Chapter 1691 - Returning to the Soul Race Ancestral Land

The red talisman and treasure coin are ultimately just external forces; such sudden explosive methods actually come from one's own foundation. By comparison, Lu Ye actually prefers the latter.

Continuously maintaining the spirit runes within the Boulder Mountain Saber, he repeatedly circulates his mana through the Circumambulation, with each cycle accumulating slightly more power.

This gradual enhancement is quite pleasant, as for the bit of mental attention he diverted... it poses no burden for Lu Ye.

As early as the True Lake Realm, he used the Talent Tree to refine a doppelganger, multitasking his mind. With his cultivation now at this level, the ability to divide his mind has become a basic skill for every cultivator.

"Saintly Venerable, we're almost there." Ma Shangsi's voice drifted over from the starboat.

Lu Ye raised his eyes to survey his surroundings, only to realize that unwittingly, he was nearing the location where he had left the Soul Race ancestral land.

This is within the domain of the Grotto Void Galaxy, where there is an invisible passage that connects to the stellar space pond. Ordinary cultivators cannot enter, nor can they perceive it. Only the Soul Race can, through their soul beads, establish contact with the ancestral land and subsequently be guided inside.

Lu Ye does not possess a soul bead, but his seven-color Divine Lotus can substitute the function of a soul bead.

Ma Shangsi's speed was commendable. The two had emerged from the Yin-Yang Great Millstone only about ten days ago, to have reached this place, far quicker than the nearly two months Lu Ye had taken to get there originally.

With cultivation improvement, benefits in traveling have become evident, with time spent in stellar navigation greatly reduced.

Lu Ye estimated that if he had to return to Nine Provinces from the All Phenomena Ocean now, it definitely wouldn't take as long.

Feeling out slightly through the seven-color Divine Lotus, he directed Ma Shangsi to a position.

Even though the location is close to that intangible passage, precision is crucial for returning to the Soul Race ancestral land.

The starboat sailed for half a day longer, when Lu Ye finally instructed Ma Shangsi to stop.

"Put away the starboat," Lu Ye commanded.

Ma Shangsi followed the order promptly.

Lu Ye looked towards him, speaking calmly, "I'll take you into a place. Behave well when you're inside, don't scare the flowers and grass."

Ma Shangsi was somewhat puzzled, not understanding what the Saintly Venerable meant, yet he responded respectfully.

Only then did Lu Ye summon his mind, transmitting to Hua Qianying within the Flower World to cooperate with him.

He can leverage the seven-color Divine Lotus to allow the ancestral land to guide him back, but Ma Shangsi cannot; the physical bodies cannot enter the Soul Race ancestral land, except for beings like Amber, the Sacred Beast.

Though Lu Ye is half-Soul Race, he does not wish to break the ancient rules passed down by the Soul Race. Moreover, he is unsure whether it would even be possible to bring Ma Shangsi in should he attempt.

He would need to find someone trustworthy to test it, despite Ma Shangsi being his Blood Servant, he does not want to expose the Soul Race ancestral land to him.

Consequently, if he plans to take this guy back to Nine Provinces, there remains only one way — taking him into the Flower World!

Mental Consciousness surged as the void before Lu Ye began to twist, gradually forming a portal.

Even though Ma Shangsi, at Moon Jade Late Stage, was still utterly shocked by this method, unable to comprehend how Lu Ye achieved it.

"Enter," Lu Ye instructed.

Ma Shangsi dared not hesitate, promptly diving headfirst into the portal, and upon reappearance, he found himself within the Flower World.

On the Flower World side, Hua Qianying, along with Mu He and Black Umbrella, had already been informed by Lu Ye of the situation, thus were hardly surprised at Ma Shangsi's sudden appearance.

Conversely, Ma Shangsi was visibly astonished, for Wood Spirit and Spore Race might not be so common across the stellar space, and the domain he's in felt unusual.

He originally thought the Saintly Venerable owned a miniature world, yet now it appears to be a true domain instead.

Despite being knowledgeable, for a moment he did not associate it with the World King Flower, chiefly because it is too rare and unlikely to be attached to a cultivator.

After settling Ma Shangsi, Lu Ye then used his seven-color Divine Lotus to connect with the Soul Race ancestral land.

Having done this once before, it wasn't unfamiliar, and Lu Ye quickly discovered that with cultivation enhancement, efficiency in connecting to the Soul Race ancestral land has seemingly improved.

Last time it took him four hours, this time remarkably it only required two hours.

The passage to the ancestral land opened, akin to the first time Lu Ye witnessed Lih Shang. A lotus flower appeared blooming in the void.

He swiftly retreated within, disappearing as the lotus closed.

In a certain place within the Soul Race ancestral land, Lu Ye appeared out of thin air, instantly feeling relaxed under the nurturing environment.

With the World King Flower continuously consuming his Soul Power within his Divine Sea, even though he constantly replenished it, relying on external methods was only a temporary fix.

It's different when he is within the ancestral land, where Soul Power available for refining and absorption is abundant, immediately easing the burden within his Divine Sea.

This feeling compared to a mortal, kept long in a confined space with labored breathing, suddenly arriving in a place vast and free.

If Lu Ye remained here, the World King Flower would pose no burden at all.

A powerful presence approached, and it was familiar.

Lu Ye turned his head to look and soon saw a familiar figure come into view.

The other party was obviously surprised: "Young Friend Lu? How did you..."

He had clearly left not long ago, barely three months at most, how did he suddenly return?

As Overseer Elder, Xuyuan was responsible for monitoring all unusual movements within the ancestral land. No matter how small Lu Ye's movements were upon returning, they could not escape the perception of someone at the Sun Blaze. So he came to check the situation.

Unexpectedly, he saw Lu Ye.

Come to think of it, there were basically not many clan members coming and going in the Soul Race; even those above Moon Jade who traveled would not return in a short time. Which clan member doesn't travel for decades, even a hundred years?

No one had ever returned after just three months.

"Your cultivation..." Xuyuan quickly noticed another issue; Lu Ye's cultivation had actually reached Moon Jade.

He was clearly only at Peak Constellation before.

"Some breakthroughs," Lu Ye replied with a smile.

Xuyuan looked at him seriously, nodding slightly: "It seems, Young Friend, you have gained quite a bit."

"So-so,"

Though that's what he said, upon careful thought, he really had gained quite a bit over the past few months.

Rising to Moon Jade aside, which was expected, he gained a World King Flower, along with about two hundred beings from the Flower Race, Wood Spirit Race, and Spore Race, and also acquired a Blood Servant...

No mention of the White Moon Crystal gained, which was a tribute from Ma Shangsi.

In a few months, he had transformed from one of the lowest in the stellar space to a mid-level existence. In the vast stellar space, Moon Jade was not considered weak anywhere.

Knowing that Xuyuan had come sensing the disturbance, Lu Ye said, "I'll go check on Amber and the others first. Elder, please attend to your tasks."

Xuyuan nodded: "I'm still at the stellar space pond, feel free to come to me if you need anything."

Lu Ye thanked him, and just as Xuyuan was about to leave, he suddenly spoke again: "Oh, Elder, where is Lih Shang's Lotus Land located?"

This Soul Race ancestral land, without a star map, looked alike all around, and since he suddenly returned, he honestly couldn't discern the direction.

Xuyuan pointed him to a direction.

Lu Ye immediately headed that way.

Soon, he indeed saw a familiar five-color Lotus Land appearing in view. He flew over excitedly, already anticipating the surprise on Yiyi and Amber's faces when they saw him.

Separated a few months ago, the little girl surely thought she wouldn't see him again for a long time, and Lu Ye felt the same back then.

Who would have thought, using a seven-color Divine Lotus, he could become half a clan member of the Soul Race, gaining the ability to communicate with the ancestral land.

The Lotus Land was in full bloom, quiet and still, with no figure in sight.

But Lu Ye knew that each soul member had their own space on this Lotus Land, undisturbed by outsiders, which also facilitated their cultivation.

So although it seemed empty, they were actually in the inner space of the Lotus Land.

Lu Ye landed on the Lotus Land, carefully discerning where Yiyi had chosen before. He hadn't found it yet when a head suddenly popped out not far away, with a surprised expression: "You haven't left yet?"

Lih Shang was indeed surprised because, by right, Lu Ye should have left months ago, yet she saw him today.

She thought Lu Ye had never left.

"I left, but came back." Lu Ye didn't treat himself as an outsider, looked around, and said: "Where is Yiyi's place?"

Lih Shang fully emerged, pointing out a location to Lu Ye: "It's here, but Yiyi is in secluded cultivation. Should I wake her up?"

Not only Yiyi, but all the predecessors from Xianyuan City were in secluded cultivation!

They had never experienced such a favorable cultivation environment. Over these few months, Lih Shang even taught them various Soul Race secret techniques. As long as they achieved something in cultivation, they would be true soul members.

So whether it was Yiyi or the predecessors from Xianyuan City, they all entered a state of secluded and intense cultivation. They understood that such an opportunity was rare, and no one wanted to waste time.

Lih Shang was also in secluded cultivation. Last time, she obtained a five-color Divine Lotus in the Lotus Pond and intended to use it to break through her own shackles to advance to Moon Jade. She had accumulated enough at the Constellation.

However, she was the owner of this Lotus Land, so she sensed when Lu Ye arrived, and thus she appeared voluntarily.

If it weren't for Lu Ye, she would have continued her seclusion.

"Secluded cultivation, huh..." Lu Ye knew he hadn't come at the right time. No, rather, he should have expected as much, but now it seemed that the surprise he intended couldn't be given, "No need to call. I won't stay long."

The environment in the ancestral land, though nice, wasn't somewhere he could stay indefinitely. He needed to place the World King Flower into the Nine Provinces as soon as possible, for both the World King Flower and the Nine Provinces to yield early results.

Chapter 1692 - Body Flower

It's better to settle the World King Flower into Nine Provinces sooner rather than later. The earlier it's settled, the sooner Nine Provinces can benefit.

Furthermore, considering that the carrier of the World King Flower is the seven-color Divine Lotus, Lu Ye dared not delay.

As of now, there doesn't seem to be any issue with the seven-color Divine Lotus, but over time, who can say for sure? Although the seven-color Divine Lotus is extraordinary, should any issues arise, the loss would be irreparable.

So Lu Ye originally intended to just take a look and leave, and with Yiyi in seclusion, he naturally didn't need to disturb her.

There will be plenty of opportunities in the future.

"Do you need to leave a message?" Lih Shang asked.

"No need, don't tell her I came by. Next time we meet, I'll tell her myself. Take care, Fellow Daoist!"

Lu Ye arrived suddenly and departed gracefully.

Watching Lu Ye leave, Lih Shang only later realized with surprise: "Moon Jade?"

She was more aware than anyone of Lu Ye's formidable strength, having lived and fought side by side for several years, facing life and death together.

Lu Ye was already strong during the Constellation phase; now that he has ascended to Moon Jade, what kind of enhancement could he have?

Lih Shang's expression became solemn, secretly determined that during this retreat, she must ascend to Moon Jade. There's no reason Lu Ye can advance while she cannot.

On the seven-color Lotus Land where the stellar space pond is located, Lu Ye arrived and easily found Elder Xuyuan.

"Why are you back so soon?" Xuyuan felt Lu Ye's actions were somewhat hasty.

"Yiyi is in seclusion and I didn't see her," Lu Ye explained.

Elder Xuyuan understood: "I see, so what's your plan next? Are you planning to use the stellar space pond to go somewhere?"

"I do plan to use the stellar space pond." Lu Ye nodded, "But before that, there's a matter I'd like to consult the elder about."

Xuyuan chuckled: "No need to be formal, little friend. No matter what, you're half a clansman to our race. Feel free to ask anything; though my abilities aren't great, my experience is quite extensive."

Don't be misled by the Soul Race dwelling in the ancestral land for extended periods; once their cultivation reaches the Moon Jade level, many actually venture out, albeit well-concealed and rarely discovered.

An adventurer like Lih Shang sneaking out in the Constellation phase is something found once in tens of thousands of years.

"Elder, please take a look." Lu Ye didn't ask directly but opted to demonstrate, being more intuitive.

As he spoke, he fiercely activated his blood Qi energy.

Xuyuan's face immediately showed astonishment; despite the Soul Race lacking fleshly bodies, they understand the level of blood Qi energy a cultivator should possess at each stage.

Lu Ye had clearly just ascended to Moon Jade, yet the erupting blood Qi energy surprisingly matched what Xuyuan had witnessed from many in Moon Jade Late Stage, which was clearly abnormal.

Moreover, Xuyuan sensed that Lu Ye's blood Qi energy differed from the usual Moon Jade individuals with flesh; it seemed somewhat sturdier.

