

Humanity 1731

Chapter 1731 - Torment

In the stellar space, Chu Zhu and Zhou Chuang walked side by side, chatting and laughing, flying towards the direction of the All Phenomena Ocean.

At a certain moment, he suddenly turned his head to the side, seeing two figures flying towards them.

Initially, Chu Zhu didn't pay much attention, as such encounters were quite common in the All Phenomena Galaxy, just as he had previously stumbled upon Zhou Chuang.

But soon he sensed something was off, because these two were charging straight towards him, which was clearly abnormal.

Chu Zhu quickly exerted his ocular power, wanting to see the faces of the opposite party. But just at that moment, mana surged beside him. When he suddenly turned his head, he saw Zhou Chuang, who was previously chatting and laughing with him, unexpectedly strike a palm towards him, with mana surging and spells roaring from the center of his palm.

Chu Zhu was quick-witted and instantly realized that his encounter with Zhou Chuang had been a trap; this guy was in cahoots with the newcomers, deliberately approaching him, doubtlessly harboring sinister intentions.

He was somewhat bewildered as to exactly where he had offended Zhou Chuang to provoke such a vicious attack.

No time to think further, Chu Zhu quickly deployed a protective magic treasure. Although he hurriedly blocked Zhou Chuang's sneak attack, he was rather flustered and angrily shouted, "Zhou Chuang, you scoundrel, I see you don't want Sifang Island anymore!"

This was clearly a threat; Sifang Island hasn't been established for long, and regardless of how intricately the protective big array is configured, without sufficient accumulation, it can't be too strong. If Baiyue Island were determined to attack, Sifang Island would surely face dire consequences.

Chu Zhu had no idea whom he had offended, and could only try to intimidate Zhou Chuang somewhat, causing him to hesitate.

To his surprise, Zhou Chuang was completely unmoved, and after gaining the advantage of a sneak attack, he unleashed spell after spell madly, leaving Chu Zhu only able to defend.

Both had cultivation in Late Stage Moon Jade; one was caught completely off guard, while the other had plotted cunningly, causing Chu Zhu to suffer greatly.

But even with such a sneak attack, Zhou Chuang would never be able to kill Chu Zhu. If they were to duel, once Chu Zhu regained his composure, it would surely be a fierce battle.

However, Lu Ye and his servant were already closing in.

Chu Zhu finally saw their faces clearly.

"It's you!" Chu Zhu was shocked; he had just been puzzled about whom he had offended, and now realized that his current predicament was orchestrated by Three Worlds Island in the shadows!

He had encountered Ma Shangsi and Lu Ye before, for during the previous operation, he and Junior Brother Wang had teamed up to ambush Tang Jun. In the end, Tang Jun survived thanks to the protection of the red talisman, Lu Ye arrived and killed Junior Brother Wang, while he was held up by Ma Shangsi and couldn't offer assistance. Upon realizing Junior Brother Wang was dead, he immediately fled.

But... it makes no sense. They operated swiftly last time and didn't leave any traces. Moreover, they hadn't heard a word of trouble; how had Three Worlds Island pinpointed them?

These past two months had been peaceful and smooth; they assumed Three Worlds Island knew nothing about Baiyue's actions. But now it seems, they've known all along that Baiyue was acting in secret.

It's Zhou Chuang!

Three Worlds Island has ties with Sifang Island, and Zhou Chuang recognizes them, so Three Worlds Island had already pinpointed Baiyue two months ago. These days there hasn't been any activity, merely to lull their side into complacency.

This time, the assignment to leave the island and go to the Yiyuan World gave the opponents an opportunity.

In an instant, Chu Zhu understood the matter and realized he was in a troubling situation.

Ma Shangsi had already lunged forward, enveloping Zhou Chuang and Chu Zhu, who were entangled in fierce combat, within the Blood Sea.

Chu Zhu, though alarmed, kept his cool, for he had previously escaped from Ma Shangsi's Blood Sea. So during the struggles with Zhou Chuang, he pushed his mana to vibrate in all directions, attempting to replicate those earlier tactics.

But to his surprise, this Blood Sea was different from the last time, thicker and steadier... he couldn't break free from its restraints at the moment.

In terms of cultivation alone, Ma Shangsi surpassed Chu Zhu slightly; Peak Moon Jade, though still within the Late Stage levels, was nearing the pinnacle of Sun Blaze.

Previously, Chu Zhu managed to escape mainly due to Ma Shangsi's circumstances; Lu Ye had forced Ma Shangsi to detonate his treasure blood to trigger the Blood Escape Technique, which consumed greatly in a short period, depleting vital energy and unable to exert full power, giving Chu Zhu a chance.

This time was different; Ma Shangsi had no consumption, and Zhou Chuang alone was enough to hinder him. With both teaming up, Chu Zhu's escape from the Blood Sea was essentially impossible.

Three Moon Jade combatants were entangled fiercely within the Blood Sea, mana resonating incessantly, with the Blood Sea raging and boiling.

Chu Zhu knew this time odds were against him, feeling deeply resentful yet helpless.

Suddenly, he deployed his strongest protective magic treasure, guarding his body, then swiftly took out his audio talisman!

Not to seek reinforcement; contacting Baiyue Island now would be too late. He was taking out the audio talisman to relay the information here to Baiyue Island, so Yu Huan and others could be on guard.

Upon seeing the talisman in his hand, Zhou Chuang immediately grasped his intent and shouted, "Not good, stop him quickly!"

He too feared today's events being exposed; Sifang Island not being far from Baiyue Island, if today's events were leaked, the future for Sifang Island wouldn't be favorable.

As his words fell, Zhou Chuang's heart suddenly tightened, for nearby a fearsome aura erupted instantly, causing even someone with his Late Stage Moon Jade level to feel chilled to the bone.

