

## Infinite 236

Chapter 236: Neither too many nor too few humans should be allowed. \_3

Su Yu raised the right arm of his Mechanical Battle Armor, feeling the fullness of its power.

"That's me, alone, wearing the Azure Oath, traveling at supersonic speed toward the Skeleton Settlement."

"According to the speed of the Azure Oath, it will take at most ten minutes to arrive, just in time to coincide with the arrival of the Ghost Tribe."

Su Yu still had a need for manpower from the Skeleton Settlement, after all, considering the current situation of the Mechanical City and the vast expanse of the Dead Silence Wilderness, a large number of people are needed to explore new resources and extract them; the intelligence of Intelligent Machines is not enough to handle these tasks.

Moreover, the quantity of Intelligent Mechanics in Su Yu's hands was not sufficient.

"I can go over and take a look first, and if I can simultaneously scout the forces of the Ghost Tribe, at least my safety is assured."

"If the strength of this group of Wolf Riders from the Ghost Tribe isn't strong, with my current strength, I might even be able to repel them by myself."

Su Yu, wearing the Azure Oath, combined with Nuonuo, could achieve a basic combat power of six-star intermediate level.

Moreover, Su Yu glanced at the current transfer panel.

The Legion Mechanic level had reached LV29. The experience for this final level was substantial, and Su Yu thought it would take at least a day for the rangers in the underground Mechanical Space to fulfill this upgrade requirement.

"I can go and, at worst, retreat if it's not doable, after all, with the defense and speed of the Azure Oath, as long as there isn't a seven-star Transcendent among this squad of Wolf Riders from the Ghost Tribe."

"It's impossible for them to cause any harm to me."

At that thought, Su Yu said to Yu Ping'an and the others, "The Skeleton Settlement will be saved."

"You all are responsible for guarding the Mechanical City, I'll leave the Ranger Legion in the Mechanical City."

Hearing Su Yu's words, the people in the Mechanical Hall looked at Su Yu in disbelief; they could understand the meaning in Su Yu's words but couldn't quite believe it.

"Could it be that the Administrator plans to go to the Skeleton Settlement alone, but a distance of more than a hundred kilometers, how is that possible?" The people in the Mechanical Hall all had this thought.

"Administrator, do you mean?" Tie Xin, the Clan Leader, scrutinized the Azure Oath on Su Yu with some uncertainty.

"Yes, I'll go alone for the rescue, and I can just test the combat capability of this set of Mechanical Battle Armor." Su Yu closed the visor of the Azure Oath. "Don't worry, I'll take all the Shadow Hunters with me. If it doesn't work, I'll retreat."

Su Yu quickly walked out of the Mechanical Hall.

Nuonuo also flew out from outside the Mechanical Hall at this moment, transforming into white metal components in the next moment, enveloping the entire Azure Oath worn by Su Yu.

The originally red armor turned pure white at this moment.

The inner layer of the armor emanated a faint blue light, making the entire Azure Oath appear extremely mysterious and powerful.

The people in the Mechanical Hall silently watched this scene.

Tie Xin widened his eyes, staring intently at the figure clad in white armor, trying to discern details from it.

Tie Xin murmured to himself, "Arriving in twenty minutes, could it be that the speed of this Mechanical Battle Armor has already broken the sound barrier?"

In this Dead Silence Wilderness, there are indeed Mechanical Creations capable of breaking the sound barrier, but those are mechanical vehicles and such.

And now, this Azure Oath worn by Su Yu can also break the sound barrier. Although both have the same speed, as a Mechanical Battle Armor, it endures greater air resistance and the technology involved makes Clan Leader Tie Xin's heart tremble with awe.

"Is this the mechanical technology of the Administrator? This level indeed qualifies as an Extraordinary Mechanic!"

Lang Yun, observing Su Yu clad in the white Mechanical Battle Armor, thought to himself, "Impossible, the Administrator's strength is certainly formidable, but this is a distance of over a hundred kilometers, can the Administrator really arrive in twenty minutes?"

