

Infinite 241

Chapter 241: Annihilating the Five Stars! Legion Mechanic Lv Max! Core Specialization: Power of Resonance!_2

They dared not continue attacking the Skeleton Settlement, and some Ghost Wolf Riders had even begun to quietly move backward.

Standing on the skeletal city wall, Kuang Gu was even more shocked to see the sudden appearance of Su Yu, but he quickly recalled Su Yu's origins.

"Sir, could you be the reinforcements from the Mechanical City?"

While checking the information on the job change panel, Su Yu nodded and answered, "Chief Kuang Gu, please deploy the people from the Skeleton Settlement to cooperate with me in exterminating this group of Ghost Wolf Riders!"

"Alright!"

Kuang Gu's heart turned from grief to joy, and he immediately called upon the people of the Skeleton Settlement, shouting, "Brothers, follow me to slay them! Wipe out those Ghost Tribe Wolf Riders."

Upon hearing Kuang Gu's words, the gates of the Skeleton Settlement's city wall were opened.

Numerous Scavengers from the Skeleton Settlement rushed out.

The strength of the Skeleton Settlement was not weak, with a total of five Four-star Transcendents, including Kuang Gu, but except for Kuang Gu, the other four were only Four-star beginners.

Facing the five hundred Wolf Riders of the Ghost Tribe, if head-to-head, these battle-ready Scavengers would be far from overwhelming them.

But at this moment, the formation of the Ghost Tribe had already been scattered, and the leaders of the Ghost Wolf Riders, several Ghost Wolf Cavalry Captains, had already died.

The Ghost Wolf Riders were leaderless at this moment, in chaos.

They couldn't win a direct confrontation with the Skeleton Settlement, but now hitting them while they're down wouldn't be a problem.

Su Yu took this opportunity to open the job change panel.

[Congratulations Host, as the Legion Mechanic level has reached max, a new career can now be undertaken]

[Available Job Directions: Second-tier profession · Mechanical Wanderer]

[Mechanical Warrior (Main) + Battlefield Mechanic + Heart of Steel lv max + Wilderness Survival lv max + Close Combat Mechanical Manufacturing lv max + ... = Mechanical Wanderer]

[Introduction: Elite among Mechanical Warriors, these powerful warriors exhibit immense strength during special operations over accumulated time, instilling fear in their foes, renowned as the kings of mechanical special operations, wanderers of the night, harbingers of death! Further awakened powerful Spiritual Energy, enhancing their melee capabilities, mastering close combat machinery to extraordinary levels.]

[Available Job Directions: First-tier profession · Gunfighter]

[Fighter (Main) + Gunsmith + Basic Firearms + Basic Fighting = Gunfighter]

[Introduction: Mastery of extraordinary gun skills, focusing on close-range gunfighting, bullets will curve...]

[Available Job Directions: First-tier profession · Gunner]

[Gunsmith (Main) + Fighter + Basic Firearms + Adaptability + Basic Mechanical Manufacturing = Gunner]

[Introduction: Extraordinary gunsmiths with superhuman physiques, instead of using their powerful bodies for melee fighting, they chose to broaden their weapons, increase caliber size, with the maximum recoil their bodies can withstand as the basis for modification, wildly increasing the caliber of their guns, becoming mobile sources of firepower on the battlefield!]

"As expected, no new profession was unlocked, just the remaining three options."

"Two first-tier professions, Gunner and Gunfighter, and the second-tier profession Mechanical Wanderer."

Su Yu looked at the three professions on the panel, hesitating slightly.

"Mechanical Wanderer is a purely combat profession, with experience mainly derived from creating melee mechanical weapons and gaining battle kill experience."

"Plus, the experience required for a second-tier profession to level up is too much, which means if I choose Mechanical Wanderer, it's unlikely to reach max level in a short time, making another job change impossible quickly."

"On the other hand, the experience required for first-tier professions are already minimal for me now. Whether it's Gunner or Gunfighter, I am confident to max out in a day or two, even if the core ability gained after job change isn't satisfactory..."

"It allows switching to another profession quickly in the short term."

