Chapter 256: The Role of the Flame of Truth, Rapid Development of Mechanical City, Subduing Skeleton Settlement_2

"However, the food problem is still unresolved." Yang Lie seemed hesitant as he spoke, "Among the Radiation Beasts hunted by the Administrator, only a small portion is edible. The rest have radiation levels that exceed limits."

Su Yu nodded and then said, "Don't worry. I have already solved the food problem. I've found a way to purify the radiation from the Radiation Beasts."

"This way, most of the meat from the Radiation Beasts can be consumed, which is enough for the Mechanical City to accommodate these manpower and sustain until the fast-growing plants in the Water Cultivation Plant System mature."

Upon hearing this, the worry between Yang Lie's eyebrows dissipated.

He continued, "The population in Wind City is too large, so the four Hunting Team Leaders, along with Feng Tian and Huang Ying, have all gone to Wind City to receive these populations."

"As for the other two settlements, they do not need our assistance. They are already on their way to our Mechanical City."

"In less than three days, the populations from these three settlements can arrive at our Mechanical City. By then, the total population of the Mechanical City will reach over 40,000 people."

"But..." Yang Lie appeared hesitant again.

"Those remaining two settlements refuse to believe the news of the Ghost Tribe invasion. To them, the matter of you, Administrator, annihilating 500 Wolf Riders is nothing more than a rumor concocted by Mechanical City and Skeleton Settlement to annex them."

This didn't surprise Yang Lie, as even they at Mechanical City didn't believe at first when they heard about Su Yu wiping out 500 Ghost Wolf Riders.

Upon hearing this, Su Yu didn't react much, but Kuang Gu was somewhat angry.

"Nonsense! Those two settlements are just too foolish. Forget the Administrator, even I, Kuang Gu, couldn't deceive them. Yet, they still think the Administrator is deceiving them. They're simply seeking death." In Kuang Gu's view, those small settlements were completely abandoning their last chance of survival.

However, Su Yu replied calmly and indifferently, "No matter. If they do not wish to join the Mechanical City, then let them be."

In Su Yu's view, after receiving a few small settlements, the Mechanical City already had enough population for development.

The remaining two settlements, since they don't believe Su Yu, naturally Su Yu pays no further attention to them.

Su Yu then looked at Kuang Gu and asked, "Chief Kuang Gu, have you brought along those warriors who were injured from the Ghost Energy infection?"

Kuang Gu nodded and pointed outside the Mechanical Hall, "I've brought them, Administrator. They are waiting outside the hall right now."

"Let them in," Su Yu said casually.

Afterwards, Kuang Gu brought in more than a dozen warriors from the Skeleton Settlement who were waiting outside the Mechanical Hall.

Upon entering the Mechanical Hall, the expressions on these warriors' faces were somewhat anxious and uneasy.

Infections of Ghost Energy, like Radiation, are stubborn and hard to cure.

In many small settlements, those infected by Ghost Energy or Radiation are often abandoned, relying on themselves for survival.

Adding to the contaminating nature of Ghost Energy, many infected people are driven out of their settlements.

This was why the warriors from the Skeleton Settlement felt anxious.

As Su Yu looked at them, he couldn't help but recall the time when he first awakened his career panel, which was due to a Radiation disease infection.

"However, Shelter No. 73, under the leadership of the old Administrator, was somewhat better than other settlements, at least providing Antiradiation Potion."

Su Yu thought of this and said, "You don't have to worry. Since you've joined my Mechanical City, the Mechanical City will not easily abandon you."

Su Yu noticed that the warriors from the Skeleton Settlement looked at him nervously.

Without further words, Su Yu sat on the metal high platform, his fingers slightly lifted as he activated his Spiritual Energy.

The next moment, more than a dozen Flumes of Truth were conjured into existence by Su Yu.

"Administrator, what do you mean by this? They are all warriors of my Skeleton Settlement." At this moment, Kuang Gu couldn't help but step forward, seemingly concerned that Su Yu's action was an attempt to deal with the Ghost Energy-infected individuals to prevent the spread within the Mechanical City.

The high ranks of the Skeleton Settlement were also watching Su Yu, their eyes filled with unspoken worry.

"Don't worry, I'm just attempting to heal them." Su Yu remained calm, unconcerned by Kuang Gu and the others' reaction.