Sure, here is the translated text:

```html

Immediately, amidst the boundless sea of blood, a bright saber light flashed by. This flash of saber light seemed as if it could split the entire Blood Sea in two, even severing Zhou Chuang's view.

When he regained his senses, he heard Chu Zhu's muffled groan, and upon raising his eyes, he was shocked, for the protective magic treasure that Chu Zhu had just summoned was shattered, and even the arm holding the audio talisman was severed.

The severed arm, wrapped in the whirlpool of the Blood Sea, quickly drifted far away, vanishing without a trace.

Zhou Chuang suddenly turned his head and saw Lu Ye, who had been standing quietly on the side since the great battle began, without making a sound. At this moment, the long saber on Lu Ye's waist was already unsheathed, held in his right hand, slanted.

Zhou Chuang's eyelid twitched...

It was certain that the saber strike just now was Lu Ye's handiwork.

But... for someone at the Early Stage of Moon Jade to break the protective magic treasure of a Late Stage Moon Jade with one slash, and sever an arm, is such a thing really possible?

He had felt the power of that protective magic treasure, and even he couldn't break it in a short time. How did Lu Ye do it?

If this saber were to slash his way without any defense, would he still be alive?

Lu Ye should have only recently advanced to Moon Jade, how could he possess such powerful strength? But soon, Zhou Chuang realized that the saber strike should be a secret technique, a technique that exerted extreme burden on oneself, as Lu Ye's right hand holding the saber was trembling at the moment.

Yet even so, it gave Zhou Chuang an unspeakable shock.

The power of the Drawn Saber Slash was indeed formidable. This was Lu Ye's third time executing the Drawn Saber Slash, but even with the experience from the previous two times, he still couldn't perfectly control this strike.

Simply put, once this saber was slashed, he couldn't control it anymore. Whether it directly killed Chu Zhu, or severed his arm, was up to luck.

Fortunately, this time luck was on their side, Chu Zhu didn't die, only the arm holding the audio talisman was severed, preventing him from sending messages out.

With just the power of the Drawn Saber Slash alone, it may not have reached this level, because before Lu Ye slashed, Chu Zhu had already activated the power of the protective magic treasure.

But with the Boulder Mountain Saber, the protective magic treasure was hard to withstand.

When the Boulder Mountain Saber reached the magic treasure level, it had one power of the barghest, injuries caused by this saber would be entwined by the barghest's power, making them difficult to heal.

Upon advancing to the magic treasure, the Boulder Mountain Saber gained another trait, which was its destructive power against protective magic treasures, especially significant.

With such a saber strike, the current outcome was achieved.

Chu Zhu roared in pain, face pale, yet still resisting continuously.

Lu Ye slightly calmed the surging blood Qi within him, wielding his saber and charging forward, while transmitting audio, "Fellow Daoist Zhou, retreat!"

Hearing this, Zhou Chuang immediately withdrew from the battlefield, allowing Lu Ye to take the lead and attack.

Given the current situation, Chu Zhu was completely subdued and couldn't make much of a splash. Moreover, Lu Ye's displayed strength was too terrifying, so Zhou Chuang naturally wasn't worried about any incidents befalling him.

He originally thought Lu Ye intended to personally slay Chu Zhu to vent his anger.

But soon he realized something was amiss, because in the subsequent battle, not only did he not intervene, but even Ma Shangsi didn't intervene, merely maintaining the Blood Sea, creating a combat environment favorable for Lu Ye.

Moreover, Lu Ye showed no intention of swiftly killing Chu Zhu. Instead, he continuously tormented him, dashing around, causing some non-lethal wounds each time.

Chu Zhu was tough and resilient; for many timid cultivators, facing such a situation would inevitably lead to begging for mercy, but he didn't. Instead, he could only curse, shouting that a warrior could be killed but not humiliated, and so on.

Lu Ye's expression was indifferent, unaffected, seemingly determined to torture Chu Zhu to death bit by bit.

Even Zhou Chuang, watching the scene, felt somewhat unbearable, but he didn't persuade him. Baiyue Island intended to attack Three Worlds Island, and Lu Ye and Chu Zhu were enemies. No matter how cruel the means were against an enemy, it was not excessive.

However, observing Lu Ye's demeanor, it didn't seem like he was deliberately tormenting him, so for a moment, Zhou Chuang couldn't figure out what Lu Ye was doing.

For a full hour, Chu Zhu's body was almost devoid of intact spots, and he became extremely weak.

A Late Stage Moon Jade ideally shouldn't be in such a situation, but the wounds caused by the Boulder Mountain Saber couldn't heal, and coupled with Ma Shangsi occasionally activating the Blood Attraction Technique... Not dying was already a testament to his strong vitality, but at this moment, saying he was better off dead was not an exaggeration.

Lu Ye withdrew his attack, slowly walking up to Chu Zhu, gazing at him with calm eyes, and threatened, "Don't worry, I won't kill you just yet. I will take you to Baiyue Island later, and outside the island, I will carve you up into a thousand pieces, so Yu Huan and the others know the consequences of offending my Three Worlds Island!"

Chapter 1732: Soul Battle – Trapping the Dog with the Door Shut

In the Blood Sea, listening to Lu Ye's venomous words, Zhou Chuang's eye twitched uncontrollably.

If he were in the same situation, captured alive by the enemy, then taken to Sifang Island to be sliced to pieces in front of many cultivators from the home galaxy, it would be better to just die here.

He hadn't noticed this ruthless side of Lu Ye before and couldn't help but lament how hard it is to fathom people's hearts. This also indirectly confirmed that Baiyue Island's sneak attack on Tang Jun had really angered Lu Ye.

With Lu Ye's words having come to an end, Chu Zhu's originally dim eyes suddenly surged with boundless fury, followed by a radiant divine light as trembling Divine Soul Power poured forth.

Feeling the fluctuation of the opponent's Divine Soul Power, Lu Ye's lips curled into a smile, as he immediately opened up his own psyche.

"Be careful, Fellow Daoist Lu!" Zhou Chuang exclaimed in shock.

He had just seen Lu Ye approaching Chu Zhu without any defense, and it didn't feel right. Because no matter what, Chu Zhu was still in the Moon Jade Late Stage; what if he had a sudden outburst when facing death? The most taboo thing when fighting an enemy is being careless before everything is settled, and many have suffered due to this.

Now it seemed that his worries had come true!

Chu Zhu's trembled Divine Soul Power undoubtedly signaled that he had initiated a soul battle against Lu Ye!

There was no denying it. Through previous observations, Lu Ye's physical strength was very strong, far exceeding typical Moon Jade Early Stage, but that was just physical prowess. As a Moon Jade Early Stage, how high could his psyche cultivation be? Surely it wouldn't match up with Chu Zhu.

If Chu Zhu initiated a soul battle like this, and Lu Ye couldn't resist, the consequences would be unimaginable.

Zhou Chuang felt speechless and thought to himself that Lu Ye was still too young. Thinking he had victory in hand, he became arrogant. If he was overturned in a soul battle, then his death would be quite undeserved!

When this was spoken, Zhou Chuang's face turned pale because he didn't feel any trace of resistance from Lu Ye. The fierce fluctuation of psyche that had surged forth disappeared without a trace.

This undoubtedly meant that the soul battle had already begun, and Chu Zhu's soul body had already invaded Lu Ye's Divine Sea, hiding all dangers within the sea so that outsiders sensed no movement at all.

Zhou Chuang quickly thought and then said to Ma Shangsi, "Fellow Daoist, protect, I'll go lend a hand to Fellow Daoist Lu."

Clearly, he also wanted to participate in the soul battle. Now that Lu Ye's psyche defense was breached by Chu Zhu, his soul body entering Lu Ye's Divine Sea shouldn't be difficult. At that time, two against one should keep Lu Ye safe.

Saying this, he began to mobilize his psyche power.

Ma Shangsi raised his hand to stop him, "Wait!"

Zhou Chuang paused, looking at him in confusion.

Ma Shangsi said, "It's all within the plan, Fellow Daoist need not worry!"

Zhou Chuang was dumbfounded upon hearing this.

Within the plan? That means Lu Ye had anticipated this scene already?

Zhou Chuang thought carefully, quickly realizing a problem. Even with differences in cultivation, it wouldn't be easy for Chu Zhu to initiate a soul battle against Lu Ye. But in this whole scenario, Lu Ye showed no intent to defend, and in the blink of an eye, his psyche defense was broken by Chu Zhu.

Then connecting all the prior tortures Lu Ye inflicted upon Chu Zhu and the casual approach towards him with those venomous words...

Zhou Chuang had a sudden realization, "Fellow Daoist Lu's previous actions were to force Chu Zhu to initiate a soul battle with him?"

"Correct!" Ma Shangsi nodded in affirmation.

Zhou Chuang was puzzled, "But... why?"

Why initiate a soul battle? What benefit is there? Could it be that Lu Ye was cruel enough to not only torment Chu Zhu physically but also psychically?

If so, that would be truly vicious!

Zhou Chuang faintly sensed that things weren't that simple, but since Ma Shangsi said it was all within the plan, there was nothing left for him to worry about.

Since Lu Ye dared to do this, he must be confident.

Looking at it now, Lu Ye didn't initiate the soul battle himself because he wasn't confident in breaking Chu Zhu's psyche defense, so he forced him to make the first move, making the soul battle naturally established as a result.

At this moment, within Lu Ye's Divine Sea, Chu Zhu's soul body was holding a soul treasure resembling a sharp sword, descending with a Moon Jade Late Stage soul body. He originally intended to make a ruckus here to show Lu Ye the consequences of underestimating him. However, upon glancing around, he saw within Lu Ye's Divine Sea, a Divine Lotus spanning across, blooming with seven-colored sunlight, making even his invading soul body feel completely comfortable.

What is this?

Though Chu Zhu didn't recognize what it was, he immediately realized that this seven-colored Divine Lotus was an extraordinary soul treasure!

What stunned him wasn't only the seven-colored Divine Lotus but also a ramshackle large ship that suddenly emerged with the waves in front of the Divine Lotus, positioning itself forward.

In the blink of an eye, the ramshackle ship became fully restored, not only that, figures appeared on the boat, each taking their own positions. On the deck, Lu Ye's soul body quietly stood there, looking down from afar, his gaze indifferent, as if he were staring at an ant!

And what is this?

He had seen many soul treasures, but what he witnessed today was mind-blowing, beyond imagination!

While still contemplating, Lu Ye had already swung his hand, and the large ship charged toward Chu Zhu's soul body. During the advance, the array on the ship hummed with a buzz, and a multitude of attacks rained down like a storm.

This soul battle took only half a cup of tea time, and after Chu Zhu witnessed the horror of the Ghost Ship, he wanted to escape. However, once he entered, leaving was not so easy.

Previously, he was able to easily break through Lu Ye's psyche defense because Lu Ye hadn't set up any defense at all. It didn't mean Lu Ye's psyche defense was weak.

Now, with the Divine Sea sealed, it was akin to closing the door to beat a dog.

After his flesh had been tortured, Chu Zhu's psyche was also battered and bruised. After half a cup of tea time, his soul treasure longsword shattered, and his soul body became dim.

On the Ghost Ship, Lu Ye captured Chu Zhu's soul body, his face cold and indifferent.

Ambushing Chu Zhu, parrying with him, torturing him, and inducing him to initiate a soul battle were all for this moment!

Soul Taming!

If one wanted to conquer Baiyue Island from the inside, one had to target its internal personnel. Lu Ye had long planned to use the power of Soul Taming to enslave the people of Baiyue Island, because only in this way could he dismantle the big island-protecting array of Baiyue Island.

The regular Constellation Realm was not his target; Baiyue Island's few Moon Jade were.

Lu Ye had once used Soul Taming to enslave a Dao Thirteen and cultivators from the Blood Refinement World, but Dao Thirteen lacked spiritual intelligence, and the cultivators from the Blood Refinement World were not strong, so they were not difficult to control.

However, if he wanted to use his current cultivation to control a Moon Jade Late Stage with Soul Taming, the difficulty was tremendous.

Under normal circumstances, it was basically impossible to succeed, even though Soul Taming had been deduced by the Talent Tree, making it more powerful than before.

Therefore, Chu Zhu's willpower must be worn down to the lowest point.

This was the fundamental reason Lu Ye first tortured him physically and then devastated him in the soul battle. With his body and mind tormented, Chu Zhu's willpower had indeed dropped to the lowest point.

Only then was there a possibility of using Soul Taming!

Calming his mind, Lu Ye raised his hand and pressed down on Chu Zhu's soul body. Under the stimulation of the Soul Taming Divine Runes, Chu Zhu's soul body was enveloped.

If successful, conquering Baiyue Island would be no problem, because Chu Zhu would become his insider in Baiyue Island, and with such an insider, the island-protecting array would be rendered useless!

Under the glow, Chu Zhu's exhausted psyche seemed unresponsive. Just when Lu Ye thought everything was going smoothly, Chu Zhu's resistance suddenly surged, unprecedentedly fierce.

Although Chu Zhu didn't know exactly what Lu Ye was doing, as the Soul Taming Divine Runes continued to take effect, he vaguely realized something.

This guy had a lot of spirit, which was evident from the battle earlier. Even when tortured, he never uttered a word of begging.

Such a person, how could he be willing to become someone else's slave?

Under the stimulation of the divine runes, Chu Zhu's already diminished willpower boiled once more, and amidst the frenzied resistance, he gritted his teeth and snarled, "You want to enslave me? Forget it. Even if I die, I will never let you succeed!"

As soon as he spoke, a cracking sound echoed, and Lu Ye was suddenly aware that Chu Zhu's soul body showed signs of shattering.

This undoubtedly meant that in their confrontation, Chu Zhu's psyche couldn't endure any longer.

If he didn't relent, Chu Zhu's soul body would surely shatter, but if he relented, all previous efforts would have been in vain.

Lu Ye couldn't help but sigh; it had come to this point.

Before planning this, he had anticipated such an occurrence. The willpower of a Moon Jade Late Stage was tough. Even with perfect groundwork, he still couldn't implant the Soul Taming Divine Runes on Chu Zhu's soul body.

Fortunately, he had a backup plan, although this backup plan carried more risk compared to enslaving Chu Zhu, and Lu Ye was reluctant to resort to it unless absolutely necessary.