Where exactly was it different... Xuyuan speculated that Lu Ye's blood Qi felt firmer.

If the Moon Jade blood Qi he knew was akin to a wooden board, then Lu Ye's demonstrated energy was like a stone slate, undeniably superior in quality.

And this wasn't the limit!

As Lu Ye intensified his efforts, his blood Qi energy grew increasingly overwhelming. Despite merely being a Moon Jade Early Stage standing before him, Xuyuan felt as if engulfed by a vast Blood Sea.

An even stranger scene unfolded as Lu Ye's blood Qi reached its peak. A blood-red mark appeared suddenly on his brow, resembling a star insignia.

"Body Flower!" Elder Xuyuan exclaimed.

"Hm?" Lu Ye paused, his blood Qi weakened, and the star mark on his brow vanished.

He looked at Xuyuan, ensuring he hadn't misheard, and it seemed Xuyuan understood what the star mark implied.

Feeling joy, it appeared asking Xuyuan was indeed wise. He initially considered investigating the star mark further upon encountering the Reincarnation Tree, as it was the tree's guidance that led him to the Yin-Yang Great Millstone.

Upon seeing Xuyuan, he spontaneously decided to inquire; now it seems Xuyuan was evidently aware of the circumstances.

"What is the Body Flower?" Lu Ye humbly asked.

Xuyuan regarded Lu Ye with a complex expression, speaking, "Congratulations, little friend, for condensing the Body Flower, indicating you have reached the extreme in the Constellation Realm."

Lu Ye understood, "Reaching the extreme in the Constellation Realm allows one to condense this Body Flower?"

"Correct!" Xuyuan nodded, continuing, "Of course, my Soul Race lacks fleshly bodies and never condenses the Body Flower, so the information comes from clansmen's encounters during their ventures."

"If it's convenient, I'd appreciate some guidance, Elder."

Xuyuan chuckled, "It's no inconvenience at all, nor is it a matter of secrecy. If you had an experienced senior to advise you, you would have already known these things."

After a brief pause, Xuyuan began, "Do you know why the divisions of the upper three stellar space realms are named after the sun, moon, and stars?"

"For distinction?" Lu Ye replied with an intuitive guess.

"That's only part of it. The main reason lies in the Body Flower you just exhibited, which is marked by the stars, hence that realm is called Constellation. Of course, not every Constellation can condense their Body Flower, and those who can are exceptionally rare, only those who reach the pinnacle of the Constellation Realm may condense the Body Flower."

Lu Ye seemed thoughtful, "The cultivation of the upper three realms corresponds to the essence of body, energy of magic, and psyche soul respectively. So if one reaches the peak of Moon Jade or Sun Blaze realms, can they also condense something similar?"

"Precisely!" Xuyuan appeared as though he found Lu Ye teachable, "Your Body Flower manifests as a star mark, while the Qi Flower supposedly appears as a crescent moon, and the Divine Flower as a big sun, which explains why it's called Constellation, Moon Jade, Sun Blaze."

Lu Ye appeared enlightened, finally understanding the origin of the division names of the upper three realms.

It's thanks to Xuyuan's extended lifespan, since the lifespan of the Soul Race far exceeds typical beings, thus their knowledge is surely beyond that of ordinary cultivators. If it were another Sun Blaze, they might not know these things.

Even though it's common knowledge, in the history of cultivation too few cultivators have ever condensed their own flower, making it a rarity that can't truly be deemed common knowledge.

"What's the use of this thing?" Lu Ye was puzzled. Although it's a symbol of reaching the pinnacle of Constellation, Lu Ye hadn't really discovered any practical use for the Body Flower, as it only appears when he's fighting desperately.

Xuyuan shook his head, "Its exact usage is beyond this old man's knowledge, but I have heard that the Body Flower possesses certain marvels."

Which means essentially nothing...

"However, if a cultivator can condense the Body Flower, Qi Flower, and Divine Flower, when the Three Blossoms converge, there will be potential for transcendence."

"Transcendence potential?" Lu Ye's interest piqued, "Please, Elder, enlighten me."

"Hmm..." Xuyuan fell into a contemplative expression, then frankly replied, "I don't know!"

"Huh?" Lu Ye twitched an eyebrow—why pretend you were pondering if you don't know.

"The Soul Race lacks flesh and blood, and since historical times, none of our race has ever achieved such a feat, so these insights stem from reading texts," Xuyuan explained.

"Does the Clan Leader know?" Lu Ye inquired, feeling that Xuyuan was unreliable, hoping to ask someone else.

Xuyuan replied, "Whether the Clan Leader knows, I can't say, but you won't meet him now as he's in seclusion."

"The Clan Leader is also in seclusion?" Lu Ye was exasperated; everyone seemed to be in seclusion.

Xuyuan couldn't help but glance at Lu Ye, thinking to himself it was due to this youngster. Otherwise, Hun Que at Peak Sun Blaze wouldn't need to enter seclusion.

After Lu Ye left that day, Hun Que began seclusion in an attempt to communicate with the ancestral land's will, seeking to understand the situation with Lu Ye.

For a human to stir the ancestral land's will, and receive such directives, not to mention acquiring the seven-color Divine Lotus in the Lotus Pond, becoming a partial member of the Soul Race—the matters were of significant importance.

As Clan Leader, Hun Que naturally wanted to clarify these matters.

"Anyway, remember that the Body Flower is definitely a valuable thing."

"Alright... sure!" Lu Ye acknowledged the worth, yet was still itching to understand its precise use.

The only thing known now is that it symbolizes reaching the pinnacle of Constellation.

From this perspective, there's no other regret left at the Constellation level, considering the Reincarnation Tree once directed him to the Yin-Yang Great Millstone, likely wishing for him to condense his own Body Flower.

Not seeing Yiyi upon coming here, and the matter of the Body Flower being half understood made Lu Ye slightly uneasy, "Elder, the soul jade's nearly depleted, could I..."

Xuyuan looked at him with surprise, "You've consumed 1,000 pieces of soul jade?"

Despite being equivalent to spirit jade, soul jade's importance as a resource for replenishing Soul Power far exceeds that of spirit jade.

Originally, Xuyuan provided Lu Ye with 1,000 pieces thinking it would last a very long time, and yet after a few months, it's nearly exhausted?

Xuyuan casually asked, unaware that he had inadvertently guessed correctly, as Lu Ye indeed consumed them.

"Almost used up." Though there were still three hundred pieces left, as a partial member of the Soul Race, it felt like a half home here—taking some resources seemed reasonable.

Given the abundant environment of the Soul Race ancestral land, Lu Ye thought soul jade shouldn't be scarce.

As if sensing his thoughts, Xuyuan explained, "Soul jade requires active measures from us to condense, unlike spirit jade which can naturally occur."

Thus, the reason why Xuyuan previously only provided 1,000 pieces was not due to the Soul Race being stingy, but because time was limited and only so much could be gathered.

Chapter 1693 - Return

The Soul Race lives in an environment like their ancestral land where soul jade is practically useless; if they wish to cultivate, they can do so directly on the Lotus Land.

Only when leaving the ancestral land does the Soul Race expend effort to condense some soul jade for future use.

Nevertheless, Lu Ye managed to obtain over two hundred pieces of soul jade from Xuyuan; these were remnants from Xuyuan's travels long ago, after many years.

Holding onto it serves no purpose, so he gave them to Lu Ye when requested.

Beside a stellar space pond, resembling an entire starry sky in miniature, an old man and a youth stood firm.

However, finding a path from this stellar space pond leading to the Nine Provinces is not easy, because Lu Ye cannot pinpoint the exact location of the Nine Provinces within the starry space!

Thus, he could only seek Xuyuan's assistance. Having presided over this site for years, Xuyuan's understanding of the stellar space pond, regularly delving into its study when he had spare time, naturally surpasses that of Lu Ye.

"Where to this time?"

"Jade Conch Galaxy," Lu Ye opens up, initially stating a general region; if the stellar space pond has a direct channel to Jade Conch, it would be ideal.

Xuyuan said: "Name a place with recognizable features; this galaxy you mention is entirely unfamiliar to me."

Among the myriad star systems in the cosmos, Xuyuan is not familiar with all of them, and to find a corresponding position in this stellar space pond for an unknown location is undoubtedly demanding too much.

"Then the Chaos Burst Zone?" Lu Ye opted for a secondary choice.

Xuyuan shook his head.

"Thousand Mounds Cemetery?" Lu Ye asked again.

If Xuyuan could help pinpoint any location, Lu Ye could deduce the position of Jade Conch and Nine Provinces based on this.

Unfortunately, even such a stellar marvel as the Thousand Mounds Cemetery was unfamiliar to Xuyuan.

"Indeterminate, Tranquil Moon, Beixuan, Daluo Star System?"

If these cannot be pinpointed, Lu Ye genuinely cannot ascertain how to locate the region corresponding to the Nine Provinces from the stellar space pond, since he is familiar only with this route.

Regarding developments from All Phenomena Ocean, they are unreliable because after crossing All Phenomena Ocean and passing through Changyun Galaxy, one must traverse an Insect Path that directly

leads into the Mist Dragon marvel with a discontinuity along the way, thus making positional deduction untenable.

Fortunately, this time Xuyuan finally nodded: "I know the Daluo Star System."

Lu Ye immediately relaxed.

Xuyuan's Mental Consciousness surged, commencing his busy work, quickly reaching a result: "Found it."

Upon hearing this, Lu Ye too released his Mental Consciousness, following Xuyuan's guidance to immerse his spirit into the stellar space pond.

"This position is near the Daluo Star System; the rest is up to you."

"No problem!" Lu Ye nodded affirmatively; once pinpointed to Daluo, extrapolating the direction of Jade Conch is not difficult.

Immersing his spirit in the stellar space pond, as if he truly arrived at the vast cosmos, Lu Ye, with his spirit traversing and flowing, soon found the projection of Indeterminate Star System within the pond, pressing on, with a thought, his spirit crossed the battlefield marking of past engagements with the Insect and Blood Races, then skimmed over Thousand Mounds Cemetery, traversing Chaos Burst Zone.

Pinpointing Jade Conch!

With a grand vision unfolded by his spirit, traversing the Jade Conch Galaxy, Lu Ye easily located the specific position of Qingli Dao World, indeed discovering the projection of Jade Conch World.

Speaking of which, Lu Ye hadn't really visited Jade Conch World; last time, planning to personally visit Jade Conch, events rushed, thus some matters were entrusted to Wu Zhuo to handle.

Quietly noting the specific positioning of Jade Conch World, Lu Ye began to seek traces of the Nine Provinces.

Finding it easily!

Because near the projection of the Nine Provinces within the stellar space pond, there prominently exists another distinct feature.

Blood Refinement World!

From the celestial space perspective, Blood Refinement World resembles the body shape of a decapitated, limb-severed, giantess, a projection still bearing the same resemblance, albeit scaled down countless times.

Thus, upon seeing this distinct projection concurrently, Lu Ye instantly understood that beside it must undoubtedly be the domain of the Nine Provinces!

Finding the projection of Nine Provinces within the stellar space pond makes subsequent affairs easier.

Simply searching for accessible channels nearby is all that is needed.

Moments later, Lu Ye locked onto a position.

"Elder, I'm off." Lu Ye turned to bid Xuyuan farewell, then, along the channel's position, dove headlong into the stellar space pond, disappearing from sight.

"Full of vigor and enthusiasm!" Xuyuan shook his head, feeling that young people truly love to stir things up, although reminiscing about his youth, he realized he wasn't much better back then either.

Time drifts away, never to return.

In Jade Conch Galaxy, somewhere within the starry space, a few star beasts were on the move; round and plump in form, resembling soccer balls, entirely in black and white, two large, three small, forming a neat queue, origins unknown, destinations uncertain.

This should be a family of five.

While diligently gliding through the stellar space, suddenly the void beside them contorted.

The five star beasts, previously serenely advancing, were startled, subsequently each one of them, color shifting, even their rotund form began warping.

In the blink of an eye, the five star beasts transformed into five meteorite-like objects, dispersing all around, with no sign of vitality, akin to genuine meteorites.

The void twisted more intensely, until suddenly, a figure emerged!

Lu Ye turned his head to look at the surrounding constellations, discovering they were unfamiliar...

Back when he first became a Constellation, although he had left the Nine Provinces to explore, he had ultimately only explored in one direction. If he was in that direction, he had markings along the way, but he knew nothing about other directions.

The stellar space pond over there shouldn't be wrong. He definitely had already arrived in the Jade Conch Galaxy, but as for how far it was from the Nine Provinces, that was unknown.