Thinking this, Su Yu made a decision in his heart.

"The Gunfighter profession, which focuses on mid-range attack using extraordinary gun skills, is currently less fitting for me compared to Gunner."

"I choose to switch to Gunner!"

With a thought, Su Yu changed the job change panel.

[Ding!]

[Congratulations Host, successfully employed. Current profession: Gunner (lv1: 0/10000).]

[Congratulations Host, successfully awakened core ability: Gun Master (lv1), as an experienced Gun Master, any firearm in your hands is wielded with total ease, and even the most powerful guns are mere toys to you. From years of combat, you've learned a straightforward truth.]

[No matter how precise the sniping, it's no match for a wide-ranging indiscriminate artillery barrage.]

[The range of power your firearms possess increases by ten percent, maxing out at two hundred percent!]

After switching to Gunner, Su Yu no longer paid attention to the job change panel.

Instead, he focused his gaze on the Ghost Wolf Riders currently engaging the Skeleton Settlement.

The Ghost Wolf Riders had respectable quality, or rather, having been long-soaked in Ghost Energy, they were already extremely thrilled by bloodlust and battle.

Although Su Yu's earlier strike had startled them, under the stimulation of Ghost Energy, their bloodthirsty nature still outweighed their fear of Su Yu, and they continued fighting fiercely with the people of the Skeleton Settlement.

Chapter 242: Annihilate Five Stars! Legion Mechanic lv max! Core Specialization: Power of Resonance!_3

Moreover, in the eyes of the Ghost Wolf Riders, the power of Su Yu's strike should have been charged for a long time. It's estimated that a similar attack would be impossible to launch again in a short period.

"A full five hundred two-star Transcendents, this is an experience point opportunity not to be missed."

Excitement flashed in Su Yu's eyes. He felt that he might be able to upgrade the Gunner to the maximum level right away.

At the moment, Su Yu did not hesitate and once again took out the electromagnetic sniper cannon from his back.

After a moment of cooling, the electromagnetic sniper cannon was ready for normal use again.

"Nuonuo, mechanically fuse with the Azure Oath, and fully supply energy to the battle armor for the next attack."

"To kill these two-star Wolf Riders, there's no need to expand the power of the electromagnetic sniper cannon so greatly. It's too wasteful, and after one shot, the barrel needs a moment to cool down."

Su Yu, piloting the Azure Oath, charged towards the middle of the Ghost Wolf Riders.

Su Yu's speed was extremely fast, even Kuang Gu could only see a blue-white blur swiftly shuttling through the crowd.

Quickly, Su Yu arrived in front of the Ghost Wolf Riders, ignoring the members of the Skeleton Settlement battling the Ghost Wolf Riders.

Su Yu directly exerted force with his legs, leaping over this mixed group, arriving above the Ghost Wolf Riders' formation.

He raised the electromagnetic sniper cannon, aiming at the densest part of the Ghost Wolf Riders' ranks.

Aim, pull the trigger!

Boom!

Another electromagnetic bomb, although the power of this one was much smaller than before, only at the five-star top level.

But the range was still significant, and a five-star top-level power was already a catastrophe for these Ghost Wolf Riders, who averaged a mere two-star strength!

The electromagnetic bomb crashed violently into the crowd of Ghost Wolf Riders.

Accompanied by the descent of white electromagnetic light,

A massive amount of plasma exploded from the epicenter of the electromagnetic bomb.

Countless white electric arcs traversed the Ghost Wolf Riders, turning the two-star Ghost Wolf Riders into charred remains one by one.

Even the devices on their backs that stored ghost energy exploded at this moment.

Meanwhile, Su Yu controlled the Azure Oath Mechanical Battle Armor, calmly adjusting his position in mid-air.

Eventually, he landed steadily in a less populated area of the Ghost Wolf Riders.

After landing, Su Yu wasted no time, directly drawing out the chain saw blade from his back.

At this moment, the Sea Blue Core in his chest output energy. The energy surged into the chain saw blade, setting it rotating.

"Buzz buzz buzz!"

The chain saw blade in Su Yu's hand began spinning wildly at this moment!

