

Infinite 1001

Chapter 1001: Su Yu Reveals His Identity

As time rewinds, everyone returns to the original gathering space and sits back in their chairs.

Of course, the ones returning to the gathering space are only the original tens of millions of people; the rest of the rebels have already gone home under the power of time retrospection.

Under the power of time retrospection, nothing has happened.

In the gathering space, all the rebels can't help but smile, recalling from their previous experiences that no matter how dangerous it is, as long as time retrospection is activated, everything becomes safe.

Along with their joy, there is also a sense of relief on their faces for surviving the ordeal.

After all, launching a general attack on "Supreme Ruler Su Yu" this time was incredibly risky.

They almost lost their Great Commander Song Ming in Tyrant Su Yu's palace.

"This general attack was really dangerous!"

"Yeah, that Tyrant Su Yu is really terrifying, what kind of power is that?!"

"If we die under such power, it's possible that even time retrospection can't bring us back!"

"Nonsense, the Great Commander's power is invincible. No matter how strong Tyrant Su Yu's power is, as long as we keep using time retrospection and accumulating strength, one day we can defeat him and overthrow him! Don't be intimidated by him!"

"That's true too..."

The crowd discusses animatedly.

The terror of the power of [Destruction] is deeply etched into everyone's mind. Even if they haven't been harmed by [Destruction] at all, just sensing a trace of it from afar seems to make them deeply understand the horror of this power.

This is the most instinctive fear of life.

A fear even more profound than physiological instincts engraved in genes.

Although they are extremely fearful of [Destruction], everyone remains optimistic.

After all, with Song Ming's time retrospection, no matter how strong the power they face, they have confidence they can overcome it.

While in the crowd, Su Yu lifts his head to glance at the sky, where Pain Evil God's position is.

Su Yu knows that time retrospection cannot affect Pain Evil God, let alone affect [Destruction].

Sharing the same thoughts is Song Ming, who has returned to the stage, whose expression is also somewhat grim.

At this moment, the discussion among the rebels suddenly shifts to Su Yu.

"By the way, the one who entered the Tyrant's palace with Song Ming Great Commander... Su Yu? What's his story?"

This topic silences the room instantly.

Except for Song Ming Great Commander, everyone cannot take a step forward in front of [Destruction].

This suddenly appearing Su Yu, however, could withstand the pressure, break through, and enter the Mechanical Palace with Song Ming, and return safely.

Moreover, when the two came out, Su Yu seemed to be in better shape.

In contrast, Song Ming's condition was worse, needing "Void Incarnation" to recover his body.

Even though Su Yu didn't fight, just this short performance has already shown everyone that Su Yu's strength is formidable.

It might even be far beyond the Great Commander Song Ming.

Furthermore, Su Yu's name sparks their imagination even more.

The same name, Su Yu, equally powerful.

What exactly is the relationship between this Su Yu and the "Supreme Ruler Su Yu" in the Mechanical Palace?

Is it just the same name, or perhaps...

The crowd's eyes flicker, glancing in Su Yu's direction.

The gathering space is vast, and the number of people is massive.

But everyone present is a Transcendent, and with various mechanical devices enhancing their vision, even the rebels in the farthest corners can focus their gaze on Su Yu.

Zhao Mengsheng, whom Su Yu recently met, also looks at Su Yu nervously.

Initially, Zhao Mengsheng, after interacting with Su Yu, thought Su Yu was hiding his strength and wasn't as weak as he appeared to be, at least a Third-Order Top practitioner capable of guiding him in Extraordinary Knowledge.

But Zhao Mengsheng never expected Su Yu to be that powerful.

Facing the terrifying [Destruction], Zhao Mengsheng, as a Third-Order practitioner, couldn't take one step forward, yet Su Yu could easily enter the Imperial Palace and emerge unscathed.

This made Zhao Mengsheng hesitant to get too close to Su Yu.

He also wonders who Su Yu really is?

Facing the scrutiny of tens of millions of people, Su Yu remains calm and composed, slowly speaking: "You're all curious about who I am, aren't you?"

"Then I'll tell you!"

After a brief thought, Su Yu decides to tell everyone truthfully.

After all, he was originally the creator and savior of Azure Star civilization, and there's nothing about his identity that needs to be secretive.

Everyone originally knew him and served under him, but now a Dream Realm has altered history, causing them to forget about Su Yu.

But it's alright, meeting again works just fine.

Before, Su Yu concealed himself to collect information cautiously.

Now that the situation is clear, there isn't much point in remaining hidden.

In fact, Su Yu wishes to test if directly revealing his identity would provoke any reaction from the entity behind the scenes.

"You guessed right, I am Su Yu."

"And 'Supreme Ruler Su Yu' in essence is me..."

When Su Yu says this, it's like a nuclear bomb going off in the center of the crowd.

Everyone looks horrified.

Some of them had speculated that Su Yu might be the "Tyrant" Su Yu, having created something like a puppet to infiltrate their rebel forces.

But that was merely a thought; no one took it seriously.

Otherwise, wouldn't their rebel forces become a joke?

The most powerful enemy is hidden among them, so what's the point of resisting?

Chapter 1002: Su Yu Reveals His Identity (Part 2)

But now, hearing Su Yu's own admission, everyone was stunned.

That terrifying tyrant, "Supreme Ruler Su Yu", was actually hiding among them?

It turns out that time retrospection was useless against Supreme Ruler Su Yu; he could actually follow the time reversal and come to this gathering space?

The crowd, terrified, flew up and away from Su Yu, activating all their battle armor and weapons, ready for the final showdown.

Actually, normally, if someone admitted they were "Supreme Ruler Su Yu", people wouldn't easily believe it.

Who are you? You say you are, so you are?

But the problem was, Su Yu's strength was overwhelming.

Moreover, when Su Yu mentioned that essentially he was the same as "Supreme Ruler Su Yu", people actually felt an oddly familiar sensation towards Su Yu.

It seemed as if they had known Su Yu for a long time, as if they were immensely familiar with him.

This feeling came out of nowhere.

But everyone clearly knew it was true; it seemed they really knew Su Yu long ago.

There was also a vague feeling in their hearts about what Su Yu said.

Which was that everything Su Yu said was real; he was indeed the supreme ruler of this civilization!

It wasn't surprising because what Su Yu said was true; everyone did know Su Yu originally.

And in this dream realm, behavior and language itself had some kind of "suggestive" power.

Given Su Yu's current tier, the suggestion caused by his behavior and language was extremely strong.

When he admitted his identity, it actually loosened a piece of everyone's sealed memories.

But it was only a piece, they didn't completely remember who Su Yu was, instead, they became more apprehensive of him.

The atmosphere on-site suddenly grew tense and explosive.

Song Ming witnessed this without taking action, and he did not stop them.

Because earlier, when Song Ming asked Su Yu about his identity, Su Yu did not elaborate. Song Ming only guessed that Su Yu was the real savior of this human civilization.

Now Song Ming wanted to hear, who exactly was Su Yu, what was his background?

And Su Yu, ignoring those weapons aimed at him, continued, "I am essentially one with 'Supreme Ruler Su Yu', but with some differences..."

Next, Su Yu explained the relationship between him and the Pain Evil God, and his relationship with the entire Azure Star civilization.

Everyone listened as if in a fog, not daring to believe it.

The Dark Giant City originally didn't exist?

Their group was originally Su Yu's subordinates, living on Azure Star?

"Supreme Ruler Su Yu" is Su Yu's dark side, the Pain Evil God?

The Chaotic Evil God Dream descended, encompassing reality, rewriting history, creating the Dark Giant City out of thin air?

One after another, unbelievable truths were spoken from Su Yu's mouth.