Lu Ye's gaze swept over the nearby five meteorites of varying sizes, initially not paying much attention. However, he quickly realized something was wrong.

These were not meteorites at all; these were clearly five star beasts!

If he wasn't mistaken, Starfall Beasts?

Understanding in his heart, Lu Ye did not expose their disguise. Starfall Beasts posed no harm and were naturally timid, regardless of how far they progressed in their cultivation. At the slightest disturbance, they would immediately disguise themselves as meteorites.

Coincidentally, their disguises were extremely skillful. Even star beasts surpassing them in strength by one level would find it difficult to notice, so Starfall Beasts often used this unique racial technique to avoid potential dangers.

He pretended not to see!

Lu Ye reached out and pressed his battlefield marking, calling out in his mind, "Number Nine, Number Nine!"

If this place was near the Nine Provinces, then he should be able to contact Number Nine and have it lead him.

Soon, there was a response from the marking, and Number Nine's voice was full of surprise and joy, "Lu Ye?"

"Haha, I'm back!" Lu Ye replied, feeling fortunate. It seemed that this position was really not far from the Nine Provinces; otherwise, it wouldn't have been so easy to contact Number Nine.

"You... how did you come back?" Number Nine still couldn't believe it.

"Is it unwelcome? Should I leave?" Lu Ye teased.

Number Nine quickly said, "Not at all! I'm just... I'm just very surprised. How did you come back so soon?"

When Lu Ye left last time, he said he was taking people to All Phenomena Ocean. It's only been a little over three years.

According to Number Nine's knowledge, just traveling one way to the All Phenomena Ocean would take three to four years, even if they rushed. A round trip would be about seven or eight years.

Lu Ye appearing near the Nine Provinces at this time was clearly abnormal!

Did something unexpected happen on the way? Number Nine couldn't help but overthink.

"It's a long story. I'll tell you later. First, guide me. I'm a bit unclear about the direction."

Number Nine then gave Lu Ye a direction.

Lu Ye then used his mind to communicate with Hua Qianying in the Flower World and asked her to open the portal of the Flower World to bring out Ma Shangsi, who had been placed inside.

"Saintly Venerable!" Ma Shangsi, who had been staying in the Flower World for several days, immediately saluted upon seeing Lu Ye.

"Go that way!" Lu Ye pointed in a direction for him.

"Yes!" Ma Shangsi responded, then summoned a starboat and flew Lu Ye forward.

Sitting atop the starboat, Lu Ye chatted leisurely with Number Nine. Soon, Number Nine learned why Lu Ye had returned so quickly. When he heard that the stellar space pond in the Soul Race ancestral land had such mystical capabilities, Number Nine was both shocked and delighted.

"Doesn't that mean you can come back anytime you want in the future?"

"It's not that simple. After all, the passage locations to and from the Soul Race ancestral land are fixed and relatively dispersed. But it's definitely not as difficult as it used to be."

Lu Ye thought to himself that if the Insect Path of Jade Conch stabilized in the future, it would be very convenient to travel between the All Phenomena Ocean and the home galaxy. However, without waiting for the Insect Path of Jade Conch to stabilize, they now had the stellar space pond in the Soul Race ancestral land as an aid.

Which method is more convenient is hard to say.

However, considering the uniqueness of the Soul Race ancestral land, this method is temporarily only available to him. He can't possibly lead a large group of people into the Soul Race ancestral land to use the stellar space pond as a transit.

He can use it because he's practically considered half a member of the Soul Race. Neither Xuyuan nor Hun Que sees him as an outsider.

But if he wants to secure some convenience for the Nine Provinces cultivators in this way, it's not quite suitable.

Not to mention whether the Soul Race would agree, he himself wouldn't feel right doing it.

"I brought you something good!"

"What good thing?" Number Nine's tone was full of anticipation.

"You'll know when you see it." Lu Ye said cryptically. The remnant of the domain was secondary and wouldn't bring much improvement to the Nine Provinces; it could really only be regarded as a snack for Number Nine.

But a divine object like the Flower World was a rare sight.

I believe Number Nine will be happy to accept the attachment of the Flower World, and likewise, the Flower Race shouldn't refuse such a large domain capable of rapid growth.

Currently, the Nine Provinces' foundation isn't strong, but its potential is unparalleled in the stellar space.

After all, ten thousand years ago, the Nine Provinces was a top-tier domain, and even though it's fallen now, it has the potential for revival.

Once at the Nine Provinces, it would be arranged for Hua Qianying to witness the magnificence of the Nine Provinces firsthand.

Engaging in small talk with Number Nine along the way, Lu Ye learned that the Nine Provinces was currently very peaceful.

And they had already established connections with Qingli Dao World and Jade Conch World, with occasional exchanges between cultivators.

In a star system with only these three large domains, natural interactions are necessary, especially since the cultivators from the three domains had already joined forces to venture into All Phenomena Ocean.

Chapter 1694 - Blood Ancestor

Everything in the Nine Provinces is getting on the right track, Lu Ye thought happily.

Who wouldn't want their homeland to get better and better? Especially when such changes happen through their own efforts.

It can be foreseen that with the growth of the Nine Provinces, many Moon Jade and even Sun Blaze will surely emerge in the future. By then, whether or not the Jade Conch World can retain the leading position in this star system is uncertain.

However, even if that time comes, it won't be easy to rename the Jade Conch Star System, because the name of the Nine Provinces cannot be casually exposed.

Number Nine chattered on endlessly with Lu Ye, talking about trivial matters within the Nine Provinces, such as which sect produced an outstanding genius or which Constellation made significant gains in stellar space...

Lu Ye knew it had been holding back for too long, and no one in the Nine Provinces knew of its existence. Sometimes, it couldn't even find someone to talk to.

It was rare for Lu Ye to return, and once it started talking, it couldn't stop.

Lu Ye, not at all impatient, listened while casually responding to Number Nine.

"Ah!" A sudden exclamation interrupted Lu Ye's lively chat with Number Nine.

Lu Ye looked up, discontentedly glancing at Ma Shangsi, who was steering the starboat, and scolded, "What's all the fuss about!?"

How can someone reach the Moon Jade Late Stage and still remain so undignified?

Ma Shangsi quickly turned around and respectfully said, "Forgive me, Saintly Venerable, I truly saw an incredible scene, and my spirit was shaken, unable to control myself!"

Lu Ye did not understand: "What is so incredible?"

Ma Shangsi excitedly raised his gaze, looking ahead: "The body of the Blood Ancestor, that is the body of the Blood Ancestor!"

Following his gaze, Lu Ye suddenly noticed that they were not far from the Nine Provinces, as the Blood Refinement World was already coming into view.

The speed of the Moon Jade Late Stage is indeed fast. Of course, it also had to do with the proximity of his return position to the Nine Provinces; in just a few days, they were already nearing the Nine Provinces.

As for the Blood Ancestor's body Ma Shangsi mentioned, it undoubtedly referred to the Blood Refinement World!

"Blood Ancestor?" Lu Ye's heart stirred, and he ordered, "Explain clearly!"

Ma Shangsi cautiously glanced at Lu Ye. After spending these days together, he now somewhat affirmed one thing.

The Saintly Venerable before him was the target of the Bounty Order issued by their clan, the Lu Yiye of Nine Heavens who once annihilated all Blood Race juniors in the Taichu Realm!

Honestly speaking, when he confirmed this, Ma Shangsi was almost collapsing, as he couldn't understand how such a powerful Saintly Venerable could indeed be Lu Yiye of Nine Heavens in person!

In his heart, there were many speculations, but he didn't dare to ask.

Until this moment, when Lu Ye inquired about the Blood Ancestor, Ma Shangsi finally summoned the courage and cautiously spoke, "May I ask the origin of the Saintly Venerable..."

He wanted to ask Lu Ye whether his origin was of the human race or the Blood Race, for if he were of the Blood Race, being a Moon Jade, there was no reason not to know about the Blood Ancestor's existence.

Words stuck in his throat; he dared not ask further, fearing an answer he did not wish to hear.

Even though he didn't ask, Lu Ye knew what he was thinking, merely smiling at him.

Ma Shangsi shivered and hurriedly explained, "The Blood Ancestor is the source of our Blood Race. It's said that the Blood Ancestor was born along with stellar space, and after a battle with an unknown powerful being, was dismembered and died. Currently, the strongest domains our Blood Race occupies are the remnants of the Blood Ancestor's body, yet the most important part has never been found."

Lu Ye understood: "The torso of the Blood Ancestor?"

"Exactly!" Ma Shangsi nodded, so he never imagined seeing the legendary object in such a place.

The massive body transforming into a domain across stellar space—despite the distance, Ma Shangsi could sense a trace of connection from his own bloodline.

So he could confirm that was indeed the torso of the Blood Ancestor!

Lu Ye showed a contemplative expression. Interestingly, the propagation of the Blood Race is not merely among their own kind. They can also use human women to incubate Blood Embryos.

Lann Qiyue was a victim of this matter.

This demonstrated that the Blood Race's bloodline inheritance is strong, not difficult to proliferate.

Lu Ye had once speculated that the Blood Refinement World was the body of a female powerhouse, yet did not know this strong being had such a prestigious origin.

The Blood Ancestor, born with stellar space, the source of the Blood Race!

What, indeed, could have slain such a powerful existence?

He couldn't help but recall, back then, when Yang Qing saw the Blood Refinement World in stellar space, he had said something. At the time, Yang Qing's eyes were full of eagerness, saying that if this thing were alive, battling it would be exhilarating...

"You said that the other domains formed by parts of the Blood Ancestor's body are now top-level domains?" Lu Ye asked.

Ma Shangsi nodded, "There are five domains in total, each a top-level domain with countless strong ones, and the Sacred Blood of our clan's Saintly Venerables mostly comes from these five great domains."

Upon saying this, Ma Shangsi suddenly realized why the Saintly Venerable before him had such rich and potent saintliness. A casually gifted drop of treasure blood was comparable to a drop of Sacred Blood.

With the Blood Ancestor's body here, Sacred Blood indeed wouldn't be hard to find.

Lu Ye appeared contemplative. Five domains, corresponding to the four limbs and head—exactly five.

But these five domains are all top-tier domains, the Blood Race is not just ordinarily rich!

So why is the Blood Refinement World, which the torso transformed into, so low in rank? When the Blood Refinement World attacked back then, it hadn't even upgraded to a large domain yet.

Back then, not to mention being a top-tier domain, even a single Constellation could have wiped out the Nine Provinces.

But it was precisely because it was only a low-tier domain that the Nine Provinces could annex it.

"What are you thinking about?" Lu Ye suddenly sensed that Ma Shangsi had some peculiar thoughts in his mind and quickly asked.

Ma Shangsi dared not hide anything and hurriedly said: "To the Saintly Venerable, I have seen ancient books left by my ancestors before, saying that if the body of the Blood Ancestor can be reassembled, the Blood Ancestor might have the possibility of resurrection!"

"!" Lu Ye was shocked.

Resurrection! This was not the first time he had heard of such a thing. Even when he refined the Sacred Blood and obtained the Blood Race's heritage, he knew that if the Blood Ancestor's heritage cultivation was pushed to the extreme, it could reach the level of Drop of Blood Rebirth.

Of course, Drop of Blood Rebirth seemed somewhat unreliable, but could resurrection really be impossible?

Even Ma Shangsi knew about this matter, so those strong ones among the Blood Race must also be aware.

The Blood Ancestor's body was divided into six parts, and right now the Blood Race occupied only five parts, with the remaining torso being on the Nine Provinces' side.

Doesn't this mean that if the news leaks out, the Blood Race will inevitably go to any lengths to seize the Blood Refinement World?

If the Blood Refinement World is taken away, it's not a big deal, but if the Blood Ancestor is truly resurrected, that would be disastrous.

Lu Ye couldn't imagine the strength of such an enormous being.

Currently, the Blood Race's situation in stellar space is not good, they're basically an enemy to everyone. If they get a chance, they will certainly want to revive the Blood Ancestor, then they'd have a strong backing.

Thoughts whirled in his mind, and Lu Ye knew that although the idea of the Blood Ancestor's revival sounded unreliable, if the Blood Ancestor learned that the Blood Refinement World was here, the Nine Provinces would surely face a catastrophe.

As for why the other five domains are top-tier while only the Blood Refinement World is a low-tier domain, Lu Ye couldn't figure it out, only vaguely sensing there might be some secrets.

"Saintly Venerable, please allow me to enter for cultivation, I feel that if I could cultivate in that place, perhaps..."

"Don't even think about it!" Lu Ye immediately rejected him.

Theoretically, he could control a Blood Servant's life and death, but if their power gap was too large, Lu Ye wasn't sure what the result would be.

