

Infinite 281

Chapter 281: Arson! Burn the City!_2

...

At this moment, deep within the mist.

The Ghost Soul High Priest had already erased most of the Ghost Clan Chief's will. In just one or two more days, he would complete it and attempt to open the Subspace Gate, reaching Seven Stars.

Then, he suddenly sensed a vast amount of Life Breath appearing outside the mist.

His heart jolted immediately, knowing that the enemy had arrived.

After all, in this Dead Silence Wilderness, he only had enemies, no allies.

He dared not be negligent, after all, that unknown formidable enemy had actually driven him to this point.

He immediately extended a part of his Spirit along the mist to see exactly who his enemy was.

A moment later, he saw Su Yu and the others outside the mist.

Originally, the High Priest was uneasy, fearing the enemy's strength might be too much to handle.

But upon seeing Su Yu and others, he was stunned and almost wanted to laugh.

With his strength, he could roughly sense the levels of everyone's abilities.

"Haha, these are my enemies? Just that bit of power?"

"Three thousand people, over a thousand Mechanical Creations, among them many ordinary people?!"

"With such little power, even if I ignored them, they couldn't breach the Ghost Energy Fog. Even if they managed to get in, facing hundreds of thousands of Ghost Demons would be courting death!"

"They dare to come over with just such few people, truly ignorant of death, once I break through, I'll turn all of you into nourishment!"

The High Priest's heart settled, no longer concerned with the outside world, focusing solely on his breakthrough.

...

Outside the mist, the group remained silent.

"Do we really have to enter this mist to fight those Ghost Demons?"

Lang Yun held it in for a long time and finally couldn't help but speak up.

Having experienced the Battle of Li He, he knew that in this mist, those Ghost Demons came and went without a trace, extremely terrifying.

Moreover, the mist back then didn't have such strong Radiation, and there weren't as many Ghost Demons, a hundred thousand in total!

Entering the mist to fight would mean facing terrifying Radiation even before the battle starts.

Coupled with losing vision, blindly groping around, if attacked by the Ghost Demon army, with units scattered and defeated separately, it's only death without life.

"What, is Captain Lang afraid?"

Su Yu glanced at Lang Yun, his expression slightly unfriendly, thinking this guy really hadn't grown at all, still so timid.

Hearing this, Lang Yun quickly waved his hand: "Administrator, no... it's not..."

At this point, Yang Lie spoke: "Administrator, this mist indeed covers too wide an area, with too strong Radiation, we need to figure something out."

Upon hearing this, Su Yu nodded. Yang Lie wasn't afraid to fight but was instead rationally considering how to fight this battle.

Just then, another person spoke up: "Administrator, we Wanderers are willing to enter the mist first to scout the path for the main force, to understand the situation inside."

Upon hearing this, Su Yu turned his head and saw it was the middle-aged man who had taken Yu Ping'an's brain tissue three days ago.

In three days, his appearance had changed drastically, covered entirely in metallic sheen, even his face was no exception.

It seemed he had used that one million contribution to fully transform his body with artificial enhancements. Around him were a dozen others, all with the same appearance.

"These guys really went through with it after all..."

Su Yu shook his head slightly in his heart.

He had not been concerned about the transformations of these people.

Now the artificial body transformations in the city were all handled by other Mechanics, Su Yu didn't bother with these trivial matters.

Only at this moment did he realize the survivors from the Wandering Village had indeed kept their word.

These people were the last Transcendents left from the Wandering Village, their powers were not strong, only one or two stars, but now with artificial enhancements, their powers had greatly improved, even reaching the level of four stars.

But...they probably wouldn't live long, forcefully boosting strength with artificial bodies leads to this outcome.

Moreover, volunteering to scout the mist was almost courting death.

"No, if you go in, you will surely die."

Su Yu shook his head.

In truth, he was also contemplating how to fight this battle; directly entering the mist was definitely not an option, as the mist covered too wide an area, with too strong Radiation.

Use the Flame of Truth to burn it? Such a large area, it's a bit tricky...

At this point, Kuang Gu also spoke up: "Administrator, there must be someone to scout the path, no great war comes without fatalities, count me in."

He was grateful for Su Yu's help in saving the Skeleton Tribe, so he volunteered to fight.

"Administrator, count me in too!"

"And me!"

"I'll go too!"

Seeing this, Transcendents from several other major communities also volunteered to fight.

They couldn't fall behind Kuang Gu, otherwise, how could people from their communities blend into Mechanical City in the future?

Moreover, if this battle were lost, no one would blend in anywhere in the future, so they had to fight this battle. Besides, seeing Su Yu's calm demeanor, maybe he really had something up his sleeve?

These Transcendents, though aware of the enemies' tremendous power, at the brink, they still had the courage to fight, even Hu Wen spoke up too.

Seeing everyone suddenly so brave, Lang Yun felt a bit guilty, wondering if he was too cowardly?

So he gritted his teeth, preparing to speak as well...

"Administrator, let me try."

Feng Tian, who had remained silent, spoke at this moment.

Huang Ying, hearing this, became anxious. "Little Feng Feng, your health is too weak, you can't go, I'll go..."

Feng Tian shook his head: "Don't worry, I won't go in, I want to try...wind!"

