

## High Martial 125

Chapter 125: Can Superpowers be Unlocked?

After finishing dinner, Chen Fan didn't rush to the warehouse to practice martial arts. Instead, he returned to his room, took out the bottle containing Qi Blood Pills, and swallowed four Low-grade Qi Blood Pills one by one.

Soon, the potential points on the panel increased to 1852 points.

The experience points required for the next body enhancement were only 200 points.

Chen Fan glanced at the spiritual value, hesitated no longer, and clicked the plus sign behind it.

potential points disappeared in an instant, and at the same time, a powerful hot stream surged from the heart outwards, flowing to various parts of the body.

This feeling was much stronger than the enhancement brought by Level 8 Fist before.

Besides the physical changes, he also felt a slight swelling sensation in his brain.

A moment later, all changes disappeared.

Chen Fan rubbed his head.

He had a very strange feeling just now, something he couldn't quite describe.

Glanced at the Spirit Attribute, it reached 22.67 points, reaching the threshold for practicing [Moon Observation Technique].

"Could it be the effect of the Spirit Attribute enhancement? Is it a superpower?"

Chen Fan widened his eyes.

According to the conjecture, the spiritual power of an Awakener generally exceeds 20 points.

Having reached 20 points himself, could he also unlock a superpower?

"Fire?"

"Ice?"

"Enhancement!"

"Gravity?"

"Light?"

He muttered silently.

A minute, two minutes, three minutes passed...

Silently reciting all the superpowers he could think of, the result was, nothing happened.

"Alright then."

He shrugged his shoulders, maybe he was thinking too simply.

Probably, he hadn't awakened a superpower after all?

Or maybe he had awakened, just without feeling it, like Gu Ze, not yet triggered?

"Probably the latter."

Chen Fan thought, after all, one should always have dreams, what if they come true?

Well, alright,

Compared to some illusory superpower,

practicing the [Moon Observation Technique] right before him was more practical.

He added one experience point, yes, directly added the experience point.

Meng Yu said, her sister took several years for Moon Observation Technique to reach Great Success.

Those who could practice [Sun Observation Technique] were basically Awakening experts stationed in large cities.

As for those who could practice [Observing the Universe Technique], only a few top Awakening experts.

After investing one experience point, Chen Fan watched the skill level, it climbed up by one percent, then stopped at two percent.

"Two percent?"

Chen Fan exclaimed, incredulous.

Just to reach the beginner level required fifty experience points?

No wonder Meng Yu hadn't reached the beginner level after so long.

He glanced at the remaining experience points, about 350 points.

If luck is on his side, he should be able to upgrade by two levels, right?

He reinvested 49 experience points.

Instantly, he felt a swelling sensation in his brain, something was gathering in his mind, and it flowed like water.

An array of memories surged from the depths of his mind.

Chen Fan opened his mouth in astonishment.

These memories were from his time before crossing over, those forgotten, or fuzzy, past.

At this moment, it felt as if he was experiencing them anew.

As memories surfaced, his sensations became clearer, he could even feel each part of his brain.

"Could the strange feeling be spiritual power?"

Chen Fan's expression changed slightly, looking at the skill bar,

[Moon Observation Technique: Initial Glimpse (0%), Traits: Concentration Level 1, Meditation Level 1]

[Concentration: Each level increases spiritual power by doubling]

[Meditation: Active skill, upon activation, enters a meditation state, recovering ten percent per hour, each level increases recovery rate by ten percent per hour, movement is not allowed during meditation state]

"Doubling spiritual power?"

Chen Fan thought he must have read it wrong.

Checked twice, then looked at his Spirit Attribute.

Indeed, the Spirit Attribute increased from 22.67 to 45.34.

Indeed, doubled.

"This..."

He was stunned.

This was just the beginning.

If it reached the Small Success Realm, it would double again?

What if it reached the Perfection Realm, the spiritual power of 20 points would reach 640?

This was just the entry-level Visualization Method, what if it was [Sun Observation Technique], the enhancement would be even more significant.

Chen Fan seemed to understand why Awakening experts grew so fast.

Each Awakening expert had different levels of control over their superpower, but undoubtedly, to enhance the power of superpower, the higher the spiritual power, the better.

"Not bad."

Chen Fan thought.

Though he was not an Awakener, without a superpower.

But with high spiritual value, the longer the activation of skills lasts, just like Level 8 Fist's Far and Wide, upon activation, continuously consumes spiritual power, doubling the power agility attribute.

In future confrontations with Awakening experts, he would have a better chance.

His gaze dropped to the Meditation trait.

This was easy to understand, similar to Blood Circulation for stamina recovery but with higher requirements.

However, the recovery speed was indeed fast.

Level 1 Meditation required ten hours for full recovery, slower than sleep.

But Level 2 Meditation could fully recover in five hours.

If it was Level 5 Meditation, two hours, faster than sleep.

"I wonder if I'm among the few martial artists who study spiritual cultivation."

This thought popped up in Chen Fan's mind, causing him to laugh aloud.