Ma Shangsi at Peak Moon Jade, if he truly advanced to Sun Blaze, could he still fully control him? If not, with the current foundation of the Nine Provinces, they could not withstand it.

Lu Ye would never allow such a potential crisis to occur.

Of course, if he becomes stronger in the future, he might let Ma Shangsi try.

Having been mercilessly rejected by Lu Ye, Ma Shangsi's expression became a bit downcast, because he could feel that his opportunity to break through to Sun Blaze was in that domain formed by the Blood Ancestor's body.

But with the Saintly Venerable's refusal, he could only comply, not daring to resist, nor even harbor any dissatisfaction in his heart.

While speaking, they got ever closer to the Nine Provinces.

"Who goes there? Approaching the Nine Provinces' near-space, entry is forbidden!" a voice called from afar, and several figures emerged from nearby meteorites, encircling them.

These were the Constellations tasked with overseeing the near-space of the Nine Provinces.

Every large domain has such arrangements, mainly to defend against incoming meteors and potential star beast threats.

Most star beasts don't care about domains, but there are exceptions, just like the Great Lust Demon Spider Lu Ye encountered before; if such a creature invaded a domain, it'd spell disaster.

The starboats from the Nine Provinces were recognizable to them, so they wouldn't intercept their own people, but the starboat Ma Shangsi was piloting looked unfamiliar, so they naturally had to intervene.

Of course, as the Nine Provinces had established contact with the Qingli Dao World and the Jade Conch World in recent years, they assumed these might be guests from those worlds.

However, the closer they got, the more puzzled the Nine Provinces Constellations became.

Because the aura emanating from that starboat was clearly that of the Moon Jade!

The Nine Provinces had indeed established relations with the other two realms, but mostly at the Constellation level, and there had never been a Moon Jade arriving at the Nine Provinces.

In an instant, the Constellations from the Nine Provinces were uncertain about the visitor's origins and became secretly vigilant.

Just then, a familiar voice reached their ears: "Don't worry, it's me coming back!"

The Nine Provinces' Constellations were taken aback, and then realized, the leading one exclaimed incredulously: "Lu Yiye?"

Lu Ye had already stood up, revealing his figure.

Seeing him, it truly was Lu Yiye, and they all burst into smiles, quickly gathering around and landing on the starboat.

How could they not be happy! The last time Lu Ye left, he took three hundred people, saying they were headed to the most bustling All Phenomena Ocean in the starry sky. Too many had missed that opportunity, having to wait for next time, and now, just over three years later, Lu Ye had returned!

This immediately made them see an opportunity.

Chapter 1695 - The Flower Race's Inspection

Currently, there are many Constellations in the Nine Provinces, so naturally, Lu Ye couldn't know everyone.

However, because they had experienced the battle in the underground insect hive and the expedition to the Blood Refinement World together, even if they didn't know each other, they were all familiar faces.

These few Constellations are among those whom Lu Ye is not very familiar with.

Although Lu Ye doesn't know them, they know Lu Ye, and nowadays, regardless of their origins, the Constellations of the Nine Provinces get along very harmoniously.

After some chat with Lu Ye, a middle-aged Constellation from Dingzhou asked, "Lu Yiye, how many people are you planning to take to the All Phenomena Ocean this time?"

Everyone else looked at him eagerly, full of anticipation.

Lu Ye replied, "The All Phenomena Ocean has just started over there, and the situation hasn't stabilized yet. Let's wait until it stabilizes before making plans."

The group wasn't disappointed, knowing that it's not easy for a Jade Conch to establish footing in a place like the All Phenomena Ocean. It's only been a few years, so it's normal that the situation isn't stable. The speaking Constellation nodded and said, "Then if you choose people to go to the All Phenomena Ocean next time, you must let us know in advance so we can prepare early."

"Definitely!"

"You should go back now, us brothers still have to guard this place."

"Thank you for your hard work!"

The starboat swiftly headed towards the Nine Provinces.

Soon, all the Constellations in the Nine Provinces who could be contacted knew that Lu Ye was back again, each excited and expectant.

At this moment, Lu Ye had already returned to Mount Ao in Bingzhou.

Righteous Blood Sect is now already a 1st grade sect in the Nine Provinces. When Lu Ye first joined Righteous Blood Sect back then, the sect's station in the Spirit Stream battlefield was at the outermost circle. But nowadays, the sect's station has moved into the Core Circle, occupying the best spot, where nature's spiritual energy is extremely concentrated, allowing cultivators in the Spirit Stream Realm to cultivate and grow better.

Righteous Blood Sect has produced several Constellations, though they're all over at the All Phenomena Ocean now.

So currently, Righteous Blood Sect only has Divine Sea.

With Lu Ye's cultivation today, sneaking into Righteous Blood Sect unnoticed is naturally very easy, returning to his Emerald Bamboo Peak without alerting anyone.

"Set up a place to stay for yourself, don't wander around unnecessarily." Lu Ye instructed Ma Shangsi.

There are only a few bamboo houses here at Emerald Bamboo Peak, which are all residences of the few people closest to Lu Ye. Even though he hasn't returned for years, because the spirit mountaintop is always protected by a big array, there's no change.

Of course, Lu Ye couldn't let Ma Shangsi stay in those places. With his Moon Jade Late Stage ability, it's quite simple to set up a place to stay on his own.

Just as he finished the instruction, a white flash appeared beside him, and suddenly a snow-white bunny was there.

Ma Shangsi glanced at it in surprise, realizing that with his eyesight, he couldn't see how the bunny appeared, feeling amazed.

Immediately, he saw the Saintly Venerable walking over with a full smile, picking up the bunny, and rubbing it affectionately, as if they were very familiar with each other.

Ma Shangsi didn't take another look, turning around to get busy.

"How come you look like you've put on a lot of weight since we haven't seen each other for a while?" Lu Ye rubbed Number Nine, finding the touch quite nice.

Number Nine has always displayed itself in the form of a rabbit, though it's unclear why, but from this meeting, Lu Ye clearly felt it had gained weight.

It could be closely related to the growth of the Nine Provinces' foundation.

Since the Nine Provinces ascended to a large domain, these past few years, Number Nine has been controlling the Nine Provinces to absorb the foundation of the Blood Refinement World and the Unparalleled Continent, and coupled with the growth of the Nine Provinces itself, the Nine Provinces today, though still a large domain, is undoubtedly much stronger than when it first ascended.

"Stop it! It tickles..." Number Nine struggled, but couldn't escape Lu Ye's clutches.

After a playful moment, Lu Ye finally let it go, and Number Nine was huffing and puffing.

"I brought you something good." Lu Ye spoke, then took out a large piece of domain ruins that Ma Shangsi had previously bought from the marketplace.

Seeing it, Number Nine's eyes lit up, and with a wave of its rabbit paw, before Lu Ye could see clearly, that large piece of domain ruins disappeared, not knowing where it had been taken.

"It's rare that you still remember, I thought you'd forgotten." Number Nine squinted its eyes, obviously quite happy.

"Of course not, when I promise you something, I definitely remember." Lu Ye patted its small head, "But things like this are rare, hardly encountered in everyday situations."

Number Nine said, "It's enough that you have the thought. It must have been expensive to buy, you should keep the spirit jade for your own cultivation. You've only been a Constellation for a few years, it's a time you need spirit jade, next time don't buy..." As it spoke, Number Nine paused, suspiciously looking at Lu Ye and asked, "What is your cultivation level now?"

It had a vague sense that Lu Ye's cultivation seemed not so simple as a Constellation.

Lu Ye smiled upon hearing this and slightly stimulated his mana.

Number Nine had a shocked expression, "Moon Jade level?"

How long has it been, and he's already at Moon Jade level?

Though last time he returned, Lu Ye was already at Constellation Late Stage, advancing to Moon Jade from Constellation isn't simple. This is, after all, a major breakthrough across realm levels, and in the stellar space, countless Constellations are stuck at this stage, unable to progress, even remaining there for a lifetime.

It knew Lu Ye wouldn't be unable to advance to Moon Jade, yet didn't expect it to be this quick.

Lu Ye said, "Moon Jade sounds nice, but ultimately it's just mid-level power in the stellar space. There's still Sun Blaze above."

With his current strength, if he encounters Sun Blaze, there's indeed not much he can do in return.

The road of cultivation is long and requires double effort. If one day he becomes Sun Blaze, he will have the capital to overlook this piece of stellar space.

Lu Ye is confident that this won't be too far off.

"I have another good thing to give you." Lu Ye said mysteriously.

Number Nine became interested: "What is it?"

"Do you know the World King Flower?" Lu Ye asked.

Number Nine nodded its rabbit head: "The World King Flower is so famous, of course I know it." Although the era of the Nine Provinces has perished, many things from that time have been left behind. With Number Nine being born from the combination of Heaven and Earth's Will and an Artifact Spirit, it knows many common knowledge about stellar space.

Of course, its knowledge is scattered, not everything is known.

The World King Flower happens to be one of the things it knows.

"You found the World King Flower?" Number Nine asked excitedly.

Lu Ye smiled slightly: "I also brought it back!"

Number Nine was shocked!

After a long pause, it couldn't wait to say: "Since you've brought it back, quickly let it attach to the Nine Provinces. This will be immensely beneficial to both it and the Nine Provinces."

"That's what I thought, but whether or not the flower is willing is another question. You have to let it see the environment of the Nine Provinces to make its decision."

Lu Ye certainly wouldn't force someone against their will, nor would he expect gratitude for his efforts, but he believes that after Hua Qianying sees the environment of the Nine Provinces, she likely won't refuse to let the World King Flower attach itself to it.

Lu Ye briefly described the situation within the World King Flower and then reminded Number Nine: "I'll talk to the Clan Leader of the Flower Race; you don't need to say anything."

Number Nine jumped into Lu Ye's arms, burrowed into his clothes, exposing only its head, nodding obediently: "I know, I'm just a beast pet!"

Lu Ye chuckled, what kind of beast pet are you, looking so harmless to humans and animals?

Immersed in the Flower World, Lu Ye transmitted audio to Hua Qianying: "Fellow Daoist, we have arrived at my homeland. Would you like to come out and see?"

Hua Qianying immediately replied: "Then I'll have to trouble you."

She was also looking forward to it.

After all, the domain that the World King Flower had attached to once shattered; without an attachment, the Flower World could not grow, and they certainly couldn't stay in Lu Ye's Divine Sea forever. Not to mention whether Lu Ye could bear it, it's also not beneficial for the Flower World.

Moreover, if the Flower World cannot grow, then the Flower Race born from the Flower World cannot grow either.

Therefore, looking for a new domain to attach to is a task that must be undertaken next.

Lu Ye saved them and also rescued the entire Flower World. According to him, his homeland had just upgraded to a domain not long ago, apparently the best candidate for the World King Flower to attach to.

So Hua Qianying did not reject this proposal.

At the last retreat, even if Lu Ye's homeland was a top-level domain, given the previous great favor, if Lu Ye wanted to let the World King Flower attach itself, Hua Qianying wouldn't refuse.

Attaching the World King Flower to a top-level domain isn't entirely without benefits, it's just the top-level domain's growth rate is very slow, the Flower World cannot quickly gain feedback; the benefits would be smaller.

Under their combined effort, the portal of the Flower World revealed, Hua Qianying stepped out.

She slightly sensed the situation here in the Nine Provinces and was a bit puzzled: "Fellow Daoist, how long has your domain been upgraded to a large domain?"

Lu Ye calculated and said: "About fourteen years."

After finishing the sentence, Lu Ye froze for a moment. Has it been fourteen years already! Thinking back, the Nine Provinces army marched on the Blood Refinement World for a bloody battle with the Blood Race, reminiscing about those days vividly.

At that time, he seemed to be just Divine Sea Level 6 back then.

Time really flies.

The higher the cultivation, the less you feel time passing by; no wonder some cultivators retreat for decades...

Lu Ye, being someone who retreats very little, since his cultivation efficiency is high, he doesn't really need to retreat.

"Are you sure, Fellow Daoist?" Hua Qianying frowned slightly.

"Of course not wrong; what's the problem?" Lu Ye asked.

Hua Qianying hesitated for a moment before speaking: "Your homeland, though indeed a large domain, seems more like one that has been upgraded for hundreds of years, even longer!"

There is no such sediment in a domain upgraded for just a dozen years.

Lu Ye immediately realized, Hua Qianying obviously thought he was deceiving her, and he smiled: "Is it this? I'll take Fellow Daoist around, and you'll understand the situation."

"Then I'll have to trouble you!" Although she has decided to let the Flower World attach to Lu Ye's homeland, knowing more about this domain doesn't hurt.

