

## Infinite 271

Chapter 271: Radiation Land, the Ghost Tribe Mining Source Core Crystals.

The screen lights up.

In sight is a desolate black-brown land, where no signs of life can be seen, only endless solitude.

Only the occasional roars and howls of the Radiation Beasts remind you that this Radiation Land is deceptively tranquil on the surface, with danger possibly appearing at any moment.

"So this is the environment in the Radiation Land. Compared to the Radiation Land, this Dead Silence Wilderness seems almost lively," Su Yu thought to himself.

At this moment.

Yu Ping'an appeared in the center of the screen; in the images recorded by the cavalry, Yu Ping'an's condition was not good, with even a slight limp in his walk, and his Prosthetic Armor was damaged in several places.

The cavalry was following Yu Ping'an all the way.

By now, it was the third day since Yu Ping'an had entered the Radiation Land. Originally, there were twenty cavalry, but only seven remain, and even Yu Ping'an's whole body prosthetics were covered in scars.

Yu Ping'an turned back to look at the seven remaining cavalry and sighed helplessly, "This Radiation Land is more dangerous than I imagined. The number of Radiation Beast herds encountered is too many."

"In the past two days, we've encountered different types of Radiation Beasts every day, with varying strengths and numbers. Most could be dealt with, but just yesterday, we faced a herd composed of hundreds of three-star Radiation Beasts. Although we finally used the Flame of Truth provided by the master to repel them, only seven cavalry remain, and the stock of the Flame of Truth is also running low..."

Yu Ping'an, as if leaving a message, said to the seven cavalry, "But fortunately, we haven't encountered a too powerful Radiation Beast herd today. Now, we are very close to the Source Core Crystal's mine."

Yu Ping'an continued forward with the remaining seven cavalry, moving cautiously, deeply afraid of encountering other Radiation Beasts in the Radiation Land.

Soon, a small hill appeared in front of Yu Ping'an, and according to the information left by Yu Ping'an's mother, the mine containing the Source Core Crystal was not far beneath this small hill.

However, at this moment, through his modified prosthetics granting him enhanced hearing, Yu Ping'an heard mechanical rumbling noises coming from ahead.

"Buzz buzz buzz!"

It sounded like some kind of mining tool operating at full speed.

And this mechanical rumbling sound was clearly not something a Radiation Beast would make.

At this moment, both Yu Ping'an in the footage and Su Yu watching were filled with doubt and suspicion.

"There are actually people in this Radiation Land? Moreover, they are actively mining Source Core Crystals?" Su Yu glanced at the piece of Source Core Crystal brought back by Yu Ping'an, which wasn't of high purity, "It seems that the reason Yu Ping'an hasn't returned is likely due to this unexpected event."

Su Yu continued watching patiently.

And in the footage, Yu Ping'an also seemed to have heightened his vigilance to the maximum upon discovering that there might be humans ahead.

Yu Ping'an left the cavalry in place and instructed them to remain in a dormant state, not to make any sounds.

He hurried forward alone, swiftly yet quietly advancing towards the small hill.

Soon, utilizing concealment capabilities provided by his prosthetics, Yu Ping'an reached the top of the hill. Then, he cautiously hid behind a rock, quietly peeking out half of his body.

He looked toward the place below the hill from where the mechanical rumbling was emanating.

Su Yu noticed that in the footage, after Yu Ping'an peeked out half of his body from behind the rock, he seemed to have seen something that caused his body to tremble uncontrollably, as if he was struggling to suppress inner emotions.

Su Yu was very curious at this scene.

"The cavalry left by Yu Ping'an at the foot of the hill could only record him climbing the slope and seeing the source of the mechanical rumbling from behind the rock, but cannot understand what Yu Ping'an truly saw."

"However, with Yu Ping'an's modified prosthetics, normally, even if he couldn't suppress his emotions, it wouldn't affect the trembling of the prosthetics." Su Yu pondered while watching the footage of Yu Ping'an suppressing himself, "So, is it because of the impact from Yu Ping'an's brain directly connecting to the Intelligent Chip?"

