

## **Infinite 1051**

Chapter 1051: Packing Up Azure Star, Making a Run for It!

Qi Chen's figure flickered, and he appeared directly in the small repair shop.

At this moment, the entire Dark Giant City was frozen, including the Su Yu within the repair shop.

Qi Chen looked at this Su Yu, strange light emanating from his eyes, penetrating towards Su Yu.

Clearly, Qi Chen was attempting to use some power to control this Su Yu.

This Su Yu did not seem to possess formidable Fifth-Order strength, only slightly stronger than an ordinary person.

Facing Qi Chen's erosion, this Su Yu showed no response.

However, a moment later, the originally motionless and dazed Su Yu suddenly blinked slightly, meeting Qi Chen's gaze.

"What?"

Qi Chen was startled.

He hadn't expected such a change to occur.

Before he could react, the power within the Su Yu in front of him rapidly expanded, escalating within a short time from a bit stronger than an ordinary person to Third-Order, then Fourth-Order, and swiftly heading towards Fifth-Order!

"This is bad!"

Qi Chen exclaimed inwardly and hurriedly activated [Death].

In a short time, Su Yu's body became enveloped in a deathly gray, eventually turning into a pile of ashes.

In the little repair shop, Su Yu's figure had vanished without a trace, leaving no remains.

Only Qi Chen stood there, a gloomy expression on his face.

"He actually reached such a level..."

"This Su Yu, indeed unusual, could the Ultimate Saviour truly be so powerful?"

But after a moment, Qi Chen once again displayed a smile as if everything was within his grasp: "No matter, the stronger you are, the more useful you become."

"Caught in the cycle of reincarnation, all your actions will be for my use..."

...

At this time, in another time-space within Mechanical City.

Su Yu abruptly opened his eyes.

"It seemed just now someone tried to control me, I attempted to retaliate, but failed, and 'I' was killed by him..."

"Was it Qi Chen? As expected, there exists another time-space."

Originally, while Su Yu was contemplating, he suddenly felt something eroding him.

But strangely, the part of Su Yu being eroded, he had never sensed before, nor had it ever appeared.

It was like a person with two hands suddenly feeling pain, yet neither the left hand nor the right hand hurt, but an inexplicable third hand.

That was precisely how Su Yu felt just now.

He sensed himself bizarrely having an extra body, which was being eroded by a force trying to control him.

Thus, Su Yu focused his spirit on that additional body, and instantly, the originally extremely weak body began to synchronize with his main body, advancing towards becoming a Fifth-Order powerhouse.

But before the synchronization could complete, the extra body died, causing Su Yu to lose contact.

Despite losing contact, Su Yu felt quite pleased.

Because that fleeting sensation allowed Su Yu to understand one fact, which is, no matter the time-space split or parallel worlds, he remains the sole entity.

Even if another Su Yu splits out, it still counts as a part of the main body, capable of being sensed at any time.

This prevents him from being split by time-space and then having the split body controlled.

Previously, before Su Yu took up the profession of Time Mechanic, he had already unified all his historical timelines.

But this unification was evidently insufficient against Qi Chen's methods.

The Time-Space Origin had gaps even against the power of the Radiant Emperor, let alone Su Yu's Time Mechanic?

Qi Chen's creation of parallel timespaces, utilizing the uniqueness of the Time-Space Origin, had already surpassed the power limits of a Time Mechanic.

However, just now, Su Yu ignored the restrictions of Qi Chen's created parallel time-space, sensing another self, making himself singular once again.

This could be because Su Yu had already achieved true Evil God Undying through the Profession Panel.

It could also be because Su Yu is indeed the so-called Ultimate Saviour, capable of ignoring the power of the Time-Space Origin.

"Anyway, for now, Qi Chen should be unable to do anything to me."

Su Yu muttered to himself.

In direct combat, Qi Chen could not deal with Su Yu.

Behind-the-scenes schemes were also seen through by Su Yu, clearly rendering Qi Chen helpless against Su Yu now.

Now Su Yu is truly safe.

However, correspondingly, Su Yu could not do anything to Qi Chen either; he could not even locate where Qi Chen was.

"Since that is so..."

Su Yu's thoughts turned swiftly, concluding a plan within a short time.

That is...

To escape directly!

With a thought, Su Yu covered the entire Azure Star with a powerful force.

Thus, the entire Azure Star began to become digitalized!

At this moment, in Sky Rail City.

Yang Lie, Feng Ying, Yan Qing... and a group of Third-Order powerhouses were preparing to initiate Flesh Fusion, Mechanical Fusion, to manufacture Fourth-Order Combat Power, then explore Mechanical City to check on the long-disconnected Mr. Su Yu?

However, before they could accomplish all this, they were shocked to find that the entire Azure Star was becoming transparent.

The vast and solid planet, originally possessing a strong gravitational aura characteristic of a planet when viewed from space, formidable enough to command respect and awe from any Transcendent below Fifth-Order,

Yet, at this moment, the vast planet suddenly became semi-transparent, seemingly like a dream bubble, fragile to the touch.

Among the crowd, some experts in the field of data, upon seeing this scenario, couldn't help but exclaim: "Data transformation! Azure Star is being data-transformed!"

"Some kind of powerful force is attempting to data-transform the entire Azure Star!"

Hearing these exclamations, everyone was utterly incredulous.

## Chapter 1052: Packing Up Azure Star and Making a Quick Getaway! (Part 2)

To datify an entire planet, how is it possible? What kind of power is this?

However, before they could react, that power of datification had already spread to Sky Rail City, and the entire city began to appear illusory.

Moreover, that power also extended to them, and moments later, they too became datified.

"..."

"..."

The datified people looked at each other in silence.

It wasn't that they didn't want to speak, but they couldn't adapt to their datified bodies to produce any sound.

At the same time, they lost all ability to move.

Even those skilled in the field of data couldn't operate in this state of datification.

Because they didn't have "permission."

"Is today the end of the world? Who is it? Is it the Brutal Evil God?"

"Mr. Su Yu..."

Devoid of any ability to act, everyone involuntarily thought of the word "apocalypse," and also thought of Mr. Su Yu.

Facing this world-shaking change, they felt utterly helpless, longing for Mr. Su Yu to save them.

However, moments later, they despairingly remembered that Mr. Su Yu had been missing for a long time, possibly insane, so how could he save them?

Even if Mr. Su Yu were normal, could he really contend with this immense power that datified the entire Azure Star in such a short time?

But in the next instant, a familiar figure appeared before them, and a familiar voice reached their minds.

"I am Su Yu; don't panic."

"I have already broken through to the Fifth Order and utterly suppressed the Brutal Evil God."

"Now, I will datify the entire Azure Star along with all of you, then break the blockade and venture into the deep cosmos to explore the galaxy."

As soon as these words were spoken, everyone was left dumbfounded.

What?!

Mr. Su Yu broke through to the Fifth Order, suppressed the Brutal Evil God, and now plans to datify the entire planet and take it to the galaxy?

Wasn't Mr. Su Yu suspected to be insane? When did he break through to the Fifth Order?

Moreover, what about the ceremony? Is it possible to complete the Fifth Order ceremony silently?

And what about suppressing the Brutal Evil God? When did that battle occur? How did they not know?

The Brutal Evil God was silently suppressed as well?

Upon hearing these words, their first reaction was neither disbelief nor belief, but pure confusion.

What happened?

These people had no memory of what transpired in the Dark Giant City, entirely unaware of how these events unfolded.

Su Yu ignored their shock and continued to datify the entire Azure Star, adjusting its values.

He adjusted parameters like "mass," "diameter," etc.

After reducing the Azure Star to a fraction of its size, with a thought, Su Yu directly placed the entire Azure Star into the Manifestation Space.

As a Number God Mechanic, Su Yu's Manifestation Space was vast, nearly as large as Azure Star itself.

Now with the Azure Star adjusted through datification, it fit right in smoothly.

Normally, moving a planet in such a rough manner would, due to inertia, cause terrifying geological changes and destroy all life on the surface.