Although Su Yu concealed many of the more difficult to understand, abstract, and fantastic details, to everyone it was still too beyond imagination.

They instinctively didn't believe, but had a vague feeling that everything Su Yu said seemed to be true!

This contradiction was overwhelming in their hearts, even making them suspect that Su Yu used some form of spiritual hypnosis, altering their perception?

Even Song Ming showed a look of shock.

After awakening several savior memories from different civilizations, Song Ming thought his identity was unique enough.

But didn't expect Su Yu's experiences were equally remarkable.

"...That's the situation..."

Finally, Su Yu finished speaking.

Everyone basically understood their own situation.

They learned what kind of formidable enemy they were facing - "Supreme Ruler Su Yu".

Fifth-tier! The power of one person equivalent to a planet-level Fifth-Order expert!

Although there were millions of resistance members on site, an army strong and fierce, in front of a "planet", they appeared incredibly weak.

Not to mention, the Fifth-tier "Supreme Ruler Su Yu" also possessed that terrifying power of [Destruction].

How could they resist this?

A wave of despair inevitably surged within everyone's hearts.

Especially when they heard that "Supreme Ruler Su Yu" possessed the power of time, capable of traversing time and space, altering history, determining the future.

This tyrant could ignore the power of time retrospection!

Without time retrospection, it seemed even their greatest trump card lost its effect!

"Then... Mr. Su Yu, what tier are you?"

After a moment of silence, finally someone asked the question.

Right! The negative "Supreme Ruler Su Yu" was already so strong.

Then what tier is this positive Su Yu?

Can he oppose the negative, dark tyrant Su Yu?

Su Yu responded, sweeping his gaze across everyone: "I'm merely Fourth-tier."

Everyone immediately showed disappointment.

"However, I possess power of the Fifth-order level."

After speaking, Su Yu slightly exhibited his own aura.

Boom!

It was as if an entire planet was crammed into this gathering space.

The whole space trembled and shook under the strain, seemingly on the verge of collapse.

At the same time, everyone present felt the weight of the planet's pressure.

As if an entire planet was bearing down, causing everyone's breath to halt and thoughts to go blank.

Facing such existence, even if they were Third-tier experts, they seemed like tiny specks of dust.

Not to mention resisting, they couldn't even muster the thought of resistance.

This was completely different from the previous feeling of [Destruction]; it was a crushing pressure from a great essence to inferior lives.

At this moment, there was only one thought in everyone's mind: "This is Fifth-tier! This is Planet-level!"

Su Yu's aura was released momentarily, but to everyone, that moment felt eternal.

Even though Su Yu had retracted his aura, they hadn't regained their senses.

"Wake up!"

Song Ming, unaffected by it, shouted, hiding spiritual energy within his voice, waking everyone.

When everyone awoke, they hurriedly looked at Su Yu, but as soon as their eyes met his, it was as if their eyes burned, and they turned away.

At this moment, in their eyes, Su Yu was no longer human, but a "planet" wrapped in human skin.

He was a truly sublime existence.

"Is this power really attainable by Fourth-tier? Fifth-order, planet-level power? How was it achieved?!"

"So, is that tyrant at this tier?"

"No wonder he calls himself 'Supreme Ruler', he certainly merits the title..."

Originally, everyone found the name "Supreme Ruler Su Yu" very disagreeable.

But now, having witnessed the grandeur of Fifth-tier, they had to accept it.

"This Su Yu is incredibly powerful, so he should be enough to oppose that tyrant!"

"But then what should we do? What can we even do?"

Everyone felt both shocked, joyful, and disappointed.

Joy because Su Yu possesses Fifth-order power, enough to battle formidable foes.

Disappointment came from Su Yu being so powerful, overwhelmingly beyond their comprehension and reach.

With Su Yu's strength, he could effortlessly annihilate all of them.

So, what was the point of their so-called "resistance"?

Su Yu, however, paid no attention to their amazement, turning to look at Song Ming standing at the podium.

Su Yu noticed that in sensing the Fifth-order level aura, Song Ming's eyes were filled with excitement.

Previously, in the Mechanical Palace, the Pain Evil God did not exhibit planet-level aura, only releasing [Destruction] aura.

So for Song Ming, it was his first time witnessing the genuine aura of Fifth-tier planet-level.

The shock of facing an entire planet directly caused his savior essence to undergo another transformation.

He awakened a new Power of World Salvation.

Su Yu observed that Song Ming himself also faintly emitted waves of planet-level aura.

However, these aura waves seemed peculiar, not as strong as Su Yu's, still evolving, not fully becoming a true planet.

This was... Power of World Salvation: "Star Transformation".

Some civilizations, when facing extinction crises, employed special techniques, transforming and fusing their life forms into special states similar to planets, thereby avoiding extinction.

This was Song Ming's newly awakened Power of World Salvation.

Chapter 1003: Power of World Salvation—Star Transformation

Su Yu immediately noticed the change in Song Ming.

Then, in a brief amount of time, Su Yu identified this new "Power of World Salvation."

Now Su Yu had experience and was very adept at discerning the Power of World Salvation.

Mainly because Su Yu had previously seen many Civilization Extinction Dreams in the Dream-Making Star Core and learned a lot from them.

Su Yu had even seen this "Star Transformation" power of salvation in those dreams.

In that dream, there was no normal Life Planet.

There was only an asteroid belt, with numerous planets forming a ring, quietly floating in the black cosmos, slowly rotating.

Those planets were not large, much smaller than Azure Star, but still sizable enough to be called planets.

Su Yu wandered in that dream for a long time without finding any life, eventually using the Star Tower Navigation on those planets to enter the next layer of the dream.

Now, seeing Song Ming's "Star Transformation" power, Su Yu understood.

That civilization had converted its own life form into a planetary form to survive the world-destroying crisis.

But, obviously, that civilization failed in the end. Even when transformed into planets, they were still swallowed by the Master of Dreams' power.

However, the technology of that civilization was still quite remarkable.

A planet is actually a kind of special life form, just completely different from ordinary life forms.

The energy of a planet is their "soul," or the "Star Soul."

Those planets may also have thoughts, but their thinking speed is extremely slow, with a single thought possibly taking millions of years.

Previously, the Ghost Emperor Su Yu faced had extracted Fifth-Order spiritual power from the planetary energy of Azure Star.

It was the "Power of Star Soul," which nearly killed Su Yu by using this power in battle.

Now, Song Ming awakened new power, and the Spiritual Energy in his body began to transform.

It even faintly carried the might of "Power of Star Soul."

Song Ming's body began losing its fleshly color, turning dark, as if becoming rock, soil, and metal.

His entire body even swelled up, becoming round and full.

At the same time, a heavy, powerful pressure emanated from Song Ming, still weak, yet indestructible.

Song Ming seemed to be ascending to the Fifth-Order realm in one step!

If Song Ming successfully completes the "Star Transformation" power of salvation, transforming into a planet.

Without a doubt, he would be a true Fifth-Order.

However, Su Yu noticed Song Ming's eyes becoming somewhat vacant, and his expression stiffened as these changes occurred.

It seemed that as he underwent "Planetary Transformation," Song Ming's thinking slowed down, becoming like that of a planet.

At that point, even a single thought might take millions of years to manifest.

In the eyes of others, this was almost the same as being dead.

So Song Ming quickly realized something was wrong, retracted his aura, and the inorganic body he was turning into returned to flesh color.

His previously bloated body shrank back down.

Song Ming used Time Retrospection on his own body.

However, Su Yu suspected that Song Ming retained the "Star Transformation" power after using Time Retrospection.