"Or did Yu Ping'an see..."

"He saw the enemies who destroyed his Wandering Village, who were also his father's killers, which is why his emotions are so uncontrollable..."

"The Ghost Tribe, huh? What do they want the Source Core Crystal for?"

Although Su Yu couldn't see from Yu Ping'an's perspective, he deduced the general situation from the footage recorded by the cavalry and Yu Ping'an's behavior.

At this time, on the hill, Yu Ping'an, after a moment's pause, still chose to come down from the hill.

He returned to the front of the seven cavalry; with his prosthetics-covered face, his current emotions were indiscernible.

But Su Yu could tell from the slight tremor in Yu Ping'an's hand prosthetics in the footage that Yu Ping'an was suppressing his inner anger and hatred.

After standing in place for a while, listening to the increasingly loud mechanical rumbling from the front, Yu Ping'an finally moved into action.

He directed the seven cavalry to slowly advance towards the hill, exerting great control over the sound they made.

Soon, under Yu Ping'an's direction, the seven cavalry slowly reached the top of the hill.

And Su Yu finally, through the footage recorded by the cavalry, saw the source of the mechanical rumbling sound.

Chapter 272: The Ghost Tribe Mining Source Core Crystals in Radiation Land. \_2

It was a mine, an open mine area where a large amount of soil had already been excavated, leaving the originally flat ground pitted and uneven due to the digging.

And this open mine area was vast, seemingly because the original mines had been fully excavated, forcing those who dug to explore other places.

At this moment, the miners were recorded by the cavalry. Their clothing, and the ghost energy canisters they carried on their backs, along with the standby mechanized wolves, who could they be if not the Ghost Tribe's Ghost Wolf Riders?

However, Su Yu noticed that there were over seven hundred Ghost Wolf Riders in the footage, yet most of their auras seemed extremely unstable, as if they had just recently broken through.

Most of the Ghost Wolf Riders were working in pairs, continuously using a mechanical device to excavate the surrounding land of the mine area.

But in most cases, they were just digging up clumps of soil.

Su Yu also noticed that not only were the Ghost Wolf Riders' auras extremely unstable, but they were also all injured in some way.

"Could it be that this batch of Ghost Wolf Riders was just forced to mature? Forced maturation in this Radiation Land? Isn't that too dangerous?"

"These newly forced matured Ghost Wolf Riders are probably meant to replace the hundreds of Ghost Wolf Riders who previously died by my hand. But clearly, they have just matured. Normally, their ghost energy should be stabilized, so why are they brought to this Radiation Land to mine?"

Su Yu was somewhat puzzled in his heart.

Although he had long known that Transcendents of ghost energy could enhance their strength through mutual absorption, and that all Transcendents in the Ghost Tribe essentially possessed the same type of ghost energy, which could be seized by higher-level ghost energy users at any moment.

"No, it shouldn't be. The Ghost Tribe is not lacking people. Instead of saying they brought this batch of newly matured Ghost Wolf Riders into this Radiation Land, it would be more accurate to say they were matured in the Radiation Land."

Su Yu started to think quickly based on the footage and the information he had.

"It should be like this, the Ghost Tribe's Ghost Wolf Riders can only rapidly mature in this Radiation Land. The reason they took the risk to come here is most likely that there is something in the Radiation Land that can mature the Ghost Wolf Riders."

"And what is it in this Radiation Land that the Ghost Tribe needs, which is not available outside?"

Su Yu quickly thought of the ghost energy purportedly left by the Ghost Emperor, which had been detected when analyzing the residual radiation on the cavalry.

"They need the Ghost Emperor's ghost energy to mature the Ghost Wolf Riders! That must be it."