Holding the chain saw blade, Su Yu viciously tore through the bodies of several Ghost Wolf Riders in front of him.

Blood splattered everywhere, drenching the red chain saw blade in a bright crimson hue!

But Su Yu was very careful, not breaking the ghost energy storage tanks on their backs.

A large number of Ghost Wolf Riders around were also provoked into a frenzy by Su Yu's ferocious attack.

All rushed towards Su Yu!

However, the next moment, seizing the absence of Ghost Wolf Riders interfering with him, Su Yu exerted his legs once more.

Leaped high!

Returned the chain saw blade to his back, as the electromagnetic sniper cannon reappeared in Su Yu's hands.

In the next moment, another electromagnetic bomb fell among the Ghost Wolf Riders!

The familiar white light exploded once more! The familiar plasma once again turned these Ghost Wolf Riders into charred remains!

This astonishing scene caused both sides in the fray to hesitate for a moment.

"This strongman from the Mechanical City, how can his attacks at this level not require cooling? Doesn't his barrel overheat?"

Even Kuang Gu, at this moment, stared dumbfounded at Su Yu. He originally thought that after firing that shot, Su Yu would not be able to attack again, believing that level of attack should have limitations, as proven by Su Yu's brief pause earlier.

Even the Ghost Wolf Riders thought the same, originally believing that Su Yu could not possibly unleash a similar attack again in a short time.

But now, after just a moment, Su Yu launched a new attack again.

At this point, the group of Ghost Wolf Riders was utterly terrified.

Even the bloodthirsty desire under the influence of ghost energy, at this moment, was suppressed by the fear of death.

Among the Ghost Wolf Riders, several began retreating quickly.

And soon, this behavior of one or two retreating evolved into a full-scale rout of the entire Ghost Wolf Riders.

The people of the Skeleton Settlement did not pursue because at this point, the ghost energy storage tanks on the dead Ghost Wolf Riders had exploded, and the leaking ghost energy now enveloped most of the battlefield, offering the Ghost Wolf Riders the best cover for their escape.

Regarding ghost energy, the people of the Skeleton Settlement naturally didn't want to touch it, as once contaminated, there would be no good outcome.

At this moment, Su Yu also maneuvered the Azure Oath to avoid the scattered ghost energy, relying on the armor's speed to begin pursuing the fleeing Ghost Wolf Riders.

By now, the Ghost Wolf Riders had been so thoroughly intimidated by Su Yu's prowess that in their eyes, even those Ghost Hunters with titles in the Ghost Tribe were no match for Su Yu.

"Such a formidable enemy, perhaps only our High Priest can deal with him. We have to quickly return to the tribe and inform the High Priest of this person's presence..."

"With so many of us, a few should at least manage to escape that mechanical monster's grasp."

This Ghost Wolf Rider clung to this faint hope, continuously steering the giant wolf beneath him to flee.

However, the next moment, the scene before his eyes filled him with utter despair.

Not far ahead of the fleeing Ghost Wolf Riders,

A group of three-meter-tall humanoid mechanical creations, emanating a ghostly blue glow, were waiting for their escape!

Chapter 243: Ghost Wolf Riders Annihilated! Master Gunner lv max! Core Specialization, Convergence!

Su Yu watched the group of fleeing Ghost Wolf Riders.

Silently in his heart, he thought, "You won't be able to escape, I won't let a single one get away."

Those twenty-three Shadow Hunters had already followed Su Yu's orders and arrived at the rear of the Ghost Wolf Riders, lying in wait here.

The Shadow Hunters were intelligent machines specialized in long-range sniping.

Unlike the Steel Defender's frontal combat strategy, the Shadow Hunters excelled in unparalleled sniping and agile evasion capabilities.

Under Su Yu's spiritual energy operation, the twenty-three Shadow Hunters were controlled and amplified by his spiritual energy at this moment.

Each Shadow Hunter was equipped with six ultra-long-range sniper rifles; though their range wasn't as extensive as Su Yu's Electromagnetic Sniper Cannon, they were unmatched in accuracy.