Because he had a psychological shadow over the means he was about to deploy...

Telepathy!

If Soul Taming wasn't feasible, he could only use Telepathy to probe Chu Zhu's memories. Ever since he had done this in the Blood Refinement World, Lu Ye hadn't done it again due to the overwhelming flood of complex and chaotic memories from others' minds.

Telepathy had similarly been deduced again by the Talent Tree.

Seeing Chu Zhu's soul body showing signs of breaking, Lu Ye hesitated no longer. He steeled his heart and transformed the Soul Taming Divine Runes into Telepathy.

In an instant, a surge of complex information flooded in, making Lu Ye's entire head throb with pain, leaving him dazed.

Meanwhile, Chu Zhu also sensed much of Lu Ye's memories and secrets. Under such an impact, his already cracked soul body became even more burdened, and the pace of its breaking accelerated abruptly.

A moment later, with the complete shattering of Chu Zhu's soul body, Lu Ye staggered to his feet, feeling very unwell.

He secretly resolved that no matter what, he mustn't resort to this method again; it was simply unbearable.

Not rushing to leave the Divine Sea, his soul body sat on the Ghost Ship, as he began sorting through and investigating the useful intelligence among the torrent of complex information swirling in his mind.

Chapter 1733 - Chu Zhu Reborn

In the Blood Sea, Zhou Chuang and Ma Shangsi guarded Lu Ye, quietly waiting.

After a while, Lu Ye suddenly opened his eyes, his face slightly pale, and even his gaze somewhat dim, undoubtedly a side effect of using a bit of telepathy.

In front of him, Chu Zhu was dead beyond recovery, both in terms of his physical body and psyche completely shattered.

Lu Ye reached out and removed the storage ring from Chu Zhu's hand, then stored his corpse into the Small Flower World, before looking at Zhou Chuang: "Thank you for your help, Fellow Daoist."

Zhou Chuang waved his hand: "I didn't help much. What are you planning to do next? Do you need the assistance of Sifang Island?" He had already discussed the matter of Three Worlds Island with other Moon Jade cultivators in the home galaxy, and they all agreed to offer their full support if needed.

Previously, they refrained from contacting Three Worlds Island because they feared implicating them, having caused quite a few troubles since arriving at All Phenomena Ocean. But now, Three Worlds Island itself has problems, so concerns about undue involvement are moot.

"No need for now, I'll handle the upcoming matters myself." Lu Ye replied.

A moment later, the three parted ways, with Ma Shangsi urgently escorting Lu Ye towards All Phenomena Ocean. Chu Zhu's death couldn't be concealed for long. If anyone from Baiyue Island tried to contact Chu Zhu, they would notice something amiss since the audio talisman would lose its function upon a cultivator's death.

Lu Ye had previously determined Tang Jun's life status through the feedback from an audio talisman.

Therefore, to conquer Baiyue Island, they needed to act quickly. If Baiyue Island realized Chu Zhu's death, Lu Ye's subsequent plans would have no room to unfold.

While rushing towards Baiyue Island, Lu Ye was also fully digesting the information gleaned from Chu Zhu.

Because during the telepathy usage, Chu Zhu's psyche had begun to disintegrate, Lu Ye's obtained information was incomplete and fragmented.

But it was sufficient.

Lu Ye was in a hurry, and Ma Shangsi dared not slow down, collapsing the vast Blood Sea into a tiny sphere enveloping him and Lu Ye to accelerate to the maximum.

Not using the starboat was Lu Ye's instruction, as he intended to employ the cover of the Blood Sea for certain actions, which would be less convenient with the starboat.

Ma Shangsi didn't know what Lu Ye intended to do and wouldn't ask.

But soon, while focused on travel, he exhibited a puzzled expression, turning to his side, having suddenly noticed the rapid change in his Saintly Venerable's aura, becoming unlike a Saintly Venerable.

This was undoubtedly a very incredible matter. Every cultivator has their unique aura, especially when activating their power, although sometimes it undergoes slight changes, but fundamentally remains consistent.

Yet the current situation with Lu Ye undeniably left Ma Shangsi somewhat perplexed, as Lu Ye's aura had fundamentally changed.

Without visual confirmation, relying solely on Mental Consciousness, Ma Shangsi almost couldn't identify this aura as belonging to Lu Ye.

Even more astonishingly, as the aura changed, Lu Ye's might also escalated.

He was evidently only at Moon Jade Early Stage cultivation, yet now exhibited the might and mana fluctuations of Moon Jade Late Stage!

If he wasn't sure it was Lu Ye wrapped within his Blood Sea, Ma Shangsi might've thought he was escorting Chu Zhu.

Because Lu Ye at this moment, was too reminiscent of that unfortunate soul, Chu Zhu!

"Is it similar?" Lu Ye suddenly asked.

Ma Shangsi immediately nodded: "Identical!"

Lu Ye remained noncommittal. The Pseudo-Might Spirit Runes derived from the Talent Tree were undoubtedly more useful than before. Previously, Pseudo-Might could only alter Lu Ye's own might, but couldn't change aura significantly. Now, even the aura could be modified.

During the last battle, Lu Ye personally tormented Chu Zhu with saber strikes, not merely destroying his physical body but also familiarizing himself with Chu Zhu's aura for his current Pseudo-Might preparations.

From the current viewpoint, the results were good, though if someone truly familiar with Chu Zhu were present, Lu Ye couldn't ascertain whether they'd notice some flaws.

In Ma Shangsi's eyes, the Pseudo-Might seemed flawless, but that was due to Ma Shangsi's unfamiliarity with Chu Zhu. If encountering Chu Zhu's acquaintances, caution was advised.

Maintaining the Pseudo-Might, Lu Ye soon activated the Thousand Faces Spirit Runes to enhance himself.

His appearance rapidly transformed, even his physique started shifting towards Chu Zhu's form, with cracking sounds emanating from his bones, making him marginally shorter.

The previous Thousand Faces Spirit Runes merely changed appearance, but through the Talent Tree's derivation, Thousand Faces now slightly modifies physique, albeit within limits, impossible to transform into a demon beast, for instance.

Chu Zhu belonged to the human race, as did Lu Ye, and considering they weren't vastly different in height, there was room for alteration.

Ma Shangsi's mouth hung open, unable to close for a long time, utterly baffled by this seemingly miraculous technique performed by the Saintly Venerable.

Pseudo-Might combined with Thousand Faces, the Lu Ye beside him is vividly a reborn Chu Zhu!

At least in Ma Shangsi's eyes, there is not the slightest flaw to speak of.

Only at this moment does Ma Shangsi finally understand what his Saintly Venerable has been planning.

It is clear that they intend to leverage Chu Zhu's identity to infiltrate Baiyue Island and cause a commotion there. If Baiyue Island isn't prepared, the situation will undoubtedly be dire.

After using Thousand Faces and Pseudo-Might, Lu Ye then begins to crack Chu Zhu's storage ring. The cracking poses no difficulty at all; it seems his disguise even fooled the ring's restriction.

After a short while, he retrieves a set of Chu Zhu's everyday clothes from the storage ring and puts them on, changes his hairstyle, stows away the Boulder Mountain Saber, alters his voice, and chats casually with Ma Shangsi, striving for perfection in his disguise.

In the All Phenomena Ocean, Baiyue Island, is an excellent treasure ground.

Thousands of years ago, this Spirit Island was already a high-class Spirit Island, and it hasn't changed much until now. Baiyue Galaxy took over this island more than eight hundred years ago and has been its owner ever since.

Eight hundred years of peace has allowed the protective array to accumulate immense power, making the island's defenses exceptionally strong.

Not only Baiyue Island, in fact, most high-class Spirit Islands in the All Phenomena Ocean are in such a condition, with many forces occupying a high-class Spirit Island for a long time and managing its defenses to perfection.

This is also why there are rarely battles for high-class Spirit Islands in the All Phenomena Ocean, partly because Sun Blaze coordinates things behind the scenes, and partly because without sufficiently powerful forces, breaking the protective arrays of those islands is simply impossible.

Take Baiyue Island as an example; to even hope of breaking its protective array, at least ten Moon Jade cultivators would have to continuously assault it for a day or two.

But would Baiyue Island ever give anyone such an opportunity? When attacked, they can retaliate, and the numerous array magic treasures arranged on the island are not mere decorations.

The area covered by Baiyue Island isn't too small, but it's not very large either, just enough to meet the cultivation needs of Baiyue Galaxy's cultivators, so it isn't a commercial Spirit Island with merchants settling in.

The cultivators living on the island are basically all from Baiyue Galaxy.

A figure swiftly approaches from afar, arrives before the big island-protecting array, and flashes a token; the array immediately opens a gap, allowing the figure to slip inside.

The guarding cultivator senses the movement, looks up, sees Master Uncle Chu Zhu, and withdraws his gaze.

Chu Zhu, naturally, is not Chu Zhu but Lu Ye.

Relying solely on Pseudo-Might and Thousand Faces Spirit Runes, Lu Ye couldn't just openly enter Baiyue Island; the big island-protecting array alone could stop him. Chu Zhu, a Baiyue Moon Jade, returning from outside can't just have the array opened for them; that would immediately expose a flaw.

But Lu Ye has more than just these two spirit runes; he also possesses a wealth of memory fragments from Chu Zhu, so entering Baiyue Island is no difficulty for him.

Even if others had the skill to disguise themselves as Chu Zhu, without Chu Zhu's memories, they wouldn't be able to act as conveniently as Lu Ye.

And from Chu Zhu's memory fragments, Lu Ye roughly knows the mission he was ordered to carry out in Yiyuan World, but he hasn't uncovered the specifics.

According to the original plan, once Chu Zhu returned, he would certainly meet with the other few Moon Jade cultivators on the island to report on his activities in Yiyuan World.

But Lu Ye is not Chu Zhu; he doesn't know who Chu Zhu conversed with in Yiyuan World, so why would he seek to meet other Moon Jade cultivators?

His visit here is precisely with the intent to avoid contact with other Moon Jade cultivators.

Time is of the essence, so immediately upon entering Baiyue Island, he heads directly in one direction.

He quickly arrives at his destination: a large hall, guarded inside and out by cultivators, clearly a key location.

Indeed, it is a key location because this place is one of Baiyue Island's array bases for the big island-protecting array, where the array base is both the foundation for the array's operation and the central hub for energy accumulation.

There are eight such array bases on the whole of Baiyue Island.

When Lu Ye appears, the cultivators guarding the hall immediately greet him respectfully, saying, "Greetings, Master Uncle!"

Lu Ye nods, continues striding towards the hall, while issuing orders, "Activate the hall's formation, the island-protecting array's operation has been somewhat unsmooth, I need to check the cause!"

The most favorable information Lu Ye obtained from Chu Zhu is that Chu Zhu has actually dual-cultivated in the Array Path, so he is qualified to make some adjustments and inspections on Baiyue Island's big island-protecting array.

Of course, even without this reason, with Moon Jade's identity to give orders, the Constellation below wouldn't object.

But the identity of an array cultivator undoubtedly makes Lu Ye's actions even more convenient.

Upon hearing Lu Ye's words, the Constellation isn't hesitant, immediately stepping into the hall first, shouting, "Activate the hall's formation."

Chapter 1734 - Take a Look at This

Since the Array Base of the big island-protecting array is installed inside this hall, the defense is naturally cautious and meticulous. Numerous Formations have been arranged inside and outside the hall to ensure that even if someone infiltrates this island, outsiders won't be able to quickly destroy the array base once the hall's Formation is activated.

Such a tight defense couldn't be considered inadequate, yet it happened to encounter Lu Ye.

Inside the hall, there were also five or six cultivators on duty. Although they were only at the Constellation Realm and insignificant in Lu Ye's eyes, resorting to force to deal with them would inevitably arouse suspicion and be detected by others.

However, with the order given under the identity of Chu Zhu, these individuals immediately activated the Formation of the hall. As the humming sound transmitted, the entire hall was shrouded in Formation, isolating the interior and exterior.

Lu Ye knew that the movement here would certainly alarm the other Moon Jade cultivators on the island, so once the big array was activated, he decisively opened the portal to the Small Flower World.

A few Constellations of Baiyue were watching Lu Ye at this moment, awaiting his next directive. Suddenly, a portal appeared out of thin air, leaving them momentarily bewildered, unaware of what Master Uncle Chu Zhu was doing.

The next moment, the portal rippled, and a figure stepped out, none other than Ma Shangsi!

When approaching Baiyue Island, Lu Ye had stored him in the Small Flower World, and now that operations commenced, it was natural to let him out.

While Baiyue's Constellations looked bewildered, a flash of blood light burst into their vision, rapidly filling the entire hall!

From the portal of the Small Flower World, cultivators continued to emerge, all belonging to the Three Worlds Island.

After more than a hundred people came out, Lu Ye then closed the portal and walked outward.

The hall's Formation remained intact, yet nobody knew that inside, the heaven and earth had already been overturned.

Only after Lu Ye escaped the Formation's shroud of the hall did a voice reach his ear: "What is the junior brother doing?"

He knew that the commotion here had indeed drawn the attention of the Baiyue Island Moon Jade cultivators, querying him via audio transmission.

This was expected. Hoping for a flawless execution of his plan without a hitch was impossible, so faced with the inquiry, Lu Ye calmly replied, "I found the big array's operation slightly off upon return. I'm just conducting a brief inspection."

The voice showed no suspicion, since Chu Zhu originally held this responsibility, then spoke, "Then check thoroughly, junior brother, as the big array is of great importance, it cannot be handled carelessly."

"Understood!"

"Once this matter is settled, remember to come by and see me." The other person reminded.

"Got it."

During the conversation, Lu Ye swiftly arrived at the hall where the second array base was located. The setup here mirrored the previous hall almost identically.

Following the same method, Lu Ye rapidly controlled this hall from the inside, leaving Luan Xiao'e to lead over a hundred Constellations hiding within.

Next was the third hall, where Yann Miao led the Three Worlds cultivators that were stationed here.

Upon reaching the fourth hall, Lu Ye's steps paused slightly, for a figure awaited ahead.

