

HIGH-LEVEL MARTIAL ERA

Chapter 311: Chapter 229: A Brand New Future (Unity)_3

Yang Xian had something she didn't say.

This time, she wasn't the one originally supposed to deliver the treasure; Dantai Lie, the Demigod, had other arrangements... It was she who fought for the opportunity.

On the one hand, she wanted to deepen her relationship with Li Yuan.

On the other hand, it was also an excuse to see Fang Hai... In Blue Star's Third Level Martial Halls, there were over a hundred Hall Masters, and the number of Flying Heaven Warriors without the rank of Third Rank Hall Master was more than ten times that... There were many Flying Heaven Warriors.

Of course, even though their number might seem not small, scattered across the globe and various Star Realms, each Flying Heaven Warrior still held tremendous authority.

But!

There was only one Hall Master for Blue Star's main hall, and all Flying Heaven Warriors on Blue Star had to obey the commands of the Hall Master.

Therefore, the chance to show one's face in front of Fang Hai was very important.

"Alright, go ahead," Dean Hai said with a laugh, clearly understanding Yang Xian's thoughts.

...

After seeing off Yang Xian,

Li Yuan didn't hesitate and quickly returned to the underground Martial Arts Room, entering the resting area.

He logged into the virtual network, within Starfire Space.

"Master." the fairy-like girl said excitedly, "Master, there's a new agreement that has arrived. Once signed, you will be able to upgrade to Martial Hall L9 level."

"Hmm, bring me the agreement," Li Yuan said.

Whoosh~

The holographic projection condensed and appeared in front of Li Yuan, who immediately began to review it rapidly.

Most of the content was similar to previous agreements.

The most core parts were three!

The first, as an L9 member, the Martial Hall would grant an annual subsidy of 100 million Blue Star Coins.

The second, the right to access the 'Starfire Treasury' and the right to participate in the 'Starfire Blue Star Auction.'

The third, once summoned by the Martial Hall or Alliance, unconditional obedience to the orders is mandatory!

"Three clauses, two benefits, one obligation?" Li Yuan mused silently.

The greater the privilege one enjoys, the greater the responsibility one bears.

Flying Heaven Warriors were the backbone of human civilization, vital in the stationed forces in Second Level Star Realms and the battles waged in Third Level Star Realms... they were the absolute main forces.

The Seven Stars human civilization's ability to proliferate to this day, safely and continuously growing, aside from those at the very top, the Demigods... the vast number of Flying Heaven Warriors could not be underestimated.

After all, no matter how strong the Demigods were, they couldn't protect every entrance to the Star Realms, nor could they cover every corner of Blue Star.

Nor could they retrieve a large number of treasures from various Star Realms.

"An annual subsidy of 100 million Blue Star Coins isn't much," Li Yuan thought to himself.

It was very little for a Flying Heaven Warrior.

"The key is the second clause, the Starfire Treasury, the Starfire Blue Star Auction," Li Yuan said to himself.

Without much hesitation,

Li Yuan completed the electronic signing, and quickly, the Starfire Space he was in began to change.

The entire space became more luxurious, and many new features appeared, such as contacting the Hall Master, connecting with Flying Heaven Warriors globally, a brand-new database, Starfire Treasury, and so on.

With the upgraded privileges, there was an earth-shattering change.

"Xiao Yu, I want to view the Starfire Treasury," Li Yuan said directly.

"Yes, Master," Xiao Yu replied.

Hum~ The light converged, forming a large, flowing-light-emitting holographic screen, on which dense text descriptions and videos appeared,

As well as specific categories.

"So many treasures," Li Yuan gasped.

There were many categories, such as Origin Power Weapons, Star Techniques, Secret Manuals, spirit strengthening, body strengthening, Comprehension enhancement, recovery categories,...

Each major category was further divided into many subcategories.

For example, Star Techniques were divided into First Layer Star Technique, Second Layer Star Technique, Third Layer Star Technique... Ninefold Star Technique.

For example, Origin Power Weapons were divided into Fourth Rank, Third Rank Fine, Third Rank Medium, Third Rank Inferior, Second Rank Fine, and so on.

The divisions were very detailed.

"Indeed, it's the treasury that Senior Yang Xian mentioned," Li Yuan inwardly sighed, also feeling slightly shocked.

Li Yuan began to check each one.

Soon, Li Yuan found several treasures he wanted.

"Origin Purple Longevity Pill, Second Level, 50 billion Blue Star Coins, remaining purchasable 999 (contribution balance 100 billion)"

"Dragon Spirit Heart Fruit, Third Rank, 20 billion Blue Star Coins, remaining purchasable 2 (contribution balance 100 billion)"

"Soul-Nurturing Ancient Spirit Fruit, Third Rank, 30 billion Blue Star Coins, remaining purchasable 0 (contribution balance 100 billion)"

"Storage Treasure, Third Rank (3 cubic meters), 10 billion Blue Star Coins, limited to purchasing one piece (contribution balance 100 billion)"

"Storage Treasure, Third Rank (3 cubic meters), 300 billion Blue Star Coins, limited to purchasing one piece (contribution balance 100 billion)"

...

Li Yuan continued to check other treasures.

He gradually understood that the Starfire Treasury listed a large number of treasures, like Second Rank treasures, which were basically in unlimited supply.

Third Rank treasures? Most had very limited quantities, or were out of stock.

Following that,

Li Yuan once again opened the 'Star Techniques' category and discovered that learning those below Third Layer Star Technique was basically free... Starting from Fourth Layer Star Technique, there was a fee, and the prices were extremely high.

""Blood Shadow Incarnation", Fourth Layer Star Technique (up to Third Layer), learning requires 100 billion Blue Star Coins (no contribution required, note: please try the free introductory part first, if you cannot master the introduction, do not purchase the full content.)"

""True Solution of the Earth Star Vein", Unknown Star Technique (first two layers), learning requires 200 billion Blue Star Coins (no need...)"

""Myriad Gold Divine Body", Seventh Layer Star Technique, insufficient authority, please apply."

...

A vast array of Star Techniques.

Looking around, the holographic screen was densely packed with thousands of Star Techniques.

The majority were First to Third Layer Star Techniques, and those above Fourth Layer accounted for only one-tenth.

"With my authority, I can learn up to Sixth Layer Star Technique," Li Yuan thought, "Seventh Layer Star Technique? I must apply to higher levels to have a chance to learn it."

Chapter 312: Chapter 229: A Brand New Future (Unity)_4

As for the Eighth Layer Star Technique, Ninefold Star Technique?

According to Bai Shan Semi-Divine and Dean Hai, there are indeed a few incomplete ones within the Seven Stars human civilization.

But Li Yuan couldn't access them.

"It must be that my authority is insufficient; these high-level Star Techniques are all secret," Li Yuan pondered.

It made sense, after all.

Even if the Ninefold Star Technique couldn't be cultivated, even if it was incomplete, it was still a 'Supreme Star Technique', the foundation of a civilization... it couldn't be easily disseminated.

"The channel through which a Flying Heaven Warrior purchases treasures indeed far surpasses that of a Prime Warrior," Li Yuan sighed to himself.

Take Li Yang, for example, he was doing pretty well among the top-grade Origin Martial Artists, but purchasing a Third Rank treasure was not easy for him either... he had to rely on all kinds of connections.

But for Flying Heaven Warriors, as long as they wait in the Starfire Treasury, as soon as a treasure is available, they can immediately take it... it's much easier.

The difference in strength leads to a difference in status, and naturally a difference in perspective.

"To learn Star Techniques, Secret Manuals, and other non-physical items, one simply needs enough money to study them directly," Li Yuan muttered to himself, "But purchasing Heavenly Materials Treasures? That requires contribution balance."

What is contribution balance?

A Flying Heaven Level authority, in the Martial Hall's 'Starfire Treasury', can buy a large number of treasures, but obviously not in unlimited quantities.

There's a limit to everything.

Every person will receive '10 billion Blue Star Coin contribution balance' granted for free by the Martial Hall.

This represents the ability to purchase treasures worth a total of 10 billion; once the contribution balance is spent, then no matter how rich one is, they cannot buy anything.

Of course, there's another way — contribution!

For example, contributing a 10 billion worth of treasures to the Martial Hall, apart from receiving 9.5 billion Blue Star Coins, one would also receive a contribution quota of 9.5 billion.