"If that's really the case, doesn't it mean the Administrator's strength has increased significantly?"

"How could it be that short a time? Obviously, the Administrator took over the Sanctuary only two months ago and has upgraded from the original Sanctuary to the current Mechanical City."

"Even the Administrator's strength has become unfathomable to me."

Lang Yun and Hu Wen exchanged glances, both sensing the shock in each other's eyes.

They were the longest-standing Hunting Team Leaders in Shelter No. 73, but they had never seen a figure like Su Yu.

At this moment, Su Yu had no mind to care about the thoughts of those people in the Mechanical Hall.

Inside the Azure Oath, Su Yu closed his eyes and began the Steel Resonance.

The next moment, accompanied by the familiar Power of Resonance.

Su Yu once again heard the roar of the Azure Oath, his Mechanical Battle Armor.

It was yearning for a battle to prove itself.

"Longing for battle? Then I'll satisfy you!"

Su Yu decisively opened the built-in map of the Azure Oath and headed toward the direction of the Skeleton Settlement.

The Sea Blue Core at the chest of the Mechanical Battle Armor lit up at this moment, outputting energy at full power.

Boom!

The people in the Mechanical Hall only heard a sonic boom. They instinctively followed Su Yu's figure with their eyes.

At that moment, the Azure Oath Battle Armor turned into a blue-and-white silhouette, quickly traversing the entire Mechanical City.

The speed was fast, but it avoided all personnel; the control of this Azure Oath was incredibly strong!

Soon enough, this blue silhouette arrived at the city walls of the Mechanical City.

Su Yu looked at the iron wall before him, took a deep breath, and exerted force in his legs; the leg armor of the Mechanical Battle Armor also augmented Su Yu's power at that moment.

Under the amplification of the Azure Oath, Su Yu's legs burst with immense strength instantly.

This blue-and-white Azure Oath leapt high at that moment.

Like a peregrine falcon diving, it easily passed over the towering Mechanical City walls, dashing toward the wilderness!

Chapter 237: Hundred-Mile Raid, Skeleton Settlement, Electromagnetic Sniper Cannon! An Incredibly Astonishing Strike!

Inside the Mechanical Hall.

Everyone was still reeling from the shock brought by that blue figure.

Clan Leader Tie Xin watched Su Yu's departing figure, murmuring to himself, "Supersonic, supersonic mechanical battle armor, such a terrifying mechanical creation..."

Being a clan leader with decent mechanical skills himself, Tie Xin knew very well that a mechanical battle armor capable of surpassing supersonic speed would have extremely strong defense and power.

Yang Lie, at this moment, felt somewhat worried as he watched Su Yu's departing figure.

Yang Lie was just a Three-Star Transcendent; although he managed the residents of the Mechanical City well, Su Yu's display of power left him a little puzzled.

"Do you think, Brother Su, going alone like this, is it a bit dangerous?" Yang Lie asked everyone worriedly.

After all, the Ghost Tribe's infamous reputation was well-known, and no one in this Dead Silence Wilderness hadn't heard of the dreaded Ghost Tribe.

Upon hearing Yang Lie's words, everyone instinctively looked at Feng Tian and Yu Ping'an.

Feng Tian, as a Four-Star Junior Mentalist, wielded the Power of Storm, far stronger than a normal Four-Star Physical Body Transcendent.

Yu Ping'an, after undergoing artificial body transformation, had strength reaching Four-Star Advanced; the two were the strongest in the Mechanical City, aside from Su Yu.

Yu Ping'an, having just recovered from the shock of Su Yu's Azure Oath surpassing supersonic speed, noticed everyone's gaze and said, "I'm not sure, but I feel that the Manager's mechanical battle armor is at least several times stronger than my artificial body."

"At least Five-Star Advanced, or even Five-Star Top level combat power."

"But even so, the Manager facing five hundred Ghost Wolf Riders alone is still a bit dangerous."

Obviously, Yu Ping'an was also somewhat worried about Su Yu.

Feng Tian shook his head and said, "Not only that, don't forget, the Manager himself is also a Five-Star Mentalist, and his physical strength is not low either; even if he can't win, he can definitely retreat with ease."

