

Infinite 1041

Chapter 1041: Clues to the Time-Space Origin

"Time loop?"

Su Yu was somewhat astonished upon reading this.

He hadn't expected that the traversal squad with the Galaxy Battle Armor would originate this way.

It turned out to be a product of the "time loop" from the Prince of Brutal.

The Prince of Brutal's journey to the Mirror Azure Star led to the appearance of a transmigrator, and the transmigrator's appearance prompted the Prince of Brutal to go to the Mirror Azure Star.

The terrifying aspect of a time loop lies in the circular causality.

The effect is the cause, and the cause is the effect, forming a cycle.

Once trapped, it's hard to break free, endlessly repeating this cycle.

Just like now, due to the actions of the Prince of Brutal, the "Betrayal Warband" from the mirror universe is about to come to Azure Star to investigate and quell the rebellion, then a squad from this warband will transmigrate to the real universe hundreds of years ago.

This traversal squad will attract the attention of the Prince of Brutal from hundreds of years ago.

Then the next cycle begins, with no end.

But this doesn't quite make sense.

Because, according to the time-space rules of the real universe, everything is restricted to the "now," no matter how one traverses, the "now" is always moving forward.

This traversal squad, traversing back to hundreds of years ago in the real universe, is merely returning to the "past" in history, not the "now."

And with the sudden appearance of a transmigrator in past history, there's a change in history.

As long as there's a certain level of observation capability of the timeline, one can notice anomalies and detect changes in history.

Logically, the Prince of Brutal, as a Fifth-Order Great Evil God, inherently has a certain level of observation capability of the timeline.

The Prince of Brutal from a hundred years ago and the one from the "now" a hundred years later should be the same, their consciousness connected.

Therefore, when this traversal squad appears out of thin air a hundred years ago, the Prince of Brutal should notice something amiss and not take the bait.

Yet this time loop happened this way, and when the traversal squad appeared, the Prince of Brutal didn't notice anything unusual.

It seemed that even the entire Human Empire didn't notice it.

Unless that traversal squad didn't traverse to the "past" history but truly went back to the "now" hundreds of years ago.

To achieve this, Su Yu also knows how it could be done.

Just like Song Ming's previous time retrospection: by reverting the "now" time node, a true time loop can be realized.

Time retrospection is a real rewind of time, not changing past history, but directly altering the "now."

However, Song Ming's time retrospection was limited to a single planet, and as long as one possessed a certain level of Power of Time or the essence of the Fifth-Order, they could retain their memory during time retrospection and notice anomalies.

But the time loop experienced by the Prince of Brutal seems to rewind the time node of the entire universe by hundreds of years in each cycle!

Moreover, even Fifth-Order powerhouses can't retain their memory under such retrospection and can only go through the cycle ignorantly time and again.

This is simply unbelievable!

"Reverting the entire universe's time seems unlikely."

"So, is it the special nature of this 'foreign object' in the Azure Star System?"

Su Yu pondered, continuing to read the memory information of the Brutal Evil God, hoping to find the truth from it.

...

And when the Prince of Brutal first discovered the time loop, he was extremely shocked and frightened.

He was inherently very timid and afraid of death. Discovering that he unknowingly fell into a time loop would certainly terrify him.

He didn't know when he got trapped into the loop or how many times the loop had occurred?

If he couldn't detect it in one cycle, he wouldn't be able to detect it in the next either.

Perhaps, unconsciously, this loop had occurred thousands upon thousands of times.

Moreover, he even thought further: he created the Brutal Star here, trying to "bait" the Mirror Image Brutal Prince over.

But now, it seems that the one being "baited" was the Prince of Brutal himself!

He was "baited" by the traversal squad, becoming part of the time loop.

So, the question arises, who "baited" him?

The Prince of Brutal immediately thought of one possibility: the Mirror Image Brutal Prince!

The only one who knows him so intimately and could bait him over is another version of himself!

Zhang Chenfeng from the mirror universe is very rigid, but the Mirror Image Brutal Prince from the mirror universe may not be so.

Perhaps due to some reason, this Mirror Image Brutal Prince gained some "reality," no longer false and rigid.

Then this Mirror Image Brutal Prince also wishes to "defect."

However, the Mirror Image Brutal Prince seeks to defect not from that false Human Empire, but from the entire mirror universe.

He wishes to defect to the true universe and obtain reality!

All of this was speculated by the Prince of Brutal.

But based on his understanding of himself, this is almost certainly the truth.

And that Mirror Image Brutal Prince, in order to gain reality, targeted the real universe's true Prince of Brutal.

Hence, the appearance of the transmigrator...

It is evident that the Mirror Image Brutal Prince intends to use the traversal squad to bait the true Prince of Brutal over, to erode, devour, and replace him.

Now, he has almost succeeded and has successfully lured the true Prince of Brutal into this Mirror Azure Star, into the time loop.

Once in the time loop, there's no escape, only endless iteration.

Thinking of this, the Prince of Brutal even felt a bit helplessly amused.

He wants to defect from reality, but the other version of himself in the mirror universe is doing the exact opposite.

Chapter 1042: Clues to the Time-Space Origin (2)

No wonder they are the same person, their thinking is identical.

The Prince of Brutal quickly calmed down. Though afraid of death, he was far from incompetent. Facing an unknown and formidable enemy, and another version of himself, he quickly triggered his innate survival instinct and began devising a strategy.

First and foremost, he naturally wanted to escape the Mirror Universe and return to reality.

If the Mirror Image Brutal Prince couldn't find him, did that mean this loop had failed?

However, when he attempted to take action, he found that he couldn't leave at all! He couldn't return to reality!

It seemed that his previous easy arrival in this Mirror Universe was with the "assistance" of that Mirror Image Brutal Prince.

And now, that Mirror Image Brutal Prince certainly wouldn't let the original body escape so easily.

The Prince of Brutal even discovered that he couldn't leave the Mirror Azure Star. The cosmic sky outside the Mirror Azure Star was entirely fake, and with his "real" essence, he couldn't leave at all.

Now, the Prince of Brutal could only wait on this Mirror Azure Star for the arrival of the Mirror Image Prince.

Feeling helpless, the Prince of Brutal could only comfort himself: "Escaping is meaningless. If the mirror version of me fails to find me, it will probably trigger the next loop, and I will ultimately have to face it."

Then he delved deeper into thought:

"Since I haven't been devoured, and the loop hasn't ended, does this mean this might be the first loop?"

"No, I can't be too optimistic!"

"Judging by my inexplicable familiarity with the Mirror Universe earlier, this definitely isn't the first time!"

"Then, possibly in previous loops... the other version of me didn't succeed?"

"It makes sense, he's a fake mirror image and faces a natural disadvantage against me."

"Perhaps in every loop, he fails to defeat me, so he starts a new loop, using each loop to accumulate experience!"

"Given this, I still have a chance!"

Thinking of this, hope surged in the Prince of Brutal's heart.

According to his speculation, the loop had occurred multiple times, and the Mirror Image Brutal Prince had failed each time, necessitating a new loop.

Considering this, apart from not being able to control the loop, the original Prince of Brutal held the advantage.

In the forthcoming confrontation, when the mirror prince arrives, as long as the original Prince of Brutal seizes the opportunity to devour the mirror prince, he can turn the tables and perhaps gain control over the loop, thus achieving his initial plan of defecting successfully and attaining true freedom!

After that, the Prince of Brutal bided his time, gathering strength while waiting for the mirror prince's arrival.

Finally, the Prince of Brutal sensed powerful spatial fluctuations outside Azure Star, caused by the emergence of a Superluminal Starship from Subspace.

"It's here!"

The Prince of Brutal was ready for battle.

In the next instant, everything went black before his eyes.

The entire Mirror Azure Star vanished, and even the entire Mirror Universe turned into complete darkness.

"What happened?"

The Prince of Brutal floated quietly in the dark vacuum of the Mirror Universe, completely at a loss.

After exploring this dark vacuum for a long time, the Prince of Brutal finally found a way to leave and returned to the Real Universe.