Liu Yu! With Moon Jade Mid-Stage cultivation, although not part of the Five Great Governors on Baiyue Island, he nonetheless resided here.

His circumstances on Baiyue Island mirrored the present positions of Tang Jun and Chong Xin. As they weren't recorded, they couldn't participate in the Spirit Island contention.

But this didn't stop him from staying on Baiyue Island.

Initially, Baiyue Island had seven Moon Jade cultivators, including the Five Great Governors, Liu Yu, and another one.

After Lu Ye killed one Moon Jade, the other joined under Yu Huan and got registered, replacing the deceased.

Liu Yu didn't need registration, yet could fulfill his role. Like Chu Zhu, possessing cultivation and also versed in the Array Path—although his cultivation was lesser than Chu Zhu, his proficiency in the Array Path surpassed Chu Zhu. Therefore, the array matters on Baiyue Island were jointly handled by him and Chu Zhu, mainly led by him.

His presence here signified that he had heard something, deliberately coming over.

Indeed, upon seeing Lu Ye, Liu Yu began to speak, "Senior Brother, what's the problem with the big array's operation?"

"Checking now, but I have a clue. Come, I'll discuss it in detail with you!" Lu Ye stepped forward, wrapping his arm around Liu Yu's shoulder, leading towards the hall.

Liu Yu felt a bit uneasy instantly, as Chu Zhu never showed such enthusiasm towards him before, yet he didn't suspect at all, thus he followed Lu Ye into the hall.

"Activate the Formation in the hall," Lu Ye instructed as usual.

Liu Yu showed a puzzled expression, "The big island-protecting array has a problem, why activate the Formation here?" The two are completely unrelated; if you want to check the big island-protecting array, you only need to check the situation at the array base here. This is common sense.

"Don't ask too many questions, you'll know soon enough, this problem is a bit troublesome," Lu Ye said mysteriously.

Liu Yu shook his head and said, "It's wrong, Master Uncle, if we do this, it will interfere with the inspection of the big island-protecting array, and might even lead to some erroneous judgments. Please tell me first, what exactly is wrong with the big island-protecting array?" In the area of Array Path accomplishments, he was more skilled than Chu Zhu, so he firmly believed Chu Zhu was doing something inappropriate this time.

Lu Ye glanced at him sideways and sighed slightly.

"What's wrong?" Liu Yu was perplexed, always feeling strange about Master Uncle Chu Zhu today, but couldn't figure out what it was.

"Junior Brother, look at this," Lu Ye suddenly spoke, and then reached out to grab. A long saber appeared in his hand, held horizontally in front of Liu Yu.

Liu Yu stared at the Boulder Mountain Saber, completely confused, unable to follow Lu Ye's thoughts. Just as he was about to inquire, the sound of a clang was heard, and a flash of saber light seemed to pass through his vision.

At such a close distance, and with Liu Yu having no defense at all against Lu Ye here, how could a Moon Jade Mid-Stage withstand the sharpness of the Boulder Mountain Saber?

A line of blood seeped from Liu Yu's neck. He vaguely realized what had happened, his eyes filled with terror and disbelief, unable to accept that Master Uncle Chu Zhu had actually attacked him!

Perhaps it was a flash of spirit light before death, or maybe Lu Ye revealed a flaw when he struck. Liu Yu opened his mouth and shouted, "You're not Chu Zhu!"

Along with the shout, mana surged, seemingly to give a warning. But in the next moment, his head flew high, blood spraying wildly from his neck!

Inside the hall, a few Constellation cultivators on duty were already dumbfounded. Just a moment ago, Master Uncle Chu Zhu suddenly struck Master Uncle Liu Yu with a deadly blow. The latter was beheaded without any reaction, watching a Moon Jade die horribly before their eyes was a tremendous psychological and visual impact.

After a strike that took Liu Yu's life, Lu Ye then took out his audio talisman, transmitted a message, and then looked expressionlessly at the Constellations present.

The Constellations trembled in fear...

Almost the moment Liu Yu died, several Mental Consciousness swept over from Baiyue Island, especially strong from the four Moon Jade governors.

The commotion of a Moon Jade's death was too obvious, so they sensed it immediately, especially since Liu Yu shouted before he died, making them further aware of the seriousness of the situation!

In isolated chambers, the forms of Four Great Moon Jade governors almost exited simultaneously, but before they could head towards Lu Ye, a sudden buzzing erupted across Baiyue Island, followed by several tremors in the big island-protecting array, its light dimming instantly.

Meanwhile, inside the hall where Lu Ye was located, the several Constellation cultivators on duty had been slain, even the array base left here had been thoroughly destroyed by Lu Ye in a short time.

As he acted, Ma Shangsi, Luan Xiao'e, and Yann Miao's teams placed by him in advance also acted simultaneously, destroying the array bases in the other three halls.

Altogether, Baiyue Island's big island-protecting array only had eight array bases; four were destroyed at once. Though it hadn't completely broken the big island-protecting array, the impact was anything but ordinary.

"How dare you!" An angry shout echoed, Yu Huan charged towards Lu Ye, reaching him in an instant.

Not only Yu Huan but all other three Moon Jade governors were also closing in on this location.

Lu Ye considered his own strength against the opponents and decided not to take risks. Alone, he feared none of them, but with four coming at once, he had to avoid the confrontation. Standing in place, he coldly looked in Yu Huan's direction and said quietly, "This is just interest. Since you chose to act against my Three Worlds Island, you should have anticipated this day. Today, we Three Worlds cultivators will break your Baiyue Island!"

Yu Huan's eyes were torn with rage; he lifted his hand, sending out a magic treasure in the form of an arrow. After a slight tremor, it shot towards Lu Ye like lightning and thunder.

But just as the magic treasure attack was about to strike, spirit runes suddenly appeared beneath Lu Ye's feet, causing him to vanish into thin air.

Looking in the direction where Lu Ye disappeared, Yu Huan was momentarily stunned. He could tell Lu Ye was not dead but didn't know what means allowed his sudden disappearance.

The current situation on Baiyue Island was dire; Liu Yu had been killed, and the enemy dared to impersonate Chu Zhu, indicating Chu Zhu probably met with misfortune too. With four array bases destroyed, it was a crisis not seen in eight hundred years.

Moreover, he could perceive that many enemies had appeared at the three array base halls, each with an invading Moon Jade presiding over the assault.

He couldn't comprehend how so many enemies managed to infiltrate, but it was likely related to the one impersonating Chu Zhu, as that person had previously been to those three halls.

Upon hearing Lu Ye identify himself as being from Three Worlds Island, hatred blazed in Yu Huan's eyes. He immediately took out an audio talisman and transmitted a message, "You may act now. Three Worlds Island has launched a surprise attack on Baiyue, deploying at least four Moon Jade cultivators and five hundred troops!"

Baiyue Island had been entrenched here for eight hundred years, naturally possessing numerous allies, and Yu Huan's transmission was directed to an ally interested in Three Worlds Island, with whom Baiyue had had many interactions before.

Chapter 1735 - No Retreat Until Baiyue Falls

At this moment, Yu Huan sent a message, clearly realizing this was an opportunity. Although this island suffered great losses and faced a crisis, since Three Worlds Island dispatched so much power, their defenses must be weak. If a third force suddenly attacks Three Worlds Island now, it surely won't be able to hold, perhaps resolving Baiyue's crisis.

All Phenomena Ocean has many rules. For example, within a spiritual island, there can be at most five registered Moon Jade. Only these five individuals can directly participate in the island's battle for dominion. Those not registered have no direct participation rights.

Another rule is that during spiritual island battles, only two forces can compete at any given battlefield; a third party is strictly prohibited from intervening.

These are rules set by Sun Blaze to prevent large-scale conflicts. Without such rules, once disputes begin, everyone would bring allies into the fight, leading to chaos in All Phenomena Ocean, which would be detrimental to their management. Also, when wars start, animosity increases, and the benefits everyone receives decrease.

These rules arose from the unique environment of All Phenomena Ocean. The power gathered within this stellar space marvel is too diverse. Without setting these seemingly unreasonable rules, it's impossible to develop long-term.

Therefore, even though Baiyue Island has many allies, Yu Huan can't have them come to assist this island, because the battlefield here belongs to Three Worlds Island and Baiyue Island. Any third-party intervention is not permitted.

However, he can send a message telling the allies to attack Three Worlds Island without issue, as Three Worlds Island is another battlefield!

Moments after the message was sent, on another spiritual island, starboats soared into the sky, heading straight for the direction of Three Worlds Island to attack.

This is a rare opportunity; the defensive power of Three Worlds Island is apparent to those aware. So upon learning that at least four Moon Jade and five hundred cultivators had secretly attacked Baiyue Island, this spiritual island connected to Yu Huan realized that it was an excellent opportunity to seize Three Worlds Island!

Because Three Worlds Island has insufficient defensive power at this time, and its establishment time has not been long, the big island-protecting array probably doesn't have strong protective power. Taking action now, it's almost certain they can capture Three Worlds Island.

As Lu Ye's identity was exposed here, five hundred cultivators led by three Moon Jade destroyed the three array bases on Baiyue Island, a hidden figure revealed itself from an abandoned island not far from Baiyue Island, where it had been concealed for many days.

Cursing under its breath: "The damn thing finally moved, I've been enduring for too long."

The figure, with a striking silhouette, was specter cultivating within Royal Conch Palace.

Despite there being ghost cultivators on Three Worlds Island, they were all in Constellation Realm. This place is not far from Baiyue Island, and it's risky for Three Worlds' cultivators to hide here, so Lu Ye had called specter back when planning against Baiyue Island.

Specter was naturally unwilling; she was enjoying cultivation with Bai Lu at Royal Conch Palace, not wanting to get involved in these troublesome matters.

After being beaten, she became obedient.

Previously, before Lu Ye ascended to Moon Jade, he matched her evenly in battle. Now, having ascended, specter is no match at all.

Gazing toward Baiyue Island's direction, specter took out a green sea conch, placed it by her mouth, and with her mana fluctuating, gently blew on it.

The Void before her twisted, forming a portal.

In front of Divine Conch Hall at Royal Conch Palace, He Baichuan led five hundred Constellations from Three Worlds Island, waiting for many days. The moment the portal opened, his eyes snapped open, and he shouted loudly: "The time has come. Today is the day Three Worlds Island makes its name. Whether we can establish ourselves in All Phenomena Ocean hinges on this battle. Everyone, fight with me; unless Baiyue is broken, we won't cease!"

"Unless Baiyue is broken, we won't cease!" Five hundred Constellations roared furiously in unison.

These Constellations had never even seen Baiyue Island's people before, let alone harbored personal grudges. But ever since Baiyue Island's Moon Jade attacked Old Tang and intercepted Luan Xiao'e and He Baichuan, enmity between the two islands formed.

Because if Baiyue's actions that day were successful, not only would Tang Jun die, but Luan Xiao'e and He Baichuan would also face grim outcomes. Without the protection of Moon Jade, how could they survive in All Phenomena Ocean? They would become rootless wood, soulless water, drifting aimlessly.

They hailed from Jade Conch, a remote star system, where there isn't even a single Sun Blaze. Yearning for the excitement of the stellar space, they finally emerged, coming to this bustling place and, by a stroke of luck, claiming a spiritual island. They wouldn't allow others to loot and drive them away!

Defending the island is self-preservation; counterattack establishes stability. They want to stand firm in the complex All Phenomena Ocean, for only then will their home galaxy have a broader future!

If Baiyue targets Three Worlds Island, they are endless enemies!

He Baichuan was the first to rush out of the portal, closely followed by resolute, battle-ready figures.

In a short time, the gathered figures before Divine Conch Hall charged outward onto the deserted island.

Following the previous deployment, Tiger Shark battleships were summoned, As-Close-As-Siblings array discs activated, forming arrays that, under He Baichuan's leadership, fiercely advanced towards Baiyue Island.

On the deserted island, only two figures remained: a specter blowing the green sea conch and Old Tang, whose strength was lacking.

Neither of the Moon Jade cultivators were qualified to partake in such a battle, so they could only watch from a distance.

Old Tang suddenly extended a hand towards the specter.

The specter blinked innocently, "What?"

"Hand it over!" Old Tang looked at him expressionlessly.

The specter turned his head away, "What are you talking about? I don't understand!"

Old Tang said serenely, "You must understand, it's not me who wants this, it's Lu Yiye who told me to find you for it. If you don't give it to me, that's fine. But he'd come find you himself then, and don't come crying!"

"Afraid of him?" The specter jumped like a cat with its fur standing on end, exclaiming, "He's only been a Moon Jade for a short time. Let him come find me and see if I don't beat him up!"

Old Tang just looked at her expressionlessly.

The specter suddenly felt a bit guilty, yet stubbornly said, "I'm going back to the Royal Conch Palace right now, I want to see how he'll come find me!"

Old Tang said, "Guess what, are the Merfolk Race closer to you, or to him? Even if you hide back in the Royal Conch Palace, won't you still be dragged back for a beating?"

The specter's eye twitched, contemplating the consequences of hiding back at the Royal Conch Palace, ultimately not daring to move, reluctantly taking out the green sea conch and slapping it heavily into Tang Jun's hand, "Here, take it, you're so stingy. I was just playing with it for a few days, he's overly distrustful of me, not a shred of trust despite our years of acquaintance!"

Tang Jun put away the green sea conch, thinking that if you were truly trustworthy, Lu Ye wouldn't have instructed him to ensure the conch's retrieval.

This item, after all, is the link between the Three Worlds Island and the Royal Conch Palace and must be kept at one's own hand.

The successful surprise attack on Baiyue Island owed much to the green sea conch's utility.