Moreover, from the current situation, this domain is indeed a suitable attachment for the World King Flower.

At that moment, Lu Ye took Hua Qianying around the Nine Provinces. After leaving Mount Ao, neither of them hid their aura, naturally, many Constellations detected them, and since news already spread when Lu Ye returned, several Constellations approached for a few words while Lu Ye was showing Hua Qianying around.

Chapter 1696 - Flower World's Attachment

Just for getting familiar faces and besides, Lu Ye's contributions to the development of Nine Provinces are indelible, all these Constellations remember his kindness.

Seeing a beautiful girl accompanying Lu Ye, the Constellations all understood without saying.

Lu Yiye is young and promising, with a great future ahead. It's quite normal for him to bring back a girl from outside, nothing to delve into.

After accompanying Lu Ye for half a day and touring most of Nine Provinces, Hua Qianying spoke, "Now I believe what you said, Fellow Daoist."

Indeed, this is a domain that has just been promoted not long ago.

Because all the Constellations they encountered along the way were at the Constellation Early Stage!

This undoubtedly fits the profile of a domain that has been upgraded only for a dozen years.

However, Lu Ye's cultivation at Moon Jade does appear abnormal, but he had mentioned this to Hua Qianying before.

"But... why is this?" Hua Qianying was puzzled. In her perception, the foundation of Nine Provinces was quite good, which couldn't simply belong to a domain that had been promoted for only fourteen years.

"Fellow Daoist, follow me." Lu Ye said and soared into the sky.

Moments later, Hua Qianying stood in stellar space, looking back in shock at the direction of Nine Provinces. What shocked her was not only the Blood Refinement World beside Nine Provinces but also the mysterious link between the two domains.

"Your domain... is devouring the foundation of that other domain?" Hua Qianying asked, shocked.

Lu Ye nodded, "That is the Blood Refinement World, inhabited by the Blood Race. It drifted here from stellar space a dozen years ago, and a war broke out between the two domains. Eventually, we won, exterminated the Blood Race of the Blood Refinement World, and then kept the Blood Refinement World."

Hua Qianying didn't understand.

According to Lu Ye, a dozen years ago, his homeland was merely a low-level domain, which means that the highest cultivation of cultivators was only Divine Sea.

How could such a group of cultivators possibly defeat the enemy of another domain and retain the enemy's domain as the capital for enhancing their own?

Though she didn't understand, the facts were right in front of her.

What made her feel more inspired was that Lu Ye's homeland wasn't just a newly promoted large domain; it was also a domain capable of rapid growth!

A domain possessing the ability to devour the foundation of other domains to strengthen itself is extremely rare in the stellar space.

Hua Qianying could almost foresee that in the future stellar space, this domain before her would surely stand atop the stellar space in the shortest time and become one of those top-level domains!

This kind of domain is precisely what the World King Flower longs to attach itself to.

Turning her head, Hua Qianying looked at Lu Ye with bright eyes, "Fellow Daoist, please ensure the World King Flower attaches here!"

Such a golden opportunity, if missed, might never be encountered again.

If the World King Flower can rapidly grow, then the cultivation of their Flower Race will also rise correspondingly, unlike the relationship between Nine Provinces and the human race.

The power of the Flower Race is directly related to the foundation of the Flower World, unlike the human side of Nine Provinces, where once reaching Constellation and entering stellar space, as long as the aptitude is sufficient and there are cultivation resources, cultivation could continue to elevate, even if Nine Provinces remains merely a large domain in the future, Lu Ye and others still have the hope of advancing to Sun Blaze.

The Flower Race cannot do the same; for the Flower Race to advance to Sun Blaze, the Flower World must upgrade to a top-level domain.

Of course, gains come with losses; the cultivation of the Flower Race is not as arduous as the human race, could be said that once the Flower World becomes a top-level domain, then cultivating to Sun Blaze for the Flower Race would almost have no bottlenecks, just needing enough accumulation would suffice.

"This is indeed my wish!" Lu Ye smiled.

The matter of the World King Flower attaching to Nine Provinces, it's settled!

This is definitely a win-win situation.

As for the renown of Nine Provinces being exposed to the Flower Race in the future, it's insignificant, because the Flower Race itself does not dare to reveal its presence casually in stellar space, and once Flower World integrates with Nine Provinces, then the relationship becomes a shared life and death bond.

"Yet how to accomplish this?" Lu Ye inquired, it was Hua Qianying who guided the collection of the World King Flower, so now letting the World King Flower attach to Nine Provinces, she should guide again.

Hua Qianying then spoke with Lu Ye for a while.

Lu Ye understood, and returned to Mount Ao with her.

In the next instant, all the Constellations and even Divine Seas remaining in Nine Provinces heard a voice by their ears, "I am Lu Yiye of Bingzhou Righteous Blood Sect, half a day later, a divine object will be placed into Nine Provinces, there may be anomalies, each to appease your disciples, soothe mortals in your territories, do not panic!"

One by one, the Constellations and numerous Divine Seas all raised their heads, gazing in the direction of Mount Ao in Bingzhou.

Nowadays, Lu Ye's name is well-known throughout Nine Provinces, even those Spirit Stream cultivators who just entered the cultivation world are rarely without hearing it.

Everyone knows that he is a legend, the guide of Nine Provinces at present.

Last time he returned, he brought a group to the All Phenomena Ocean, and this time he is going to place some kind of divine object. Even the many Constellations couldn't help but be curious, wondering what this could be, to be called a divine object by Lu Ye.

But soon, they knew, because with a loud buzz, a fresh floral fragrance seemed to permeate everywhere, and then an incredible scene appeared in the vision of everyone across the Nine Provinces.

A flower that appeared like an illusion materialized out of thin air, then rapidly expanded, expanded, until it blocked out the sky and covered the earth, enveloping the entire Nine Provinces.

The vast land of the Nine Provinces, watched by billions of eyes. No one knew what this thing was. If Lu Ye hadn't given them advance notice, many disturbances would surely occur. But since he did, naturally each sect would dispatch their cultivators to help calm those uninformed mortals.

At this moment, if one were to look from the stellar space, a gigantic flower has appeared at the location of the Nine Provinces, with the Nine Provinces at the very center of this flower, like a Bright Pearl, dazzling and eye-catching.

This grand spectacle came quickly and disappeared swiftly; in just tens of breaths, the gigantic flower shadow vanished suddenly.

The Divine Sea cultivators and those below them didn't notice anything, but the Constellations clearly felt that the Nine Provinces seemed to have undergone some kind of mysterious change. However, where exactly this change occurred, no one could say.

Now it seems that probably only Lu Ye, the initiator, knows the situation of that flower shadow, but no one went to ask proactively because everyone knew that whatever Lu Ye did was for the good of the Nine Provinces. Whatever they need to know, they will naturally find out in due course.

On Mount Ao, Lu Ye's face was a bit pale, and Hua Qianying didn't fare much better, almost exhausted, and not just her, all of the Flower Race in the Flower World felt the same.

Placing the World King Flower into the Nine Provinces sounds simple, and the process wasn't eventful, but it's not as easy as it looks on the surface.

However, despite the enormous expenditure, Lu Ye felt significantly relieved.

After all, the World King Flower had been continuously consuming his Soul Power; now he was freed, just like a burden that had been weighing heavily on him was lifted, he naturally felt much lighter.

"From now on, we are family. Fellow Daoist, if you need anything, just let me know," Lu Ye said.

Hua Qianying smiled in response, "I certainly won't be courteous to you, Fellow Daoist. I'll go check the Flower World; it feels a bit turbulent inside, being placed for the first time."

With that, Hua Qianying opened the portal to the Flower World and plunged inside.

Lu Ye thought for a moment and felt he should let the Constellations of the Nine Provinces know about the Flower World. After all, from now on, we will be living in the same place, and there will surely be much interaction between us.

He has to make a trip to the Governor's Hall of Tianzhou.

Thinking about this, Lu Ye suddenly felt like something was missing. He looked down and saw that Number Nine, who had been burrowing into his arms, disappeared somewhere, and Lu Ye didn't even notice when it vanished.

"Number Nine?" Lu Ye called out.

The next moment, Number Nine's voice echoed in his mind, "Busy with something, I'll tell you later."

Lu Ye was bewildered.

What could this little guy be up to that seemed so urgent, and why did it sound a bit enthusiastic?

Lu Ye vaguely felt that Number Nine might be involved in something related to the Flower World, otherwise, it wouldn't be such a coincidence.

Not probing deeply, he thought once Number Nine finishes, he would naturally find out.

He turned his gaze toward the outside of Emerald Bamboo Peak.

At this moment, two figures came from the bottom of the mountain, standing firm before the big array of Emerald Bamboo Peak.

Both seemed not too old, one slightly older, around thirty or forty, and the other younger, looking only about twenty.

However, their cultivation wasn't bad. Both were in the Divine Sea, with the older one being at Divine Sea Level 7 and the younger at Divine Sea Level 5.

The younger Divine Sea seemed rather nervous, looking around, anxious, and speaking in a low voice, "Sect Leader, I need to pee."

The man referred to as the Sect Leader turned his head to look at him, "You've already become the Deputy Sect Leader, why are you still so jittery with your words."

The young man pulled a face, "I didn't want to be the Deputy Sect Leader, you all forced me into this position, should I resign now?"

"A sect's deputy leader, is it something you can just quit?" the Sect Leader reprimanded.

The young man sighed, "But I'm nervous now. Can I at least go for a pee first?"

The Sect Leader comforted him, "Don't be afraid, your senior brother won't eat people, and you admire your senior brother the most anyway. You always shout about setting him as your goal, how come you shrink now that you're meeting him in person? Besides, you've met him before."

The young man was a bit downcast, "I've only met him once, and I was young then, still just a Spirit Stream, I didn't know anything, and ignorance is fearless."

"You're not that old now either. Pull yourself together and stand tall! You're considered the sect's most outstanding rising star. Your senior brother went through so many hardships but still led the sect to today's heights, and your cultivation environment now is much better than back then. If you don't perform well, see how I'll deal with you later!"

"Who's being dealt with?" A voice suddenly rang out, followed by the array opening in front, revealing Lu Ye's figure, looking at the two newcomers with a smile.

Chapter 1697 - Two Problems

On Emerald Bamboo Peak, the two people who arrived looked at the suddenly appearing Lu Ye, and immediately straightened their expressions, quickly bowing: "Greetings, Senior Brother!"

Lu Ye nodded slightly, looking at the older man, his thoughts drifting away.

On the Spirit Stream battlefield, he was hunted by a fellow named Dong Shuye, separated from Amber, grievously injured and near death, drifting downstream, picked up by Ruan Lingyu, and saved by Hua Ci, just barely maintaining his life.

That was his first meeting with Hua Ci and others, although it was more than twenty years ago, the events of the past remain vivid in his mind.

Who could have imagined that the young man besieged on all sides, hunted everywhere on the Spirit Stream battlefield, would turn into the guide of all Nine Provinces today?

Kong Niu! The once clumsy man following Hua Ci around like a guard has also transformed into the sect master of Bingzhou's Righteous Blood Sect.

Kong Niu's aptitude was actually not good. Under the old environment of Nine Provinces, with his aptitude, it would have been impossible for him to cultivate to the Divine Sea.

At most, reaching True Lake.

But as Nine Provinces advanced to a large domain, its foundation gradually strengthened, and the overall cultivation environment became much better than before.

This has made cultivation for the current cultivators of Nine Provinces much simpler and easier compared to Lu Ye's growth period.

Righteous Blood Sect has been the best-developed sect in Nine Provinces over the years. Although Kong Niu's aptitude is poor, his foundation is solid. The change in the environment, the improved cultivation conditions, and the abundant cultivation resources have allowed him to transform and advance to the Divine Sea.

Several Constellations of the Righteous Blood Sect have left Nine Provinces and gone to the All Phenomena Ocean. The last time they left, the sect master had already passed down the position of Sect Leader.

Looking at today's Righteous Blood Sect, Kong Niu is one of the oldest disciples and has a steady temperament, making him naturally fit for the position of Sect Leader.

Lu Ye's impression of Kong Niu was always that of taciturn, but twenty years have passed, and even the most taciturn person has moments of enlightenment.

Nowadays, Kong Niu has the demeanor of a leader, with his youthful taciturn nature settled into a steady calm.

Being at Divine Sea Level 7, his cultivation is indeed not very high, but it allows him to hold the Sect Leader position for a few more years. Otherwise, upon advancing to Constellation, he would have to travel everywhere, even if not going to the All Phenomena Ocean, he'd often have to enter stellar space.

Lu Ye then looked at the young man beside Kong Niu, and smiled slightly: "Thang Jian!"

