

## Infinite 206

Chapter 206: Yu Ping'an's Crazy Idea: The Human Brain is the Perfect Intelligent Chip!\_3

Seeing Yu Ping'an at this moment, Su Yu roughly guessed Yu Ping'an's thoughts.

"Being the son of the leader of the Wandering Village, he certainly has a more outstanding temperament than ordinary people."

Su Yu was not concerned about Yu Ping'an's minor schemes. After all, acquiring the Source Core Crystal so smoothly had already greatly surprised him.

"You may rise, no need to kneel anymore. If you have any requests, feel free to speak."

Su Yu let Yu Ping'an stand up, but Yu Ping'an remained kneeling, his head pressed firmly against the ground.

Yu Ping'an said, "Honorable Manager, I come from the Wandering Village, which was destroyed by the Ghost Wolf Riders of the Ghost Tribe. Our village was a small settlement, at peace with the world, but simply because we did not cooperate well during the Ghost Tribe's search, those Ghost Wolf Riders destroyed us to vent the side effects of the ghostly bloodlust."

"The woman who killed my father was also one of the best among the Ghost Wolf Riders, known as the Ghost Hunter—Ye Youhun. She has a special title within the Ghost Tribe and can mitigate the side effects of Ghost Energy to a certain extent."

"I saw very clearly that when she controlled my father to kill my mother and when she obliterated our village, it wasn't because of the side effects of Ghost Energy. It was her true intention."

"I have no other request but to seek revenge, to avenge against the Ghost Wolf Riders and the Ghost Tribe."

"In this life, I have but one thought left, to eradicate every member of the Ghost Tribe."

Yu Ping'an's voice was filled with deep hatred.

The pain and hatred from the Ghost Tribe's slaughter of his parents and the annihilation of the Wandering Village consumed Yu Ping'an's life.

Hearing this, Su Yu frowned.

Although he knew he would eventually face the Ghost Tribe, now was not the time.

The mark left on him by the unknown being Li He worshipped seemed inextricably linked to Ghost Energy.

The Ghost Tribe's recent activities and Yu Ping'an's mention of their search for someone indicated that they were connected to the unknown entity Li He believed in.

As Su Yu hesitated, he heard Yu Ping'an speak again, "I do not seek the Honorable Manager's help for my revenge."

"For revenge, I prefer to rely on myself."

Su Yu, hearing this, perplexedly asked, "Then what do you mean?"

"Honorable Manager, I am but an ordinary person. I have not become a Transcendent over the years, and even if I do, I know my talents will not be enough to destroy the entire Ghost Tribe."

"Only in the Seventh-Three Sanctuary, under your leadership, do I see the hope for revenge."

With these words, Su Yu understood.

"Artificial body, is it? Yu Ping'an wants Artificial Body Transformation?"

"But even with a full body transformation, Yu Ping'an is still just an ordinary person. Achieving the power to fight the Ghost Tribe will be difficult," Su Yu thought.

Then, Su Yu said, "Artificial Body Transformation has limits. You are just an ordinary person."

Su Yu was about to decline Yu Ping'an's request for another one when he heard Yu Ping'an say, "No, I do not merely seek Artificial Body Transformation."

"The Honorable Manager possesses powerful mechanical technology and is an Extraordinary Mechanic, a figure even the entire Ruins Star rarely sees." Yu Ping'an flattered, neither too much nor too little.

"However, I know that the power of Intelligent Mechanical Creations is linked to the grade of Intelligent Chips. But Ruins Star, because of wartime radiation, has lost much technology. Highly advanced Intelligent Cores are unattainable, and Intelligent Chips have become rare resources."

Yu Ping'an's forehead remained glued to the ground, but his expression turned a bit deranged.

The fire of revenge had long consumed his heart.

For revenge, Yu Ping'an's determination was stronger than anyone's, reaching the point of madness.

He was willing to sacrifice everything for revenge!

