

Infinite 1021

Chapter 1021: The True "Ultimate Savior" Su Yu?

"Theoretically, Su Yu should have failed, but not necessarily..."

Qi Chen, who is Zhang Chenfeng, was the one who brought that Fragment of Nihilicity to Azure Star for research in the first place, so he had a deep understanding of the "nihilicity" that erupted upon death, fully aware of how terrifying such a thing could be.

According to Qi Chen's knowledge, with Su Yu's strength, it would be absolutely impossible to survive in that kind of "nihilicity."

However, ever since Su Yu appeared on this planet, he has repeatedly exceeded Qi Chen's expectations, leaving him somewhat uncertain.

Qi Chen pondered for a moment, then his figure disappeared.

He returned to the previous "Resurrection Point" to see if Su Yu would revive there if he was killed by the "nihilicity."

But he waited for a while and saw nothing.

"It seems Su Yu really succeeded, or perhaps the resurrection location changed..."

"I still lean towards him succeeding..."

Qi Chen looked at the "Resurrection Point," his expression a bit gloomy, indicating that Su Yu had completely exceeded his control.

Moments later, his expression softened slightly, muttering to himself, "However, it might not all be bad..."

"Su Yu, I am truly curious, what is your origin?"

"In this sealed space-time, a variable like you actually appeared."

"Could it be that you're the true 'Ultimate Savior'?"

Qi Chen flipped his hand, and a crystal appeared in his palm.

Inside the crystal was a sealed figure, none other than... Song Ming!

Song Ming was the "Ultimate Savior" who Qi Chen fused from a vast amount of Savior Origin extracted from extinct civilizations. Theoretically, if Song Ming grew to the limit, he could awaken the corresponding Power of World Salvation in any situation or crisis.

However, theory is ultimately just theory. Qi Chen knew well that Song Ming's strength was far from reaching that level.

The Power of World Salvation that Song Ming awakened was, in fact, largely due to the Savior Origins he himself had merged with, exhibiting limited changes. No matter how it changed, it wouldn't exceed a certain range.

Song Ming, this Ultimate Savior, was evidently unqualified.

In contrast, Qi Chen even suspected that Su Yu was the "Ultimate Savior."

After all, the wonders Su Yu displayed had already surpassed Song Ming by far.

Don't be misled by how Song Ming often easily awakens a Power of World Salvation, which seems both easy and mysterious yet powerful.

In fact, it was all orchestrated by Qi Chen in secret, as Song Ming was entirely Qi Chen's creation. All of Song Ming's abilities were essentially "functions" designed by Qi Chen.

However, Su Yu seemed to rely on his own wisdom to continuously research new powers.

For example, the development of the Time Mechanic was created right under Qi Chen's nose.

Before Su Yu created the Time Mechanic, although he was considered a relatively powerful genius, he actually hadn't caught Qi Chen's eye.

It was only when Su Yu started researching and creating the Time Mechanic that he drew Qi Chen's covert attention.

Theoretically, it should be impossible for someone of Fourth-Order to grasp the Power of Time, but Su Yu succeeded!

This was something even Qi Chen found incredible.

To this day, Qi Chen couldn't quite figure out what profession Su Yu had taken or what abilities he possessed.

He could only speculate that Su Yu's ability to resurrect after death and survive under "nihility" might have been due to some new profession he developed.

Qi Chen, however, did not know that Su had the special Profession Panel and thought all of this was Su Yu's own ability.

"Is this what a truly naturally awakened Savior is like? Compared to Su Yu, this Song Ming is just a rough semi-finished product..."

After pondering for a moment, Qi Chen's figure had already disappeared from the Subspace Deep Layer.

At this moment, in another location within the Subspace Deep Layer, Su Yu was swiftly traversing.

Su Yu felt a sense of elation as the forces of the Pain Evil God and the Nihilism Walker mutually balanced, making him feel at ease.

What was even more gratifying was that he had shaken off Qi Chen; he was completely free at this moment.

"Now that I am truly of the Fifth-Order, the plan should change..."

As Su Yu moved through the Subspace Deep Layer, he mused inwardly.

Long ago, Su Yu realized the danger that would follow the outbreak of subspace tides; only by advancing to the Fifth-Order could he survive such a catastrophe and protect his subordinates.

Back then, Su Yu devised a plan to seize the deity position of the Pain Evil God.

In this process, Su Yu, with the aid of the "Radiant Emperor," sought help from the Radiant Emperor.

Originally, according to Su Yu's plan, to accomplish this, he needed to wait for "fate" to complete itself, at which time the Radiant Emperor would undoubtedly descend with more powerful forces.

With the help of the Radiant Emperor's power, he could finally seize the Pain Evil God's deity position.

However, due to the unexpected powerful enemy, Qi Chen, Su Yu unexpectedly completed this plan ahead of schedule, seizing the Pain Evil God's deity position, which was an unexpected success.

Initially, Su Yu thought that after seizing the Pain Evil God's deity position, he could weather the subspace tide crisis, break the seal, and then head to the depths of the universe, with boundless horizons.

But, due to Qi Chen's existence, Su Yu now felt that unless he completely defeated Qi Chen, otherwise, this seal could not be broken, and he would be unable to leave.

The seal was originally set up by Zhang Chenfeng, who was Qi Chen; given the strength Qi Chen displayed, this seal must far exceed Su Yu's previous estimations.

Previously, Su Yu was already a Number God Mechanic, with true Fifth-Order power, but when facing Qi Chen's "death," he was utterly defenseless, killed in an instant.

Chapter 1022: The Real "Ultimate Savior" Su Yu? (Part 2)

The disparity within this made Su Yu extremely startled.

Qi Chen's power likely has already surpassed the Fifth-Order, and it's unknown what level it truly is.

Fortunately, although he was annihilated by Qi Chen in an instant, at their level of power, time in battles has almost lost its significance.

A battle lasting hundreds of years and an instant annihilation doesn't make much difference.

Thus, Su Yu doesn't believe the gap between him and Qi Chen is truly insurmountable.

To bridge this gap, for now, there's only one method, and that is the [Time-Space Mechanic]!

The five prerequisite professions for Time-Space Mechanic, each possesses Fifth-Order level strengths, once mastered, are incredibly powerful.

And now, among the five prerequisite professions — Time Mechanic, Giant God Soldier Mechanic, Nihilism Walker, Dream God Mechanic, Number God Mechanic — Su Yu has completed four, only one Dream God Mechanic remains!

However, mastering this final profession poses significant challenges as well.

The Dream God Mechanic requires the devouring of a Fifth-Order Extraordinary Dream Origin, and currently, the Chaotic Evil God Dream enveloping Azure Star seems most fitting.

But with Qi Chen's presence, should Su Yu wish to devour this dream, he would have to confront Qi Chen directly, which is essentially impossible.

"Do I have to use a paradox again?"

Su Yu's heart stirred, contemplating the use of a paradox once more.

A paradox allowed Su Yu to directly seize the divine rank of the Pain Evil God, acquiring a Fragment of Nihilicity out of nowhere.

It should also enable Su Yu to truly acquire the Fifth-Order Dream Origin.

Moreover, Su Yu indeed possesses paradoxes, even two!

Su Yu has two paradoxes in total, one used to seize the Pain Evil God's divine rank.

The other, used to seize the Fragment of Nihilicity from the Brutal Evil God.

Both paradoxes have already been used.

But now, where did Su Yu get two paradoxes again?

The answer is, he completed two more "impossible" tasks, thus gaining two more paradoxes.

These two "impossible" tasks, the first was Su Yu using the Profession Panel's special attributes to achieve true "Evil God Undying," resurrecting in Subspace Deep Layer while retaining his consciousness.

The second was Su Yu using the Profession Panel's special attributes to survive in [Nihility] and successfully master Nihility Walker.

These tasks, impossible without the special attributes of the Profession Panel, both belong to the realm of the "impossible."

Now that Su Yu has completed them all, naturally he gained two more paradoxes, as each accomplishment results in another, totaling two without depletion.

"In this respect, the Profession Panel is truly a 'Paradox Machine'!"

Su Yu couldn't help but exclaim, the essence of the Profession Panel is just too unique.

Only by utilizing this panel can one easily create such a miraculous thing as a "paradox."

In fact, throughout these two events, the Profession Panel didn't perform any special actions.

It simply issued normal prompt messages as it always did.

However, these prompt messages can't be obstructed even by death.