Soon after returning, a Subspace tide erupted, throwing the entire Human Empire into chaos, leaving no time to deal with the Prince of Brutal's defection.

After leaving the Mirror Universe, the Prince of Brutal was no longer a prince, but assumed the identity of the God of Brutal, known to Su Yu as the current Brutal Evil God.

And then, it was the history Su Yu was familiar with.

The Subspace tide erupted, Zhang Chenfeng established the Second Empire, the Brutal Evil God's erosion, the great rebellion, finally Zhang Chenfeng died, and the Brutal Evil God was sealed...

The Time Loop, and another Mirror Image Brutal Prince, seemed to end abruptly and never appeared again.

It seemed that all the Brutal Evil God's previous worries were completely unfounded.

Reading up to this point, Su Yu was a bit speechless.

Earlier, Su Yu had been eagerly anticipating a battle between the Prince of Brutal and the mirror prince, but nothing happened, and it just ended like this?

What was going on?

Moreover, what about the secret of this "foreign" star system, Azure Star? What was special about it?

Su Yu could only continue reading patiently, hoping to find an explanation later.

In fact, after leaving the Mirror Universe, the Brutal Evil God continued to ponder this question.

He constantly thought about that moment of darkness, what exactly had happened?

The Brutal Evil God contemplated it for a long time, even during the millennia of being sealed by Zhang Chenfeng.

Finally, the Brutal Evil God realized a terrifying fact.

In fact, he had long thought of it, but was always reluctant to admit it.

That is... was the current Brutal Evil God the original body, or the mirror image?

According to the Brutal Evil God's speculation, in that moment of darkness, perhaps thousands of time loops and battles had occurred.

Ultimately, a winner was decided.

As for who the victor was? Unknown!

The Brutal Evil God himself didn't know who he really was!

In fact, the Brutal Evil God leaned towards being the fake mirror image!

And why? Because of the Brutal Evil God's unmatched, inexplicable fear of death.

This fear was utterly unreasonable.

The Prince of Brutal had been meticulously groomed and should not harbor such fear, should not fear death, but instead regard it as glory.

That fear might have belonged to the Mirror Image Brutal Prince!

The Mirror Image Brutal Prince was intrinsically false.

And when the mirror prince, for some reason, discovered his own essence, fear arose.

Fear of his false essence, fear that he could disappear at any moment.

Because of his false essence, he became obsessed with "living," above all else.

Thus, the Mirror Image Brutal Prince began plotting to seize everything from the original body and replace him.

In the end, he succeeded in taking everything from the original Prince of Brutal!

Hence, the Brutal Evil God possessed that unparalleled fear of death.

Thus, the Brutal Evil God had long been replaced!

It's just that, even though he succeeded, the loop seemed never to have ended.

The successful Mirror Image Brutal Evil God was still trapped in the Time Loop, unable to escape.

Thus, during the last loop, the formidable enemy the Brutal Evil God awaited had never existed.

The real purpose of that loop was to destroy the entire Mirror Universe, to break the loop and end everything.

In the end, it was successful.

This gave rise to the current Brutal Evil God.

However, for unknown reasons, before succeeding, the Mirror Image Brutal Evil God altered his memory, leaving him unsure of his own identity.

Possibly, only by abandoning all "falsehoods" could one obtain true reality.

After understanding all this, the Brutal Evil God no longer dwelled on who he truly was but looked forward to everything.

Having already attained reality and freedom, he decided to enjoy it all.

His next goal was to break Zhang Chenfeng's seal, venture into the depths of the universe, and use the infinite beings there to quickly increase his power, becoming the true God of Brutal!

...

"This guy's story is quite inspirational..."

After reading the Brutal Evil God's experience, Su Yu came to this conclusion.

If one overlooks the evil nature of the Brutal Evil God, indeed, the experience is quite "inspirational."

From a hellish beginning, seemingly destined for death, he ultimately turned the tables through scheming.

If he truly was that mirror image, then it would be even more inspirational.

However, regardless of how inspirational, this guy has now been thoroughly subdued by Su Yu, "enjoying" endless hellish torment.

Slightly sighing at the Brutal Evil God's inspirational story, Su Yu quickly put it behind him.

What he was truly interested in was the last part of the Brutal Evil God's conjecture.

After comprehending his origins, the Brutal Evil God continued deeper into thought and speculation about himself.

That part of the conjecture contained the true secret of the Azure Star and the true source of the Brutal Evil God's fear.

Even, the clue that Su Yu had always been missing...

Information about the Time-Space Origin!

The critical part of the [Time-Space Mechanic] ritual, the clue to "Time-Space Origin," was hidden in the Brutal Evil God's "inspirational" story!

Chapter 1043: Searching for the Time-Space Origin

The final part of the information provided by the Brutal Evil God included some of His research findings and conjectures.

The Brutal Evil God speculated that He was most likely not the original Prince of Brutal, but the mirrored prince from the Mirror Universe.

The original Prince of Brutal had already been devoured and replaced.

And the transcendent fear of death possessed by the Brutal Evil God was something brought from that Mirror Universe.

According to the Brutal Evil God's speculation, the Azure Star System originated from a universe that had already been destroyed, a dead universe.

The reason why that universe was destroyed is unknown.

The remaining remnants of that universe drifted into the present universe, forming the Azure Star System.

This star system appears ordinary, but it is actually the "corpse" of a universe.

What could possibly exist within the "corpse" of a universe?

A creature facing death would develop a will to survive.

Civilization facing destruction would create a "Savior."

So, what changes would occur when a universe faces destruction?

The Brutal Evil God did not know what changes occurred before destruction; He only knew that after a universe is destroyed and dead, it leaves behind that transcendent fear of death!

Because the Brutal Evil God emerged from that Mirror Universe, He was also tainted by that fear.

This is the origin of the Brutal Evil God's fear.

Even though He is a powerful Fifth-Order Evil God, He is still too insignificant in the face of the entire universe's fear, thereby being completely uncontrollable, preferring to actively submit to the Hell of Suffering for torment rather than face death.

Though it is His conjecture, it is also the conclusion of His over ten thousand years of research combined with personal experiences, hence it represents the basic facts.

Additionally, the Brutal Evil God conducted research on that Mirror Universe.

According to His research, that Mirror Universe should be an attempt of the already destroyed universe at "resurrection."

The already destroyed universe seemed to want to "resurrect and rebirth" by creating a Mirror Universe to replace the current Real Universe.

Though that universe might not have self-awareness.

Even if it did, it is already dead now. However, the "corpse" of that universe still contains that extreme fear of death and the instinct to survive beyond all else.

Driven by this instinct, a "resurrection plan" was naturally formulated.

Perhaps describing it as a "plan" is not accurate; this act of resurrection can only be considered a form of "natural phenomenon."

Just like volcanic eruptions, tectonic movements, and the rotation of planets, none of these have any "plan," but are merely natural phenomena produced by pure rule operations.

The Mirror Universe near the Azure Star System was also a "natural phenomenon" driven by the survival will left behind after the universe's death.

If this natural phenomenon develops to the extreme, that Mirror Universe could replace everything in the Real Universe, thereby achieving rebirth.

In fact, a part of this "plan" has already succeeded, that is, the Brutal Evil God.

He successfully replaced the Prince of Brutal in the Real Universe, transforming from falsehood to reality.

However, due to some unforeseen accident, only this instance succeeded, and then that Mirror Universe was also destroyed.

That Mirror Universe was the Dark Space-Time that Su Yu had previously visited.

It has now plunged into complete darkness, devoid of any galaxies.

Therefore, the "Universe Resurrection Plan" only completed its first step and could no longer progress.

However, the Brutal Evil God believes that the "Universe Resurrection Plan" will eventually be restarted.

How could a universe's resurrection plan come to such an abrupt end?

According to the Brutal Evil God's research, the Azure Star System should harbor the most fundamental remnants of the universe's destruction: the Time-Space Origin!

As long as the Time-Space Origin exists, the "resurrection plan" can be restarted at any time!