"The Ghost Tribe, according to legends, is already the remnant of the Ghost Empire, inheriting the technology of the Ghost Empire. Now it seems to be true. They not only know that this Radiation Land contains the ghost energy of the Ghost Emperor, but they have also found a way to use this ghost energy to mature the Ghost Wolf Riders."

Su Yu, from the perspective of the cavalry, closely watched the Ghost Wolf Riders who were digging in the mine.

Quickly, Su Yu saw a Ghost Wolf Rider, who was digging well, suddenly turn pale. Next, his body started to reveal innumerable small and large holes, and his body began to bulge abnormally.

Subsequently, this Ghost Wolf Rider suddenly exploded, and the ghost energy in the storage canister on his back also burst open.

The escaped black-green ghost energy turned into a black-green mist.

In the air, inexplicably, strands of black ghost energy emerged and merged into the black-green ghost soul fog, causing the escaped black-green ghost energy to grow slightly larger.

But in Su Yu's eyes, these escaped ghost energies resembled more of absorbing the ghost energy of the Ghost Emperor contained in the radiation than colliding with the Radiation Land.

Furthermore, the ghost energy of the Ghost Emperor was assimilated and transformed into the black-green ghost energy fog!

At this moment, the surrounding Ghost Wolf Riders where the dead Ghost Wolf Rider lay all closed their eyes and began to absorb the escaping ghost energy fog.

Su Yu noticed a slight calmness on these Ghost Wolf Riders' faces, presumably because the assimilated ghost energy from the Ghost Emperor was more harmonious and easier to absorb.

Soon, Ghost Wolf Riders, one after another, began to swell and burst due to the inability to withstand the side effects of the ghost energy and the forced maturation among the over seven hundred Ghost Wolf Riders.

Along with the deaths of over a hundred Ghost Wolf Riders, the remaining Ghost Wolf Riders absorbed more ghost energy, becoming more stable and no longer as unstable as before.

This scene made Su Yu suddenly realize, and he thought to himself: "This is why the Ghost Tribe wants to mature Ghost Wolf Riders in this Radiation Land."

"The ghost energy from the deaths of Ghost Wolf Riders, because of some reason, can attract the ghost energy of the Ghost Emperor in the Radiation Land for assimilation. After absorbing another form of ghost energy from the Ghost Emperor, the Ghost Wolf Riders can become stable and resist the side effects of ghost energy to some extent."

"But why can the Ghost Tribe assimilate the ghost energy of the Ghost Emperor? Just because they are the remnants of the Ghost Empire? However, theoretically, most of the people currently alive on the entire Ruins Star have ties with the Ghost Empire in their ancestry, all counting as remnants of the Ghost Empire."

"Moreover, the recent assimilation of the Ghost Emperor's ghost energy fundamentally feels more like an instinctive feedback."

Su Yu concluded here.

"Unless, the Ghost Tribe and the Ghost Emperor have a deeper connection, like blood."

"The Ghost Tribe, the Ghost Clan?"

"Only like this can explain everything."

Su Yu watched the scene and quietly pondered.

At this moment, Yu Ping'an in the picture also noticed this scene but didn't think much about it.

Instead, he was staring intently at a woman in the center of the mining area.

That woman was the leader of this batch of Ghost Wolf Riders and the culprit who previously destroyed the Wandering Village — Ye Youhun!

Ye Youhun looked at the continually exploding and dying Ghost Wolf Riders with inexplicable glint in her eyes.

They were her clanspeople that her father entrusted her with before being completely controlled by the Ghost Soul High Priest.

And now, due to a single command from the Ghost Soul High Priest, they had to sacrifice themselves meaninglessly in this Radiation Land, ultimately maturing five hundred Ghost Wolf Riders only capable of fighting.

She resented the Ghost Soul High Priest, and even more, her own weakness and helplessness.

But she knew that after practicing the ghost energy Meditation Technique provided by the High Priest, she was destined to become the High Priest's nourishment, even if her talent was outstanding and elevated her spiritual power to a five-star top level, she was still nourishment to the High Priest who mastered higher-level ghost energy.