Even if Su Yu were to die, or be assimilated by nihility.

These prompt messages would still appear normally, like an incomparably powerful "alarm clock," awakening Su Yu's consciousness, empowering him to accomplish such "impossible" feats.

"Wait... In that case, when I completed the job of Time Mechanic, essentially it should have been an 'impossible' thing as well."

"After securing the Time Mechanic, why didn't I receive a paradox?"

Su Yu suddenly recalled the Time Mechanic back then, such a profession couldn't be completed at the Fourth-Order level, yet back then Su Yu did accomplish it.

Upon completing this profession, logically there should have been a paradox granted, why didn't it appear?

Almost as soon as the doubt arose, Su Yu thought of the answer.

It's simple, the Pain Evil God!

The core of the Pain Evil God is a "paradox."

Su Yu suspects the paradox he should have received after completing the Time Mechanic was secretly intercepted by Qi Chen and then used to create the Pain Evil God.

Although speculative, Su Yu believes it's highly probable, the birth of the Pain Evil God seems unusually eerie.

Thinking of this, Su Yu cursed inwardly, Qi Chen is indeed insidious, how many undisclosed actions he took remains unknown, nor what he's plotting...

However, Su Yu still had some doubts; after the Pain Evil God was born, why wasn't that paradox consumed; instead, it resided within its Divine Body.

Later, this Pain Evil God's paradox was acquired by Su Yu and then used by the powers of the Radiant Emperor, fusing it into Su Yu, altering his identity and fate, during which the paradox still wasn't consumed.

That paradox seems rather special.

When the Radiant Emperor had Su Yu fuse with that paradox, it seemed to carry some profound meaning.

These doubts remain unsolvable for Su Yu now, that paradox has already been consumed.

Even though Su Yu has now devoured and fused the Pain Evil God, obtaining all its memories, the reason remains elusive, the distinctiveness of that paradox unknown.

After all, the Pain Evil God initially didn't even know what a paradox was, naturally it couldn't know how the paradox came to be.

Understanding everything might still require knowledge from Qi Chen.

Completing the profession of [Time-Space Mechanic] is essential.

In conclusion, now that Su Yu possesses two paradoxes, theoretically he could use one paradox directly to seize the Chaos Evil God Dream Origin and master Dream God Mechanic.

But after pondering for a moment, Su Yu didn't act immediately.

Because...

"Song Ming has already awakened the Power of World Salvation related to paradoxes, it's unknown what kind of power it is, could it be able to mass-produce paradoxes?"

"Currently, Song Ming is under Qi Chen's control, likely researching Song Ming's powers."

"If I use a paradox to attempt to devour the Dream Origin, would Qi Chen notice? If Qi Chen utilizes Song Ming's powers concurrently, employing a paradox, counteracting my attempt, what would happen?"

"Better observe for now..."

A paradox resembles the legendary wish machine, now Su Yu worries, should two people utilize paradoxes simultaneously but make opposing "wishes," what would transpire? This uncertainty leaves Su Yu somewhat uncertain.

Thus, he's not in a hurry to employ the paradox, opting to first observe.

These two paradoxes are also reserved for self-defense.

Otherwise, Su Yu worries, Qi Chen could directly employ a paradox, "wish" for Su Yu's death, or forcefully bring Su Yu back under his control.

This is highly possible.

When facing a paradox, Su Yu's various professional abilities aren't very effective; leaving a paradox reserved is essential for counteraction.

If Qi Chen employs a paradox against Su Yu, then Su Yu will counter-wish.

Luckily, so far Qi Chen hasn't used a paradox against Su Yu, but Su Yu won't become complacent, he remains vigilant, those two paradoxes are Su Yu's talismans, not to be used lightly.

In any case, even if Dream God Mechanic's profession is completed, the distance from completing [Time-Space Mechanic] remains extensive.

The requirements of the ritual include seeking Time-Space Origin and creating a Creation Machine.

Su Yu still doesn't know what Time-Space Origin is, rushing to master Dream God Mechanic doesn't hold significant meaning.

After all, theoretically that Dream covering Azure Star should be the Dream Realm of a yet-to-be-born "Chaotic Pain Evil God."

Now that Su Yu has already completed the Pain Evil God profession, theoretically that Chaotic Evil God should also disappear.

Whether the Dream Realm still exists is uncertain.

Actually, theoretically speaking, even if the Dream Realm has vanished, employing a paradox should be able to conjure a Fifth-Order Dream from nothing.

Yet, seizing an existing Dream Origin compared to "Creation from Nothing" is evidently not of equal difficulty.

Su Yu attempted slightly; creating a Dream Origin from nothing might require both paradoxes in full, and might still be insufficient.

Chapter 1023: Hunting Brutality

In fact, Su Yu still had other options, which were... the dreamworlds within the Dream-Making Star Core.

Those dreamworlds should also be Fifth-Order, at least Fifth-Order, and they are numerous.

However, those dreamworlds are the Divine Body of the great being known as the Master of Dreams. Trying to seize those dreamworlds would be courting death... so Su Yu would not consider it for now.

Su Yu mainly was unsure of the current state of the Master of Dreams or what relationship he had with Qi Chen.

Why did the Dream-Making Star Core appear in the lockdown, and what exactly was going on in that Dark Space-Time where the Dream-Making Star Core was located?

Why could Qi Chen fuse the essence of those extinct civilizations and become Song Ming? Would the Master of Dreams not stop him?

Without understanding these things, Su Yu would definitely not provoke the Master of Dreams again, nor would he casually visit the Dream-Making Star Core.

"There's still too little information now..."

The more Su Yu thought, the more he felt he knew too little.

This Azure Star System, which at first seemed unremarkable, appeared to hide too many secrets, too many questions.

These questions could basically only be answered by Qi Chen, but clearly, Su Yu couldn't go ask Qi Chen, and the other party wouldn't answer truthfully.

"Fortunately, there's still one..."

"No, there are two beings that might be able to answer my questions, one of whom is the Radiant Emperor."

As Su Yu thought of this, he immediately tried to pray to the Radiant Emperor in his heart.

But as soon as he had the thought, he felt a great danger!

"This is..."

Su Yu hurriedly stopped the idea of praying to the Radiant Emperor.

He had a feeling that if he prayed to the Radiant Emperor now, he wouldn't receive help but would instead be obliterated!

He vaguely sensed an extremely powerful hostility.

This hostility even originated from within Su Yu, from that "Radiant Seed."

This seed is the concentrated power of the Radiant Emperor, its essence extremely special. Even after Su Yu's death and resurrection, this thing followed him.

This thing was originally very useful, but now, it faintly emanated hostility toward Su Yu.

"How can this be!"

"Is it because... I am now... not human?"

Su Yu was puzzled, but after a moment, he understood why.

Su Yu had taken the divine seat of the Pain Evil God, even thoroughly devouring and fusing that Evil God.

Moreover, Su Yu was now in the Subspace Deep Layer, without even a human form, merely a human-shaped black hole.

No matter how you looked at it, he wasn't human, but a complete Evil God.

If he prayed to the Radiant Emperor in this state, it would be courting death.

If struck by the power of the Radiant Emperor, Su Yu very much doubted if the trait of Evil God Undying would still function properly?

If the Radiant Emperor were in a normal state, he should be able to distinguish between Su Yu and an Evil God, but now the Radiant Emperor's consciousness was probably unclear, so Su Yu had better not act rashly.

If he returned to the real world and restored his human form, he might be able to give it a try, but not now.

However, if he returned to the real world, Qi Chen would immediately discover his whereabouts, which would also be inappropriate.

Therefore, seeking out the Radiant Emperor to inquire about the secrets of the Azure Star System was temporarily unlikely.

Fortunately, Su Yu knew of another being who should also be able to answer his questions.

"The other... is the Radiant Prince: Brutal Evil God!"

Indeed, the other was the Brutal Evil God.

Su Yu had previously learned that the Brutal Evil God's identity was that of a "prince" who had defected.

When the Brutal Evil God defected, he did not go to other places but came to the Azure Star System, which was probably not a coincidence.

He surely knows many secrets.

And the Brutal Evil God should also be hiding in the Subspace Deep Layer, so finding him wouldn't require returning to the real world, which was convenient.

Currently, Su Yu possessed four major Fifth-Order professions: Time Mechanic, Pain Evil God, Giant God Soldier Mechanic, and Number God Mechanic. His strength had skyrocketed, and if he found the Brutal Evil God, he could surely suppress him, preventing him from escaping again.