Feng Tian's words were agreed upon by everyone.

After all, Su Yu had already become the core of the Mechanical City; the entire city was built by Su Yu alone.

The safety of the Mechanical City was also built upon Su Yu's powerful individual strength.

Seeing everyone's reaction, Clan Leader Tie Xin silently sighed beside them.

In his heart, Clan Leader Tie Xin thought, "A bunch of people who don't understand mechanical technology, such a level of mechanical battle armor, that supersonic capability, you say this only exhibits Five-Star Top level strength?"

"To break through the sound barrier, this mechanical battle armor created by the Manager, at the very least, can unleash Six-Star level combat power."

"Moreover, I just saw that the core energy source of the Manager's mechanical battle armor is also extraordinary."

"Five hundred wolf riders, the Manager could possibly sweep through the Ghost Wolf Riders, but relying on the Manager alone, the best he might do is repel them."

Although knowing all this, Tie Xin did not show it on his face; he wanted to see how everyone would react once Su Yu repelled the Ghost Wolf Riders.

As everyone was still immersed in the shock brought by Su Yu,

on the clearing in front of the Mechanical Hall, the metallic ground opened, revealing a bottomless underground passage.

In the next moment, under the astonished eyes of everyone.

Twenty-three Shadow Hunters in azure blue emerged from the passage.

Heading in the direction of Su Yu, towards the Skeleton Settlement.

Clan Leader Tie Xin watched this scene in surprise; he had seen such Superior Intelligent Machines before.

"Such a level of intelligent machinery can be mass-produced by the Manager? And the speed of mass production is so fast, in just a few days, there are so many more than last time?"

Clan Leader Tie Xin felt increasingly astounded by Su Yu's mechanical prowess, and he even had an idea in his mind.

"Repelling the wolf riders of the Ghost Tribe should be enough with the Manager alone, but considering these powerful intelligent machines of the Manager."

"Could it be that the Manager intends to annihilate those Ghost Wolf Riders completely?"

"Is that even possible?"

Meanwhile, the twenty-three azure blue Shadow Hunters had already swiftly left the Mechanical Hall, heading towards the gates of the Mechanical City.

The speed of these twenty-three Shadow Hunters was very fast, though not as impressive as Su Yu's mechanical battle armor.

Yet, they maneuvered gracefully, easily crossing all the buildings and people, through the gate, towards the Skeleton Settlement.

...

Simultaneously, on the wilderness, Su Yu savored the ultimate sensation of speed brought by breaking through the sound barrier.

His speed was so swift that the Radiation Beasts along the way only caught a glimpse of a silhouette, the next moment, that silhouette appeared dozens of meters away.

Most of the Radiation Beasts realized that this figure was not to be trifled with.

And they all chose to avoid.

The few who dared to try and obstruct Su Yu were simply unable to keep up with the speed of Azure Oath.

Just like this, after leaving the Mechanical City, in only three minutes, Su Yu saw the outpost of the Skeleton Settlement.

It was a massive skeleton, weathered by nature for countless years.

A skeleton of a colossal creature, at least several kilometers long, left behind after death.

Seeing this scene, Su Yu recalled the origins of the Skeleton Settlement in his mind.

Chapter 238: Hundred-Mile Raid, Skeleton Settlement, Electromagnetic Sniper Cannon! An Incredibly Astonishing Strike!\_2

"The Skeleton Settlement's camp was discovered by a group of Scavengers wandering the wilderness. The remains of this giant creature, after its death, were incredibly tough, and the land where the bones lay had high fertility. This was likely due to the decay of the creature's corpse, which became a sanctuary for those Scavengers."

"As time passed, more and more Scavengers learned about this place and started to settle here. Gradually, this place became a trading post for Scavengers."

"Meanwhile, a group of the strongest Scavengers successfully seized this spot, establishing it as their official base."

Su Yu gradually slowed down because the Azure Oath was moving too fast, and the Ghost Wolf Riders hadn't yet reached the Skeleton Settlement.