However, due to prior datification, these problems were naturally absent. It was just a mass of data, with no inertia concerns.

Once the entire Azure Star was stored in the Manifestation Space, there was nothing but nihility before Su Yu.

"Heh heh, I've really plucked a star and taken the moon this time."

Su Yu sighed inwardly.

When he first took the role of Number God Mechanic, Su Yu had envisioned datifying and packaging an entire planet.

But back then, his power wasn't as strong as it is now, and achieving such a feat was extremely difficult.

One wrong move could shatter the planet, causing catastrophic disaster.

Fifth-Order experts could destroy planets, but safely moving a planet wasn't a simple task.

But now, Su Yu's power had soared so much that he could even instantly kill Fifth-Order experts.

Putting the whole Azure Star into the Manifestation Space didn't even tire him out.

Thinking back to when the Giant God Soldier Camp, Mechanical God fit an entire city into the Manifestation Space; it left Su Yu deeply impressed.

But now, Su Yu had put an entire planet inside!

In the Manifestation Space, Su Yu used data to simulate a space environment similar to the outside world.

In this simulated environment, a thrice-reduced Azure Star was slowly rotating.

In the Manifestation Space, Azure Star reverted from its datified state, and apart from being smaller, seemed no different from the outside world.

However, there was no sun in the Manifestation Space to provide energy to Azure Star.

All energy was supplied by Su Yu himself, which was a huge burden, though Su Yu didn't plan to supply energy for long.

Everyone on the planet regained their physical form and mobility.

The swift changes left many people thinking it was an illusion.

Most couldn't distinguish the difference between the Manifestation Space and reality.

Only the experts in Sky Rail City understood what had happened.

Because in Sky Rail City, they could directly see the space and the boundary of the Manifestation Space.

They keenly realized that the current Azure Star truly wasn't in the original cosmic vacuum anymore, but in an artificial Manifestation Space!

"Did Mr. Su Yu really do this?"

"To fit an entire planet into a Manifestation Space, what kind of power is this..."

...

But Su Yu paid no mind to their astonishment; he was quite busy.

After putting Azure Star into the Manifestation Space, there were still things left: those Mechanical Creations on the orbit that Zhang Chenfeng made, the so-called Mechanical Council.

When Su Yu datified the whole Azure Star, these Mechanical Creations resisted Su Yu's datification power. They were Qi Chen's minions, possessing a certain degree of Fifth-Order power and could ward off datification erosion.

So Su Yu didn't care about them.

Now, having settled Azure Star, Su Yu had time to deal with them.

At this time, those Mechanical Creations also activated combat mode, silently aiming their various cannons at Su Yu.

"Overestimate themselves! Mechanical Descent!"

With a thought, Su Yu activated Mechanical Descent, instantly fusing the two Evil God Soldier Mechas [Hell],[Brutality] into a ten-thousand-meter-tall Mechanical Giant.

This was Su Yu's full power! In this state, Su Yu had the power to instantly kill Fifth-Order experts!

Simultaneously, intense pain and a feeling of brutality erupted in Su Yu's heart, reminding him that this state could not last long.

The Mechanical Giant moved, and in the next instant, the sky was filled with fragments of the Mechanical Creations.

These Mechanical Creations struggled against the Brutal Evil God, much less Su Yu, who had suppressed the Brutal Evil God. They were instantly resolved by Su Yu.

Even in his normal state, Su Yu could easily handle these Mechanical Creations. He exerted his full power only to resolve the matter quickly and to minimize damage to the Mechanical Creations.

The Mechanical Creations might look like they're in pieces, but none of their parts were actually destroyed. With a bit of assembly, they could function again.

"You can come in too..."

With a thought, Su Yu gathered all these Mechanical Creations into the Manifestation Space, packing them away.

These Mechanical Creations were Zhang Chenfeng's works, highly technological, with significant research value, and they might hide Qi Chen's secrets, so Su Yu wouldn't miss them.

Having tidied everything up, Su Yu didn't retrieve the Evil God Soldier Mechas but charged fiercely towards the depths of the cosmos.

He intended to break the blockade and head into the starry sky!

Long ago, Su Yu's plan was to complete the Fifth-Order ceremony, break through the blockade with the Azure Star civilization, and venture into the depths of the universe to explore the galaxy.

Now he was a true Fifth-Order, even far stronger than ordinary Fifth-Orders, and the great enemy Brutal Evil God was also entirely suppressed by him.

Besides an unexpectedly appearing Qi Chen, the plan proceeded almost perfectly.

Qi Chen's plots remained unknown, and he was secretive about the Time-Space Origin.

Su Yu felt that staying here would eventually lead to being plotted against by Qi Chen.

So why not take the whole Azure Star and leave?

As for the Time-Space Origin and the [Time-Space Mechanic] ceremony, they could wait until he got to the depths of the universe and gained more information and strength before figuring it out.

Meanwhile, in another timeline, Qi Chen suddenly changed his expression: "Not good! He's going to run!"

#### Chapter 1053: Time-Space Reincarnation

Qi Chen seemed not to expect that Su Yu would suddenly make such a move.

"Logically, as the Savior of the Azure Universe driven by the Savior Origin, he shouldn't leave voluntarily. What's going on? Has he lost control?"

However, he soon sneered coldly, "Trying to escape? It's not that easy!"

Although Qi Chen was surprised, he did not intervene to stop Su Yu's escape behavior.

In fact, even if he showed up, it would be difficult to stop it.

After all, he was fighting head-on, making it hard to do anything about Su Yu.

Unless he paid a certain price, a very heavy price, which Qi Chen did not want to pay.

At this moment, in the dark cosmic vacuum, Su Yu's figure was continuously accelerating.

In a short time, he was already near the speed limit of the real universe: the speed of light!

However, Su Yu did not stop and was still continuing to accelerate.

This was because he used [Data Truth] to modify the space-time rules around him, raising the speed of light limit.

In this way, Su Yu could continuously accelerate until he reached the limit of Data Truth.

In fact, Su Yu had never tried the limit of his [Data Truth] ability until now and didn't know to what extent he could modify the rules of the real universe. Now was just the time to try.

One times the speed of light, two times the speed of light, three times the speed of light...

Su Yu transformed into a stream of information surpassing ten times the speed of light, taking the entire Azure Star and Azure Star Civilization towards the deep space beyond the Azure Star System.

Soon, Su Yu was already approaching the edge of the Azure Star System.

But in the next instant, Su Yu's vision blurred, and he found himself back at the original location of Azure Star without knowing when it happened.

"Is it a space-time lock?"

Su Yu's heart sank. Even though he modified the space-time rules and surpassed the speed of light limit, he couldn't break through the lock.

For this failure, Su Yu wasn't surprised.

He had long known that leaving the Azure Star System wasn't so simple.

Decades ago, during a fierce battle with the Ghost Emperor, Su Yu broke through Zhang Chenfeng's Mechanical Creation's lock and entered the cosmic deep space.

However, that time he merely wandered near Azure Star and didn't leave the Azure Star System.

Because Su Yu had tested using the Power of Time outside Azure Star and found there was another layer of lock. Once one leaves a certain distance from Azure Star, they would return to the original place, unable to truly leave the Azure Star System.

The Mechanical Creations on Azure Star's orbit were just the superficial lock. The real space-time lock was hidden in the cosmic vacuum.

This lock, including Subspace and all spaces, was completely sealed, and nothing could escape this star system.

The Brutal Evil God had stayed here for over ten thousand years and never went out.

But Su Yu wouldn't believe it. After accumulating to this day, he already had strong power, even suppressing a Fifth-Order Brutal Evil God. His power was already at the peak in this star system.

He refused to believe that such a powerful self still couldn't break the lock?

Su Yu accelerated again, charging out towards the Azure Star System.

Originally having ten times the speed of light, this acceleration made his speed soar once more.

However, unsurprisingly, as Su Yu approached the edge of the Azure Star System, he immediately returned to the original place again.

Even with Su Yu's current strength, he couldn't perceive how he returned.