The premise, however, was actually finding him.

"Now the question is, how can I find the Brutal Evil God here?"

Su Yu pondered.

Searching for a specific target in the Subspace Deep Layer was extremely difficult.

Qi Chen couldn't find Su Yu, so he had given up directly.

Su Yu wanted to find the Brutal Evil God, which was equally challenging, if not more so.

After all, he was weaker than Qi Chen.

"Holographic Perception, Star Tower Navigation!"

Su Yu tried using the Star Tower's navigation scan.

[Current Star Tower signal weak...]

The Profession Panel immediately popped up a prompt.

Seeing this, Su Yu felt a bit helpless.

The Star Tower Navigation could indeed be used in this Subspace Deep Layer, but the signal was very weak, only allowing a small distance ahead to be seen clearly.

It was like turning on a strong light in the fog, illuminating only a dozen meters ahead, but not enough to fully penetrate the fog.

This wasn't because the power of the Star Tower was insufficient, but because the power of the Star Tower Signal Terminal that Su Yu had obtained wasn't enough.

If Su Yu could absorb and fuse more Star Tower Signal Terminals, it would be possible to "illuminate" more of the fog, and directly finding the Brutal Evil God wouldn't be impossible.

But for now, it was like searching for a needle in a haystack.

"It's better than nothing, I'll search slowly..."

Su Yu immediately set off, randomly choosing a direction to go.

He was prepared for a prolonged battle.

The Star Tower Navigation may not be able to fully illuminate the fog of the Subspace Deep Layer, but at least it gave him a larger field of view, allowing him to discover the Brutal Evil God in advance if he got close and take the upper hand.

As Su Yu searched in the Subspace Deep Layer, he continued to hone his strength.

Chapter 1024: "Hunting" Brutality (Part 2)

[Gained 90,000 Professional Experience...]

[Gained 1,000,000 Professional Experience...]

The experience prompts on the Profession Panel keep popping up—it's the professional experience of the Pain Evil God and Nihilism Walker, and the rate of improvement is extremely fast.

It's Su Yu using the power of the Pain Evil God to attack himself, plunging himself into Hell's Pain. This self-attacking method rapidly enhances Su Yu's Power of Pain, and the speed at which he gains experience is very quick.

The cost is that it's easy to turn oneself into a lunatic with a mental breakdown.

Fortunately, Su Yu is also a Nihilism Walker. When he feels he cannot endure Hell's Pain, he stops using Power of Pain for self-attack and instead uses the Power of Nihilism.

Under the Power of Nihilism, any Hell's Pain would return to nihilism, preventing mental collapse.

However, once the Power of Pain is consumed by nihilism, this Power of Nihilism will turn to attack Su Yu himself.

Over time, even Su Yu himself will return to nihilism.

The Power of Nihilism is even more dangerous than the power of the Pain Evil God.

Hell's Pain can drive a person mad, making one seek self-rescue and release.

In this absolute nihilism, even the thought of self-rescue is hard to maintain, and carelessness can lead to sinking completely into nihilism, never to awaken again.

Like before, using the power of the Nihilism Walker for self-attack also rapidly improves the professional experience of the Nihilism Walker.

When Su Yu feels he cannot handle the Power of Nihilism, he switches back to the Power of Pain, using this pain that transcends limits to awaken himself from nihilism.

Using this method of "left foot stepping on the right foot to soar," Su Yu quickly upgrades these two powerful professions he has just taken up, without the need for meditation. This self-attacking is the strongest form of meditation.

It's only because Su Yu possesses these two professions simultaneously, pain and nihilism counterbalancing each other, that he can achieve something that seems incredible.

This cultivation is extremely brutal; the kind of pain and nihilism surpassing the life-bearing limit is truly endured by Su Yu, without any discount.

Every minute and second, Su Yu switches between two different kinds of "hells," never stopping.

However, Su Yu's will is exceedingly strong; for the sake of upgrading these two professions to full level quickly, suffering a bit is nothing.

"When the Human Empire initially developed the Ghost Hidden Blade profession, was the ultimate goal to be like me?"

Su Yu practiced for some time; both professions each upgraded by one level, suddenly a thought emerged.

The Ghost Hidden Blade, this Third-Order profession, is extremely special—the only stable result when the Human Empire initially researched Ghost Energy.

Its special feature is that it can, to some extent, use the Power of Nihilism to calm the distortion and chaos inherent in Ghost Energy, allowing the jobholder to maintain rationality.

And now, the advancing Nihilism Walker can even keep Su Yu, this "Pain Evil God," rational and human.

So Su Yu speculates, the initial goal of the Human Empire's research was this—to use the Power of Nihilism to create sober Evil Gods with human nature!

He doesn't know if they eventually succeeded, after all, the Nihilism Walker profession is unlocked by the Profession Panel, and the profession introduction doesn't mention it being an Imperial legacy.

"Probably didn't succeed."

Su Yu thought to himself.

He, with a Fifth-Order essence, and with the Profession Panel's special features, managed to complete the Nihilism Walker job. Otherwise, he would have long been swallowed by Nihilism.

Did the Human Empire ten thousand years ago have something like the Profession Panel?

Moreover, even if the Human Empire succeeded back then and let an experimental subject have professions similar to Nihilism Walker and Pain Evil God, it might not be like Su Yu.

Because Su Yu relies not only on the conflict between the two professions to keep clear, but mainly on the Profession Panel.

The Profession Panel constantly pops out experience prompts, keeping Su Yu minimally clear.

If someone else tried it, a single mistake would lead to eternal destruction—either dead or insane.

"What exactly is the Profession Panel? Why does it have such special qualities?"

Su Yu's mind couldn't help but question.

Unfortunately, asking the Profession Panel won't yield answers. Perhaps even its own database lacks answers...

Day by day, Su Yu continued searching in the Subspace Deep Layer for three years! During this period, his two professions each ascended dozens of levels, but the later it gets, the slower they upgrade.

He has yet to find any trace of the Brutal Evil God.

However, Su Yu is not anxious; after all, his two professions aren't at full level yet.

Moreover, during this period, Su Yu used the Star Tower signals to explore the Subspace Deep Layer, creating a "map."

Wherever Su Yu travels, the Star Tower signals will be "activated," expanding his vision in this area considerably, clearing away the "fog" and allowing the Star Tower to scan and monitor the entire map.

With sufficient time, he can eventually activate the entire Subspace Deep Layer, complete scanning and map modeling.

Of course, the Subspace Deep Layer is vast; with Su Yu's current speed, fully scanning it would take a billion years.

In fact, Su Yu isn't even sure if the Subspace Deep Layer is finite or infinite.

Logically, the Subspace of the Azure Star System is sealed by Qi Chen; it should be finite, otherwise, the Brutal Evil God would've long fled.

But no matter how Su Yu explores here, he cannot locate the boundary of the Subspace Deep Layer.

Perhaps the nature of the Subspace Deep Layer is special, even within a seal, it remains "infinite."

No wonder the Brutal Evil God hides here, nearly impossible to find.

Fortunately, even though the Subspace Deep Layer is infinite, the "surface layer," which Su Yu entered just when he was Third-Order, is finite.

Su Yu estimates that the Subspace Surface Layer should match the scale of the entire Azure Star System.

The whole Azure Star System spans about a light-year; the sealed Subspace Surface Layer is roughly the same.

However, the Subspace Surface Layer is extremely chaotic, hard to measure; if Su Yu weren't already Fifth-Order, measuring the volume of the Subspace Surface Layer would be impossible.

And at the intersection of the Subspace Surface Layer and Deep Layer, there's a "finite" area.

Su Yu has used Star Tower scanning to model the map of this intersection area, monitoring it continuously.

This way, if the Brutal Evil God approaches the Subspace Surface Layer, entering the intersection, Su Yu will detect it.

This method is what Su Yu found over the three years.

Though it's somewhat passive, requiring the Brutal Evil God to emerge, it's much better than finding a needle in a haystack.

Considering the sly nature of the Brutal Evil God, surely it won't remain hidden in the Subspace Deep Layer all the time—it will definitely sneak to the intersection to observe the situation.

At that moment, it's time for Su Yu to "hunt" this Evil God.

In an instant, another five years passed.

During these five years, Su Yu continually refined the map scanning of the intersection area, activating more Star Tower signals to ensure nothing goes wrong.