Lu Ye's Small Flower World, though convenient, has limited capacity. He previously attempted in the Nine Provinces, simply accommodating Constellations, a single Small Flower World can host at most around eight hundred, but if including Moon Jade, this number sharply declines. In simple terms, the stronger the cultivator confined, the greater the load on the Small Flower World, thus fewer people can be held.

Therefore, he couldn't fit all Three Worlds Island cultivators within the Small Flower World, only bringing five hundred Constellations, plus three Moon Jades, nearing the Small Flower World's limit.

As for He Baichuan and the other five hundred Constellations, they were early sent by Lu Ye through the portal opened by the green sea conch to the Merfolk Territory, assembling ready for action at the Divine Conch Hall.

The specter blew the green sea conch here, opening a portal, allowing He Baichuan's contingent to directly arrive!

No one would have thought Three Worlds Island would strike Baiyue Island from here, given its proximity, exposing them should numerous cultivators appear. Baiyue Island could swiftly counteract, yet Three Worlds Island accomplished the impossible thanks to the green sea conch's convenience.

Within Baiyue Island, four array bases were destroyed, the big island-protecting array trembled, causing quite a commotion. Through certain "interested parties," the news quickly spread.

Baiyue Island has been attacked!

The struggle for the high-class Spirit Island has begun!

Baiyue cultivators have held Baiyue Island for eight hundred years, as an upper-class Spirit Island, it's renowned within all of the All Phenomena Ocean. So when this news broke, countless cultivators flocked here, starry-eyed, eager to witness the spectacle—Constellations flocked alongside Moon Jade from various Spirit Islands.

It's not that they truly enjoy watching the commotion, but high-class Spirit Island struggles are rare across the All Phenomena Ocean; each represents at least a clash between cultivator groups from two star systems.

Moon Jades came to observe the battle, primarily to assess both sides' performance and skill, using such affairs to reflect and address their own shortcomings, thereby crowning their capabilities.

Many were inquiring about which force attacked Baiyue Island, for such an abrupt battle is unprecedented. Previously, high-class Spirit Island battles always showed signs, with clashes or skirmishes between two forces before escalating to a Spirit Island war.

Yet, this time, not a whisper was heard prior, an eight hundred-year established high-class Spirit Island was suddenly attacked, leaving many Moon Jades astonished and puzzled.

For many Moon Jades stationed long-term in the All Phenomena Ocean, Baiyue Island's heritage is somewhat familiar; amongst upper-class Spirit Islands, Baiyue is neither the strongest nor the weakest. Eight hundred years of establishment and a steadfast big island-protecting array make forcibly taking it by any single force nearly impossible.

#### Chapter 1736 - Wits and Bravery Against the Empty Island

Those Moon Jade cultivators who went to watch the battle all wanted to know, who exactly are the ones competing with Baiyue Island this time, and what chance of victory do they have? Or is it simply that some people got hot-headed, igniting a war?

Meanwhile, on All Phenomena Island, in a short-stay palace, Constellation Yuan Cheng, whom Tang Jun had previously seen, was standing respectfully in an empty great hall, bowing his head and reporting the latest news he had received.

After waiting for a moment, a voice came from the depths of the hall: "Overestimate their capabilities, let them do as they please!"

"Yes!" Yuan Cheng responded, bowed and withdrew, hearing the ancestor's words about Baiyue Island without any concern. If the ancestor isn't worried, why should he be? Notably, the ancestor didn't even consider using Mental Consciousness to probe Baiyue Island's status.

No wonder the ancestor looked down on the Three Worlds cultivators; they indeed come from a desolate region, lacking insight and being overly proud. Do they truly believe that a high-class Spirit Island is that easy to conquer? After suffering a huge loss this time, they'll surely become more prudent in the future.

Five hundred miles away from another direction of Baiyue Island, two figures stood side by side; they were the first two Moon Jade cultivators to arrive after the outbreak of war.

They were none other than Zhou Chuang from Sifang Island, who hadn't been separated from Lu Ye for long, and Kang Cheng from the Indeterminate Galaxy. There were two more Moon Jade cultivators from the four galaxies who hadn't arrived; it's not that they didn't want to come, but they had to leave people to guard their homes. If everybody came and their home was stolen, it wouldn't be good. Sifang Island is just a mid-class Spirit Island; its big island-protecting array isn't too strong.

The reason the news of Baiyue Island's warfare spread so quickly was due to Sifang Island's secret push. This was something Lu Ye had proactively asked Zhou Chuang to help with.

Only by having more Moon Jade cultivators come to watch and personally witness how Baiyue Island was conquered, can people recognize the strength of Three Worlds Island. Only then can Three Worlds cultivators establish a foothold on Three Worlds Island in the future!

For such a battle, Lu Ye felt that one battle would be enough!

The bigger this matter gets, the more advantageous it is for us!

Five hundred miles apart, Kang Cheng and Zhou Chuang stared blankly, both with expressions of disbelief. Kang Cheng's eye twitched repeatedly, and he asked in shock, "How was this achieved?"

At this moment, from his observation, Baiyue Island's big island-protecting array was visibly damaged, its defenses greatly reduced, and the inside was in chaos. At least three locations were erupting into fierce battles.

This unmistakably indicates that the Three Worlds Island entered inside even without completely breaching the big island-protecting array; otherwise, such a situation wouldn't occur.

"I don't know." Zhou Chuang shook his head.

Kang Cheng looked at Zhou Chuang speechlessly, How can you not know? You were just cooperating with Lu Yiye.

Zhou Chuang indeed didn't know; he simply couldn't comprehend the current situation since he had just separated from Lu Ye not long ago.

How exactly was this achieved?

Although he previously cooperated with Lu Ye to kill a Chu Zhu, what does Chu Zhu's death have to do with the current situation? Surely, Lu Ye didn't disguise himself as Chu Zhu to sneak into Baiyue Island?

How stupid would Baiyue's cultivators have to be to let a disguised Moon Jade sneak in? Moreover, with an array covering them, even if Lu Ye had the ability to disguise, it wouldn't be so easy to sneak in.

Even if, implausibly, Lu Ye did sneak in, how did he take people inside?

There were all kinds of inexplicable things, and no one could explain them. What Kang Cheng and Zhou Chuang only knew was that Baiyue Island was in trouble this time.

With enemies breaking in internally, the advantage of the big island-protecting array would be completely lost. The cultivators of both sides could only confront each other within the island. No matter if Three Worlds Island suffered any losses in this battle, Baiyue Island will undoubtedly suffer a major blow to its vital energy!

Silhouettes swept swiftly from all directions, all standing several hundred miles away watching from afar. These were those who, having received the news, hastily came to watch the battle, secretly astounded. How could it have progressed to the point of internal confrontation on the island so soon after the war began?

Soon, a large group of cultivators' silhouettes entered these spectators' view; leading them was surprisingly someone in the Moon Jade Late Stage. Behind him, a full twenty Tiger Shark battleships sailed abreast, followed by nearly a hundred different arrays, rushing towards Baiyue Island with the might to devour the world.

"They are people from Three Worlds Island!" someone exclaimed.

At such a critical time, only the cultivators belonging to the warring sides would gather and rush into the battleground; others wouldn't have the qualification to participate.

The reason they knew these were people from Three Worlds Island was that when Sifang Galaxy secretly spread the news, they exposed Three Worlds Island as well and revealed the grievances between Three Worlds Island and Baiyue Island, letting everyone know the origins of this battle.

Three Worlds Island has gained a bit of fame recently because it became an active island again after being dormant for years, much like Unparalleled Island was before, transforming into a high-class Spirit Island.

On the All Phenomena Ocean, it occasionally happens that Spirit Islands become active, but it is rare for them to transform into a top-class or high-class Spirit Island like Unparalleled Island or Three Worlds Island.

Unparalleled Island is desolate now; Three Worlds Island is rising, and many Moon Jade cultivators have heard about Three Worlds Island's awkward situation.

Baiyue wanted to capture Three Worlds Island and sneak-attacked its Moon Jade. Now that Three Worlds Island is counterattacking, it is only fitting. Cultivators live for the ecstasy of battle—if you hit me, naturally, I must hit back.

What puzzles the many Moon Jade cultivators is from where this group of Three Worlds cultivators came, as there is a considerable distance between Three Worlds Island and here, and there was no forewarning.

What's even more inconceivable to them is that Three Worlds Island has indeed split its forces!

The current chaos inside Baiyue Island is caused by only a part of the Three Worlds cultivators, while another part is racing to the battlefield!

If the big island-protecting array of Baiyue Island were intact, a group of cultivators like this could not possibly pose any threat. Baiyue wouldn't even have to wait for them to approach the island; they could use some of the methods set up on the island to defeat them.

But now... the situation is ambiguous. Even the most experienced Moon Jade cannot predict the outcome of this battle.

While He Baichuan leads five hundred Three Worlds Constellations in a rapid assault on Baiyue Island, powerful enemies also attack from the side of Three Worlds Island.

As starboats approach within three hundred miles of Three Worlds Island, they slow down. A Moon Jade overseeing the operation on the leading starboat gazes solemnly toward Three Worlds Island.

But all they see is a mist, making it impossible to discern the situation inside the island.

Since the last mist spread, enveloping the Spirit Island, the situation has remained unchanged, and no one knows the state inside Three Worlds Island.

The Moon Jade feels puzzled. Their fleet has already reached this position, so Three Worlds Island should have responded in some way, but there's absolutely no movement, as if they haven't noticed the arrival.

This is clearly abnormal.

A sinister scene of Three Worlds Island filled with traps, waiting for them to throw themselves into a death trap, flashes in the Moon Jade's mind.

But the intelligence they received suggests only a few Moon Jades and five hundred Constellations have gone to attack Baiyue Island, leaving, at most, one Moon Jade and a few hundred Constellations to guard Three Worlds Island.

Such a small defending force is hardly worth mentioning. With mist covering the island, it's clearly a deception tactic, confirming the inadequate defense of Three Worlds Island.

After a brief hesitation, the Moon Jade gives the order to attack. No matter what kind of perilous place lies ahead, they'll find out as they fight their way in.

In the contest between cultivators, strength reigns supreme. They don't believe an island as small as Three Worlds Island can withstand the might they've brought!

The attack commences.

Three Worlds Island shows no response, not even a counterattack, with only the protective array silently enduring the assaults.

As the fleet advances within one hundred miles, a surprising scene unfolds: the protective array of Three Worlds Island... has been breached!

Even at this moment, the attacking fleet witnesses no counterattack.

The leading Moon Jade is bewildered. What kind of situation is this? If Three Worlds Island retaliated, it would be normal, but the current situation is bizarre, leaving them unsure how to react.

Although the thought had crossed their mind that perhaps Three Worlds Island is empty, they instinctively feel that is impossible.

This is a high-class Spirit Island; what cultivator would be so careless as to leave it undefended? Allow others to invade unopposed?

After a brief pause for consideration, deployments were made, and Tiger Shark battleships quickly spread out, charging into Three Worlds Island from all directions, vanishing into the dense mist.

News returns swiftly!

Inside Three Worlds Island, not a soul is to be found, nor are any valuable resources left behind.

The entire Spirit Island operates only the big array, which has now been broken.

The leading Moon Jade twitches slightly at the corner of the eye, finding it amusing and frustrating. They've spent all this time strategizing against an empty island?

The cultivators of Three Worlds Island seem sensible enough to have realized they couldn't hold the island and thus evacuated early?

This outcome delights the invading cultivators. Before the campaign began, while they believed capturing Three Worlds Island wouldn't be an issue, they expected to pay a price, possibly losing a few unfortunate cultivators in battle.

But now, having seized a high-class Spirit Island without any cost is a tremendous and unexpected gain!

"Land on the island!" The leading Moon Jade promptly gives the order, forgoing this fortunate gain of a high-class Spirit Island would be unjustifiable!

With this, their faction will have a high-class Spirit Island to occupy.

Their original Spirit Island was merely mid-class, falling far behind a high-class Spirit Island in resources, especially one as vast as Three Worlds Island, which not only provides residence and cultivation for their cultivators but also allows the potential for profitable partnerships with merchants from various factions in the future.

As the Moon Jade in charge of the operation, they will undoubtedly receive the greatest benefits!

The leading Moon Jade momentarily loses restraint, almost bursting into laughter while envisioning a prosperous future.

With their command, the accompanying Constellations also step onto the island, venturing inside and realizing the vast difference between Three Worlds Island and their own island. The Constellations are thrilled, as the improved cultivation environment will significantly boost their cultivation speed and save a considerable amount of spirit jade.

#### Chapter 1737 - All-Out Assault

In the Three Worlds Island, the Moon Jade cultivator at the forefront was lost in daydreaming. Even with the mental fortitude of a peak Moon Jade, the leading cultivator couldn't help but feel a bit elated, thinking his luck was through the roof to encounter such a good thing.

Amid his joy, he didn't forget to send a message to Yu Huan: "Three Worlds Island is unguarded, I have already taken this island!" No matter what, since Yu Huan had sent him a message earlier, this favor must be acknowledged, and he'll share some benefits with him later.

When Yu Huan received the message, he was so agitated he didn't even bother to reply, knowing that there was no one left on Three Worlds Island.

