

## Infinite 231

Chapter 231: Yu Ping'an's Decision, Azure Oath Mechanical Battle Armor! Shadow of the Phantom!

Yu Ping'an looked at the members of the Iron Heart Tribe, as they entered the Mechanical City one by one under the guidance of the AI Mechanical Spirit in their personal terminals. The thoughts in Yu Ping'an's mind became clearer and clearer.

"With the Administrator's technology, creating an intelligent AI should not be a difficult task, it's just that..."

"Obtaining the Artificial Body Transformation from the Administrator is because I offered the Source Core Crystal."

Yu Ping'an was very aware that the reason he could receive the full-body Artificial Body Transformation was entirely due to his offering of the Source Core Crystal. Now, having been part of the Sanctuary for some time, he clearly understood its operation model.

It was all about exchanging contributions for everything.

At that moment, Yu Ping'an made a decision in his heart.

"I am an ordinary person. The Administrator's mechanical technology is my only means to become stronger. Although, with the current development speed of the Mechanical City and the Administrator's formidable strength, the Ghost Tribe will eventually be eradicated by the Administrator."

"However, that woman, the woman who slaughtered my entire Wandering Village, the Ghost Hunter with a special title within the Ghost Tribe."

Yu Ping'an closed his eyes. Although his Artificial Body Transformation had deprived him of the ability to cry, the hatred in his heart never ceased whenever he thought of the Ghost Hunter who massacred his entire tribe just for fun.

"For revenge against the Ghost Tribe and that Ghost Hunter, I can't rely solely on the Administrator and the Mechanical City. I must also become stronger myself."

"Only by becoming strong enough can I ensure the death of that woman and the annihilation of the Ghost Tribe."

Yu Ping'an opened his eyes and gazed at the grand Mechanical City before him, making a decision in his heart.

"Perhaps it's time to visit my mother's hometown, to see if there are any new Source Core Crystals there..."

"In the Radiation Ghost City..."

In Yu Ping'an's memory, the relic his mother left him, the Source Core Crystal's place of origin, was precisely in the Radiation Ghost City.

As Yu Ping'an came to this decision in his heart.

In the underground of the Mechanical Hall.

Inside the Mechanical Space.

Su Yu was nearing the end of manufacturing the Mechanical Battle Armor.

A person-high Mechanical Battle Armor was now in front of Su Yu.

"This Mechanical Battle Armor was designed to simultaneously unleash my Physical Body Power and mechanical power, so it cannot be too large, otherwise it would purely become a mecha controlled by Spiritual Energy instead of a Mechanical Battle Armor."

"Only a close-fitting Mechanical Battle Armor can fully utilize both my Physical Body Power and Spiritual Energy."

Looking at the nearly completed exhibit before him, Su Yu's eyes flashed with satisfaction.

The battle armor standing before him, showed red and blue colors, with red armor covering most of the body's vital parts.

Beneath the red armor, the blue-hued internal armor added a more mysterious and powerful touch to the entire outfit.

"This battle armor has incorporated all the mechanical technology I mastered, blending the strengths of Steel Giant Scorpion and Crystal Giant Scorpion, maintaining invisibility while possessing formidable defense strength."

"Moreover, if it exits the invisibility mode, the refined carapace material from the Steel Giant Scorpion Leader can withstand even greater damage."

"Additionally, this armor has utilized a week's worth of Mechanical City's precious resources, including Tungsten Blood Steel and Sea Blue Source Crystal."

Su Yu installed a completely new superior-grade Energy Core on the chest of the Mechanical Battle Armor he made.

This Energy Core was identical to the one left by the former Administrator.

However, previously, even repairing was barely within Su Yu's capability.

And now, with enhanced technology, this new superior-grade core surpasses the former one by several times in quality.

"This new Energy Core, made entirely from Sea Blue Source Crystals, greatly outmatches the old one with the Electron Furnace, not to mention that last month's Core Specialization and Heart Blood Creation were also applied to it, enhancing its super endurance trait."

As Su Yu placed the Sea Blue Core onto the chest of the Mechanical Battle Armor, he thought silently to himself.

With the successful installation of the Sea Blue Core, the eyes on the entire Mechanical Battle Armor lit up.

[Ding!]

[You have completed the manufacturing of an excellent-grade Mechanical Battle Armor, earning three hundred thousand points of professional experience (Legion Mechanic lv28), and two hundred thousand points of skill experience...]

[Legion Mechanic level up! Steel Resonance synchronized update!]

[...]