Each time he goes to the intersection, Su Yu is extremely cautious, using the power of the Nihilism Walker to transform himself into nihilism, avoiding being discovered by Qi Chen. Otherwise, it wouldn't be Su Yu hunting the Brutal Evil God but Qi Chen hunting Su Yu.

On this day, Su Yu once again left the intersection for the Subspace Deep Layer exploration.

But suddenly, he felt a stirring in his heart; on the Star Tower map within his Holographic Perception, an abnormal red dot appeared.

This red dot is extremely tiny; if not for Su Yu's years of perfecting the map and activating Star Tower signals, he wouldn't have discovered it.

This red dot represents... Power of Brutal!

And in this Subspace Deep Layer, the only one possessing the Power of Brutal is undoubtedly the Brutal Evil God! He finally appeared!

"Nihility!"

Su Yu's mind stirred, already using the Power of Nihility to envelop himself. Instantly disappearing—even a strong one of the same order standing right in front couldn't see him.

This is the Nihility Walker's ability, transforming into nihility, walking beyond space-time and life-death.

The Ghost Hidden Blade is quite adept at hiding, but this Nihility Walker's concealment ability is thousands of times stronger.

However, this state of transforming into nihility is also incredibly dangerous, easily swallowed by nihility, never to recover.

Luckily, Su Yu has the Power of Pain and Profession Panel, so he needn't worry.

Having transformed into nihility, Su Yu carefully moves towards the red dot representing brutality on the map.

"Brutality, today let's settle the grievances between us once and for all..."

Chapter 1025: Has Brutality Gone Mad?!

Soon, Su Yu arrived at the red dot on the map, but he didn't see the figure of Brutality; he only saw a blur of red light.

This red light was very small, and when Su Yu focused his mind on it, he instantly felt an extremely intense brutal emotion. This brutal emotion was much stronger than any he had felt before.

It seemed to condense all the brutality in the world into one point, purifying, compressing, purifying again, compressing again...

Finally, it formed this tiny point of red light.

At just a glance at this red point of light, Su Yu's thoughts were hit by the brutal aura. He was almost plunged into endless brutal emotions, losing all reason, knowing only insane slaughter and destruction.

Fortunately, as a Nihilism Walker, Su Yu possessed the Power of Nihilism.

He immediately increased the output of his Nihilism Walker profession power, using it to attack himself.

As the Power of Nihilism eroded his being, Su Yu immediately sobered from the previous brutal state and quickly retreated, watching the red light from afar with caution.

"What is this? Brutal Evil God?"

Su Yu thought uncertainly.

Logically, possessing such a strong power of brutality, this little red point should be the Brutal Evil God.

Moreover, the scan from the Star Tower signal also confirmed that it was the aura of the Brutal Evil God; it couldn't be false.

But, when did the Brutal Evil God become so powerful?

Su Yu originally thought that with his current strength, he could suppress the Brutal Evil God instantly upon encountering it, but he didn't expect it to transform into such a state, greatly increasing its power.

Just then, Su Yu noticed that the tiny red point of light seemed to be under constant compression, reaching its limit, and began to tremble and flicker.

The power of brutality contained in the red light point was already becoming unstable.

Su Yu immediately foresaw what would happen: a great explosion!

"He's gone mad?"

Su Yu was somewhat stunned.

If that little red point is the Brutal Evil God, then it seems the Brutal Evil God is about to... self-destruct?

The self-destruction of a Fifth-Order Great Evil God would be incredibly formidable. Even with Su Yu's current strength, he might still get injured or even be blown apart, needing to resurrect and be reborn.

Su Yu hurriedly retreated again, this time moving to a very distant place, relying on the Star Tower signal's scan to observe the red dot's movements.

Su Yu's heart was full of confusion because, according to the Star Tower signal's scan, the energy reaction within that mass of red light was a complete self-destruction.

Such a level of self-destruction would leave nothing behind, which equates to suicide.

Although the Evil God is undying, the Brutal Evil God is not Su Yu, doesn't have a Profession Panel, and cannot achieve true Evil God undying.

If he dies, that means he's truly dead. The next incarnation of the Brutal Evil God would have nothing to do with him.

Su Yu didn't expect that after not seeing the Brutal Evil God for so long, the first time meeting him, he would be so "desperate."

Can Evil Gods also lose the will to live? Tired of living?

"Wait, something's wrong. This guy... could he have lost his mind?"

Su Yu observed the red point of light from afar and, combined with his own situation, had a vague suspicion.

A normal Brutal Evil God is extremely cunning and values life too much to do such a thing as self-destructing.

Especially in this Subspace Deep Layer, with no one else around, whom would the brutality bomb? Su Yu? Su Yu had fled so far, yet the Brutal Evil God didn't chase after him.

Thus, the Brutal Evil God isn't behaving normally right now! He's already gone mad!

He's self-destructing not to bomb anything, not for battle, but simply to self-destruct to vent that transcendent brutal emotion!

A lunatic concentrated with all the brutal emotions in the world suddenly self-destructing isn't that surprising.

Although self-destruction equals death, a madman wouldn't care if he's dead or alive.

Perhaps after brutality dies and revives with a new consciousness, the first thing it will do is self-destruct again, turning the Brutal Evil God into a Self-destructive Evil God...

"But, how could the Brutal Evil God, after remaining sane all these years, suddenly go mad?"

Su Yu was puzzled.

In Su Yu's understanding of brutality, this guy is extremely cunning, treasures life, and doesn't conform to the name of a Brutal Evil God. The revealed personality is not brutal at all but maintains rationality at all times.

Su Yu understood this situation very well now.

After taking the position of the Pain Evil God, Su Yu was constantly eroded by Hell's Pain, feeling worse than death, and finally getting rid of such torment using the power of the Nihilism Walker.

And the Brutal Evil God was just like Su Yu before, always struggling with the brutal emotion within its source, not allowing itself to be completely controlled by brutality.

In fact, brutality had once transferred part of his brutal divine body to Su Yu in battle to maintain rationality, reducing the influence of brutality on his reason.

That's why the Brutal Evil God's power appears so "weak," unable even to defeat Su Yu, who previously had the Evil God Soldier Mecha.

It's not just because brutality was injured in the war thousands of years ago, but also because he was continually suppressing his power, not allowing himself to become too strong.

Otherwise, he would lose his mind and become a brutal madman.

The injuries from the war thousands of years ago might also have been intentionally caused by the Brutal Evil God.

This state has been maintained for at least ten thousand years by brutality, showing he's an old hand at it. So why suddenly go mad?

Chapter 1026: Brutality Gone Mad?! (2)

There hasn't been any battle involving brutality lately.

"Could it be... because of me?"

Su Yu pondered for a moment, then suddenly had an inspiration and thought of a possibility.

Previously, in order to assume the role of the Nihilism Walker, Su Yu directly used a "paradox" to snatch a Fragment of Nihilism from the Brutal Evil God.

After all, Su Yu and Brutality have always been adversaries, so taking the Fragment of Nihilism from them didn't cause Su Yu any moral dilemma, nor did he ever consider any consequences.

What consequences could there be?

At most, the Brutal Evil God would hide in the Subspace Deep Layer and rage impotently, which has nothing to do with Su Yu.

But now, it seems that the consequences are even more serious than imagined: Brutality has gone completely mad!

Su Yu guessed that previously, Brutality might have also tried to use the power of the Fragment of Nihilism to maintain their sanity.

Although Brutality didn't have a Profession Panel and couldn't become a Nihilism Walker, they could still partially utilize the power of the Fragment of Nihilism.

Just like how Su Yu, who was previously a Ghost Hidden Blade, could utilize the Power of Nihilicity to a limited extent. With Brutality's power and wisdom, it's not surprising they could develop a similar profession, and they likely know the complete information about the Ghost Hidden Blade profession.

With the power of the Fragment of Nihilicity helping to maintain sanity, the Brutal Evil God could release the self-restraint on their power that they had maintained for so long.

Thus, the current Brutality has become much stronger than before.

However, before the Brutal Evil God could do anything significant with their enhanced strength, Su Yu used a paradox to directly snatch away the Fragment of Nihilicity.

Without the suppression of the Fragment of Nihilicity, the Brutal Evil God immediately could no longer maintain their sanity, completely falling into extreme brutality and madness.

They even suddenly seemed about to self-destruct.

"Tsk, I didn't expect this guy to end up like this..."

Su Yu didn't anticipate that his previous behavior of seizing the Fragment of Nihilicity would cause such massive trouble for the Brutal Evil God, pushing them to the brink of death.

