

Infinite 251

Chapter 251: News of the Source Core Crystal Vein, the Hunt Begins! Gunfighter lv max!_3

"Before the artificial body transformation, I was just an ordinary person. Over this month, I've felt it too. With the operation of the full-body enhancements, the burden on my brain is getting heavier. I might not live much longer."

Upon hearing this, Su Yu was taken aback for a moment. He hadn't had the experience of performing full-body enhancements on someone before and never imagined the consequences of doing so on an ordinary person.

At this moment, Su Yu activated his Spiritual Energy.

The Spiritual Energy from the Steel Resonance easily perceived Yu Ping'an's current physical state.

Yu Ping'an's condition wasn't good. Although the enhancements provided him with extraordinary combat abilities, Yu Ping'an was essentially just an ordinary person.

The only remaining head, though barely able to control the enhancements with the help of the Intelligent Chip, was also a burden to Ping'an himself.

Moreover, Yu Ping'an was already harboring a death wish. For the past month, he had been dedicatedly contributing to the Mechanical City but was utterly exhausted. If not for his heart set on revenge keeping him going, he would have collapsed long ago.

"Indeed, elevating an ordinary person to high-level four-star, even with enhancements, is still too much."

"Otherwise, one could entirely use large-scale artificial body transformations to enhance a settlement's power in a short period."

Su Yu thought to himself.

"The manager should be able to see the state of my body, so please rest assured, manager, I will surely bring back the Source Core Crystal for you," Yu Ping'an said.

Seeing this, Su Yu nodded. He could tell that Yu Ping'an's words were sincere.

Since this was Yu Ping'an's own decision, Su Yu wouldn't be pretentious.

"After all, the Radiation Land is one of the prohibited zones. It would be too dangerous for me to enter it recklessly. Perhaps let Yu Ping'an scout the situation first."

"Alright, besides, I promise you that I will annihilate the Ghost Tribe."

"However, I still hope you can come back alive to witness the downfall of the Ghost Tribe with your own eyes."

After saying this, Su Yu let Yu Ping'an leave.

Yu Ping'an respectfully said, "Yes, manager."

After Yu Ping'an left, Su Yu opened a hidden door behind the metal platform and entered the Mechanical Space.

Inside the Mechanical Space, hundreds of Cavalry were tirelessly expanding the size of the Mechanical Space day and night.

At this moment, Su Yu looked at the busy Cavalry, activating his Spiritual Energy.

The invisible Spiritual Energy instantly controlled all the Cavalry.

Over four hundred Cavalry stepped out from the metal bridge descending from the Mechanical Space and moved to the outskirts of the Mechanical Hall, heading towards the outside of the Mechanical City.

This time, in order to quickly max out the Gunfighter's level, Su Yu took all the Cavalry, except for the hundred maintaining order, out with him.

Su Yu also donned Mechanical Battle Armor, following behind the Cavalry.

The people in the Mechanical City were all astonished as they watched this scene.

The elders of the Mechanical City were better; they had long seen the manager's mechanical army.

But the newcomers from the Iron Heart Tribe were all amazed at the sight of Su Yu's personal army.

By now, Su Yu had already led the Cavalry to the wilderness outside the city.

Su Yu closed his eyes, his invisible Spiritual Energy expanding.

Covering over four hundred Cavalry.

"Now, I possess five-star top-level spiritual power, not far from reaching six-star."

"Under the influence of the Steel Resonance, my Spiritual Energy range can cover a five-kilometer radius around me, making the surroundings of the entire Mechanical City my hunting grounds!"

Then, Su Yu activated his Spiritual Energy to control the Cavalry to hunt the Radiation Beasts in the wilderness.

This time, however, Su Yu's hunting efficiency was unprecedentedly high.

[Ding!]

[You have killed a Radiation Giant Wolf (three-star mid-level), gaining Professional Experience...]

[You have killed a Radiation Wolf (one-star high-level), gaining Professional Experience...]

[...]

[Gunfighter level increased! Gunfighting Skill level increased simultaneously!]

With the substantial boost in experience gained, Su Yu's level was rising at a rapid pace.

Meanwhile, the Radiation Beasts outside the Mechanical City were decreasing at an astonishing speed.

Even gradually approaching zero.

One night passed slowly.

The residents of the Mechanical City slept soundly, as no howls from Radiation Beasts disturbed their sleep that night.

The next morning.

As the residents of the Mechanical City prepared to go to the resource points for harvesting.