"Even if the Honorable Manager possesses numerous advanced, even top-tier Intelligent Chips, the creations made still have limitations."

Yu Ping'an was unaware that after providing the Source Core Crystal, Su Yu no longer needed Intelligent Chips as urgently.

But Yu Ping'an was correct; after creating two Superior Intelligent Machines with two high-grade chips, Su Yu found this to be a limitation.

The cavalry used low-grade Intelligent Chips, so their maximum strength was at the two-star peak.

Even with better weapons, only lethality could be improved; computational power couldn't enhance, leading to unmaximized weapon power and possibly causing Intelligent Chip overload and spoilage.

Otherwise, Su Yu would have turned the cavalry into roving arsenals.

Even Special Grade Intelligent Chips max out at creating five-star Mechanical Creations.

The grade of Intelligent Chips limits the capabilities of Mechanical Creations.

Aside from beings like Nuonuo who have become Mechanical Life, most Intelligent Mechanics face this limitation.

Seeing Yu Ping'an's crazed state, a nearly unbelievable thought formed in Su Yu's mind, "This boy, can't be..."

Yu Ping'an then lifted his head, looking at Su Yu.

Among the madness displayed, his eyes burned with a fierce flame of revenge.

Yu Ping'an, with a calm, emotionless tone, said, "There is a way to overcome these limitations while giving Intelligent Mechanics almost unlimited computational power and near-human thinking ability—using the human brain."

"I have just one request: please, Honorable Manager, use my brain as the Intelligent Core, implant an Intelligent Chip in my brain to wipe out my consciousness, control my brain, and magnify my brain's computational power."

"Honorable Manager, you could thus create an Intelligent Mechanic of unparalleled power and no constraints!"

"I am willing to attempt this possibility, as long as the Honorable Manager, upon success, uses this Intelligent Mechanic to destroy the Ghost Tribe."

With that said.

Yu Ping'an bowed his head again.

"I beseech the Honorable Manager to grant this request!"

Chapter 207: The Terrified Nuonuo, Chip Manufacturing Equipment! Monthly Production of 60 Superior Intelligent Machines!

Su Yu looked at Yu Ping'an, who was kneeling on the ground at this time, and was also shocked by Yu Ping'an's madness.

"This kid really dares to think, using the human brain as an intelligent chip..."

"This is completely different from artificial body transformation. Even if you transform the whole body in artificial body transformation, you still retain a brain to control the body in a human way."

"Members of the Sanctuary's hunting team, apart from ordinary people seeking power, choose body transformation; those wounded fighters would opt for artificial body transformation, and they only modify limbs at that."

"Most of the remaining people prefer to exchange for mechanical weapons to enhance their own strength, rather than undergo artificial body transformation."

"But Yu Ping'an, he treats the human brain as a material, as a part of the intelligent mechanic..."

"This is truly insane."

Su Yu thought to himself.

"Although when lacking intelligent chips, I also thought about using the human brain as part of the intelligent chip, but there are too many problems. Apart from the potential conflict between human consciousness and the intelligent chip, just the transformation process—who would let you modify their brain without resistance."

"Moreover, the process of implanting an intelligent chip into the human brain would be extremely painful, beyond what an ordinary person can endure, and any slight mistake can lead to death."

"However, given Yu Ping'an's vengeful heart for proposing this transformation plan, if we were to really transform his brain, he might not resist and might endure the pain of transformation."

Looking at Yu Ping'an kneeling, Su Yu remained silent, but soon, Su Yu cast aside such terrifying thoughts.

At this moment, the entire courtyard was silent.

Even Nuonuo, who originally hovered beside Su Yu, stopped and perched on Su Yu's shoulder.

"噤\_噤"

"Master, this person is terrifying."

Nuonuo's small expression on the white sphere changed, seemingly frightened, curling up on Su Yu's shoulder, not daring to look at Yu Ping'an at the moment.

After saying his piece, Yu Ping'an didn't speak again, silently kneeling in front of Su Yu.