Thang Jian was taken aback: "Senior Brother knows me?"

Lu Ye certainly knew him. He had noticed this rising star from the sect headquarters years ago, back when Thang Jian was only in Spirit Stream, but already showing much promise.

When returning this time, Number Nine also mentioned Thang Jian to him. For other sects, Number Nine didn't pay much attention; to it, all sects were the same, except for Righteous Blood Sect, Lu Ye's origin, which it paid extra attention to. Of course, only attention, not much care.

As the most outstanding disciple after Lu Ye in the Righteous Blood Sect, Thang Jian naturally came into Number Nine's consideration.

According to Number Nine, Lu Ye's achievements today were largely attributed to the Talent Tree, but Thang Jian relied entirely on his own skills and talent.

By comparison, without the Talent Tree, Thang Jian's potential would be much stronger than Lu Ye's.

On the Spirit Stream battlefield, he even earned a nickname of "Little Yiye"...

The current core circle outpost of the Righteous Blood Sect on the Spirit Stream battlefield was originally captured by Thang Jian and a group of disciples under his lead!

Thang Jian had only seen Lu Ye once in his youth, so he never imagined that this legendary senior brother would recognize him, even though he is now in the Divine Sea, he couldn't help but feel thrilled.

"Come in and talk," Lu Ye warmly invited.

Kong Niu then led Thang Jian into Emerald Bamboo Peak.

Inside the bamboo building, the three senior and junior brothers sat down, and Ma Shangsi, who was called over by Lu Ye, attended to them diligently, serving tea and pouring water, making Kong Niu and Thang Jian feel ill at ease.

Although the two couldn't quite gauge Ma Shangsi's depth, they had seen many Constellations.

The feeling Ma Shangsi gave them was absolutely incomparable to those Constellations in Nine Provinces; even if he hadn't exerted any power or prestige, the foundation of Peak Moon Jade was undeniably evident.

After conversing for a day, Kong Niu finally left with Thang Jian. Kong Niu wasn't too affected, but when leaving, Thang Jian's eyes clearly shone, filled with longing for the stars and celestial sea.

Lu Ye actually didn't talk much with them, only about some common knowledge in stellar space, and didn't even guide them in their cultivation.

Cultivation is something that can't be guided by others; everyone has their own cultivation path. If the aptitude is sufficient and the realization comes, the path will naturally be smooth; if not, external force, no matter how strong, is useless.

Additionally, he informed them of the existence of the Flower World. In the future, neither the Flower Race nor the Wood Spirit and Spore Race can remain hidden in the Flower World. They will certainly be moving around Nine Provinces frequently, and Lu Ye's idea is that Righteous Blood Sect can try to make contact with the Flower Race. If they can attract a few Flower Race members, it would be ideal. The Flower Race may not be outstanding in the Combat Path, but they are excellent at refining elixir pills.

Moreover, in cultivating spirit flowers and rare herbs, there is no race better than the Flower Race, even in stellar space.

The Flower Race members in the Flower World are not many. If the Righteous Blood Sect can recruit a few in advance, it would be beneficial for the sect's future development.

Although Lu Ye could easily accomplish this task by simply greeting Hua Qianying, if he did so, it would feel like leveraging gratitude for personal gain, which is not what Lu Ye desires. He wishes to see the Flower Race and the human race of the Nine Provinces coexist in harmony, helping each other mutually.

After Kong Niu and Thang Jian departed, Lu Ye's Mental Consciousness subtly moved, swiftly extending outward. With his current cultivation, he could cover the entire Nine Provinces with a single thought.

In Tianzhou, within the Nine Provinces Governor's Palace, the current Governor, Zhang Yuan, was in secluded cultivation.

Being a Governor sounds prestigious, but in reality, it is an unwanted duty among the Nine Provinces Constellations, because once someone becomes the Nine Provinces Governor, they must stay at the Governor's Hall for years, responsible for gathering all sorts of information brought back by the Constellations from the outside, and relaying necessary information when needed.

It's essentially a permanent bind to this place.

The first Governor of the Nine Provinces was Jian Guhong, the second was Lu Ye, and the third was Feng Wujiang; all three voluntarily stayed at the Governor's Hall.

As for the ones after them... they were chosen by drawing lots.

Nobody wants to be the Governor, tied to this place, everyone desires to enter the stellar space, but the Governor's Hall cannot be left unoccupied, so they draw lots, changing once a year.

Zhang Yuan was unlucky, he drew the lot a few months ago and had to remain here begrudgingly. Fortunately, cultivation resources were abundant because a significant amount of spirit jade was stored within the Governor's Hall, which the stationed Governor is qualified to use.

The governor has basically no tasks, generally only refining spirit jade for cultivation.

Suddenly, a Mental Consciousness spread over, Zhang Yuan opened his eyes immediately and asked vigilantly, "Who?"

However, soon his expression turned solemn.

In just a moment, streams of information started flowing outward from the Governor's Hall, gradually letting the Nine Provinces Constellations understand the nature of the previous anomaly.

The Flower Race, Flower World, Wood Spirit Race, Spore Race... streams of information previously untouched began circulating within the Constellation level.

The message, naturally sent out by Lu Ye, was transmitted from the Governor's Hall to the Constellation level. The Flower World is now affiliated with the Nine Provinces, and how the Constellations of the Nine Provinces engage with the three races from the Flower World in the future is no longer Lu Ye's concern. Nevertheless, they have to be informed of the existence of these three races to make preparations.

Otherwise, if creatures like the Wood Spirit or Spore Race suddenly appeared in the Nine Provinces without any preparation, it might cause a commotion.

At Emerald Bamboo Peak, Lu Ye retracted his Mental Consciousness, contemplated for a moment, then drew the Boulder Mountain Saber from its sheath and placed it horizontally across his knee, examining it closely.

These days he has been maintaining the spirit runes on the blade and continuously channeling mana into it.

However, today he discovered two issues!

The first is that this accumulation... has a limit.

This secret technique inherited from Wang Xiu is ultimately a fierce burst of power from a single strike; because the burst follows a long period of accumulation, the unleashed power is very potent.

Theoretically speaking, the longer the accumulation, the stronger the burst.

But in reality, this accumulation has limitations.

The limitation is not on the Boulder Mountain Saber itself; the saber, crafted from barghests, is incredibly sturdy and can completely handle such accumulation, far from reaching its limit.

The root of the problem lies in the spirit runes!

The spirit runes have a limit; every time mana circulates through them, it equates to one Circumambulation, slightly increasing the power accumulated within the runes...

But when this accumulated power reaches its limit, the runes start showing signs of being unable to endure.

Currently, Lu Ye's accumulation has reached the limit, and he can only maintain the existence of the spirit runes and the power already accumulated, unable to accumulate more power; otherwise, the runes would collapse!

If the power-carrying runes were gone, there would be no talk of any burst.

If this were all, it would be fine, but the second issue is one Lu Ye cannot ignore.

Because the spirit runes were constructed within the blade, this leads to a problem: if he encounters an enemy, the first strike he swings, whether he intends to or not, will unleash the accumulated power.

This is not what Lu Ye wants.

Some enemies can be defeated with a casual strike; such bursting techniques are unnecessary. The concern is that after the burst is used, if a real formidable foe appears, there will be no bursting techniques left...

It's no wonder Wang Xiu inscribed the spirit runes onto the sword sheath; now, it seems it's not just the inability to construct spirit runes as freely as this, but there was also a deeper consideration.

For if the spirit runes are inscribed onto the sword sheath, the burst can be deployed depending on the needs during combat.

Thus, solving this issue is simple for Lu Ye: like Wang Xiu, craft a good sword sheath and inscribe the spirit runes within it.

In this way, he could be at ease as well, without having to continuously maintain the presence of spirit runes, simply injecting mana into it.

Chapter 1698 - Upheaval in the Flower World

But this matter couldn't be settled in the Nine Provinces. Although the Nine Provinces had been promoted to a large domain for over a decade, the nurturing of many materials was not something that could show results in a short time, and Lu Ye couldn't find suitable materials to craft a sword sheath.

Perhaps... he could check out the Jade Conch World?

The Jade Conch World, although not a top-tier domain, is after all an old-established large domain. The variety of materials nurtured within its domain couldn't be compared with what the Nine Provinces currently could offer.

If the Nine Provinces was like a newly cultivated barren field, then the Jade Conch was a fertile field that had been cultivated for many years. The things grown in the fields were different.

Moreover, Lu Ye happened to have the thought of visiting the Jade Conch World.

When he returned last time, he wanted to visit the Jade Conch, but at that time, he was not influential enough, so it was better to have Wu Zhuo make the trip.

Now that he had been promoted to Moon Jade, in a sense, the Nine Provinces already had the qualifications to stand on equal footing with the Qingli Dao World and Jade Conch.

Furthermore, over at All Phenomena Ocean, the Three Worlds cultivators coexist harmoniously, developing together, and the momentum was good. Lu Ye thought it was time to visit the leader of the home galaxy.

Taking advantage of the fortunate return from this trip, Lu Ye planned to bring some people to All Phenomena Ocean to strengthen its power.

Three Worlds Island is vast, with the Nine Provinces having three hundred, while Jade Conch and Qingli Dao World each have one hundred, totaling five hundred people to maintain such a large territory.

The Small Constellation Palace has been functioning, and now Three Worlds Island is at least on the level of a mid-class Spirit Island, and will eventually become a high-class Spirit Island. Taking people there early can also help consolidate Three Worlds Island's defensive strength early on.

Though the Merfolk Race is the most reliable ally over on Three Worlds Island, in any situation, one cannot always rely entirely on others. In this vast cultivation world, self-reliance is the true strength.

Determined in his heart, he planned to set off for the Jade Conch World once matters on this side were settled.

The Qingli Dao World could also be visited, to inform Wu Zhuo about the situation on Three Worlds Island, lest they become worried in the home world.

Without further considering this matter, Lu Ye stored away the Boulder Mountain Saber, and then took out another item.

White Moon Crystal!

This item is used to enhance the quality of the Magic Source, improving the efficiency of a cultivator's cultivation.

Normally, a newly promoted Moon Jade wouldn't need such a thing, as the newly formed Magic Source of each Moon Jade could generally meet their own cultivation needs; only after some progress is made in strength would there be a need to enhance the quality of the Magic Source.

But Lu Ye is different, if he didn't have the Talent Tree and relied solely on refining spirit jade to cultivate, his current Magic Source would be more than enough.

However, when he cultivates, he mostly relies on the Talent Tree, and the efficiency of refining spirit jade is unmatched by ordinary cultivators.

Once the spirit jade is refined, converting into spirit force within the body, the Magic Source must promptly convert it into mana, and if the Magic Source's quality isn't high, it naturally couldn't keep up with the demands of cultivation.

There are many things in the stellar space that can enhance the quality of the Magic Source, and the White Moon Crystal is just one of them. In terms of quality, it's not the best, but certainly not bad, considering it's priced at millions of spirit jade, the price speaks for itself.

Refining this object is also simple, just like refining spirit jade.

Lu Ye sat upright, holding the White Moon Crystal in one hand, and started to refine it carefully.

Soon he noticed a warm cool sensation flowing through his body, which was the Mysterious Power contained within the White Moon Crystal, remarkably different in essence from spirit force.

The warm cool Mysterious Power flowed into the Magic Source, like a drop of water into the sea, soon melding with the Magic Source, or rather being absorbed by it.

During this process, the Magic Source underwent a faint transformation.

The external manifestation of Lu Ye's Magic Source was a small cluster of flame, and when this small flame's form altered, it signified a breakthrough in his cultivation.

The enhancement of the Magic Source's quality, in contrast, wouldn't alter the flame's form, but as the White Moon Crystal was refined, the flame noticeably grew brighter.

Several days later, the Mysterious Power within the White Moon Crystal was fully consumed, leaving a useless stone.

Lu Ye examined himself, noticing his Magic Source was visibly brighter than before. With some anticipation, he took out some spirit jade to trigger the Talent Tree for refinement.

While quietly sensing, he discovered that with the current Magic Source, the efficiency in converting mana was indeed slightly faster than before, though not by much, perhaps only by a tenth, still far from meeting his needs.

But this was, after all, a good beginning.

From this point of view, he would still have to search for more things to enhance the quality of the Magic Source. Only when the efficiency of his Magic Source in converting mana could match his own cultivation, would he achieve Perfection.

However, Lu Ye felt that with the terrifying power of the Talent Tree, even if he upgraded the Magic Source to the highest quality, it might still not be enough.

After quietly cultivating for several days, one day, while in the midst of cultivation, Lu Ye suddenly sensed some unusual disturbance outside and quickly moved out.