Watching the successive deaths of the Ghost Wolf Riders and the agonized expressions on their faces at the time of their death, Ye Youhun's expression began to change, a sickly smile appearing on her lovely face.

Just then, a Ghost Wolf Rider beside Ye Youhun couldn't withstand the ghost energy turmoil within and began to swell. Before swelling, he reached out to Ye Youhun, seemingly pleading for help.

"Ye'er... save me..." This Ghost Wolf Rider, enduring the pain brought by his swelling body, begged Ye Youhun.

However, the next moment, Ye Youhun's foot mercilessly stepped on the outstretched hand of the Ghost Wolf Rider.

"Save you? Why?"

Chapter 273: Revenge

Sure, here's the translation:

"Save you? Why?"

Ye Youhun looked at the hope in the eyes of the middle-aged man, but in the next moment, coldly refused.

Ye Youhun recognized this Ghost Wolf Rider. Before becoming a Ghost Wolf Rider, this man was just an ordinary middle-aged man from the Ghost Tribe. In Ye Youhun's childhood, this middle-aged man had even held her.

Not only that, Ye Youhun directly used her Spiritual Telekinesis to crush the inflating middle-aged man ahead of time!

The middle-aged man instantly turned into dissipating Ghost Energy Fog.

The Ghost Wolf Riders around Ye Youhun instinctively distanced themselves from her.

"Don't blame me, I can't protect you, because to the High Priest, I am just a weakling, a nourishment. And to me, you all are the same!" Ye Youhun chuckled lightly. She operated her Ghost Energy, absorbing all the dissipating Ghost Energy from the man's corpse, a sickly smile appearing on her beautiful face.

Ye Youhun naturally remembered what her father, the Ghost Clan Chief, told her before he was controlled by the High Priest.

She also tried to shelter her clansmen, but the end result was always failure.

The Ghost Soul High Priest, who mastered high-level Ghost Energy, fundamentally eliminated the ability of the Ghost Tribe to resist.

Ye Youhun dared not resist and was powerless to resist, could only watch helplessly as these former tribe members turned into Ghost Wolf Riders that only knew killing.

Just like back then, she could not save the Ghost Clan Chief who was controlled by the High Priest.

Thus, Ye Youhun could only choose to brutally slaughter the weak to vent the anger and hatred in her heart.

The reason for choosing to control the leader of the Wandering Village, who is Yu Ping'an's father, and personally killing Yu Ping'an's mother.

Is because she liked this feeling, liked the feeling of venting her pain on the innocent.

"Speaking of which, the look in that kid's eyes at the Wandering Village back then was really nostalgic, exactly like mine back then."

Ye Youhun couldn't help but recall the look in Yu Ping'an's eyes hiding among the crowd when she controlled the leader of the Wandering Village.

As a five-star level Transcendent with spiritual power, how could she not perceive Yu Ping'an hiding in the crowd at that time?

Yet Ye Youhun deliberately ignored it. She enjoyed seeing Yu Ping'an's despairing, yet helpless look, the way he hid in the crowd, not daring to cry out loud.

"So similar to what I used to be. The strong should oppress the weak, that's the rule of this Dead Silence Wilderness." Ye Youhun thought morbidly.

She's done this kind of thing more than once, and only by replicating her experiences onto others could Ye Youhun feel a moment of peace.

Her personality had long been distorted, thanks to the years of abuse by the Ghost Soul High Priest.

She dared not seek revenge against the High Priest, she only wished to vent her anger on those weaker than herself.

On the hillside, Yu Ping'an clearly noticed this scene as well.

"Ye Youhun... Ye Youhun!" Yu Ping'an muttered to himself as he looked at Ye Youhun's figure.

After the fall of the Wandering Village, Yu Ping'an lived like a walking corpse. He wanted revenge but had no capability.