He then addressed the warriors infected by Ghost Energy, "Everyone, you can try touching the white flames in front of you to see if they can purify the Ghost Energy in your bodies."

Upon hearing this, the warriors looked at each other, none daring to be the first to try.

After a while, one warrior finally stepped forward and touched the Flame of Truth before him.

The moment he touched the Flame of Truth, it latched onto his body like a shadow, gradually enveloping the parts of his body eroded by Ghost Energy.

He was initially startled, but soon he realized there was no pain.

Then, to his surprise, the areas eroded by Ghost Energy recovered, and after a moment, all the Ghost Energy in his body was purified by the Flame of Truth.

Immediately, this warrior knelt to the ground, gratefully saying, "Thank you, Administrator, for saving my life."

Upon seeing this, the other warriors also eagerly reached out to the Flame of Truth to purify their own Ghost Energy.

Chapter 257: The Role of the Flame of Truth, Rapid Development of Mechanical City, Subduing Skeleton Settlement_3

Soon, as time passed momentarily, the residual Ghost Energy Erosion on everyone was cleansed by the Flame of Truth.

Su Yu watched this scene, feeling incredibly delighted.

"As expected, Ghost Energy is indeed a kind of Abnormal Energy, and can be completely removed by the Flame of Truth. With this, I have another card to play against the Ghost Tribe."

"Moreover, the effect of the Flame of Truth is far more than that."

As Su Yu was pondering, the warriors of the Skeleton Settlement had already begun to express their gratitude for Su Yu's kindness.

Yet Su Yu waved his hand, signaling Kuang Gu to take these people out.

Afterwards, when Kuang Gu returned, Su Yu looked at him with a subtle smile.

The expression on Kuang Gu and the others from the Skeleton Settlement earlier undoubtedly showed concern for the warriors' safety, demonstrating the cohesion of the Skeleton Settlement.

But now, having joined the Mechanical City, they are essentially Su Yu's subordinates, the citizens of the Mechanical City.

What Kuang Gu did just now, no matter how you look at it, was inappropriate, especially since even the high-ups of the Skeleton Settlement expressed their stance alongside Kuang Gu.

Kuang Gu, having been a leader before, also realized the inappropriateness and immediately spoke, "Administrator, it wasn't intentional, just a moment of worry, it was my mistake, please punish me, Administrator."

The other high-ups of the Skeleton Settlement also realized what happened and collectively apologized to Su Yu.

Looking at this scene, Su Yu thought, "With more and more settlements being integrated into the Mechanical City, managing these people only with the exchange list and contribution system is not enough."

"Although my strength is sufficient to subdue everything, as time passes, the high-ups of these original settlements will inevitably form small groups, which is unfavorable to the Mechanical City and to me."

"However, for now, it doesn't matter, because with the Flame of Truth, I have, in a sense, mastered everyone's second life."

"The purification effect of the Flame of Truth is excellent for both Radiation and Ghost Energy, and on this Ruins Star, avoiding infection by Ghost Energy or Radiation is simply impossible."

With this thought, Su Yu looked at Kuang Gu and spoke.

"Chief Kuang Gu, since you've joined my Mechanical City, you must follow its allocation."

"From now on, Kuang Gu, you will be the captain of the seventh Hunting Squad of my Mechanical City."

"The fighters above four-star level in the Skeleton Settlement will also each lead a Hunting Squad."

The implication of Su Yu's words was clearly to disperse the combat personnel of the Skeleton Settlement and assign them to different Hunting Squads.

In this way, even if Kuang Gu has a good influence among the combat personnel of the Skeleton Settlement, it will fade over time.

Upon hearing Su Yu's words, Kuang Gu felt a little helpless, although he had anticipated this situation when choosing to join the Mechanical City.

However, when that day came, there was indeed a sense of disparity in Kuang Gu's heart.

Su Yu was not surprised by Kuang Gu's reaction.

"Kuang Gu is different from the other leaders integrated into the Mechanical City; Tie Xin enjoys mechanical technology, and since he is an ordinary person, he has no objections to joining the Mechanical City."

"And Feng Tian, the Lord of Wind City, though a leader of a settlement and a Spirit Transcendent, his personality and ideals made him quite willing to join the Mechanical City."

"But only this Kuang Gu..."

Su Yu looked at Kuang Gu's three-meter-tall deformed body, caused by Radiation mutation, and thought: "Kuang Gu was a leader; transitioning from leader to captain is a disparity, and with his Scavenger background, he is somewhat difficult to manage."