With a trial mindset, he visualized a crescent moon in his mind.

The feeling was indeed different.

With weak spiritual power, the things he visualized in his mind were often blurred, only a vague impression.

Now, it was vivid, like a moving picture.

Following which was the waning moon, first quarter moon. Upon reaching this stage, he felt slightly tired.

"It seems that visualizing consumes spiritual power."

Chen Fan realized.

The more complex the object visualized, the longer it is maintained, the more spiritual power it consumes.

"Plenty of experience points left, to be safe, better upgrade one more level."

He reinvested one experience point, the skill level of Moon Observation Technique rose by one more percent.

"One hundred points."

Chen Fan nodded and reinvested 99 points.

The spiritual power in his mind surged again.

[Moon Observation Technique: Slight Achievement (0%), Traits: Concentration Level 2, Meditation Level 2, Economy Level 1]

[Economy: Each level reduces spiritual power consumption by five percent]

"Reducing spiritual power consumption?"

Chen Fan smiled.

This was also an indirect enhancement of spiritual value.

Though the range was small, only five percent, even at Perfection Realm, it would save twenty-five percent, less than thirty percent anyway.

"Let's stop here, the remaining experience points still need to be used for other martial arts enhancements, and it seems not enough."

Chen Fan looked at the attribute panel,

Realm: Mid Stage of Muscle Refining

Level: 10 (0/300)

Constitution: 158.95

Power: 162

Agility: 108.58

Spirit: 90.68

Potential points: 1652 (15 points/1 day)

Experience points: 158

"Huh?"

Chen Fan instantly noticed a plus sign appeared behind Realm.

This indicated that his attribute values had reached the threshold for a breakthrough.

He clicked on it.

[Breakthrough Threshold: Either Physical Strength Attribute reaches 150 points, threshold reached]

[Average of three Physical Strength Attributes exceeds 130, breakthrough success rate reaches 100%, current breakthrough success rate 100%]

[Breakthrough now?]

Chen Fan wasn't too surprised; from Uncle Zhang's words, he could guess the threshold for a Late-stage Martial Artist of the Muscle Refining Stage to break through to Entry Force should be around 200 points.

Then from Mid Stage to Late Stage of Muscle Refining, it should be 150 points.

"No hurry, breakthrough tomorrow morning before departure won't be late."

He walked out of the room, thinking, strolled along the path, arrived in front of a house, knocked on the door, and lightly coughed, "Meng Yu, are you asleep?"

"Chen Fan?"

A startled voice rang out inside, followed by the sound of approaching footsteps, the door opened, revealing Meng Yu.

"Sorry to disturb you so late."

Chen Fan said with a smile.

"It's alright, I haven't slept yet."

Meng Yu's face turned slightly red, she stepped aside.

Chen Fan nodded and walked in.

"I'll get you some water."

Meng Yu seemed a bit nervous.

"No need to be so courteous."

Chen Fan chuckled helplessly, "Remember the last time you taught me Moon Observation Technique?"

"Ah? Moon Observation Technique?"

Meng Yu was stunned, then nodded, immediately thought of something, widened her eyes, "Did you reach the beginner level?"

Chen Fan smiled, "Got lucky, reached it all at once."

Meng Yu opened her mouth, speechless.

Of course, she wouldn't doubt Chen Fan was lying.

But, how long had passed since she told him about Moon Observation Technique?

A day or two?

And he reached the beginner level?

"I said at that time, you told me the method, I might be able to help you, didn't I? So, now I'm here to share my insights. If you have any questions during this, feel free to ask."

Chen Fan said.

Though he was only at the Slight Achievement Realm, it was more than enough to guide Meng Yu who hadn't reached the beginner level.

"Really?"

Meng Yu's eyes gleamed, but soon dimmed, "But I'm a bit slow, afraid it's hard for me to learn."

"Don't belittle yourself, maybe you're just stuck in a dead end, change direction, it's possible."

"Hmm!"

Upon hearing Chen Fan's words, Meng Yu's confidence increased significantly.

Chen Fan spoke, Meng Yu took notes.

During this, she occasionally asked a few questions, which Chen Fan answered patiently.

Though from Meng Yu's expression, it was clear she didn't fully grasp the meaning.

Chen Fan simply explained it several more times.

About half an hour later, he stood up to leave.

"That's all for now. If you encounter any problems during cultivation, feel free to come to my house or the warehouse to find me." Chen Fan smiled at her.

"Mm, okay!"

Meng Yu held the notes, deeply moved.

"Chen Fan, thank you for teaching me so patiently."

"No problem, it's the least I could do."

Chen Fan waved at her, turned, and walked towards the warehouse.

He also planned to share the Moon Observation Technique with Uncle Zhang and Gu Ze.

As for the source, he would say he bought it off a street vendor a couple of days ago, reminding them to keep it a secret.

"Chen Fan, thank you."

Meng Yu watched Chen Fan disappear into the alley, eyes becoming misty.

Then, she looked at the notes in hand.

Perhaps, the hope of rescuing her sister lay within.