He was just a normal person, so Yu Ping'an could only take the remaining old, weak, sick, and disabled from the Wandering Village and wander the wilderness, striving to protect the others in the group.

Luckily, Yu Ping'an was fortunate enough to reach Shelter No. 73 and join the Sanctuary, becoming a cyborg with the aid of the Source Core Crystal.

Yu Ping'an touched the red string hanging around his neck, which was all that remained after offering up the Source Core Crystal.

To Yu Ping'an, encountering Ye Youhun at the Source Core Land was completely a revenge opportunity bestowed by the heavens.

To some extent, Yu Ping'an and Ye Youhun's fates were strikingly similar.

But, their choices were completely different.

Ye Youhun dared not seek revenge and only transferred her suffering onto others, and Yu Ping'an apparently did the same.

Yu Ping'an, in his quest for revenge, was willing to seize any opportunity and would never impose his suffering on others; he was only harsh on himself.

That was exactly why Yu Ping'an met Su Yu, who gave him a new chance at life.

"Administrator, I may not be able to make it back alive..." Yu Ping'an looked back at the seven reconnaissance cavalry, as if leaving a last testament.

"But, Administrator, I will definitely repay your kindness, and I will certainly bring back the Source Core Crystal."

With that, Yu Ping'an crouched behind the stone again, seemingly waiting for a good opportunity.

Su Yu watched Yu Ping'an in the footage, then glanced at the wheel-sized Source Core Crystal placed aside.

This Source Core Crystal was extremely large in size, but its purity was not as high as the one Yu Ping'an previously offered.

Hearing what Yu Ping'an said in the footage, Su Yu nodded and said, "You indeed accomplished it, and indeed repaid it."

"This wheel-sized Source Core Crystal is enough to construct a large intelligent chip manufacturing device, even though its purity is low and might not be able to produce high-grade or special grade chips, its sheer volume compensates for it."

"But Yu Ping'an, how exactly did you do it?"

Su Yu watched Yu Ping'an in the footage with curiosity.

Yu Ping'an was crouching behind the stone in the footage.

He was waiting for a chance.

Soon, the opportunity Yu Ping'an was waiting for arrived.

Chapter 274: Revenge\_2

Of the original seven hundred Ghost Wolf Riders, over a hundred had already exploded due to being unable to withstand the side effects of Ghost Energy.

And now, the second wave of explosions had begun.

As the second wave of Ghost Wolf Riders started to explode, a large amount of Ghost Energy overflowed, and the remaining Ghost Wolf Riders stood motionless, absorbing and digesting the overflowing Ghost Energy.

The Ghost Wolf Riders were temporarily unable to move.

Yu Ping'an immediately sprang into action, dashing downwards from the hillside.

With his entire body modified, Yu Ping'an's power was enough to rival a five-star novice Transcendent.

Although Yu Ping'an's prosthetic body had suffered some damage due to encountering a horde of Radiation Beasts, it still unleashed astonishing speed under Yu Ping'an's reckless effort.

Additionally, the computational power boost brought by the advanced intelligent chip directly connected to his brain allowed Yu Ping'an to maximize every part of his prosthetic body.

Through the chip connected to his brain, he made slight corrections to the minor imbalances caused by the damage to the prosthesis during movement.

At the base of the hillside, in the mining area, Ye Youhun naturally noticed this scene.

She looked on with some confusion at Yu Ping'an, whose face was unrecognizable after undergoing artificial body transformation.

"What is this? Mechanical Creation? Or a cyborg?"

As a psychic Transcendent, Ye Youhun quickly sensed that the humanoid Mechanical Creation charging toward her wasn't an Intelligent Mechanic but a person whose entire body had been modified.

A living person!

"Interesting, how is there such a cyborg appearing in this Radiation Land? Moreover, judging by his demeanor, it seems like he's coming for me, and it looks like he really hates me?" Ye Youling observed with interest as Yu Ping'an charged toward her.