But Su Yu didn't lose heart, instead, he quickly thought and analyzed the principle within.

As long as he found a way to break the lock, with Su Yu's strength, he could traverse the universe galaxy.

Even though there were various dangers in the galaxy, it was better than being stuck in this small Azure Star System, scheming with the half-dead Qi Chen.

The infinite universe galaxy represented infinite possibilities and boundless resources.

Now in the Azure Star System, there were almost no stronger existences than Su Yu, meaning that the resources in this star system could hardly make Su Yu stronger. The only useful Time-Space Origin was still controlled by Qi Chen.

So it's better to run away early, using the universe's resources and knowledge to improve oneself, and then come back to settle accounts with Qi Chen.

"Was that just now space transmission?"

Su Yu's mind popped up these four words.

However, in that instant just now, Su Yu didn't feel any space fluctuations.

During the flight, he continuously used [Data Truth], while also scanning with the holographic perception of the Star Tower.

In this state, he was very sensitive to any changes in space curvature.

But in that instant just now, the space curvature seemed to have no fluctuations, which didn't match the characteristics of space transmission known to Su Yu.

Moreover, what kind of space transmission could make Su Yu be transmitted so far without resistance?

"Time Retrospection?"

Su Yu quickly thought of a possibility.

Compared to simple space transmission, time-related forces are more concealed and powerful.

This sudden return to the origin phenomenon resembled the Time Retrospection that Su Yu previously experienced.

However, Su Yu quickly dismissed it.

Time Retrospection reverses time, making the [Now] time node move backward.

It's like a great river starting from the western plateau, flowing east into the sea.

Time Retrospection could turn the river's direction, flowing from the sea to the plateau.

This drastic change in the time flow could hardly go unnoticed by Su Yu now.

With Su Yu's current strength, he was very sensitive to the [Now] time node.

Su Yu was very certain that in that instant just now, the [Now] time node didn't move backward, it continued to move forward as usual, and the time flow didn't change.

"So it's indeed, something special about the Time-Space Origin?"

Chapter 1054: Time-Space Reincarnation (2)

Su Yu recalled the knowledge about the Time-Space Origin he gained earlier.

Especially the part Qi Chen told him.

According to the information Qi Chen provided to Su Yu, the Time-Space Origin is where the river of time stops flowing forward when the universe is destroyed, instead turning "backward," eventually forming a circle with the beginning of time.

The end of time became the starting point, and in the next instant after the universe's destruction, it became the universe's inception again, then repeated in a cycle countless times in an instant.

This loop cycles infinitely, eventually collapsing with a rumble, becoming a "point" with no beginning and no end.

Similarly, the ocean of space, upon the universe's destruction, also collapses, with spatial curvature becoming infinite, moving forward, yet eventually arriving back at oneself.

Ultimately, the entire ocean of space also turns into a "point" with no front and no back.

Space and time are one; these two points are essentially the same, known as the "Time-Space Origin."

This singular point contains all the space-time information of a universe, thereby nurturing the "singularity" and recreating the Big Bang, making the universe anew.

What Su Yu just experienced seemed very much in line with the characteristics of the Time-Space Origin.

The river of time no longer flows forward but backward, spatial curvature is infinitely large. Moving forward, yet arriving back at oneself.

However, this did not quite match the facts Su Yu had just observed. The river of time was still flowing forward, and the spatial curvature hadn't changed.

"Maybe Qi Chen wasn't telling the truth before; the space-time phenomena when the universe is destroyed might be more wondrous..."

Su Yu thought privately.

He always maintained a skeptical attitude toward the intelligence Qi Chen provided, not fully believing it.

The phenomena now observed did not match the information given by Qi Chen.

Su Yu chose to trust his observation results, his reasoning and judgment.

"Universe destruction, space-time looping, no front or back..."

Su Yu contemplated, and after a moment, inspiration struck him.

Perhaps, at the time of universe destruction, the river of time doesn't really flow backward as Qi Chen said but continues "forward."

However, this "forward" directly returns to the universe's inception.

Just as a person is born, grows, ages, and dies.

But at the moment of this person's death, he returns to the moment of birth, and then continues to grow, age, and die.

This is the change occurring in terms of time.

In terms of space, it's moving a distance forward and instantly returning to the starting point.

The start and end points of space are connected together.

When the universe is destroyed, such changes occur in both time and space.

The entire universe, like a "repeat song" track, repeats endlessly.

"Perhaps it shouldn't be called a cycle, but... reincarnation?"

Suddenly, two words emerged in Su Yu's mind: reincarnation!

Upon the Azure Universe's destruction, everything is in endless reincarnation, repeating over and over.

"Before humans die, there's a 'flashback,' a brief recollection of past life."

"Could the universe have something similar?"

"Is this space-time reincarnation the universe's 'flashback'?"

Su Yu's imagination flared, making such a conjecture.

The so-called space-time reincarnation might merely be the universe's 'flashback' before its death.

Before dying, humans at most relive past memories once.

But a universe can reincarnate countless times, clearly much more powerful.

This reincarnation, in the instant of the universe's destruction, repeats countless times, eventually consolidating all space-time information to a point, becoming the Time-Space Origin.

This should be the true process of the Time-Space Origin's birth.

Then the problem arises, in theory, the Time-Space Origin should have already formed,

Upon its formation, the universe is destroyed, and space-time cease to exist.

Only a "Time-Space Origin" remains, with no beginning and no end, no front or back.

Space-time reincarnation should have already stopped.

Just a single point, it clearly can't "reincarnate", it has no size, no front or back, no beginning or end, what can it reincarnate?

Then what exactly did Su Yu just experience?

"The Azure Universe has already been destroyed, forming the Time-Space Origin, but the Azure Star System remains."

"This represents that the Azure Star System hasn't been completely destroyed, and the Time-Space Origin hasn't fully formed!"

"So reincarnation continues!"

"This is the true nature of the space-time lock, this isn't a seal at all, but a space-time reincarnation before a universe's destruction."

"No wonder the Brutal Evil God couldn't escape it for millennia!"

Su Yu calculated rapidly in his mind.

At this moment, he was akin to a planet-level super Intelligent Chip, with incomparably powerful Computational Power.

In a short time, he had already analyzed the truth of the Azure Star and the Time-Space Origin, almost seeing the entire picture.

However, even having analyzed the truth, it still didn't provide much help to the current situation.

He was still trapped in this "reincarnation," unable to escape.

All along, Su Yu had thought the Azure Star System's lock was a seal set by Zhang Chenfeng.

Zhang Chenfeng, no matter how strong, was at most Fifth-Order and not as unbelievably powerful as the Radiant Emperor.

The lock set by Zhang Chenfeng had its limits in strength.

In theory, as long as one's power is stronger than Zhang Chenfeng's, there should be a chance to break the lock by force.

Not to mention, Su Yu now possessed enough power to instantly kill Zhang Chenfeng. Breaking the lock should be easy, right?

In fact, all those Mechanical Creations on the orbit of the Azure Star were instantly killed by Su Yu and taken away.

Clearly, Zhang Chenfeng's set lock could no longer affect Su Yu in the slightest.

But now, Su Yu wasn't facing mere Fifth-Order power of Zhang Chenfeng but a space-time reincarnation born from the destruction of a universe.

This kind of lock was of a level beyond Su Yu's understanding.

Su Yu was not only thinking at this moment, but also continuing his previous attempts, continuously accelerating, rushing towards the exterior of the Azure Star System.

However, even when he had accelerated to thirty times the Light Speed, it still served no purpose.

Each time he flew a certain distance, he would return to the starting point.

At this time, the Azure Star System was like an independent universe.

Su Yu's actions at this time were like trying to rely solely on speed to rush out of the universe and go beyond it, which is impossible?

"One does wonder if there were beings in the early Azure Universe, whether any strong ones could discover the reincarnation and attempt to break away?"

Su Yu attempted in vain again and again, while his heart sighed and speculated.

Perhaps there were also strong ones in the early Azure Universe who could discover this reincarnation and, like Su Yu at this moment, try to break away from this reincarnation.

