

HEROIC KING

Chapter 7: last stand

Hidden units, this is a special unit set in the Eternal Kingdom that will not appear in front of players in large numbers. Players want to obtain them in very few ways. They can only be obtained through quests or certain quest rewards, if you are lucky enough, it is also possible to obtain architectural drawings of hidden units during the battle, which is also a great source.

The attributes of these arms are much stronger than the normal arms, and they are very popular in the period of rapid development of players. A low-level hidden arms architectural blueprint can be sold for hundreds of thousands of gold coins, but the supply is still in short supply. It can be described as maddening.

Ghouls and Skeleton Spearmen are one of the hidden units. As a long-range attack unit, Skeleton Spearmen have far more attack power than Skeleton Heavy Crossbowmen, but these guys also have their weakness - range.

"Skull Spear Thrower: The cemetery clan's first-order level 4 hidden arms. The specially transformed skeleton spear thrower has strong long-range attack capabilities. The most important thing is that they will not be punished by the shooter unit. If you want to fight them, you will be hit like a storm. Damage: 4-8, Defense: 3, Health: 45, Movement Speed: 0.7 meters per second, Attack Speed 2.4 seconds once, Range: 25 meters, Ammo 5 Special abilities: 1. Strengthen the shooter unit [This unit is a special shooter unit, and will not be punished by half the melee attack of the shooter unit.] 2. Piercing Throwing [The Skeleton Spearman has a 20% chance to additionally attack when attacking. The enemy deals 20 damage and pines the enemy to the ground for 2 seconds.]."

"Ghoul: The cemetery clan's first-order 4th-level hidden unit. Evil spirits that steal carrion, when they gather together, are often the beginning of disaster. Damage: 5-7, Defense: 2, HP : 50, movement speed: 1.2 meters per second, attack speed: once every 1.8 seconds. Special ability: 1. Eat corpses [Ghouls can recover their own health by eating corpses, a corpse can make ghouls in Restores 5 HP per second for 30 seconds]."

Compared with the Skeleton Heavy Crossbowman, the Skeleton Spear Thrower has a slightly better range, but the damage, HP, and defense have increased. The most important thing is that this guy will not be punished by the shooter whose melee attack is halved. It's a very special kind of weapon. As for the piercing throw, it is also a very effective ability. Although it only has a 20% chance of triggering, once it succeeds, it is quite powerful to fix the enemy for 2 seconds.

The ghoul is not one or two points stronger than the skeleton. Although the defense itself is not very high, the health value is not bad. The most important thing is that this guy's movement speed and attack speed are extremely fast, and the attack is also very good. The stability is a very good unit for fighting.

If it is normal, to be honest, such a bunch of skeleton spear throwers are nothing. The problem is that the Skeleton King and Ghoul King who appeared this time have the ability of war halo! The war halo possessed by Skeleton King is a command halo, which increases the attack power of all surrounding units, while the war halo ability of the ghoul king is a frenzy halo, which increases the attack speed and movement speed of all units around the ghoul king.

"Skull King: Level 1 and 4 leader-level creatures, attack 60-100, defense: 6, health: 9000, magic power: 700, movement speed: 1.8 meters per second, attack speed: once every 2 seconds, special ability: 1. Resistance skeleton [After years of fighting, the bones of Skeleton King are extremely strong,

which can reduce the damage of Skeleton King by 15 points, and the minimum cannot be lower than 3 points.] 2. Command Halo LV3: [All units within 600 meters around the Skeleton King Attack increases by 30%.] 3. Shockwave LV1 [The Skeleton King uses his weapon to smash the ground heavily, creating a shockwave to attack all enemies within a 10-meter fan-shaped area in front, causing 100 damage to each unit, and generating additional damage when used on buildings. 100% damage. Mana consumption: 80 points.]."

"Ghoul King: First-order 4th-level leader-level creature, attack 80-95, defense: 5, health: 8000, magic power: 400, movement speed 2 meters per second, attack speed: once every 1.3 seconds, special ability: 1. Ghoul Frenzy [Increases the attack speed and movement speed of all ghouls around the Ghoul King by 15%, and the Ghoul King increases the movement speed and attack speed by 20%.] 2. Fanatical Halo LV2 [within a range of 600 meters around the Ghoul King The attack speed of all units is increased by 10%, and the movement speed is increased by 10%] 3. Corruption and Devour [The Ghoul King can devour three corpses at the same time, and within 3 minutes after swallowing the corpses, the Ghoul King can recover an additional 80 per second. Life points.]."

"Damn, it's really hard to fight this time!"

Seeing a large number of blood-red ghouls rushing towards the city wall like a tide, Lin Han no longer felt as relaxed as before. The ghoul's attack speed has reached 1.5 under the influence of the ghoul king's frenzy and the ghoul frenzy. At the level of once per second, although under the command halo, their attacks are still only 6-9, and they have not reached the effect of breaking the defense of the primary granite city wall, but they can't stand the attack speed of these guys. The previous ones were even more terrifying,

even if Lin Han controlled the troops to tilt all the firepower, the number of ghouls still did not decrease.