Although surprised, Ye Youhun wasn't afraid; to her, this strange Mechanical Creation looked weak and severely damaged.

It should be easy to deal with.

She didn't recognize that the person in front of her was Yu Ping'an, but instead found it amusing.

"Is he thinking that the Ghost Wolf Riders are immobilized by absorbing Ghost Energy, and plans to kill me?" Ye Youhun stretched out her hand, and an invisible Spiritual Field slowly emerged from her body.

It pressed toward Yu Ping'an's direction, suppressing him.

Ye Youhun intended to control this entire-body-modified monster before her. She could see that the mechanical technology level of this cyborg was extremely high, and this kind of thing deserved thorough research.

At this moment, Yu Ping'an had already leveraged the mobility granted by his prosthetic body and bypassed the Ghost Wolf Riders, charging directly at Ye Youhun.

A large amount of Ghost Energy, under Ye Youhun's Spiritual Telekinesis control, transformed into giant Ghost Energy hands reaching for Yu Ping'an.

Faced with Ye Youhun's attacks, Yu Ping'an attempted to dodge through his prosthetic body, repeatedly avoiding several of Ye Youhun's Spiritual Telekinesis strikes.

But in the end, he was still caught by Ye Youhun's control.

Ye Youhun, with interest, used Spiritual Telekinesis to hold Yu Ping'an, bringing him before her, eyes playful and curious as she remarked, "What are you? Judging by your actions, you intend to kill me?"

"You must have a grudge against me; I'm just very curious. There's no Spiritual Energy fluctuation on you, indicating you're not a Transcendent, just an ordinary person, yet you can wield such strength with this bizarre prosthetic body."

And at this moment, Yu Ping'an, who was restrained, lowered his head, remaining silent.

He seemed to have already lost the ability to resist, but beneath the prosthetic covering Yu Ping'an's head, the brain linked to the advanced intelligent chip had elevated the prosthetic's computational power to the extreme.

"The remaining energy of the prosthetic body is sixty-seven percent, and there is still a considerable amount of the Flame of Truth remaining, enough... enough." Yu Ping'an silently said to himself, outwardly displaying a posture of surrender.

In Ye Youhun's eyes, at this moment, Yu Ping'an had given up resisting.

Yet for safety's sake, Ye Youhun used Spiritual Telekinesis to sever Yu Ping'an's prosthetic limbs.

Yu Ping'an's brain, after being linked to the advanced intelligent chip, naturally connected to the nervous system to maximize the prosthetic body's strength.

Now, with the severed limb nerves transmitting pain, Yu Ping'an remained unfazed.

Lifting Yu Ping'an in front of her, she curiously asked, "I'm really curious as to who has such technology, turning an ordinary person like you into this shape; even my Ghost Tribe hasn't seen much of such mechanical technology."

"Now, obediently tell me why you want to kill me, tell me who is behind you, and I'll give you a quick death."

While saying this, Ye Youhun's Spiritual Telekinesis began to seep bit by bit into Yu Ping'an's prosthetic, wanting to see the construct inside and discover who this person really was.

However, in the next moment, as Ye Youhun's Spiritual Telekinesis slightly penetrated the surface of the prosthetic.

Her expression changed to extreme terror. Instinctively, Ye Youhun wanted to throw Yu Ping'an away.

But.

It was too late!

Yu Ping'an lifted his head, which had been lowered, and stared intently at Ye Youhun before him.

The next moment.

White Flame of Truth ignited upon Yu Ping'an's body!

Engulfing Yu Ping'an entirely.

Facing the Flame of Truth, Ghost Energy seemed to encounter its natural enemy, quickly dissipating under Yu Ping'an's control.

Although he had now lost his limbs, in Yu Ping'an's view, this was his best chance to kill Ye Youhun.

The prosthetic's multiple vents on the back opened, several small thrusters spewed out blue flames, propelling Yu Ping'an's body toward Ye Youhun.