The Time-Space Origin is a theoretical hypothesis proposed ten thousand years ago during the Human Empire's research on the origin of the universe.

Back when the Brutal Evil God was still a prince, He had the privilege to access some highly confidential research papers and thus knew the theoretical knowledge of the Time-Space Origin.

According to Su Yu's understanding of the Big Bang theory, the universe initially was a point with infinitely small volume, infinitely large density, infinitely high temperature, and infinitely large space-time curvature, known as the "singularity."

This singularity underwent a big bang, thus forming the vast, boundless universe.

However, this singularity was not the Time-Space Origin.

According to the Imperial's cosmological theory, it was the Time-Space Origin that nurtured the singularity, which then led to the Big Bang!

The Time-Space Origin can nurture one singularity, and theoretically, it could nurture a second one.

It might even nurture something else.

After all, universes are not necessarily all birthed from singularity explosions; there might be other forms of origins.

For example, the Mirror Universe near the Azure Star System should have been nurtured by the Time-Space Origin as well.

"I see, the Time-Space Origin, Creation Machine..."

Su Yu felt excited upon seeing this.

What he had to do next was find the Time-Space Origin, then use its traits to create the Creation Machine, recreate the Big Bang, or other forms of universes.

Thus he could create another time-space, another universe of his own, thereby completing the vocation of the [Time-Space Mechanic], possessing power beyond the Fifth-Order!

However, the information provided by the Brutal Evil God did not include the specific location of the Time-Space Origin.

Chapter 1044: Seeking the Time-Space Origin (2)

According to the information given by the Brutal Evil God, even He doesn't know where the Time-Space Origin is hidden, nor does He know what it looks like.

All these years, He has also been searching for it, but hasn't found it.

Su Yu suspects that the Brutal Evil God is withholding some information, perhaps He knows more about the Time-Space Origin but is deliberately keeping it secret.

The Brutal Evil God only mentioned that the Time-Space Origin can nurture singularities, but how exactly does it nurture them? What is the principle behind it? He didn't even say what the Time-Space Origin looks like or what form it takes.

The researchers of the Human Empire, back then, casually proposed the theory of the Time-Space Origin, surely there must have been a vast amount of data, conjectures, and calculations, not just a mere name suggestion.

Therefore, Su Yu feels it's likely that the Brutal Evil God is hiding something, that guy is still not being honest.

In fact, now that Su Yu has already suppressed the Brutal Evil God, he could forcibly search His memory.

However, Su Yu didn't do that, because searching through memories could endanger the Brutal Evil God's self-awareness, triggering His survival instinct.

The Brutal Evil God retains the fear left over from the death of a universe, and if completely triggered, what might happen is unpredictable for Su Yu, so he decided not to disturb Him.

However, Su Yu is quite tempted to try; if he actually forces the Brutal Evil God into a situation of certain death, what will happen?

But Su Yu merely thinks about it; he wouldn't really court death.

Although he's not as afraid of death as the Brutal Evil God, it doesn't mean he enjoys courting death.

After all, doing it too much, you might really end up dead.

However, Su Yu is pondering whether, upon encountering an unbeatable formidable enemy in the future, he could just throw the Brutal Evil God out, using His will to survive to see if it can fend off the strong enemy?

Although this seems a bit underhanded, with a guy like the Brutal Evil God, there's no need to be courteous.

As for the Time-Space Origin...

"Forget it, I'll find it myself."

Su Yu said to himself.

Actually, according to Su Yu's thinking, unless something unexpected happens, the Time-Space Origin should be in Qi Chen's possession.

This guy is mysterious and, even after death, can still cause trouble, likely because he controls the Time-Space Origin, which is a marvelous object capable of nurturing the universe.

Thus, to find the Time-Space Origin, it needs to be snatched from Qi Chen's hands.

However, past experiences tell Su Yu he can't beat Qi Chen, this guy is too strong, able to instantly kill Su Yu.

"Maybe not necessarily..."

Su Yu had a thought, suddenly considering a possibility.

Qi Chen's power is [Death].

While the Brutal Evil God possesses the strongest survival will, rejecting all death.

What will happen when these two powers collide? Which is slightly stronger?

Su Yu was just pondering how to throw the Brutal Evil God out against a strong enemy, now he immediately thought of a specific target.

The Brutal Evil God wants to "retire" in the Hell of Suffering, apparently not for long...

"There is only one Brutal Evil God, and I have too little understanding of Qi Chen, so for the time being, it's better to investigate information first, to avoid wasting this ultimate weapon."

"As for the Time-Space Origin, maybe try using the paradox first..."

Su Yu decided to keep the Brute for the last use, for now, try the familiar Power of Paradox first.

The Power of Paradox can accomplish the impossible, manifesting much like a Wish Machine, capable of creation from nothing.

Su Yu currently has two paradoxes in hand.

These two paradoxes were formed by two "impossible" events.

One event, Su Yu used the special feature of the Profession Panel to truly achieve the "Evil God Undying," resurrecting in the Subspace Deep Layer while retaining his consciousness.

The second event involved Su Yu using the special feature of the Profession Panel to survive in [Nihility], successfully becoming a Nihility Walker.

If a paradox can be used to snatch the Time-Space Origin from Qi Chen's hands, that would be excellent.

Previously, Su Yu never attempted to use a paradox to obtain the Time-Space Origin because, at that time, Su Yu didn't even know what the Time-Space Origin was, and asking the Profession Panel didn't yield an answer.

Without a clear target, even a "wish" might consume a paradox, resulting in a paper note inscribed with "Time-Space Origin," which would be a terrible loss.

Naturally, in theory, Su Yu could first consume a paradox to gain knowledge regarding the Time-Space Origin.

But again, the issue is that Su Yu didn't know what the Time-Space Origin was back then.

Even if the paradox is used to gain knowledge of the Time-Space Origin, it might merely provide the writing of the term "Time-Space Origin," which would be even more of a loss...

Thus, Su Yu waited until now.

Now that he knows about the Time-Space Origin, there's a clear target for his "wish," so he can give it a try.

At worst, if the paradox is not strong enough and it fails, there's no real loss.

So Su Yu immediately took out a paradox and used his spirit to activate them.

The paradox began to vibrate under Su Yu's activation, and after a moment, it disappeared.

It was consumed.

Then Su Yu looked around puzzled, wondering what was happening?

Logically, using a paradox should either succeed or fail.

If it succeeds, the paradox disappears, yielding the desired outcome, like when Su Yu previously used a paradox to seize the godhood of the Pain Evil God and a Fragment of Nihilicity.

If it fails, nothing happens, and the paradox won't disappear, like when Su Yu used a paradox to wish for the profession of Time-Space Mechanic, and nothing happened.

But now, the paradox disappeared, so it logically should have succeeded, but where's the Time-Space Origin?

Unconvinced, Su Yu searched his surroundings very carefully, scanning with the Star Tower signal.

He finally confirmed, there's no Time-Space Origin!

This is quite the trap.

Could the Time-Space Origin be so domineering that even wishing failure would consume the paradox?

"Could it be... indeed it succeeded? I have acquired the Time-Space Origin, but I can't see it?"

Su Yu's mind flickered, calculating and eliminating countless possibilities, ultimately deducing a possibility.

If he's guessed correctly, he has already obtained the Time-Space Origin.

Still, where is it then?

"Time-Space Origin, as the name suggests, should be a 'point,' an infinitely small point..."

"Which means, even if the Time-Space Origin was right in front of me, I wouldn't be able to spot it..."

Su Yu thought of this, instantly speechless.

Su Yu's essence of spiritual energy is already comparable to a planet; this is a macroscopic force.

Microscopically, his spiritual power rivals the most advanced microscope, capable of observing atomic internal structures and various micro-particles at an extreme level.

He can alter atomic structures at will, achieving something like turning stone to gold.

This power is already incredibly unbelievable.

However, if the Time-Space Origin is smaller than micro-particles and has no "volume,"

Then, how can it be discovered?

The answer is, there is currently no way; even micro-particles are too large compared to a true "point."

