by the power of ice, which will cause an additional 10 points of damage to the target, while slowing down by 40%, and attacking the defense tower will reduce the attack speed by 20%. Each attack consumes mana: 10] 5. Evil Aura LV2 [War Aura, increases the movement speed of creatures within 500 meters around the Skeleton Archer by 20%, An additional 5 points of health are restored per second.] 6. Penetrating Shot [The King of Skeleton Archers accumulates strength and fires a violent shot at the enemy within a straight line within two meters in front of him, causing 200% damage to all enemies within a distance of 50 meters. Will cause 250% damage. Consume mana, 250]."

"It's a lot of fun now!"

Unexpectedly, the first wave of leader-level creatures appeared as a super disgusting leader-level creature like the Skeleton Archer King, and it was very unfavorable for defensive battles. This was something that Lin Han did not expect. The appearance of the Skeleton Archer King can be said to be a complete change. The battle pattern this time.

"Whoosh whoosh!"

Before the Skeleton Archer King approached, the Skeleton Heavy Crossbowman started a frantic attack. At the same time, the black streamer on the Tower of Wraith was overflowing. As the Skeleton Archer King stepped into the range, several streamers shot at the Skeleton Archer King at the same time. .

"Ding! Your primary death summoning mastery takes effect, and 10 units of rotten zombies appear on the battlefield!"

Death Summoning Mastery works again, but this time, instead of summoning a third-tier unit like Ghost, it is a second-tier and second-tier unit called Rotten Zombie. Unfortunately, the location is not very good this time, and Rotten Zombie appears directly in the middle of the battlefield, the Skeleton Archers fired a salvo, and then the Skeletons rushed over, knocking bang bang bang, and all the 10 units of rotten zombies fell directly, leaving Lin Han speechless for a while.

However, these guys are not useless. At least they delayed Lin Han for a few seconds. During this time, the Tower of Wraith and the Skeleton Heavy Crossbowmen began to shoot frantically, and the bones began to fall in pieces. And the life value of the Skeleton Archer King suddenly dropped by as much as 1,000.

"Bone and skeletons all attack!"

Looking at the melee, Lin Han frowned. Under his order, the black door slowly opened, and all the skeletons and skeletons rushed out, but they stopped 10 meters away from the city wall, no longer Take a step forward.

This is the best way. Right now, the high threat to the city wall is the Skeleton Archer, and there is also the Skeleton Archer King. Because the HP is as high as 8000, the Skeleton Archer King is not so easy to be killed, so Lin Han is not there either. This guy wasted too much firepower. He turned all his attention to

the skeleton and the skeleton archer. As long as these guys were eliminated, there would be no problem with the remaining skeleton archer.

"Piercing Shot!"

What made Lin Han more depressed was that when the bones and skeletons were just released, the Skeleton Archer King raised the longbow in his hand, and drew a super-long arrow from the quiver behind him and aimed at the city wall. The arrow flew out and slammed heavily on the city wall, and the skeletons of more than 10 units on the road were all smashed into pieces!

"Do you want to be so cruel!"

The corner of Lin Han's mouth twitched. A penetrating shot from the Skeleton Archer just now directly knocked 200 points off the city wall for a long time. This also means that the Skeleton Archer just hit the highest damage. The attack is a chaotic attack, which will cause full damage to any armored unit, even the city wall!

The most disgusting attack method is the penetrating shooting. Although it is a skill, it causes pure physical damage. The magic damage reduction possessed by the upgraded granite city wall cannot take effect. This guy is completely fighting against Lin Han. .

"Damn it! Hit me hard!"

Resisting the anger in his heart, Lin Han controlled the skeleton heavy crossbowmen to frantically attack the skeleton archers. Under such a crazy attack, the number of skeleton archers was rapidly decreasing. On the other hand, Lin Han sent out His bones and skeletons were also submerged by the Skeleton Shooter King and the tide of skeletons. The large group of skeletons had already advanced to the city wall, and they began to knock on the city wall. The durability of the city wall began to drop rapidly.

These small skeletons have appeared since the birth of the city. There are 5 small skeletons in the first-level towns. They are responsible for repairing buildings and maintaining city walls. Ordinary small skeletons only have 50 health points and 0 defense. They have no attack power. They are the only ones. What can be done is to keep repairing the building, each small skeleton can restore 10 points of durability to the city wall per second, but the durability of the city wall has not only not increased, but is still rapidly declining at a speed of more than 10 points per second.

Too many ants will kill the elephant. This sentence is really not an exaggeration. The bone attack can't cause much damage to the granite city wall. 1 point of mandatory damage is already the limit, but it can't hold up this amount! More than 200 units of skeletons kept knocking around the city wall, almost every 3 seconds, 200 points would drop for a long time, and the 5 small skeletons could not be repaired at all.

Fortunately for Lin Han, after paying all the bones and skeletons, all the Skeleton Archers were eliminated, and the Skeleton Archer King's HP dropped to 4,000 under the siege of the Towers of Wraiths.

"The Skeleton Heavy Crossbowman, turn the firepower and attack the Skeleton!"

Now that all the skeleton archers have been dealt with, Lin Han has the energy to deal with the skeletons that are already close to the city wall. With the ability to penetrate, the skeleton heavy crossbowmen can clear up very quickly, and a single salvo can be used to clear a skeleton. In a small area, with several consecutive salvos, the number of skeletons under the city wall decreased a lot, and the durability of the city wall began to slowly increase.

However, the durability of the city wall has increased, but the Tower of Wraiths has begun to decline rapidly. The Skeleton Archer has a certain intelligence, and it will attack the unit that does the most damage to him, so

after the Tower of Wraith attacks it, the Skeleton Archer Wang immediately transferred his firepower to the Tower of Wraiths.

Although the Tower of Wraiths is also a building, its defense is much worse than that of the city wall. Even if the Skeleton Archer King did not use penetrating shots, the Tower of Wraiths still started to burn.