Just like before, when Song Ming used Time Retrospection, resources like Energy Coins were preserved.

This time, Song Ming stored the "Star Transformation" power in a certain space.

He could take it out and use it when needed.

This was likely the safe method to use the "Star Transformation" power.

Otherwise, once the transformation is complete, his mind would be assimilated into the planetary consciousness, where a single thought spans millions of years, making recovery nearly impossible.

Now, Song Ming bypassed the side effects of Star Transformation perfectly using Time Retrospection, retaining only its powerful energy.

That's why Song Ming had just shown a look of surprise.

After witnessing Su Yu's formidable power, Song Ming immediately awakened corresponding levels of power, significantly boosting his combat prowess.

Although Song Ming hadn't fought using "Star Transformation" power yet, it was expected to be extremely formidable.

For a planet, even a casual rotation contains energy that ordinary life cannot withstand.

However, Song Ming hadn't truly completed a real "Star Transformation" yet, so the retained power probably hadn't fully reached the Fifth-Order level.

"This power is impressive..."

Su Yu nodded quietly to himself.

Meanwhile, Su Yu pondered in his heart, could he use this "Star Transformation" power?

Could this transformation of life form through "Star Transformation" be used to... mass-produce Fifth-Order?

This idea from Su Yu was quite fanciful.

How powerful is Fifth-Order? How difficult is the ascension ritual?

Su Yu himself hadn't advanced to Fifth-Order and yet was considering mass production of Fifth-Order?

But Song Ming's recent transformation inspired Su Yu.

As long as the side effects of "Star Transformation" can be resolved, then this is the best technology for mass-producing Fifth-Order.

Based on Su Yu's recent observations, completing a "Star Transformation" to turn life into a planet apparently doesn't require a ritual, just the right technology.

Normally ascending to Fifth-Order is very difficult.

But planets in this universe are numerous and not rare at all.

Moreover, Su Yu had previously seen many planets floating in the cosmos in that dream.

Chapter 1004: Power of World Salvation "Star Transformation" (2)

Those were the unknown civilizations that completed the "Star Transformation".

This shows that mass-producing Fifth-Order beings is truly feasible.

If one possesses an army of Fifth-Order, how powerful would that be?

Any Pain Evil God or Brutal Evil God would be blown away.

Even the mastermind behind the scenes could be challenged!

"Tsk, tsk, this thing is difficult to accomplish for now; I need to research it with Song Ming..."

Just as Su Yu was thinking this, Song Ming snapped back to reality, looked at Su Yu, seemingly having something to say.

However, Song Ming did not speak to Su Yu, but addressed the other rebels: "I need to study what happened today, you all can go back first."

After finishing, without waiting for a response, he directly launched Time Retrospection.

Everyone's vision went dark, and when they woke up, they were back at their homes.

They felt quite regretful in their hearts, having just witnessed Mr. Su Yu's powerful Planet-Level strength, which, although terrifying, filled their hearts with boundless longing.

They wished to observe more closely.

Initially, recalling the terrifying aura of Su Yu, their hearts were full of fear.

But now, for some unknown reason, they felt inexplicably at ease.

It seemed as though they knew Su Yu's immense power wasn't meant to harm them, but to save and protect them.

"Could it be that what Mr. Su Yu said is true, that we were once his subordinates, protected by his power, but later we all forgot him..."

"With Great Commander Song Ming and Mr. Su Yu, we have more confidence in overthrowing that tyrant Bully."

"However, with such a disparity in power, what role can we play in this battle?"

Everyone couldn't help but contemplate.

...

At that moment, Su Yu also returned to his small repair shop through Time Retrospection.

"Tsk, tsk, indeed Time Retrospection has an effect on the Number God Mechanic's power..."

Upon returning to the repair shop, the first thing Su Yu did was check his Professional Experience and nod.

Previously, some of Su Yu's experience was Destroyed, which Time Retrospection could not recover.

So, when he returned to the venue and revealed his identity, he was secretly meditating, accumulating a few points of experience.

These points of experience were retained after Time Retrospection.

This shows that Song Ming's Time Retrospection was indeed useful for Su Yu's Number God Mechanic! It can be used for a quick upgrade.

Su Yu attended Song Ming's rebel speech gathering to confirm if Time Retrospection could be used to accumulate Number God Mechanic experience.

Although there were many unexpected events during the process, and he even wandered over to the Pain Evil God's side, in the end, he managed to accomplish this.

Since it's been confirmed, the next step is to seek Song Ming's help.

Now that Su Yu has made contact with Song Ming, this shouldn't be difficult.

The only uncertainty is whether Song Ming's Time Retrospection power can support Su Yu in upgrading the Number God Mechanic to Full Level?

Su Yu pondered while waiting.

He was waiting for Song Ming.

Sure enough, after only ten seconds, there was a knock at Su Yu's door.

With a thought, Su Yu opened the door, revealing Song Ming standing outside.

"Please, come in."

Su Yu said.

Song Ming nodded and walked in, glancing around without noticing anything of interest before asking, "Mr. Su Yu, I understand your identity now."

"I still have the same question, is there anything I can help you with?"

Song Ming, utilizing his World Salvation instinct, found that helping Su Yu was the only way to overcome the extinction crisis, so he persistently asked what Su Yu needed.

Su Yu didn't stand on ceremony and directly said, "I need Time Retrospection to enhance my power."

Song Ming nodded, "No problem."

Upon seeing this, Su Yu couldn't help but ask, "You've seen my power, can your Time Retrospection withstand it?"

Song Ming then pondered carefully, and after a moment, said uncertainly, "It should be possible; earlier I awakened another kind of World Salvation power, which allows me to transform into a planet, using Time Retrospection while maintaining its power, and I didn't feel any strain."

Su Yu felt a chill upon hearing this.

It seems that Song Ming's Time Retrospection power is at a very high level, seemingly above Fifth-Order.

And Song Ming's Time Retrospection should essentially be using the power of the Chaotic Evil God Dream.

But the Chaotic Evil God Dream itself is also at the Fifth-Order level, so how can it achieve Time Retrospection beyond the Fifth-Order?

There's definitely something wrong here; it should be the work of the entity behind Song Ming.

However, even if this power has issues, Su Yu must use it, otherwise there simply isn't enough time to upgrade the Number God Mechanic to Full Level.

He can only be cautious.

Now that Song Ming has agreed, Su Yu is not in a hurry to level up, but instead raises another request: "I also need a copy of the technical information on that transformation you just did."

Su Yu is referring to the "Star Transformation" Song Ming just awakened.

This is the key to Su Yu's "mass production of Fifth-Order beings plan."

Upon hearing this, Song Ming didn't hesitate and immediately transmitted a set of information to Su Yu, which was about the technical information of the "Star Transformation."

Su Yu immediately started reading.

This technical data not only explained how to carry out life form transformations,

but also introduced the civilization that developed the "Star Transformation", explaining how the "Star Transformation" technology originated.

The civilization that developed the "Star Transformation" was a unique plant civilization, whose creatures were inherently fond of stillness over movement, spending the majority of their lives rooted in planets, basking in the sun, motionless.

Therefore, when they sensed an impending extinction crisis, this civilization eventually conceived the world-saving method of "Star Transformation", turning their life forms into planets.

With the planet-level's powerful essence, they confronted the terrifying extinction crisis.

As for becoming planets, where a thought could take millions of years, it didn't bother these plant beings; they didn't mind.

Although in the end, their plan failed, leading to their extinction, turning into a civilization dream realm.

But their technology succeeded.

These plant beings, with roots in planets, were extremely familiar with the structure and principles of entire planets.

Thus, they were able to develop such a marvelous technology.