Su Yu can see micro-particles, but he can't see "points."

Even the Star Tower scan can't locate it!

Indeed, the Time-Space Origin is worthy of being a wondrous object capable of nurturing the universe. Even with Su Yu's power, he can't see it, and a "paradox" was wasted in vain.

"Too hasty... maybe I should have used a paradox to first gain accurate knowledge about the Time-Space Origin."

Su Yu felt slightly regretful.

He was meticulous before, believing that using a paradox to acquire the Time-Space Origin had only two possible outcomes: success or failure.

Unexpectedly, although it succeeded, he couldn't see the result of the success.

It's like succeeding, but also failing.

Now, Su Yu has one "paradox" left, theoretically allowing him to use it to acquire complete knowledge of the Time-Space Origin.

This might allow him to identify the "Time-Space Origin" around him.

However, if this paradox is used, Su Yu will be left with none.

If Qi Chen also uses a paradox to launch an attack against Su Yu, Su Yu would have no means of defense.

This could be quite dangerous.

So Su Yu must think carefully...

Chapter 1045: Qi Chen Returns, An Invitation to Cooperate?!

Su Yu thought while moving.

He just used a paradox to "obtain" the Time-Space Origin. Although Su Yu couldn't see or touch it, Qi Chen might be able to.

Maybe Qi Chen will soon realize that the Time-Space Origin is missing and then track him down.

So Su Yu needs to leave immediately.

"Wait a moment."

However, Su Yu hadn't gone far when suddenly a voice came.

Su Yu's heart raced, and he quickly looked in the direction of the voice.

It's Qi Chen!

This guy had somehow already reached nearby.

"When did he come? Or... has he always been here?"

"The Brutal Evil God emerged from the Mirror Universe, Qi Chen should be related to the Time-Space Origin, so is he able to track the Brutal Evil God?"

Su Yu's mind spun rapidly, immediately thinking of a possibility.

Qi Chen has always been secretly watching him!

"But why doesn't Qi Chen make a move?"

"Is it because of the Brutal Evil God's survival instinct? That survival instinct conflicts with Qi Chen's power, so he's hesitant to act?"

In the next instant, Su Yu thought of more possibilities.

So, with a mind shift, Su Yu had already focused his spirit on the Brutal Evil God in the Hell of Suffering.

Decided that if anything went wrong, he would throw out the Brutal Evil God to see if the survival instinct of the Brutal Evil God is stronger than Qi Chen's "Death."

"Don't be impulsive!"

Qi Chen seemed to understand Su Yu's thoughts and quickly said.

Clearly, Su Yu's idea was correct. The Brutal Evil God was indeed useful to him.

But just how useful, that was uncertain.

"What are you trying to do?"

Su Yu asked coldly.

Qi Chen smiled: "Don't misunderstand, I have no ill intentions towards you."

"After all, we come from the same source."

Su Yu frowned: "What do you mean?"

Qi Chen said: "You should have already learned from Brutality about the uniqueness of the Azure Star System. This Star System originates from a Universe that has already been destroyed. Let's call it the Azure Universe."

Su Yu nodded, indicating for Qi Chen to continue.

Qi Chen continued: "This Azure Universe, though destroyed, left behind many inheritances."

"I possess the Azure Universe's 'Death,' while Brutality possesses the Azure Universe's 'Fear,' or its survival instinct."

"And you, Su Yu, you should be the 'Ultimate Savior' birthed by the Azure Universe under the impetus of its survival instinct! A Cosmic Savior, just like Song Ming."

"However, Song Ming is merely an experiment, a semi-finished product. You are the true finished one!"

"Think about it, a vast Universe, how many lives, how many civilizations will emerge within it? How many mighty Saviors will arise when these civilizations face cosmic destruction?"

"Even the Universe itself will spawn its own Savior Origin."

"These Saviors' origins, after the Azure Universe's destruction, merged into one, becoming you! Su Yu!"

"You are the Ultimate Savior born after the Azure Universe's death, destined to save and revive the entire Universe!"

"So, we are all from the same source."

Qi Chen's words truly surprised Su Yu.

When did Su Yu become the so-called Ultimate Savior? He himself was unaware!

However, Su Yu's eyes flickered, and he didn't refute, even nodding, indicating for Qi Chen to continue.

Meanwhile, Su Yu thought to himself, why does Qi Chen believe he is the Ultimate Savior?

"Because... the Profession Panel?"

Su Yu's mind moved, thinking of a reasonable explanation.

Song Ming, the man-made "Ultimate Savior," could awaken different Powers of World Salvation in various situations.

And Su Yu has a Profession Panel, capable of unlocking various professions, seemingly resembling Song Ming.

It's probably due to this misunderstanding that Qi Chen assumed Su Yu was the true Savior.

"But maybe not, perhaps the Profession Panel is indeed the product formed by the fusion of Savior Origins from numerous civilizations after the Azure Universe's destruction."

"In that sense, it seems correct..."

"Could this be the true origin of the Profession Panel? Yet, Qi Chen's words should not be fully believed, still approached with skepticism."

After pondering slightly, Su Yu indeed found himself somewhat believing he is the Ultimate Savior, somewhat convinced this is the origin of the Profession Panel.

However, Su Yu didn't completely believe it.

Seeing Su Yu nod, Qi Chen continued: "Brutality possesses 'Fear,' always having intense conflict with me, I couldn't deal with it, so I could only trap it in this Star System."

"Now, Brutality has been subdued and suppressed by you, which is a perfect outcome. 'Fear' and 'Savior' just complement each other, mutually stimulating, surely able to revive that Universe."

Qi Chen spoke while looking at Su Yu as if he saw a piece of rare treasure.

Su Yu was quite unhappy with Qi Chen's gaze: "So what? What do you want to do?"

Qi Chen withdrew his gaze: "I've said before, I just want revival."

"Now I've merged with the Azure Universe's 'Death,' when the Azure Universe revives, I will similarly be revived."

"So, let's cooperate. I want to ask for your help."

Su Yu sneered: "You wanted to kill me earlier, and now you want me to help you, why? What's in it for me to help you?"

Qi Chen chuckled lightly: "Anyway, you didn't die, before it was just a minor friction."

"Helping me actually aligns with your interest. As a cosmic savior, if you can complete the salvation of the Azure Universe, you will receive immense benefits! Instant breakthrough to Sixth-Order, even Seventh-Order, is not impossible!"

Chapter 1046: Qi Chen Returns, An Invitation to Cooperate?!_2

Su Yu heard this, and after a moment of silence, felt that Qi Chen was probably right.

As the Cosmic Saviour, who would do it without any benefit?

If the resurrection of that universe could be completed, it would definitely bring immense benefits, provided Su Yu was truly the Ultimate Saviour.

Moreover, after the complete resurrection of the universe, although Su Yu might gain benefits, Qi Chen would undoubtedly gain even more!

He mentioned that he had already merged with the entire universe's [Death], but is now in a death state, heavily restricted.

Su Yu had already experienced the power of [Death], which was no less than [Destruction].

If Qi Chen could truly resurrect and freely control this cosmic-level Power of Death, it would be terrifying to the extreme.

He might truly become a cosmic-level [Evil God of Death], perhaps even stronger than the Radiant Emperor.

Also, if the Azure Universe is resurrected, what about this current universe?

As far as Su Yu knew, the last resurrection plan of the Azure Universe was to use the Mirror Universe to replace this Real Universe. If successful, the entire Real Universe would be replaced, equivalent to destruction.

Thus, the destruction of one universe is exchanged for the resurrection of another.

Su Yu could never accept such a thing.

Moreover, he didn't consider himself capable enough to destroy the Real Universe. Wouldn't the Real Universe retaliate?

The previous Mirror Universe might have been destroyed by a counterattack from the Real Universe.

In any case, Su Yu completely rejected Qi Chen's so-called cooperation.

However, if he didn't accept cooperation, a battle might be inevitable. Su Yu was still unsure of Qi Chen's strength and feared direct combat might not end well.

So Su Yu planned to play along for now, trying to extract some intelligence and benefits first, like getting the secret of the Time-Space Origin.