"For a treasure worth 10 billion, the Martial Hall takes a cut of 500 million," Li Yuan thought to himself, "The Starfire Treasury is essentially a huge intermediary platform, where the Martial Hall's many Flying Heaven Warriors

traverse the Star Realm, sell their acquired treasures to the treasury, and then buy what they need from the treasury...

creating a positive cycle, allowing the treasury to keep operating in a cycle."

This requires tremendous control, as well as having all the Martial Artists believe in the system.

And the 5% taken is one of the sources of operational funds for the entire Martial Hall.

Such as the cultivation of talents, which requires a large amount of money.

Of course.

Even so, there are still many rare treasures that are in high demand but low supply, and there are many powerful individuals with plenty of money but no contribution balance.

Hence, there are auctions.

Every year.

The Starfire Martial Hall will hold an auction on Blue Star, auctioning a large number of rare treasures... those with Flying Heaven Level authority can participate.

"The next auction, in December every year?" Li Yuan muttered to himself, "Ten months from now?"

Li Yuan wasn't too concerned.

He was well aware that although he had obtained Flying Heaven Level authority and had more than eighty billion Blue Star Coins... which seemed like a lot, it was nothing compared to the Flying Heaven Warriors.

Moreover.

"I'm only at Level 19 right now, most treasures are not of much significance to me," Li Yuan shook his head to himself.

It's not that they are useless.

It's that the cost-effectiveness is too low.

"What's truly effective for me here are these Star Techniques," Li Yuan revealed a slight smile, "Second Layer Star Technique, Third Layer Star Technique, all free to learn?"

Of course, there's also a limit, up to 20 techniques.

After all, even among Flying Heaven Warriors, it's common to only cultivate two or three Star Techniques.

...

After perusing the Starfire Treasury and looking at the 'cultivation suggestions' sent by the Starfire Martial Hall,

and checking the large amount of new data in the database,

Li Yuan had a vague idea of his own cultivation path going forward.

At that time.

Dean Hai arrived.

"Dean," Li Yuan immediately invited the visitor into the living room, and they sat down.

Pouring tea for his guest.

"You should have looked through the Starfire Treasury and also seen the cultivation suggestion letter the Starfire Martial Hall sent you," Dean Hai said with a smile.

"I've seen both," Li Yuan nodded.

"There are six months until you go to Feixing," Dean Hai said with a smile, "You don't need to participate in the Blue Star combat competition in June anymore, so what are you thinking now?"

"First, become a Prime Warrior," Li Yuan said after a moment's thought, "Then go to the Second Level Star Realm to explore."

"It's just, I haven't decided exactly which Star Realm to go to yet."

Going to the Star Realm is a must.

Simply being short of reaching a 40% Spiritual Awakening Level is already a reason enough for Li Yuan to make the trip.

Chapter 313: Chapter 230 Concealed Cultivation! Three Star Meridians (Extra 27)

"After becoming a Prime Warrior, to venture into the Second Level Star Realm?" Dean Hai nodded slightly, "There is something I need to remind you of."

"Please speak, Dean," Li Yuan listened attentively.

"This time, to lure out the lurking alien Flying Heaven level, the principal and others have put you at the forefront of the storm," Dean Hai looked at Li Yuan, "Although in the end you killed the alien Flying Heaven level... you must understand, the alien forces watching you are not only from one faction."

"The strongest two alien forces that are enemies of our Blue Star are the Tianliang Civilization and the Cloud Beast Civilization."

"Like the black dragon I killed before, it actually belonged to the Cloud Beast Civilization," said Dean Hai.

"Oh?" Li Yuan was surprised; this was the first time he had heard this.

He knew quite a bit about the Tianliang Clan.

But the Cloud Beast Civilization? He had never come into contact with it before.

"When you cultivate within the school, with the Principal's deterrence and many Flying Heaven Warriors around, the probability of alien assassination attempts on you is very small, as everyone cherishes their lives," said Dean Hai, "But there will definitely be people always monitoring you."

"Always tracking your movements."

"Once you leave the school, various alien forces will certainly crazily track you," Dean Hai said, "In our civilization, there are many traitors and scoundrels who dare not attack you directly... but many would dare to leak your whereabouts."

Li Yuan felt a chill in his heart.

Indeed, if they were real aliens, under his Divine Palace's inquiry, they would mostly reveal themselves.

What he should be most vigilant about are the traitors.

Because you never know who the internal spy is, perhaps some inconspicuous First Rank Warriors or Prime Warriors.

Even some high-ranking Top Grade Origin Martial Artists, or Flying Heaven Warriors, may trade with aliens in secret for personal gain or for some treasures.

This is unavoidable.

"What do you mean, Dean?" asked Li Yuan.

"My personal suggestion is that from now until July, you engage in concealed cultivation within the school, then head directly to Feixing," Dean Hai looked at Li Yuan, "With your comprehension, your strength will also progress swiftly."

"With the rate of your progress, perhaps by July, your Spear Technique could even step into the Fifth Stage High Rank."

"After you receive the complete Martial God Inheritance, your strength will transform even further."

"The Martial God Inheritance is one of the greatest secrets of our civilization."

"You are still young; there's no need to hurry. Wait until you return from Feixing with the Martial God Inheritance, and your Physical Quality reaches High Rank Prime Warrior level... Then it will not be too late to go risk life and death in the Second Level Star Realm," said Dean Hai solemnly.

Li Yuan fell silent.

To cultivate step by step until he became a high-level Prime Warrior? How long would that take?

But Li Yuan could sense the change in Dean Hai's attitude.

Before, Dean Hai was very encouraging of him going to face life and death challenges, but now he was advising against it... which was enough to show the hidden risks.

"Dean, I will carefully consider it," Li Yuan said, "Even if I decide to venture out, it won't be until I've become a Prime Warrior, at least a good half-month later."

"Alright."

"I'm just giving you a suggestion; what you decide to do is still up to you," Dean Hai said, "If you really decide to venture into the Star Realm, remember

to contact me in advance after choosing a Star Realm, and I will help you analyze the pros and cons."

"At the same time, I will arrange to hide your tracks in advance."

"Understood," said Li Yuan, feeling Dean Hai's deep concern.

...

After seeing off Dean Hai.

Li Yuan returned to the underground Martial Arts Room and fell into deep thought.

"There's really no need for me to participate in the practical combat competition in June," Li Yuan thought to himself.

The purpose of the global martial arts competition held by the alliance's higher-ups.

Is to select the very top geniuses of each session.

Like in the Blue Star competition's virtual battle and practical combat, the top three directly get the Martial God Inheritance slots.

Therefore, as usual, those who break into the top three in the virtual battles typically won't participate in the practical combat afterward.

The same goes.

Once someone breaks into the top three in either the virtual battle or practical combat in one of the Blue Star competitions, they usually won't participate in the following session.

"Dean Hai's suggestion for me to keep cultivating in seclusion isn't wrong; in some sense, it is very correct," Li Yuan thought to himself, "Right now, indeed, there is no need for me to take great risks or venture out too recklessly."

Life-and-death adventuring is to temper oneself.

But there is a bottom line in this; venturing into the Star Realm is for tempering, not simply courting death.

If the risk of falling is too great, and the benefits not sufficient, then it is best to give up.

"But with a 40% Spiritual Awakening Level, should I wait until after returning from Feixing?" Li Yuan shook his head slightly.

That would be waiting too long.

Once the Spiritual Awakening Level reaches 40%, to carry out the fourth Origin Power infusion.

By Li Yuan's estimation, that would save him several months or even longer on his Origin Power cultivation time.

The cultivation of Physical Quality and Life Level for Prime Warriors takes much longer compared to First Rank Warriors.

"A significant increase in Physical Quality would further nurture the soul," Li Yuan thought to himself, "It would also make the vitality within my Life Star stronger... whether in cultivating Star Techniques or awakening more Star Meridians, it's very beneficial."

"With a strengthened foundation, it's an all-around improvement, so when I go to Feixing, my advantages will be even greater," Li Yuan also harbored ambitions within his heart.

One step ahead, all steps ahead.

Li Yuan had a simple thought; he had spoken to Star Lord Bai Shan and others before... after reaching Feixing, the Martial God Inheritance slots also varied in rank.

Upon arriving at Feixing, he would not only be facing the geniuses of Blue Star but also those from the other Six Great Planets.

Geniuses gather.

He must become stronger, to quickly strive for a First Rank Martial God Inheritance slot.