As Su Yu studied these technical materials, he couldn't help but marvel at what a bizarre mess it all was...

This technology introduced a theory Su Yu had never heard of, the "Cosmic Life Hypothesis".

Those plant beings, with their leaves basking in the sun and roots absorbing planetary energy, came up with a notion over time.

If planets are life, then isn't the entire Universe life too?

If the Universe is life, does that mean planets are akin to "cells" of the Universe?

According to this thinking, the interior of planets must contain some kind of "Cosmic Genetic Factor".

Those plant beings scoured the insides of the planets, extracting what they believed to be "Cosmic Genetic Factors", and then transformed themselves, implanting those "Cosmic Genetic Factors".

In this way, they transformed themselves into "Cosmic Cell Primordial Bodies", undergoing cell cultivation.

Once fully cultivated, they could become genuine cosmic cells, i.e., planets.

Throughout this process, these plant beings would occasionally pray to the great "Great Cosmic Consciousness", asking the Universe to accept them as new "cells".

Despite the outlandish and incomprehensible details, Su Yu found in this process,

these plant beings, without evidence, concluded that the Universe had consciousness and that planets contained "genetic factors".

Without any proof, they believed, thus it was so.

And after all the commotion, they indeed succeeded! They truly realized "Star Transformation".

Leaving Su Yu baffled, unsure how these guys accomplished it.

Chapter 1005: Plant Life, Strange Abilities, and a New Paradox!

"How did you achieve this technology?"

Su Yu pondered for a moment and found it difficult to comprehend.

This "Star Transformation" technology simply didn't conform to any private learning or principles of spiritual energy that Su Yu knew.

It was like some charlatans who knew nothing, concocting some bizarre rituals, only able to deceive ordinary people.

Even when Su Yu was at Shelter No. 73, those low-level Transcendents with basic spiritual and technological knowledge seemed more reliable than this so-called "Star Transformation."

However, both what Su Yu saw in the civilization dream realm and the changes that happened to Song Ming previously proved that this seemingly unreliable "Star Transformation" did indeed succeed.

Once completed, it could transform ordinary life into a planet.

It was truly unbelievable and beyond Su Yu's comprehension.

So, Su Yu could only ask Song Ming.

Song Ming, upon hearing this, was also somewhat confused: "I actually don't know its principle, and at first, it didn't succeed."

"Then I used another power 'Genetic Conversion,' transforming my body into that of a plant life form."

"And then I succeeded."

After speaking, Song Ming passed the technical materials of the power of world salvation, named "Genetic Conversion," to Su Yu.

Genetic Conversion was another power of world salvation developed by a civilization.

This civilization's philosophy was to freely convert their genes into various life races and forms to adapt to any harsh environment, ensuring the survival of the civilization.

This civilization was actually the black soft mud monsters Su Yu saw when he first entered the civilization dream realm.

Those soft mud monsters, after freely adjusting their genes over time, even forgot their original form, eventually turning into those soft mud-like creatures.

Obviously, this civilization following the "Genetic Conversion" path ultimately failed, became extinct, and was devoured by the Master of Dreams, becoming part of the civilization dream realm.

After all, this world has spiritual energy, has Evil Gods, and all sorts of miraculous powers.

Relying solely on genetic conversion, trying to adapt to any harsh environment and bypass extinction crises is really too difficult.

Mainly, that civilization was not strong enough, nor could they find any powerful genes as a reference, not knowing what to convert into.

Even if there really were powerful life gene samples, like the legendary Star Beasts' genes, they probably still couldn't complete the conversion with their technological capabilities.

The technical aspect of genetic conversion is not difficult, at least for Su Yu.

Su Yu only needs to use the Number God Mechanic's abilities to convert his body into data and then input the genetic information of those plant life forms, completing the transformation.

The Number God Mechanic can even modify abstract "values," let alone defined genes?

In an instant, Su Yu's body underwent a transformation.

Su Yu still outwardly appeared human.

But actually, internally, he had already become a plant, becoming a "Plant Man."

The genes of this plant body were from that plant civilization that developed the "Star Transformation" technology.

The plant civilization's form wasn't fixed either; transforming into a human shape was quite normal.

Su Yu glanced at his body, indifferent to his transformation.

Given his level, the appearance and nature of his body could no longer bind him.

Song Ming could freely perform "Mechanical Ascension," "Void Incarnation," "Genetic Conversion."

Of course, Su Yu could too.

While Song Ming relied on the awakening of endless powers of world salvation, Su Yu relied on his own formidable strength.

No matter how he transformed, Su Yu simply needed to remember he was human, and he could transform back afterward.

After transforming into "Plant Man," Su Yu carefully sensed his body and didn't discover anything unusual.

This body wasn't powerful, nor did it have any miraculous abilities, very ordinary, even in terms of strength, comparable to an ordinary person.

After sensing for a while, Su Yu tried using the "Star Transformation" technology.

He pretended to activate his "Plant Man" body, reaching out into the air.

According to the procedure in the technical materials, this was supposed to capture the "Cosmic Genetic Factor" contained in the planet.

Previously, Su Yu tried and couldn't capture anything.

But this time, something different happened.

Su Yu's hand felt a weight, as if he had actually captured something.

Startled, Su Yu brought the thing to his eyes for a closer look, yet he saw nothing.

It was invisible and intangible, but it seemed there was indeed something he had grasped.

What was the principle of this? Su Yu didn't know.

The next step was to implant this mystical thing into his body, turning himself into a "Cosmic Cell."

So Su Yu, with a thought, used the Number God Mechanic's power to manifest another body.

This body was a replica of Su Yu's original form, also a "Plant Man."

This was done for safety.

Genetic conversion was within Su Yu's control, but this mystical "Cosmic Genetic Factor" was entirely unknown.

Su Yu would not implant this inexplicable thing into his real body, opting to use a manifested false body instead.

Then, according to the requirements in the "Star Transformation" technical materials, Su Yu implanted the mystical thing into the manifested false body.

Although the false body was manifested, with the strength of the Number God Mechanic, it was incredibly powerful, almost real.

Chapter 1006: Plant Life, Unique Ability, A New Paradox!

Thus, the so-called "Cosmic Genetic Factor" was implanted into this materialized body.

Then, Su Yu manipulated that body, praying to the so-called "Great Cosmic Consciousness."

"Heaven and Earth, Universe, Gou Tuo Qi Lü..."

After a string of strange and nonsensical prayers, soon, the materialized body began to transform.

Its skin color darkened, the body began to round and plump, emanating a powerful aura.

Success! This materialized body surprisingly started the "Star Transformation!"

And as time progressed, the speed of this "Star Transformation" accelerated, seemingly within a short time, the materialized body would become an actual planet.

This change was more intense than when Song Ming used "Star Transformation" previously, possibly because Su Yu is much more powerful than Song Ming.

As this transformation unfolded, the awareness Su Yu left inside the materialized fake body also grew hazy.

In his daze, Su Yu seemed to sense an unknown consciousness.

This consciousness was immensely vast, encompassing the starry skies of the universe.

This consciousness descended from the void, intending to assimilate Su Yu, making him a part of itself.

"Not good!"

Su Yu quickly severed the spiritual connection with that materialized body.

However, the materialized fake body was still expanding.

He directly dissolved its materialization.

Without Su Yu's Number God Mechanic power to maintain it, that materialized body was on the verge of dissipating, but this dissipation seemed extremely difficult.

If not for Su Yu vigorously urging the power of the Number God Mechanic, it was nearly impossible to complete the dissolution of this materialized body!

It seems that the so-called "Great Cosmic Consciousness" had already seized control of the materialized fake body, resisting Su Yu's efforts to undo it.