Originally, according to Su Yu's expectations, the showdown with the Brutal Evil God should have been an earth-shattering battle.

But now, in silence, they have been driven to the brink of death.

Thinking of this, Su Yu couldn't help but chuckle inwardly.

In the past, the Brutal Evil God seemed powerful and terrifying in Su Yu's heart, but now, they even seem a bit "pitiful," not even knowing how they ended up dying.

Even now, the Brutal Evil God probably still doesn't know who caused this disaster for them.

The once ordinary Mechanic, Su Yu, has unknowingly reached a level where he can look down upon the Brutal Evil God.

"But... I can't just let them die like this..."

An idea sparked in Su Yu's mind, intent on preventing the Brutal Evil God's self-destruction.

Stopping their self-destruction is simple; by using the power of the Nihilism Walker, Su Yu could restore the Brutal Evil God's sanity.

Of course, Su Yu wanted to save the Brutal Evil God not out of pity.

This guy has directly or indirectly killed an unknown number of billions of humans, so why would Su Yu pity them?

Su Yu aimed to inquire about some secrets concerning the Azure Star System from the Brutal Evil God, so if they self-destruct, who could Su Yu ask?

Though Evil God Undying means that upon death a new consciousness is born in the depths of subspace, inheriting previous memories.

But Su Yu doesn't know where Brutality's "Resurrection Point" is.

Moreover, even if reborn, Su Yu can't be sure if the inherited memories would be complete; after all, Su Yu hasn't truly "died" before.

Thus, Brutality shouldn't just die like that; at least, the secrets they know should be extracted first.

With this thought, Su Yu no longer hesitated and immediately activated the power of the Nihilism Walker, launching an assault towards the distant Brutal Evil God.

This is the Nihilism Walker's method of attack.

Silently, the Power of Nihilism struck the Brutal Evil God.

At this moment, the Brutal Evil God's power was highly condensed into a small red dot that flickered and trembled, growing brighter and about to explode in moments.

But as the Power of Nihilism struck, it was as if the red dot was shrouded in mist, suddenly dimming considerably.

The Power of Nihilism was soothing that extreme emotion of brutality.

Mere moments later, the red dot suddenly brightened as if a crimson star was exploding.

Then the crimson light coalesced into a thick beam, blasting towards Su Yu.

Though the Brutal Evil God had lost their senses, under the Power of Nihilism's onslaught, they instinctively retaliated.

After all, the calming effect of the Power of Nihilism is essentially an onslaught.

The Power of Nihilism isn't a benign energy; indeed, it's more perilous than the Power of Pain or the Power of Brutal.

It calms emotions while simultaneously converting the opponent's thoughts, memories, even their body, energy, and everything into nihilism.

Such potent and perilous assault naturally provokes the Brutal Evil God's instinctive counterattack.

Brutality's counterattack, meanwhile, halted their self-destruct sequence, although they remain deranged, merely shifting their frenzy from self-destruction to annihilating Su Yu.

"Here it comes..."

Su Yu softly spoke as he watched the rapidly advancing beam of brutality.

This beam of brutality was far more formidable than the ones Su Yu had seen before.

If it were in the real universe, this beam of brutality would be enough to blast a large hole clean through the Azure Star.

Reducing over half of the Azure Star's mass to annihilation, leaving just a hollow "star ring."

The Azure Star is enormous among planets and has a strong capacity to withstand attacks; an ordinary Fifth-Order would need considerable time to destroy it and couldn't obliterate it in one strike.

From this, it's evident that the Brutal Evil God is much more powerful now.

Faced with such fierce assault, Su Yu stood firm, allowing the thick beam of brutality to strike him directly.

Because in the Subspace Deep Layer, Su Yu didn't have a human body, but was a human-shaped black hole.

That thick beam of brutality collided with the human-shaped black hole, instantly erupting into countless brilliant lights.

On Su Yu's surface, black and crimson intertwined; endless pain and brutality entwined with no end.

"So this is... the attack of a Fifth-Order Evil God."

The human-shaped black hole that Su Yu had transformed into endlessly surged, enduring a blast capable of planetary destruction head-on.

Simultaneously, a powerful brutal will attempted to invade Su Yu's mind, transforming him into a madman driven by nothing but brutal emotions and a thirst for destruction.

Even Su Yu's entire body parts, under this immense power, seemed ready to rebel and attack each other.

The beam of brutality didn't only hold massive destructive power but also unparalleled spiritual erosion.

Such a powerful assault, if faced by someone who just completed the Fifth-Order ceremony, might result in instant obliteration or madness from a single strike.

But...

"Just so!"

Su Yu murmured softly to himself.

He stood firm to test his current strength.

Now he's tested it; despite Brutality's counter being strong, it hardly budged Su Yu!

At this point, Su Yu was a Time Mechanic, a Giant God Soldier Mechanic, a Number God Mechanic, a Nihilism Walker, and a Pain Evil God—holding five Fifth-Order power professions. His power was truly immense, building an indestructible defense for Su Yu.

"What a thrill!"

Previously, Su Yu had never confronted a Fifth-Order head-on, having at most used the Evil God Soldier Mecha to fight the Brutal Evil God a few times. Those were backed by the mech's power; now it's all on Su Yu!

A strike capable of planetary destruction and civilization extermination was effortlessly defended by Su Yu!

Back when Su Yu first joined the Extraordinary Federation, he proposed to Xiao Shengyin and the others a theory on multi-class synergy to enhance strength.

At that time, Xiao Shengyin and the others thought it unrealistic; handling one Third-Order profession was already incredibly hard, let alone multiple?

Yet now, Su Yu directly synergized multiple Fifth-Order professions—how powerful could that be?

"I've tested the defense; now, let's test the attack!"

Su Yu's figure moved, the surface of the human-shaped black hole beginning to change, vaguely revealing mechanical outlines.

Evil God Soldier Mecha!

This mecha, in essence, is the Pain Evil God. Now that Su Yu has devoured and fused with the Pain Evil God, Su Yu is the mecha, and the mecha is him, able to transform at will!

Chapter 1027: Source of Slaughter, the True Brutal Mecha!

After transforming into the Evil God Soldier Mecha, Su Yu fiercely charged at the Brutal Evil God.

Although Su Yu wanted to awaken the Brutal Evil God to ask him about the secrets of the Azure Star System and Qi Chen,

it was clear that the Brutal Evil God would not be forthcoming and casually reveal his secrets to Su Yu.

So... a battle was inevitable, to fight until the Brutal Evil God awakened, to fight until he spoke!

After many years, Su Yu once again waged a great battle against brutality!

In the instant he rushed towards the Brutal Evil God, the Evil God Soldier Mecha, which Su Yu had transformed into, experienced a rapid surge in power.

In a short period, its strength increased more than tenfold!

The Evil God Soldier Mecha was a powerful mecha transformed using the Pain Evil God as its material, combined with the technology of the Mechanical God and the abilities of the Giant God Soldier Mechanic.

Its level is: Sovereign Level.

This mecha not only possesses all the abilities of the Pain Evil God, but due to the integration of the Mechanical God's technology, its power is even stronger than the original Pain Evil God. It can use the Power of Pain as energy to unleash formidable physical kinetic energy.

The first time Su Yu used the Evil God Soldier Mecha, he used the Destructive Fist of this mecha to drive the Brutal Evil God to retreat in defeat.

However, back then, the Mechanical God's transformation of the Pain Evil God mainly aimed at control and restriction, so the enhancement of its power was not significant.

But now, Su Yu had already taken on the role of Number God Mechanic and possessed the "Data Truth" ability.

After transforming into the Evil God Soldier Mecha, Su Yu immediately used Data Truth to digitize the entire mecha and adjust its values.

Thus, in a brief moment, the power of the Evil God Soldier Mecha surged seventeenfold!

Originally, Su Yu's Data Truth/Data Reality ability could adjust the values of Mechanical Creations, increasing power by hundreds of times or more out of thin air.

However, those were some mid to low-tier Mechanical Creations.

The Evil God Soldier Mecha, being a powerful Fifth-Order mecha, had values far more difficult to adjust than those Third-Order and Second-Order creations, thousands or even billions of times more difficult!

After all, ordinary Mechanical Creations, even if gathered to billions, cannot compare to a genuine planet.

Yet, the Evil God Soldier Mecha can stand shoulder to shoulder with a planet! Enhancing its power by a single fold equals the power of an additional planet!