"But it doesn't matter, if it becomes unmanageable, just eliminate him."

"To me, forces are dispensable tools for becoming stronger, not something I pursue; only personal strength matters."

"I saved the entire Skeleton Settlement. If Kuang Gu still can't accept the disparity from the change in status and affects the development of the Mechanical City, impacting my resource collection, then eliminating is the way."

Su Yu considered himself not to be extremely evil, but also not a traditional good person.

The original intention of creating the Mechanical City was just to better collect resources from the Dead Silence Wilderness; even assuming the role of Sanctuary Manager was to further nurture himself with resources.

Looking at it now, the effect is evidently good.

At this moment, Kuang Gu apparently figured this out and immediately knelt on one knee, saying, "Thank you, Administrator. From now on, I will certainly serve as the captain of the seventh Hunting Squad for the Administrator."

Seeing Kuang Gu like this, the other four four-star fighters from the Skeleton Settlement also knelt on one knee, accepting Su Yu's command.

Su Yu nodded, then turned to Yang Lie.

Su Yu said, "Uncle Yang, the Flame of Truth that cured the Ghost Energy can also be used to purify Radiation and can be applied to weapons to weaken Radiation Beasts."

"From today onwards, the exchange list will also include the Flame of Truth, which the citizens of the Mechanical City can exchange through contributions."

Hearing Su Yu's words, Yang Lie was slightly taken aback and then incredulously said, "Administrator, do you mean that this Flame of Truth can also cure Radiation sickness? And can be exchanged on a large scale?"

Su Yu nodded, saying, "Yes, starting now, any citizen of the Mechanical City infected with Radiation sickness or Ghost Energy can have a Flame of Truth treatment advance from the management office."

As these words were spoken, everyone in the Mechanical Hall looked at Su Yu in astonishment.

Chapter 258: The Wondrous Use of the Flame of Truth, An Unexpected Arrival, Rescue
Inside the Mechanical Hall.

Upon hearing Su Yu's words, Yang Lie immediately asked, "Does the Administrator mean that this treatment method called Flame of Truth doesn't require you to personally administer it, but can be stored?"

Su Yu nodded and said, "Uncle Yang, this Flame of Truth can be preserved for a long time, and I have already provided the management with a transportation channel for it. So next, as long as the residents of the Mechanical City need it, they can obtain it from the management."

"The treatment effect of the Flame of Truth is much stronger than the previous antiradiation potion."

"Additionally, the Radiation Beasts you handled earlier, those parts that were over-radiated and unsafe to eat, can also be purified with the Flame of Truth."

Hearing Su Yu's words, everyone in the Mechanical Hall quickly realized the preciousness of this Flame of Truth.

Especially Kuang Gu, who regretted his previous reckless actions.

"The methods of the Administrator of Mechanical City are indeed beyond my imagination. This Flame of Truth, capable of healing Ghost Energy and radiation, is incredibly valuable on Ruins Star." Kuang Gu regretted his previous actions immensely, understanding its significance to a faction.

On Ruins Star, radiation and ghost energy are everywhere.

The purification effect of the Flame of Truth is tantamount to granting everyone a second life.

Moreover, Kuang Gu heard from Su Yu's tone that the cost of this treatment method is not expensive. It could support use by all residents of Mechanical City and even be used to purify Radiation Beasts for consumption.

Others in the Mechanical Hall realized this as well, acknowledging the importance of the Flame of Truth to Mechanical City.

Su Yu, observing their reactions, was satisfied and thought, "This way, no matter how many people Mechanical City receives, it won't escape my control."

"Artificial Body Transformation and the Flame of Truth are unparalleled in this Dead Silence Wilderness, providing significant protection for the people of Mechanical City."

Su Yu was well aware that most residents of Ruins Star lost their lives due to radiation and combat injuries.

"As long as I control the Flame of Truth, Mechanical City will remain under my control."

Just then, Su Yu's personal terminal rang.

Su Yu immediately opened his personal terminal. Under the management of the Mechanical Spirit, irrelevant messages were automatically filtered out.

The fact that it was ringing now signified that, by the Mechanical Spirit's judgment, this message was far more important than the matters within the Mechanical Hall.

With the personal terminal opened.