And perhaps even a Special Rank Martial God Inheritance slot.

"Secondly, once the Spiritual Awakening Level reaches the 40% limit, there may be a chance to push the limit to 50%," Li Yuan silently pondered.

Chapter 314 Chapter 230 Concealed Cultivation! Three Star Meridians (Additional Chapter 27)_2

If the level of Spiritual Awakening reaches 50%, it's not just about Origin Power entering the body, but also unlocking the second Spiritual Guidance.

This is crucial.

"Still, I must go,"

Li Yuan made a decision, "But there's no need to make a spectacle of it, nor is there a need to stay too long in the Star Realm."

...

Having made up his mind, Li Yuan didn't hesitate any further and restarted his cultivation for the day.

"For the next period of time."

"First, I'll focus on cultivating 'Observing the Great Sun Starry Sky Scripture' and 'All Heavens' Stars' to fully enhance my Physical Quality," Li Yuan thought to himself, "Next, is to continue honing my skills."

"Third, I must not slack off for a moment. As long as my spiritual power recovers and my body can bear it, I shall continue to strive for awakening the Life Star."

"Strive to awaken more Star Meridians as soon as possible."

The Star Meridians are critical, arguably the most important foundation on the path of Martial Arts Cultivation.

They are the key to how far one can go in the future.

"Once I become a Prime Warrior, I'll immediately apply for life and death challenges," Li Yuan planned his next steps, "I'll set off quietly, elevate my level of Spiritual Awakening to 40% by defeating enemies in the Star Realm to accomplish Origin Power entering my body, then return to school immediately."

By Li Yuan's estimate, this whole process might take just a few days to a fortnight.

If he concealed it well, perhaps even the Alien Race wouldn't know he had left Kunlun Martial University.

Planning is important.

Only by thinking through and following a plan can one move faster and more steadily.

"In fact, the most important treasure for me right now should be the Earth Origin Crystal,"

"If I can completely cultivate the first two stages of the 'True Solution of the Earth Star Vein', perhaps, my compatibility with the Earth Vein will reach an astonishing level," Li Yuan thought to himself.

"However, at the very least, after... becoming a Prime Warrior and spending three to five months, I can then report this matter back to the principal."

The secrets of the Mind Spirit Divine Palace must not be revealed.

...

Time flew by, and day by day, the storm of the virtual competition aftermath of the Blue Star competition completely dissipated.

With each round of promotions, Li Yuan's V-blog fans reached an astonishing eighty million. However... since Li Yuan never posted any updates,

coupled with the gradual dispersal of the various promotions by the Starfire Martial Hall, this number of fans has essentially reached its limit for the short term.

Nevertheless,

these disturbances didn't affect Li Yuan, as he was wholeheartedly immersed in his cultivation.

Every day, he began with Visualization Method and basic Origin Power Technique training from the early morning.

Every two or three days, he would attempt 'Law Creation' to try and awaken more Life Stars.

The rest of his nearly all time was spent on Spear Technique cultivation.

...

In a huge Martial Arts Room, over a hundred meters long and wide, a specially designed room by Kunlun Martial University.

Li Yuan, dressed in a specially made Origin Power Battle Suit and wielding a Long Spear.

Not far from him, was Li Yang holding a Combat Saber, looking at him with a chuckling smile.

"Teacher, let's start today's actual combat training," Li Yuan said seriously.

"Alright."

"Just like yesterday, I will suppress my strength and speed to Level 19. You try to feel the changes in my Sword Technique," Li Yang said.

Li Yuan nodded.

Stay updated via empire

Boom!

Li Yang moved in an instant; with one step forward, his aura became terrifyingly powerful, like a mountain barreling towards Li Yuan.

"Kill!"

Li Yuan's form moved, and like a stream of light or lightning, he charged towards Li Yang. His Long Spear, like a dragon, accompanied by a piercing whoosh, instantly unleashed a sky-covering barrage of Spear Light.

"Clang! Clang! Clang!"

Layers of dazzling saber brilliance bloomed, easily blocking the spear shadows thrown by Li Yuan. The weapons collided fiercely, and the terrifying impact made it impossible for Li Yuan to completely deflect it even when executing the True Intent Killing Move 'Star River Spiral'.

He had to keep retreating.

In contrast, Li Yang's Sword Technique, although each strike seemed not strong, was continuous and explosively powerful, relentlessly pressuring Li Yuan.

Every strike subtly channeled the power of heaven and earth, with incredible might!

Suddenly,

"Annihilation," Li Yang's Combat Saber suddenly changed its course, the blade's light striking atop the Spear Light, as if targeting the vital points of Li Yuan's spear technique, causing his Spear Momentum to falter in an instant.

Whoosh! Whoosh!

More blades of light cleaved down, making it impossible for Li Yuan to withstand the assault any longer. His Spear Momentum completely collapsed, and his body was hurled backward, retreating dozens of meters before stopping.

With the protection of the Origin Power Battle Suit, he wasn't injured.

Li Yang also came to a stop with the flow of his movements.

"Very good."

"Your progress is indeed fast. When the great competition ended, and during our first actual combat training, you could barely withstand more than ten strikes from me even with your True Intent Killing Move," Li Yang said with a smile, "But now you can withstand more than thirty strikes."

"That's because my physical quality has improved," Li Yuan shook his head, "And since you suppressed your strength and speed, if we had the same physical quality, I would only lose faster."

"Isn't that obvious? I am a Fifth Stage High Rank in skills, and how long have you just stepped into the Fifth Stage Intermediate Rank?" Li Yang said with a smile, "Improvement in skill is still improvement, no need to be modest."

Li Yuan couldn't help but smile.

Indeed,

it had been over ten days since the Blue Star competition ended, and his dedicated cultivation had indeed brought about rapid progress.

Li Yuan glanced at the Divine Palace panel.

[Life Level: 19.9 (First Rank)]

Fist Strength: 68,800 kilograms

Speed: 113.2 meters per second

Spiritual Power: Level 30.5

Willpower: Level 32

Spiritual Awakening Level: 37.9% (Current limit 40%)

Star Meridian: Level 11 (Cultivation efficiency 10+0.5)

Skill Realm: Spear Technique (Fifth Stage 41%), Movement Technique (Fifth Stage 41%)

Star Technique: Ninefold Star Technique 'True Solution of the Earth Star Vein' (First Stage Level 6:6)

...

Over these ten days,

Li Yuan's physical quality and skill level had improved greatly, especially since his skills had already crossed 5 stages at 40%.

At this rate of progress, in a few months, Li Yuan would be able to reach Fifth Stage 59%.

Chapter 315 Chapter 230 Concealed Cultivation! Three Star Meridians (Additional Chapter 27)_3

"Li Yuan, your physical quality should have reached 19.9," Li Yang asked, "You're getting closer and closer to becoming a Prime Warrior."

"It is indeed very close," Li Yuan nodded, "Now, even in a Unity of Heaven and Man state, I can faintly feel a trickle of Origin Power entering my body... My body is very active."

This was an explanation that Li Yuan had prepared earlier.

He needed to gradually reveal his talent in regards to Star Meridians.

"Oh? You can sense it now? Good! Good! Good!" Li Yang indeed showed happiness, "Then try sensing the 'Life Star space'; perhaps you can awaken your Life Star a bit earlier." Find your next adventure on empire

"Haha, being able to start autonomously absorbing traces of Origin Power at level 19.9, your Star Meridian talent must be very high," Li Yang said excitedly.

"Yes, I'll try as much as possible," Li Yuan said.

...

Back in his own villa.

"Although I've reached Life Level 19.9, my Fist Strength and speed still fall short of the true First Order Limit," Li Yuan thought to himself.

Having the Divine Palace panel allowed Li Yuan to be very clear about what stage he was at.

"Another week or so."

"Once my Fist Strength exceeds 70,000 kilograms, I will try to activate the Star Meridian and achieve the status of Prime Warrior in one go," Li Yuan pondered.

There were two paths to becoming a Prime Warrior.

One, if you have a High Rank Cultivation Method that fits you, then after meeting all the requirements, you could follow the guidance of the Cultivation Method... Try to operate the three sensed Star Meridians that fit, prompting the body to rapidly complete the Transformation and become a Prime Warrior.

The other path was for Martial Artists without a High Rank Cultivation Method.

In that case, as long as their physical quality reached 19.9, they could continue to improve their physique... until they fully activated Origin Power even if they initially failed to do so.