But it was useless.

Just as Su Yu couldn't break the lock now, all beings in the Azure Universe were trapped in the reincarnation and couldn't escape.

"But fortunately, this kind of reincarnation can indeed be broken..."

Su Yu suddenly murmured to himself.

Although he hadn't succeeded, he knew that this reincarnation could definitely be broken and escaped from.

The current Azure Star System is proof!

In theory, everything in a space-time reincarnation should ultimately condense into the Time-Space Origin.

But the Azure Star System broke this law, escaped from the reincarnation, and even traversed to another universe, forming the current Azure Star System.

This was the opportunity Su Yu needed!

Su Yu stopped his attempts; he already had inspiration in his heart.

This inspiration was... what is the significance of this kind of reincarnation? Could it really be the universe's "death" with meaningless "recollection" before?

"This reincarnation should be the universe seeking self-preservation!"

"Just like I was before, when facing death!"

Before, Su Yu was nearly killed by Qi Chen, thus experiencing a "flashback."

In the state of a flashback, Su Yu instantly searched through all past memories, ultimately finding the method to use the power of "paradox" taught by Song Ming, successfully breaking the situation and succeeding in self-preservation.

Perhaps, as the Azure Universe was about to be destroyed, it also initiated "reincarnation," searching for a way of self-preservation in this way.

Su Yu only searched his memories; the Azure Universe, however, reincarnated its entire space-time again and again.

Every reincarnation of the universe was real, not false memory data.

This repeated reincarnation, in theory, should be identical every time.

Like a song, no matter how it's repeated, it's the same song.

But Su Yu knew, within the infinite repetitions of reincarnation, a variable must have appeared, causing some reincarnations to differ from the others!

Like a song in a loop suddenly having new lyrics in one cycle!

This variable is the true reason the Azure Universe has survived to this day, and it is also Su Yu's path to breaking the situation.

Su Yu wanted to leave the Azure Star System and had to find the same variable!

Chapter 1055: Destructive Research

"Variable..."

Su Yu already knew that the key to leaving the Azure Star System lay in the variable.

But back in the Azure Universe, through the endless cycles of time and space, what kind of variable did they find that allowed the Azure Star System to survive? Su Yu had no idea.

However, Su Yu knew what the variable was in the current Azure Star System.

And that was himself! Su Yu!

Su Yu possessed the Profession Panel and had the [Time-Space Mechanic], and that was the greatest variable.

If he truly completed the job of being a Time-Space Mechanic, mastering time and space to break through the time loop of the Azure Star System should be a breeze.

However, the ritual of becoming a Time-Space Mechanic was far from complete.

As for crafting the Creation Machine, Su Yu was completely clueless, let alone completing it and handling the subsequent steps of the ritual.

Originally, Su Yu planned to leave the Azure Star System first, gather resources and knowledge, research the Creation Machine slowly, and then come back to settle scores with Qi Chen.

But now, it seemed infeasible. At the very least, he needed to make some progress with the Creation Machine before he could break this time loop.

But how could he conduct the research?

Su Yu truly felt at a loss.

Although he currently had a certain level of research into the powers of time and space, with the Power of Time, he had the Time Mechanic.

And in the aspect of space, he had the Manifestation Power of the Number God Mechanic.

These were Fifth-Order powers.

Yet even if he, as a Number God Mechanic, could create a seemingly perfect Manifestation Space, it still wasn't true creation, after all—just a false manifestation space, not reality, not a truly independent universe.

But how could one define a truly independent universe? Su Yu didn't know either.

At that moment, Qi Chen's voice suddenly resounded:

"Su Yu, I advise you to give up your meaningless attempts. You can't leave the Azure Star System; even I can't leave, so how could you?"

"Unless you complete the Creation Machine and revive the Azure Universe, you'll be trapped here with me forever..."

Qi Chen's voice carried a hint of laughter, as if mocking Su Yu's overconfidence.

He didn't appear in person; his voice simply emerged beside Su Yu, with no clue as to the principle behind it.

In Qi Chen's view, as long as Su Yu hadn't left the cycle of reincarnation, he would forever be under his control.

This endless cycle was enough for him to control everything.

Faced with Qi Chen's tone of being all-knowing, Su Yu's expression remained cold, and he didn't respond.

He fully deployed his spiritual power and holographic perception, trying to locate Qi Chen's whereabouts.

There was no inspiration for the Creation Machine for the time being, so why not find Qi Chen first and see where he's hiding?

However, no matter how Su Yu searched, he found no clues.

Qi Chen seemed to exist as if he didn't in the first place.

Even when Su Yu employed the Power of Time to search in the past and future, he couldn't find any trace of Qi Chen.

Using the Star Tower to scan, there was no information on Qi Chen.

"Is it another independent time and space? What's the principle?"

Su Yu had previously speculated that other parallel time spaces might exist in the Azure Star System.

But at that time, Su Yu was in a hurry to leave the Azure Star System and didn't delve into it; now he had no choice but to thoroughly investigate.

These parallel time spaces were unbeknownst to Su Yu and seemed to have independent timelines; using the Power of Time, Su Yu couldn't perceive any information from another time space.

However, earlier, when Qi Chen attempted to erode the Su Yu in another time space, it was perceived by Su Yu's true self, indicating that this time-space isolation could be broken.

Unfortunately, after that, Qi Chen no longer acted against the Su Yu in other time spaces, and Su Yu lost the sensory connection.

"Parallel time spaces..."

"It seems that in those parallel time spaces, there are also Azure Stars, also humans, and even another me."

"What's the principle behind this? What is its relationship with the cycle of time and space?"

As Su Yu searched for Qi Chen's trace, he thought intensely.

According to the time-space reincarnation model Su Yu previously established, there shouldn't be any so-called parallel time spaces.

Each reincarnation was continuous, with one cycle ending and another beginning.

But now, it seemed that was not the case.

Each reincarnation appeared to be independent, not continuous, resulting in what was known as parallel time spaces.

"However, thinking it through, there seems to be something amiss..."

"How do these parallel time spaces reincarnate? Where does the previous time-space origin stand in this reincarnation? Does each parallel time space have a different time-space origin?"

Su Yu exerted his cognitive capacity to the extreme yet could never establish a complete model of reincarnation; each thought generated more questions.

The existence of parallel time spaces was difficult to explain.

After considerable thought, Su Yu could only reluctantly put it aside.

There was too little information, and it's hard to imagine the truth from scratch.

But Su Yu giving up on thinking did not mean giving up on attempting.

He looked around and suddenly invoked his own ability: [Data Truth].

Under Data Truth, the universe void before him turned into null data.

Various underlying cosmic rules were displayed to Su Yu in the form of data.

Some of these cosmic rules were even difficult for Su Yu to comprehend, but that didn't prevent Su Yu from adjusting the [values] of these rules.

After Su Yu's adjustments, the values of these cosmic rules immediately became disordered, and their original harmony began to unravel, collapse, and disintegrate.

A Space Black Hole appeared out of nowhere in front of Su Yu and began expanding toward the surroundings.

#### Chapter 1056: Destructive Research (Part 2)

This space black hole is caused by the collapse of the Universe's underlying rules, resulting in a void where time and space no longer exist.

This is the Mechanic's ultimate skill: Data Collapse!

Previously, Su Yu used this move to force Qi Chen out.

Now, Su Yu suddenly uses this move, but has no target in sight, and Qi Chen's whereabouts are unknown, so the attack is futilely aimed at this space.

But Su Yu's intention was to attack this very space!

In front of Su Yu, the space black hole silently expanded, initially only the size of a human head. But with Su Yu's continued exertion of force, it quickly grew to a meter in diameter, then ten meters, a hundred meters, a thousand meters...

In a short time, the space black hole caused by Data Collapse had expanded to a diameter of a thousand kilometers, comparable to a small asteroid.

As the space black hole grew larger, its expansion speed increased more and more.

After a while, it had already expanded to a diameter of two thousand kilometers!

Su Yu continued to exert force; a mere two thousand kilometers was not enough.