The remaining people of Three Worlds Island were currently approaching Bai Yue Island, about to attack Bai Yue Island's protective array!

Bai Yue Island, established for eight hundred years, had never faced such a time of external and internal troubles.

It was utterly baffling how the people of Three Worlds Island were thinking. Even if Bai Yue had acted against them first, it wouldn't justify the total abandonment of Three Worlds Island for an all-out attack.

Comparatively, the value of Three Worlds Island was undoubtedly greater than Bai Yue. Though both were high-class Spirit Islands, their scales were distinctly different.

Furthermore, how could the cultivators of Three Worlds Island be so confident they can take down Bai Yue?

At this point, they've already lost Three Worlds Island; if they can't conquer Bai Yue Island, they won't even have a foothold in the All Phenomena Ocean in the future.

The people of Three Worlds Island, are they all mad?

Naturally, the people of Three Worlds Island are not mad; no one could make such an extreme decision.

Completely abandoning the defense of Three Worlds Island, they used a Delusion Array to conceal internal situations and confuse enemy probes, relying on the green sea conch and the Small Flower World to transfer the Three Worlds cultivators, exerting all efforts to conquer Bai Yue. This decision was made by Lu Ye!

Because he wasn't afraid of losing Three Worlds Island.

The success of both Three Worlds Island and Unparalleled Island came from the Small Constellation Palace. As long as this magic treasure remained in his control, even if Three Worlds Island were truly lost, it wouldn't matter much. At worst, they could just find another deserted island.

So, while others believed it was necessary to guard their Spirit Island, Lu Ye didn't have this concern; for him, attack was the best defense.

During that Moon Jade assembly of Three Worlds Island, when he proposed this suggestion, everyone initially disagreed, but eventually, he persuaded them.

Among the Moon Jades of Three Worlds Island, Lu Ye had the lowest cultivation, yet his influence was the greatest. If he insisted on something, others naturally couldn't strongly oppose him.

Moreover, with Old Tang having been ambushed, nearly losing his life, everyone was indeed enraged. Plus, Lu Ye's deployment was very reasonable, and the hope of taking Bai Yue Island was significant, which is why this proposal passed.

This led to today's fierce assault on Bai Yue!

Unlike Lu Ye's relaxed mindset, everyone in Three Worlds Island felt this was a battle with no retreat because, at this moment, it's almost certain they've lost Three Worlds Island. Thus, they must capture Bai Yue to compensate for their losses.

When the twenty Tiger Shark battleships and over a hundred formations led by He Baichuan approached Bai Yue Island, Lu Ye and others were under enormous pressure.

Inside Bai Yue Island's three Array Base Halls, there was at least one Moon Jade overseeing each, with over a hundred Constellations under their command. Such power was actually not weak, but this was the enemy's core area, and Bai Yue Island nearly had two thousand cultivators, dividing forces to besiege the three Array Base Halls. One can imagine the pressure faced by the Three Worlds cultivators.

It could be said that the Three Worlds cultivators in each Array Base Hall were facing enemies several times their own number.

Were it not for the protective arrays of the halls themselves, in this disparity of forces, they'd have already suffered losses.

In such a situation, even Lu Ye dared not show himself lightly. The Three Worlds Island was fighting desperately; how could Bai Yue not also be fighting with their backs to the wall? The enemy had already penetrated inside; who dared not to fight to the death?

The three Array Base Halls where the Three Worlds cultivators were hiding were all tightly surrounded, with countless attacks bombarding from all directions, shaking the halls incessantly.

Yu Huan's eyes were red with rage. At this moment, he only cursed Liu Yu and Chu Zhu for setting up the array so sturdily, causing it to be immune to breaches for the time being. But upon reflection, such sturdiness was precisely what he had demanded initially. After all, the Array Base Hall was too important to a Spirit Island, so it should be as solid as possible.

His heart was bitter, never expecting that the painstakingly laid arrays would be of no use to him and instead become a means to aid the enemy.

Of course, if time were sufficient, the arrays of the Array Base Halls couldn't withstand Bai Yue's fierce attack. Without the support of the formations inside, relying solely on the forces of a hundred people per hall couldn't bear the wrath of Bai Yue's cultivators. With such a huge difference in numbers, they would soon be wiped out.

But right now, where is there so much time to waste? The deployment of the Three Worlds Island is interlinked, and in this war, Bai Yue is entirely led by the nose.

"Island Lord Yu, the enemy's battleships and formations are two hundred miles away and about to attack." In the chaos, someone rushed to report to Yu Huan.

Yu Huan's eyes almost popped out of their sockets as he turned to look outside the island, indeed seeing He Baichuan's forces ready to attack.

Twenty Tiger Shark battleships, not large in scale, but certainly not small either, coupled with over a hundred formations, this is a force not to be underestimated.

Especially in the context of four Array Bases being destroyed in the early stage, Yu Huan really didn't know how much more the big island-protecting array could hold out.

"Junior Sister Meng, Junior Sister Meng!" he quickly called out.

Junior Sister Meng, who was leading the attack on an Array Base Hall, quickly arrived.

Yu Huan urgently said, "Quickly lead people to set up defenses. Additionally, ensure the remaining four Array Base Halls are flawless."

The array bases must not be destroyed anymore. Currently, four remain, and they can still keep the big island-protecting array running. If one or two more are destroyed, we won't need to wait for the enemy to attack; the big island-protecting array will collapse on its own.

"Yes!" Junior Sister Meng received the order and immediately directed people to leave with a large group.

The pressure on Lu Ye and the others greatly reduced!

Soon, the sound of explosions echoed; the twenty Tiger Shark battleships of He Baichuan's division began a strong assault on Baiyue Island. About half of the formations formed by the Three Worlds cultivators joined in the attack cooperatively.

The reason only half of them attacked was mainly because the other half of the arrays weren't suitable for long-range attack methods, and they have other tasks.

Even separated by two hundred li, when the attack hit the big island-protecting array, ripples appeared on the light curtain of the big array. If Junior Sister Meng hadn't brought people to stabilize the remaining four intact array bases in time, such attacks may only need a few rounds to completely break it.

After three rounds of attack, the big array still maintained, but the strength had noticeably weakened. This was the adverse effect brought by incomplete array bases; if all eight array bases were intact and there were enough personnel to manage and maintain it, the methods from He Baichuan's division wouldn't have any effect.

Next, the counterattack from Baiyue Island arrived!

A well-arranged Spirit Island not only has a tough and unbreakable big island-protecting array, but around the Spirit Island, there would also be a large number of defenses against external enemies, which can counter-attack those who invade.

For instance, some offensive formations arranged with magic treasures as the Array Eye. If financially capable, you could even arrange Tiger Shark battleships within such formations, maximizing the power of the Tiger Shark battleships.

The Baiyue cultivators have been entrenched here for eight hundred years; even though they never experienced such warfare before, the necessary arrangements are certainly not lacking.

At this moment, under Junior Sister Meng's coordinated command, waves of counterattacks were launched.

He Baichuan's division remained unmoved; dozens of formations that hadn't attacked earlier simultaneously unleashed the power of their arrays. Among the dazzling lights, arrays of different forms almost came to life, turning into robust defenses.

The defensive lines formed by arrays stretched into a solid wall, blocking the assaults from the Spirit Island for the personnel responsible for attacking.

A round of defense, not a single injury.

The attack from their side was stimulated once more.

The battle for offense and defense on the outside of the island ignited across a distance of two hundred li; before the big island-protecting array of Baiyue Island was completely broken, He Baichuan's division couldn't force closer, as doing so posed too great a risk, and even if approaching, they couldn't set foot on the island.

The number of cultivators coming to watch increased more and more; a battle for a high-class Spirit Island seemed to draw the gaze of the entire All Phenomena Ocean.

After all, it's quite rare. Many cultivators had never seen such warfare break out on a high-class Spirit Island before; comparing to this, battles for mid-class and low-class Spirit Islands seen before were like child's play.

While the fierce battle raged outside the island, inside an Array Base Hall on the island, Lu Ye led Ma Shangsi forward.

Earlier, when Baiyue Island had all its forces concentrated inland, three Array Base Halls were suppressed without any power to resist, relying only on the formation of the hall to maneuver.

But now, the appearance of He Baichuan's division drew nearly half of Baiyue Island's forces away, and Lu Ye could clearly feel the pressure here had weakened.

Opportunity... has arrived!

"Open a gap in the formation; in three breaths, everyone charge out!" Lu Ye ordered while moving forward.

In this hall, over a hundred people responded in unison to the order!

As Lu Ye and Ma Shangsi approached the forefront of the hall, the cultivator responsible for maintaining the formation immediately opened a gap.

This move was extremely risky because outside the hall, enemy attacks were relentless. If there was no gap in the formation, survival was possible, but once a gap was opened, it couldn't be closed again.

This was also why Lu Ye ordered everyone to charge out after three breaths; if they didn't fight their way out, once the hall formation was breached, staying here meant becoming a sitting target.

The gap was opened, and Lu Ye turned his head.

Ma Shangsi's expression was fierce, a decisive stance of facing thousands without retreating, charging out through the gap.

The next moment, an unknown number of attacks struck him, and even though he was a Peak Moon Jade cultivator, in that instant, he was beaten into shreds, blood splashing, his entire being exploding.

The Moon Jade cultivator responsible for leading the attack on this hall was Baiyue's Su Yuming, with Late Moon Jade cultivation, also one of the remaining four Moon Jade cultivators on Baiyue Island.

He received Yu Huan's fatal order to block the enemy in the hall no matter what, killing anyone who dares expose themselves. He assumed they were hiding in the hall, expecting a drawn-out battle. But unexpectedly, in this move, they truly killed one, and it was a Moon Jade!

#### Chapter 1738 - Rout

To have killed a Moon Jade from the enemy side was no small achievement, and Su Yuming, who was stationed there, couldn't help but pause in surprise.

It was in this very moment of distraction that the unexpected happened.

A dazzling point of blood light burst forth, then swiftly expanded, spreading rapidly in all directions.

Su Yuming's eyes narrowed as he quickly retreated, shouting, "Blood Technique! Get out of the way!"

He finally understood that the Moon Jade wasn't dead, because there was no sign of a Moon Jade's downfall when the opponent's body exploded—that was the moment the opponent seized the opportunity to perform a Blood Technique.

Moreover, judging from the speed at which the blood-red light spread, the opponent's mastery of this Blood Technique was clearly profound.

His reactions were swift, so he avoided the enveloping Blood Sea, but his subordinates, the Constellation cultivators, did not have such reflexes. Of the two thousand cultivators from Baiyue Island, half had been deployed to maintain the big island-protecting array and to counterattack He Baichuan's invading forces; the remaining thousand were besieging the three Array Base Halls, leaving three to four hundred Constellation cultivators here.

When Ma Shangsi's Blood Sea unfolded, these three to four hundred Constellations were instantly enveloped, with none spared. The sight made Su Yuming's eyes nearly burst with rage.

The next moment, he realized that within the Blood Sea, the presence of Constellations began to fade at a rapid pace—one after the other, as though an ancient ferocious beast had awakened within the Blood Sea and was devouring his fellow cultivators' lives.

He quickly understood—it was Lu Ye who was acting because only with a Moon Jade's involvement could the Constellations die so quickly, filling him with grief and anger.

Fortunately, the Baiyue Island cultivators were not fools. Despite the sudden upheaval and the abrupt entrapment in the Blood Sea, although most appeared panicked, they quickly mobilized their powers to stir the Blood Sea.

Ma Shangsi was indeed powerful, and the Blood Sea was formidable, but to trap three to four hundred Constellations by himself was impossible. By stirring the Blood Sea, the Constellations caused turbulence and drained his energy. It would take only a little while to break through the Blood Sea.

Over a hundred Three Worlds cultivators charged out from the hall, forming formations using the As-Close-As-Siblings Array Disc, grouping in threes and fives. Under Ma Shangsi's assistance and guidance, they hunted the enemies within the Blood Sea.

Not to mention, Lu Ye, who burst out of the hall with Ma Shangsi, was wreaking havoc in the Blood Sea. With his current Moon Jade power, how could Baiyue's Constellations possibly resist?

With each passing breath, cultivators were falling.

Su Yuming, who had managed to escape the Blood Sea's range in time, had veins pulsing across his forehead as he frantically unleashed his power toward the Blood Sea, hoping to aid his Constellations in breaking it quickly and rescuing them.

But only three breaths later, he was filled with despair.

In this brief span of three breaths, the number of Constellations fallen in the Blood Sea had already reached fifty! Though the vast Blood Sea was relentlessly being disrupted, it could still hold for another seven or eight breaths.

Three breaths, fifty people—if it continued for another seven or eight breaths, wouldn't over a hundred more die? There were only three to four hundred Constellations here in total.

Such a huge loss was something Su Yuming couldn't accept at all, so after a moment's hesitation, he hurled himself toward the Blood Sea.

Despite having wisely evaded the Blood Sea's shroud moments ago, he now had no choice but to dive in voluntarily in an attempt to break it faster—what an ironic and helpless situation.

Yet, only by delving deeply into the Blood Sea could he have confidence in breaking it more swiftly to rescue his comrades.