As for Nuonuo's actions, Yu Ping'an didn't care. In Yu Ping'an's view, Nuonuo was merely a mechanical pet raised by Su Yu.

Su Yu patted Nuonuo to comfort it, then looked at Yu Ping'an at the moment, also feeling a headache.

"The Ghost Tribe destroyed everything of Yu Ping'an, leading to his extremely strong desire for revenge, which is normal. But previously, Yu Ping'an didn't have the ability to seek revenge until he came to Shelter No. 73 and saw the hope of revenge through artificial body transformation and my technology."

"I must say, Yu Ping'an's idea is feasible."

Su Yu thought for a moment and then understood.

"I don't know the exact computational power of the human brain, but it's certainly far beyond a Special Grade Intelligent Chip. Using the human brain as a supplementary material for an intelligent chip significantly boosts computational power."

"In this way, all that's needed is to build a large mechanical creation and stack many weapons, forming a mobile arsenal, and this mechanical creation's strength can reach a terrifying level."

"Such a mechanical creation is enough to dominate the entire battlefield. Even if it can't eliminate the Ghost Tribe's experts with heavy firepower, annihilating ordinary Ghost Wolf Riders and the Ghost Tribe itself is not difficult."

"However, ultimately, it's too inhumane, and there are too many uncontrollable factors."

Su Yu looked at Yu Ping'an at this moment and said, "This plan is unrealistic."

"The transformation process will be extremely painful, not to mention whether you can endure it; even if the transformation is successful, I'll find it hard to erase your consciousness while maintaining the complete cognitive ability of the human brain."

"Let's not bring this up again."

"Find another condition."

Yu Ping'an gritted his teeth, raised his head, and showed some reluctance on his face, but he also knew there were too many uncontrollable factors in his idea.

Su Yu's unwillingness was quite normal.

But Yu Ping'an still gritted his teeth and said, "Subordinate only has this one request, to avenge the Ghost Tribe, just this one..."

Yu Ping'an clenched his fists, and his nails, due to excessive force, pierced his palms, with scarlet blood dripping from them.

Su Yu thought about it, and ultimately, considering Yu Ping'an's offer of the Source Energy Crystal and his character, aside from the obsession with revenge, he was pretty decent otherwise.

Su Yu still gave Yu Ping'an a choice: "I can give you another choice. I can perform full-body artificial body transformation for you, retaining only the head, and implant multiple intelligent chips into your body for assistance."

"This way, although it's not as effective as directly converting the brain into an intelligent chip, it can allow you to exert four-star primary combat power, as a reward for offering the Source Core Crystal."

"Moreover, as long as you join the hunting team in the future, constantly serve the Sanctuary, and accumulate contributions, when my mechanical technology further improves, it wouldn't be impossible to craft a stronger artificial body for you."

Yu Ping'an's character and temperament are much stronger than Lang Yun and Hu Wen. The Sanctuary, currently short-handed, needs talents like Yu Ping'an.

Moreover, Su Yu always had a destined battle with the Ghost Tribe, and in Su Yu's view, Yu Ping'an's vengeful heart towards the Ghost Tribe was not a problem, and even had more utility value.

And Yu Ping'an also sobered up from his previous madness, realizing that this was the best option he could get.

Chapter 208: The Terrified Nuonuo and the Chip Manufacturing Equipment! Monthly Production of 60 Superior Intelligent Machines!\_2

At this moment, Yu Ping'an nodded and said, "Alright, Master Administrator."

"I am willing to follow your arrangements, join the hunting party, and serve the Sanctuary."

Su Yu nodded and then said, "You should go back first. Come back tomorrow, and I will craft a set of prosthetics for your entire body except for your head."

"Additionally, I also have a bad impression of the Ghost Tribe, and with the development of the Sanctuary, sooner or later, they will notice us. So I hope you can temporarily set aside your thoughts of revenge."