Fortunately, in the end, this materialized fake body was ultimately undone.

"So that is the so-called Great Cosmic Consciousness? Does such a thing truly exist?"

Su Yu looked at the spot where the Manifestation Space dissipated, deep in contemplation.

Everything that had just transpired was beyond Su Yu's comprehension.

Even...

"Holographic Perception!"

When conducting the "Star Transformation" experiment, Su Yu used Holographic Perception, activating the Star Tower signal to perform a scan.

However, the Star Tower signal's scan result was... nothing at all!

No "Cosmic Genetic Factor", no Great Cosmic Consciousness, the Star Tower signal detected nothing at all throughout the process.

This was the first time Su Yu faced a situation where the Star Tower signal couldn't scan.

The Star Tower signal is rooted in the underlying rules of the universe's time and space; no matter what real space, Subspace, Dream Space, Data Space, within them, nothing can obstruct its scan.

At most, due to insufficient scanning power, a detailed scan might be unsuccessful, but it won't fail to scan altogether.

The essence of the Star Tower signal's scan should actually be "activation."

The Star Tower signal is ubiquitous, already existing at the bottom of various spaces.

Su Yu's scan merely activated those spaces' inherent Star Tower signals.

And just now, Su Yu used the so-called "Star Transformation" technology to summon the Great Cosmic Consciousness, yet it couldn't be detected by the Star Tower signal.

Either, that so-called Great Cosmic Consciousness is truly immensely powerful.

It is the consciousness embodiment of the entire universe, far superior to the essence of the Star Tower, so the Star Tower signal is ineffective against it.

Another possibility is that the so-called Great Cosmic Consciousness doesn't exist at all.

It is nonexistent, an impossibility.

No matter how mystical the Star Tower signal is, it is rooted in the space-time foundation and can only affect things that "exist."

Since the so-called Great Cosmic Consciousness doesn't exist, there naturally isn't any Star Tower signal within it to activate, thus scanning is impossible.

Yet, if the Great Cosmic Consciousness doesn't exist, how is the "Star Transformation" achieved?

Su Yu thought of this and again looked down at his "Plant Man" body.

Originally, using his human body, he couldn't achieve "Star Transformation."

But after becoming this Plant Man, he managed to summon the so-called Great Cosmic Consciousness.

"So, is it an issue with this plant life form?"

"Void Creation, Creation from Nothing?"

Su Yu's mind whirled, quickly arriving at a possibility.

This Plant Man's "Star Transformation" savior plan is extremely crude, not aligning with any Spiritual Energy or scientific principles that Su Yu knows of, yet it succeeds.

Furthermore, the Star Tower signal's inability to scan the Great Cosmic Consciousness suggests it probably doesn't exist.

Thus, Su Yu speculates that this plant life civilization possesses a peculiar ability.

Which allows them to create something from nothing, spontaneously making things that don't exist according to their will.

The so-called Great Cosmic Consciousness is something this civilization conjured out of thin air.

This explains why they can achieve the "Star Transformation" with crude technology, ultimately transforming themselves into planets.

Although it's scientifically irrational, if they believe it can be done, then it really can be done.

If Su Yu's speculation is correct, then this civilization is truly extraordinary.

No wonder their technology is underdeveloped, spiritual energy is nearly nonexistent, and their numbers are few, yet they managed to catch the Master of Dreams' attention, indeed possessing unique advantages.

Their innate abilities are practically defying natural laws.

Su Yu even suspects, perhaps these beings, relying on "Star Transformation" to save the world, might indeed succeed in the end!

After the "Star Transformation", they might have fused their consciousness with that so-called Great Cosmic Consciousness and escaped a long time ago.

Or maybe only a portion managed to escape.

Just when Su Yu was conducting the "Star Transformation" and sensed the descent of that Great Cosmic Consciousness, it seemed that if he were to fuse with it, he would no longer be restricted by this space-time, summoned to an unknown distant place.

In hindsight, what the Master of Dreams civilization ended up devouring was merely the bodies they left behind.

Perhaps they left behind a "Savior," which Song Ming fused with.

Of course, all this is just Su Yu's instantaneous speculation, but verifying it is quite simple.

He extended his hand, attempting to use the Plant Man's ability, Creation from Nothing, to invent something.

Su Yu tried to imagine a gun in his hand.

According to Su Yu's speculation, the talent of this plant life form is Creation from Nothing.

It looks similar to Manifestation Ability, but there should be significant differences.

Su Yu still needs to experiment to determine the specific differences.

However, Su Yu failed.

He didn't obtain a gun in his hand.

Although earlier, he grasped and obtained the so-called "Cosmic Genetic Factor."

"Could I have guessed wrong?"

"Or is it that this ability can only create 'nonexistent' things?"

Su Yu pondered briefly, deciding to replace the gun with something else.

He wants to create a nonexistent thing.

What is a nonexistent thing? The so-called "Cosmic Genetic Factor," "Great Cosmic Consciousness," should count.

But those have already been created by that plant life form, and Su Yu doesn't want to mess with them again; otherwise, who knows what might happen.

What Su Yu wants to create now is... a Paradox!

Exactly, it's the Paradox Su Yu obtained from the Pain Evil God.

This thing is a space-time Paradox; it's nonexistent, irrational, a flaw of this world.

Paradox is extremely rare and precious; up until now, Su Yu has only seen this one piece.

Yet, just as this thought emerged in Su Yu's mind, he felt a slight weight in his palm, as if something appeared.

Su Yu's thoughts moved, sensing a cluster of minute energy in his palm.

This energy constantly oscillates between reality and illusion at a high frequency, never settling.

This is the "Paradox."

And deep within Su Yu's body, there lies another piece of "Paradox."

Su Yu used this plant life's talent and actually managed to replicate another piece of "Paradox!"

"It really can work..."

Su Yu sensed the new piece of "Paradox" in his palm and was immensely delighted.

Previously, Su Yu had considered using the power of a Paradox to accomplish what seemed impossible.

For example, under circumstances where battling against [Destruction] is impossible, he would absorb the Pain Evil God's Power of Time, thereby completing one major step of the [Time-Space Mechanic] ritual.

This endeavor desired in-depth research of the "Paradox."

Yet, Su Yu had only one piece of Paradox; if anything unexpected occurred, it would be lost.

Now, using this bizarre plant life form, he could spontaneously create "Paradox!"

Chapter 1007: Su Yu's Hesitation, Full Level Number God Mechanic?!

Su Yu hurriedly stored the newly acquired "Paradox" and then attempted to continue replicating it.

This magical power of "Paradox" is naturally preferable to have more.

However, this time it failed.

No matter how much Su Yu imagined in his mind, he could not produce another "Paradox" in his hand.

"It seems that although this plant life's talent is extraordinary, there are still some limitations or costs..."

Su Yu thought to himself.

He was not too disappointed.

This peculiar talent of the plant life must have its limits and restrictions.

It couldn't be an unlimited "Creation from Nothing," otherwise it would make the "Star Transformation" unnecessary.

Next, Su Yu needed to figure out a way to lift these restrictions and replicate as many "Paradoxes" as possible.

At this moment, Song Ming, who had been left aside, could no longer hold back:

"What are you doing?"

Song Ming asked somewhat curiously.

He saw Su Yu first perform the "Star Transformation," then forcibly stop; until this point, it was still normal.

But afterward, Su Yu stretched out a hand and grasped at the air, leaving others to wonder what he was doing.

That's why Song Ming asked this question.

Upon hearing this, Su Yu paused his thoughts, looked at the nearby Song Ming, and felt a bit hesitant.

He hesitated about whether to tell him the research findings just now.