In the next moment, all twenty-three Shadow Hunters raised the six ultra-long-range sniper rifles mounted on their backs simultaneously.

Each rifle's muzzle was aimed at a different Ghost Wolf Rider.

Bam!

Bam!

Bam!

The sound of gunshots echoed throughout the Land of Skeletons.

The heads of those Ghost Wolf Riders all revealed bloody holes.

Meanwhile, Su Yu heard the pleasant upgrade notification sound.

[Ding!]

[You successfully killed a three-star Ghost Wolf Rider, you gained professional experience (Gun Master)...]

[You successfully killed a two-star Ghost Wolf Rider, you gained professional experience (Gun Master)...]

[...]

[Gun Master level up! Gun Mastery synchronously increased!]

[Gun Master level has increased to level 13]

"Indeed, the experience required to level up a first-tier profession is minimal for me now, I estimate that once this group of Ghost Wolf Riders is completely wiped out, the Gun Master profession will reach the max level!"

With this thought, Su Yu looked at the remaining two hundred Ghost Wolf Riders, scattered and fleeing.

Once again, he commenced the pursuit!

At this point, the Ghost Wolf Riders were filled with extreme fear.

They finally experienced the same terror that they had inflicted on the inhabitants of the small settlements they destroyed.

"This is impossible, how could such powerful strength, such powerful Mechanical Creation, be nurtured in this Dead Silence Wilderness?"

A particularly lucky Ghost Wolf Rider was still escaping, his strength was at the peak of three stars, close to breaking through to four stars.

This three-star Ghost Wolf Rider was extremely skilled in riding, and the mechanically transformed giant wolf he rode was helping him move erratically to avoid being shot.

"I can't die here; I'm going to become four stars and earn the title of Ghost Hunter..."

However, in the next moment, this thought was interrupted as an invisible blade pierced through his chest and heart.

The Ghost Wolf Rider looked incredulously at the large hole in his chest.

In the next moment, the invisible blade in his chest gradually became visible, turning into a ghostly blue metallic long knife. The Ghost Wolf Rider followed the blade to see his killer, the Shadow Hunter.

At this time, other Shadow Hunters were continually using invisibility and quick movements to kill the fleeing Ghost Wolf Riders.

Clearly only twenty-three of them, but in the eyes of the Ghost Wolf Riders, they were like an army of invisible ghosts, Shadow Hunters lurking in the dark!

"So, these mechanical creatures can turn invisible..." this moderately powerful three-star Ghost Wolf Rider thought, sinking permanently into darkness.

The efficiency of the Shadow Hunters was particularly high, especially against these fleeing Ghost Wolf Riders.

In Su Yu's viewpoint, if these Ghost Wolf Riders had not fled separately, their numbers could have posed a certain threat to the Shadow Hunters.

However, this group of Ghost Wolf Riders was already utterly scared by Su Yu's initial shots, they dared not resist at all.

They only thought of escaping, which naturally made them silent targets for the Shadow Hunters who excelled in chasing and killing.

Quickly, the Shadow Hunters successfully wiped out the remaining Ghost Wolf Riders.

At that moment, Su Yu's profession panel chimed with a pleasant sound.

[Ding!]

[You successfully killed a three-star Ghost Wolf Rider, you gained professional experience (Gun Master)...]

[You successfully killed a two-star Ghost Wolf Rider, you gained professional experience (Gun Master)...]

[...]

[Gun Master level up! Gun Mastery synchronously increased!]

[You gained one hundred thousand points of professional experience (Gun Master lv max)!]

"Gun Master is max-level." Su Yu looked at the notification on the profession panel.

Not surprisingly, leveling up a first-tier profession for Su Yu now wouldn't take much time.

Even without this squad of Ghost Wolf Riders, Su Yu could max out by hunting Radiation Beasts in the wilderness within two days.

"Let's see what specialization I can draw this time."

Su Yu looked at the profession panel with anticipation.

[Ding!]