"How is this possible?" A resident of the Mechanical City exclaimed.

"These are... are all corpses of Radiation Beasts! Could it be that the manager did all this hunting in one night?" More residents witnessed the shocking scene before them.

At the gate of the Mechanical City, heaps of small mountains were piled up.

To be precise, they were heaps of Radiation Beast corpses!

This was Su Yu's accomplishment in one night.

And the sound of experience value notifications continued to ring in Su Yu's ears.

[Ding!]

[You have killed a Radiation Giant Wolf (three-star mid-level), gaining Professional Experience...]

[You have killed a Radiation Wild Dog (one-star beginner), gaining Professional Experience...]

[...]

[Gunfighter level increased! Gunfighting Skill level increased simultaneously!]

[Your Gunfighter level is now maxed out!]

"This upgrade speed is much faster than I expected. Indeed, the experience value for a Tier 1 profession is nothing significant to me now."

Su Yu was somewhat pleasantly surprised as he looked at the notifications on the job switch panel.

[Ding!]

[Based on your maxed-out Core Ability (Gunfighting Skill), you have acquired Core Specialization (Flame of Truth)]

Chapter 252: Class Change to Military Mechanic! Core Ability: Warfire Symphony! The Reaction of the Ghost Tribe!

"Flame of Truth?"

Su Yu looked at the information on the transformation panel with a bit of anticipation.

[Core Specialization: Flame of Truth]

[Description: Gunfighters who have mastered Extraordinary Gun Skill; their battlefield is not at the front but against those exotic species living in the shadows. In order to deal with exotic species, gunfighters have mastered the ability to imbue weapons with special Spiritual Energy, which has a potent purification effect on Abnormal Energy.]

[You can imbue the weapons you create with Flame of Truth, which has a special purification effect on abnormal Spiritual Energy.]

Seeing the information displayed on the transformation panel,

Su Yu thought to himself, "Flame of Truth, purification effect?"

Su Yu was aware of exotic species; during the Great Expedition of the Human Empire, all creatures other than humans were referred to as exotic species.

At that time, the Human Empire was at its peak, and all exotic species were suppressed by humans.

However, later on, with the uprising of Subspace, the exotic species also launched a rebellion.

"If the Flame of Truth has a special purification effect on Abnormal Energy, then it wouldn't hurt to try it."

"This ability might even purify Radiation or Ghost Energy."

Thinking of this, Su Yu immediately tried to channel Spiritual Energy.

He silently chanted in his mind, "Flame of Truth."

In the next moment, Su Yu felt his Spiritual Energy being mobilized, gradually condensing in his hand.

Soon after, a cluster of white flame, tangible Spiritual Energy, emerged from Su Yu's hand.

This cluster of Spiritual Energy quickly began to twist and ascend along the right arm of Su Yu's Mechanical Battle Armor, eventually transforming into a white flame of Spiritual Energy wrapped around Su Yu's entire right arm mechanical armor.

"Is this the additional effect of the Flame of Truth?"

Su Yu then had the Wolf Riders bring a Radiation Beast.

Subsequently, Su Yu raised his right arm and pressed it onto the body of the Radiation Beast.

In the next moment, in Su Yu's observation, the appearance of the Radiation Beast did not change.

However, under Su Yu's Spiritual Energy perception, he could sense the radiation within the Radiation Beast continuously weakening.

Soon, before long, all the radiation from the entire Radiation Beast had vanished.

"Purification, such a domineering power?"

Su Yu's eyes gleamed with joy; for other gunfighters, this ability could at most be attached to weapons and bullets, providing a slight increase in combat power. But for Su Yu, he could completely imbue the Flame of Truth onto the Mechanical Creations he created.

In this way, the purification effect on exotic abilities would enhance the damage of all Mechanical Creations.

"Speaking of the long term, with this Flame of Truth, Radiation Beasts, which were originally inedible, can now be purified and made edible again."

Thinking of this, Su Yu immediately tested the sustained effect of the Flame of Truth.

After purifying dozens of Radiation Beasts, Su Yu noticed the white flame wrapped around his right mechanical armor arm had disappeared.

"Using just an insignificant amount of Spiritual Energy to form the Flame of Truth can last such a long time. Although the Flame of Truth doesn't increase damage, to Radiation Beasts, its purification effect itself is tremendous damage."

"Moreover, since it's exotic energy, Ghost Energy should also count as exotic energy."