Therefore, using the ordinary "Data Reality" ability, it is basically impossible to adjust the values of a Fifth-Order mecha. Even if forced, it could only adjust by one or two-fold at most.

Only the Core Specialization "Data Truth," awakened after the Number God Mechanic reaches full level, can perform significant adjustments.

In essence, this adjustment directly affects the "planet-level" nature of the Evil God Soldier Mecha, delving deep into the cosmic rules.

Previously, Su Yu's use of Data Truth could only result in "Data Collapse" and spatial annihilation.

Now, with the Evil God Soldier Mecha, he has developed more applications, namely using this power to adjust values and enhance the mecha!

Su Yu exerted all his strength, and within a short time, amplified the power of the Evil God Soldier Mecha seventeenfold.

Seventeenfold, an astounding value, as onefold equates to a planet's force, and now it's directly seventeenfold!

The original Evil God Soldier Mecha was a top-tier Fourteen-Star mecha, and with this enhancement, it instantly reached Fifteen-Star top tier, which is of the Fifth-Order top level!

The moment the value adjustment concluded, Su Yu felt his power swell infinitely.

The Fifth-Order is already planet-level, but even among planets, there are hierarchies.

The Azure Star is a massive planet, but compared to the gaseous planet containing the Dream-Making Star Core, it still lags considerably.

Previously, Su Yu felt his planetary essence was akin to the Azure Star.

But now, through the data adjustment of Data Truth, this essence seems to be trending towards that of a gaseous giant planet!

Su Yu looked at the Brutal Evil God ahead and suddenly had a feeling of overlooking from above, of crushing superiority!

This was the mighty confidence brought to Su Yu by the combined power of the Pain Evil God and the Number God Mechanic's two professions!

The Pain Evil God morphs into the Evil God Soldier Mecha, and the Number God Mechanic adjusts values to enhance strength.

No, it also includes the Giant God Soldier Mechanic's abilities, as at this moment, the Evil God Soldier Mecha is being driven by the Giant God Soldier Mechanic's [Mechanical Descent] ability.

The joint force of three major professions, along with the previously deployed Power of Nihilicity, has Su Yu basically exerting his full strength.

Boom!

The Evil God Soldier Mecha that Su Yu manifested, with its seventeenfold planetary essence, barreled towards the Brutal Evil God ahead.

The Brutal Evil God continued to emit the powerful Brutal Light, an attack capable of shattering planets, but to the current Su Yu, such an attack was laughable and directly ignored.

He charged fiercely all the way, reaching the red light dot of the Brutal Evil God's manifestation.

Then, the Evil God Soldier Mecha, which Su Yu transformed into, stretched out its dark and lightless black hole-like hand towards the Brutal Evil God.

This action appeared to be just a simple grasp, but driven by the seventeenfold planetary essence, its speed and strength had surpassed the limits of ordinary beings, and due to its overwhelming power and speed, it partially triggered the light-speed barrier and relativistic effects.

In this subspace deep layer where time and space do not exist, it created a cosmic explosion-like commotion, carving out a piece of stable space-time.

This strike was unavoidable, unstoppable!

With full force, Su Yu's hand swiftly grasped the red light of the Brutal Evil God's manifestation, and with a powerful squeeze, the force of seventeen planets seemed to explode within his small palm.

The Evil God Soldier Mecha employed the technology of the Mechanical God, excelling in the most straightforward and brutal physical attacks, the most direct power and speed!

Chapter 1028: Source of Slaughter, the True Brutal Mecha! (Part 2)

The origin of the Mechanical God is peculiar, without any Spiritual Energy, only the purest physical technology. Its technology can truly convert the power of the Evil God Soldier Mecha into pure physical destructive power.

Although this Subspace Deep Layer fundamentally lacks normal matter and spacetime to support the so-called "physical," with Su Yu's powerful Planet-Level essence, he can carve out a piece of normal spacetime here for combat.

Crick! Crack!

With a strong squeeze from Su Yu, the red dot of the Brutal Evil God's avatar emitted unbearable cracking sounds.

At this moment, Brutality seems less like a powerful Fifth-Order Evil God and more like fragile glass, being shattered into pieces by the mechanical giant hand of Su Yu.

The originally erupting light of Brutality has now transformed into a red light screen, shifting from offense to defense.

Otherwise, it would indeed be crushed by Su Yu.

At this moment, Su Yu truly felt as if he were holding a planet in his hand. This isn't merely a feeling, but a fact.

The Brutal Evil God is undoubtedly Planet-Level and is currently grasped in Su Yu's hand.

Even a little more force from Su Yu could crush this "planet" of Brutality into fragments!

Of course, Su Yu naturally wouldn't actually squeeze the Brutal Evil God to death, only control it to prevent it from escaping.

Seeing the Brutal Evil God enter a defensive posture, Su Yu's thoughts moved, and powerful Power of Nihilism erupted in his palm, infiltrating the Brutal Evil God.

Su Yu intended to directly capture the Brutal Evil God in his hand, use the Power of Nihilism to wipe out all its consciousness, turning it into an idiot, and then extract its memory!

The Power of Nihilism is extremely peculiar, directly bypassing the defenses of the Brutal Evil God, attacking its Spirit, intent on turning all of its thoughts into nihilism, an idiot with only memory but no thought.

From the beginning, Su Yu had no intention of asking the Brutal Evil God normally; however, Su Yu's original plan wasn't this crude, at most defeating Brutality to force it to reveal secrets.

But with full power unleashed, Su Yu found himself stronger than imagined, so the plan changed to directly turning Brutality into an idiot and extracting its memory!

Previously, Su Yu obtained a Brutal Split Mind, ultimately washed into an idiot by the Power of Nihilism.

However, the Brutal Split Mind was merely a Third-Order split mind; now clutched in Su Yu's hand is a Fifth-Order Planet-Level main body. Now, Su Yu intends to brainwash this main body into an idiot too!

That's how domineering it is!

And clamped in Su Yu's hand, the Brutal Evil God seems helpless, only allowing Su Yu to act.

Even the red light is beginning to dim, turning pale.

This signifies the Brutal Evil God is already starting to be genuinely eroded by the Power of Nihilism, its thoughts beginning to suffer damage.

Unless the Brutal Evil God also possesses a Profession Panel to awaken it, otherwise, it won't take long for the Brutal Evil God to become a true idiot! An idiotic Evil God!

"Will this guy really be this easily brainwashed into an idiot by me?"

Seeing success within reach, Su Yu felt a bit unsure, feeling it was a bit too simple.

Could this Brutal Evil God, his long-standing terrifying enemy, be resolved just like this?

Just as Su Yu turned this thought, a shocking change abruptly arose!

Boundless power erupted from Su Yu's palm.

This power isn't any Spiritual Energy but pure physical Kinetic Energy!

"This is..."

Su Yu saw, to his astonishment, that the strong force forcibly opened his clenched fist, and the source of the force was two blood-red mechanical giant hands!

"Mechanical? This is..."

Su Yu was somewhat surprised as he looked at the thing emerging from his palm.

It was the Brutal Evil God, but it had completely transformed into another form, a form Su Yu had never seen before but found very familiar.

It was a Mecha! Mechanical Battle Armor!

This Mecha was originally extremely small, held in Su Yu's palm, but managed with great power to forcibly open Su Yu's palm and then rapidly enlarged.

In a short time, it transformed into a gigantic humanoid Mecha comparable in size to Su Yu's Evil God Soldier Mecha!

This Mecha was entirely dark red with pure white patterns as decoration, the body thick and heavy, clearly possessing immense power, the surface of the Mecha covered in various mechanical bone spikes, looking extremely ferocious and brutal, and two intense red spots igniting in the Mecha's head, as if igniting two Constant Stars!

"This is..."

Su Yu was a bit surprised, feeling an unfathomable power on this Mecha's body, a power even stronger than his Seventeen-fold Planet-Level power!

And the aura emanating from this power was very familiar to Su Yu, precisely the Brutal Evil God he had almost crushed into pieces in his palm earlier!

"How could this happen?"

Su Yu was somewhat unable to understand why this Brutal Evil God suddenly became so strong, and why it suddenly turned into a Mecha? When did this guy gain such an ability?

"Holographic Perception!"

Su Yu instinctively activated Holographic Perception towards this unknown Mecha, attempting to examine the details of this Mecha.