Raising his eyes, he saw a portal open, and Hua Qianying emerged from it.

From the day she settled into the Flower World, Hua Qianying had returned there, and had not shown up these days, as she said the Flower World was turbulent when it was settled, requiring her to return to handle it.

Lu Ye didn't disturb her.

Now that she appeared, everything seemed to be settled.

However, Lu Ye observed her expression, and she seemed somewhat anxious?

"What's going on?" Lu Ye asked with concern.

Hua Qianying indeed seemed anxious, but it was a sort of bewildered anxiety. She did not exchange pleasantries with Lu Ye and said directly, "Fellow Daoist, please accompany me to the Flower World."

Lu Ye immediately sensed that something major must have happened in the Flower World. He straightened his expression and stepped forward.

Soon, he followed Hua Qianying and entered the Flower World.

Looking around, the Flower World remained as beautiful as ever, like a fairyland, with a myriad of colors competing in splendor.

The domain was peaceful and harmonious, and in the vast realm, there were only over two hundred beings living within. Looking outside, many rare and precious flowers and plants could be found everywhere here.

Lu Ye was somewhat puzzled. The Flower World... doesn't seem to have any issues?

He turned to look at Hua Qianying beside him, showing an inquisitive expression.

Hua Qianying said, "Fellow Daoist, do you not sense any difference in the Flower World compared to before?"

Lu Ye carefully sensed again and slowly shook his head, "I don't notice anything."

Hua Qianying explained, "Indeed, since you are not native to this world, it is indeed difficult to sense anything."

"What exactly happened?"

Hua Qianying looked at him, "The Flower World... has birthed consciousness!"

Lu Ye was taken aback for a moment, even more confused, "Isn't this a good thing?"

Theoretically, any domain could potentially give birth to its own Heaven and Earth's Will. Of course, depending on the domain, the Heaven and Earth's Will could vary greatly.

The vast majority of domains give rise to consciousnesses that are just dim-witted, lacking any thinking logic. It acts more like a rule of the domain, unconsciously maintaining the domain's operations. Such Heaven and Earth's Will are undoubtedly the lowest level.

A very small portion of domains, though still dim-witted, have reached a certain degree of thought, like the Blood Refinement World in the past. The consciousness of such domains is very repulsive to outsiders. Once noticed, it would descend with repulsive forces, such as heavenly thunder and the like.

The situation in the Nine Provinces is quite special. Number Nine is a combination of the Heaven and Earth's Will of the Nine Provinces and the Artifact Spirit of the Heaven's Augury Compass. Although it often behaves like a child in front of Lu Ye, it is undoubtedly the most advanced Heaven and Earth's Will.

It should be noted that before Lu Ye, it quietly guarded the Nine Provinces for thousands of years. Without its covert protection and concealment, the existence of the Nine Provinces would have long entered the vision of the Qingli Dao World or Jade Conch World.

"It is a good thing," Hua Qianying nodded.

As a being born from within the Flower World, the Flower Race can clearly sense the changes within. A few days ago, the Flower World suddenly gave birth to its own Heaven and Earth's Will, which indeed

surprised Hua Qianying because once the Flower World has consciousness, it gives a gigantic boost to the entire domain's development.

Especially since the Flower World is now attached to a domain like the Nine Provinces.

What puzzled her was that shortly after the birth of the Heaven and Earth's Will in the Flower World, she could no longer sense it, as if at a certain moment, the Heaven and Earth's Will of the Flower World suddenly disappeared into thin air!

This made Hua Qianying very anxious. If the Flower World hadn't birthed a Heaven and Earth's Will, then there would be no change, and it would remain as it was before.

But now that a Heaven and Earth's Will has emerged, only to mysteriously disappear, Hua Qianying isn't sure what this signifies.

Concerning the entire Flower World, Hua Qianying researched for several days without any leads and could only come to Lu Ye for help.

In her thoughts, Lu Ye has been mingling in the All Phenomena Ocean and now in the Moon Jade, well-traveled and knowledgeable, perhaps he might know something.

How could Lu Ye know anything? He hadn't even detected any differences in the Flower World compared to before.

Thinking for a moment, he asked, "Fellow Daoist, do you feel there is anything amiss in the Flower World now?"

Hua Qianying shook her head, "No abnormalities discovered so far."

Indeed, in just a few days of being attached to the Nine Provinces, the Flower World has already benefited. In the past, the Flower World was attached to a very low-level domain, unable to gain any benefits from it. But now, it's different. The Flower World and the Nine Provinces complement each other and can grow rapidly, with promising prospects.

But currently, the problem with the Heaven and Earth's Will makes Hua Qianying very anxious.

"If there are no issues, why not wait and see? Perhaps the Heaven and Earth's Will of the Flower World has fallen into slumber? Just like how newborn babies are drowsy." Lu Ye suggested casually.

"Is that so..." Hua Qianying pondered, although she felt there was something not quite right about what Lu Ye said, there's no real solution at hand. This isn't something that can be resolved by her being anxious.

"Moreover, I see you can still open the domain, which shows that there's no issue with the Flower World. If something uncontrollable really happened in this domain, you probably wouldn't be able to open the domain portal so easily."

"It makes sense!" Hua Qianying thought Lu Ye's words were reasonable. She could still freely open the portal to the Flower World, and her connection with the Flower World hadn't weakened; she just couldn't sense the Heaven and Earth's Will of the Flower World.

Perhaps, as Lu Ye said, the newly born Heaven and Earth's Will is fragile and in slumber.

If that's the case, then all she needs to do is wait.

Chapter 1699 - You're Kidnapping Her

After calming Hua Qianying, Lu Ye returned to Emerald Bamboo Peak. He planned to cultivate here for a while to consolidate his cultivation.

The previous breakthrough was an advancement to a major realm, and Lu Ye hadn't had the time to cultivate with a calm mind, so consolidating his cultivation couldn't be neglected.

He had spirit jades in hand, and with hundreds of thousands of spirit crystals, it was more than enough to consolidate his cultivation.

In the following period, everything went smoothly. Lu Ye consumed as many as 300,000 spirit jades, which finally stabilized Moon Jade's realm.

He didn't continue cultivating; if he really wanted to cultivate, returning to the All Phenomena Ocean was the best choice. For him, relying on spirit jade wasn't very efficient for cultivation.

He planned to set off for the Jade Conch World to meet with the Moon Jades from the Jade Conch and discuss bringing some people to the All Phenomena Ocean—a task better done sooner rather than later.

However, if he really did this, it would take several years on the road. After all, he could save a lot of time by passing through the Soul Race's ancestral land alone, but it wouldn't work with bringing a large group of constellations.

So Lu Ye was somewhat hesitant, unsure if he should do it.

For now, he didn't need to worry about anything in the Nine Provinces. The Flower World had submitted, adding Mu He and Black Umbrella, two Moon Jades; the Nine Provinces' protective power had significantly improved compared to before.

Ma Shangsi must not remain here. Without Lu Ye watching over, who knows what inappropriate thoughts the Blood Race might have in this faraway place?

"Number Nine!" Lu Ye gently called out. Before leaving, he needed to check in with Number Nine.

But oddly enough, ever since Number Nine suddenly left last time, it hadn't come to see him, and Lu Ye had no idea what Number Nine was busy with.

Number Nine wasn't like this before.

The Void in front twisted, and a rabbit-shaped Number Nine suddenly appeared: "Here."

"What are you busy with?" Lu Ye asked casually.

"Hehe..." Number Nine laughed in a strange way, "Nothing, not busy with anything."

Lu Ye looked at it in confusion, feeling that something was off about Number Nine.

Just then, behind Number Nine's little head, another smaller head suddenly appeared, with a small flower-shaped hat on top.

She had fair skin, sculpted exquisiteness, a face with well-defined features, and large black eyes brimming with curiosity and innocence, gazing timidly at Lu Ye.

Two small hands grasped Number Nine's rabbit ears, her body hidden behind Number Nine's head, making it hard to see her clearly.

Lu Ye was momentarily stunned.

After a moment of eye contact, Lu Ye asked in confusion, "What is this?"

He truly hadn't seen a creature like this before, and even more strangely, he couldn't sense any life aura from her.

Number Nine's expression was evidently a bit awkward as it explained to Lu Ye, "My new friend, Flower Girl!"

A new friend? Lu Ye was puzzled, Number Nine actually made a friend?

In the Nine Provinces' millennia of guarding, only Lu Ye himself and the City Lord of Xianyuan City knew of Number Nine's existence; even someone like Feng Wujiang only had suspicions without truly seeing Number Nine.

This Number Nine, how did it make a new friend in the Nine Provinces? Lu Ye couldn't even tell what species this Flower Girl was.

"Flower Girl, this is Lu Ye, the one I told you about. Don't be afraid; he's a good person." Number Nine said to Flower Girl.

Only then did Flower Girl stand up straight.

Even standing straight, she was only a few inches tall; she was clearly hiding behind Number Nine's head moments ago.

Flower Girl wore a small flower-shaped hat on her head and a little green dress on her body. However, instead of calling it a small dress, it was more like a combination of leaves, yet it looked seamless and fitting, even outlining Flower Girl's slender waist.

"Ah..." Flower Girl made a sound, seeming not to be able to speak well.

However, Lu Ye felt she was greeting him, so he nodded at her.

Lu Ye, full of curiosity, was about to ask Number Nine where it made this new friend when suddenly he froze, carefully looking at Flower Girl, then at Number Nine...

His gaze shifted back and forth several times between Flower Girl and Number Nine, and Lu Ye's eyelids twitched.

Forcing a smile, trying to seem harmless, Lu Ye said, "Flower Girl, I need to discuss something with Number Nine, why don't you play over there for a bit."

Flower Girl tilted her head, looking at Lu Ye with an innocent, bewildered gaze.

Number Nine shook its body and said, "Wait for me on the side."

Only then did Flower Girl obediently climb down from Number Nine, struggling in the process, and even fell when landing, making Lu Ye's eyelids twitch.

Once Flower Girl was down, Lu Ye picked up Number Nine and turned into the bamboo house.

"What's up, what's up?" Number Nine, seeing Lu Ye behaving sneakily as if doing something shady, was also a bit bewildered.

Lu Ye squatted down, looking at it seriously: "Be honest, where did this new friend of yours come from?"

Number Nine's eyes darted around, "Found it."

"Nonsense!" Lu Ye raised his hand, poking at its head, "Do you really think I can't tell? Flower Girl has a similar aura to yours!"

At first, Lu Ye truly couldn't tell the difference and was guessing what species Flower Girl was. His experiences were not shallow, yet he had never seen a species like Flower Girl.

Until he suddenly perceived a similar aura on Flower Girl as he did with Number Nine...

"Hehe..." Number Nine chuckled awkwardly, "You've already figured it out, so why ask?"

"Is it true?" Lu Ye was taken aback. Even though he had some suspicions, he still found it hard to believe when Number Nine admitted, "Flower Girl... is the Heaven and Earth's Will of the Flower World?"

"Yep, that's right!" Number Nine admitted cheerfully.

Lu Ye was deeply shaken, momentarily at a loss for words.

The truth was revealed.

A few days ago, Hua Qianying had asked him about the Heaven and Earth's Will of the Flower World, saying she couldn't feel its presence anymore. Lu Ye had assumed that the Heaven and Earth's Will of the Flower World had just come into being and was likely dormant, so Hua Qianying couldn't sense it.

But in reality, it wasn't like that at all!

The Flower World not only birthed a Heaven and Earth's Will, but just like Number Nine, it gave birth to an extremely advanced Heaven and Earth's Will, even capable of manifesting a form.

With Number Nine keeping Flower Girl by her side, it's no wonder Hua Qianying couldn't feel it in the Flower World!

"You're kidnapping, you know?" Lu Ye looked at Number Nine, speechless, "This child has just been born, and you've already taken her away from home. How can you do this? Her parents are worried!"

Number Nine said defensively, "No way, Flower Girl was born with my help, so she's very close to me. I plan to send her back to the Flower World after a while."

Lu Ye side-eyed Number Nine, "How long is 'after a while'?"

"Uh... Well..." Number Nine stammered.

"Ah!" Lu Ye sighed, reluctant to reprimand Number Nine too harshly. Number Nine had always been alone until he appeared, and finally had someone to talk to. But since he left the Nine Provinces, Number Nine became lonely again.

Now there's a Flower Girl, who, in essence, is the same kind of being as Number Nine. The World King Flower depends on the Nine Provinces, creating a natural affinity between them.

To an entity that's been solitary for tens of thousands of years, the sudden appearance of such a companion is naturally cherished.