Su Yuming truly lived up to being a Late Stage Moon Jade; as he entered the Blood Sea, his fierce and turbulent mana made the entire Blood Sea seem on the verge of boiling.

Just as Lu Ye was savagely killing enemies within the Blood Sea, Ma Shangsi's voice came through to him: "Saintly Venerable, I can't hold on much longer!"

It wasn't that he wasn't strong enough, but simply that there were too many cultivators battling within the Blood Sea. Not counting Lu Ye and Su Yuming, there were already several hundred Constellations. All these clashes had to be borne by the Blood Sea; that he held on for several breaths was already a testament to his profound strength.

At these words, Lu Ye immediately steadied himself, and in the next moment, he executed a Blood Technique—the blood-red hue more intense than before emanated from him, extending outward.

In addition, within the Blood Sea, under Lu Ye's audio transmission, another figure activated a Blood Race secret technique.

Lann Qiyue!

Though she was only at the Early Stage of Constellation cultivation, the unique nature of the Blood Race's Blood Techniques ensured that she could also make her mark on this battlefield.

Su Yuming's judgment wasn't entirely wrong. If it were merely a Blood Technique, his act of diving in would indeed allow him to break it more swiftly and rescue his Constellations.

Yet little did he know, this wasn't a mere Blood Technique but a Blood Race secret technique executed by a Peak Moon Jade Blood Race!

While both might appear similar on the surface and even indistinguishable to others, the critical difference was that the Blood Race's Blood Sea could merge and grow stronger.

This misjudgment was fatal!

Consequently, his expression soon turned bewildered because just as the Blood Sea, unstable and on the verge of being broken, suddenly became a lot more stable.

And with the eruption of a massive energy burst deep within the Blood Sea, this newfound stability became even more apparent!

Lu Ye detonated a drop of his own treasure blood!

The detonation was necessary. To annihilate the enemies trapped in the Blood Sea, the Blood Sea must be maintained for a sufficient length of time. However, even with him and Lann Qiyue assisting secretly, so many people battling within the Blood Sea couldn't hold it for long.

A drop of treasure blood might only extend the Blood Sea for a few more breaths, but it should be enough.

Outside, He Baichuan's forces were deploying strong offensive measures. To quickly open a gap, breakthrough from this direction was required. Should any fish slip through the net, our side's forces won't have the advantage, leading to significant casualties.

From the beginning, Lu Ye planned to utterly eradicate Su Yuming's forces.

The alliance with Ma Shangsi must achieve the greatest battle result in the shortest time!

With the reinforcement of treasure blood, the Blood Sea truly became more stable.

Lu Ye turned to Ma Shangsi's direction and instructed, "Keep an eye on that Moon Jade, since he has returned, let him stay!"

Originally, when Su Yuming escaped, Lu Ye felt a bit regretful. Killing a Constellation and killing a Moon Jade have different effects. In such a battlefield, if the enemy loses a Moon Jade, it would inevitably deal a tremendous blow to their morale.

He initially planned to deal with the Constellation enemies within the Blood Sea first, then find a way to team up with Ma Shangsi to eliminate the Moon Jade.

Unexpectedly, the adversary actively returned.

Su Yuming's plans were clear to Lu Ye. One had to admit, this willingness to risk danger for his Constellation subordinates was commendable, yet admiration aside, he was still the enemy, and there was no reason to hold back.

Receiving orders, Ma Shangsi immediately charged towards Su Yuming.

Originally, he had to maintain the stability of the Blood Sea and assist the Three Worlds Island Constellations in fighting the enemy, rendering him immobile. But now things were different. Lu Ye and Lann Qiyue's Blood Sea had merged, allowing Lu Ye to help bear the pressure of maintaining the Blood Sea, while assisting in killing the enemy fell to Lann Qiyue. Thus, he could spare some strength to target Su Yuming, entangling the opponent!

Outside Baiyue Island, numerous observing cultivators' gazes were focused entirely on this area of Blood Sea. The uninvolved spectator sees clearly. Yu Huan et al. might not grasp the changes here, as they were fiercely contending in their own battlefields, but the observing cultivators saw everything clearly.

No one knows the situation within the Blood Sea. The big island-protecting array blocks it, making perception unclear. Only a vague awareness that life's breath within the Blood Sea was continuously dwindling.

Everyone changed color, realizing that the battlefield within the Blood Sea would be a critical victory point in this battle for Spirit Island. Whoever wins here gains absolute advantage.

Was it the prepared Three Worlds Island or the profoundly rooted Baiyue Island?

No one knew; everyone watched eagerly.

Within the Blood Sea, Su Yuming was entangled by Ma Shangsi. Even giving his all couldn't free him, and witnessing familiar presences perish around elicited horror within.

Suddenly, he realized trespassing into the Blood Sea was a mistake, but what's done was done; regret was futile.

Anger transformed into flames burning within, and amid fluctuating mana, managed to drive Ma Shangsi back step by step.

This wasn't due to him being stronger, but Ma Shangsi had consumed significant energy conjuring the Blood Sea, furthermore, Lu Ye's command was to entangle Su Yuming. The opponent now displayed desperation, thus Ma Shangsi naturally avoided his sharpness.

Being inadvertently drawn into mutual destruction by the enemy wouldn't be worth the cost.

In the battlefield of the Blood Sea, Baiyue Island initially held an absolute numerical advantage, but with time, this advantage dwindled, then was neutralized and turned into a disadvantage.

Defeat breaks like a collapsing mountain!

Among the competing Constellation cultivators, the inclusion of Lu Ye, a Moon Jade, sentenced Baiyue cultivators to grim fates. Within the Blood Sea's environment already unfavorable to Baiyue cultivators, those targeted by Lu Ye rarely survived beyond a single strike.

Having occupied Baiyue Island for eight hundred years, they've seen skirmishes, yet such large-scale conflicts had never been encountered.

Conversely, on the Three Worlds cultivators' side, those from Jade Conch and Qingli Dao World might lack war experience, but Nine Provinces cultivators had fought through countless battles.

This scale of conflict was but a small event compared to previous Nine Provinces army counterattacks against the Insect Race Great Secret Realm or expeditions to the Blood Refinement World.

Moreover, Nine Provinces cultivators were fearless, and their combat style was brutal. Even if Jade Conch and Qingli Dao World cultivators lacked experience, they were spurred into action.

Thus, although numerically inferior, when Ma Shangsi burst out of the Array Base Hall, casting the Blood Sea, Baiyue cultivators' downfall was inevitable.

A few breaths later, Baiyue Constellation forces within the Blood Sea were completely annihilated.

Su Yuming was direly endangered.

Originally battling Ma Shangsi alone, amid latter's avoidance, he seemed fierce. But when Lu Ye joined in, master and servant attacking together left Su Yuming utterly powerless.

Chapter 1739 - How Did He Do It?

Outside Jade Conch World, Lu Ye and Ma Shangsi together had slain many Filth Race Moon Jade cultivators, even those at the peak of Moon Jade couldn't escape death.

Though Su Yuming was strong, he couldn't withstand the sharpness of the Boulder Mountain Saber and the cooperation with Ma Shangsi's Blood Attraction Technique.

Trapped in the Blood Sea, Su Yuming was already at a great disadvantage, and now facing the ruthless master-servant duo's combined attack, he couldn't resist at all.

After just a brief moment of battle, several deep wounds appeared on his body, visible down to the bone, yet these wounds showed no signs of healing at all, a strange force lingering around them, preventing his strong regenerative abilities from taking effect. Ma Shangsi despicably drove the Blood Attraction Technique, causing his wounds to gush with fresh blood.

Su Yuming knew that he feared the odds were against him this time, at the brink of life and death, he instead calmed his mind, his eyes resolute.

Even if he died, he had to take someone down with him!

The less formidable Lu Ye was undoubtedly his target.

While struggling, he tried to find an opportunity, but what made him despair was Lu Ye's flickering, ghostly movements, leaving him absolutely no chance.

Since acquiring the inheritance of Yien Xi's Brazen Plundering Technique, Lu Ye had experienced several battles, and now, while not quite mastering the technique to perfection, he was undoubtedly much improved from his original novice state.

Moreover, hidden by the Blood Sea, it would've been strange for Su Yuming to catch even a glimpse of him.

Yet he still hung on, hoping to find that last glimmer of opportunity.

The opportunity truly came!

In his senses, Lu Ye's aura swiftly closed in, and almost the instant Lu Ye approached, Su Yuming's teetering flame of life unexpectedly flared up brilliantly, his mana surging furiously, his magic treasure fiercely swung towards Lu Ye's direction, shouting loudly: "Let's die together!"

This strike, he infused with all his remaining strength, without any defense, so even if Lu Ye didn't kill him, he would die at Ma Shangsi's hands.

But if he could drag Lu Ye down with him, making him a companion in death, it was still worth it.

His only worry was that Lu Ye might perceive the danger and retreat on his own.

Lu Ye didn't retreat, the Boulder Mountain Saber directly met his full-powered strike head-on, amidst the collision of forces, Su Yuming's eyes widened suddenly as if seeing a ghost in broad daylight, filled with a look of disbelief.

Because during this moment of force collision, he unexpectedly sensed he was somewhat outmatched!

How was this possible? He was at Moon Jade Late Stage, while the opponent was only at the Early Stage, even though he was now at the end of his strength, a dying strike should still not be underestimated. How could the opponent's foundation be... this strong?

Previously, Lu Ye had only been employing the Brazen Plundering Technique, continuously eroding his strength and fighting spirit, so Su Yuming had no way to assess the depth of Lu Ye's foundation until this final head-on clash!

In shock, the mana had already collapsed, massive force rushing at Su Yuming, making his figure unstable, even his magic treasure flew from his grasp.

Then, came the explosion of a big sun, completely enveloping him, the big sun bloomed like a lotus, countless petals spun and fluttered, each petal was the ultimate condensation of saber light.

Tyrannical Saber Third Style, Lotus Sun!

The explosive moment was extremely distinct, causing the cultivators observing from Beyond Baiyue Island to exclaim loudly, everyone stared unblinkingly at the Blood Sea, eager to know the final outcome because they vaguely sensed the aura of Moon Jade's demise.

This undoubtedly meant that the battle in this stretch of battlefield had ended.

Under numerous attentive gazes, the Blood Sea quickly withdrew, followed by a breathtaking scene.

In front of the ruined Array Base Hall, over a hundred figures floated in mid-air, led by two Moon Jade cultivators, the rest forming an array stance, murderous intent loomed thickly.

In addition, hundreds of battered corpses previously enveloped by the Blood Sea, fell like raindrops to the ground below as the Blood Sea vanished.

The whole world fell silent.

Everyone stared, trembling, at the falling corpses, some recognized one among them was Su Yuming, a Moon Jade Late Stage from Baiyue Island!

Even a formidable cultivator like Su Yuming had perished in battle, undoubtedly indicating that the Baiyue cultivators suffered total annihilation within this battlefield!

"How did they accomplish this?" By Zhou Chuang's side, Kang Cheng's eye twitched incessantly.

Given the substantial numerical disparity, even though Three Worlds Island had an additional Moon Jade, how could they have exterminated the enemy entirely in such a confrontation, without their side sustaining any losses? Kang Cheng didn't understand because replacing them with him and Zhou Chuang leading an equivalent number of Four Worlds cultivators, it certainly wouldn't result in this achievement, even ultimately victorious, it would surely be a Pyrrhic victory.

But turning to Three Worlds Island's side, the battle concluded swiftly in just half a tea's time, with tremendous results.

"Senior Brother Su!" From another Array Base Hall came a sorrowful cry, none other than Jiang Jiao, one of the Moon Jade governors from Baiyue Island.

The Moon Jade cultivators from Baiyue Island hailed from the same Star System, yet they did not originate from the same domain, akin to the situation on Three Worlds Island.

Among the Moon Jade governors, only Jiang Jiao and Su Yuming were from the same domain, with the deepest bond. Seeing Su Yuming die in battle at this moment, he was of course overwhelmed with grief and anger.

In fact, as soon as he detected that Su Yuming's situation was unfavorable, he wanted to support him.

However, he had his own task on this side, leading hundreds of Constellations to trap Luan Xiao'e's faction. Whenever he attempted to go to aid, Luan Xiao'e would act as if to charge out of the Array Base Hall, forcing him to remain immobilized, ultimately watching Su Yuming die in battle.

After his sorrowful cries, he immediately turned his head, his gaze red as he stared at Luan Xiao'e inside the Array Base Hall. Gritting his teeth, he growled lowly, "I want you all dead, I want to kill everyone from Three Worlds Island!"

Luan Xiao'e only stared at him coldly, speaking indifferently, "The quarrel was not started by us; you initiated it. What goes around, comes around!"

Jiang Jiao was stunned for a moment, becoming even angrier, shouting furiously, he madly channeled mana toward the hall, causing the Formation within the Array Base Hall to tremble unstably.

In front of another Array Base Hall, Yu Huan was also roaring, "Break the big array for me!"

He was genuinely urgent because if they did not quickly break the array of the Array Base Hall and eliminate the enemies inside, the situation on Baiyue Island would worsen.

The battle for Spirit Island was divided into four battlefields, three of which were the three Array Base Halls. The other was naturally the battlefield where He Baichuan's faction was.

Currently, Three Worlds Island had opened a gap in one of the battlefields, securing a complete victory, but overall, Three Worlds Island was still at a disadvantage because the numbers were undeniably in the opposition's favor.

He Baichuan's faction found it hard to land on the island; they must break the big island-protecting array of Baiyue Island to get the opportunity.

Luan Xiao'e and Yann Miao's faction of Three Worlds cultivators were trapped in the two Array Base Halls, relying on the hall's Formation to continue holding on, but the risk was enormous.

Therefore, Yu Huan was urgent on that side, Lu Ye and others were equally urgent on this side, both parties wanting to gain the upper hand in the next step of confrontation.