The voice of the Mechanical Spirit AI came through, saying, "Respected Administrator, tracks of the Ghost Tribe were discovered during Wind City's migration."

"Captain Feng Tian and Captain Huang Ying have both confirmed this."

"Moreover, during the migration to Mechanical City, two additional locations spotted traces of the Ghost Tribe."

On hearing the Mechanical Spirit's words, Su Yu furrowed his brows.

"The Ghost Tribe's movements are this quick? Planning to simultaneously annihilate three settlements? No, this seems to be just a probe, a reconnaissance."

Su Yu quickly understood why the migrating three settlements simultaneously saw hints of the Ghost Tribe.

"As I expected, the Ghost Tribe would first investigate what happened in this Dead Silence Wilderness after discovering that five hundred Wolf Riders were decimated, before planning their next move."

"There's no need to worry about Wind City; its own personnel, combined with the combat personnel from the four hunting teams, numbers over a thousand. The Ghost Tribe's reconnaissance team won't be large enough to cause any harm to Wind City."

"But those two smaller settlements have considerable numbers, and without transportation, it would take at least three days to reach my Mechanical City. Three days would be ample time for the Ghost Tribe to react and mobilize troops to destroy them."

Thinking of this, Su Yu promptly instructed Kuang Gu in the Mechanical Hall, "Captain Kuang Gu, you heard what the Mechanical Spirit said."

"Since those two smaller settlements chose to join my Mechanical City, it's our duty to give them protection."

"Captain Kuang Gu, the situation is urgent now. Please lead your men to assist those two smaller settlements, using your former Skeleton Settlement members."

Kuang Gu immediately nodded. He understood this was an opportunity Su Yu offered him. If he seized it, it would mean better prospects in Mechanical City, and the former members of the Skeleton Settlement wouldn't need to be disbanded.

"Yes, Administrator." Kuang Gu promptly responded.

He then left the Mechanical Hall with four four-star members of the Skeleton Settlement.

Su Yu then looked back at Yang Lie and said, "Uncle Yang, I'm entrusting Mechanical City to you next."

Startled, Yang Lie asked, "What about you, Administrator?"

Su Yu replied calmly, "The Ghost Tribe wants to investigate what happened in this Dead Silence Wilderness. Naturally, I can't let them find out so easily."

After saying so, Su Yu entered the Mechanical Space through a secret door in the Mechanical Hall and donned the Azure Oath.

When Su Yu reappeared in the Mechanical Hall,

everyone saw the blue and white Mechanical Battle Armor on him.

Chapter 259: The Wondrous Uses of the Flame of Truth, Unexpected Arrival, Rescue_2

When Su Yu speculated that the Ghost Tribe's purpose was reconnaissance, he had already made up his mind.

"With the speed of the Azure Oath and my body having broken through to the six-star beginner level, I can reach various small settlements within just a few minutes. I can hunt down the reconnaissance soldiers of the Ghost Tribe in the wilderness without fear of any diversionary tactics they might employ. On one hand, the Ghost Tribe still hasn't figured out what's going on in the Dead Silence Wilderness, and on the other hand, I can return immediately in a very short time if there's any problem, thanks to the speed of the Azure Oath."

"Moreover, with my current level of Spiritual Energy, I can cover an area within a ten-kilometer radius around me. Combined with holographic perception and perception of killing intent, wearing the Azure Oath makes me a walking human radar."

"Due to the special nature of Ghost Energy, low-star Ghost Transcendents find it difficult to control the negative state of their own Ghost Energy. They need to reach a certain number and be led by a high-star Ghost Transcendent to suppress the side effects of Ghost Energy. Therefore, for reconnaissance, the Ghost Tribe is likely to send high-star Ghost Energy Hunters in combination with a small team of Ghost Wolf Riders."

Su Yu thought to himself as he walked out of the Mechanical Hall.

The people inside the Mechanical Hall stared blankly at Su Yu's departing figure.

The blue and white figure quickly disappeared from the Mechanical City.

Elder Tie Xin felt that Su Yu's speed this time was twice as fast as when he rescued the Skeleton Settlement.

"Has the strength of Lord Administrator increased again in such a short time?" muttered Clan Leader Tie Xin.

Others in the Mechanical Hall felt an inexplicable surge of confidence as they watched Su Yu's retreating back.

...

Outside the Mechanical City.

The residents coming and going from the Mechanical City all saw Su Yu's blue and white Azure Oath Mechanical Battle Armor.