Recently, Lu Ye hadn't seen Number Nine around, thinking it was staying away so as not to disturb his cultivation.

It turns out it found a new friend.

The kind that forgets old for new!

"What do you mean you helped with Flower Girl's birth?" Lu Ye asked again.

Number Nine quickly explained.

The World King Flower placed itself within the Nine Provinces, relying on it. During their integration, the World King Flower undoubtedly gained some benefits, which facilitated the birth of the Flower World's Heaven and Earth's Will.

If there wasn't any external interference, then the Heaven and Earth's Will born in the Flower World would just be the most basic form, lacking its own thoughts and unable to manifest a form.

But when the Flower World's Heaven and Earth's Will was about to be born, Number Nine sensed it and secretly gave it a push. With that push, Flower Girl was born.

Throughout this process, Number Nine exerted significant effort, which also caused considerable depletion to the Nine Provinces' foundations.

So, Flower Girl's birth wasn't an inevitable result but largely credited to Number Nine's efforts.

Thus, after her birth, Flower Girl naturally felt very close to Number Nine, and the two Heaven and Earth's Wills have been inseparable lately.

The snacks Lu Ye brought back for Number Nine had been given to Flower Girl.

After hearing this, Lu Ye couldn't help but smile broadly, inexplicably feeling like his mischievous little boy brought home a beautiful lady from outside.

Though a bit apologetic to the girl's side, the deed is done...

That said...

"Number Nine, are you male or female?" Saying this, Lu Ye attempted to inspect.

Number Nine evaded awkwardly, embarrassed, "I'm a combination of Heaven and Earth's Will and Artifact Spirit. I don't have a gender."

True... Whether Number Nine or Flower Girl, they are not normal living beings, so there wouldn't be any gender distinction. Though Flower Girl appears as a young girl, that's merely an external representation.

"There's no need to be sneaky, you could've just told me directly." Lu Ye continued.

The birth of Flower Girl is not a bad thing, and Hua Qianying would surely be pleased to hear about it. Unable to sense the Flower World's Heaven and Earth's Will, she must have been quite anxious lately.

"I wasn't being sneaky..." Number Nine still insisted.

"Let's consider this resolved. Even though you brought the child away right after birth, now it's time to return her."

Number Nine seemed a bit unwilling.

"Fool!" Lu Ye chuckled as he patted its head, "With the Flower World relying on the Nine Provinces, you and Flower Girl can meet whenever you want. The Flower Race can't stop you. What are you worried about? There isn't another Heaven and Earth's Will to compete and snatch her away."

"What snatching... away..." Number Nine argued vehemently, its bunny face flushed red.

Lu Ye laughed heartily.

That's good too. While he's out, he has always been concerned about Number Nine. Now that there's a Flower Girl, little Number Nine won't be lonely anymore.

Chapter 1700 - The Flower Girl's Gift

In the Flower World, Number Nine quietly lay down nearby, while the Little Flower Girl sat on its back as Lu Ye had just seen, clutching its rabbit ears with her two small hands, timidly surveying the surroundings.

Lu Ye stood by, conversing closely with Hua Qianying, while the towering Mu He and Black Umbrella watched Number Nine and the Little Flower Girl with great interest...

"That's the situation." Lu Ye's expression was helpless, "I just found out today, Fellow Daoist Hua, I apologize for causing trouble for you."

As Lu Ye spoke, Hua Qianying's eyes never left the Little Flower Girl, they sparkled with light. She quickly replied, "Fellow Daoist, you exaggerate. Previously, you were unaware of the matter, and moreover... the birth of the Flower Girl was greatly aided by the celestial will of your domain. In fact, this is the Flower Girl's opportunity, also a boon for our Flower Race, we should be thanking you deeply."

The most supreme celestial will!

Glancing across the entire stellar space, there were not many, yet two appeared right before her eyes, one of which belonged to the Flower World. Hua Qianying's emotions surged, increasingly feeling it was a wise decision to let the World King Flower reside on the side of the Nine Provinces.

She bent down, extending her hand toward the Little Flower Girl, gently calling, "Flower Girl..."

The Little Flower Girl still appeared timid, cautiously looking at her, yet showed no sign of responding, instead clutching the rabbit ears even tighter with her two small hands.

Lu Ye clearly felt Number Nine was somewhat smug, instinctively kicked it.

Only now did Number Nine shake its body, instructing, "Go on, it's alright."

The Little Flower Girl released the rabbit ears, lifted her little skirt with both hands, and stepped onto Hua Qianying's hand.

Yet Hua Qianying did not feel joy, rather a bit of sorrow...

The celestial will of her own domain did not draw close to her, but obeyed the celestial will of another's domain, what logic is there in that.

But no matter, the birth of the Flower Girl, such celestial will in the Flower World is a tremendous blessing. Hua Qianying could already foresee the promising future of the Flower World.

"You all chat, I'll take my leave first." Saying this, Lu Ye picked up Number Nine and returned to the Nine Provinces through the portal.

In the bamboo building, Lu Ye looked at Number Nine and said, "I need to visit the Jade Conch, take care of things in the Nine Provinces, don't just focus on the Little Flower Girl!"

Number Nine drooped its rabbit ears, listlessly saying, "Understood."

It was much like a young couple forcefully separated...

Lu Ye chuckled, "The days are long, why rush? Besides, the Flower Girl is so small, raise her a bit, as long as the Nine Provinces and the Flower World stay together, you will never be apart."

The rabbit ears perked back up, Number Nine was reinvigorated, "You're right!"

Lu Ye ruffled its head, inevitably lost in thought, should he bring people to the All Phenomena Ocean again? With the previous experience, this journey would certainly be simpler, and now his cultivation had reached the Moon Jade stage, better equipped to handle dangers.

Needless to say, crossing the geomagnetic turbulence zone would surely be less risky than the last time.

But the journey could take several years, a bit of a time drain.

After long contemplation, Lu Ye decided to bring people along!

Last time he took others to the All Phenomena Ocean, the constellations remaining in the Nine Provinces eagerly awaited his return, it would be unjustified to not take some people along.

A few years is just the time, it could be well spent cultivating during the journey.

Determined, Lu Ye expanded his Mental Consciousness, sent a message to the Governor's Hall.

Quickly, Governor Zhang Yuan began operations, messages spread in all directions.

In just a few days, the three hundred constellations were selected, gathered at the Governor's Hall, waiting eagerly.

Last time, three hundred people from the Nine Provinces went, this time Lu Ye decided to still take three hundred.

As for how many people Qingli Dao World and the Jade Conch would send, Lu Ye couldn't manage, it depended on Wu Zhuo and the Moon Jade of the Jade Conch to arrange.

Of course, too many people wouldn't work, though Three Worlds Island is large, it has its limits. Moreover, Three Worlds Island was just starting, financial resources were limited, if too many went, the demands for cultivation would increase.

With everything ready, Lu Ye was about to set off for the Governor's Hall, when Number Nine suddenly approached.

"Lu Ye, Lu Ye, are you leaving?" Naturally, Number Nine was aware of the recent happenings in the Nine Provinces.

"Yes, take good care of the Nine Provinces." Lu Ye nodded.

When he left last time, he was somewhat worried about Number Nine, but now there's no need, with the Flower Girl around, Number Nine will never be lonely.

Number Nine said, "Wait, come with me to the Flower World."

"What's the matter?"

"You'll find out when you get there." As Number Nine finished speaking, a portal appeared before them, clearly opened by the Flower Girl, Number Nine went in first.

Lu Ye followed closely.

In the Flower World, as Lu Ye appeared, Hua Qianying promptly approached, with the Little Flower Girl sitting on her shoulder, swinging her small legs leisurely.

After these days of interaction, the Flower Girl was somewhat familiarized with Hua Qianying, moreover, Hua Qianying was the first creature born from this Flower World, they naturally had a sense of closeness beforehand.

After greeting Hua Qianying, Hua Qianying asked, "What are you doing?"

Lu Ye shook his head. "Number Nine called me over."

Hua Qianying said, "Flower Girl called me over."

The two exchanged glances, both unsure of what the two little creatures were up to.

Number Nine leaped up and, like Flower Girl, sat on Lu Ye's shoulder and spoke, "Flower Girl wants to give you a gift."

Lu Ye was surprised, "Flower Girl is giving me a gift?" This is definitely worth anticipating.

Number Nine looked at Flower Girl, "Let's begin!"

Flower Girl floated lightly from Hua Qianying's shoulder, circled around Lu Ye, then landed next to his hanging arm and gave a gentle "ah."

"Roll up your sleeves," Number Nine said, conveying Flower Girl's intention.

Lu Ye chuckled and rolled up his sleeves, curious to see what kind of gift Little Flower Girl intended to give him.

As he watched, Flower Girl raised her two small hands and pressed them against Lu Ye's arm. The next moment, green light burst from Flower Girl's body, and the Flower World shook!

Hua Qianying's face changed and she immediately sensed the Flower World's resources were being consumed frantically.

"Ah!" Little Flower Girl called out again, and the tremor in Flower World intensified.

Lu Ye's expression became solemn. When Number Nine mentioned Flower Girl was giving him a gift, he hadn't thought much of it. Even though Flower Girl was the embodiment of the will of Heaven and Earth in Flower World, it was ultimately just a large domain, so he assumed what Flower Girl was offering wouldn't be too valuable.

But now, this situation made him realize that this gift might be extraordinary.

As Flower World shook and consumed vast resources, Lu Ye clearly felt something new appear on his arm.

He carefully sensed it, and his expression brightened!

A moment later, Flower Girl breathlessly flew back to Hua Qianying, who held her in her palm. Her small face was pale, appearing heavily exhausted.

Although Hua Qianying knew the tremendous consumption was the reason, and Flower Girl was actually fine, she couldn't help but be worried.

But the next instant, Flower World shook again, and Hua Qianying was astonished to notice the resources consumed were quickly replenished.

She quickly looked towards Number Nine, and sure enough, saw Number Nine closing her eyes with a mysterious power fluctuating around her.

Obviously, Number Nine was using the resources of the Nine Provinces to compensate for Flower World's losses.

As such, although the resources of the Nine Provinces would be consumed, replenishing them would be far simpler than for Flower World.

Lu Ye was currently examining his arm, which now bore a tattoo of a flower. The flower's shape looked exactly like the World King Flower.

Upon closer inspection, the tattoo contained a distinct space inside.

Miniature world!

Lu Ye immediately understood what this tattoo was—it was actually a miniature world.

When he initially accepted Flower World, the World King Flower was carried on the seven-color Divine Lotus. In that state, Flower World was considered a miniature world because even someone like Ma Shangsi, at Moon Jade Late Stage, could be accommodated inside.

Of course, comparatively, this miniature world he now possessed could only be considered a Small Flower World, which was nowhere near the scale of the real Flower World.

Lu Ye quickly noticed this Small Flower World could accommodate many people, though the exact number was not fixed but depended on cultivation. The higher the cultivation, the fewer people it could accommodate, and vice versa. How many it could actually accommodate would need to be tested.

Number Nine had just asked if he was leaving Nine Provinces, and now offered such a huge gift, showing this was meticulously planned.

Lu Ye truly didn't know Flower Girl had such ability, and judging by Hua Qianying's expression, she was clearly unaware too.

But Number Nine had been with Flower Girl recently, so her understanding of Flower Girl was unsurpassed.

Lu Ye realized that though the gift was from Flower Girl, there was undoubtedly influence from Number Nine behind the scenes.

Such a grand gift came at the perfect time.

With this miniature world, he could completely gather the Constellations of Nine Provinces inside, and then head to the Soul Race ancestral land en route to All Phenomena Ocean, saving a vast amount of time.

"Is Flower Girl okay?" Lu Ye asked, looking at Hua Qianying.

Hua Qianying shook her head, "There's no major risk, and the consumed resources of Flower World have been replenished."

"That's good," Lu Ye nodded, relieved that Flower World wouldn't suffer any loss due to this gift. However, Number Nine's actions were indeed reliable.

"Fellow Daoist Hua, I'm planning to return to All Phenomena Ocean. Do you want to come along?" Lu Ye asked. If Hua Qianying accompanied him to All Phenomena Ocean, there would be more options regarding Alchemy. Currently, Three Worlds Island only produced Treasure Body Pills and psyche refinement pills, using the pill gourd. But cultivators need more types of elixir pills than those two.

Additionally, the elixir pills made by the pill gourd are ultimately limited in number—both sold to the Merfolk Race and used for his own people's cultivation. For now, they are sufficient, but if he takes more people to Three Worlds Island, it may not be enough.

If Hua Qianying could go, she could certainly help Three Worlds Island cultivate a large group of outstanding Alchemists, beneficial for the future.