"The people from the Skeleton Settlement should be arriving at the Mechanical City today; during their encounter with the Ghost Wolf Riders, many of them were left with traces of Ghost Energy, difficult to eradicate."

"I could attempt using Flame of Truth, but for now, it's time to switch professions."

Su Yu didn't pay attention to the reaction of the Mechanical City residents. After instructing Yang Lie to preliminarily handle the Radiation Beasts—whether they were edible or not, to process and preserve them—Su Yu directly led the Wolf Riders back into the Mechanical Space beneath the Mechanical Hall.

At this moment, Su Yu's physical and spiritual levels had both reached five-star peak, and he was only one step away from breaking through to six-star in the gunfighter's upgrade process.

And this step could be achieved by switching to a new two-tier profession!

Upon arriving at the Mechanical Space, Su Yu opened the transformation panel.

With anticipation in his eyes, he looked at the current transformation panel.

The transformation panel indicated:

[Congratulations, Host! Due to reaching max level as a Gunfighter, you can transition to a new profession.]

This time, Su Yu took a glance and, without hesitation, made a decision in his mind.

"Switch to Military Mechanic!"

[Ding!]

[Congratulations, Host! Successful transition, current profession: Military Mechanic (lv1: 0/10000).]

[Congratulations, Host! Successfully awakened core ability: Warfire Symphony (lv1), your Spiritual Energy can significantly enhance the long-range attack damage of your controlled Mechanical Creations. When you control a powerful mechanical legion for artillery bombardment, your mechanical legion will bring you a wonderful symphony of warfire.]

[...]

Su Yu only glanced at the abilities of the Legion Mechanic.

He felt that, along with the transition to Military Mechanic, his six-star-tier spiritual and physical barriers simultaneously shattered!

Within the Mechanical Space, Su Yu felt the tremendous power accompanying his breakthrough.

Meanwhile, the original five-kilometer range of his Spiritual Energy had expanded to a radius of ten kilometers.

"The nearly doubled expansion of my Spiritual Energy range, though the total amount and quality of Spiritual Energy haven't doubled, it's still a qualitative leap for me!"

Chapter 253: Class Change to Military Mechanic! Core Ability: Warfire Symphony! The Reaction of the Ghost Tribe! - 2

Su Yu was filled with joy, then Su Yu turned to look at Nuonuo.

As the Mechanical Apostle bound to Su Yu, Nuonuo's strength was directly linked to Su Yu's Spiritual Level.

At this moment, Nuonuo curled into a small ball and looked at Su Yu, saying: "Master, I feel like I'm getting stronger, but I need to sleep for a while."

Saying this, Nuonuo curled up its body, looking like a white metal ball.

Su Yu held Nuonuo in his arms, patting Nuonuo's head and said: "Sleep, Nuonuo."

And it seemed that Nuonuo felt reassured in Su Yu's arms and entered into a slumber.

"Once Nuonuo's slumber ends, Nuonuo's strength will rise to a six-star beginner level. By then, if I wear the Azure Oath, with Nuonuo's Mechanical Fusion and my own power..."

"Even if I don't use any core abilities, I can at least deal with a six-star advanced enemy."

Su Yu was filled with immense excitement. As an Extraordinary Mechanic, and one who has Nuonuo as a Mechanical Apostle, each level breakthrough for Su Yu was a complete transformation in quality!

While Nuonuo was in slumber, Su Yu also began to think about how the Mechanical City and his own development should proceed.

"The Ghost Wolf Riders dispatched by the Ghost Tribe have been annihilated for a day now. As this day passed, the Ghost Tribe must also have realized something was amiss."

"The power capable of destroying five hundred cavalry is something the Ghost Tribe must not underestimate, whether it be a faction or an individual. So next, the Ghost Tribe will certainly dispatch people to investigate the changes in this Dead Silence Wilderness."

Thinking of this, Su Yu recalled the signal bases built by Clan Leader Tie Xin in various small villages before.

"The signal bases can be further utilized and strengthened. We can send out a small number of people and a few cavalry to set up more signal bases in the wilderness, and establish detection equipment similar to radar."

"In this way, no matter when the Ghost Tribe enters the scouting range, their movements will be known to the Mechanical City in the shortest time."

"And with the powerful mobility of the Azure Oath, whatever the Ghost Tribe does, I will be able to respond in the shortest time."

"After changing to a Military Mechanic, the new skills and core abilities I acquired are enhancements focused on the long-range attack direction of Mechanical Creations..."