[Based on your max-level core ability (Gun Mastery), you have gained Core Specialization (Convergence)]

[Core Specialization: Gun Mastery]

[Description: As a Gun Master, you always believed that bigger calibers lead to wider ranges, and wider ranges lead to greater damage. Amidst the silent eras, you have realized the special ability of using Spiritual Amplification to enhance explosion effects. To you, art is the sound of explosions ringing amidst countless rounds of artillery fire.]

[You can imbue your firearm attacks with special spiritual energy, causing the next attack to have a more violent explosion effect.]

Chapter 244: Ghost Wolf Riders Annihilated! Gunner Lv Max! Core Specialization, Convergence!_2

"An explosive effect, hmm, it can actually stack with other core specializations." Su Yu looked at this brand new core specialization—Convergence, and felt quite satisfied in his heart.

Just then, a prompt appeared on the job transition panel.

[Congratulations Host, as your Gunsmith level is maxed, you can now proceed with a new job transition]

[Conditions met for the host; a new job path has been unlocked!]

"Unlocked a new job path? Does this mean a new job transition has been unlocked?"

Su Yu felt secretly delighted.

"After maxing the level of the Gun Master, the unlocked new profession is likely a second-tier job! It might even be a brand-new second-tier job in the direction of an Extraordinary Mechanic!"

At that moment, Su Yu looked at the job transition panel.

He ignored the Gunfighter and Mechanical Wanderer options.

Su Yu focused his attention on the last, newly appeared career choice.

[Available Job Path: Second-tier Profession·Military Mechanic]

[Battlefield Mechanic (Primary) + Gun Master + Gun Master lv max + Steel Meditation lv max + Remote Mechanical Manufacturing lv max + ... = Military Mechanic]

[Introduction: One of the advanced professions of the Battlefield Mechanic, the Military Mechanic excels in creating powerful long-range attack mechanical legions, excelling in firepower bombardment, fire suppression...]

[They are the ace mechanic in defensive warfare, and their mechanical legion often has strong long-range firepower suppression capabilities, extremely adept at positional warfare.]

"Military Mechanic, hmm, this should be a kind of second-tier Mechanic, only different from the Legion Mechanic, who excels in legion command, and the Mechanical Wanderer, who specializes in special operations; this kind of Military Mechanic is more skilled in positional warfare."

"Even though it can control intelligent mechanics, this Military Mechanic excels more in defense and long-range weaponry manufacturing, which is quite suitable for me, be it the upcoming Mechanical City or direct confrontation with the Ghost Tribe, this profession fits me well."

After briefly hesitating while looking at the Military Mechanic transition option, Su Yu decided not to choose it.

"Better to max out the Gunfighter, this first-tier profession, before transitioning to another second-tier job. In at most two days, the Gunfighter will be maxed out, and at that time, I can acquire new specializations and then transition to the Military Mechanic without delay."

Su Yu quickly made up his mind.

"Job transition to Gunfighter!"

[Congratulations Host, successfully transitioned, current job: Gunfighter (lv1: 0/10000).]

[Congratulations Host, successfully awakened core ability: Gunfighting Skill (lv1), the exclusive spiritual energy skill of Gunfighters. For these transcendent gunmasters, bullets in their hands can be perfectly controlled; you can use spiritual energy to fine-tune bullet trajectories.]

Looking at the newly emerged ability, Su Yu tried using it and found that this Gunfighter can also be applied to the Electromagnetic Sniper Cannon, leaving him incredibly satisfied.

"This ability can indeed be considered a supplement. Although the Electromagnetic Sniper Cannon has great power, there's still a risk of others dodging it. Now, with my Gunfighting Skill, I can use spiritual energy to adjust the bullet trajectory. Although the Electromagnetic Sniper Cannon has a slightly larger caliber, it's still a gun."

Afterward, Su Yu glanced at his job transition panel.

[Name: Su Yu]

[Professions: Mechanic max, Gunsmith max, Battlefield Mechanic lv max, Wilderness Hunter lv max, Fighter lv max, Mechanical Warrior lv max, Legion Mechanic lv max, Gun Master lv max]

[Current Job: Gunfighter (First Tier)]

[Job Tier: Second Tier]

[Skills: ...]