Then, Su Yu spoke inside the armor, "Nuonuo, activate Ghostly Stealth."

"Yes, master."

With Nuonuo's response, beneath the Azure Oath's armor, those ghostly blue lights instantly lit up and gradually enveloped the entire Mechanical Armor.

And the color of the Azure Oath's Mechanical Armor became increasingly transparent until it was completely invisible.

This was the invisibility ability derived from the Crystal Giant Scorpion Leader.

"Although I also have a Core Specialization from the Wilderness Hunter—Shadow Cloak, using the Shadow Cloak consumes Spiritual Energy, and the cooldown is very long."

"However, the invisibility ability provided by this Azure Oath consumes the energy from the Mechanical Armor itself. With the energy supplied by the Sea Blue Core of this armor, the invisibility state can last at least two days."

"The effect of Ghostly Stealth is more on the material level, whereas the effect of Shadow Cloak is a result of Spiritual Energy. Not only do they not interfere with each other, but they can even be stacked!"

"With my current strength at five-star, even a seven-star Transcendent can't find my trace."

Su Yu slowed his steps, heading towards the direction of the Skeleton Settlement. It was due to this invisibility ability, combined with the extreme speed of the Azure Oath, that Su Yu came to the Skeleton Settlement alone.

Regarding the Ghost Tribe, Su Yu remained extremely cautious, as the uniqueness of Ghost Energy and the unknown existence made him very wary of the Ghost Tribe.

"Although my current strength, at least on paper, is comparable to the entire Ghost Tribe, there are too many of them, and coupled with the uniqueness of Ghost Energy..."

"It's never too cautious to deal with the Ghost Tribe. Not to mention, when Li He died, after ingesting Ghost Energy, he turned the entire Night Slayer Team into Ghost Demons. If the leader of the Ghost Tribe does the same..."

"Then the hundred-thousand population of the Ghost Tribe would instantly transform into a hundred thousand Ghost Demons. Moreover, Ghost Demons can devour each other; if it comes to that, the last surviving Ghost Demon would be terrifying just to think about."

Just imagining such a terrifying scene in his mind made Su Yu's scalp tingle.

"Therefore, dealing with the Ghost Tribe must be done cautiously, and once action is taken, all Ghost Wolf Riders must be annihilated without leaving a single survivor."

"We can't allow them to take information about the Mechanical City back with them. The Mechanical City still needs some time to develop and must grow to a point where it can directly crush the Ghost Tribe to prevent them from doing something desperate and turning their population into Ghost Demons."

Su Yu thought while approaching the massive weathered bones.

"These bones have stood here through uncounted years of weathering. The strength of this dead skeletal beast must have been immense. It's just a pity that after all these years and thousands of years of weathering, these bones have long lost their value." Su Yu gazed at the massive weathered bones, feeling a slight sense of regret.

Even in the Shadow Stealth State, the speed of Su Yu's Azure Oath remained incredibly fast.

Before long, he was close to the giant skeleton.

The enormous bones had long been remodeled into living quarters by the people of the Skeleton Settlement.

The gaps in the bones were filled, becoming the walls of the entire Skeleton Settlement.

From afar, Su Yu observed the situation of the entire Skeleton Settlement through the long-distance viewing device of the Azure Oath.

Within the Skeleton camp at that moment.

A large number of combatants were stationed on the bone-gap walls of the settlement.

Because the Skeleton Settlement served as a trading post for Scavengers, everyone here was essentially a soldier. Even the old, weak, women, and children had the ability to take a bite before dying.

However, even such a settlement...

Faced with the arrival of the Ghost Wolf Riders, it fell into utter despair.

The leader of the Skeleton Settlement, Kuang Gu, was currently encouraging the soldiers of the settlement.

"Brothers, the Skeleton Settlement is now facing the greatest crisis in decades. The most powerful force of the Dead Silence Wilderness, the Ghost Tribe, will arrive in no more than ten minutes."

"They number only five hundred, but they are all Transcendents who wield extremely repulsive Ghost Energy. This battle will be very tough."