[Congratulations, your manufactured Mechanical Battle Armor reached an excellent-grade quality!]

[Ding!]

[Detected that you have mastered Core Specialization: Heart Blood Creation, would you like to add the Heart Blood entry to this work?]

Ignoring the level-up prompt on the job panel.

Then, Su Yu looked at the battle armor before him and silently chanted in his heart.

"Heart Blood Creation!"

For these past two months, from the beginning with cornerstones in professions as a Mechanic, Su Yu's Core Specialization: Heart Blood Creation, had refreshed twice.

The previous use was on the Sea Blue Core, and this time, the newly refreshed Heart Blood Creation was used on this excellent-grade Mechanical Battle Armor.

When using Steel Spirit to enlighten Nuonuo, Su Yu also wanted to apply it, but during the Steel Spirit's transformation process, Heart Blood Creation couldn't be used, and later, when Nuonuo became a true Mechanical Life, Heart Blood Creation was even less applicable.

Su Yu's attention was wholly focused on the activated Mechanical Battle Armor before him.

Chapter 232: Yu Ping'an's Decision, Azure Oath Mechanical Battle Armor! Shadow of the Phantom\_2

Beneath the blood-red armor of this battle suit, a profound azure radiance exuded mysterious elegance, and the weapons on its back were particularly unique.

The Mechanical Battle Armor had three weapons on its back.

One of them was an electric sniper cannon with a caliber so large it could hardly be called a firearm. It was the one left behind by Su Yu's teacher. In the past two months, Su Yu had completely repaired it and further enhanced its lethality.

The other two were a chainsaw war blade and a steel shield crafted using the thickest shell of the Steel Giant Scorpion Leader as core material.

This shield wasn't large, with a diameter of one meter.

As Su Yu gazed at the Mechanical Battle Armor before him, its attribute panel finally appeared in his view.

[Mechanical Battle Armor·Azure Oath]

[Creator: Su Yu]

[Grade: Excellent]

[Trait: Steel Defense (The entire body is made from the shell of the Steel Giant Scorpion Leader, providing formidable defensive power. It can withstand a blow not exceeding six-star top level or endure a six-star primary attack for ten minutes.)]

[Trait: Perfect Amplification (While wearing the Azure Oath, the user can perfectly exhibit their physical body power and receive a perfect amplification. Limitation: The user cannot achieve perfect amplification if their physical body strength exceeds seven-star.)]

[Trait: Super endurance (Thanks to the mighty energy of the Sea Blue Core at the chest, the Mechanical Battle Armor can sustain combat for more than five days without recharging.)]

[Equipment:]

[Melee Weapon: Excellent-grade Tungsten Blood Steel Chainsaw Blade - Steel Giant Scorpion Leader Enhanced]

[Defense Weapon: Excellent-grade Tungsten Blood Steel Shield - Steel Giant Scorpion Leader Enhanced]

[Long-range Weapon: Heavy Sea Blue Electromagnetic Sniper Cannon - Crystal Giant Scorpion Leader Enhanced]

[Skills:]

[Sea Blue Core Shield: Consumes spiritual energy and battle armor's own energy to condense a shield, lasting for a certain duration. Within the shield's range, it can block up to one six-star top-level damage.]

[Shadow Stealth: Activates energy, consuming the battle armor's own energy, allowing it to enter stealth mode, sustaining until the battle armor's energy is depleted.]

[Sea Blue Burst Extreme Form: Activates all energy from the Sea Blue Core at the chest of the Mechanical Battle Armor, using it to enhance the battle power significantly, lasting for three minutes.]

[Sea Blue Burst Dawn Form: Activates all energy from the Sea Blue Core at the chest of the Mechanical Battle Armor, for a full-force attack. After one strike, the battle armor loses energy and cannot be continued.]

[Comprehensive Damage Assessment: Base five-star top level, can reach six-star top level in extreme states!]

[Comprehensive Defense Assessment: Base six-star primary, can reach six-star top level in extreme states!]

Su Yu looked at the luxurious panel of the Azure Oath Battle Armor before his eyes, feeling overwhelming surprise and joy.

"Three traits plus four skills; although there are not many skills, both the traits and the skills are incredibly practical!"

"Even in normal combat, the battle suit has a base defense of six-star primary. When activating the Sea Blue Core Shield and with my own spiritual energy amplification, its defense can at least withstand or even ignore six-star intermediate attacks."

"Moreover, in its extreme state, whether in attack or defense, it can unleash the power of a six-star top level. From what I know, this barren Dead Silence Wilderness between the Steel Jungle and the Radiation Ghost City is utterly desolate."