The skeleton spear throwers on the other side also reached the attack range. They did not attack the city wall, but transferred all their firepower to the tower of resentful spirits on the city wall. tower of spirit

"Shockwave!"

The incomparably huge Skeleton King waved the sword and shield in his hand, and slammed the ground suddenly. A khaki shock wave hit from a distance and slammed heavily on the city wall. Suddenly the entire city wall trembled, and the lasting moment of the city wall fell. At 140, Lin Han was in a cold sweat. If it wasn't for the fact that he upgraded the city wall to a granite city wall before, this wave of shock waves could knock down the 200-point persistence of the city wall. After several waves, the Skeleton King alone could demolish the city wall.

But looking at the speed at which Skeleton King's health dropped, Lin Han was instantly happy. Don't look at this guy's passive ability - the resistance bones are very strong. In fact, when fighting against those low-level troops in the early stage, this ability is simply pitiful. , Originally, the Skeleton Archer could only deal 1 point of mandatory damage to the Skeleton King each time, but after this skill took effect, each attack could deal 3 points of damage, which made Lin Han not sure what to do.

Less than a minute after the battle started, the first Tower of Wraiths burst into flames, and then turned into countless faint green rays of light and dissipated in the air. The destruction of the first Tower of Wraiths was like a chain reaction, and gradually At first, the two Wraith Towers were quickly destroyed, and the newly built Wraith Towers only persisted for a minute before turning into a dim light.

"boom!"

The sound of the shattering of bricks and stones came. Under the siege of a large number of ghouls, even the city walls could not bear it anymore, but as a price, all the ghouls outside the city were wiped out, and there were only a few skeleton spearmen left. Only dozens of units.

The problem is that the two biggest guys - the ghoul king and the skeleton king are both alive and kicking. There are still 6000 health points. This guy's corruption and swallowing ability is really disgusting. He recovers 80 health points per second. If you don't pay attention, it will directly fill you up. The reason why the city wall will collapse is also a big reason. Because this guy can't make a quick decision at all.

"Back off! Back to the necropolis!"

Gritting his teeth, Lin Han gave an order and said that without the protection of the city walls, it would be foolish for them to fight against the two boss-level creatures, but now they have nothing to do. It is well preserved. The Skeleton King and the Ghoul King have been continuously injured since they entered the town. If Lin Han can delay, there is a possibility of killing them.

The question is how long can he last? Looking at the only 23 units of skeleton heavy crossbowmen who had retreated to the grounds of the cemetery, Lin Han knew that the battle was coming to an end, and he had only so few troops left now. If all these troops were used up If it still doesn't work, his defense is really a failure this time.

It may be a lot of headaches for other races, but the cemetery family is different. The large cemetery among the cemetery family is one of the powerful defense weapons of the cemetery family. It is not only the core base of the cemetery family. It's an offensive and defensive weapon.

"Necropolis LV1, the core building of the cemetery family, the place where the heart of the town is placed, once the necropolis is destroyed, the player will be in a one-day exile period, and after one day, they will get a random necropolis and start to develop again, but will lose the absolute Most of the resources. Durability: 30003000, Armor: 20, Armor Type: Enhanced Armor, Damage: 80-150, Attack Speed: Once every 1.5 seconds, can attack up to 4 surrounding units at the same time."

If you want to say, this is the most powerful defensive weapon of the cemetery clan, and it is also the last line of defense of the cemetery clan. Once the cemetery is captured, the player will only be exiled and wait for the new town that will be rebuilt after a day.

"Whoosh whoosh!"

When two boss-level creatures entered the attack range of the necropolis, countless white souls floated on the cemetery. These souls screamed and rushed towards the Skeleton King and the Ghoul King. The two boss-level creatures trembled at the same time, and their health points It went down a little.

"Shockwave!"

The Skeleton King sent out a shock wave again, and the three Skeleton Heavy Crossbowmen along the way instantly became smashed, while the remaining Skeleton Heavy Crossbowmen scattered, locking the Skeleton King and starting his frantic attack. The Tower of Spirit began to continuously attack these two leader-level creatures. In the face of such a crazy attack, even if they were all Lord-level creatures, they would definitely not be able to withstand it, and their health began to decrease crazily, even if the ghoul king used it. Corruption and Devour also cannot stop the rapid decline in health.

"Ding! You killed the Skeleton King!" "Ding! You killed the Ghoul King!"

"You killed the Ghoul King and the Skeleton King, you successfully completed the defense mission, please wait a moment, the mission score is being estimated..."

"Damn, this is the way to return to the pre-liberation world after the First World War!"

Looking at the three skeleton heavy crossbowmen standing behind him, Lin Han really felt like he wanted to cry without tears.