He wanted to destroy this space! Destroy the entire Azure Star System!

Su Yu wanted to study the Creation Machine, to seek the secrets of time-space reincarnation and parallel space-time. Merely guessing would not allow him to uncover them.

Therefore, Su Yu resolutely decided, if creation does not work, then destruction will!

By destroying the entire Azure Star System, he should be able to observe some useful data.

If the internal structure and principles of something are unknown, the simplest way is to smash it, dismantle it, destroy it, to analyze and research!

Of course, such destructive "research" is generally one-time; if it fails, it's game over.

Once something is smashed without understanding the principles, it cannot be pieced back together.

But since the entire Azure Star System is in a cycle of reincarnation, destruction will only lead to restarting, so Su Yu acts recklessly and without hesitation at the moment.

If it doesn't work once, there's always the next time.

The Azure Star and its population have already been secured by him.

**Boom!**

At this time, the space black hole resulting from Su Yu's persistent exertion had expanded to the same size as the Azure Star!

At this scale, its expansion speed had become astonishingly fast. The chain reactions triggered by the Data Collapse no longer required Su Yu's maintenance and would autonomously expand in all directions.

Not to mention, Su Yu was constantly using the Mechanic's power to accelerate the collapse.

This intense and rapid time-space collapse generated strong spatial fluctuations, which are gravitational waves. These spatial fluctuations even created a roaring noise in Su Yu's ears, like thunder.

This is a sound only he can hear. Ordinary Transcendents would be crushed by these strong gravitational fluctuations instantaneously, but to Su Yu, they are merely thunderous noises.

This is the lament at the world's end.

"Not bad..."

Su Yu nodded with satisfaction as he looked at the massive black hole he had created with his own hands.

[Data Collapse] is not Su Yu's most powerful move at the moment, but it is the only ability capable of world destruction.

This kind of destruction is very thorough, collapsing and annihilating even the most fundamental time-space.

Other powers, no matter how strong, at best target specific "matter" or "energy."

For example, shattering a planet into pieces, or even into basic particles, is genuine destruction.

But it is far from being as thorough as the destruction caused by Data Collapse.

Using the power of Data Collapse, with enough time, while destroying the Universe might be too ambitious, destroying a star system is effortless!

Su Yu wanted to see what would happen when this destructive black hole reached the edge of the Azure Star System.

"Stop! What are you doing?!"

At this moment, Qi Chen's voice emerged again from an unknown hiding place.

This time, Qi Chen's voice was no longer calm as before, but filled with urgency and anger.

Su Yu had anticipated Qi Chen's appearance.

The last time Qi Chen appeared was because Su Yu used Data Collapse.

It was evident that Qi Chen cared deeply about this time-space destructive move.

And this time, the scale of Data Collapse far exceeded the last, so Qi Chen could not remain patient.

Su Yu did not remain silent and coldly replied, "Can't you see? I want to destroy this star system!"

"Stop, the Azure Star System is the remnant of the Azure Universe. Destroying it is equivalent to destroying the hope of the Azure Universe's resurrection!"

"Aren't you the Ultimate Savior? Why are you doing this?"

"Stop!"

Qi Chen's tone was even more frantic with rage.

But Su Yu ignored him, concentrating on driving the Data Collapse to swiftly incorporate the entire Azure Star System.

By this time, the black hole resulted from Data Collapse had expanded another tenfold in diameter.

However, it still fell far short of Su Yu's goals.

The entire Azure Star System's seal is multi-layered.

The first layer is Zhang Chenfeng's creation in orbit a thousand kilometers above the planet's surface.

The second layer is ten million kilometers outside the planet. The first time Su Yu left the atmosphere, he used the Power of Time to peer into the future, only to find that future vanished after just leaving the Azure Star by ten million kilometers.

But just recently, Su Yu flew multiple times without detecting this second layer of the seal, presumably because it was ineffective against his superluminal flight, or perhaps because the Azure Star had been secured, the seal no longer had a basis.

The third layer is twenty billion kilometers away, where the cycle merely returns to the start.

Su Yu wanted to destroy the Azure Star System, at least by extending Data Collapse to a diameter of twenty billion kilometers.

It's truly a massive undertaking.

Not to mention, Su Yu suspects there are other seals beyond the third layer.

After all, if considered according to the gravitational scope of the Azure Star System's constant star, it might be a light-year in diameter.

That would be even more troublesome, and it's unknown how long it will take.

But Su Yu was steadfastly determined; even if it required a diameter of one light-year, he would destroy it!

So Su Yu continued tirelessly using Data Collapse to accelerate that space black hole.

Soon, its diameter was comparable to a constant star, a constant-star-level space black hole! How magnificent is that?

In front of such a thing, Su Yu seemed insignificant.

But such a magnificent object was created by Su Yu himself!

Looking at the terrifying space black hole, Su Yu couldn't help but sigh internally, amazed at his own strength.

However, before he could be too complacent, he suddenly sensed danger.

"Oh no!"

Su Yu quickly retreated at the speed of light, away from the space black hole.

Sure enough, as soon as he left, the space he had previously occupied was engulfed by the space black hole.

If Su Yu had retreated slower, he might have been consumed.

"Truly terrifying..."

Though Su Yu created this space black hole, it had now completely spun out of control. It no longer required Su Yu's maintenance and continued to expand at high speed, and even Su Yu had difficulty resisting its power.

If Su Yu got sucked into it, he would die!

Like humans creating a weapon that can kill its creator, this space black hole was created by Su Yu, a weapon to destroy the world.

It could destroy the world and destroy Su Yu!

However, Su Yu was unconcerned, for after all, he possessed the true Evil God Undying.

He even wanted to see if, after time-space destruction, the Evil God could still be undying and where it would resurrect.

Su Yu did not step too far from the space black hole, carefully staying nearby to observe its various data.

He created the space black hole to destroy time-space for data observation.

Although true destruction had not yet been achieved, he could already observe some phenomena.

"So that's how it is. The Universe's underlying rules I previously observed using Data Truth were not complete, and Data Collapse did not cause all rules to collapse either."

"But now, with the space black hole's expansion, more rules have been encompassed, some of which are beyond my reach and observation yet are also collapsing at the same time! Therefore, the power of collapse is increasing, and even I find it hard to withstand..."

"These hidden universe time-space rules might be the key to the Creation Machine! Destructive research is indeed useful!"

Su Yu grew more excited the more he observed.

At this point, Qi Chen's voice slowly emerged, "I understand now, you are not the Ultimate Savior at all!"

"You are the Destroyer!"

Chapter 1057: Researching and Deconstructing, Revealing the "Truth" of the Universe

In Qi Chen's view, what Su Yu is doing right now is not something a Savior could possibly achieve.

Just like Song Ming, this Savior only awakens different Powers of World Salvation under various circumstances, and these powers are meant to save the world, not to destroy it.

But now, Su Yu is using his power to destroy the world.

So Qi Chen referred to him as the Destroyer.

Su Yu heard this and immediately laughed.

Then Su Yu shifted his mind and casually said, "You're right, I am the Destroyer!"

"Where there is a Savior, there naturally is a Destroyer!"

"The Azure Universe was supposed to be entirely destroyed, yet it still lingers, which is against its original fate!"

"So I was born according to this fate, to hunt down this Universe!"

Su Yu was clearly talking nonsense, as the idea of hunting down the Universe was entirely made up.

However, Qi Chen, upon hearing this, seemed to believe it: "So that's how it is! So that's how it is!"

"I knew a dead Universe wouldn't be so easily resurrected!"

"Even after experiencing death, as long as it's not completely dead, there will be a Destroyer like you coming to hunt it down!"

Qi Chen muttered to himself, and Su Yu found it somewhat amusing.

At this moment, Qi Chen continued, "However, a Savior is born from the Universe's instinct for self-preservation."

"How, then, is a Destroyer like you birthed?"

Su Yu didn't answer, since he had made it all up.

How would he know how a so-called Destroyer comes into being?