Typically, the minimum Fist Strength required for one's physique is 70,000 kilograms, and it could go up to about 80,000 kilograms. Even those Martial Artists without a Cultivation Method could sense the traces of wandering Origin Power in the world and begin to absorb it for themselves.

...

One day later, late at night, Li Yuan tried to awaken his Life Star as usual. Quite abruptly.

"Hum~" An invisible fluctuation swept by, followed by a faint tremble of Li Yuan's body, and then countless points of light converged into a thread-like stream that passed over Li Yuan's body, circulating all around him.

"Finally."

"Another Star Meridian has awakened," Li Yuan showed a hint of a smile.

At that moment, the three Star Meridians, reflecting each other, made Li Yuan's aura quite exceptional.

"First Layer Star Vein, the cultivation efficiency increase is indeed just 0.5," Li Yuan glanced at the Divine Palace panel and muttered to himself.

But his heart was filled with immense joy.

Awakening three Star Meridians, although two of them were still just First Layer Star Veins.

But an important barrier on the road to becoming a Flying Heaven Warrior had been unknowingly breached by Li Yuan.

...

In the distant Feixing.

Inside an enormously grand city that itself seemed like a piece of crimson flame.

Above the city, an immense flying craft hovered, marked with a striking 'flame' emblem.

If some of Feixing's powerhouses saw this emblem, they would recognize it at a glance—Blazing Flame Family.

This was a great family with an illustrious reputation within Feixing's upper echelons, and this city was almost their fiefdom.

In a twelve-story building, in the top-floor office.

"Many people died?"

"How is that possible! The sixteen people from the Blazing Flame Family are among the best in the First Rank," the young man in a blue Martial Path outfit said in shock, immediately becoming anxious, "How is my little sister?"

"Second brother, stay calm."

"According to the messages sent back, a large Origin Crystal vein was born in the World within Worlds, the source of a major battle," the man in the black robe spoke somberly, "At the core of the vein, there is likely to contain 'Earth Origin Crystal' and 'Fire Divine Crystal'."

"Based on the token's sensing, little sister is still alive, but we've temporarily lost contact with her," he continued.

Chapter 316 Chapter 231 The Secret of World within Worlds! Invitation (Request for Monthly Ticket)

"Lost contact?"

The young man in the blue Martial Path uniform's face changed, "Little sister is the most important of their group, definitely equipped with the best communication device, how could she lose contact?"

"No, this won't do."

"I must find mother," the young man in the blue Martial Path uniform turned and was about to leave.

"Second brother, calm down," the young man in the black robe shouted angrily, "The affairs of World within Worlds contain the Blazing Flame Family's biggest secrets, can they be inquired by you and me? Even Dad shouldn't interfere, don't forget, our surname is Lin, not Flame."

"By all rights, we should know nothing about World within Worlds."

The young man in the blue Martial Path uniform fell silent.

That's right!

Although the blood of the Blazing Flame Family flowed in their veins, they were only peripheral members; they didn't even qualify to enter World within Worlds... Only their sister, who could cultivate the "Nirvana Divine Scripture," could become the core member of the Blazing Flame Family despite her foreign surname.

Lin Lanyue's journey to World within Worlds was a secret and not disclosed to them.

They had learned of it through their own secret channels... The inheritance of the Blazing Flame Family had been decaying for over a hundred years, and with generations attempting to break through to World within Worlds, that naturally led to many leaks.

"Big brother, what should we do?" the young man in the blue Martial Path uniform clenched his teeth, "Just wait around?"

"Inform Dad of the details. He is a Flying Heaven Warrior and also a Six-Star Councilor of the alliance; naturally, he will figure out a way," murmured the young man in the black robe.

"Alright, I'll send the message right away."

...

As Lin Lanyue's two older brothers were discussing, in that super-large aircraft hovering above the city,

In one of its meeting rooms, a group of powerful beings was arguing non-stop.

"World within Worlds has always been located in the Fierce Feather Star Realm, extremely hidden, with only one entrance and exit controlled by us."

"How could the Immortal Ruins Civilization's 'Gu Yue Divine Kingdom' have discovered it? And how did they open an entrance and exit that we were unaware of, without us noticing?"

"Too strange!"

"I suspect someone has leaked the true secret of World within Worlds; we must investigate, thoroughly," one existence after another spoke up.

As one of the strongest 'high-order Spiritual Nature families' within the Seven Stars human civilization, they were the highest echelon of the Blazing Flame Family.

Everyone participating in this meeting was at the Flying Heaven Level.

"Silence."

A cold voice rang out, "We naturally need to investigate the leak, but right now, the most urgent matter is rescue."

The speaker was a middle-aged man in a black robe adorned with a pattern of a flame divine bird.

"Right now, sixteen young ones have entered World within Worlds, fourteen of them are already dead, with only two still alive, but they too have lost contact," said the middle-aged man in the black robe, "Among them, Lanyue had already lost contact before the Gu Yue Divine Kingdom's attack."

"What? Lost contact before the attack?"

"Could it be?"

"Really?"

"How were we not aware?" The Flying Heaven Warriors present were shocked, setting aside their dispute.

Most of them had entered World within Worlds before and naturally understood what this implied.

"Must be rescued."

"We must rescue Lin Lanyue."

"To rescue someone, we must delve deep into World within Worlds," another old man in casual clothing spoke up gravely, "but the Fierce Feather Star Realm is a Second Level Star Realm... World within Worlds has even sturdier

barriers... Leaving is no concern, but entry requires one to be a First Rank lifeform."

"And preferably, the top-tier ones who can almost reach Second Rank."

"After all, according to the messages those young ones sent before their deaths, they encountered Prime Warriors of the Gu Yue Divine Kingdom who seemed to have broken through immediately after sneaking into World within Worlds," said the old man in casual clothing.

All the Flying Heaven Warriors listened intently, their expressions changing.

Prime Warriors?

The meeting was called abruptly; most of them were still not fully briefed on the details.

"The situation is dangerous," the middle-aged man in the black robe said slowly, "Reliant on just our family, we simply cannot dispatch so many First Rank Martial Artists on the verge of breaking through... let alone truly formidable geniuses."

"I propose we report the matter to the alliance and request their assistance," the middle-aged man in the black robe offered his opinion.

"No way."

"Patriarch, absolutely not, wouldn't this publicize the secrets of World within Worlds?"

"Not acceptable." Immediately, several Flying Heaven Warriors voiced their objections, but many more remained silent, contemplating the Patriarch's suggestion.

"You several, shut up," the old man in casual clothing frowned, "If this was the past and something major happened inside World within Worlds, we would rather lose a bunch of lives than reveal the secret."

"But what about now?"

"People from the Gu Yue Divine Kingdom have already infiltrated."

"The Immortal Ruins Civilization is the most terrifying civilization we know of... The overall strengths displayed by the Gu Yue Divine Kingdom are at least on par with our entire Seven Stars human civilization, if not stronger... How can we resist with just our family?" the old man in casual clothing said coldly.

"Time is not on our side."

"Even if we reveal the secrets of World within Worlds to the alliance, as long as we can retake World within Worlds, at most other geniuses will be arranged by the alliance to enter, but we will still hold the majority," he continued.

"However, if we give the Gu Yue Divine Kingdom some time, once they ascertain the true secret of World within Worlds, they will definitely invest massive resources and fortify it beyond penetration. By then, even if the alliance contributes resources, both manpower and materials, it will be difficult to retake it, and we will get nothing.

Our family will also fall into complete decline," the old man in casual clothing shouted angrily.

The meeting room fell silent.

"Alright, let's vote," the young man in the black robe said slowly, "Whether to agree with the Great Elder's proposal."

"Agree!"

"Abstain."

"Abstain."

"Agree."

"Agree"

...

"Nineteen votes agree, six abstain, with nine elders not attending the meeting; the total number of agree votes is more than half, and the number opposing is less than one-third," the middle-aged man in the black robe declared, "The resolution passes."

Chapter 317 Chapter 231 The Secret of World within Worlds! Invitation (Request for Monthly Ticket)_2

...

"I'll be responsible for contacting Starfire Martial Hall."

"Elder Yan Chan, your husband 'Lin Yue' is a Six-Star Councilor and a part of the higher echelons of the Starry Sky Martial Hall. Since Lin Lanyue is your daughter... it falls to you to make contact with the Starry Sky side," said the man in the black robe.

