Chapter 261: The Transformed Ghost Clan Chief, Ghost Energy Radar Manufacturing, Exploring the Radiation Land

"Clatter."

The black bracelet on the wrist of the Ghost Soul High Priest shattered completely, falling to the ground.

The far more than calm expression on his face could no longer be maintained.

"How... how is this possible?"

"How long has it been since I dispatched ten squads of reconnaissance soldiers, and they're all annihilated?"

For the first time in hundreds of years, the Ghost Soul High Priest was so out of control as he gazed at the black bracelet that had fallen from his wrist.

His withered face showed extreme shock.

The Ghost Soul High Priest was greatly alarmed, not that he felt pain for the deaths of the reconnaissance soldiers; to him, as long as the population of the Ghost Tribe remained, these deceased Ghost Wolf Riders could be replenished at any time.

"Not even twenty minutes, right? Within twenty minutes, these ten squads of reconnaissance soldiers were completely annihilated? When did such a force appear in this Dead Silence Wilderness?"

The Ghost Soul High Priest immediately realized that the development of events might have already exceeded his control.

"Could it be that a strong being discovered the traces of the reconnaissance soldiers and annihilated my Ghost Reconnaissance Soldiers within just twenty minutes? No, impossible..."

The Ghost Soul High Priest thought for a moment and quickly dismissed this possibility.

In his heart, he didn't believe this possibility, for this Dead Silence Wilderness was too barren and the population base too small; it was impossible to nurture such strong beings.

"To sweep through the entire Dead Silence Wilderness in twenty minutes would require surpassing supersonic speed and possessing almost first-strike-kill power against Ghost Hunters, such power at least being six-star high tier, or even seven-star..."

"Impossible, with resources so scarce in this Dead Silence Wilderness, how could such strong beings be born? Coupled with the Ghost Empire's extinction, Meditation Techniques and Physical Body Training Methods have become precious knowledge, this Dead Silence Wilderness was dealt with by me."

"Those small settlements cannot obtain systematic Meditation Techniques and Physical Body Training Methods, they can only rely on talent and instinct to master Transcendent power, their upper limit being four-star, never breaking past five-star."

The Ghost Soul High Priest thought quickly, he relied on mastering the Ghost Tribe, thus turning this Dead Silence Wilderness into his growth nutrient, for hundreds of years.

It was precisely because of this that the Ghost Soul High Priest knew he restricted the spread of Meditation Techniques and Physical Body Training Methods in this Dead Silence Wilderness.

Moreover, after the Ghost Empire's downfall, Meditation Techniques and Physical Body Training Methods on the entire Ruins Star were quite precious.

The Ghost Soul High Priest instinctively didn't believe in such possibilities, nor dared to believe them.

Because he knew, if under such circumstances, a Transcendent above six-star level could be born in this Dead Silence Wilderness, it could only mean that the Transcendent's strength and talent were extremely powerful.

"Could it be that all the small settlements on this Dead Silence Wilderness, without my knowledge, united together and even beforehand found traces of my sent reconnaissance soldiers, then acted simultaneously..."

"Yes, it is most likely this possibility."

The Ghost Soul High Priest quickly analyzed what he believed to be the most likely occurrence.

However, there was still a trace of shadow on the face of the Ghost Soul High Priest.

"However, the possibility of a Transcendent above six-star level being born on this Dead Silence Wilderness cannot be ignored." The Ghost Soul High Priest walked down from the altar, towards a corner below the altar.

The Ghost Energy circulated as the Ghost Soul High Priest opened the secret door at the corner.

Walking inside, he was greeted by darkness.

But soon, pipes emitting a faint green light illuminated the space below the altar.

The space beneath the altar was vast, with a control console on the left side.

And above the center, mechanical pipes were densely packed. These pipes were filled with a large amount of pure black-green Ghost Energy, which continuously flowed along the pipes, infusing into the gigantic body below, a ten-meter-tall giant.