"Besides the Ghost Tribe, there are no stronger settlements. Even the nearby War City, a large settlement, is behind the Ghost Tribe."

Su Yu quickly recalled the information on the Dead Silence Wilderness.

"And within the Ghost Tribe, at least according to existing information, there are no transcendent beings at the seven-star level, meaning..."

"Using this set of armor, I am already invincible."

Su Yu's eyes grew brighter with joy, and the creation of this Azure Oath finally gave him a sense of security.

Without hesitation, Su Yu immediately approached the battle armor.

He activated the Mechanical Battle Armor with spiritual energy.

The armor on the Mechanical Battle Armor opened up one by one, and Su Yu immediately stepped inside.

The Azure Oath armor was tailored precisely to Su Yu's physique. As each piece of armor closed around him, Su Yu felt an unprecedented sense of comfort.

"Azure Oath, this is the most powerful mechanical creation I have made so far!" Feeling the immense strength brought by the Mechanical Battle Armor, Su Yu felt utterly secure.

"The design inspiration for this Mechanical Battle Armor came from the images in the fragments of the Radiant Mecha, that kilometer-high Radiant Mecha, and those numerous Mechanical Battle Armors fighting in the Steel City are all sources of inspiration for this Azure Oath."

Su Yu recalled the meaning behind naming this Mechanical Battle Armor.

"The term 'Azure' is to commemorate the once-glorious but ultimately vanished Azure Second Empire, and to commemorate this Ruins Star once known as Azure."

"The term 'Oath' is to never forget those mechanical creations that stood guard in the Steel City for ten thousand years. And one day, I shall uncover all the secrets of this planet and venture into that unknown Star Sea!"

"This is my oath! Azure Oath!"

Su Yu lightly swung his arms, and the arms of the Azure Oath's mecha moved in sync without any resistance, as if the entire Mechanical Battle Armor had become one with Su Yu.

Chapter 233: Yu Ping'an's Decision, Azure Oath Mechanical Battle Armor! Shadow of the Phantom\_3

"Is this the perfect mastery trait, allowing me to fully unleash my physical strength?" Su Yu felt an immense relief in his heart.

"Why not give it a try and see what kind of power this Azure Oath can unleash under my control."

This Azure Oath, Su Yu did not equip it with an intelligent AI for assistance, partly because he trusted his own judgment more.

And on the other hand, because...

"Nuonuo, begin mechanical fusion and assist me in battle!"

Compared to the Mechanical Battle Armor's own intelligent AI, Su Yu already had the best choice!

"Okay, master, Nuonuo is here!"

Nuonuo also saw Su Yu's excitement after donning the Azure Oath and shared in Su Yu's happiness.

She cheerfully ran to Su Yu's side and initiated the mechanical fusion.

In the next moment, Nuonuo's white body disassembled into countless mechanical parts.

These mechanical parts instantly enveloped various parts of the Azure Oath Mechanical Battle Armor.

As the mechanical parts extended and reshaped.

The entire Mechanical Battle Armor's color also changed.

It turned pure white.

Su Yu immediately felt that the already powerful armor had been further amplified.

"My current Spiritual Power Star Level, after advancing to level twenty-nine due to the Legion Mechanic level, has reached five-star pinnacle, and Nuonuo has also synchronized with me to reach five-star pinnacle."

"Although Nuonuo and I are both just entering the five-star pinnacle, the amplification for this Azure Oath is still tremendously significant."

Thinking of this, Su Yu closed his eyes.

The spiritual energy from Steel Resonance instantly permeated the entire Azure Oath.

Steel Resonance commencement!

Heart of Steel amplification synchronously activated!

Under the effect of Steel Resonance, Su Yu felt a deeper connection between him and the armor.

"Master, I'm ready now." Nuonuo's voice, at this time, echoed inside the Azure Oath.

Nuonuo, originally a Mechanical Life enlightened by the Steel Spirit, had an extremely close connection with Su Yu.

Now, under Nuonuo's mechanical fusion, the Azure Oath was fully resonating with Su Yu due to the relationship with Nuonuo and Steel Resonance.

Su Yu immediately felt the roar of the Azure Oath!

At that moment, Su Yu did not hesitate, controlling this Azure Oath, the Mechanical Battle Armor which, after Nuonuo's mechanical fusion, presented a blue and white color, moved swiftly in the underground space.