The plant life's ability of "Creation from Nothing," Su Yu felt, was okay to tell Song Ming. After all, the "Star Transformation," the Power of World Salvation, was originally Song Ming's own strength.

What Su Yu hesitated about now was whether to reveal the existence of "Paradox" to Song Ming.

"Paradox" is of great importance and one of Su Yu's deepest secrets.

Earlier, during replication, Su Yu held the "Paradox" in his palm, veiled by his spiritual energy, and since "Paradox" is very concealed by nature, Su Yu believed Song Ming did not notice its existence, which is why the question arose.

But now, Su Yu was considering whether to share the secret of "Paradox" with Song Ming.

On one hand, it was because Song Ming had been quite open-hearted to Su Yu, helping earnestly.

Upon knowing his assistance could save the world, Song Ming provided whatever Su Yu asked for.

The technical documents of "Void Incarnation" and "Star Transformation," as soon as Su Yu asked, Song Ming sent them over immediately.

Although Su Yu did not fully trust Song Ming, as they had not known each other for long.

On the surface at least, Song Ming indeed appeared to be a Savior.

And with Song Ming being so generous and open, Su Yu naturally ought to reciprocate and not be stingy.

Moreover, Su Yu was not merely thinking about reciprocating.

He also suspected that if Song Ming saw "Paradox," he might awaken a new, more powerful Power of World Salvation.

Song Ming is formed by the fusion of countless saviors from extinguished civilizations, not needing to follow the conventional transcendent path, and can awaken different Powers of World Salvation merely by environmental stimuli.

Those Powers of World Salvation are hidden deep within Song Ming's origin, waiting for him to discover.

Su Yu suspected that hidden in Song Ming's origin is a Power of World Salvation related to "Paradox"!

With the magic of "Paradox," using this power to save the world might be even more formidable and reliable than any Mechanical Ascension, Void Incarnation, or Star Transformation...

Among those civilizations devoured by the Master of Dreams, could there be a civilization with a savior who master the power of Paradox? Then got fused by Song Ming?

If so, Song Ming would definitely be able to awaken a Power of World Salvation related to Paradox.

Even if there wasn't such a civilization, Su Yu suspected that encountering the magical power of Paradox would cause Song Ming to autonomously awaken a new Power of World Salvation.

Being the creation of that unseen entity, Song Ming surely wouldn't just "live off his laurels," only able to awaken already existing Powers of World Salvation.

Song Ming must also have the ability to create new Powers of World Salvation.

Su Yu just wanted to see what it would be like if Song Ming awakened or created a new Power of World Salvation under the stimulation of "Paradox"?

It should provide enough reference for him to utilize Paradox.

As for the miracle of "Paradox," Su Yu had long experienced it, the Pain Evil God was birthed with it as the core.

However, as for how to utilize and harness "Paradox," Su Yu currently had little idea.

Just knowing that "Paradox" can be used to achieve the impossible, but specifically how?

He did not know.

If Song Ming awakened a Power of World Salvation related to Paradox, Su Yu observing enough information could gain the true way to utilize Paradox.

"Since that is the case, why am I hesitating?"

Su Yu thought to himself, feeling strange, strange that he hesitated.

Su Yu, along the way, has always been resolute in his will.

Rarely contemplating before and after, hesitating and indecisive, and yet now he was hesitating.

"I should have already decided to reveal 'Paradox' to him when attempting the replication in front of Song Ming."

"In that case, there's nothing to hesitate about, just tell him directly..."

Su Yu thought to himself.

However, just as he was about to send the data and inform Song Ming about "Paradox," he still couldn't utter a word.

He hesitated again.

"Is it really the right decision to reveal such a trump card secret to Song Ming?"

"What if Song Ming isn't as honest and trustworthy as he appears to be, but harbors evil intentions instead?"

"What if 'Paradox' gets sensed by that hidden entity behind the scenes?"

"What if..."

In an instant, Su Yu's mind was flooded with various "what ifs."

Chapter 1008: Hesitant Su Yu, Number God Mechanic Full Level?!_2

Anyway, just don't want to disclose the "Paradox" to Song Ming.

In the end, he didn't transmit those data; his actions were halted by this hesitation.

"Why am I still hesitating?"

"What's going on?"

Su Yu felt a chill in his heart, realizing something was off.

This kind of hesitation was abnormal!

Those "ifs" in Su Yu's heart, when considered carefully, actually made sense.

If he disclosed the "Paradox" to Song Ming, there would certainly be risks. Given this concern, choosing not to disclose was normal.

But in reality, Su Yu was never afraid of risks.

Everything has risks; you can even choke drinking water.

The consequences of his decisions were his to bear, so why the hesitation?

Yet, Su Yu's mind was full of "ifs" and "ifs."

This did not match Su Yu's character.

"Am I being influenced by some force? Spiritual hypnosis? Or something else?"

Su Yu knew that he was currently under the influence of some power, causing his cognition to become very hesitant.

This unknown power was preventing Su Yu from telling Song Ming about the "Paradox."

The manifestation of this hindering power was Su Yu's inexplicable hesitation.

Actually, this hesitation was quite subtle and "reasonable."

Su Yu almost talked himself into believing those "ifs" in his heart.

If not for Su Yu's earlier encounters with powerful enemies in the realm of spirit and memory, and his use of spiritual hypnosis on the Pain Evil God.

These experiences made Su Yu extremely sensitive to any spiritual influences.

In the depths of Su Yu's consciousness, he was constantly undergoing "self-examination," regularly checking his memory, thoughts, and logic for problems.

If not for this self-checking mechanism, Su Yu might not have been able to detect this influence.

This subtle spiritual influence was truly terrifying.

Or rather, any influence on the spiritual will was terrifying.

Direct combat is nothing more than a straightforward confrontation.

But this kind of spiritual influence, silent and undetectable, can even take effect without one realizing it, insidiously.

Fortunately, since Su Yu discovered this concealed spiritual influence, he could forcibly break it.

With his Fifth-Order Spiritual Telekinesis, he only needed to focus his mind and unleash his will to forcibly break this influence and tell Song Ming about the "Paradox."

Since that unknown force was preventing Su Yu from telling Song Ming about the "Paradox," Su Yu decided to do just that!

He wanted to see what would happen when Song Ming encountered the "Paradox."

However, at the critical moment, Su Yu hesitated again.

He did not forcibly break this influence.

Because a different possibility suddenly occurred to Su Yu...

That is... what if all this is reversed and makes sense too.

If that unknown force was originally trying to influence Su Yu to proactively tell Song Ming about the "Paradox."

Then Su Yu's subconscious instincts would resist this influence, which would show as hesitation.

Then if Su Yu forcibly overcame the hesitation and told Song Ming about the "Paradox," he would walk into the trap himself.

Both possibilities, both positive and negative, seemed reasonable.

Influenced Su Yu, it was hard to determine which one, hence the hesitation.

Su Yu's thoughts seemed to split in two, engaged in intense combat and argument, unable to make a decision.

"It's still influencing me! Making me hesitate!"

Deep in Su Yu's eyes, a flash of light appeared and disappeared in an instant. Upon close examination, it seemed like a supernova explosion, containing infinite energy.

All the previous mental activities took Su Yu three seconds, not long.

But with Su Yu's thinking speed, millionths of a second, even billionths of a second, would be enough to make a decision.

These three seconds of hesitation equaled three or more years for ordinary people, highlighting the intensity of Su Yu's mental struggle.

In fact, during those three seconds, the energy consumption of Su Yu's thinking operations was enough to blow up the entire Dark Giant City.

Now, Su Yu was truly at Fifth-Order strength, with planet-level essence, an inconceivable amount of energy.