Su Yu, holding Nuonuo, came before the Core Terminal of the Mechanical Space and said: "Mechanical Spirit, how much longer until the Mechanical City is completely unified?"

"Respected Administrator, at the current construction speed of the cavalry, it will take at least half a month to link the entire Mechanical Space and Mechanical City as one, preliminarily completing the Administrator's plan."

The voice of the Mechanical Spirit sounded from the Core Terminal, and afterward, a light projection appeared, showcasing the current construction progress of the Mechanical City.

In Su Yu's plans, the Mechanical City was a perfect rear base. For this most crucial stronghold of his, Su Yu had put in significant effort.

Once again, calling up the blueprint of the Mechanical City from the Core Terminal, Su Yu used the new skills acquired as a Military Mechanic to reconstruct the plan.

"Military Mechanics excel at positional warfare, due to the effect of the core ability Warfire Symphony, which enhances the Spiritual Energy towards long-range weapons, and moreover, Military Mechanics are better at creating long-range Mechanical Creations."

"So, the original defense on the walls of the Mechanical City can be remade."

"Considering the opponents to be dealt with next, the additional abilities of the Flame of Truth can also be designed into it. After all, the Flame of Truth can last a long time, and a batch can be stocked in advance..."

Su Yu immediately began modifying the original blueprint of the Mechanical City via the Core Terminal.

Su Yu held high hopes for the huge Mechanical Creation that was the Mechanical City, as it was truly a great rear base.

While Su Yu started modifying the blueprint of the Mechanical City and launched the next step in development.

A quarrel broke out within the Ghost Tribe located two hundred kilometers away from the Mechanical City.

The Ghost Tribe was located at the only exit of the Dead Silence Wilderness, nestled at the fork of two forbidden zones.

At this time, in the center of the Ghost Tribe, there was a massive altar, standing over ten meters high and consisting of sixty-three steps. Each level of the steps was piled with heaps of bones.

On top of the altar, five people were kneeling on the ground, and in the direction they were kneeling, a figure in a black robe stood, overlooking them.

These five were dressed similarly to Ghost Wolf Riders, but their attire appeared more special and noble.

They were the leaders of the Ghost Wolf Riders, with a special title: Ghost Hunters!

Leading them was the female Ghost Hunter who destroyed the Wanderer village, named Ye Youhun.

At this moment, Ye Youhun's face showed none of the ferocity she had when slaughtering the Wanderer village. Instead, she wore an expression of extreme fear, looking fearfully towards the black-robed figure.

The black-robed person was completely wrapped in their cloak, with no part of their body exposed, rendering their appearance unclear.

At this moment, the black-robed figure looked down at the kneeling five Ghost Hunters and spoke languidly: "Ye Youhun, you've really gone far, as the new Ghost Hunter, who gave you the courage to slaughter the entire Wanderer village?"

"I remember instructing you to bring back as many people from those villages as possible, not to kill them outright."

Chapter 254: Changing to Military Mechanic! Core Ability: Warfire Symphony! Reaction of the Ghost Tribe!_3

The voice of the black-robed figure was extremely hoarse, sounding like the friction of millennia-old fossils colliding.

Upon hearing the words of the black-robed figure, Ye Youhun's exquisite body shivered slightly.

She mustered up the courage and said, "High Priest, it's not that I wanted to destroy the Wandering Village; their rebellion was too strong, and I couldn't spare their lives..."

She hadn't finished speaking.

The black-robed figure extended his left arm from under the robe, gripping Ye Youhun's throat tightly.

The left arm of the black-robed figure was extremely thin and emaciated, revealing no flesh, and his skin was unlike that of a normal human, covered in wrinkled and decaying gray spots.

With her throat seized by the black-robed figure, Ye Youhun couldn't breathe at all, yet she dared not resist with her Extraordinary Ability, clenching her teeth and pleading, "High Priest, I... I didn't mean to..."

"High Priest, no, Teacher, spare... spare me..."

The High Priest paid no heed to Ye Youhun's pleas, extending his right hand to remove the hood, revealing his face, which appeared like a corpse decayed for thousands of years.

No flesh could be seen, only dry skin clinging to the bones, and even his eye sockets held only a single eyeball, from the other empty socket a hideous tentacle protruded.

The next moment, that hideous black tentacle elongated, drawing closer to Ye Youhun's face.

Terror deepened on Ye Youhun's face, this scene had played out countless times in her memories.

But each time, it filled Ye Youhun with profound fear.