Holographic Perception, integrated with the Star Tower Terminal, possesses powerful scanning and analysis capabilities, quickly displayed a wealth of information.

[Brutal Mecha]

[Creator: Brutal Evil God]

[Grade: Sovereign Level!]

[Trait 1: True God (This Mecha is a Fifth-Order true Evil God, modeled after the Evil God Soldier Mecha, transformed from its Origin Divine Body, possessing greater strength and defense than the Evil God Soldier Mecha, and greater Planet-Level essence, extremely dangerous!)]

[Trait 2: Brutal (This Mecha is transformed from the Brutal Evil God's Origin Divine Body, possessing infinite Power of Brutality, which can greatly enhance this Mecha's strength, speed, fighting in the most savage manner. Every attack carries powerful Spiritual Erosion, plunging the enemy into brutality and frenzy, battling this Mecha. Additionally, this Mecha can draw power from anything that conforms to the "concept of brutality," becoming stronger the more it is attacked, never diminishing, and continuously growing stronger with the evolution of battle, having no limits! Can use Power of Brutality to transform enemies into Brutal Demons.)

[Trait 3: Source of Slaughter (Brutality is one of the primal emotions of life forms, the foundation of battle, the origin of slaughter. In essence, the Brutal Evil God is also the God of Battle, God of War, God of Slaughter. Completely frenzied and losing rationality, the Brutal Evil God can unleash Power of Brutality to the extreme, triggering this origin. Regardless of any formidable enemy or power encountered, the Brutal Evil God can reference the opponent's form and power to morph into new forms, awakening new powers to counter strong opponents. Growing stronger the more they fight, never stopping, until ultimate victory, conquering and slaughtering all. This Mecha is modeled after the Evil God Soldier Mecha by the Brutal Evil God, so it also inherits this essence, constantly changing form to better fight and slaughter!)

[Trait 4: Undying (Evil God Undying, True God Indestructible, this Mecha is formed by the Brutal Evil God transformation, so it shares the trait of undying and indestructibility. Even when destroyed, it will resurrect and rebirth in the Subspace Deep Layer, continuing to battle.)

...

In the Holographic Perception, a string of traits of this Mecha was displayed, but beyond the first four traits, the rest remained a series of question marks.

Clearly, even with the short amount of time, Holographic Perception couldn't fully ascertain the details of this Mecha.

But even just the first four traits were enough to astound Su Yu.

He then understood why the Brutal Evil God would suddenly undergo such a transformation, due to the third trait: Source of Slaughter!

The essence of this Evil God turned out to be the God of Battle, God of War, God of Slaughter.

The awakening of such essence in Brutality was akin to the ultimate "Savior" Song Ming from before, able to awaken powers sufficient to counter strong enemies, growing stronger with each battle.

The difference is, the power Song Ming awakened was for salvation, while the power awakened by the Brutal Evil God is for combat, for slaughter, for brutality!

And at this moment, under the pressure of Su Yu's manifested Evil God Soldier Mecha, the awakened power of the Brutal Evil God is... the Brutal Mecha!

Before, Su Yu had crafted a Brutal Battle Armor using the Brutal Split Mind, but that contraption was merely Third-Order, far from worthy of the true name "Brutal."

And now, the Brutal Evil God, utilizing its essence of being the Source of Battle, referencing the Evil God Soldier Mecha, has transformed into a Mecha, which is the true Brutal Mecha!

Chapter 1029: Battle Against the Brutal Mecha

"The Brutal Evil God completely went mad and unleashed such a transformation?"

Just as this thought crossed Su Yu's mind, a red blur flashed before his eyes.

Before he could react, a scorching red mechanical giant fist had already struck his chest.

Boom!

The Evil God Soldier Mecha, incarnated by Su Yu, erupted with a thunderous roar, its chest caving in, and involuntarily being blown away.

The formidable aftermath spread through the deep layer of Subspace, carving out a vast dark vacuum in this Mysterious Land where time doesn't exist.

In the deep layer of Subspace, time and space don't exist; to operate here, one must, with a Fifth-Order Planet-Level essence, carve out their own survival space-time.

Under normal circumstances, the carved-out space-time only covers oneself to minimize consumption.

However, under this intense attack, a large dark vacuum was carved out, as if entering the nihility of the Universe.

After throwing a punch, the Brutal Mecha did not pause, accelerating suddenly to catch up with the rapidly retreating Su Yu.

The red-hot fists of the Brutal Mecha pummeled Su Yu's body with a speed surpassing the thinking limits of ordinary beings. Each punch was pure physical kinetic energy, immensely powerful, capable of creating a massive crater on the Azure Star.

With the chaotic barrage, the entire Azure Star could be reduced to cosmic dust within a short time.

Bear in mind, this wasn't some Spiritual Light Cannon, nor any Extraordinary Ability, but pure physical kinetic energy.

The Brutal Mecha was just about a kilometer in size.

A kilometer humanoid is a kind of regulatory limitation; as long as it's humanoid, it cannot exceed a kilometer, perhaps due to the influence of the Radiant Emperor.

With this size, the fists were only a few dozen meters in diameter.

Yet these pure physical fists could wield such power.

It indicates that each strike's speed was approaching light speed, truly formidable.

Not just pounding, there was also tearing, strangling, twisting, crushing...

Each hit was an embodiment of cruelty and brutality, releasing a terrifying instinct suppressed for millennia.

With the Brutal Mecha's attack, the dark vacuum carved out in the deep layer of Subspace expanded, reaching a diameter of over a billion kilometers.

In the dark vacuum carved out by the aftermath, there was only one light source: a crimson terrifying Mechanical Giant pressing fiercely against another black human-shaped black hole, leaving the opposition with no chance to counterattack.

"Is this... the true power of the Brutal Evil God?"

Caught off guard, Su Yu was being overpowered by the Brutal Evil God! He couldn't even begin to react to the Brutal Evil God's assault.

Too fast! Too fierce!

The true divine office of the Brutal Evil God was actually the "War God", the God of Battle, the God of War.

Although, usually, the Brutal Evil God suppressed its powers.

Now, losing its reason, no longer suppressing, it immediately showcased an immensely powerful strength.

Originally, the Evil God Soldier Mecha incarnated by Su Yu excelled in physical kinetic strikes.

Thus, the Brutal Mecha, with absolute physical kinetic force, suppressed Su Yu, overpowering him unreasonably.

Clearly, Su Yu embodied five kinds of Fifth-Order powers, combining to elevate his strength to Fifth-Order top-tier, yet he still wasn't a match for the Brutal Mecha.

Su Yu hadn't expected that after losing reason, the Brutal Evil God could become this powerful.

Mere moments ago, Su Yu held this fellow in his palm, seemingly able to crush him at will, but now it was reversed, and Su Yu was being overpowered by it.

This Brutal Evil God lived up to the concept of growing stronger against stronger opponents.

Su Yu's incarnation as an Evil God Soldier Mecha possessed formidable physical attack power. The Brutal Evil God mirrored the Evil God Soldier Mecha and transformed into a Brutal Mecha, using the same absolute brutality to suppress Su Yu head-on!

Perhaps this was the true Brutal Evil God, the true God of Battle, the true God of War, the true God of Slaughter!

The insidious character Su Yu was familiar with was merely the renegade Radiant Prince who usurped the divine seat.

Now, with its reason lost, the true Evil God had finally broken its seal.

The true Brutal Evil God needed no reason!

Even under this extreme brutality and extreme violence, Su Yu's Power of Nihilism seemed a bit ineffective.

Su Yu used the Power of Pain which could counterbalance and resist the erosion of Nihilism.

Now the "Brutality" seemed also able to form a balance with the Power of Nihilism, resisting the infiltration of nihilism.

"It seems that to brainwash it with the Power of Nihilism, I must battle it, weaken it as much as possible, and then infiltrate with the Power of Nihilism."

Even though the Brutal Evil God suddenly displayed such considerable strength, Su Yu still hadn't abandoned his plan to brainwash it with the Power of Nihilism.

In the moment Su Yu pondered, he suffered an unthinkable number of brutal assaults from the Brutal Mecha.

In the Evil God Soldier Mecha that Su Yu incarnated, damage warning messages streamed in endlessly.

In a short time, the damage rate of the machine had reached over 60%, almost dismantled by the Brutal Mecha!

"Data Truth!"

Su Yu concentrated, using the ability of Data Truth to adjust his values, accelerating his mental cognition and thinking a hundredfold.