Through spiritual energy, Su Yu instructed Nuonuo in his mind: "Nuonuo, remember to record this armor's combat data."

"Got it, master."

Underground in the Mechanical City, now expanded to a space of tens of thousands of square meters thanks to the tireless work of numerous cavalry, a blue and white Mechanical Battle Armor was moving swiftly.

"Boom——"

Its speed had already broken the sound barrier, resounding with a series of sonic booms throughout the terrain space.

Sonic boom clouds also appeared around the Azure Oath.

While controlling the Azure Oath, Su Yu only felt an unprecedented sense of exhilaration.

"This speed, this strength, this Azure Oath truly gave me quite a surprise!" Su Yu felt the great power brought by Azure Oath and became increasingly delighted.

The Azure Oath's trait entry, Perfect Amplification, could perfectly boost Su Yu's physical combat prowess.

Su Yu's spiritual energy and various core abilities could further amplify the attributes of the Azure Oath.

Su Yu's physical combat power was already as high as five-star initial level.

Now, this Azure Oath, under Nuonuo's mechanical fusion state, along with various increases in Su Yu's core abilities and such, was displaying strength slightly beyond Su Yu's expectations.

"My five-star initial physical power, with the base attribute amplification of this Azure Oath after Nuonuo's fusion, is enough to exert six-star intermediate strength."

"If I use the weapons behind the armor, then even against a six-star intermediate Radiation Beast Lord, I am confident I can fight and win."

"Moreover, this Azure Oath is inherently focused on defense; even if facing a six-star advanced enemy, if I'm outmatched, I can still retreat with ease."

As Su Yu felt the great power brought by the Azure Oath, he examined the data provided by Nuonuo, beginning to analyze the Azure Oath's combat power.

"If in extreme state adding the Core Specialization Electromagnetic Fury..."

Su Yu did not attempt it because, in extreme states, the core of Azure Oath, the Sea Blue Core, would fail.

"Although I cannot try it now, I estimate that, under my full outburst, even if I cannot exert seven-star level power, it will explode with overwhelming might capable of instantly destroying any six-star!"

Soon, Su Yu stopped his actions and returned to the Core Terminal of the Mechanical City.

Although Su Yu stopped his actions, through the resonance effect of Steel Resonance, he could still feel the roar of this Azure Oath.

This newly crafted Azure Oath was eager for battle.

"Eager for battle, huh, too bad there's nothing for you to fight now." Just as Su Yu was thinking this.

An urgent signal came through Su Yu's personal terminal.

The emergency signal from the Mechanical City would only sound in crises that hunting teams and others couldn't resolve.

"An urgent signal? A threat to the Mechanical City? No, the current Mechanical City is under the control of the Mechanical Spirit AI, any danger approaching would be notified to me immediately by the Mechanical Spirit."

"So, this urgent signal is due to the side of the small settlement?"

At that moment, Su Yu picked up his personal terminal.

The holographic projection immediately revealed the somewhat nervous appearance of Yu Ping'an.

Only to hear Yu Ping'an say, "Administrator, it's not good, the Ghost Tribe seems to have detected the migration of the Iron Heart Tribe."

"They are heading in the direction of a small settlement within the Settlement Federation, seemingly intending to investigate the reason for the Iron Heart Tribe's migration."

Chapter 234: Neither too many nor too few humans should be allowed.

"The previous small Settlement Federation relied on the information technology of the Iron Heart Tribe to build signal stations between various settlements."

"And the message just now was a call for help from the Skeleton Settlement. They are requesting the protection of the administrator, and the reliability of the message has been confirmed by Feng Tian and the Clan Leader of Iron Heart."

Upon hearing this over his personal terminal, Yu Ping'an reported back.

"I understand. Stay calm. I'll handle it. Have the Mechanical City's top officials and the Hunting Team Leaders gather in the Mechanical Hall." Su Yu replied, then disconnected the communication from his personal terminal.

After listening to the communication from Yu Ping'an, Su Yu had a vague idea in his mind, but it wasn't clear. He needed to think it over carefully.

"Has the Ghost Tribe noticed the movements of these small settlements so quickly?"

"According to the speed of the Ghost Tribe's Wolf Riders, the Iron Heart Tribe only started their migration two days ago, yet the Wolf Riders have already reached the Skeleton Settlement. Clearly, they received the news early."

"That shouldn't be the case. The distance between several small settlements and the settlements of the Ghost Tribe is more than a hundred kilometers. Unless the Ghost Tribe has been monitoring these small settlements, it would be impossible for them to discover the Iron Heart Tribe's migration so quickly."