"Alright." In a corner of the meeting room, a woman in purple who had been silent gave a light nod.

"Great Elder, you'll be responsible for making contact with the Black Stone Martial Hall."

"Hmm." The elder in casual wear nodded.

"The rest of the elders, please also immediately use your networks at full capacity and see if you can gather a group of First Order Limit Martial Artists who are close to a breakthrough."

"Whether the century-old foundation of my Blazing Flame Clan can be preserved all depends on this move."

"Yes," more than twenty Flying Heaven Warriors said in unison, knowing the importance of the matter at hand.

Perhaps some elders had different opinions or thoughts.

But once the family meeting made a decision, they would naturally work together wholeheartedly.

...

March 2nd.

At Blue Star's Kunlun Martial University, a little after one in the afternoon.

On the grass outside Li Yuan's villa, the essence of spring was vibrant and beautiful, and the sun in the sky didn't feel too scorching.

"Teacher, take a look," Li Yuan said as he held the Black Chen Spear, "The 'Galaxy Spiral' True Intent Ultimate Move I previously created actually wasn't deliberately pursuing the power to stir the heavens and earth."

Whoosh!

With a thrust of Li Yuan's long spear, the tip sliced through the vast sky, causing the surrounding air to tremble and even faint glimmers of starlight to burst forth, spectacularly radiant.

He was drawing upon the power of the heavens and the earth!

"Following the heart's intent, following the sensation, rather than pursuing deliberately," Li Yuan laughed, "Unknowingly, I broke through."

"Follow the sensation?" Li Yang stood to the side, deep in thought.

In recent days,

Li Yang had been accompanying Li Yuan in combat training. Naturally, in terms of skill level, Li Yang was higher... but as Li Yuan made swift progress, his skillset was quickly catching up to Li Yang's.

Intermediate Fifth Stage skills, High Rank Fifth Stage skills... the fundamental difference wasn't that big.

Especially in terms of creating 'True Intent Ultimate Moves,' Li Yuan definitely had the final say.

So, it was less about Li Yang teaching Li Yuan and more about mutual exchange and learning from each other.

Some of Li Yuan's words had given Li Yang much inspiration.

"I've been somewhat anxious," Li Yang laughed, "I've practiced more Third Rank Secret Manuals than you, my skill level is higher than yours, and I also have a Flying Heaven Level soul... Yet, I'm somewhat impatient, all the while thinking about creating a True Intent Killing Move."

With Li Yang's level of skill,

once he created one or two True Intent Killing Moves, he could step into Fifth Stage Perfection and hope to become a Flying Heaven Warrior.

"Haha, with such profound skills, Teacher, you're sure to achieve the Flying Heaven status," Li Yuan said with a laugh.

In these recent days talking with Li Yang, Li Yuan learned that the 'Galaxy Spiral' he had created was a True Intent Ultimate Move, touching upon the threshold of breaking into Fifth Stage Perfection.

Of course,

Li Yuan was aware that there were differences between True Intent Ultimate Moves... like the one he had created, the power invoked from the heavens

and earth couldn't compare to those of the Ultimate Moves of the Flying Heaven Warriors.

After all, the insights and accumulations of the Flying Heaven Warriors far surpassed his own.

But at least, among the Intermediate Fifth Stage Martial Artists, when it came to skill alone, he had already found few rivals, and with his skill improvement and enhanced insights, the power of his True Intent Ultimate Move would naturally grow stronger and stronger.

Suddenly,

"Hm?" Li Yuan sensed something.

"Dean Hai?" Li Yang also perceived it, both of them aware that a Flying Heaven Level presence was approaching.

...

Huh!

Several hundred meters in the high sky, a genially attractive young man in blue clothes had suddenly appeared and was descending rapidly—it was none other than Dean Hai.

"Li Yang, Li Yuan, you two seem quite leisurely, discussing skills with each other," Dean Hai nodded slightly.

"It's more like Li Yuan enlightening me," Li Yang said with a smile.

"Dean Hai, is there something you need?" Li Yuan realized that the other party must have something to discuss, otherwise, he wouldn't have come to find him unexpectedly.

After all, it was only the day before yesterday that he had sought Li Yuan out—it would be unlikely for him to come again so soon without good reason.

Moreover, if it was not a significant matter, a simple message would have sufficed.

"Li Yang, I have something to discuss with Li Yuan; you may return first," Dean Hai instructed.

"Yes," Li Yang nodded his head, acknowledging.

He had a clear understanding of his own position; since the Blue Star competition ended, he had quickly realized... his student, Li Yuan, had completely exceeded his expectations.

In some sense, within Xia Country and the Seven Star Alliance, Li Yuan's status had already surpassed that of his own teacher.

Li Yang promptly left.

On the grass.

Only Li Yuan and Dean Hai remained.

"Dean, why don't we go inside the villa and sit down for a cup of tea?" Li Yuan suggested.

"No need," Dean Hai shook his head and said, "After notifying you, I still have to inform several other students... This matter comes from the higher-ups in the Alliance."

"Oh?" Li Yuan voiced his puzzlement.

A First Rank Martial Artist like himself, what could be so important that the upper echelons of the Alliance had to send down a message?

Furthermore, based on what Dean Hai implied, it seemed as though the matter involved more people than just him.

"It's about a hidden treasure within the civilization," Dean Hai waved his hand.

Weng~

An invisible force enveloped the two of them, like an invisible barrier separating the inside from the outside, preventing eavesdropping from the outside world.

"Using the power of heaven and earth?" Li Yuan perceived the action and was secretly stunned.

At present, he himself could also use a small amount of the power of heaven and earth, but his control was far inferior to Dean Hai's... This was a true master of the True Intent of heaven and earth.

"This treasure is located within a Second Rank Star Realm and had always been controlled by a high Spiritual Nature family within the Alliance, the 'Flame Clan'," Dean Hai said, "I believe I have mentioned this family to you before."

"Yes," Li Yuan nodded.

The first time he met Dean Hai, the latter had mentioned the 'Flame Clan', a family of formidable reputation. Due to their special bloodline, they also possessed a very special Cultivation Technique, the 'Nirvana Divine Scripture', which had given rise to dozens of Flying Heaven Martial Artists within their family.

"This family's treasure is of great importance," said Dean Hai, "but they have now come into conflict with the 'Gu Yue Divine Kingdom' from the Immortal Ruins Civilization... and the Alliance has decided to organize a rescue."

Immortal Ruins Civilization? Li Yuan's pupils constricted slightly.

Since gaining access to the Flying Heaven Level, Li Yuan had been perusing a substantial amount of confidential information in his spare time from cultivating... and there was significant emphasis on the Immortal Ruins Civilization.

Other foreign domains such as the Tianliang Civilization and Cloud Beast Civilization, when compared to the Seven Stars human civilization, are strong and weak in different aspects, but generally, they all are on the same level.

But the Immortal Ruins Civilization alone, even just the tip of the iceberg they reveal, far exceeds the Seven Stars human civilization.

It is the most terrifying civilization known to the Seven Star Alliance, without equal.

This time, the Seven Star Alliance was actually in conflict with the Immortal Ruins Civilization?

"This treasure land is a World within Worlds in the Second Level Star Realm, accessible only to First Order life forms," Dean Hai explained, "The matter is of great importance, and the Alliance has already mobilized a large number of Martial Artists close to the First Order Limit to enter."

"Looking at our entire civilization, in terms of strength, you should be among the very top of First Order life forms, and you might even be the strongest."

"Therefore, the higher-ups specifically asked me to come and inquire whether you would be willing to go?"

Chapter 318 - 232: Relic of the Gods (Request for Monthly Votes)

Chapter 318 - 232: Relic of the Gods (Request for Monthly Votes)

Swiftly, Dean Hai revealed more intelligence about the World within Worlds to Li Yuan.

"World within Worlds? Only First Rank lives can enter?" Li Yuan listened to the shocking news.

It sounded as though it involved the civilization struggle between the Seven Stars human civilization and the Immortal Ruins Civilization.

"Is the World within Worlds part of the First Level Star Realm? How big is it?" Li Yuan asked the key question.

In the First Level Star Realm, only First Order life is allowed in and out.

In the Second Level Star Realm, only Second Rank life is allowed in and out.

In the Third Level Star Realm, only Third Rank life is allowed in and out.