The flash in his eyes was just a leak of this energy.

During those three seconds, Song Ming also vaguely sensed something wrong, especially the flash of light in Su Yu's eyes, giving him immense pressure.

Song Ming did not inquire, silently waiting for Su Yu's response.

After three seconds, Su Yu suddenly sent out information, transmitting the strange abilities of plant life and the information about the "Paradox" to Song Ming.

His mental struggle yielded a result!

Regardless of whether that unknown influence was positive or negative, Su Yu decided to inform Song Ming about the "Paradox."

Because, since this unknown power had already approached him, Su Yu naturally couldn't play dumb. He definitely had to take action.

The action he took was to tell Song Ming about the "Paradox" and see what would change?

Whatever the outcome, good or bad, Su Yu accepted it.

When sending this information, Su Yu also prepared for battle.

Since taking on the role of Number God Mechanic, he had yet to truly fight a formidable foe.

Now, he wanted to see what would happen when he told Song Ming about the "Paradox."

"This is..."

Upon receiving the information from Su Yu, Song Ming fell into deep thought, quickly showing a look of astonishment.

He looked up at Su Yu, shocked.

He did not expect Su Yu to suddenly send such incredible knowledge information.

The "Paradox" was something Song Ming encountered for the first time!

At the same time, a mysterious fluctuation emanated from Song Ming.

This fluctuation was incredibly strange.

Incompatible with the entire universe, the entire world.

It seemed to both exist and not exist.

It was the universe's defect, the world's error, the rule's blind spot.

It was... "Paradox"!

"Indeed!"

Su Yu stared intently at Song Ming.

As he suspected, upon encountering the information about the "Paradox", Song Ming indeed awakened the Power of World Salvation related to the "Paradox"!

Su Yu didn't even have to show Song Ming the "Paradox."

Song Ming merely knew about its existence and awakened!

Now Su Yu wanted to see what effect Song Ming's awakening to "Paradox" would have!

Song Ming's awakening was swift, and within a second, the paradoxical fluctuation on his body stabilized.

He stared intently at Su Yu, and Su Yu stared back.

Suddenly, Song Ming made a move!

To be precise, Su Yu felt that Song Ming had made a move.

In reality, there was no energy fluctuation, and Song Ming made no movements.

But Su Yu was convinced that Song Ming had made a move against him!

"Not good! Song Ming indeed harbors malicious intent!"

Su Yu's expression darkened, and he was about to retaliate.

Massive spiritual energy was ready to erupt, and the data ability of the Number God Mechanic enveloped Song Ming.

The planet-crushing momentum soared into the sky, causing the entire Dark Giant City to tremble under its might.

Su Yu was never afraid of battle; he wanted to test how it felt to fight with Fifth-Order essence.

However, just as Su Yu was about to strike, he felt he had already been hit, struck by Song Ming's invisible attack.

Su Yu felt his time was constantly rewinding, flowing forward, and then rewinding again...

Instantly switching billions of times.

Then, Su Yu received a notification from the Profession Panel.

[Gained 100000000 Professional Experience... Number God Mechanic lvmax!]

Through the mysterious changes just then, Su Yu's Number God Mechanic inexplicably gained massive experience and reached Full Level out of thin air!

"This is..."

Su Yu looked at the series of zeros following the experience on the Profession Panel, momentarily stunned.

Immediately, Su Yu realized that that was Song Ming's Power of World Salvation "Paradox."

Originally, Su Yu intended to use Song Ming's Time Retrospection ability to quickly upgrade, leveling the Number God Mechanic to Full Level.

But even with Time Retrospection, Su Yu would need to meditate and train repeatedly to complete the upgrade.

However, after Song Ming awakened the Power of Paradox, he could accomplish something illogical, directly bringing Su Yu to Full Level without meditation and training!

Chapter 1009: Core Specialization: Data Truth!

[Professional level up, Core Ability: Data Reality Synchronization Upgrade...]

[Based on your full level Core Ability (Data Reality), you have acquired Core Specialization (Data Truth)]

[Core Specialization: Data Truth]

[Data Truth: As the advanced form of Data Reality, it can invert reality and illusion, making data the reality and reality the illusion.]

Number God Mechanic at full level, Su Yu's power surged instantly.

In a short period, the essence of his power expanded more than tenfold since he initially became a Number God Mechanic!

After reaching the Fifth-Order, Transcendents undergo a qualitative change, and their power cannot be measured by normal energy units.

For instance, the total energy of a single energy coin is about the same as the energy in the body of a Four-Star Transcendent.

Using energy coins as a unit can measure the power of most Transcendents.

But this method is not applicable to Fifth-Order Planet-Level experts.

The power of a Fifth-Order expert has already undergone a qualitative change.

Even if severely injured, reduced to the energy of one energy coin, or even one percent of an energy coin.

The energy essence of this Fifth-Order expert remains "planet-level."

Using this tiny bit of energy, this Fifth-Order expert can still exhibit incredible abilities, crushing most Transcendents below the Fifth-Order.

Measuring the power of a Fifth-Order expert in energy coins is utterly meaningless.

Previously, Su Yu's energy essence was comparable to a standard planet, now with the Number God Mechanic at full level, it has exploded tenfold.

Although still planet-level, there are differences between planets; a normal planet and a giant gaseous planet have enormous differences in mass and energy.

And now, Su Yu's planet-level essence has transformed from an ordinary planet to a large planet.

Even more vast than the entire Azure Star!

It's not just the enhancement of power essence, Su Yu also unlocked the core specialization: [Data Truth].

The introduction of this Data Truth ability is very brief.

But it doesn't affect Su Yu's understanding of it, after all, this is Su Yu's ability, just a slight perception, and Su Yu understands the nature of his power.

The "inverting reality and illusion" ability of Data Truth can create a virtual data space.

Then use this data space as reality and the Real Universe as illusion, inverting reality and illusion.

The Real Universe has various rules, unbreakable.

Breaking and altering the various rules of the Real Universe is extremely difficult.

But the illusory data world can freely adjust any rules.

Things like gravity, light speed, time, cause and effect... are all just adjustable data because they are essentially illusory.

Yet, this Data Truth ability inverts reality and illusion.

This makes the illusory data world unbreakable, serving as a powerful defensive fortress.

Conversely, the True Universe becomes adjustable at will!

Meaning, once Su Yu uses the ability of Data Truth, he can adjust the rules of the Real Universe just like he once did with the data world!

Even parameters like gravity and light speed can be adjusted!

This ability is the advancement of Su Yu's core ability "Data Reality."

Data Reality can data-transform real matter, adjusting its "values."

For example, a six-star Cavalry, after being data-transformed by Su Yu, has its power "values" adjusted, directly enhanced a hundredfold, boosting it up to Third-Order Level.

This ability is extremely powerful, Su Yu had just become a Number God Mechanic and had no chance to use it in actual combat yet.

And now, "Data Truth" is even a step further.

Its essence is to expand the scope of "data-transforming" from mere matter and life to space-time itself.

No longer just data-transforming matter, but data-transforming the "world" and then adjusting the world's values!

This ability is indeed incredibly powerful.

A slight perception by Su Yu confirms it.

As long as he wishes, he can data-transform the space-time of the entire Azure Star and then adjust its values.

This may not seem surprising, given that when Su Yu first became a Number God Mechanic, he already had the ability to data-transform the entire Azure Star and adjust its values.

For example, enhancing the planet several times, making it more resilient, or adjusting its rotation speed to make it rotate faster or slower.

But that had no real significance, could you really rely on planet rotation to kill enemies?

Su Yu doesn't have that much free time to do such meaningless things.