Su Yu made a mental plan and started pondering his dialogue and how to trick Qi Chen.

However, before Su Yu could think it through, Qi Chen spoke again: "I can feel your Savior Origin driving you."

"Before, you tried using the Savior Origin to summon the Time-Space Origin, didn't you?"

"Your instincts are telling you to resurrect the Azure Universe; this is your destiny."

It seemed Qi Chen had indeed noticed Su Yu's use of the Power of Paradox to seize the Time-Space Origin.

The reason for the effortless success was probably because Qi Chen had been watching the whole time without intervening.

However, Qi Chen misunderstood, thinking Su Yu had summoned the Time-Space Origin using Savior instincts, when in fact Su Yu used the Power of Paradox.

Upon hearing "Time-space Origin," Su Yu's heart stirred, and he calmly replied, "So what if I did?"

Qi Chen said, "The Time-Space Origin is a miraculous object that nurtures the universe and is key to its resurrection. By summoning the Time-Space Origin from nothing, it proves your Savior instincts are at work!"

Su Yu shook his head: "What if I used the Power of Paradox to summon the Time-Space Origin, rather than the so-called Savior Origin?"

Qi Chen laughed: "Impossible! It must be the Savior Origin. Otherwise, with your mastery of the Power of Paradox, you couldn't possibly touch a miraculous object like the Time-Space Origin without the sufficient level."

Su Yu was silent.

Qi Chen's words indeed left Su Yu at a loss.

Right, such a miraculous object as the Time-Space Origin, its level far exceeded imagination.

How could the Power of Paradox Su Yu mastered possibly touch the Time-Space Origin?

Yet, Su Yu succeeded.

"Could it be that I am indeed the so-called Ultimate Saviour? No way, right?"

"Or perhaps the level of my Power of Paradox is so high as to touch the Time-Space Origin? I obtained it by realizing Evil God Undying through the Profession Panel; could this be the reason?"

Su Yu couldn't help but doubt himself again.

But in the end, it was just doubt. He would never fully believe that he was the so-called Ultimate Saviour.

He didn't want inexplicably to bear a destiny of saving the universe.

Seeing Su Yu's silence, Qi Chen said, "So? What do you plan to do with the Time-Space Origin on you? If you need help, you can tell me, and I will assist you fully."

This former great enemy who nearly killed Su Yu now claimed to fully assist Su Yu, with a sincere expression, because assisting Su Yu was essentially helping himself.

Upon hearing this, Su Yu felt a bit strange: "The Time-Space Origin is on me?"

After using the Paradox, it disappeared, and the Time-Space Origin couldn't be found. Su Yu then left the area, traveling far, always thinking the Time-Space Origin was lost and the Paradox consumed.

Now it seemed the Paradox had summoned the Time-Space Origin to Su Yu's body or inside him, following him all along?

This Power of Paradox was indeed reliable.

After pondering for a moment, Su Yu said to Qi Chen, "I need all the information on the Time-Space Origin."

With Qi Chen promising full assistance, Su Yu wouldn't be polite and immediately made his demand.

Qi Chen nodded: "That's reasonable. To resurrect the Azure Universe, mastering the information on the Time-Space Origin is necessary."

Saying this, Qi Chen transmitted a piece of information to Su Yu.

Su Yu carefully received it, finding indeed the intelligence he wanted.

First, he used the Power of Nihilism, the Power of Pain, and other forces to conduct an "antivirus" on this information before starting to read it.

Moments later, Su Yu had grasped the intelligence on the Time-Space Origin.

"I see..."

Su Yu finally understood what the Time-Space Origin was.

Time and space are fundamentally a single entity; they are the origin of all things and the carrier of all materials and spirits.

The river of time extends infinitely, and the void ocean expands infinitely, seemingly endless.

But in reality, both the river of time and the void ocean have an end.

This end only appears when the universe is destroyed.

At the end of the universe, the river of time ceases to flow forward but instead loops "back," eventually connecting with the beginning of time, forming a circle.

The end of time becomes the beginning, and the next moment of the universe's destruction becomes the universe's beginning, repeating instantly countless times.

This circle infinitely loops, ultimately collapsing into a "point" with neither beginning nor end.

Similarly, the space ocean collapses when the universe is destroyed, with infinite space curvature, moving forward yet ending up behind itself.

Eventually, the entire space ocean also becomes a "point" without front or back.

As time and space are one, these two points are essentially one, known as the "Time-Space Origin."

Such a mysterious point contains all the time-space information of a universe and can therefore nurture a "singularity," recreating the Big Bang, and reforming the universe!

"This thing is almost otherworldly..."

After hearing all this, Su Yu was speechless.

If Qi Chen wasn't deceiving Su Yu, then this Time-Space Origin was incredibly otherworldly, essentially containing a grand universe, only in a collapsed state after death.

Is this something Su Yu could truly control?

Originally, Su Yu didn't have a clear concept of the Time-Space Origin's ability to nurture a universe.

But after Qi Chen's explanation, he understood that the Time-Space Origin was essentially a condensed universe after destruction, essentially a whole universe, making sense why it could nurture a new universe!

This was definitely beyond Su Yu's capability. Though he was strong enough to destroy a planet now.

But a planet, in the face of the entire universe, is like a speck of dust, incomparable.

"Wait a minute, if I can't control this thing, can Qi Chen?"

Su Yu's inspiration struck, suddenly looking up at Qi Chen: "And what else?"

Qi Chen, hearing this, nodded in satisfaction: "As expected of the Ultimate Saviour, truly perceptive."

Then he transmitted more information.

After receiving this information, Su Yu nodded: "I see, when the Azure Universe was destroyed, an accident happened, and the Time-Space Origin lost a lot of mass and information..."

Chapter 1047: Mecha

Normally, the Time-Space Origin contains all the time-space information and mass of a universe.

With this time-space information and mass, a new singularity can be nurtured, recreating the Big Bang and forging a new universe.

It's like the corpse of the previous universe turning into "nourishment" to nurture the "embryo" of the next universe.

However, something unexpected happened when the Azure Universe was destroyed. The time-space information and mass in the Time-Space Origin lost 99.9999999...%, leaving only a tiny bit behind.

How much is left exactly, Qi Chen didn't say.

But Su Yu estimated, could it be that only the Azure Star System is left?

That almost amounts to nothing.

The entire Azure Star System includes a constant star, several planets, and its gravitational scope has a diameter of about one light-year.

From the perspective of ordinary life, this star system is vast beyond measure.

But compared to the entire universe, this mass and time-space scale is practically nothing, just a speck of dust.

A random galaxy holds hundreds of billions of constant stars, and who knows how many such galaxies exist in the universe.

If a universe only retains one constant star, it's essentially like a person dying and their corpse being completely annihilated, not even a cell left, and only one atom remains, or perhaps even less, not even one atom...

But precisely because of this, the power level of this Time-Space Origin has decreased significantly.

It has dropped to a level where Transcendents like Qi Chen and Su Yu can control it.

In the information provided this time, there is even a method to "measure" the Time-Space Origin. If true, it could allow Su Yu to escape the awkward state of being unable to "see or touch" the Time-Space Origin.

However, Su Yu has not yet tried this measurement method and needs to find an opportunity to do so.

"With only this little time-space information and mass, the Time-Space Origin cannot nurture a new universe, can it?"

After acquiring the new intelligence, Su Yu questioned.

Qi Chen shook his head: "There is no need to nurture a new universe; the Azure Universe merely wants to resurrect. Su Yu, you have just achieved true Evil God Undying and should understand the difference."

Upon hearing this, Su Yu fell into thought.

The trait of Evil God Undying is somewhat similar to the nurturing of a new universe by the Time-Space Origin.

After the Evil God's death, the original Divine Body returns to the depths of Subspace, where a new Evil God will be nurtured, inheriting the memories.

This is quite similar to the Time-Space Origin nurturing a new universe.

However, the newly born Evil God is not the previous Evil God, and the newly born universe is not the previous universe.