Seeing Su Yu not answering, Qi Chen continued to talk to himself: "Could it be that among different Universes, there exists a certain set of common orders and rules? These rules determine the birth and death of Universes?"

"Su Yu, are you a product of these rules?"

"Am I truly doomed to destruction, destined to die? No! I must be resurrected!"

Su Yu still did not answer him, letting him indulge in his wild thoughts.

However, some of the terminology Qi Chen used just now was keenly captured by Su Yu.

"Did Qi Chen just say 'me'?"

Su Yu thought silently.

Both salvation and destruction are aimed at the Azure Universe, not any specific individual.

But Qi Chen just said, "Am I truly doomed to destruction."

This "I" referred to whom?

"It seems that Qi Chen is indeed no longer who he originally was."

"He is no longer Zhang Chenfeng, nor the dark side of Zhang Chenfeng, but rather... the remnant will of the Azure Universe!"

"Has he merged with the Azure Universe after death? Or rather, been absorbed by the Azure Universe?"

"No wonder he seemed off."

Su Yu speculated that Qi Chen now embodies the will of the Azure Universe.

The Azure Universe might not have had self-awareness originally, only some kind of instinct.

But now this Universe has found itself a "brain," an "organ" for thinking.

Qi Chen is that organ.

It was only now that Su Yu confirmed what exactly had been opposing him and what he had been fighting against.

It was not the dark remnant of Zhang Chenfeng, but the will of the Azure Universe!

No wonder this guy was elusive; even Su Yu couldn't find where he was.

Strictly speaking, Qi Chen is the Azure Universe and the Azure Star System.

And now that Su Yu is within the Azure Star System, it's equivalent to being inside Qi Chen's body, which naturally makes him undetectable.

It's not that Su Yu really couldn't find him; it's that Qi Chen is everywhere.

Azure Star, Cosmic Vacuum, even Subspace, everything is a part of Qi Chen's body.

However, Qi Chen's control over this "body" might not be very strong.

If it were, Su Yu would have been found by Qi Chen long ago while hiding in the Subspace Deep Layer.

This is also understandable; such a massive body, with a time-space diameter reaching a billion kilometers or even nearing light-years, is inherently beyond Qi Chen's will to fully control.

This thinking "organ" is ultimately a bit too weak.

Even though Qi Chen was a Fifth-Order powerhouse in life, he is still too weak.

Universal will is not so easy to wield!

"So, does that mean I am destroying his body now? Destroying his flesh? No wonder he was so anxious just now."

Su Yu inwardly chuckled.

At the same time, he continued to observe the cosmic foundational rules exposed within that Space Black Hole.

These rules are extremely concealed; even with Data Truth, Su Yu couldn't see them.

However, under the power of the Space Black Hole, those rules were revealed, exposed directly in front of Su Yu for his examination.

It was like dismantling a precise Mechanical Creation, with all its components exposed.

The more he observed, the more amazed Su Yu became.

Previously, the cosmic rules Su Yu saw were only the basics like light speed, gravity, space curvature, relativity, quantum fluctuations, and so forth, with only a slight glimpse at rules concerning time, cause and effect.

What he sees now involves deeper and more obscure rules.

Rules so profound that even Su Yu couldn't name them, yet they reveal the basic composition of the Universe.

Just like matter in the Universe, which macroscopically exists as solid, liquid, and gas states, while at a microscopic level it has crystal structures, molecular structures, and even further down the atomic structures, Basic Particles, and so on.

The deeper you go, the closer you get to the truth.

Now Su Yu is utilizing the foundational rules exposed during the world's destruction by the Space Black Hole to deconstruct the Universe and uncover its "truth."

Thereby providing theoretical support for his research on the Creation Machine.

Meanwhile, as time progresses, the Space Black Hole, which had already become comparable to a Constant Star, doubled its diameter again, with its gravitational pull becoming even stronger than a Constant Star.

Chapter 1058: Researching Deconstruction, Restoring the Universe's "Truth

Thus, everything in the entire Azure Star System began to be attracted by this Space Black Hole, including the remaining planets and even that one Constant Star!

At this moment, Qi Chen could no longer hold it in.

"Enough!"

Bang! A boundless giant hand descended from the sky, reaching for the massive Space Black Hole.

The Space Black Hole had already grown larger than the entire Constant Star, but this giant hand was actually bigger!

The hand was not made of ordinary matter or energy but was formed from warped space, appearing invisible and shapeless, visible only under the illumination of the Constant Star's light.

This was Qi Chen making his move!

"As expected, Qi Chen is using the entire Azure Star System as his body, and this cosmic vacuum is his flesh and blood!"

Seeing this unbelievably large hand, Su Yu couldn't help but marvel internally, confirming the previous hypothesis that Qi Chen was indeed the will of the Azure Universe!

However, after the astonishment, Su Yu turned to a sneer, "What use is being merely large?"

The space hand was already enveloping the entire Space Black Hole, yet Su Yu remained nonchalant.

After encasing the Space Black Hole, the giant hand abruptly tightened.

The act of tightening was beyond conventional sense.

Rather, it involved infinitely increasing the space curvature, performing spatial compression, isolating this Space Black Hole from the surrounding time and space.

Su Yu watched as the giant hand tightened, getting smaller and smaller.

From initially being larger than the Constant Star, it quickly reduced to about the size of a planet, then continued to shrink further.

Compressing it like this should be able to squish it into a volume-less "point," completely disappearing from the Azure Star System.

However, before reaching that step, black spots started appearing on the giant hand.

"This giant hand is also part of space and time, and cannot avoid collapse!"

Su Yu nodded inwardly, as he had anticipated this result long ago.

The black spots on the giant hand spread rapidly, occupying the entire palm in a brief time.

Upon seeing this, Su Yu silently retreated.

A moment later, bang!

The giant hand completely shattered, and the extremely compressed Space Black Hole violently rebounded and expanded, not only regaining its original size but, with the momentum of this rebound, grew several times larger!

If Su Yu hadn't reacted quickly, he would've been devoured by this thing.

The Space Black Hole that had become several times larger emitted an even stronger gravitational pull!

Bang!

The remaining planets in the entire Azure Star System, along with a Constant Star, were affected by this powerful attraction, flying towards the Space Black Hole.

As they flew, they spun around the Space Black Hole.

At this moment, the Space Black Hole was the core of this star system.

"Damn it! Why is this happening!"

"Su Yu, go to hell... stop it, you damned thing..."

Seeing the plan to seal the black hole with the space hand fail, Qi Chen immediately erupted in furious curses.

He obviously didn't know the truth of the Number God Mechanic or the strong capability of [Data Truth].

Upon hearing this, Su Yu immediately realized Qi Chen was out of options.

The previously unbelievable giant space hand should have been his full effort.

Even though Qi Chen was the will of the Azure Universe, he himself was already a dead man, and the Azure Universe was also a deceased universe, thus the power he could wield was limited.

In the face of Su Yu's apocalyptic actions, he seemed utterly helpless.

Hearing Qi Chen's raged cursing, Su Yu laughed instead of getting angry.

This kind of impotent fury could only prove his helplessness.

"Tsk tsk, throwing such a fit; the original Zhang Chenfeng shouldn't have this kind of personality."

"So, is this the personality of the Azure Universe? But this universe's temperament seems not very good. However, since he's the universe's will, we can't judge him by human standards. Maybe he's considered mild-tempered among the universe..."

While analyzing in his heart, Su Yu was contemplating whether this furious guy was displaying Zhang Chenfeng's personality or the will of the Azure Universe?

At that moment, Qi Chen calmed down and said coolly, "What exactly is this power of yours! The first time we met, it wasn't this strong, I didn't expect it to develop to this extent."

"Why can a mere Fifth-Order actually wield this apocalyptic level of ability!"

Hearing this, Su Yu casually replied, "This is the Power of World Destruction I awakened; how does it feel?"

Su Yu would certainly not reveal the truth about the Number God Mechanic to Qi Chen.

If he told Qi Chen that the Number God Mechanic was actually not a Fifth-Order Profession, but a Fourth-Order, would he even believe it?