[Core Abilities:]

[Mechanical Affinity max (Core Specialization: Heart Blood Creation)]

[Perception of Killing Intent max (Core Specialization: Holographic Perception)]

[Steel Meditation max (Core Specialization: Electromagnetic Fury)]

[Hidden Kill max (Core Specialization: Shadow Cloak)]

[Adaptability max (Core Specialization: Undying Body)]

[Heart of Steel max (Core Specialization: Steel Spirit)]

[Steel Resonance max (Core Specialization: Power of Resonance)]

[Gun Master max (Core Specialization: Convergence)]

[Gunfighting Skill lv1]

[Extraordinary Level]

[Spiritual Series Star Level: Five-Star Top Level]

[Physical Body Series Star Level: Five-Star Advanced]

Looking at his own panel, Su Yu was also incredibly satisfied.

"The advancement in Gun Master level focuses more on physical enhancement, and upgrading a first-tier profession won't increase much for someone like me, already at a five-star level, but now the physical body star level has successfully risen from five-star beginner to five-star advanced level."

"Thus, as the Gunfighter maxes out, my spiritual power and physical body, even though unable to break through five stars, can achieve five-star top level, just a sliver away from six stars."

"And when the Gunfighter is maxed, after I transition to a new second-tier profession, then both my physical body and spiritual power will similarly reach a six-star beginner level!"

Su Yu's eyes were filled with excitement.

"Furthermore, with Electromagnetic Fury, Convergence, Hidden Kill, and the dawn form of the Azure Oath Mechanical Battle Armor, the power of a strike relying on the Electromagnetic Sniper Cannon in my extreme state will surely far exceed my expectations."

"Who knows, under one shot, the Gunfighter might directly max out."

Su Yu even felt a temptation in his heart to fire a shot at the Ghost Tribe now.

But soon, he dismissed the thought.

"However, there's no need, as this squad of Ghost Wolf Riders has already been wiped out by me. Although the Ghost Tribe monitors all the settlements in the Dead Silence Wilderness, they shouldn't have a detailed grasp of each settlement's exact situation."

"Otherwise, when I killed Li He earlier, the Ghost Tribe would have come for me. This time, the Ghost Tribe attacked the Skeleton Settlement partly to make an example out of them; on the other hand, because the commotion during the Iron Heart Tribe's relocation was too significant, which attracted the Ghost Tribe's attention."

Chapter 245: Ghost Wolf Riders Annihilated! Artillery Master lv max! Core Specialization, Convergence!_3

"The loss of five hundred Ghost Wolf Riders is a terrible blow to the Ghost Tribe. After all, they are five hundred two-star Transcendents, and the total number of Ghost Wolf Riders is only about two thousand, so losing a quarter of them at once is significant."

"Now, with those five hundred Ghost Wolf Riders completely annihilated, it will undoubtedly attract the attention of the Ghost Tribe. They will investigate the cause of the Ghost Wolf Riders' demise. But

before they figure it out, they will surely be wary of the power that could wipe out five hundred Wolf Riders, and in the short term, they should be cautious."

"I can definitely use this time to gather people from all the small settlements in the Dead Silence Wilderness, and by using resources to create new Mechanical Creations, the balance of power will be clearly in my favor, with no need to take risks."

Thinking of this, Su Yu looked at the battlefield at that moment and noticed that after the death of a large number of Ghost Wolf Riders, the Ghost Energy escaping from the Ghost Energy Storage Tank had polluted the entire Land of Skeletons.

"This Land of Skeletons is already completely unsuitable for human habitation. This type of Ghost Energy pollution won't dissipate for ten or even dozens of years."

"Ghost Energy has caused so much harm to this Ruins Star, the Ghost Tribe..."

Su Yu frowned gloomily, remaining vigilant against the Ghost Tribe, even though he had easily wiped out the five hundred Wolf Riders of the Ghost Tribe this time.

But that was because the Ghost Tribe had not anticipated the emergence of someone like Su Yu in just two months in this Dead Silence Wilderness.

"This time, it was the Ghost Tribe's lack of preparedness, or you could say they underestimated the enemy, as in past years, the small settlements in the Dead Silence Wilderness were just flocks to be plundered at will by the Ghost Tribe."