Although Su Yu didn't state it explicitly, his words were like a strong stimulant injected into Yu Ping'an, who currently had nothing but a heart full of vengeance.

"Yes, Master Administrator!" Yu Ping'an stood up and then left Su Yu's courtyard.

As for Su Yu, he patted Nuonuo at that moment, signaling for Nuonuo to come down from his shoulder.

At this time, Nuonuo, seeing Yu Ping'an leave, floated again beside Su Yu.

Nuonuo asked Su Yu, "Master, that person is really frightening. Clearly, he is already a living being, yet he wants to turn into something dead."

"It's truly terrifying."

In Nuonuo's view, the brain transformation plan for Yu Ping'an wasn't inherently frightening, nor was Nuonuo afraid of that.

What Nuonuo feared was the frightening process of transforming from a living being back into a cold mechanical creation.

"Nuonuo, in the eyes of some people, certain things must be done, even if it comes at a great cost or even life itself; it's worth it." Su Yu reassured Nuonuo once again.

As a newly born mechanical life, Nuonuo was already an independent small life form.

Due to the bond with the Steel Spirit, Nuonuo had long been bound to Su Yu.

To Su Yu, Nuonuo was like his offspring, worthy of nurturing and protection.

Upon hearing Su Yu's words, Nuonuo was a bit confused, but soon enough, Nuonuo understood.

"Master, I understand now! Just like how I want to help and protect you always, willing to sacrifice my life, Yu Ping'an feels the same about revenge." Nuonuo said cheerfully.

Hearing this, Su Yu felt warmth in his heart and then reached out his left hand to Nuonuo.

At this moment, a smug smile spread across Nuonuo's face.

But the next moment, the smile was interrupted.

Su Yu's outstretched left hand pinched Nuonuo's small metal ear poking out of the white sphere.

"Nuonuo, next time don't say such unlucky things, repeat after me, ptoo ptoo ptoo." Su Yu's expression was extremely serious, as if he was discussing something of utmost importance.

"Huh?" Nuonuo was taken aback for a moment, but still mimicked Su Yu, saying, "Ptoo... ptoo ptoo ptoo!"

...

After playing with Nuonuo for a while.

Su Yu took out the Source Core Crystal provided by Yu Ping'an.

"Nuonuo, stop playing, it's time to start working."

"Yes, Master!" Nuonuo floated up and down twice, nodding its round body in the air.

Then, Nuonuo flew to the courtyard, using spiritual energy to control and bring the materials needed to build a small intelligent chip manufacturing device to Su Yu.

Su Yu had long wanted to craft a small intelligent chip manufacturing device, but had been lacking the crucial Source Core Crystal.

These materials had been kept in the courtyard all along.

"Finally, I can craft it." Su Yu used spiritual energy to take over this batch of materials.

With Nuonuo's assistance, he began to manufacture the small intelligent chip manufacturing device.

Soon.

In no time, Su Yu successfully crafted the small intelligent chip manufacturing device.

Gazing at the device resembling a printer before him, Su Yu focused his eyes on it.

Soon, the information about the device appeared before Su Yu's eyes.

[Small Intelligent Chip Manufacturing Device]

[Manufacturer: Su Yu]

[Grade: Superior]

[Effect: Produces a single intelligent chip, can operate for one hour daily. If exceeded, the Source Core Crystal will overload and shatter, requiring a 23-hour recovery period for each overload. Daily chip production level can be chosen: ten basic chips, five intermediate chips, or one advanced chip can be produced daily.]

Seeing these attributes, Su Yu furrowed his brow but remained somewhat satisfied.

"It seems that the Source Core Crystal's size is still too small and easily overloads. Even with the device upgraded to superior grade, the number of chips it can produce is still too few."

"However, it still addresses my urgent needs."

"Moreover, I still have Nuonuo!"

With this in mind, Su Yu immediately spoke to Nuonuo by his side.

"Nuonuo, perform a mechanical fusion with this device."