Normally, the higher the level of the Star Realm, the more dangerous and vast it is compared to the lower levels... but there are always exceptions, such as the Mingxu Star Realm, which is merely a First Level Star Realm yet wider and more dangerous than most Second Level Star Realms, and it harbors a large number of native Sky-Flying Level Life.

"No, the World within Worlds is different from the First Level Star Realm."

"I understand your concerns," Dean Hai said earnestly, "Only First Order life can enter the World within Worlds, but that gateway allows Second Rank life to come out."

"That's not right," Li Yuan shook his head, "According to what you said earlier, this Star Realm has always been under the control of the Blazing Flame Clan..."

"With their family's strength, they could easily station Prime Warriors there long-term, similar to a forward base like the one in the Mingxu Star Realm."

"The seniors at the forward base in Mingxu Star Realm, they can't come out."

"But the Prime Warriors stationed in the World within Worlds can still come out," Li Yuan analyzed, "There must be those willing, and it's entirely feasible to rotate them."

"No matter how powerful the Immortal Ruins Civilization's Gu Yue Divine Kingdom is, they are only First Order life when they first break through... Even if they are geniuses with Fifth Stage Skills, once they enter and immediately break through, if they face High Rank Origin Martial Artists or Top Grade Origin Martial Artists directly, they will still die," Li Yuan said gravely.

Having seen Principal Fang Hai, Li Yuan understood that if one's skills were profound enough, one could indeed fight beyond one's rank.

For instance, if a First Order life stepped into the threshold of the Law, it could probably directly invoke the power of the Law and wipe out a Top Grade Origin Martial Artist.

But that was just hypothetical.

First Order, Seventh Stage Skills, is that possible? Unrealistic!

"You are indeed smart to think of the crucial point," Dean Hai said, "That's right! Normally, the Blazing Flame Clan would have easily seized the initiative and occupied this World within Worlds... effortlessly."

"But the key point is, Second Rank life can't stay long in the World within Worlds," Dean Hai said.

Li Yuan was stunned.

Was it really that special?

"The specifics have not been fully clarified by the alliance's upper echelon, but if you agree to go, with your capabilities, you should be able to obtain all the information provided by the Blazing Flame Clan."

"After all, the Blazing Flame Clan certainly does not want the matter to be public knowledge," said Dean Hai, "They only mentioned one thing... this World within Worlds, the largest diameter exceeds 500 kilometers, it's an artificial relic, or rather an artificial world."

"An artificial world?" Li Yuan was so astonished he almost jumped up.

An artificial world, simply understood as human-made space... it's known that Star Realms are born from collisions of different civilizations in space-time, something beyond the control of the Seven Star Alliance.

Even the stabilization of the entrances and exits of the Star Realm is beyond the control of the Seven Star Alliance.

And considering that a few cubic meters of Storage Magical Treasure can be worth hundreds of billions of Blue Star Coins... even with limited vision, Li Yuan could deduce a point—the Seven Star Alliance's use of space is quite crude.

The Mysteries of Space have far transcended the current human understanding of technology.

So then.

To open, or rather to create a world with a diameter over 500 kilometers? What kind of ability is that? Simply unimaginable.

"You should realize the special nature of this World within Worlds."

Dean Hai said, "This vast universe is actually filled with many unknowns. For instance, our civilization's Seven Great Planets, why did the Seven Star Bridges appear, and why did they later evolve into the initial Star Realm... Even within our Seven Star human civilization, there are numerous unsolved mysteries."

"Not to mention us."

"Even those demigods standing at the pinnacle are still filled with confusion and hold a reverence for the universe," Dean Hai said.

Li Yuan was listening.

He had already discovered many unsolved mysteries while searching through the archives.

Human cognition is like a circle, with the unknown lying beyond its edge... the more powerful one becomes, the larger the circle grows, and the greater the unknowns one encounters.

"Relics of Worlds within Worlds like this one have been discovered by our human civilization quite a number of times," Dean Hai looked at Li Yuan.

"If it's a world naturally born, all its internal laws would be traceable," said Dean Hai. "But for such Worlds within Worlds, most internal rules are set by their creators... anything could happen."

Li Yuan nodded slightly.

Like a chicken in a poultry farm, in its understanding, perhaps when the feeder throws in the feed every day... is some kind of natural law of the universe.

"To open up such an artificial world, demigods are incapable of doing so, they can't even create a stable small space," said Dean Hai softly. "Either, it is some extremely powerful foreign civilization that has utilized a very special method."

"Or it is... a god!" Dean Hai said slowly.

Li Yuan was shocked in his heart.

Gods?

In fact, since becoming aware of beings surpassing the Sky-Flying level and even demigods, Li Yuan had subconsciously pondered this question—if there are demigods... then are there gods?

But today was the first time he heard confirmation from Dean Hai.

"Are there really gods?" Li Yuan could not help but ask.

"Yes," Dean Hai nodded firmly, his eyes twinkling with light as if recalling something. "We clearly know that within the Immortal Ruins Civilization... there exist gods."

"A god, by nature, is just a powerful lifeform, but their essence of life has truly transcended our understanding and imagination... A single god could effortlessly destroy our entire civilization," Dean Hai said solemnly.

There are gods in the Immortal Ruins Civilization?

Li Yuan was startled.

"Should we still contend with the Immortal Ruins Civilization?" Li Yuan asked.

"Of course, we must contend," Dean Hai said slowly. "Precisely because we know how vast the universe is, and how cruel the struggles between countless civilizations can be... our entire civilization continuously strives to expand, to wage wars in various star realms, and does everything possible to strengthen itself."

"If we are not strong enough, our entire civilization will eventually face extinction... In the information we have, there are not a few foreign civilizations that have been annihilated."

"Not to mention the distant ones, Feixing has almost been wiped out."

"All the efforts of the Seven Star Alliance are to prevent the calamity of civilization extinction," Dean Hai stated gravely.

Li Yuan fell silent.

He thought of the Fish Spirit Tide he had once experienced.

"The Immortal Ruins Civilization is indeed powerful, but this time the contention is only within one of its internal realms... Our Seven Star Alliance naturally dares to go for the challenge," Dean Hai said. "After all, this is most likely a relic of a god, and in my estimation, the reason the Blazing Flame Family has become so powerful, giving birth to many Sky-Flying beings, is definitely related to this relic world."

Li Yuan nodded slightly, like a Flying Heaven Warrior who casually takes out a treasure that could transform an ordinary martial artist.

Gods!

Capable of effortlessly destroying civilizations, the relics of a world they left behind, perhaps a mere trickle from between their fingertips... would be enough to drive demigods crazy.

Of course, it's also possible that this relic world isn't as precious as the Seven Star Alliance imagines.

Everything was hard to predict.

"Many ordinary martial artists may be directly conscripted," Dean Hai said, looking at Li Yuan, "but for a peerless genius like you, things are naturally different."

"The Alliance has its commitments."

"First, any treasure you find in the ruins is yours to keep. If the Alliance finds something useful, we are willing to make an equivalent exchange," Dean Hai explained. "Second, if you ultimately drive away the Immortal Ruins Civilization... we will reward you according to your contribution."

Li Yuan nodded slightly. The Alliance's promises were still credible.

"In fact."

"In my eyes, your safety is naturally more important. After all, whether you succeed or fail does not have much to do with me," Dean Hai said. "I'm telling you all this in detail simply because I believe you could make a significant discovery."

Li Yuan couldn't help but laugh; Dean Hai was quite confident in him.

"Don't find it strange."

"The Blazing Flame Family might sound powerful, but most of their Sky-Flying Level warriors rely on their bloodline," Dean Hai said with a trace of disdain.

"They've been exploring for over a hundred years, which might sound like a long time, but what kind of geniuses can they really dispatch? Their entire clan is only ten thousand strong."

"But what about you?"

"You're a once-in-decades peerless genius from Blue Star," Dean Hai said, looking at Li Yuan. "You're the peerless genius chosen from hundreds of billions."

"Your venture might yield unexpected gains," Dean Hai added.

Li Yuan nodded again. It seemed that many people had tried their luck in this world of ruins before.

Whether one could make a significant discovery also depended on the individual.

"There are benefits, but there are also risks," Dean Hai said solemnly. "The first is the danger of the ruins world itself; according to the Blazing Flame Family... a Second Rank Life staying there long-term is surely doomed. One cannot exceed a year."

"One year?" Li Yuan murmured internally.

With that timeframe.

Even with a plethora of treasures, it seemed at most, there could be Prime Warriors of the 23rd or 24th Stage.