That's why Qi Chen made this statement.

"It seems that the Azure Universe also wants to achieve true 'Universe Undying.'"

"Could it be that the Azure Universe has awakened true self-awareness and is unwilling to face Death?"

"Is its loss of most of the mass and time-space information because of this reason?"

Su Yu pondered to himself.

If a universe awakens to self-awareness and is unwilling to accept Death, it's quite unimaginable what might happen.

If this is true, then... is the current Qi Chen truly Qi Chen, or is he the consciousness of the Azure Universe?

Su Yu fell silent again, engaging in intense and rapid thought.

What he considered could evidently not be communicated to Qi Chen, so silence was his only option.

Qi Chen waited patiently for a while, eventually unable to resist asking: "How is it going?"

Su Yu looked up at him and said: "I have an idea."

"I will use the Time-Space Origin as a foundation to create a Creation Machine and then use this machine to recreate, to forge a new universe."

"If successful, it should be possible to resurrect the Azure Universe. Of course, with only this small amount of mass, the resurrected universe will be much weaker than before."

What Su Yu referred to was, of course, the ritual of the Time-Space Mechanic.

However, Qi Chen was unaware of the Time-Space Mechanic. Hearing the name "Creation Machine," his eyes lit up: "Creation Machine? How can it be made?"

Su Yu shook his head: "I don't know."

Qi Chen's eyes suddenly showed a fierce glint.

Su Yu continued: "Don't misunderstand; I just have a concept now and haven't started research yet. Naturally, I don't know."

"I need knowledge, data, and Time."

Upon hearing this, Qi Chen's fierce glint faded, as if he thought of something, and he smiled again: "Like how you previously researched the Power of Time?"

Su Yu nodded: "Exactly."

Su Yu's previous process of studying the Time Mechanic was secretly observed by Qi Chen.

Back then, Su Yu's power was only Fourth-Order, yet he could research powerful Power of Time.

Thinking of this, Qi Chen no longer doubted Su Yu's research capabilities.

Perhaps Su Yu's Power of World Salvation is not as straightforward as Song Ming's but requires research and creation?

Qi Chen pondered for a moment, then asked: "Then, when will you be able to complete the research? What help do you need?"

Su Yu replied: "I don't know when I will finish."

"As for help... I need Song Ming! He is also a Savior and can be of some assistance to me."

Su Yu suddenly spoke.

Song Ming had previously helped Su Yu and was then "reclaimed" by Qi Chen. Given the opportunity, Su Yu naturally wanted to rescue him.

"Hmm?"

Upon hearing Su Yu suddenly ask for Song Ming, Qi Chen's eyes narrowed.

Su Yu met his gaze and said: "It looks like, even though Song Ming awakened the Power of Paradox, he has not resurrected your capability. Since that's the case, why not hand him over to me?"

Qi Chen exchanged looks with Su Yu for a moment, shook his head, and said: "Song Ming is still useful to me; we'll talk about it later."

Evidently, he rejected Su Yu's request.

Chapter 1048: Mecha Fusion, Breaking Limits!

Su Yu felt a slight disappointment in his heart, while speculating internally. It seemed that Song Ming was still of significant use to Qi Chen.

Perhaps, Song Ming's power could resurrect Qi Chen, but couldn't bring him back with the power of "Death," which was why Qi Chen approached Su Yu.

But Song Ming was Qi Chen's trump card, equivalent to a life, so he wouldn't easily hand it over.

Seeing this request rejected, Su Yu didn't persist and continued, "I also need the human civilization of Azure Star."

If Song Ming couldn't be saved, then he might as well save the entire human civilization.

Unfortunately, the entire human civilization of Azure Star had already been messed up by the previous Chaotic Evil God Dream, everyone's past history was altered, and almost all had forgotten Su Yu.

Even if they were saved now, they wouldn't be the same as they were before.

Faced with this request, Qi Chen still shook his head, "Those humans are still useful to me; I can't hand them over to you."

Hearing Qi Chen's repeated refusals, Su Yu's eyes instantly turned dangerous, "What do you mean by that?"

This Qi Chen claimed to be fully assisting Su Yu.

But neither of the requests was agreed to, showing no sincerity at all.

Qi Chen chuckled softly, "What I mean is...let's first test your quality!"

Before he finished speaking, his figure had already disappeared.

At the same time, a gigantic human silhouette appeared out of thin air.

The silhouette possessed a majestic form, thousands of meters high, glowing brightly and radiating an extremely powerful aura, like a sun, suddenly descending in front of Su Yu.

"This is... the Radiant Mecha!"

Su Yu immediately recognized it was Zhang Chenfeng's Radiant Mecha, his first encounter with a Fifth-Order Planet-Level creation!

"No! It's not just the mecha! There's a pilot inside! It's Zhang Chenfeng!"

Su Yu quickly realized there was indeed a pilot inside the mecha, and the aura he emanated seemed even stronger than the mecha itself.

Su Yu immediately understood the pilot's identity: Zhang Chenfeng!

This person had clearly been dead for ten thousand years, turned into Qi Chen after death; how did he suddenly appear?

However, this Zhang Chenfeng was ice-cold, expressionless, seemingly abnormal, like a corpse.

Only this corpse was extraordinarily powerful.

"Could it be that Qi Chen turned his corpse into a Corpse Beast Puppet or something? Such a pervert?"

"Testing my quality? Meaning he wants me to fight against this Zhang Chenfeng corpse?"

Su Yu's thoughts whirred, understanding Qi Chen's intent.

Although Qi Chen insisted Su Yu was the Ultimate Savior, it was clear he hadn't fully trusted Su Yu and wanted to further test his capability,

Boom!

At this moment, Zhang Chenfeng piloting the Radiant Mecha launched an attack on Su Yu without uttering a word.

Boom!

The armor on the chest of the Radiant Mecha opened, revealing a large cannon muzzle, instantly charged and shot a blast.

Light! Infinite light! Endless light!

The Radiant Mecha operated by the "Radiant Imperial Guard," engaging full firepower, displayed a force of light, pure light!

In an instant, everything in Su Yu's view was engulfed in infinite light.

All thoughts, powers, memories... everything was enveloped, cleansed, and melted by this light...

In that moment, Su Yu almost forgot his name, overwhelmed by endless light.

This power was akin to the Power of Nihilicity, possessing the ability to wash strong individuals into fools!

Su Yu had used the Power of Radiance before, always believing it to be a positive, inspiring force capable of awakening courage and faith deep within.

But now it seemed that when this power was pushed to its extreme, it wasn't all that beautiful.

Courage and faith are great, but if that's all that's left in the mind, how is that different from being a fool?

That was the state Su Yu found himself in now.

"Not good!"

Su Yu shouted in his mind, quickly activating the Power of Nihilism and the Power of Pain.

Once these two powers were activated, they immediately restored Su Yu's thought process to normal, allowing him to clearly see what was happening before him.

The giant cannon on the chest of Zhang Chenfeng's Radiant Mecha had ceased firing, like a big mouth filled with light, that light writhing like teeth, ready to consume Su Yu!

As Su Yu gazed at the cannon muzzle of the Radiant Mecha, flickering with writhing light, he felt an inexplicable impulse.

That was to throw himself into it, merge into that light, becoming part of it, which would be supreme glory and happiness.

"What an evil power..."

Su Yu spat internally, not anticipating that the Power of Radiance could also be so wicked.

Apparently, seeking a serious, non-evil power in this world was not an easy task.

The Power of Radiance looked so serious, yet when it truly fought, it could also be laced with such wickedness.

As for the Radiant Emperor...

However, whether a power is wicked depends on who uses it and where it's applied.

Su Yu's mind spun rapidly as he increased the output of the Power of Nihilism and the Power of Pain to maintain his clarity.

Then, he utilized the "Mechanical Descent" ability to summon the Evil God Soldier Mechas!

Su Yu now possessed two Evil God Soldier Mechas, namely "Brutality" and "Hell."

At this moment, which one did he summon?

The answer is, both were summoned simultaneously!