Upon hearing Su Yu's command, Nuonuo immediately transformed into numerous white mechanical parts, enveloping the entire device.

At this moment, the attributes of the small intelligent chip manufacturing device in Su Yu's eyes also changed.

[Effect: Produces a single intelligent chip, with the daily production level selectable: twenty basic chips, ten intermediate chips, or two advanced chips can be produced daily.]

Nuonuo's mechanical fusion is a powerful capability that allows the fusion with any mechanical creation.

With Nuonuo's fusion at this moment, the production output of the device doubled as well.

"Two advanced chips per day, combined with the Sanctuary's abundant production of Tungsten Blood Steel and Sea Blue Source Crystal, along with the abundance of Steel Giant Scorpion and Crystal Giant Scorpion shells, means I can build the shell for at least sixty intelligent mechanics, which implies that in a month, I can accumulate sixty superior four-star top-notch intelligent mechanics!"

Chapter 209: The Terrified Nuonuo, Chip Manufacturing Equipment! Monthly Production of 60 Superior Intelligent Machines!\_3

"Although the subsequent creation of intelligent machines will decrease in quality due to the depletion of shells, sixty units are already sufficient!"

"Thirty Steel Defenders creating a steel flood can withstand any frontal attack. The powerful hunting ability of thirty Shadow Hunters is enough to become the enemy's nightmare!"

"Continuously researching stronger mechanical creations and mass-producing them, this is the development path of a Legion Mechanic!"

Su Yu was filled with immense joy.

He didn't plan to use this precious manufacturing equipment to create basic chips; that would be too wasteful.

Twenty two-star top-level cavalry are probably no match for a single four-star top-level Steel Defender.

"The cavalry and those five ordinary Defenders can be given to the hunting team and the Sanctuary for daily protection and hunting assistance. Of course, I'll keep the core control, so I can take over whenever needed."

"Those mechanical creations, constrained by the level of intelligent chips, have already somewhat fallen behind me."

"And a new mechanical battle group composed of sixty four-star top-level intelligent machines can fully exert even greater power."

"Combining with my various skills and core abilities, this new battle group of sixty superior-level machines can defeat or even kill a six-star Transcendent."

"By then, I can make a preliminary attempt to probe some information about the Ghost Tribe."

Su Yu was filled with immense joy.

"Previously changing professions to a Foundation Profession made me a Transcendent; changing to a first-tier profession gave me the strength to confront Li He, and now, after changing to the second-tier Legion Mechanic, I've welcomed a whole new transformation."

"It seems that each time a higher-tier profession is unlocked on the profession panel, it's a huge opportunity for transformation."

"However, to unlock a third-tier profession, just being a Legion Mechanic might not be enough. Anyway, there's no need to think so far now, since the Legion Mechanic isn't at the max level yet."

Su Yu shook his head, quickly shaking off the clutter in his mind.

"Nuonuo, let's start today's manufacturing."

"Alright, Master." Nuonuo, merged with the equipment, responded.

Soon, with Nuonuo's blessing, two advanced chips were manufactured.

These two chips, Su Yu did not create superior intelligent machines but put them aside instead.

"The materials piled up in the yard are almost depleted, not enough for manufacturing. We can only wait for the minerals from the Sanctuary to be delivered again, and both mining and smelting take time, so even if the Sanctuary works at full capacity, it won't be until tomorrow."

"The manpower at the Sanctuary is still too limited for my development."

Su Yu thought and planned to integrate these two advanced intelligent chips into Yu Ping'an's artificial body tomorrow.

"Yu Ping'an, since he is from the Wandering Village and has been a Scavenger for a while, he can entirely recruit manpower from the wilderness."

...

A night passed quickly.

Yu Ping'an once again arrived at Su Yu's courtyard.

Su Yu looked at Yu Ping'an at this moment and spoke, "The process of full-body transformations, though not as painful and cruel as the implantation of an intelligent chip into the brain, is also quite painful."