"Second, there's the Immortal Ruins Civilization," Dean Hai said. "This civilization is indeed formidable. In our Seven Star Alliance, you are a top existence among First Rank Lives... but in the Immortal Ruins Civilization, there might be First Rank Lives stronger than you."

Li Yuan listened but wasn't surprised.

With different environments come different sorts of geniuses. Two people of the same caliber – one raised in the countryside and the other in the city – can end up worlds apart... As a terrifying civilization with gods, it's normal for them to cultivate any kind of genius.

"I've told you both the benefits and risks. Whether you go or not is for you to decide," Dean Hai said. "Don't rush to give me an answer. Just let me know your decision before six o'clock this afternoon."

"If you have any questions, you can also ask the president directly," Dean Hai said.

Dean Hai turned to leave.

"Dean."

Li Yuan suddenly thought of something, "May I ask, in which Second Level Star Realm is this world of ruins located?"

"Feixing, Fierce Feather Star Realm."

...

As he watched Dean Hai walk away.

Li Yuan's thoughts were still unsettled, echoing with the last words left by Dean Hai.

The Fierce Feather Star Realm!

Wasn't it the very star realm Lin Lanyue had ventured to? Was it a coincidence? He then suddenly recalled the High Rank Cultivation Methods Lanyue had been practicing... It also seemed to fall under the category of Fire. After pondering for a while.

Whoosh!

He had just been napping, dreaming about a climax when Li Yuan had grabbed him out of bed.

Li Yuan's figure moved, and in an instant, he had flown dozens of meters to the villa next to his own.

...

"Brother Yuan," Gu Qianghan said, looking bewildered at Li Yuan.

He had just been napping, dreaming about a climax when Li Yuan had grabbed him out of bed.

What had happened?

Could it not have waited just one more minute?

"Gu Qiang, I want to ask you a question. Answer me honestly," Li Yuan's expression was solemn. "Is your sister from the Blazing Flame Family above Feixing?"

"Brother Yuan, why are you asking this? Are you checking my sister's household registration?" Gu Qianghan was even more confused.

Smack—a slap on Gu Qianghan's head made him much more alert.

"It's important, just tell me," Li Yuan said with a low voice. "There's trouble with the Blazing Flame Family. Your sister told me she went to a star realm for an adventure, and I must clear this up."

"Trouble with the Yan Family?" Gu Qianghan's face showed a trace of shock. "How is that possible?"

"Yan Family?" Li Yuan frowned.

Wasn't it the Lin Family? After all, both of Lin Lanyue's brothers and her father were surnamed Lin.

"Brother Yuan, my sister is not from the Blazing Flame Family," Gu Qianghan realized something significant must have happened. "But her mother is; her mother is a Sky-Flying Level Martial Artist from the Yan Family."

"A Sky-Flying Level Martial Artist from the Yan Family?" Li Yuan finally understood Lin Lanyue's background.

Both her parents were Sky-Flying Level Martial Artists.

"Give me your brothers' communication numbers."

...

Before long, Li Yuan was back in the underground martial arts room, attempting to call the two V-chat numbers.

All attempts failed.

"The system indicates that the target is not on Blue Star," the assistance AI reminded.

Without hesitation, Li Yuan logged onto the virtual network.

He arrived at Starfire Space.

"Xiao Yu, activate 'Sky-Flying Level Access' and open Alliance communications," Li Yuan said, very composed. "I need to contact 'Lin Quan' from Starry Sky Martial Hall. His V-chat number is..."

Between the Seven Great Planets, direct communication was actually possible, but ordinary people did not have the privilege.

But Li Yuan did.

Time ticked away, and Li Yuan waited patiently. After a full six minutes.

Connection made!

"Senior, good day. I'm Lin Quan," a voice that was both strange yet familiar and deep sounded. The system only indicated that the caller had 'Starfire Martial Hall Sky-Flying Level Access' and did not reveal who it was, so he naturally assumed the other party was a Sky-Flying Level Martial Artist.

"Lin Big Brother," Li Yuan spoke right away. "It's Li Yuan."

Chapter 319 - 233 Gathering! The Sole Exotic Treasure (Added 28, 29)

"Li Yuan?" Lin Quan was stunned for a second.

Immediately after, he figured out who it was from the way the other party addressed him.

Although he had been far away in Feixing and hadn't followed the global college Martial Path competition's virtual battles,

Li Yuan had become extremely popular in the past month, even on the virtual networks of Feixing, gaining a certain fame.

Naturally, Lin Quan was also aware of this.

"Hello, Li Yuan," Lin Quan immediately changed the way he addressed him, remaining extremely polite.

As a 29th level Prime Warrior, and with both parents being Flying Heaven Warriors, his perspective was not like that of an ordinary Prime Warrior.

Just from Li Yuan's performance in the virtual battles and the 'Flying Heaven Warrior privileges' displayed on the phone, he had already deduced... Li Yuan, his younger sister's high school classmate, had suddenly obtained an astonishing influence.

At least, his status in the Starfire Martial Hall was now extremely high.

"Big brother Lin," Li Yuan got straight to the point, "My mentor just spoke to me about the 'Blazing Flame Family' matter, inviting me to join the battle in the World within Worlds. Are you aware of the outbreak in the World within Worlds?"

Li Yuan was extremely grateful in his heart towards Lin Quan.

At that time, had it not been for him daring to bring Heavenly Materials Treasures just in time, his uncle would have certainly died.

"The Blazing Flame Family?"

Lin Quan hesitated, then said, "I'm not a member of the Blazing Flame Family, but I do know about this matter. Li Yuan, what is it that you want to know?"

"About Lanyue," Li Yuan said directly, "After being eliminated from the Blue Star competition, she told me she was going to Feixing's Fierce Feather Star Realm to seek her fortune. But I've just learned that your mother is a Flying Heaven Warrior from the Blazing Flame Family... I want to confirm if Lanyue has gone to the World within Worlds."

Lin Quan was shocked inside.

Firstly, from Li Yuan's way of referring to Lin Lanyue, he could tell that their relationship was at least that of very close friends.

Secondly, how had Li Yuan come to know so much information in such a short time?

Li Yuan waited quietly for the other party's response.

After a silence of three seconds, Lin Quan stated in a low voice, "Yes, my little sister is trapped in the World within Worlds, and we've lost contact with her. But according to my parents... she is, with a high probability, still alive."

"One of the demands the Blazing Flame Family has made in revealing the World within Worlds to the alliance is that they must rescue my sister... She is extremely important to the entire Blazing Flame Family," Lin Quan explained in detail.

Logically, there were some things he shouldn't say.

But after a moment of reflection in his mind, he chose to reveal them to Li Yuan.

"Alright, I understand," Li Yuan said.

"Li Yuan," Lin Quan finally couldn't help saying, "are you thinking about going to the World within Worlds? You're just a freshman, and your Physical Quality might not be high enough, so don't be impulsive."

"This World within Worlds, where the Blazing Flame Family has long arranged for several junior Prime Warriors to rotate guarding duties, was still overwhelmed by raiders from the Immortal Ruins Civilization, it's extremely dangerous," Lin Quan solemnly said.

Lin Quan knew that Li Yuan was skilled, able to match even himself.

But under normal circumstances, while skills could be comprehended instantly, Physical Quality needed time to accumulate.

In Lin Quan's view, like Lin Lanyue whose Physical Quality as a freshman had already grown to level 15, it was thanks to her bloodline gifts plus a large amount of resources.

What about Li Yuan? How strong could his Physical Quality be if his skills were high but he lacked High Rank Cultivation Methods to assist him?

"I won't be impulsive," Li Yuan said in a low voice.

"That's good," Lin Quan let out a sigh of relief.

"I'll make thorough preparations before entering," Li Yuan stated seriously.

Lin Quan was taken aback.

"Alright, big brother Lin, I'm going to start preparing now," Li Yuan said, then promptly hung up the communication.

Leaving a bewildered Lin Quan behind.

He wondered if he hadn't made himself clear just now.

...

Contrary to his wishes.

The only saving grace was that Lin Quan's words still gave Li Yuan a last glimmer of hope—she was alive.

In the Martial Arts Room of the villa at Kunlun Martial University.

"Lanyue, really went to the World within Worlds? And lost contact?" Li Yuan's heart tightened; he was far from as composed as he had appeared.