"I know you. You killed those in the Wandering Village just to vent your anger, right?" the High Priest's hoarse voice rang out again. "You hate me but can't avenge me, so you choose to kill those valuable resources to vent your frustration."

"Do you truly hate me that much, my little Ye You? Don't forget, it was my cultivation from childhood that made you a Ghost Hunter," the High Priest's tone carried deep greed.

The tentacle extending from the High Priest's eye socket pierced directly into Ye Youhun's throat, and a trace of satisfaction appeared on the High Priest's mummy-like face.

Ye Youhun's pleas abruptly halted, only her slightly trembling body indicated the fear in her heart at that moment.

The black tentacle spread further downward, though Ye Youhun wanted to retch, she dared not.

Soon, the High Priest retracted the black tentacle from his eye socket.

Ye Youhun's exquisite body collapsed to the ground at that moment, her face pale, seemingly suppressing immense pain, leaving only the expression of fear towards the High Priest.

But Ye Youhun still persevered and thanked, "Thank you, High Priest, for not killing me."

The High Priest said, "This time, I will let you go, but next time, if I find you acting on your whims again, don't blame me for turning you into a Ghost Demon."

"Remember how your predecessor died."

With these words, the five Ghost Hunters present all lowered their heads.

They all dreaded this High Priest, a figure present since the emergence of the Ghost Tribe in this Dead Silence Wilderness.

The Ghost Tribe had been entrenched in this Dead Silence Wilderness for centuries, yet their number of Ghost Hunters always remained at five, and the oldest among them had only lived slightly over sixty years.

Yet this High Priest had led the Ghost Tribe to survive in this Dead Silence Wilderness for hundreds of years.

Ye Youhun lowered her head, never able to forget the pain and torment the High Priest had inflicted upon her.

She bowed her head, fearing the High Priest would see the hatred in her eyes.

After reprimanding Ye Youhun, the High Priest turned his gaze to the others.

Only to hear the High Priest say, "Some unknown upheaval has occurred in this Dead Silence Wilderness, we've lost control over it."

"Next, I need you to investigate the changes in the Dead Silence Wilderness, and how the five hundred Ghost Wolf Riders perished."

As he spoke, the High Priest looked at Ye Youhun and said, "Since five hundred Ghost Wolf Riders were lost, your tribe will fill the gap. Select five thousand people and send them to the Radiation Land to participate in the evolution ritual, to become new Wolf Riders."

"Additionally, there might be remnants of the Source Core Crystal in the Radiation Land, go and see if you can find them."

Upon hearing the High Priest's words, Ye Youhun lowered her head once more.

She was well aware of the brutal nature of the evolution ritual, where out of five thousand entrants, probably only five hundred would survive, and those five hundred would absorb Ghost Energy through mutual slaughter, becoming new Ghost Wolf Riders.

Ye Youhun dared not resist, instead bowing her head and saying, "Yes, High Priest."

At this moment, the High Priest looked towards the direction of the Radiation Land.

An expression of anger and confusion flashed in his eyes.

"Radiation Ghost City... Radiation Land... You City."

The High Priest murmured, "If not for the Ghost Emperor's sudden betrayal of my master, my master would have already freed us from the planet's shackles and led us to the Star Sea, no longer in slumber until now."

"Ghost Emperor... Ghost Emperor, if not for your betrayal a thousand years ago, how would I have become this human-ghost hybrid!"

...

Meanwhile.

Inside the Mechanical Space of Mechanical City.

Su Yu was looking at the upgraded blueprint of Mechanical City, with a satisfied smile on his face.

Chapter 255: The Role of the Flame of Truth, The Rapid Development of Mechanical City, Subduing the Skeleton Settlement

"The essence of the Flame of Truth is essentially a special application of Spiritual Energy. Essentially, it's similar to the enchantment methods Gunfighters use against anomalies, except that for me, the effect is far more significant than it is for Gunfighters."

"Gunfighters often can only attach the Flame of Truth to bullets and weapons, but I can not only attach the Flame of Truth to Mechanical Creations, but also store this special Spiritual Energy."

Su Yu looked at the Mechanical City blueprint in his hand, silently contemplating in his heart.

"This time, the improved blueprint of the Mechanical City doesn't add many new projects, merely incorporating the use of the Flame of Truth and improvements to long-range attack methods."

"Long-range weapons and other components can be entirely entrusted to the Mechanical Spirits and the Cavalry for improvements, which isn't troublesome and can also provide experience for my Military Mechanic."