But now, Su Yu's "Data Truth" ability involves more than just adjusting simple data like hardness and rotation speed.

The range of his adjustments now involves "space-time."

For instance, compressing the space of the entire Azure Star, reducing the planet's diameter to just one percent of its original size, or even smaller!

If this ability continues to develop, Su Yu suspects he could compress the entire planet to the size of a marble and carry it away in his pocket!

At that time, using a planet to crush someone could truly become reality!

Alternatively, he could reverse time within the entire planet, bringing everything back to the past!

That's right, now Su Yu can also use time reversal!

This incredible ability was something Su Yu could never achieve with the power of a Time Mechanic.

Yet, surprisingly, it was realized through the ability of a Number God Mechanic.

For a virtual data world, what is called time is nothing more than a string of data, a function, a series of timestamp information.

Chapter 1010: Core Specialization: Data Truth! (Part 2)

Adjusting the time of the data world is like adjusting the progress bar of a video file.

It can fast forward, slow down, rewind...

And now, with the ability of "Data Truth", transforming the real space-time into data, naturally brings the ability to reverse time!

In addition to this, the power of data truth has many other uses waiting for Su Yu's exploration.

But Su Yu did not hurry to explore, instead, he suddenly looked up at Song Ming.

In a short time, Su Yu's strength multiplied tenfold, and coupled with the power of "Data Truth", Su Yu's combat ability was countless times stronger than when he first became a Number God Mechanic.

This power was all due to Song Ming's sudden assistance, allowing Su Yu to gain a huge amount of professional experience without long meditation training.

The reason Song Ming was able to achieve this was because Su Yu had just transmitted the information of the "Paradox" to him.

So, what kind of savior ability had Song Ming awakened?

Song Ming met Su Yu's gaze and said, "You..."

Before he could finish, his expression changed dramatically.

Su Yu saw Song Ming's body suddenly lose color, like a sketch on white paper, and his entire being froze in place, seemingly turning into a painting.

Then, a "Painter" with an eraser began erasing the painting!

This process was extremely fast, and in less than a billionth of a second, more than half of Song Ming's body had disappeared!

This vanishing was so complete that even the Star Tower signal within him vanished!

The Star Tower signal, rooted in the cosmic rules, seemed to lose its carrier due to the disappearance of Song Ming's body!

It was a moment away from Song Ming's body completely vanishing.

At the same time, Su Yu felt an intense danger approaching; the power of "erasure" was not only targeting Song Ming but also aimed to attack him!

"Data Truth!"

Without hesitation, Su Yu immediately activated the powerful ability he had just acquired: Data Truth!

When Data Truth was activated, it was silent, without any energy fluctuations.

Only Su Yu knew, at that moment, the real and the false had been reversed!

The space where Song Ming was located had already become false.

Su Yu watched Song Ming being erased, deep in his gaze, data flowed madly, shining like galaxies, revealing various fundamental cosmic rules.

These fundamental rules, normally invisible, were now displayed in data form in front of Su Yu due to the power of "Data Truth".

These data-form cosmic rules were constantly changing, never fixed, extremely complex and changeable.

"Reverse!"

With immense computing power, Su Yu, in a short time, had analyzed billions of times, seizing the ever-changing fundamental rules.

Then, he directly reversed the space-time before him!

Thus, the mostly erased Song Ming, who only had a bit of his scalp floating in the air, reappeared out of nowhere!

Time had returned to the moment when Song Ming was about to speak.

"You..."

Song Ming just opened his mouth, seeming to remember something, his face changed dramatically again!

He no longer wasted time speaking but transmitted a series of data information to Su Yu.

The next instant, he directly vanished.

There was no sketching process, no gradual erasure process.

He just disappeared.

"Reverse!"

Su Yu once again used Data Truth to reverse time, but to no avail.

Even if he reversed the space-time before him, Song Ming did not return, as if he never existed; no matter how Su Yu reversed the space-time, he could not bring back a non-existent person.

Su Yu knew that some powerful force must have acted, the first time Su Yu reacted quickly, so he saved Song Ming; the second time, the adversary increased its power, giving Su Yu no chance to rescue!

This showed that the unknown force that acted earlier was stronger than Su Yu's Data Truth!

Su Yu had just acquired the immensely powerful "Data Truth" and didn't have time to put it into practice, yet the unknown attack gave him a harsh "lesson", causing him to suffer a great loss.

Although Su Yu was unharmed, the just-helpful Song Ming had disappeared without a trace, his life or death unknown.

Strictly speaking, Song Ming was never really alive...

"Who exactly?"

A rare ferocity appeared in Su Yu's eyes as he scanned the surroundings.

He activated all kinds of vision.

Star Tower scan, Time Vision, Data Truth, Destiny Prophecy...each powerful force provided Su Yu with a new perception mode.

Su Yu used all of his perception modes in an attempt to find the hidden formidable enemy.

However, he found nothing, as if it was all Su Yu's illusion, with no Song Ming or attack at all.

"Indeed, this is only a dream realm, and Song Ming is just a false Dream Realm Creation, why take it seriously..."

The ferocity in Su Yu's eyes subsided, his expression somewhat dazed, as if he was about to regard everything that had just happened as a false dream realm.

All of Song Ming's help, the becoming Full Level of the Number God Mechanic, Song Ming being attacked by the unknown and disappearing, were all just illusions!

But moments later, Su Yu suddenly awakened: "Still trying to influence me!"

That moment was extremely perilous; if Su Yu hadn't awakened, regarding it all as an illusion in a dream realm, then everything would indeed have become an illusion, as if it had never happened.

Fortunately, Su Yu had always maintained the state of activating "Data Truth".

In this state, reality and illusion could be swapped.

What is reality and illusion? Upon becoming a Number God Mechanic, Su Yu's essence had already transformed into planet-level data energy.

One could say that having become a Number God Mechanic, Su Yu's whole being was actually a powerful suite of data, and compared to the Real Universe, Su Yu's essence was false.

Once Data Truth was activated, reality and illusion were swapped, the space-time around Su Yu became false, allowing him to freely adjust the fundamental rules and achieve time reversal.

As for Su Yu's own Body of Data, it became incredibly real, immune to various rule-based attacks.

Data Truth, outwardly, had formidable influence and attack power.

On oneself, it was a strong defense.

The kind of power that made Su Yu drowsy and wanted to regard everything as illusory was exactly that influence, but it was blocked by Su Yu's True Data Body, directly waking him up.

Awakened, Su Yu's killing intent grew stronger, and following the feeling from that awakening instant, he suddenly looked to one side and invoked his power: "Get out!"

Although Su Yu actually hadn't discovered anything there, neither Star Tower scan nor Data Truth's rules vision found anything.

But Su Yu was determined that the eerie influence just now had come from there!

It was at that moment Su Yu awakened, the other's power couldn't retract in time, leaking a flaw.

Though only for a brief moment, Su Yu acutely sensed that there was "something" there!

Su Yu's call for that entity to roll out was insistent, without waiting for a response, he directly launched an attack.

Su Yu's attack also used "Data Truth".

His attack method was to completely disrupt and destroy all the fundamental rules in that patch of space-time!

Gravity, light speed, space-time, cause and effect...all these rules could be modified under Su Yu's Data Truth ability.

If the modification stayed within a range, the stability of the Real Universe could still accept it.

But Su Yu now was reckless, altering everything chaotically.

Instantly, everything in that patch of space-time fell into chaos, no longer able to maintain stability, collapsing with a roar!

A black hole formed in front of Su Yu.

That black hole was not an astronomical black hole but absolute Nihilism caused by the destruction of space-time rules!

This is the powerful attack of Data Truth, which Su Yu named: Data Collapse!