"Moreover, to maximize your strength, I will try to retain all your nerves and implant them into the artificial body. To ensure nerve activity, no anesthetics can be used during the entire process; the pain you endure won't weaken in the slightest and will persist throughout."

"Prepare yourself."

After speaking, Su Yu glanced at Yu Ping'an's determined expression, knowing he was ready.

At that moment, Spiritual Energy operated, and a large number of mechanical parts were implanted in Yu Ping'an's flesh in batches by Su Yu.

Gradually replacing the existence of Yu Ping'an's flesh.

Throughout the process, a large amount of flesh was stripped from Yu Ping'an's body, and the preserved nerves brought continuous pain upon implantation into the artificial body.

Yet Yu Ping'an gritted his teeth, his expression fierce but never uttering a sound.

"Father, Mother, this is my only chance for revenge. I will not miss it, and I will endure to witness the day the Ghost Tribe is destroyed!"

"This is the opportunity granted by the Manager, merely an artificial body transformation, and I will hold on. I will succeed!"

Yu Ping'an's heart was left with only vengeance, but this belief in revenge had long made Yu Ping'an's temperament extremely resilient.

Soon, all of Yu Ping'an's body except for his head was replaced by the artificial body by Su Yu.

The two advanced intelligent chips were also implanted into Yu Ping'an's chest artificial body by Su Yu.

They can help Yu Ping'an utilize the power of the artificial body.

Seeing Yu Ping'an's unyielding resolve from start to finish without shouting, a trace of admiration flashed in Su Yu's eyes.

"Alright, it's over. Get up and see if there's any problem."

Hearing this, Yu Ping'an stood up and adjusted to this new body.

Yu Ping'an moved the artificial body, swiftly maneuvering around the courtyard.

"It's actually reached four-star advanced strength? This kid's perseverance was worth it, not a waste of effort. The Sanctuary finally has someone usable."

Su Yu analyzed Yu Ping'an's current strength, feeling satisfied.

Feeling the powerful energy surging inside his body, the ever-resilient Yu Ping'an finally couldn't help feeling like crying, with two lines of hot tears streaming from his eyes.

"Father, Mother, if I had this kind of strength back then, would I have had the chance to save you..."

However, after Yu Ping'an's tear ducts squeezed out those final lines of hot tears, no more could flow.

Yu Ping'an, whose entire organs had been replaced by the artificial body, at that moment, lost the ability to shed tears.

He would no longer cry, nor would he hide among the crowd at the moment of his parents' death, not daring to weep.

Chapter 210: What can you offer the Federation? Is it still possible for me to join your sanctuary now?

Su Yu did not disturb Yu Ping'an at this moment.

He knew that Yu Ping'an might be releasing all those repressed emotions, saying goodbye to that past self, the one who was still a normal human.

A moment later, Yu Ping'an woke up, looking at Su Yu, still kneeling on the ground.

However, this time, all that was left for Su Yu in Yu Ping'an's heart was deep gratitude.

"Subordinate Yu Ping'an, thank you, Master Administrator, for your gift of rebirth."

"Please command me, Master Administrator."

Su Yu nodded and spoke directly, "Yu Ping'an, I've slightly improved the two blueprints you submitted earlier, reducing their manufacturing difficulty further."

"The Water Cultivation Plant System and Transport Track Vehicle are extremely important for the Sanctuary. I want you to work with the Mechanical Repair Department to mass assemble these two technologies within the Sanctuary in one month."

In Su Yu's view, these two blueprints were ones always used by the Wandering Village, making Yu Ping'an the best candidate for the task.

Then, Su Yu continued, "Moreover, since you have reached the combat power of a Four-Star Advanced, you are considered strong among the combat personnel of the entire Sanctuary. You can select the people you need from the members of the Sanctuary to form the Fourth Hunting Team, and you may go to the wilderness to recruit Scavengers and refugees similar to you. This is the first task for the Fourth Hunting Team."