Staring at Ye Youhun's delicate face and terrified expression, only deep hatred was in Yu Ping'an's eyes!

Yu Ping'an opened the prosthetic armor on his face and firmly bit Ye Youhun's neck.

"It's you?!"

Ye Youhun recognized Yu Ping'an, she instinctively wanted to use Spiritual Telekinesis to throw Yu Ping'an away.

However, in the face of the Flame of Truth burning on Yu Ping'an, Ye Youhun's specter, like encountering its arch-enemy, was entirely defenseless.

From the start, Yu Ping'an never expected to confront Ye Youhun head-on; even though he possessed five-star combat power, before a five-star top-level psychic Transcendent like Ye Youhun, his combat strength wasn't enough.

He only intended to get close to Ye Youhun, then with the purification ability of the Flame of Truth, combined with the energy contained in the prosthetic body, take Ye Youhun with him.

Ye Youhun, with sharp Spiritual Telekinesis, perceived the white flames on Yu Ping'an's body, a power seemingly the nemesis of Ghost Energy.

At this moment, accompanied by the explosion of the energy core within Yu Ping'an's prosthetic body!

The fiery explosion, along with the Flame of Truth, instantly enveloped Ye Youhun!

"No!"

Ye Youhun attempted to resist, yet it was completely futile. Under the purifying effects of the Flame of Truth, Ghost Energy met its match.

If Ye Youhun had someone around at this moment, she could have used Spiritual Telekinesis to control them to block the purification of the Flame of Truth for her.

However, at this moment, there was no one around her.

In the end, Ye Youhun was reduced to ashes under the purification of the Flame of Truth, scattered in this stretch of Radiation Land.

Yu Ping'an also turned into metal fragments following the explosion.

Around the mining area, the Ghost Wolf Riders, who had only recently become Ghost Wolf Riders and were still resisting the side effects of Ghost Energy.

Now, following Ye Youhun's death, these Ghost Wolf Riders, who were once ordinary people, lost control over their negative emotions.

Chaos ensued; numerous Ghost Wolf Riders, under the side effects of Ghost Energy, gradually deformed into Ghost Demons, killing each other or fleeing in all directions.

In the images recorded by the cavalry, the Ghost Wolf Riders quickly scattered across the wilderness.

And the cavalry that Yu Ping'an left on the hillside descended the slope as per the instructions he left.

Retrieving the Source Core Crystals left behind by the Ghost Wolf Riders and the remnants of Yu Ping'an's prosthetic body, one by one.

This cavalry, recording the images, happened to pick up the advanced intelligent chip linked to Yu Ping'an's brain.

Afterward, the cavalry, who cleaned the battlefield, headed toward the periphery of the Radiation Land.

Chapter 275: Cavalry Production Line! 100,000 Ghost Demons!

The scene ended, and Su Yu remained silent for a long time, finally sighing.

The old administrator and Yu Ping'an were, in Su Yu's heart, rare excellent individuals.

Such people, on this Ruins Star, were exceptionally rare.

In such a short time, these two had died consecutively before Su Yu's eyes. Despite his firm resolve, he couldn't help but feel some regret.

Yu Ping'an's fate was truly unfortunate. Although, in the end, he managed to exact revenge with his own hands and killed Ye Youhun, it was at the cost of his life.

However, in a certain perspective, Yu Ping'an was also fortunate.

After all, on this Ruins Star, there were plenty of people just as unfortunate as Yu Ping'an.

And how many people had the chance for revenge? So when Yu Ping'an died, he probably felt no fear, only relief and satisfaction in his heart.

Su Yu only sighed for a moment before shaking off this emotion: "This kind of 'luck' of perishing together with one's enemy, I do not want."

He had no interest in dying together with any foe.

But to not want such 'luck,' he needed to enhance his strength to ensure that in facing any formidable enemy, he had the power to fight.

So Su Yu soon regained his spirit, full of fighting spirit. The enemies he would face in the future were far more terrifying than Yu Ping'an's foes.