Kuang Gu, having established the Skeleton Settlement by himself, had a notably burly physique, standing at three meters tall. Such a stature endowed Kuang Gu with remarkable strength, and along his spine was a row of protruding bones.

"This Kuang Gu is quite interesting in appearance. With his physique and his already impressive four-star high-level Physical Body Power, even a general four-star top-tier wouldn't be his match."

Chapter 239: Hundred-Mile Raid, Skeleton Settlement, Electromagnetic Sniper Cannon! An Incredibly Astonishing Strike!\_3

Su Yu noticed this scene. He wasn't surprised because, on the entire Ruins Star, radiation was everywhere. Although the size of Kuang Gu was rare, it was not surprising.

This Ruins Star, under the influence of radiation, can grow in any form.

"Brothers, I've requested support from other small settlements, and even asked for help from that incredibly mysterious Mechanical City." Kuang Gu's words ignited a glimmer of hope in the hearts of the warriors of the Skeleton Settlement.

They didn't know much about the Mechanical City, but they had seen Su Yu's Mechanical Creations, the Steel Defender that Yu Ping'an used to demonstrate strength to seven small settlements.

Their leader had even tried to test his strength against the Steel Defender, whose power he had witnessed.

A settlement capable of creating such Mechanical Creations, in their view, might just be able to contend with the Ghost Tribe.

But soon, Kuang Gu extinguished this glimmer of hope with his own hands.

"I know how mysterious the Mechanical City is, but they are too far from us. Even if they send support, it would be hours away, and by then, we would have been slain by the Ghost Wolf Riders." Kuang Gu's voice was extremely helpless, "This is a doomed war."

"We can't escape, nor do we have anywhere to flee."

"The Ghost Tribe has no enmity with us, yet they want to kill us. Can you tolerate such behavior? As for me, Kuang Gu, I can't."

"Instead of fleeing and being hunted down one by one by the Ghost Wolf Riders, it's better to fight to the death. I will stand at the forefront for my brothers."

Indeed.

The Skeleton Settlement was originally just a group of Scavengers, poor souls wandering in the wilderness, who spent decades finally gaining the home they have now.

Yet, the Ghost Tribe wants to destroy them for no reason.

Why?

For the Scavengers of the Skeleton Settlement, from being homeless to now a small settlement, regarded as a decent force among small settlements, the Skeleton Settlement had long become their only home in this Dead Silence Wilderness.

Hearing Kuang Gu's words, a certain flame was also ignited in the hearts of the Skeleton Settlement members.

Su Yu, who was lurking, also witnessed this scene.

"Never thought the apparently coarse and rugged Kuang Gu is so meticulous, perhaps it's the doomed soldiers who win."

At this moment, in the distance of the Skeleton Settlement, rows of black shadows were rushing over.

What else could it be but the Ghost Wolf Riders?

And Su Yu noticed that in front of these Ghost Wolf Riders were five Ghost Wolf Riders mounted on larger wolves.

Among them, the person in the middle was sitting on a giant wolf that was about five meters long, several times the size of a normal wolf mount.

Moreover, on this giant wolf, there were traces of extensive mechanical modifications, as well as dozens of tubes glowing with Ghost Energy.

Seeing this, Kuang Gu wasted no more words.

"Everyone here is a brother who built this Skeleton Settlement with me. I want to say, after so many years, so many Scavengers in this Dead Silence Wilderness couldn't do anything to our Skeleton Settlement."

"And what about the Ghost Tribe?"

"Skeleton Settlement, victory is inevitable!" Kuang Gu shouted loudly.

And Kuang Gu's subordinates, the combat personnel of the Skeleton base,

also began to shout fervently at this moment.

"Victory for the Skeleton Settlement!"

They had nowhere else to retreat to. This battle, even if it meant death, had to pose a threat to the Ghost Tribe!

Just as the wolf riders of the Ghost Tribe were charging towards the Skeleton Settlement,

Su Yu had already assessed the strength of the five Ghost Wolf Riders' leaders.