Su Yu used the Number God Mechanic's abilities on both mechas, digitizing them, adjusting their values, and then merging them!

Normally, merging two Evil God Soldier Mechas is nearly impossible; their materials, essence, and structure are entirely different, how could they merge?

However, after digitization, they became two clusters of data bodies.

Fusion of data bodies became much simpler.

Just as solids are difficult to merge, once melted into liquids, they can easily mix.

Once the data bodies fused, Su Yu then de-digitized them, achieving the fusion of the two mechas.

In the next instant, Su Yu stood clad in a thousand-meter mecha, confronting the Radiant Mecha.

This mecha's left side was pitch-black, the right side crimson, radiating two entirely different yet equally terrifying auras.

Pain and brutality, two forces constantly clashing, merging, and fusing in the mecha's chest, granting Su Yu unprecedented terrifying power.

Su Yu felt himself infinitely expanding, seemingly capable of grasping a planet in his hand with ease; a planet now seemed "small" to him.

Similarly, the Radiant Mecha, also at planet-level, appeared insignificant in his eyes.

This wasn't just a psychological illusion but a factual occurrence!

Su Yu's originally thousand-meter-high stature began expanding, two thousand meters! Three thousand meters! Ten thousand meters!

Finally, Su Yu's figure swelled to a ten-thousand-meter scale; at this moment, the Radiant Mecha seemed infinitely small, easily grasped with one hand.

"So strong..."

Even Su Yu found it hard to believe.

Based on Su Yu's knowledge, humanoid mechas could only reach a maximum of a thousand meters high, due to the Radiant Emperor's body seemingly being a thousand meters tall.

Thus, no humanoid creations could exceed this limit; at least all humanoids Su Yu had previously seen didn't surpass a thousand meters.

But now, Su Yu's Evil God Soldier Mechas "Brutality" and "Hell," after adjustment and fusion through the Number God Mechanic, had grown so powerful, directly exceeding the thousand-meter limit!

At this moment, Su Yu's power infinitely expanded, and with the continuous clash of the Power of Pain and the Power of Brutality, he kept growing stronger, seemingly on the verge of breaking through ten thousand meters!

Su Yu lowered his gaze to the tiny Radiant Mecha, extending his hand, easily capturing it in his palm, even though the Radiant Mecha unleashed planet-destroying power in a futile struggle, it was to no avail.

Within Su Yu's palm, the energies of black and crimson clashed and crushed relentlessly, poised to completely annihilate the Radiant Mecha!

No surprise, both the Radiant Mecha and Zhang Chenfeng within were ground to pieces in Su Yu's palm, with no chance of fighting back against a Fifth-Order expert piloting a Fifth-Order Mecha!

"What is this?! How is it possible? How could the Power of Pain and the Power of Brutality undergo such transformations?"

At this point, Qi Chen reappeared, looking at the ten-thousand-meter-tall Su Yu, exclaiming in disbelief.

Upon hearing this, Su Yu proudly declared, "This is the result of my research on the Creation Machine, what do you think, are you satisfied now?"

Chapter 1049: Everything Returns to the Past

Actually, Su Yu was talking nonsense.

Su Yu had no idea beforehand that after the fusion of the Evil God Soldier Mechas [Hell] and [Brutality], they would become so powerful.

They actually broke through the thousand-meter humanoid limit of the Radiant Emperor's true form, instantly annihilating the Radiant Mecha summoned by Qi Chen and Zhang Chenfeng.

Su Yu believed there was a special "chemical reaction" between the Power of Pain and the Power of Brutal.

Pain can provoke brutality, brutality can create pain, and when combined, the power is enhanced to the limit.

However, previously when Su Yu was at the Fourth-Order, he also had the Power of Pain and the Power of Brutal, but the results were far from as powerful as they are now.

It should be that both powers reached the Fifth-Order, resulting in a qualitative change.

Previously, these two powers belonged to the Pain Evil God and the Brutal Evil God, who would fight as soon as they met, so there was no possibility of merging powers.

Now that both powers are possessed by Su Yu, there is an opportunity for fusion.

Moreover, in this fusion process, Su Yu not only used the Power of Brutal and the Power of Pain but actually also used the power of the Number God Mechanic, combined with the balance of the Power of Nihilism, and the "Mechanical Descent" of the Giant God Soldier Mechanic.

With the combined action of multiple powerful forces, the final result was achieved.

Perhaps there is also a special reason for the Brutal Evil God's identity since the Brutal Evil God is the only successful result of the Azure Universe's revival attempt, so anything special is normal.

After Su Yu transformed the Brutal Evil God into the Evil God Soldier Mecha, the Mecha also inherited this specialty.

The specifics still need to be studied slowly.

But now, Su Yu naturally boasts in front of Qi Chen, claiming that it is the result of his research on the Creation Machine.

Combined with his ten-thousand-meter figure and the record of just having annihilated the Radiant Mecha Zhang Chenfeng, these words are particularly persuasive.

Upon hearing Su Yu's words, Qi Chen also showed a look of surprise, examining Su Yu up and down, a look of admiration in his eyes: "Indeed, you have now vaguely surpassed the limits of this universe, at least beyond the limits set by the Radiant Emperor!"

"Very good! Very good! Without breaking the limits of this universe, how can you complete the Creation Machine and revive the Azure Universe?!"

"Fusing the Power of Brutal and the Power of Pain, provoking each other, resulted in such a startling change? 1+1 is far greater than 2..."

Looking at Qi Chen's demeanor, it seems as if he wants to capture Su Yu for research at any time, but due to Su Yu being the "Ultimate Savior," he refrains from doing so.

He did not make a move, but Su Yu could hardly hold back.

Su Yu just made two requests, and Qi Chen did not agree to either, instead summoning the Radiant Mecha Zhang Chenfeng to fight Su Yu.

Enduring an attack without retaliation is not Su Yu's style. Despite Qi Chen being mysterious and powerful, Su Yu's power has surged, and it's a good opportunity to test this guy's worth!

"You just said you wanted to test my worth, now it's my turn!"

Su Yu's voice boomed from the majestic ten-thousand-meter Mecha, accompanying the voice were terrifying light blades intertwined with crimson and pitch-black!

Crimson and pitch-black hues interwove in Su Yu's massive palm, forming a ten-thousand-meter light blade, vibrating and exploding incessantly, slicing toward the small Qi Chen. Wherever the light blade passed, everything was decomposed and obliterated by the fierce conflict of the two powers.

A temporary vacuum was cleaved in the Subspace Deep Layer.

This strike was enough to kill a Fifth-Order, shatter stars, with power far exceeding any previous attacks by Su Yu.

"Testing my worth?"

"I, a dead person, do not fight."

Facing Su Yu's attack, Qi Chen didn't dodge but calmly said this much.

Then the ten-thousand-meter two-colored light blade condensed by Su Yu silently "died."

However, after making this light blade "die," Qi Chen began to flicker, seemingly heavily consumed, wanting to return to a state of death.

Evidently, facing Su Yu's attack wasn't as easy as Qi Chen appeared.

"Seems he's not as strong as imagined; now I have the qualification to fight him!"

Seeing Qi Chen's flickering figure, Su Yu thought to himself.

Previously being instantly killed by Qi Chen's "Death," Su Yu was very cautious of him.

But now, having gained the power to instantly kill a Fifth-Order, Su Yu feels more confident fighting Qi Chen.

Especially seeing Qi Chen flicker, Su Yu is more convinced Qi Chen isn't as strong as imagined.

Perhaps now, Qi Chen's power isn't necessarily stronger than Su Yu's.

However, Qi Chen's state is unique, elusive; even with Su Yu's full force, he may not be able to kill him.

In other words, Qi Chen is already dead, how can he be killed again?

Thus, after one unsuccessful attack, Su Yu did not strike again but quietly watched Qi Chen: "You don't seem as strong as I imagined?"

At this time, Qi Chen's figure had already recovered from the previous flickering state.

He looked solemn initially but then revealed a smile: "As expected of the Ultimate Savior, truly extraordinary."