To leave this Ruins Star and enter the Star Sea, he must face those unknown existences, and even the blockade of the creations left by Zhang Chenfeng.

Thus, Su Yu could not harbor any weakness; he had to strive to become stronger to have a chance to achieve his aims.

After Su Yu had sorted out his emotions, he looked at the Intelligent Chip left behind by Yu Ping'an and that bit of brain tissue.

He picked up the chip and examined it.

[Ding!]

[Combat Type Intelligent Chip Set]

[Grade: Advanced (calculation power damaged by 35%, current grade: Intermediate)]

[Trait: Universal]

Su Yu found its calculation power already damaged, dropping from advanced to intermediate, but thankfully it wasn't scrapped.

So Su Yu stowed it away, planning to use it to create a cavalry unit.

By the time he goes to battle the Ghost Tribe, it will also serve to have Yu Ping'an witness the destruction of the Ghost Tribe.

As for that small piece of brain tissue, Su Yu had the Mechanical Spirit send a message to the people of the Wandering Village, asking them to come to retrieve it and take it back for burial.

After all, Yu Ping'an was the "young master" of the Wandering Village, and it was right for them to handle the burial.

Half an hour later, the people of the Wandering Village arrived at the Mechanical Hall. As they entered, they saw Su Yu with a somber expression and were startled, immediately kneeling halfway, not daring to lift their heads.

They were all bewildered, anxious, not knowing why the administrator suddenly summoned them.

Could it be that the administrator intended to expel them from the Mechanical City?

The current Mechanical City had tens of thousands of residents.

The newcomers mostly came from several large settlements, each with thousands to tens of thousands of people. Once in the Mechanical City, they instinctively grouped together, and with their numbers, they were efficient in hunting, mining, farming, and constructing.

But the people from the Wandering Village were few, not strong, and lacked crucial technologies. They felt immense pressure, feeling they were insignificant and unnecessary in the Mechanical City.

So when the administrator suddenly called them over with a stern face, they became panicked.

Su Yu couldn't be bothered with their thoughts and controlled a metal box, letting it fly in front of them. Inside the metal box was the piece of brain tissue:

"Yu Ping'an is dead. This is his relic, take it for burial."

"What? How could the young master..."

The people were instantly shocked and saddened upon hearing the news.

They looked at the small piece of brain tissue in the box, disbelief in their hearts.

Yu Ping'an, a strong and resolute man, how did it come to this pitiful fragment of relics after just a few days?

"He went to the Land of Ghosts to find the Source Core Crystal for me, and unfortunately encountered people from the Ghost Tribe. He killed his arch-enemy, Ye Youhun, through self-detonation."

Su Yu explained briefly.

Hearing this, the people of the Wandering Village immediately had red eyes, bowing low to the ground, lamenting towards the metal box: "Young master!!"

They, too, wished for revenge.

But they were mostly ordinary people, and only Yu Ping'an had the courage and boldness to take action.

Now, hearing Yu Ping'an had actually killed their great enemy, they were both sorrowful and ashamed.

Yu Ping'an, this young man, was desperately seeking revenge and even succeeded.

What were they doing? Yu Ping'an was just an ordinary person, and there were among them Transcendents.

If they had fought as desperately as Yu Ping'an, perhaps he wouldn't have died...

They felt immense regret now, knowing the administrator had been incredibly generous, willing to offer them the chance for revenge.

Yet, they cherished their own lives too much, idly spending their days in the city.

After a while, a leading middle-aged man among them stored away the metal box.

Seeing this, Su Yu nodded:

"Yu Ping'an found a large piece of Source Core Crystal for me, valued at... one million contributions. He is deceased, so these contributions will be inherited by you, to be distributed among yourselves."

After saying this, Su Yu intended to dismiss them.

He could tell these people weren't faring well in the Mechanical City, so he casually mentioned one million contributions, as a gesture to care for Yu Ping'an's acquaintances.