They couldn't help but gasp in admiration.

Su Yu paid no attention to the reactions of the Mechanical City's residents. He spoke to the Azure Oath that had been mechanically fused by Nuonuo: "Nuonuo, mark the positions of those two settlements and the Wind City team, and help me determine the best route to quickly locate the Ghost Reconnaissance Soldiers."

"Understood, Master," Nuonuo replied.

With Nuonuo's response, a light map appeared before Su Yu's eyes.

In the next moment, Spiritual Energy burst forth, enveloping the entire Azure Oath, and with the amplification of Spiritual Energy, the Azure Oath rapidly advanced across the wilderness.

Meanwhile, Su Yu mentally chanted.

"Holographic Perception."

With the invisible diffusion of Spiritual Energy, everything within the range was clearly perceived by Su Yu.

In no time.

Su Yu's figure arrived at a position not far from the Wind City team.

Without greeting Feng Tian and the others, Su Yu directly instructed Nuonuo: "Nuonuo, activate Shadow Stealth."

Following Su Yu's command, the entire Azure Oath gradually became transparent, eventually becoming invisible.

At this moment, Su Yu's Spiritual Energy fully activated the holographic perception to locate those Ghost Reconnaissance Soldiers.

Su Yu quietly circled around the Wind City team, without meeting Feng Tian and the others, fearing to alert the enemy.

...

At this time, not far from the Wind City team, there was a group of over twenty Ghost Wolf Riders, led by a five-star Ghost Energy Hunter.

The Ghost Energy Hunter was currently gazing into the distance towards the Wind City team.

He wondered, "Is Wind City relocating? Like the Iron Heart Tribe did before? But their migration direction is..."

"Shelter No. 73?" The Ghost Energy Hunter quickly recalled the settlement in the direction of the Wind City team's migration from his memory.

"But Shelter No. 73 is also a small settlement, and from what I remember, it's not as strong as Wind City."

The Ghost Tribe did not fully grasp the information about the Dead Silence Wilderness; relatively speaking, they were somewhat behind. Although the Ghost Tribe regularly explored the changes in the Dead Silence Wilderness, there was no way around it. Due to the special nature of Ghost Energy, members of the Ghost Tribe could not leave their base for too long, or else they would easily be eroded by Ghost Energy and become mindless killing machines.

"So, the people equipped with mechanical bodies in the Wind City team must be from Shelter No. 73? As I recall, we searched Shelter No. 73 just three months ago, so how has there been such a significant change in this short time?"

The Ghost Energy Hunter grew increasingly curious.

But no matter how hard he thought about it, he could never have imagined that the once-small Shelter No. 73, under Su Yu's leadership, had transformed into the Mechanical City in just a few months.

"Could it be that the ones who wiped out my Ghost Tribe's five hundred Wolf Riders were people from Shelter No. 73?" As the Ghost Energy Hunter pondered this.

In the next moment, a transparent chain saw blade appeared in the chest of the Ghost Energy Hunter.

The Ghost Energy Hunter stared blankly at the chain saw blade in his chest.

Then he saw that the transparent chain saw blade quickly became stained with blood, losing its transparency. Subsequently, white Spiritual Energy flames ignited on the blade, and with the white flames' blessing, the chain saw blade began to rotate wildly.

Chapter 260: The Wonderful Use of Flame of Truth, Unexpected Arrival, Rescue_3

The ghost hunter didn't even have time to cry out in pain.

The chain saw blade in Su Yu's hand cut the ghost hunter in half.

Yet, the white flames continued to burn, persistently purifying the remnants of ghost energy on the ghost hunter.

The silhouette of Su Yu, clothed in the Azure Oath, also appeared at this moment.

He looked at the already-deceased ghost hunter and said: "You answered correctly, but unfortunately, you won't die an understanding ghost."

The ghost hunter's face still bore a bewildered expression at the moment of death.

The twenty ghost wolf riders were also startled by the sudden appearance of Su Yu, unsure whether to flee or fight.

Su Yu wasted no words. Invisible spiritual energy formed dozens of flames of truth, dozens of white spiritual flames, floating in the air.

"Let you try, the effect of this flame of truth when dealing with ghost energy Transcendents."

Under Su Yu's control, these white flames entered the bodies of the ghost wolf riders one by one.

With the infusion of the flame of truth, the ghost wolf riders let out painful howls.