"Four of them are between advanced to top level of the four-star rank, and one is at high-level five-star. Combined with five hundred wolf riders and the uniqueness of Ghost Energy, this Ghost Wolf Riders troop can indeed easily destroy the entire Skeleton Settlement."

"The strength of this Ghost Tribe is impressive. There is at least one four-star above leader for every one hundred wolf riders."

"According to the Ghost Tribe's plan, they likely intend to annihilate the strongest Skeleton Settlement among the seven settlements as a warning to others."

At this time, Su Yu was located under a giant skeleton, still maintaining invisibility.

"It's just a pity I'm here."

"And I don't quite understand why these five Ghost Wolf Riders' leaders are so close together?"

Su Yu silently took out the modified Electromagnetic Sniper Cannon from behind the Azure Oath.

The spiritual energy of the Steel Resonance enveloped the entire Electromagnetic Sniper Cannon, empowering it.

The Power of Resonance and the effect of Heart of Steel further enhanced the strength of the Electromagnetic Sniper Cannon, allowing it to exert even stronger attacks.

Moreover, the Sea Blue Core from the Azure Oath at this moment poured a vast amount of energy into the Electromagnetic Sniper Cannon through the arm of the Mechanical Battle Armor.

"Nuonuo, initiate Mechanical Fusion with the Electromagnetic Sniper Cannon." Following Su Yu's instructions,

Nuonuo immediately detached from the Azure Oath and transformed into countless components, wrapping around the entire Electromagnetic Sniper Cannon.

"After supplying energy to the Electromagnetic Sniper Cannon, having Nuonuo perform a mechanical fusion cannot increase the damage of this shot further."

"Instead, letting Nuonuo fuse with the Electromagnetic Sniper Cannon after energy supply can significantly increase its lethality."

Su Yu felt the electrical energy accumulating at the cannon's muzzle, about to materialize into plasma.

Even wearing the Azure Oath, Su Yu felt a faint sense of threat at this moment.

"With the new upgrade, the Electromagnetic Sniper Cannon has abandoned regular bullets and switched to Electromagnetic Bullets."

"This shot, assisted by Nuonuo and empowered by my own spiritual energy, should at least exert a mid-six-star level power."

"But it's still not quite enough."

In the next moment, Su Yu disabled his invisibility.

"Hidden Kill!"

The core ability from the Wilderness Hunter, Hidden Kill activated!

In an invisible state, the effect of Hidden Kill can increase this shot of Su Yu's five-fold!

**Boom!**

A gigantic and awe-inspiring white light burst out from the Electromagnetic Sniper Cannon in Su Yu's hand!

With numerous amplifications, the power of this shot from Su Yu reached at least six-star pinnacle level!

And it was a wide-range destructive shot!

Chapter 240: Annihilating the Five Stars! Legion Mechanic Lv Max! Core Specialization: Power of Resonance!

Kuang Gu watched the ghost wolf riders charging towards the Skeleton Settlement.

"So the Skeleton Settlement is doomed to be lost?"

To Kuang Gu, the entire Skeleton Settlement was very special.

The scavengers and wanderers in the wilderness were either expelled from their original settlements or had their original settlements destroyed; essentially, they were a group of pitiable people with nowhere to go.

Kuang Gu was no different.

Kuang Gu watched the ghost wolf riders gradually approaching the Skeleton Settlement, remembering his childhood when his unique physique drew bullying and he was driven out of his original settlement, becoming a vagrant in the Dead Silence Wilderness.

Fortunately, he was found by a band of scavengers, and Kuang Gu barely survived.

To Kuang Gu, this Skeleton Settlement was not only a settlement he founded but also one of the few refuges in the Dead Silence Wilderness that could provide supplies for the scavengers.

"Ghost Tribe, if you want to kill us, be prepared for my Skeleton Settlement to bite off a chunk of you fiercely."

"Even if it means dying, I want to take down a four-star ghost wolf rider with me."

Kuang Gu's eyes were fierce, staring intently at the ghost wolf riders charging towards the Skeleton Settlement.