"Unless the people of the Ghost Tribe have been constantly watching these small settlements..."

Su Yu had a flash of inspiration and suddenly understood something.

"The side effects of Ghost Energy make its users become bloodthirsty and murderous, and they become more loyal to the high-ranking Transcendents who control Ghost Energy, just like Li He and the Night Slayer Team."

"If these side effects are never relieved, it would be easy to turn someone into a bloodthirsty maniac, or even let them be assimilated by Ghost Energy, much like the Wolf Riders I encountered before."

"Therefore, in order to resist the side effects of Ghost Energy, the Transcendents of the Ghost Tribe prevent themselves from being completely assimilated by Ghost Energy, becoming Ghost Energy mutants. That's why the Ghost Tribe deliberately keeps those small settlements in this Dead Silence Wilderness."

Su Yu suddenly realized.

"The small settlements in this Dead Silence Wilderness are essentially the Ghost Tribe's flock. By controlling the number of small settlements, they can ensure there are enough people in the small settlements to resist the side effects of Ghost Energy."

"You cannot let the people of the small settlements be too many, or it will lead to revolt among them."

"Likewise, you cannot let the people of the small settlements be too few, or their population growth won't meet the needs of the Ghost Tribe."

On reaching this point, Su Yu recalled the passage recorded in the letter left by the old administrator of the former Sanctuary.

"[Scholars of Dawn City, after studying this history, concluded a pattern: whenever human civilization on Ruins Star reaches its peak, it suffers from catastrophic disasters.

And after the catastrophe passes, there is always a long period for humans to recuperate and reproduce.

It's as if an invisible force is controlling humans on Ruins Star.

It's essential not to let the human population become too large, nor too small...]"

"Not letting the human population be too large, nor too small." Su Yu whispered softly, with a trace of shock in his eyes.

"I understand now, this is the rule summed up by the old administrator and those scholars of Dawn City!"

"From the actions of the Ghost Tribe, we can infer why that hidden manipulator within the thousand-year history of Ruins Star caused multiple catastrophic disasters."

"Because it's afraid, afraid that human power will develop to a certain extent, just like when Zhang Chenfeng emerged. At the same time, it also needs to maintain the human population above a certain level, or its own survival will be affected."

Su Yu shook his head, rebutting his own explanation: "No, it's likely that a character similar to Zhang Chenfeng has already appeared, otherwise, after a millennium, why hasn't that hidden manipulator fled from this Ruins Star?"

"Moreover, its condition is not good. It seems to be asleep. When Li He died before, it could only leave a mark on me and couldn't kill me when I was only a mere three-star level."

"Logically, an existence of that level could easily kill me as a three-star being with just a glance. But it didn't do so; it merely instinctively left a mark. Even when I successfully removed the mark, there was no reaction, so this unknown entity is likely in a state of slumber."

Although Su Yu doesn't have a clear understanding of the historical information of Ruins Star, based on the existing information, he could infer that the condition of the unknown entity is not good.

Su Yu's heart was immediately firm in his previous thoughts.

"Therefore, the Ghost Tribe must have an extremely close connection with that unknown entity, maybe even as the backhand left by it. Even the once formidable Ghost Empire, the last ruling force of Ruins Star, might have been controlled by that unknown entity."

"And the actions of the Ghost Tribe in recent days may not be because that unknown entity issued a warning or guidance, but because..."

"Because the number of small settlements in the Dead Silence Wilderness has slightly exceeded the Ghost Tribe's controlled range, and my actions of killing Li He and wiping out a team of Wolf Riders became the perfect opportunity for the Ghost Tribe to cull."

Chapter 235: Neither too many nor too few humans should be allowed.\_2

"Therefore, the Ghost Tribe needs to massacre some small settlements to maintain their control over the Dead Silence Wilderness, but similarly, they do not intend to wipe everyone out, which is why, in the past two months, they have only destroyed a few small settlements closest to them."

Su Yu had thoroughly sorted out his thoughts.

"And now, the alliance of seven small settlements, along with the migration movement of the Iron Heart Tribe, is tantamount to escaping from the Ghost Tribe's grasp."

"So, they have dispatched troops to the Skeleton Settlement, which is the strongest among the seven small settlements, in order to further strengthen their control over the Dead Silence Wilderness."

At this moment, while thinking, Su Yu walked into the hall of the Mechanical Hall.

The people of the Mechanical City had already been waiting there in the hall of the Mechanical Hall.