This scene, falling into Su Yu's eyes, surprised him somewhat.

"The purification effect of the flame of truth, when used directly on ghost energy Transcendents, actually inflicts severe damage on them."

"Indeed, gunfighters originally used this flame of truth, attaching it to weapons and bullets, to kill those aliens."

"Gunfighters are just a first-tier profession, their spiritual energy is far less abundant than mine, which is stacked with dozens of professions, so they can only choose to attach it to weapons, unlike me."

Su Yu recalled the gunfighter's introduction.

Soon, under the burning of the flame of truth, the twenty ghost wolf riders screamed and howled. Their absorption of ghost energy had long since inseparably bonded them with it.

Unlike purifying those infected by ghost energy, the process of purifying these ghost wolf riders with the flame of truth was essentially killing them.

Before long, the cries disappeared, and these ghost wolf riders were completely reduced to ashes.

"The flame of truth is so effective against ghost wolf riders." Su Yu's eyes brightened.

"This way, when I face the Ghost Tribe head-on in battle, this becomes another means to deal with them."

After confirming the death of the ghost wolf riders and the ghost hunter, Su Yu set off again towards the direction of the other two settlements.

"Ghost hunters, and these elite wolf riders brought out by them, must be hard to cultivate even for the Ghost Tribe."

"Since this is the case, none of the reconnaissance team you sent out will be returning."

Su Yu moved extremely fast, wearing the Azure Oath. In terms of mobility, Su Yu felt there was no one in this Dead Silence Wilderness who could compare to him.

"This is the special attribute of mechanical creations. Unlike flesh and blood, flesh eventually tires, even for Transcendents. But mechanical creations, as long as the energy supply is sufficient, can maintain a perfect state."

Soon, Su Yu found another group of ghost wolf riders.

However, this group of ghost wolf riders did not include any ghost hunters, with only a four-star ghost wolf cavalry captain leading them.

Su Yu was not polite. This time, he did not try the flame of truth but instead used the Azure Oath's shadow stealth state to silently kill these ghost wolf riders.

Thus, the teams of reconnaissance soldiers sent by the Ghost Tribe were found one by one under Su Yu's holographic perception and were assassinated by Su Yu without exception.

...

At this time, in the Ghost Tribe.

The Ghost High Priest stood on the altar, silently gazing in the direction of the Radiation Land.

He sighed softly and said: "My master has been asleep for a millennium, and I have ruled over this so-called Ghost Tribe for hundreds of years."

"When will I be able to awaken my master? When will I be able to return to my normal form..."

Beneath the Ghost Priest's black robe, his sole remaining eye gazed intently toward the direction of the Radiation Land, filled with deep hatred.

In the socket of his other eye, black tendrils reappeared, tightly coiling, pointing toward the location of the Radiation Land.

"Ghost Emperor, you have clearly abandoned humanity. No matter what, humanity will never accept you, yet you chose betrayal at the last moment of my master's success. I truly cannot comprehend..."

Just then, a string of black beads on the Ghost Priest's wrist lit up. The Ghost Priest raised his wrist, and in the next moment, the largest bead on the string exploded.

"How... how is this possible?"

"The ghost hunter sent out for reconnaissance died?"

"Even though I only sent one, it was clearly just a reconnaissance, why would it..."

The Ghost High Priest's hoarse, deep voice suddenly sounded somewhat flustered.

Over the centuries, the Ghost High Priest had been met with joint resistance from other small settlements on the Dead Silence Wilderness, but those settlements had been annihilated by the Ghost Tribe.

Indeed, in the Ghost High Priest's view, if not for the limitations of ghost energy restricting him, he would have long since developed the Ghost Tribe into a large settlement.

But now, the ghost hunter sent out for reconnaissance was killed in an extremely short time.

The Ghost High Priest immediately realized that the changes happening in this Dead Silence Wilderness he had controlled for centuries were far greater than he imagined.

However, even so, the Ghost High Priest was merely somewhat surprised.

"But it doesn't matter much, this batch of ghost hunters matured long ago and should have been my nourishment. It's just unfortunate they died outside before bringing back the bodies for absorption..."

"Hopefully, other reconnaissance soldiers can find out what changes have occurred on the Dead Silence Wilderness."

Yet in the next moment.

All the black beads, large and small, on the Ghost High Priest's string of beads began to explode consecutively.