"I give you a month."

"In one month, I want to see results, and you will have new tasks after one month."

Hearing Su Yu's words, Yu Ping'an nodded and replied, "Yes, I will surely complete the tasks given by Master Administrator."

After speaking, Yu Ping'an then took his leave.

Su Yu, on the other hand, glanced around the courtyard. Although this courtyard had been expanded by Su Yu several times, it was already very large.

However, thinking about the sixty Superior Intelligent Machines that needed to be built in the coming month, Su Yu still felt the courtyard in front of him was too small.

At that moment, Su Yu made up his mind on how to further expand the entire courtyard.

"I'll set a small goal first; in the coming month, I will max out the Legion Mechanic level and create a mechanical battle regiment composed of sixty Superior Intelligent Machines!"

...

The news of Yu Ping'an becoming the Fourth Hunting Team Leader immediately caused quite a stir in the Sanctuary.

However, Yu Ping'an soon demonstrated the powerful strength and perseverance beyond ordinary standards after his Artificial Body Transformation, gaining the approval of most people in the Sanctuary.

The Water Cultivation Plant System and Transport Track Vehicle were also easily installed throughout the Sanctuary. As a result, many hands were freed up, and the ore yield from the resource points controlled by the Sanctuary was further enhanced.

Yu Ping'an also led the newly formed Fourth Hunting Team to the wilderness to recruit refugees for the Sanctuary.

Thus, half a month slowly passed by.

...

In the courtyard of Su Yu's residence.

Thirty Superior Intelligent Machines, each three meters tall, were parked in the open space in front of Su Yu's residence.

This was the result of Su Yu's efforts over the past half month.

Not only this, Su Yu silently chanted in his heart.

"Career Panel."

The next moment, the attributes of the career panel appeared in Su Yu's eyes.

[Name: Su Yu]

[Occupation: ...Legion Mechanic lv 21]

[Current Occupation: Legion Mechanic]

[Occupation Tier: Second Tier]

[Extraordinary Level]

[Spiritual Power Star Level: Five-Star Intermediate]

[Physical Body Star Level: Five-Star Initial]

Looking at the panel, finally surpassing the Physical Body Star Level with the Spiritual Power Star Level, Su Yu sighed in his heart, "It's not easy. Over this past half month, apart from creating mechanical creations for daily needs of the Sanctuary, the massive experience provided by these thirty Superior Machines finally leveled up my Legion Mechanic to level twenty-one."

The higher the tier of the occupation, the more experience is needed to level up, which Su Yu had anticipated.

"The Legion Mechanic is already level twenty-one, and if nothing goes wrong, level thirty should be the max level for a Legion Mechanic."

"By then, a Legion Mechanic specialized in spiritual power enhancement should at least boost my spiritual power to Five-Star Advanced."

At that moment, the information notification sound from his personal terminal ended Su Yu's thoughts.

Su Yu picked up his personal terminal, opened it, and received the messages inside.

Several Hunting Team Leaders, including Bai Hong and Yang Lie from the Sanctuary, sent messages to Su Yu.

For a moment, Su Yu's personal terminal seemed a bit laggy.

"With the increase in the number of people in the Sanctuary, its core terminal ultimately cannot bear such a large data transmission," Su Yu operated his personal terminal a few times, and soon the terminal no longer lagged.

"And so much information too."

Su Yu picked up his personal terminal and began to check the messages sent by everyone one by one.

The messages from Bai Hong, Yang Lie, and others were all about resources and numbers related data of the Sanctuary.

"The current population of the Sanctuary has grown to eight thousand people? Moreover, as Uncle Yang said, the current combat personnel of the Sanctuary counts to eight hundred people, and among them, the number of Transcendents has reached three hundred."

"It's not surprising. The Sanctuary's massive recruitment of Scavengers is like Heaven for those Scavengers wandering in the wilderness."

Su Yu thought for a moment and quickly understood why the Sanctuary had developed so rapidly.