The speed of the Brutal Mecha was too fast; Su Yu needed to enhance his thinking speed to keep up with such rapidity.

Su Yu's cognitive speed had always been extremely fast, surpassing the imagination of ordinary Transcendents.

Yet in front of the Brutal Mecha, it was still slow, too slow!

Even though the Brutal Mecha was modeled after Su Yu's Evil God Soldier Mecha, its performance was somehow superior, making no sense whatsoever!

Chapter 1030: Battle Against the Brutal Mecha (Part 2)

Fortunately, as Su Yu completed the numerical adjustments, everything in front of him began to slow down.

The incredible speed of the Brutal Mecha became clearly visible to Su Yu.

This is also one of the benefits of Su Yu having multiple professions. If he only had an Evil God Soldier Mecha, it would have been shattered by the Brutal Mecha a long time ago!

Boom!

Su Yu controlled the large hand of the Evil God Soldier Mecha and swung it suddenly, finally blocking a strike from the Brutal Mecha!

Although this strike was blocked, the body of the Evil God Soldier Mecha continued to shake and even break.

Su Yu, however, shouted with satisfaction in his heart, finally able to react and block it, not just taking hits.

While blocking the attack, Su Yu threw another punch fiercely at the Brutal Mecha.

He had been suppressed earlier; now it's Su Yu's turn to fight back!

Just in time to test who is stronger, this Brutal Mecha or his Evil God Soldier Mecha!

Su Yu didn't believe this Brutal Mecha was truly invincible.

Boom!

The powerful planet-level Spiritual Energy, through the exquisite mechanical structure of the Evil God Soldier Mecha, was converted into pure kinetic energy and fiercely struck the body of the Brutal Mecha.

Crack!

The seemingly indestructible surface of the Brutal Mecha's body instantly showed dents and cracks.

The strength of Su Yu's Evil God Soldier Mecha was also extremely strong, causing significant damage to the Brutal Mecha with just one strike!

"As expected..."

Su Yu thought to himself, this Brutal Mecha is not invincible; its offense is strong, but its defense is weak!

Roar!

The Brutal Mecha, heavily damaged by Su Yu's strike, immediately emitted a terrifying roar, with its eyes seeming to explode, extremely furious, and brutal!

In this extreme fury and brutality, the power and speed of the Brutal Mecha actually increased again!

Its hands clasped together like a heavenly hammer and suddenly slammed down on Su Yu!

This strike has already reached 99.999999...% of the speed of light, infinitely close to true light speed.

At such extreme speeds, due to the effects of relativity, the mass of the Brutal Mecha's fists in this instant was already close to an ordinary planet!

Normally, a Fifth-Order Expert being comparable to a planet refers to a certain "essence" of Spiritual Energy, not that a Fifth-Order Expert is as heavy as a planet.

But now, in extreme fury, the Brutal Mecha's strike is indeed like a planet smashing down!

Moreover, it's like compressing a planet to a diameter of a few dozen meters, all the force focused on a point, then smashing down fiercely!

This punch is enough to burst a star!

It's no longer relying on multiple attacks to break a star.

Just one strike can shatter a planet! And it's a purely kinetic energy attack at that!

"Not good!"

Su Yu had just injured the Brutal Mecha with a punch and hadn't had time to rejoice when this terrifying strike crashed down on him.

Escape? No place to escape; this strike is already infinitely close to the speed of light, how to escape?

Under normal circumstances, the speed of light is the maximum speed in this universe.

Even in the Subspace Deep Layer, it's the same. At such extreme speeds, there's no escape.

Actually, Su Yu's data truth allows him to modify the speed of light to a certain extent. When Su Yu explored here earlier, he utilized this ability to rush quickly for exploration.

But clearly, the actual speed of the Brutal Mecha's strike is far greater, only constrained by the speed of light.

If Su Yu increases the speed of light, the Brutal Mecha's strike would only speed up accordingly, still unable to escape.

So... the only option is to withstand it!

The Evil God Soldier Mecha incarnated by Su Yu suddenly transformed, curling up from a human-shaped black hole into a true black hole.

This is the defensive posture of the Evil God Soldier Mecha.

The next moment, the star-bursting strike from the Brutal Mecha had already fiercely impacted the body of the Evil God Soldier Mecha.

In the dark vacuum, there's no sound, but in this instant, it seemed like the terrifying sound of a planet exploding emanated.

The black hole incarnated by the Evil God Soldier Mecha was covered with cracks, seemingly on the verge of shattering with one more strike!

Yet it ultimately did not shatter! The Brutal Mecha's strike could shatter a star, but not Su Yu!

However, after such a brutal attack, the body of the Evil God Soldier Mecha was even more severely damaged, with a damage rate of over 90%. Another strike and it would be completely destroyed.

Fortunately, after that terrifying strike, the Brutal Mecha seemed to have consumed quite a bit of energy and didn't immediately launch another attack.

"Repair!"

Su Yu immediately activated the Power of Pain to repair the body.

The Evil God Soldier Mecha, on the brink of collapse, was rapidly repaired, with the damage rate returning below 50% almost instantly.

"Ah!"

Simultaneously, Su Yu felt extreme pain, involuntarily shouting in his heart.

To repair the Evil God Soldier Mecha, Su Yu had to release the suppression of the Power of Nihilism on the Power of Pain, thus feeling such pain.

The Power of Pain is an extremely evil and cruel force; using this power, both enemy and ally must endure extreme pain.

However, this power, while seemingly harming both sides, has a hidden benefit.

That is, to prevent the object enduring the pain from dying or collapsing, the Power of Pain maintains their physical integrity and mental clarity.

The body and spirit are the carriers and sources of pain.

Only a complete body and a clear mind can generate and endure more pain.

If the body dies and the spirit collapses, where would the pain come from?

Therefore, if one can endure such extreme pain, the Power of Pain is the best energy for recovery.

As long as there's a breath left, it can save a life.

This recovery ability is also valid for Mechanical Creations! Even with a bit of the body remaining, it can be restored.

The former "King," using the Hell Furnace, summoned the Fifth-Order Radiant Mecha based on this principle.

Su Yu even suspects that if the Power of Pain becomes extremely powerful, even if one dies and completely disappears, with annihilation on the time level, where even the Power of Time can't revive them.

But using the Power of Pain, one could pull someone back from death, to continue suffering in hell.

Just like the tip from the Profession Panel, awakening the dead Su Yu.

If the Power of Pain reaches its ultimate strength, it can do the same, bringing someone back from death.

Although, the Power of Pain is not as gentle as the Profession Panel.

It's truly the literal meaning of "pain that brings the dead back to life."

If it reaches that level, it would be terrifying.

Even in death, there's no escape from hell.

However, Su Yu's Power of Pain has not reached that realm yet, but it's sufficient to recover from the injuries caused by the Brutal Mecha.

In an instant, Su Yu's Mecha was restored to peak condition, while the Brutal Mecha hadn't yet recovered from the previous strike.

"My turn!"

Su Yu shouted and also swung a fierce punch at the Brutal Mecha.

This strike, stimulated by extreme pain, unleashed power far beyond before!

The Brutal Mecha seems to use anger and brutality as its motivation to unleash incredible power.

Su Yu, however, uses pain as a stimulus to also unleash power.

Boom!

The sound of a planet exploding echoed in this dark vacuum.

This strike directly pierced the chest of the Brutal Mecha, exposing its various mechanical components.

Due to the fierce attack, some parts had vaporized, and the remaining part appeared half-melted, emitting a dark red glow.

Roar!

The Brutal Mecha saw its damage and seemed dazed, then once again let out a wild roar!

The red glow on its body intensified like an explosion, completely ignoring the body's injuries, and instantly launched another fierce attack on Su Yu.

This time, the Brutal Mecha directly wrapped its arms around the Evil God Soldier Mecha, with such tremendous force almost crushing the Evil God Soldier Mecha.

Simultaneously, the wound on the Brutal Mecha's chest opened like a gigantic mouth, seemingly trying to devour the Evil God Soldier Mecha! Using its body for healing!

"Devour me? Dream on!"

Su Yu snorted coldly in his heart and suddenly exploded with force, attempting to break free from the Brutal Mecha's grasp.

After being damaged, the Brutal Mecha's power and speed decreased, unable to prevent Su Yu from breaking free.

The next instant, the red glow on the Brutal Mecha flared fiercely once more.

Unable to prevent it, then self-destruct! Perish together!

"Truly insane..."