However, speaking of it, the Number God Mechanic is indeed powerful, truly worthy of the word "God."

The newly unlocked professions on the Profession Panel are each stronger than the last.

Hearing this, Qi Chen paused in silence, then coldly said, "Indeed, very strong!"

Su Yu felt something was off in his tone and asked, "What are you planning to do?"

Qi Chen remained silent, seemingly plotting something.

At this time, all the remaining planets in the entire Azure Star System were swiftly approaching the Space Black Hole, spiraling as if they were about to fall into the black hole.

The scene looked extremely spectacular.

If all these planets fell in, the entire star system would no longer have macroscopic matter, leaving only the cosmic vacuum.

Bang! Bang! Bang!

The sound of gravitational waves reverberated in Su Yu's ears.

Planets were continuously falling into the Space Black Hole.

When those planets fell into the black hole, it was like throwing boulders into water, creating huge "splashes," allowing Su Yu to see more cosmic underlying rules.

Su Yu watched intently, knowing that Qi Chen was certainly plotting something, and before Qi Chen acted, he needed to gather as much data as possible.

At that moment, the Space Black Hole had swollen to a hundred times the diameter of a Constant Star, so vast it was invisible from end to end.

Gigantic planets, even Constant Stars, appeared utterly insignificant in its presence, let alone Su Yu beside it.

Bo...om...

Finally, several planets had completely vanished without a trace, leaving only the most massive Constant Star as the final one to fall into the Space Black Hole.

The Constant Star accounted for more than 99% of the Azure Star System's mass, and when it fell into the Space Black Hole, the splash it stirred was exceptionally intense!

In that brief instant, it was as if a strong wind had dispelled the fog, allowing Su Yu to instantly see a multitude of cosmic underlying rules clearly.

"So that's how it is... so that's h..."

Thrilled, Su Yu was about to observe more when he suddenly sensed something was amiss!

A huge sense of crisis surged up in his heart.

"Not good!"

Su Yu stopped observing the cosmic underlying rules in the Space Black Hole and instead looked cautiously around, feeling that Qi Chen's long-prepared plan was about to unfold.

"Death!"

From the void, came Qi Chen's soft shout.

In Su Yu's heart, the sense of crisis rose to the limit.

The power of [Death] he had experienced once before descended again, but this time it was a thousand times stronger!

Endless, omnipresent [Death] surged towards Su Yu.

However, this time Su Yu's strength had also grown by leaps and bounds, so facing death, instead of being instantly obliterated like before, he mobilized all his power to resist.

This power of death, though strong, couldn't completely erode Su Yu, at least Su Yu felt he could hold out for ten or eight years without a problem.

Su Yu even felt a bit of "Is that all there is?"

If this was Qi Chen's ace up his sleeve, then it's nothing. Not to mention ten or eight years, in a few months, Su Yu could destroy the Azure Star System.

But this didn't explain Su Yu's sense of crisis, that crisis was too intense, as if it would lead him to face true death! A death that even Evil God Undying couldn't save him from.

"There must be something wrong!"

Su Yu murmured to himself, observing and analyzing with all his might, and soon he discovered that even the surrounding cosmic vacuum was "dying."

After death, the cosmic vacuum exposed a deathly black, matching the color of the Space Black Hole.

And the rate at which this death spread was even faster than the devouring of the Space Black Hole!

"What does this mean? Is Qi Chen planning to act personally, to destroy the Azure Star System himself?"

Chapter 1059: The Truth of Death

Watching as Su Yu was about to destroy the entire Azure Star System, Qi Chen acted first.

"Is this a reboot, an initiative to start a new reincarnation cycle?"

A moment later, Su Yu understood the hidden secret.

Seeing that the Azure Star System was about to be destroyed by Su Yu, Qi Chen took the initiative to destroy it first.

Then, by starting the next reincarnation cycle, he naturally restored the Azure Star System.

However, this still couldn't explain the sense of crisis in Su Yu's heart.

If the Azure Star System was rebooted, it would also benefit Su Yu; he could destroy it again to observe more data.

After all, Su Yu possessed Evil God Undying, and the destruction of the Azure Star System wouldn't harm him.

"Unless... after destroying the Azure Star System, Qi Chen doesn't plan to reboot it, letting the Azure Star System fall into complete death!"

"In this situation, without the support of cosmic time-space, even with Evil God Undying, I would also die!"

"This is the source of the sense of crisis!"

A cold glint flashed in Su Yu's eyes as he understood the source of the danger.

Normally, as long as the Azure Star System exists, Su Yu can resurrect through Evil God Undying.

But what if Qi Chen ended the reincarnation and didn't reboot it?

At that time, what would happen to the entire Azure Star System?

Su Yu doesn't know.

But it certainly wouldn't be Su Yu resurrecting outside the Azure Star System, otherwise, where would the sense of crisis come from?

It's likely that Su Yu cannot resurrect either.

After all, resurrection requires the support of some time-space, even if it's the Subspace Deep Layer, a Mysterious Land.

The Subspace Deep Layer, though time-space doesn't exist, can rely on the essence of the Fifth-Order to open up a small pocket of time-space for survival.

But if even the Subspace Deep Layer doesn't exist, then Su Yu truly has no "soil" to sustain his survival, will truly be unable to resurrect, and will face complete death.

"It seems Qi Chen is truly desperate."

Su Yu thought to himself.

Faced with the crisis of life and death, Su Yu was not anxious; instead, he felt it was Qi Chen who was desperate.

Qi Chen had always been dedicated to reviving the Azure Universe, and each reincarnation cycle had been for this goal.

But now, Qi Chen was forced by Su Yu to close the cycle actively, ceasing any rebooting, which must require a significant cost, perhaps an immense cost; otherwise, Qi Chen wouldn't have dragged on till now to act.

Nonetheless, this move is indeed ruthless, enough to truly kill Su Yu.

At this moment, Qi Chen's eerie voice rang in Su Yu's ear again: "Su Yu, you will accompany the Azure Star System into the world of [Death]!"

"Your death will compensate for all my losses!"

Upon hearing this, Su Yu merely smiled faintly, and instead asked: "I'm curious, what is the difference between [Death] and destruction by the Space Black Hole?"

Qi Chen didn't answer, and the invasion of [Death] grew increasingly violent, leaving Su Yu with little time.

But Su Yu remained unhurried, observing the Space Black Hole and collecting data while calmly pondering.

He was thinking about what Qi Chen's world of [Death] actually was.

Why, even though Qi Chen had already died and hadn't resurrected, could he appear again?

Why was Qi Chen in such a hurry to launch [Death]?

Since everything could be restarted, no matter how Su Yu triggered a data collapse, a single reboot would bring everything back, so why the rush?

Unless the destruction caused by data collapse and [Death] is fundamentally different.

Destruction by data collapse might be some kind of fundamental destruction, such that even a reboot would struggle to restore, hence Qi Chen's urgency.

Then what is the fundamental difference between the two?

This question, Su Yu had just asked Qi Chen, but Qi Chen didn't answer; it seems this is a crucial question, possibly involving the deepest secrets of time-space reincarnation of the Azure Star System.

Su Yu had a vague feeling that if he could figure out this secret, it would greatly aid him in developing the Creation Machine!

"To uncover this secret, one must try it personally and see it with one's own eyes..."

Su Yu stood quietly in the Cosmic Vacuum, in front of him was the Space Black Hole, behind him was Qi Chen's [Death]. He resisted both terrifying forces simultaneously, motionless, seemingly able to endure till the end of time.

But after some time, the entire Azure Star System will cease to exist, leaving Su Yu without a foundation, ultimately falling into destruction.

Yet that's exactly what Su Yu was waiting for!

According to his calculations, in the instant the Azure Star System is destroyed, without the cover of time-space, various hidden cosmic rules will be exposed, and the secrets concerning reincarnation will leak out a bit.

As long as he seizes that moment, he can turn the tide!