"The thing you want is on Azure Star, go fetch it yourself."

After finishing, Qi Chen's figure vanished completely.

No matter how Su Yu observed, he couldn't discern how Qi Chen disappeared.

This is the peculiarity of Qi Chen's state, able to return to the world of "death" at any time, and being a living person, Su Yu naturally can't see him there.

Su Yu stood silent for a moment, then moved towards the surface of the Subspace.

Qi Chen just mentioned that what Su Yu wants is on Azure Star, and Su Yu's request was to save Song Ming and everyone on Azure Star.

Chapter 1050: Everything Returns to the Past (Part 2)

After the recent probing, it seems Qi Chen has agreed to Su Yu's request. Although Su Yu is displeased with Qi Chen referring to those people as "things," he puts aside the displeasure and immediately prepares to head to Azure Star to receive them.

After all, Su Yu now has enough power to face Qi Chen directly and no longer needs to hide in the Subspace Deep Layer.

Quickly, Su Yu reaches the surface layer of Subspace and then instantly leaves it, returning to Azure Star, hovering above the planet's orbit.

In the cosmic vacuum, a ten-thousand-meter Mechanical Giant faces a vast azure planet.

Though the scale difference between the giant and the planet is vast, an observer might feel that this colossal giant is more magnificent and grandiose than the planet, as if a mere stretch of its hand could encompass the entire planet!

Su Yu's mere presence in the planet's orbit, with his vast energy, subtly triggers some geological changes on this planet.

If Su Yu were to descend directly to the planet, it might instantly lead to landslides and disasters.

Seeing this, Su Yu immediately restrained his power, retracting the fused Evil God Soldier Mechas [Hell] and [Brutal], returning to his human form.

No matter when, if he wishes, he can summon the Mechas again.

Moreover, maintaining this fused Mecha ten-thousand-meter giant form constantly bears a heavy load on Su Yu.

It's not a burden of power but a burden on the spirit.

After the fusion of the two major Evil God Soldier Mechas, the Power of Brutal and Power of Pain mutually stimulate each other, bringing endless pain and brutal emotions to Su Yu at every moment. Without using the Power of Nihilism to neutralize this mental impact, he would have gone mad.

Even with the Power of Nihilism to neutralize, it cannot be sustained for long—at most supporting one or two battles, not possible to maintain continuously.

In essence, using the intense reaction between Power of Brutal and Power of Pain to gain powerful energy is to take a shortcut, not Su Yu's inherent power. Limitations are normal, and Su Yu doesn't mind.

Now, he focuses his attention on Azure Star in front of him.

Holographic Perception is activated, the Star Tower signal instantly sweeps over Azure Star, conducting a detailed map modeling, capturing every detail.

"Is this... all returned?"

Su Yu discovers that Azure Star at this moment is no longer shrouded in the dark giant city structure of the Dream Realm but has restored its verdant mountains and waters, with three hundred cities.

Four hundred million people living and working happily in these three hundred cities, with some conflicts, but compared to the oppressive dark giant city, it can be considered a heavenly paradise.

Above in the sky, "Sky Rail City" quietly orbits Azure Star.

Everything seems to have returned to the state before the arrival of the Chaotic Evil God Dream.

The Azure Star civilization and Song Ming, whom Su Yu previously requested from Qi Chen, are all here.

Su Yu even finds that these people's memories are all fixed at the point before the Chaotic Evil God Dream arrived.

They don't know anything about the dark giant city, don't know anything about Supreme Ruler Su Yu, don't know anything about Great Commander Song Ming.

Everything has returned to the past.

Qi Chen truly did as promised, really returned everything to Su Yu.

"Is this... Time Retrospection? Complete Time Retrospection?"

Su Yu mused inwardly.

He believed Qi Chen conducted thorough Time Retrospection over the entire Azure Star, returning everything to before the arrival of the Chaotic Evil God Dream.

Looking at Sky Rail City in orbit, Su Yu notices that at this moment, over ten thousand Third-Order Transcendents are meeting in Sky Rail City.

At this time point, the founder of Azure Star civilization, Mr. Su Yu, has been missing for many years, even with mad rumors.

Therefore, many Third-Order powerhouses held a meeting in Sky Rail City, preparing to explore the Mechanical City.

During the discussion, Song Ming speaks out "boldly," suggesting if Mr. Su Yu is truly mad, then kill him! Resulting in being sealed by the crowd.

At this time node of the Azure Star civilization, they hold Su Yu in high regard, tolerating no disrespect.

Only someone like Song Ming, a "Dream Realm Creation" and "Civilization Savior," dares to casually speak of killing Su Yu, subsequently suffering being sealed.

Su Yu had known all this long, had seen it before.

Through the Star Tower signal scan, Su Yu silently watches those young generation Transcendents, nodding slightly, then flies into the atmosphere, quickly returning to his long-time residence, the Mechanical City.

Finally, Su Yu sits upon the Mechanical Throne, his expression somber.

He feels something is amiss.

These people have returned to the past, then what about everything before, all that occurred in the dark giant city?

The four hundred million people in the dark giant city also have their joys, sorrows, loves, and hates, their pasts, history, and memories.

Theoretically, the four hundred million in the dark giant city and those now on Azure Star aren't the same group—it's merely sharing one body.

Just as Evil God Undying, after Evil God's death, its essence returns to the depths of Subspace, nurturing a new Evil God.

The four hundred million people in the dark giant city are akin to nurturing new personalities within their bodies.

Qi Chen's one Time Retrospection returns everyone to the past, equivalent to killing all those personalities.

Initially, Su Yu planned to reclaim the original Azure Star civilization while extracting those additional personalities, creating new bodies for them, to accomplish both ends.

But Qi Chen didn't give Su Yu a choice, directly Time Retrospection, so people return to the past, meaning everyone in the dark giant city is completely dead.

The Song Ming that Su Yu knew before is also dead.

Not exactly dead but "never born."

Just like the Time Retrospection in the dark giant city before if a baby was born during the process, after Time Retrospection, the baby would return to the mother, never born.

Though babies don't have self-consciousness, it doesn't mean much.

Now, Qi Chen's Time Retrospection is even more thorough, the dark giant city, four hundred million people, all never born.

Those four hundred million people aren't unaware infants without consciousness and memory; most are adults with memories and lives.

Though those memories and experiences of the four hundred million were under oppression and torment, they ultimately lived and existed.

Now, even this proof of existence is gone.

All they ever desired was to overthrow "Supreme Ruler Su Yu," overthrow oppression, live good lives... but now there's nothing.

Thinking this, Su Yu's heart surged with killing intent.

Qi Chen's one Time Retrospection killed billions in an instant, and those people aren't even aware of being killed.

Facing this, Su Yu finds it hard to suppress his killing intent.

But Su Yu quickly pushed it down.

The situation might be reversible.

Because Su Yu suspects, is this Azure Star really the former Azure Star?

Has the dark giant city and its four hundred million people really disappeared?

Su Yu suspects that perhaps, in a parallel time-space, the dark giant city still exists, and the rebels continue their preparations to overthrow "Supreme Ruler Su Yu."

In the Azure Star where Su Yu resides, it's merely one of the parallel time-spaces.

Theoretically, the Human Empire, under the rule of the Radiant Emperor, converges all timelines.

There exists no parallel time-space, no possibility of past future—all live in the [present], everything is "unique."

However, this is Azure Star, the remnants of Azure Universe.

Here, the power of the Radiant Emperor has leaks.

Adding Qi Chen conspiring in the shadows, various different parallel time-spaces might emerge in secret.

"So, are there also other Su Yus existing in another parallel time-space?"

Su Yu's eyes deepened in thought.

...

Meanwhile, in an unknown time-space.

Just as Su Yu suspected, the dark giant city indeed exists!

In the dark giant city, within that small mechanical repair shop, another Su Yu resides.

Qi Chen appears outside the repair shop, smiling: "Su Yu, the wonders of the Time-Space Origin, how could you truly comprehend it?"

"That one Su Yu is not to be trifled with; this one can be toyed with as I wish?"