Other members of the Skeleton Settlement were the same; they were originally scavengers from the wilderness, living precarious lives every day.

Only after the establishment of the Skeleton Settlement did they have a true stronghold belonging to them in this Dead Silence Wilderness.

Members of the Skeleton Settlement were already prepared to die, just waiting for the ghost wolf riders to arrive.

However, at that moment,

Kuang Gu caught sight of a mysterious figure in mechanical battle armor at the edge of their Skeleton Settlement, it was Su Yu.

Su Yu's mechanical battle armor was red and blue, with mysterious ghostly blue light emanating from all over, appearing incredibly powerful and mysterious in Kuang Gu's eyes.

At this moment, Su Yu was holding a strange firearm, so large in caliber that Kuang Gu couldn't even call it a gun.

"Who is this person?" Kuang Gu didn't have time to think further.

The next moment, he saw the firearm in Su Yu's hand emit a dazzling white light!

The white light was wrapped in what seemed to be tangible plasma.

This white light, at an astounding speed, struck the five ghost wolf cavalry captains at the front of the charging formation.

Boom!

Even though the firearm in Su Yu's hand made no sound, Kuang Gu mentally imagined an astonishing explosion sound.

As the white light hit,

The leading five-star ghost wolf rider, a seemingly unbeatable foe to Kuang Gu's eyes,

was easily pierced by the white light. This ghost wolf cavalry captain, strong enough to be rated five-star, disappeared without even seeing his opponent.

It wasn't over; along with the white light's impact,

countless plasma erupted from the ghost wolf cavalry captain's body.

The cavalry captain exploded into a fireball. The side effects of ghost energy, the damage from the explosion, combined with the plasma spreading everywhere.

Instantly causing severe damage to the entire ghost wolf cavalry team.

The five ghost wolf cavalry captains, originally very close to each other, all died from this strike.

With Su Yu's shot, a five-star and four four-star ghost wolf cavalry soldiers were wiped out. Those dozens of ghost wolf riders relying on the captains also perished from this strike.

At this moment, Su Yu, clad in mechanical battle armor, was very pleased with the power of his shot.

Su Yu retracted the electromagnetic sniper cannon retrieved into the back of his mechanical battle armor; after such a powerful strike, the electromagnetic sniper cannon needed to cool down for a moment.

In this instant, a system prompt sounded in his ear.

[Ding!]

[You successfully killed a five-star ghost wolf rider, gaining professional experience (Legion Mechanic)...]

[You successfully killed a four-star ghost wolf rider, gaining professional experience (Legion Mechanic)...]

[... ]

[Legion Mechanic level up! Steel Resonance sync up!]

[You gained 300,000 professional experience points (Legion Mechanic lvl max)!]

Legion Mechanic finally reached the max level.

Su Yu's eyes were filled with joy.

"As a level two profession, Legion Mechanic required terrifying levels to reach max. Only by building the entire Mechanical City and countless Mechanical Creations could it be maxed so quickly."

Then, Su Yu looked at the new prompt on the profession change panel.

[Ding!]

[Based on your maxed core ability (Steel Resonance), you acquired Core Specialization (Power of Resonance)!]

[Core Specialization: Power of Resonance]

[Description: As a Legion Mechanic, your Steel Resonance has reached an unprecedented level over a long period, and you thus gained comprehension of the Power of Resonance.]

[In the Power of Resonance state, you can transfer a part of the damage you endure to mechanical creations under your Steel Resonance effect, determining how much damage you can mitigate based on the number and strength levels of the mechanical creations.]

Seeing the effect of the Power of Resonance,

Su Yu was also quite pleasantly surprised.

"This way, as a Legion Mechanic, activating the Power of Resonance allows me to directly transfer part of the damage I endure, greatly improving my survivability, and with my current Spiritual Energy strength, I can completely repair those mechanical creations damaged due to transferred damage."

At this moment, the group of ghost wolf riders seemed to be intimidated by Su Yu's strike. All five of the captains died from Su Yu's strike, leaving the group of wolf riders momentarily unsure of what to do.