The Ghost Soul High Priest looked at the giant before him, his eyes revealing a hint of satisfaction and pride.

"My greatest Ghost Energy creation, and also the strongest Ghost Demon I can control now, Ghost Clan Chief, I originally thought you wouldn't last this long."

"Unexpectedly, your willpower is so strong, but it's a pity that under the infusion of Ghost Energy, as strong as you are, you can only become my puppet."

The words of the Ghost Soul High Priest drew no reaction from the ten-meter-tall giant, and the Ghost Soul High Priest wasn't angry at all.

He came to the control console, stretched out his withered hand, and operated a few controls.

The next moment, the Ghost Energy in those mechanical pipes was injected into the huge body of the Ghost Clan Chief at a faster speed.

"Now, with an urgent situation at hand, to guard against that possible unknown strong being, I can only prematurely ripen you. You, as this generation's Ghost Clan Chief, are indeed stronger than the previous generations and are my most successful test subject."

The Ghost Soul High Priest gazed greedily at the powerful and robust body of the Ghost Clan Chief, he said, "It's a pity, at that time, you shouldn't have resisted me, isn't it better to accept the fate of your clan peacefully? From the day of absorbing Ghost Energy, your clan was destined to be controlled by me."

"The people of this Dead Silence Wilderness only know that the clan chief of the Ghost Tribe is always the strongest, but they don't know that while the clan chief changes often, the High Priest has always been me, hahaha..."

After laughing, the Ghost Soul High Priest seemed to find it somewhat dull, he said in a tone a bit regretful, "It's a pity, for Li He of the No. 73 settlement, who possessed a psychic talent and even in his childhood caught a glimpse of the Dominator's silhouette. He should have been my nourishment to further myself, but he mysteriously disappeared without a trace."

Chapter 262: The Transformed Ghost Clan Chief, Ghost Energy Radar Manufacture, Exploring Radiation Land_2

"Now, we can only use your daughter as further nourishment. Her spirit strength has already reached a top-tier five-star level, her strength is not far from yours when you resisted me back then."

"I know she hates me, hates that I transformed you, hates the way I've toyed with her over the years, but I'm reluctant to kill her~"

The Ghost Soul High Priest seemed to be provoking the Ghost Clan Chief in front of him, but seeing the giant before him show no reaction, the Ghost Soul High Priest continued, "Your daughter, Ye Youhun, is truly beautiful; I'm really reluctant to kill her."

"However, now to respond to the crisis, when she returns from the Radiation Land, that'll be the day she becomes my nourishment."

The Ghost Soul High Priest seemed to be ascertaining whether the Ghost Clan Chief in front of him had completely lost consciousness due to the Ghost Energy transformation. Seeing no reaction to the provocation about his most beloved daughter, the Ghost Soul High Priest then left the space under the altar.

However.

At the moment when the dark door of the altar space closed,

in the darkness, you could faintly hear the giant, standing ten meters tall, softly murmuring, "Ye... Ye'er..."

That enormous head lowered slightly, and from the eye sockets that had long lost their eyeballs, two silent streams of blood-tears flowed.

...

On the Dead Silence Wilderness.

Su Yu was standing beside a pile of Ghost Wolf Riders' corpses, watching the Ghost Wolf Riders' bodies gradually decompose and purify under the Flame of Truth, turning into nutrients for this Dead Silence Wilderness.

Su Yu inexplicably had a thought in his mind.

"If one day my Spiritual Energy becomes powerful enough to cover the entire Ruins Star, then wouldn't my Flame of Truth be able to purify this planet, cleansing all the radiation and exotic Ghost Energy, and transform Ruins Star back into the Azure Star?"

But soon, Su Yu discarded this idea.

"Currently, all the reconnaissance soldiers sent by the Ghost Tribe in this Dead Silence Wilderness have been completely cleared by me. However, the reconnaissance of the entire Dead Silence Wilderness must be prioritized."