"As for the part concerning the Flame of Truth..."

While Su Yu was deep in thought, Nuonuo, who was in his embrace, woke up.

Nuonuo floated up from Su Yu's arms, feeling much stronger than before, extremely excited.

Seeing Nuonuo awake, Su Yu didn't waste any time, immediately inputting the blueprint into the Core Terminal and instructed Nuonuo, "Nuonuo, assist me, it's time to get busy."

"The Cavalry needs half a month to forge the entire Mechanical City into a cohesive unit, which is too slow."

"The siege of the Ghost Tribe could strike at any moment; although I don't fear them now, confronting the Ghost Tribe could cause significant damage to the Mechanical City."

With that in mind, Su Yu activated his Spiritual Energy, and now his Spiritual Energy Field had reached a ten-kilometer radius, enough to cover the entire Mechanical City.

Nuonuo cooperated with Su Yu.

In the Mechanical Space, all of the Cavalry began to accelerate the manufacturing of the Mechanical Space under the amplification of Su Yu's Spiritual Energy Field.

Meanwhile, Su Yu controlled the Spiritual Energy, and beside the Core Terminal, he crafted a storage device with metal parts to store the Flame of Truth.

Moments later, the storage device for the Flame of Truth was completed.

Su Yu attempted to condense the Flame of Truth, and soon, the storeroom was filled with the white Flame of Truth.

But Su Yu's actions didn't cease.

In the Mechanical Space, countless mechanical parts piled up, and at that moment, under the control of Su Yu's Spiritual Energy and with Nuonuo's assistance, they began to transform.

They turned into metal pipes, which then aligned with the metal walls at the top of the Mechanical Space, slowly covering the entire area.

Thus, a day slowly passed.

Su Yu looked at the metal pipes covering the whole Mechanical Space, his eyes showing a trace of satisfaction.

"The Flame of Truth can be applied to any weapon. This way, by relying on the storage devices for the Flame of Truth in the Mechanical Space, I can pre-store the Flame of Truth and leave it in the Mechanical City."

"Though I haven't tested the Flame of Truth's purification effect on Ghost Energy, simply relying on its purification effect on Radiation makes this Flame of Truth particularly valuable."

"Not only can it be added to weapons to weaken the strength of the Radiation Beasts, but it can also replace the original Antiradiation Potions in the Mechanical City."

Afterward, Su Yu looked at the storage device for the Flame of Truth.

"For someone like me, who has reached the early stage of six stars, creating this Flame of Truth doesn't require much effort."

"After all, its essence is no different from the Steel Resonance; both are forms of Spiritual Amplification, just more special."

With this thought, Su Yu utilized his Spiritual Energy to begin condensing the Flame of Truth, stacking it in the storage device. It only took half of his Spiritual Energy to fill the entire storage device.

"This way, the Mechanical City's reserves of the Flame of Truth are sufficient for normal usage for a month."

Su Yu opened his manager personal terminal, adding the Flame of Truth to the exchange list, making it available to the residents of the Mechanical City.

Just then, Su Yu's personal terminal received a message from Yang Lie.

"Administrator Sir, the original seven small settlements, Wind City, Iron Heart Tribe, and Skeleton Settlement, have all joined Mechanical City."

"Apart from the ten thousand people from Wind City still en route, the people from Skeleton Settlement and Iron Heart Tribe have all joined Mechanical City, and Clan Leader Tie Xin has also contacted the remaining four settlements, informing them of the Ghost Tribe's actions."

"However, the food in Mechanical City isn't enough to accommodate these people..."

Su Yu thought for a moment and decisively replied, "Uncle Yang, please notify the individuals within Mechanical City who are of captain rank or higher to come to the Mechanical Hall."

"Additionally, have Kuang Gu bring those from the Skeleton Settlement who have been eroded by Ghost Energy to the Mechanical Hall as well; I want to make an attempt."

Afterward, Su Yu left the Mechanical Space and arrived at the Mechanical Hall, waiting for everyone to arrive.

In no time, all the captains currently in Mechanical City had arrived.

Kuang Gu, along with the leaders of the Skeleton Settlement, brought those warriors from the Skeleton Settlement who had been eroded by Ghost Energy to the Mechanical Temple.

Seeing everyone gathered, Yang Lie immediately spoke, "Administrator Sir, the personnel from the Skeleton Settlement has been incorporated into the Mechanical City under the distribution of the intelligent AI Mechanical Spirit."