Three Worlds Island won the first step, but if they can't seize the initiative afterward, it's still unable to secure victory.

Hence, when Ma Shangsi withdrew the Blood Sea, Lu Ye had no intention of aiding Luan Xiao'e and Yann Miao. Instead, he led over a hundred directly outward to kill.

He Baichuan's faction was the focus of this battle, and they must be quickly brought into the island to increase their side's advantages!

In a battlefield of thousands, Moon Jade played a significant role, undoubtedly, but winning comprehensive victory also required numerous Constellations, especially when Constellations could use the As-Close-As-Siblings Array Disc to form arrays. A few Late Stage Constellations forming an array could almost be considered equivalent to Moon Jade.

The As-Close-As-Siblings Array Disc has been circulating for several years, and its price has been gradually dropping. Nowadays, in All Phenomena Ocean, while not every Constellation has an array disc, at least on Baiyue Island, several Constellations share one, allowing them to form arrays using the disc.

Earlier, the Constellations killed in the Blood Sea had almost all formed arrays.

For Three Worlds Island to win, they must attempt to reduce the disparity in numbers, although this gap can never be fully closed, allowing He Baichuan's faction to break in can recover some disadvantages.

Additionally... the cultivators entangled with He Baichuan's faction are the easiest to kill, because they have to host defensive Formations, naturally scattered widely.

Whereas if Lu Ye were to lead people with Ma Shangsi to aid Luan Xiao'e either, it would have no decisive impact on the overall battle situation.

As soon as Lu Ye and others moved, Yu Huan panicked, gritting his teeth and yelled, "How dare you!"

But why would Lu Ye pay him any mind? He led the charge straight toward the outskirts of Baiyue Island.

Yu Huan was at a loss, unsure whether to continue attacking Yann Miao's faction or intercept Lu Ye and Ma Shangsi.

In that instant of delay, Lu Ye had already reached a counterattack array. Here, twenty Constellations gathered together; some focused on pouring spirit force into the array, others activated the Formation's power, while others managed the magic treasure in the Array Eye, each performing their duties, orderly and methodically.

When Lu Ye suddenly attacked, these people didn't react at all, still entangled with He Baichuan's faction outside the island.

By the time they sensed something was wrong, it was too late.

Lu Ye, like a gust of storm, swept over the array, saber light flashing, screams sounded, and blood splashed.

He didn't pause at all, rushing straight ahead, leaving behind a chaotic mess.

Among the twenty Constellations, more than half died instantly, as if chopping vegetables. The remaining ones were alive but wounded.

The surviving Constellations stood up blankly, but what greeted them were Ma Shangsi and over a hundred Three Worlds Constellations following the slaughter led by Lu Ye.

One drag, one strike, two rounds of assault brought this side's twenty Constellations to their deaths, leaving the counterattack array in ruins.

Ahead, Lu Ye was like an arrow released from the bow, leaving a trail of blood and gore, astonishing the watching cultivators.

Even from several hundred miles away, the cultivators could feel that Lu Ye was merely an Early Stage Moon Jade.

Yet, when had they ever seen such a brutal Early Stage Moon Jade!

Chapter 1740 - Array Destruction

The defensive arrangement of a Spirit Island is generally divided into two types: one is the big island-protecting array, the most relied upon and the strongest form of defense for every Spirit Island.

But if an enemy attacks, merely taking the hits without retaliating won't work; no matter how strong the protective array, it cannot withstand an endless assault.

Therefore, aside from the big island-protecting array, each Spirit Island has preparations for counterattacking invading enemies.

The foundation of the protective array lies in the array base, while preparations for counterattacking invading enemies are different formations, all of which are set up in the outer areas of the Spirit Island.

Because they are on the outskirts, observers can clearly see the fierce battles happening here.

Lu Ye burst out from the Array Base Hall, his form like lightning, sweeping through one big array after another, wherever his blade pointed, none could stand against him.

The arrays were collapsing, Baiyue cultivators were injured or killed, and those who were lucky enough not to die instantly were torn apart by the following Ma Shangsi and Three Worlds cultivators.

In just ten breaths, Lu Ye sprinted across fifty miles, tearing a huge gap in Baiyue Island's outer defense line!

As he had thought before, these cultivators were very scattered within the defensive line as they controlled the formations, taking them by surprise proved to be greatly rewarding.

However, after fifty miles, Lu Ye also had to halt his advance.

Using Moon Jade's body to slay a Constellation was indeed easy, but slaying many still consumed a great amount of energy.

Even though he was strong, it's impossible for him to single-handedly penetrate Baiyue's defensive line completely; breaking through fifty miles was only because the cultivators here were caught completely off guard.

Now that Baiyue's cultivators were prepared, achieving the same results would not be as easy; at the very least, the enemy could now form battle arrays.

Moreover, there was a Moon Jade overseeing this area, Junior Sister Meng, who was pulled out by Yu Huan at the start of the battle; with her stationed at the frontline, how could she just watch Lu Ye slaughter their Constellations? So, after sensing something was amiss, she immediately led a group toward Lu Ye, intercepting him.

The clash was brief; as Ma Shangsi led the Three Worlds cultivators to arrive, Junior Sister Meng, although frustrated, could only retreat to reorganize her forces.

Lu Ye regrouped with Ma Shangsi and others without a moment's pause, continuing their combined efforts to push forward, demolishing the enemy's defense line.

Soon, Junior Sister Meng, reuniting her forces, returned to confront Lu Ye and his group head-on.

Baiyue Island had a total of two thousand cultivators. In this battle, the total attacking the three Array Base Halls amounted to about one thousand, leaving the remaining thousand stationed at the intact four Array Base Halls and the external defensive lines.

At the four Array Base Halls, each hall had roughly a hundred people, summing up to four hundred, so Junior Sister Meng could commandeer about six hundred people.

But these six hundred were very dispersed due to the long defensive line, and having lost some to Lu Ye earlier, Junior Sister Meng could hurriedly muster about three hundred people, while another three hundred remained immobile due to the protective array still standing, needing to hold their ground.

On the surface, Junior Sister Meng's side had more people, but Lu Ye's side had two Moon Jades, neither force inferior to hers, so the confrontation quickly reached a stalemate.

As the battle between Lu Ye and Ma Shangsi versus Junior Sister Meng erupted, He Baichuan led his five hundred subordinates towards the breach in the defense line.

Upon his command, a deluge of attacks from the breach stormed towards the big island-protecting array.

The big array was on the verge of collapse!

Before this, they had already placed a considerable burden on the protective array, but at that time, counterattacks from the other side prevented them from unleashing their full strength; now, however, there were no such worries.

Without concern for the enemy's counterattacks, just vigorously attacking the big array, all five hundred cultivators fought as if their lives depended on it.

A cacophony of violent sounds echoed incessantly, shaking the entire Spirit Island.

Had the Spirit Island on All Phenomena Ocean not been special, such a violent battle would have already turned it to dust.

The witnessing cultivators immediately understood upon seeing this scene that Baiyue's big island-protecting array... could not hold!

It was not that Baiyue was weak, nor that the protective array accumulated over eight hundred years was frail, but rather that Three Worlds Island's attack rhythm was impeccably planned; the Baiyue Islanders were utterly led by the nose.

The gravest mistake in such a battle is precisely this; Yu Huan's incompetence in commanding such a scale of warfare could not be more apparent, but this wasn't primarily his fault; it was because after the conflict erupted, Lu Ye's side coordinated one strategy after another, leaving him no choice but to react passively.

In just half a cup of tea's time, with another fierce assault from He Baichuan's forces, the big island-protecting array, which had withstood eight hundred years on Baiyue Island, shattered with a loud crash!

At the moment of the array's collapse, every Baiyue cultivator felt their hearts sink; Moon Jades' faces turned especially pale.

Behind He Baichuan, the rallying cries of five hundred Constellations pierced the sky, their lust for battle almost tangible, as they charged down into the island under his command.

The road ahead was clear, with nothing to obstruct them!

In the battlefield where Lu Ye and others were, Junior Sister Meng gritted her teeth, exerting all her effort to contend against Ma Shangsi.

Lu Ye paid her no mind; it's not that he didn't want to, but that he couldn't. Their own Constellation numbers were considerably lacking, and without his central coordination, his side would certainly suffer many casualties. Thus, he could only first find ways to kill the opposing Constellations, equalizing the disparity in Constellation numbers.

Moreover, for him, killing a Constellation is undoubtedly much easier than killing a Moon Jade.

In this half a cup of tea time, he has killed dozens of Constellations.

Back when the As-Close-As-Siblings Array Disc was auctioned at the Constellation Palace, Lu Ye knew that this thing would definitely change the pattern of the All Phenomena Ocean, because the array disc could allow some well-endowed Constellations to contend with Moon Jade to a certain extent.

He never expected that one day he would also be constrained in this regard.

Under the array of the Baiyue Island's Constellations, it wasn't that easy for him to kill, but he had already achieved an excellent result with dozens of people in half a cup of tea time. He had to face at least seven or eight formations' encirclements every moment.

Under the threat of Lu Ye, the Baiyue Constellations were obviously hesitant in the combat, because nobody knew if he would suddenly attack, while the Three Worlds cultivators were unstoppable. Therefore, even though the Baiyue had greater numbers on this battlefield, they were clearly at a disadvantage.

The moment He Baichuan and his men broke through the island-protecting array, the Baiyue cultivators clearly showed reduced fighting spirit, and the situation became increasingly dire.

Almost simultaneously with the breaking of the island-protecting array, a strong Mental Consciousness suddenly diffused from the direction of a certain Array Base Hall, encompassing the entire Spirit Island.

Lu Ye slightly sensed it, and immediately realized that the source of this Mental Consciousness was Yu Huan!

This guy was obviously using Mental Consciousness for audio transmission, deploying something.

Sure enough, as the Mental Consciousness fluctuated, many dispersing cultivators on Baiyue Island immediately abandoned their original battlefields and swiftly moved towards one direction.

Junior Sister Yu, who was entangled with Ma Shangsi, also activated the power of a magic treasure, disorientating Ma Shangsi's senses amidst the brilliant light, and retreated quickly. An abnormal red glow rose on her body, undoubtedly using some kind of Escape Technique to swiftly leave the battlefield.

Her method was undoubtedly wise, because Ma Shangsi's cultivation was, in fact, slightly higher than hers. Under normal circumstances, if she was entangled by Ma Shangsi, it wouldn't be so easy for her to escape. Taking advantage of the momentary distraction caused by the magic treasure, she saw the chance to break free.

This demonstrates that Junior Sister Meng was also a veteran of many battle arrays, with ample combat experience.

While escaping, she specifically sensed Lu Ye's position. In this battlefield, only Lu Ye and Ma Shangsi, the two Moon Jade, posed a threat to her. Having evaded Ma Shangsi, naturally, she had to guard against Lu Ye.

Lu Ye was a few dozen miles away, competing with several Constellations who had formed an array.

Junior Sister Meng's heart relaxed...

However, in the next moment, a sense of warning surged!

Out of the corner of her eye, she suddenly caught a glimpse of a flash of light nearby, and immediately felt a chill run through her body. The ominous sound of a sword humming resonated; the unparalleled strike already enveloped her body and mind.

"Sword cultivator!" Junior Sister Meng was aghast, never expecting that such a powerful sword cultivator was hidden on this battlefield.

She had been focused on guarding against Lu Ye and Ma Shangsi, completely failing to notice this sword cultivator's presence. The opponent seized the opportunity to strike when she was momentarily relaxed, timing their move with extreme precision.

Moreover, sword cultivators are known for their unrivaled lethality. At such a moment, being ambushed by a sword cultivator leaves her with no good outcome.

The sword light struck, and in her haste, Junior Sister Meng activated her Protective Dharma Treasure's power, barely warding off the incoming force.

Yet in the next instant, she fell into despair, for the opponent's assault didn't stop; the fierce, unparalleled sword light was not just one!

But several in total!

The hastily activated Protective Dharma Treasure was shattered, the sword light sliced across her body, bringing forth a spray of blood.

Junior Sister Meng's figure flew away like a kite with a broken string, and as she tumbled, finally captured the image of the sword cultivator who ambushed her.

The sight astounded her beyond belief.

Because that person looked exactly like Lu Ye.

Junior Sister Meng was somewhat confused, Lu Ye was clearly within her guard, how could there possibly be another Lu Ye here?

But she quickly understood, this sword cultivator was not Lu Ye, just someone who looked identical to Lu Ye.

So the Moon Jade of Three Worlds Island...are twins?

Lu Ye was naturally not a twin; the sword cultivator was just his Talent Tree Avatar. Back during the battle in front of the Array Base Hall, Lu Ye had taken advantage of the Blood Sea's concealment to manifest his sword cultivator avatar.

The Talent Tree Avatar was different from the Treasure Blood Avatar. The Talent Tree Avatar could utilize the Talent Tree's powers and naturally conceal its own presence and hide its form.

In different circumstances, Junior Sister Meng might not have been unaware. Her strength was formidable, but in such a chaotic battlefield with both sides engaged in a large-scale clash, it was indeed very easy for the Talent Tree Avatar to hide.

The avatar had not acted, waiting to catch Junior Sister Meng off guard. Lying in wait, it finally seized this opportunity and indeed caught Junior Sister Meng unprepared.