Su Yu realized that the Mechanical City's control over the entire Dead Silence Wilderness was not comprehensive, especially regarding the reconnaissance of the Ghost Tribe.

"This time, only the reconnaissance unit came, and they were only discovered when they got close. If next time, it's the Ghost army that comes."

"We must deploy radars in this Dead Silence Wilderness, along with signal stations, to link with the Mechanical City, so that information from the entire Dead Silence Wilderness can be transmitted back to the Mechanical City in real time."

"The radars don't need to be too precise; they just need to have special perception for Ghost Energy. Anyway, given the Ghost Tribe's special nature, as long as abnormal Ghost Energy is detected, it's enough to locate the Ghost army."

As Su Yu pondered in his mind, he swiftly returned to the Mechanical City.

After returning to the Mechanical City, Su Yu immediately returned to the Mechanical Space to start designing the radar.

In no time, Su Yu had designed the radar blueprint.

Then, Su Yu directly used Spiritual Energy in the underground space to manufacture the radar components one by one.

"In this way, the radars can be handed over to the hunters to be deployed throughout the entire Dead Silence Wilderness. Then, once the Ghost Tribe people appear, they will be detected."

Looking at the pile of radar components in front of him, Su Yu was somewhat satisfied.

And at this time, Su Yu's ears were filled with system notification sounds.

[Ding!]

[You've completed the production of Ghost Energy Radar components, gaining Professional Experience...]

[Military Mechanic level up! Warfire Symphony synchronized rise!]

[You gained 1000 points of Professional Experience (Military Mechanic lv 17)!]

[Your skill experience has reached the requirement, your Professional Skill (Intermediate Information Technology) level up, current level: Lv30 (max)]

Ignoring the extracted Professional Specialization, Su Yu was a bit surprised to see Intermediate Information Technology maxed out.

Intermediate Information Technology is a special technology from the Iron Heart Tribe, enabling the production of the Mechanical Spirit AI, Core Terminal, and Radar.

"Currently, the over ten Professional Skills and Professional Specializations, even though they are passive effects, when stacked together, have become dozens, already making my mechanical technology far superior to other Extraordinary Mechanics."

"The path of infinite career changing, stacking different Professional Specializations and Core Specializations, will undoubtedly lead me down an extraordinary path."

"The Military Mechanic has already been raised to level seventeen, partly due to the expansion of the Mechanical Space continuously providing me with stable experience, and partly because, as a combat profession, eliminating that group of Ghost Reconnaissance Soldiers also accelerated my level-up significantly."

Su Yu then directed his gaze towards those constantly busy Reconnaissance Soldiers within the Mechanical Space.

"Next, when the Mechanical City is completely forged, my Military Mechanic should be maxed out at the same time."

Su Yu opened his personal terminal and sent a message to Yang Lie, informing him to install the Ghost Energy Radar at various locations in the Dead Silence Wilderness, while Su Yu controlled several reconnaissance soldiers to carry out the Ghost Energy Radar components.

Yang Lie replied, "Yes, Administrator, by the way, Captain Yu Ping'an and they have already returned with the citizens of Wind City. The Mechanical Spirit AI has made an initial distribution, and Captain Yu Ping'an wants to meet you."

Upon reading Yang Lie's reply, Su Yu immediately recalled the matter Yu Ping'an mentioned two days ago about going to the Radiation Land to search for the Source Core Crystal, but it had been delayed because of receiving the ordinary people from Wind City.

Chapter 263: The Transformed Ghost Clan Chief, Ghost Energy Radar Manufacture, Exploring Radiation Land_3

At present, Su Yu replied, "Uncle Yang, have Yu Ping'an come to the Mechanical Hall."

...

Inside the Mechanical Hall, Yu Ping'an was looking at Su Yu with admiration at this moment. The news of Su Yu sweeping through the Ghost Reconnaissance Soldiers in the entire Dead Silence Wilderness alone had already spread throughout the Mechanical City.