Until confirmation from Lin Quan, Li Yuan had always hoped she would not be there.

Contrary to his wishes.

The only saving grace was that Lin Quan's words still gave Li Yuan a last glimmer of hope—she was alive.

"From what Lin Quan said, does Lanyue hold an extremely high position in the Blazing Flame Family? Seems to be much higher than her two older brothers, and one of the conditions that the Blazing Flame Family has asked of the alliance is to save her? Could it be that she's able to cultivate the 'Nirvana Divine Scripture'?" Li Yuan pondered silently, "Even so, her importance to the Blazing Flame Family shouldn't be this high, right?"

According to what Dean Hai had implied, if one could cultivate the 'Nirvana Divine Scripture', the hopes of becoming a Flying Heaven Warrior were greatly increased.

A Flying Heaven Warrior is indeed very important.

But is it that important to a high-grade Spiritual Nature family that already has dozens of Flying Heaven Warriors?

"It doesn't matter now."

"The more the alliance's upper echelons value her, the greater the hope of rescuing Lanyue," Li Yuan muttered to himself.

The moment he knew Lin Lanyue was trapped in the World within Worlds, Li Yuan had made his decision—to take on the challenge!

Scenes with Lin Lanyue began to drift through Li Yuan's mind.

Their every encounter in the elite building of high school, exchanging martial skills; the invitation event at Jiangbei Martial University; Lin Lanyue rushing back from the Lantis Continent especially when Xu Bo, their teacher, passed away... and her many times of assistance.

Especially the time when she saved his uncle, an act Li Yuan would forever remember.

The two of them, at this moment, could only be said to be friends with a very good relationship.

But in a nebulous way, they both had some fond feelings for each other, only both consciously avoided many things... both were dedicated to Martial Path and didn't wish to be distracted in their prime cultivation years.

"However, when she saved my uncle and helped me many times... I have never been able to repay her," Li Yuan's eyes carried a hint of killing intent: "This time, if I have the ability to do something, I cannot shrink back."

"The Immortal Ruins Civilization? The Gu Yue Divine Kingdom? No matter how many Prime Warriors there are, I'll kill all those who dare to block my way."

Li Yuan was always a person of passion.

Just like before, when senior Liu Jing sacrificed himself to save him, seeing a sliver of hope for victory, Li Yuan risked his life to turn back and save him.

Chapter 320 - 233 Gathering! The Sole Exotic Treasure (Added 28, 29)_2

...

Now, it's the same.

Think everything through.

Huff!

Li Yuan directly sent a message to Dean Hai—"Dean, I'm willing to go, and it's best to depart as soon as possible."

Only ten seconds later.

Dean Hai made a call, which Li Yuan immediately answered, and the communication was established.

"You've decided so quickly?" Dean Hai's voice carried a note of surprise.

"Once it's clear, there's no room for hesitation," Li Yuan said with a smile, not wishing to explain further.

"Good," Dean Hai nodded and didn't ask further, "I will report your name right away. In three hours, I'll take you on a flyer to the 'Third Star Realm', towards Feixing."

"This mission is urgent and extremely dangerous... If there's anything you haven't taken care of, arrange it quickly."

"Okay," Li Yuan nodded.

"Additionally,"

"In ten minutes, an 'unrestricted loan' of 20 billion Blue Star Coins will appear in the Starfire Treasure Vault of the Starfire Martial Hall for you," Dean Hai said, "You can purchase any item you want without the restriction of your contribution balance."

"Once you've made your selection and submitted, the purchased treasures will be directly arranged for delivery outside the Fierce Feather Star Realm."

"Okay."

"Take these 20 billion and buy more life-saving items," Dean Hai said, "I will also quickly draft a 'suggested list' for you, which you can follow to make your purchases."

"A 20 billion loan?" Li Yuan was startled.

"This is the alliance's benefit to you. If you fall in the World within Worlds... the loan will be written off," Dean Hai said, "But if you come back alive, you'll need to repay the money."

Li Yuan immediately understood.

20 billion Blue Star Coins, for a Level 19 Martial Artist, would be enough to buy a multitude of life-saving items, even if he were to become a Prime Warrior right away.

"Alright, that's all for now," Dean Hai said.

"Okay."

...

After ending the communication with Dean Hai, ten minutes later, Li Yuan received a notification.

He received an 'unrestricted Starfire Vault loan' of 20 billion from the Starfire Martial Hall.

Li Yuan immediately logged into the virtual network.

He entered the Starfire Space.

"Master, you've come back so soon?" The sprite-like young girl was quite excited.

"Don't talk too much, open the Starfire Vault." Li Yuan said quietly.

"Yes!"

A giant screen appeared, revealing a vast category of treasures. Li Yuan saw the display of the 20 billion loan balance.

There was no cash given, these loans had to be used to purchase treasures, and could only be for personal use.

"Not bad."

"Even if I have to repay it later, at least these 20 billion loans won't consume my contribution limit; it's a great benefit," Li Yuan thought quietly.

One must make contributions, offering treasures to the Martial Hall, to receive contribution limits.

"20 billion, how should I spend it?" Li Yuan pondered, his thoughts stirring. Quickly, a new screen appeared next to him.

Displayed on it was the 'suggested shopping list' just sent by Dean Hai.

"Two 'Origin Purple Life-Extending Pills'."

"Five Origin Power Battle Suits?"

"Standard Storage Magical Treasure."

"Five preferred Long Spears."

"A large quantity of food and water."

...

Li Yuan glanced over it, and Dean Hai's suggested list of treasures boiled down to two points.

First, buy several pieces of frequently used items, such as Origin Power Battle Suits, weapons, etc., to prevent damage in frequent battles.

Second, life-saving items.

"I'll go with Dean Hai's suggestions," Li Yuan decided, "But preparing a large amount of food and water doesn't have to wait until reaching Feixing; I'll get it ready at the school."

Although Prime Warriors can absorb Origin Power, they haven't reached the point of complete abstention from food.

Especially water, which is very important.

Li Yuan already had a Storage Magical Treasure, six cubic meters.

Even if he allocated half of the space for storing food and water, it was already substantial.

Three minutes later, Li Yuan had selected all the treasures he needed—spending a total of 16.4 billion.

Just two Origin Purple Life-Extending Pills alone cost 10 billion Blue Star Coins.

For the Origin Power Battle Suits, and the like, Li Yuan chose second-rank top-quality, each valued at 2 billion Blue Star Coins, totaling 10 billion for five pieces.

Weapons? One second-rank top-quality Long Spear cost 1 billion Blue Star Coins, and Li Yuan bought ten in one go.

Li Yuan wasn't worried about squandering.

"If they don't get used in the future, they can still be sold back to the Martial Hall," Li Yuan muttered to himself.

That is the advantage of having a Storage Treasure.

Without a Storage Magical Treasure, he wouldn't be able to carry so many weapons, Battle Garments, and other auxiliary treasures.

Place the order!

All purchased items will be rushed in from Feixing, and Li Yuan can collect them at the entrance of the Fierce Feather Star Realm.

...

After acquiring the treasures, standing in the Starfire Space,

Li Yuan pondered for a while.

He quickly drafted a will and took out 5 billion Blue Star Coins from his name as an inheritance for his uncle and aunt.

As for the other 3 billion-plus? Li Yuan decided to donate to the Seven Star Alliance in the event of his death.

"If luck doesn't favor me and I really die in the World within Worlds, these funds will be more than enough for my uncle and aunt to live comfortably for the rest of their lives," thought Li Yuan, quite at peace with the idea.

"The country and the Martial Hall spent so much money and resources to cultivate me... If I die, consider it some kind of feedback and contribution."

...

Leaving the virtual network capsule,

He returned to the Martial Arts Room.

"Continue practicing the spear," Li Yuan took out the Black Chen Spear and resumed his training.

The Black Chen Spear, just a second-rate lower-quality weapon, was getting a bit weak for Li Yuan, who was on the verge of breaking through.

Mainly, its weight was no longer sufficient.

However, just practicing the spear was not a big issue; with it, Li Yuan tried to calm his mind.

The closer to life-and-death battles, the more one must face tests of life and death,

The more one must stay calm.

Anger? Impatience? They could all cost your life!

...

In Feixing, within the city belonging to the Blazing Flame Family,

At the top floor of that towering building,

"Dad." Lin Quan looked at the muscular figure in silver armor projected on the screen—a man in his early thirties with a decidedly heroic air.

...