Time ticked on minute by minute, everything in the Azure Star System had been swallowed by the Space Black Hole and [Death], all planets and even time-space vanished, leaving absolute void, absolute silence.

This is even more complete than the Power of Nihilism; Power of Nihilism in essence is still a form of energy, but the Azure Star System now has neither energy nor time-space.

The Azure Star System is down to its last bit before it will be completely destroyed.

That last bit is the space where Su Yu stands.

"This is the true nihilism..."

Looking at the void around him, Su Yu had an insight, his Nihilism Walker leveled up continuously by over ten levels.

Theoretically, if the Nihilism Walker's ability is developed to its extreme, they could walk and survive in absolute void after this time-space [Death].

Chapter 1060: The Truth of Death (2)

Thinking about reaching such a level, one would probably need to render their entire will into nihilism, which isn't much different from death.

If Su Yu's Nihilism Walker were at full level, and he unlocked the Core Specialization, he might be able to reach that state while retaining his will, but now he's still some distance away from full level, completely unable to do it.

Therefore, Su Yu still needs to maintain the time and space he is in, in order to sustain his existence.

"Su Yu, stop resisting! You're bound to die today, so why not accept it calmly..."

Qi Chen's sinister voice came again, once more adopting a tone that suggested everything was under control.

Hearing this, Su Yu turned his head to look around but still couldn't see any sign of Qi Chen. Then he smiled nonchalantly: "Fine!"

Having said that, Su Yu kept his word and astonishingly withdrew his defenses, allowing Qi Chen's [Death], the data collapse space black hole, to swallow him whole.

This was equivalent to suicide.

"You..."

Qi Chen hadn't expected that Su Yu would be so carefree, so calm in accepting death.

Originally, Qi Chen anticipated Su Yu would resist to the end, allowing him to take the opportunity to mock him and vent some anger.

But Su Yu just died, without hesitation.

This left Qi Chen somewhat baffled, could it really be that Su Yu didn't want to live anymore?

"Impossible! Su Yu is extremely cunning; there must be a plot!"

Cautiously, Qi Chen thought to himself, refusing to believe Su Yu was truly dead!

At this moment, Su Yu's body had been completely engulfed by [Death] and darkness, the time and space he was in was annihilated together.

The last vestige of time and space in the Azure Star System completely vanished, the entire system utterly destroyed.

Su Yu did not reappear, seeming to have "died" along with the destruction of the Azure Star System.

The Azure Star System did not restart, everything remained dead silent, seeming as though it would disappear forever.

Yet Qi Chen's will remained active in this absolute dead silence, tirelessly searching for Su Yu's trace, still unable to accept that Su Yu was truly dead.

However, no matter how he searched, he couldn't find Su Yu.

In the end, Qi Chen could only conclude that Su Yu was indeed dead.

"Could it be that Su Yu really didn't want to live?"

"It seems you indeed differ from that cowardly brute..."

Qi Chen pondered silently in his heart.

Then, he waited quietly.

Now that the Azure Star System had been completely destroyed, time and space no longer existed, yet Qi Chen still had some way of marking time.

He planned to wait for a year, using that time to eradicate all potential threats.

Whether Su Yu was truly dead or faking it, one year's time would ensure his absolute demise.

The reason not to wait longer was that he couldn't afford it; the longer the delay, the greater the damage to the Azure Universe. Death prolonged too much means real death with no chance of resurrection.

So, one year later...

Su Yu still hadn't reappeared, seemingly truly dead.

Qi Chen decided to restart reincarnation!

In absolute dead silence and nihilism, suddenly appeared space, time, light, stars, planets, Azure Star, human civilization, Subspace, Spiritual Energy...

Everything was back to how it once was.

But Qi Chen found something amiss.

Where was Su Yu!

In the last reincarnation, Su Yu died and should have returned to [Death], and when the reincarnation restarted, he ought to reappear on Azure Star.

Pulled out from [Death] by reincarnation, Su Yu would no longer escape Qi Chen's control and would be at his mercy.

Even at the start of reincarnation, Qi Chen could to some extent alter Su Yu's thoughts, memories, or even his fate.

That was Qi Chen's plan: whether Su Yu was "Savior" or "Destroyer", controlling this power in his hands made no difference.

But there was nothing!

Su Yu's presence was nowhere to be seen on Azure Star.

"Could it be, Su Yu isn't dead at all!"

Qi Chen was shocked and enraged, contemplating a possibility.

Only if Su Yu wasn't dead could it explain why he wasn't on Azure Star and hadn't rebooted with the reincarnation.

Impossible, how could Su Yu survive such absolute death?

Even Qi Chen himself had died and only appeared again by the Azure Universe's facilitation, let alone Su Yu?

Moreover, even if Su Yu had found a way to evade absolute death and nihilism.

Where did he go?

Then, just where was Su Yu at this moment?

The answer was... the Creation Machine!

Exactly, at the moment the Azure Star System was destroyed, Su Yu produced the Creation Machine!

...

Time returned to just before the destruction of the Azure Star System.

In that instant, Su Yu saw numerous unprecedented visions, saw the deeply hidden cosmic fundamental rules, saw the world... after [Death].

"Is this [Death]?"

A sudden realization dawned on Su Yu.

At this very moment, Su Yu was about to fall into true death; not even the Evil God Undying nor the profession panel's prompts could awaken him.

It was precisely because the death was so absolute that it allowed Su Yu to see clearly some truths he hadn't understood before.

That is... what, exactly, is [Death]?

Previously, the profession panel had told Su Yu that death was merely a "state," and even if he died, the profession panel would still bind to him.

Later on, the functionality of the profession panel confirmed this; even if Su Yu died, he could use the panel's prompts to revive, realizing the true Evil God Undying.

The emergence of Qi Chen also verified this theory, Qi Chen having always been a dead man, yet able to cause havoc everywhere.

However, Su Yu never understood the principles behind it: what does it mean for death to be just a state?

Now, Su Yu understood.

Originally, regardless of how one dies, their [Information] still exists.

No matter how completely a person dies, even if the timelines of past, present, and future wipe out everything, annihilating, with no one able to find any information about him, dead beyond death.

But, if viewed from a higher perspective, like the Universe, this person once existed, they were part of the Universe, their information recorded by the Universe.

This cannot be changed or erased.

Death merely turns a person's [Information] from an active state into a stagnant one.

Once conditions are met, this state can be reversed, transforming the person's information back from stagnant to active.

If the Universe is seen as a living being, then [Information] is the memory of the Universe.

A living being's death to the Universe is merely temporary "forgetfulness," and a slight recollection brings it back into being.

However, the Universe's "memory" is not an illusory fantasy but real matter, energy, time, and space.

The Universe's "recollection" is the true cosmic reboot, time and space reappearing.

This theory can be applied to almost everything, even the Universe itself.

The so-called "reincarnation" of the Azure Star System is the application of this principle.

By drawing on the various pieces of information that the Universe once recorded, one can recreate everything as before.

If the Universe were to be utterly destroyed, all of the information within the Universe would coalesce into one point, the so-called Time-Space Origin, finally nurturing a new Universe.

However, the Azure Star System refused to face death, so before dying, it desperately "recalled," perpetually reincarnating, finally finding a variable and surviving until now.

Previously, Su Yu's creation of data collapse and the space black hole was meant to disrupt "information," and if that information were completely disrupted, it would be impossible to recreate, equating to utter destruction.

This urgency was why Qi Chen had been so concerned before.

"So that's how it is..."

Su Yu, now in a state of returning to [Death], was being reclaimed by the Azure Universe along with his [Information], enabling him to understand all of this.

But this understanding was useless; once Su Yu's [Information] returned to death, when he was next reactivated, he would likely forget everything.

Though the Universe's view of [Information] certainly differs from the data that a Number God Mechanic specializes in, Su Yu believed that [Information] and data could definitely be modified!

When Su Yu's [Information] revived in the next reincarnation, who knows what Qi Chen might alter his thoughts and memories into.

"Thus, my information must not return to the Azure Universe, so... I'll create an independent Universe myself!"

"Creation Machine!"