"Master Administrator, the Mechanical City is no longer short of manpower. Next, I will go to the Radiation Land to find the whereabouts of the Source Core Crystal for you."

Su Yu nodded. He indeed needed Yu Ping'an to first test the waters in the Radiation Land, as it was the periphery of the restricted zone of the Radiation Ghost City after all.

Moreover, to guard against the arrival of the Ghost Tribe, Su Yu was temporarily unfit for long journeys.

"I do need you to explore the Radiation Land for me, but your strength is too weak. Even if you enter the Radiation Land, it's hard to deal with those Radiation Beasts."

"Relax your mind, don't resist."

"This time, you can preliminarily try that initial idea of yours."

Yu Ping'an was taken aback.

Initial idea?

Yu Ping'an quickly realized that Su Yu was referring to that crazy idea.

The crazy idea Yu Ping'an proposed when he just joined the Mechanical City, during a time when revenge seemed hopeless.

Su Yu didn't waste words and directly manipulated Spiritual Energy to further transform and upgrade Yu Ping'an's artificial body.

Under Su Yu's control, Yu Ping'an's artificial body disassembled itself. The two Advanced Intelligent Chips originally implanted in Yu Ping'an's artificial body for combat assistance were also retrieved by Su Yu.

Then, some metal materials piled in the corner of the Mechanical Hall wrapped around Yu Ping'an's body at that moment.

"The initial idea proposed by Yu Ping'an to regard the brain as the perfect Intelligent Chip is not highly feasible. The human brain, after all, is not mechanical and lacks the durability of metal."

"Even if forcibly transformed into a human brain Intelligent Chip and forcibly enhanced, the human brain can't last long. It's just an unsuccessful semi-finished product unless using the brain of a Transcendent as an Intelligent Chip. Someone like Yu Ping'an, an ordinary person, won't work."

"Just like the current Yu Ping'an, although he has undergone artificial body transformation from an ordinary person to the current four-star high-ranking power, a powerful body is essentially torture for his brain."

"If not for the fire of revenge sustaining him, he would probably have perished by now."

Su Yu looked at Yu Ping'an with some regret. For Yu Ping'an, a subordinate with a commendable character and mindset, Su Yu still appreciated him.

During the artificial body transformation, Su Yu had advised Yu Ping'an, but at that time, Yu Ping'an's heart harbored only hatred towards the Ghost Tribe and a single-minded desire for revenge.

Even now, Yu Ping'an was resigned to death. As an ordinary person undergoing high-intensity artificial body transformation, he couldn't live much longer.

Believing and seeing that Su Yu had the capability to destroy the Ghost Tribe, Yu Ping'an only wished to repay Su Yu one last time before his death.

Soon.

Su Yu completed the transformation.

Yu Ping'an's head was once again enveloped with a layer of metallic artificial body.

The current Yu Ping'an looked like a humanoid Mechanical Creation. Su Yu knew that beneath the cold Mechanical Armor, the one in control was still Yu Ping'an.

Su Yu looked at the newly transformed Yu Ping'an and said, "Now, your brain is directly linked with two Advanced Intelligent Chips. Your mastery over the artificial body will improve, and with the transformation I provided, you should now be able to exert combat power comparable to a five-star initial level."

"Also, remember before departure, go to the administration to add the Flame of Truth to your artificial body. It can help resist radiation to some extent."

Hearing this, Yu Ping'an nodded and said, "Yes, Master Administrator, subordinate will surely bring back the Source Core Crystal for you."

After speaking, Yu Ping'an walked towards the exit of the Mechanical Hall.

"Wait," Su Yu stopped Yu Ping'an, "Take these twenty cavalry units with you; they've all undergone radiation-resistant transformations and can assist you in the Radiation Land."

"You don't necessarily have to find the Source Core Crystal. It's okay if you can't. I still hope you can live to see the day when the Ghost Tribe falls."