At this moment, Su Yu had not taken off the Azure Oath mechanical battle armor.

The people of the Mechanical City, upon seeing this red and blue alternating mechanical battle armor, were extremely surprised in their hearts, having never seen such a mechanical creation.

The deep and mysterious azure radiance emitted from the red body armor gave the entire mechanical battle armor an aura of extreme mystery and nobility.

"Administrator, is that you?" Yu Ping'an asked at this moment, not quite daring to be sure.

The next moment, Su Yu opened the faceplate of the Azure Oath and said, "It's me."

"Clan Leader Tie Xin, what is the situation with the Skeleton Settlement now? Please explain," Su Yu then asked the Tie Xin Clan Leader who was standing aside at the moment.

The Clan Leader Tie Xin nodded. He now considered himself a member of the Mechanical City and began to answer, "Yes, Administrator."

"The Skeleton Settlement is the strongest small settlement in our Settlement Federation in terms of comprehensive strength. It has five four-star Transcendents, and the number of combat personnel is as high as five hundred, even among them are a hundred Transcendents. It must be noted that the total population of this settlement is only three thousand."

Su Yu nodded, as he had some information about this strongest settlement in terms of comprehensive combat strength within the small settlement federation.

The main combat members of this settlement were originally Scavengers from the wilderness. Essentially, it was less of a settlement and more of a large Scavenger communication base, which slowly evolved into a settlement.

The Skeleton Settlement indeed has good strength, but because they are Scavengers, the cohesion of this settlement is not strong.

And the narration by Clan Leader Tie Xin continued.

"This time, the Ghost Wolf Riders heading to the Skeleton Settlement are about five hundred strong."

"The information from the Skeleton Settlement tells us that if the Mechanical City can shelter them this time, they are willing to join the Mechanical City as a whole and serve the Administrator."

"The distance from the Skeleton Settlement to the Mechanical City is one hundred and twenty-three kilometers. The Ghost Tribe is similarly over a hundred kilometers away, and the Ghost Tribe's wolf cavalry are already within a twenty-kilometer range of the Skeleton Settlement."

"In less than an hour, the Ghost Wolf Riders will be able to reach the Skeleton Settlement completely."

The Clan Leader Tie Xin's tone was filled with worry. Even though he had brought the Iron Heart Tribe to join the Skeleton Settlement, they were ultimately members of the small settlement federation.

"The cohesion of the Skeleton Settlement is not strong. Although their combat power is decent, they are quite ordinary in other aspects, which led to them only discovering when the Ghost Tribe approached within a twenty-kilometer range of their settlement."

"At this point, even if we want to provide support, it will be difficult."

The people of the Mechanical City also fell silent one by one.

The roads through this Dead Silence Wilderness were already difficult to traverse, not to mention the terrain, with all kinds of dangers like Radiation Beasts lurking in the wilderness.

All these would lead to particularly slow travel speeds.

Just like the Iron Heart Tribe, even though they were not far from the Mechanical City, it still took two days to relocate all the members of the Iron Heart Tribe using transport crawler vehicles.

Yu Ping'an stepped forward at this moment and said, "Administrator, with the speed of our Mechanical City's hunting team, it would take at least a day to reach there."

"Unless the Administrator dispatches your cavalry corps, it's the only way to arrive within two hours."

"However, the average strength of the Ghost Wolf Riders is at a two-star level, and the Skeleton Settlement may not be able to hold out for that long."

Upon hearing Yu Ping'an's words, the people in the Mechanical Hall also fell silent one after another.

Not to mention the terrifying strength of the Ghost Wolf Riders, without relying on Su Yu's mechanical creations, the current combat power of the Mechanical City could only barely handle five hundred wolf cavalry head-on.

This combat power came about after the addition of fighting personnel from Wind City and the Iron Heart Tribe.

Su Yu, wearing the Azure Oath, remained calm and said nothing more. He naturally understood the current situation of the Mechanical City.

"Even with the amplification effect of my Spiritual Energy and core abilities, the cavalry corps would still need an hour and a half to arrive."

"The Ghost Wolf Riders will reach in less than half an hour, with five hundred two-star Ghost Wolf Riders, and led by a captain who is at least four-star, possibly five-star, and there are certainly more than one."

"By the time the cavalry gets there, it would only be to collect bodies from the Skeleton Settlement."

Su Yu silently thought in his heart.

"Even with the speediest Shadow Defenders corps, it would still take forty minutes to get there."

"So, there is only one way to save the entire Skeleton Settlement."
