

## THE HIVEMIND IS CONQUERING FOR ME?

### Chapter 13: Orchids new body

After getting dressed in a onesie and a short time of training later, I was about to ask Jewel for another round, but before I could ask she stopped me "While we would usually continue my mate your surprise is here.

Before turning around the find what it was a voice entered the Psionic link "Greeting Apollo mate Orchid missed you very much did you miss Orchid?" "Orchid!" I relayed with glee I turned around to see her but paused when I saw what was in front of me.

A beautiful woman 6ft6 in height she has well proportioned face two eyes with a shimmering purple iris'. Her eyebrows have a slight curve well proportioned on her face. Her nose was small and intricate and has a natural rosy pink set of lips. Deep purple locks of hair flow down to her shoulders.

She is wearing a bone white chitin armour covering her whole body with a thick purple under armour not to dissimilar to the queens on display through the gaps.

I stared at the beauty for a moment my brain no longer processing how a woman could reach the Hive-queens chamber until she spoke. "Is Orchids new form not to your liking Apollo mate?" My brain reigniting finally coming back online responded "O-Orchid is that you?" "Of course it is Apollo mate."

I started crawling my way over to her before pulling myself up on her leg which I then hugged "I've missed you Orchid 2 month is way to long" I said happily "And yes I think your new form is beautiful ." Orchid body stood up straight and froze at the compliment.

'Yep its definitely her.' "Are you able to removed those clawed gauntlets to pick me up?" Coming out of her stupor from her bodies reaction to my compliment Orchid replied "Of course Apollo mate" I watched as Orchids gauntlet warped an wriggled into her skin until what was left was a pink hand. I remember her flesh doing something similar when producing her exocrine back on apollo-minor.

Orchid could feel my curiosity so she explained.

"As a new bio-infiltrator class Orchid has received a great improvement to her gene augmentations Orchid can now trans-morph her body very effectively the 'gauntlet' of my armour as you would call it is now stored inside my gene

code and can re-equip it in moments" "Orchid has received other enhancements but will tell you later as for now all Orchid wishes to do is embrace you in the way her old body could not" With that she positioned me against her chest armour and stroked my back tenderly with affection.

After 10 minutes of her hugging me my body decided to interrupt.

\*grgle\*

"Oh are you hungry MY mate bring him here Orchid I shall feed him." Jewel she had been observing her 'broken' limb since she entered the room and had almost annihilated her when she did what she did next. "That wont be necessary my queen I have fully prepared this body to aid in Apollo-mates growth till well past his growing period." she flashed a lustful gaze at me which I did not see.

"As such I have developed 2 perfected exocrine no forgive me, breasts on this body which can provide all the nutrition he needs." As she said this the chitin plate on her chest melded back into her body and my face was now nuzzled next to something soft. Looking over a pair of D sized breasts with delicate doll pink nipples sitting invitingly on the tips.

"Fine you may feed him this time but I am next Orchid!" The queen relayed, her giant faceplate staring through the former freethinker. "That is most acceptable my queen my thanks to you"

Ignoring the bickering at the back of my link, I was given the greenlight to drink. I didn't currently see what I was doing as anything lewd as I truly just needed to eat but what Orchid did as I started suckling changed that somewhat.

"Mmhaah"

!!!

A sweet moan came out of Orchids mouth for the first time instead of the link 'she must be tender as its a new body' is what I told myself in order to carry on. Orchid realised what she did covered her mouth to stifle from any more moans. Not because she was embarrassed no. She was glad her mate was making her feel new pleasure.

She covered her mouth because of the concentrated Psionic might The queen was angrily radiating at her.

'I WOULD CRUSH THAT STUPID LIMB INTO A MOUND OF BIOMASS AND BURN IT AWAY NEVER TO RE ENTER THE HIVE. BUT MY MATE CARES FOR IT GREATLY. MY BODY SHOULD HAVE BEEN THE FIRST TO EXPERIENCE PLEASURE FROM MATE. GRAAAH. THATS IT I NEED TO REDOUBLE MY EFFORTS INTO CREATING MY NEW BODY ASWELL BUT I JUST CANNOT FIND THE RIGHT BIOMASS THAT IS ABLE TO HOLD MY PSIONIC MIGHT...

I MAY HAVE TO ATTACK THOSE VILE BIOMASSLESS ROBOTS INORDER TO UNDERSTAND THEIR 'COMPUTING' POWER IT MAY JUST HELP.

Unaware of Jewels current anger I finished having my meal, I relayed to the heavy breathed Orchid "Your taste changed a little, but it was still very nice however even though I'm glad your back, I cannot stop my training if I want to get stronger, but feel free to take your old role of carrying me around whilst I'm doing so if you like." "Orchid would enjoy that very much that.

In fact it will be easier than before as even though I'm now much smaller the biomass used to create me is much higher quality I'm as strong as 3 Orchids now." Orchid boasted her chest jiggling as she took a victorious stance.

Once I was done and Orchid brought me back in front of the queen, I relayed to her "Thank you Jewel truly this reunion is just the best. Orchid was the one who got me here after all and without her I could have never made it back here, to home." Hearing me call her world home made Jewels anger melt away along with her heart.

She extended a Psionic tendril and caressed my face with it "Of course my mate as we have stated many times the hive will do its all to make you happy."

After the heartfelt moment, I resumed training. Even now tensed, my mind defence can only last 2 seconds at most against the queens attack. She's using a miniscule amount of power even compared to the psionic agitator but the purity was much stronger leading to more damaging effects.

A few hours later I was exhausted super nutritional food breaks could only do so much before my mind felt like its headache had a headache and had to lay down. Orchid carried me from my training area to my bed before climbing in and laying down with me still in her arms . "Orchid what are you doing?" Jewel asked in veiled anger. melding her armour into her body and now fully naked?

was she considered naked as a bug? relayed " Orchid informed you earlier my queen Orchid has made herself fully prepared her body to serve our mate in

all circumstances. To aid in sleep Orchid is now able to radiate her body temperature to warm or cool our mate as he sleeps."

Jewel anger once again subsided as she observed my tired face with its slight smile she assumed I was smiling at the gesture but no, I may still be a baby in body but my mind very much isn't I'm very much enjoying having my head next to some literally perfectly crafted boobs as I sleep.

Springing into action the bed bug started to cover me now I was in a position to do so Orchid was surprised for a second before understanding the new species before her. Like her it was also made to aid me so she took no issue.

Once I was nice and snug I started to nod off before so I tapped into the link once more and said "Thank you for such a great day it was a pleasure having both of you together its like my family was whole again after a couple months of separation" this caused both Orchid and Jewel to smile but what I said unconsciously just before my link cut out made them both freeze up. "My family...Love you zzz"

Those words, they have never heard them before but they felt like they understood them that their entire desire to mate with Apollo was because of those words the very fact he said those words to them caused the whole hive to once again release pheromones and it caused Orchid who no longer had

the glands required for them to breath heavy and a wetness to form in between her new legs where her newly designed reproductive organ was.

Ignoring the effects for now, the two of them looked through the hives memories on humans to find the word and they did. Its what human mates say to each other when they have intense affection for each other.

Orchids eyes became wide and frenzied at the discovery the queen would show similar characteristics if she had eyes. They knew now that the feelings they had for Apollo was love not just a desire to mate and would do everything in their power to make sure that Apollo would feel their love.

I let out a slight shudder in my dream as I unconsciously felt their explosive feeling before continuing my peaceful sleep