Having said that, Su Yu said no more and transferred the temporary control of the twenty cavalry units outside the Mechanical Hall to Yu Ping'an.

Yu Ping'an paused slightly and replied, "Yes, Master Administrator."

Then, Yu Ping'an walked out of the door of the Mechanical Hall.

...

Su Yu also returned to the Mechanical Space again.

"Now, the population of Mechanical City has reached forty thousand. There are already fifteen hunting teams, with more than three thousand combat personnel, and even Transcendents count more than thirteen hundred."

"Next, the focus is to integrate the entire Mechanical Space with the Mechanical City above into a single entity."

Standing at the Core Terminal panel, Su Yu thought silently. Then, Su Yu closed his eyes, and intangible Spiritual Energy began to envelop the entire Mechanical Space.

Numerous cavalry units swiftly constructed the interior of the Mechanical Space under the support of Spiritual Energy.

Su Yu didn't remain idle either, using Spiritual Energy to forge metal components, further perfecting the construction of the entire Mechanical Space.

"At this rate, in less than three days, I'll be able to finish integrating the entire Mechanical Space with the Mechanical City into one."

And so, three days slowly passed.

Chapter 264: Mechanical City Completed! Military Mechanic Max Level!

At the center of the Mechanical Space, at the Core Terminal.

Su Yu stood quietly in front of the Core Terminal, his eyes closed, as intangible spiritual energy filled the entire Mechanical Space.

Everything within the Mechanical Space was clearly perceived by Su Yu.

At this moment, on the edge of the Mechanical Space, a large number of mounted troops were on standby.

"Finally, the current Mechanical Space is as large as the Mechanical City above. This unprecedented giant Mechanical Creation is finally about to be forged."

"Now, there's only one last step left, to connect the Mechanical Space with the Mechanical City above as one!"

Su Yu activated the Steel Resonance, and once again, the intangible spiritual energy controlled the mounted troops at the edge of the Mechanical Space.

The next moment, these mounted troops received Su Yu's directives.

They proceeded to dig upwards and began to connect the Mechanical City and the interior of the Mechanical Space with metal creations.

Finally, after another half day's time, Su Yu opened his eyes.

He felt a bit excited inside, after all, this giant Mechanical Creation of the Mechanical City, after so many days of relentless construction, was finally about to be forged.

As the mounted troops linked the last small piece of the Mechanical Space with the Mechanical City above.

In his heart, Su Yu silently chanted: "Heart Blood Creation."

With Su Yu's thoughts operating, the spiritual energy covering the entire Mechanical City underwent a strange change, gaining a certain trait.

Beside Su Yu's ears, a pleasant system notification finally sounded.

[You have completed the construction of a Mechanical City (Exceptional Grade), the difficulty of creating this Mechanical Creation is rated as: Unbelievable, you have gained 500,000 points of Professional Experience...]

[Military Mechanic level up! Warfire Symphony simultaneously increased!]

[You have gained 500,000 points of Professional Experience (Military Mechanic lv max)!]

[Based on your max-level core ability (Warfire Symphony), you have gained a Core Specialization (Full Firepower)!]

As the system notification sounded, Su Yu also felt that his spiritual energy and physical strength welcomed another round of growth!

Before checking the Core Specialization information, Su Yu could only first digest this newfound spiritual energy growth.

The rapid increase in spiritual energy made Su Yu feel faintly that a virtual iron gate in his mind was about to open.

However, his current spiritual energy could only touch the edges of this gate and could not truly open it.

"That iron gate should only be able to be truly opened when my spiritual star level breaks through to Seven-star."

"A Seven-star Transcendent is one who has truly opened the gate of Subspace, and can genuinely access Subspace. Whether it's the physical or spiritual path, at this stage, a transformation occurs. However, no Seven-star Transcendent has ever appeared in this Dead Silence Wilderness."