"However, next time, the Ghost Tribe will not be as easy to deal with as they are now."

While thinking, Su Yu had already called back those Shadow Hunters and started walking towards the Skeleton Settlement.

Skeleton Settlement.

At this moment, the people of the Skeleton Settlement were already packing up their things as this area had been polluted by Ghost Energy and was no longer suitable for habitation.

Upon seeing Su Yu's arrival, Kuang Gu and the people of the Skeleton Settlement looked at Su Yu with a sense of awe.

The sudden appearance of Su Yu, along with his instant elimination of a powerful enemy that even Kuang Gu thought he couldn't handle, and his easy re-writing of the battlefield situation, left the people of the Skeleton Settlement in awe of Su Yu.

As members of a Scavenger-based settlement, they knew clearly that in the Dead Silence Wilderness, such formidable strength is equivalent to supreme power.

At this moment, Kuang Gu cautiously walked up to Su Yu and asked, "Are you the administrator of Mechanical City, my lord?"

Su Yu nodded and said, "It's me."

As he spoke, Su Yu opened the faceplate of his Mechanical Battle Armor.

Seeing the young face underneath the faceplate shocked Kuang Gu even more.

"A powerful figure with such strength is so young? Is this the administrator of Mechanical City?" Kuang Gu dared not show any disrespect towards Su Yu, but he was still utterly amazed.

Though Su Yu had been wearing the Mechanical Battle Armor during the previous battle, relying on Mechanical Creations to fight,

Kuang Gu knew that the mechanized movements of the Mechanical Battle Armor couldn't be achieved without powerful strength.

Moreover, Mechanical Creations themselves are part of one's strength.

Thinking of this, Kuang Gu lowered his head, his three-meter-high figure appearing somewhat small in front of Su Yu in his Azure Oath: "Administrator of Mechanical City, we at the Skeleton Settlement thank you for your rescue."

"Furthermore, we at the Skeleton Settlement are willing to join Mechanical City and serve you, the administrator, my lord."

"However, most of the people at the Skeleton Settlement are composed of Scavengers from the wilderness, often with some bad habits."

Kuang Gu's attitude was extremely humble, and although he previously had no inclination to submit to others as the hunter of the settlement,

now, with Su Yu's rescue and Su Yu's formidable strength, Kuang Gu felt only admiration.

He was utterly convinced.

Su Yu nodded. He planned to accept everyone in the Skeleton Settlement, as Mechanical City was in desperate need of people.

As for the bad habits that Scavengers developed in the wilderness, Su Yu had the Rangers responsible for law and order to teach them a lesson.

Su Yu then closed the faceplate once more, now only wanting to return to Mechanical City, resupply, and then lead the Rangers legion to the wilderness to grind out experience points for the Gunfighter.

Before leaving, Su Yu added,

"I remember your name is Kuang Gu, right? You should have a way to contact the Iron Heart Tribe, right? Remember to contact the Tie Xin Clan Leader and inform them of the situation here, so they can send someone from Mechanical City to support you. Additionally, you can use the means of the

Skeleton Settlement to inform other Scavengers still in the wilderness that Mechanical City is willing to accept Scavengers and inform them of the threat from the Ghost Tribe."

"As for the people of the Skeleton Settlement, Mechanical City can accept all of you. After you finish contacting the Tie Xin Clan Leader, you can set off."

After saying this,

Su Yu controlled the Azure Oath and headed back towards Mechanical City.

The twenty-three Shadow Hunters were left behind by Su Yu to provide short-term protection and oversight for the people of the Skeleton Settlement.

The Scavengers of the Skeleton Settlement initially had some thoughts, planning not to go to Mechanical City after Su Yu left but to continue scavenging in the wilderness.

After all, having been Scavengers for many years, many of them weren't used to the constraints of a settlement, and even though the Skeleton Settlement was nominally a settlement, it was essentially a loose collection of Scavengers banding together for mutual aid.

Upon seeing the twenty-three three-meter-high azure Mechanical Creations, all such thoughts vanished from their minds.