"I wonder what kind of situation I'll encounter when the Subspace turbulence happens and I reach Seven-star, unlocking this iron gate."

Soon, Su Yu opened his eyes, having already digested the power growth brought by the level increase. His eyes were now filled with surprise.

"The Military Mechanic also focuses on spiritual enhancement. My spiritual star level has already reached six-star advanced level, not far from six-star peak."

"It's the first time the spiritual star level has surpassed the physical body star level, which finally matches my identity as an Extraordinary Mechanic."

"The new specialization, Full Firepower, I wonder what effect it has."

At this point, Su Yu turned to look at the newly acquired Core Specialization.

[Core Specialization: Full Firepower]

[Description: The Military Mechanic excels at long-range attacks and fire suppression. As an experienced Military Mechanic, under fire suppression, you have unique insights. You have mastered the ability to activate the overload firepower of Mechanical Creations through spiritual energy.]

[Activating Full Firepower will, under your spiritual energy, allow the Mechanical Creations you control to overload output for a short period, significantly enhancing firepower effects in a short time.]

"This skill, whether used on mounted troops or to overload other long-range weapons, can greatly enhance my burst capability, and it does not conflict with other Core Specializations..."

"Facing the upcoming war with the Ghost Tribe, this skill can be said to arrive just in time."

After a moment of surprise, Su Yu turned again to the career advancement panel.

"Military Mechanic has already reached max level, so now there are two second-tier careers maxed out, but it seems it's still not enough to unlock a third-tier career."

[Congratulations host, as the Military Mechanic level is maxed, a new career can now be undertaken]

[Detected that host meets the conditions, a new employment direction is now open!]

"Unlocked a new employment direction?" Su Yu looked at the career advancement panel with anticipation.

[Available employment direction: Second-tier Career · Data Mechanic]

[Battlefield Mechanic (primary) + Intermediate Information Technology lv max +... = Data Mechanic]

[Introduction: One of the advanced paths of a Battlefield Mechanic, this kind of Extraordinary Mechanic is not adept at frontal combat. They have forsaken the ability to command armies, turning to maximizing the capabilities of data warfare. Capable of using spiritual energy to invade enemy Mechanical Creations and seize control, the powerful data warfare capability makes every Data Mechanic a top-tier hacker.]

Su Yu looked at this newly emerging second-tier career, with a bit of surprise in his eyes.

"This Data Mechanic, is it because I upgraded Intermediate Information Technology to max level that this new career advancement direction appeared?"

Chapter 265: Mechanical City Cast! Military Mechanic Max Level!_2

"However, this profession doesn't seem to fit the current situation. Instead, it appears more suitable for Mechanic internal conflicts or combating enemies with certain Information Technology capabilities."

"The Ghost Tribe clearly doesn't fit either of these."

"To face the Ghost Tribe, a stronger direct combat ability is required for stability. This Data Mechanic can be considered after dealing with the Ghost Tribe, and then undergo a profession change."

Su Yu pondered silently.

The Ghost Tribe specializes in Ghost Energy and Ghost Energy Technology. Although they have some Mechanical Creations, they are relatively crude and not skilled in information aspects.

"In that case, I choose to become a Mechanical Wanderer!"

Su Yu did not hesitate. On the current profession change panel, only the Mechanical Wanderer and Data Mechanic remained available. Since Data Mechanic was ruled out, only one option was left.

[Congratulations to the Host for successfully changing profession. Current profession: Mechanical Wanderer (lv1: 0/10000).]

[Congratulations to the Host for successfully awakening the core ability: Mechanical Meditation Method (lv1). As an elite among Mechanical Warriors and a variant among Extraordinary Mechanics, Mechanical Wanderers have comprehended a Meditation Method different from the Steel Meditation in countless battles. This Meditation Method enhances Spiritual Energy, allowing Mechanical Wanderers to amplify themselves with Spiritual Energy in direct confrontation! It can also be applied to weapons, unleashing greater power.]

"With this, my Spiritual Energy can have direct attack capabilities like other spiritual Transcendents."

"Moreover, my combat ability will also become stronger and more comprehensive."

Su Yu's eyes flashed with a hint of excitement.

Previously, although Su Yu's spiritual power had reached six-star advanced level, Su Yu's mastered Spiritual Energy was more inclined towards a gentle nature, only usable for augmenting Mechanical Creations.

Even after mastering the Flame of Truth, Su Yu's Spiritual Energy attacks only possessed purification methods.

"Furthermore, the Spiritual Energy of a Mechanical Wanderer can also amplify oneself!" Su Yu immediately wanted to try. Having mastered various Meditation Techniques, Su Yu's Spiritual Energy nature had already become unlike any single path's Mechanic.

But one thing was certain, Su Yu's current Spiritual Energy nature was stronger than any single-path Mechanic!

As the Spiritual Energy filled his entire body and then spread outward onto the Azure Oath.

Su Yu subconsciously waved his right arm of the Mechanical Battle Armor, discovering that both speed and power had significantly enhanced.

"With this, even if I lose all my Mechanical Creations, I still possess at least six-star level combat power."

"In fact, from my perspective, even without using any Mechanical Creations, solely relying on myself, I can still slay six-star level Radiation Lords."

"If I'm wearing the Azure Oath and positioned in the center of the Mechanical Legion, then under the amplification of various core abilities, seven-star level combat power might also be achievable."

After trying it out, Su Yu quickly restrained the excitement in his heart.

He approached the Core Terminal. At this time, the Core Terminal was no longer a single Mechanical Creation, but a new Mechanical Creation integrated with the Mechanical City.

"The Mechanical City is made of ordinary materials. Although its size is massive, it still falls within the range of an excellent-level Mechanical Creation. However, that's fine. The current Mechanical City is just a prototype with many aspects yet to be perfected."

Su Yu's eyes focused intently, looking at the Core Terminal.

The next moment, data about the Mechanical City appeared before Su Yu's eyes.

[Mechanical City]

[Creator: Su Yu]

[Grade: Excellent Level]

[Trait: Steel Lament (The Mechanical City possesses a Mechanical Spirit AI, which normally handles maintaining every part of the Mechanical City's operation. When the Mechanical City is heavily damaged, the Mechanical Spirit AI will temporarily abandon maintaining normal operations to use its computing power to defend against the enemy. The greater the damage the Mechanical City receives, the stronger the combat power of the remaining Mechanical Creations.)]

[Trait: Mechanical City (Mechanical Creations located within the Mechanical City will receive a computing power amplification from the Mechanical Spirit AI.)]

[Trait: City of War (All four walls of the Mechanical City are equipped with numerous long-range attack weapons. Under the control of the Mechanical Spirit AI, the entire Mechanical City can provide fire suppression and unleash powerful counterattack capabilities when facing danger.)]

[...]

Su Yu scanned the panel of the Mechanical City, realizing that as a massive steel fortress, this Mechanical Creation was indeed extremely special.

"Both traits focus on legion amplification, so even if I leave the Mechanical City, as long as I leave behind certain Mechanical Creations, under the control of the Mechanical Spirit AI, the Mechanical City can still possess considerable combat power."

"Moreover, the combat power of the Mechanical City is not limited to the city itself. The residents living within the Mechanical City are also part of its combat power."

With this thought, Su Yu said to the Mechanical Spirit AI, "Mechanical Spirit, show me the current state of the Mechanical City."

"Yes, esteemed administrator," the icy mechanical voice of the Mechanical Spirit responded.

The next moment, a light screen displayed on the Core Terminal.

"Current number of Mechanical City Cavalry: 557 basic Cavalry units, 76 intermediate melee Cavalry units, 10 advanced melee Cavalry units."

"Current number of Mechanical City Steel Defenders: 30 units."

"Current number of Mechanical City Shadow Hunters: 30 units."