At Feng Tian's words, everyone's eyes lit up.

Feng Tian's ability was controlling the wind, and by common logic, mist was most afraid of strong wind!

Even though it was unknown whether this Ghost Energy Fog feared wind, it wouldn't hurt to try...

Hearing Feng Tian's words, Su Yu nodded: "You can try it first, if it doesn't work, we'll think of something else."

"Yes! Administrator!"

Feng Tian said solemnly, then stepped in front of the crowd, gazed at the mist not far away, and closed his eyes.

A moment later, the wind rose!

Centered on Feng Tian, gusts of wind whipped up out of nowhere, gathering more and more until it formed a huge tornado, sweeping toward that mass of mist.

"Such Spiritual Energy, it's truly formidable, almost able to create natural disasters..."

Witnessing Feng Tian's display, everyone was slightly astonished.

Most Transcendents enhanced their own powers—manipulating the power of heaven and earth like Feng Tian was quite rare.

Even Su Yu regarded Feng Tian with admiration, realizing Transcendents weren't the only strong ones among Mechanics; those who could control the forces of nature were also remarkable.

A moment later, the tornado reached the edge of the mist, causing the mist to ripple continuously.

Unfortunately, it only rippled; it wasn't dispersed.

The mist seemed ethereal and elusive, but was actually gelatinous in texture, quite solid.

Feng Tian maintained the tornado for a while, but it still had no effect, ultimately having to give up reluctantly, dispersing his power.

He took a breath and shook his head: "No good..."

Seeing this, everyone showed disappointment, was entering the mist to engage really necessary?

Su Yu, however, seemed thoughtful: "Not necessarily, you've already swayed the mist, it's just that your level is too low..."

The mist was created by a Seven-Star level Transcendent; that Feng Tian could shake it was already commendable.

Feng Tian looked ashamed instantly: "Administrator, I'm too weak..."

Su Yu chuckled: "That's not what I meant, you can try again!"

Meanwhile, a white flame emerged in his hand, the Flame of Truth!

Then, with a wave of his hand, the Flame of Truth turned into a column of fire, extending from his hand to burn upon the mist.

Once this flame touched the mist, it erupted like fire meeting gasoline, crackling and blazing fiercely.

Despite the intense flames, the mist's expanse was too large and very dense.

The Flame of Truth could only burn the surface for now, unable to penetrate deeper, and could not burn the entire mist away instantly.

Moreover, energy was constantly replenishing the depths of the mist.

Seeing this, Feng Tian understood Su Yu's intention immediately.

He quickly activated his power again, strong winds blew, causing the mist to fluctuate.

As the mist fluctuated, it could no longer resist the Flame of Truth's burning.

White Fire blazed skywards, the fire borrowing the wind's momentum, rapidly spreading, igniting the entire mass of mist within a short time!

Chapter 282: Matrix Battle Group! Slaughter Ghost Demon!

Boom!

The massive cloud of fog, spanning twenty kilometers and rising hundreds of meters high, was completely engulfed by the Flame of Truth, transforming into a genuine "Flame Mountain."

The fire blazed fiercely, nearly scorching the sky.

Within the fog, ghostly green figures intermittently appeared, only to be ignited instantly and turned to ash.

Such a spectacular scene left everyone in a daze.

"Is this... the power of the Administrator?"

"No wonder the Administrator is so confident!"

Everyone gazed at the "Flame Mountain," both shocked and elated. With Su Yu being this powerful, what was there to worry about?

The momentum seemed god-like, as in the legends.

If this continued, perhaps Su Yu alone could burn the entire Ghost Tribe to the ground!

They all believed this was Su Yu's strength.

After all, they had just witnessed Feng Tian's feeble attempts to affect the fog, only creating slight ripples.

Yet when Su Yu took action, the scene was awe-inspiring, and the fog caught fire immediately.

Though Feng Tian contributed, clearly most of it was Su Yu's power, with Feng Tian merely assisting.

Feng Tian himself thought so as well; he couldn't conjure such a massive scene, being just a four-star, while the Administrator was a six-star powerhouse!

Even Su Yu was a bit surprised; the effect was unexpectedly magnificent.

Originally, the condensed fog could not be penetrated by the Flame of Truth, but with Feng Tian's Spiritual Storm stirring the fog, the fire leapt forth.

Indeed, Feng Tian was the perfect aid; as expected, setting fire requires the wind's help!

However, Su Yu knew that mainly the fog's outer layer was ignited.

But the flames had begun seeping into the inner layer, given enough time, burning the fog away entirely wasn't impossible.

...

Meanwhile, deep within the gray fog.

The High Priest, focusing on obliterating the Ghost Clan Chief, suddenly jolted awake.

Then he felt boundless agony.

His spirit was connected to the fog, and as the fog ignited, his spirit was harmed as well.

"This flame! This is the power of purification!"

"How could such a power appear on this planet!"

The High Priest sensed the flames in fright, feeling he had encountered his nemesis!

"That person! It's him who wields the power of purification!"

"He's only six-star, yet already so terrifying."

"Must break through quickly, he must be killed!"

The High Priest roared inwardly. He finally noticed Su Yu's presence and realized who his true enemy was.

Then his spirit suddenly contracted, causing the gray fog to shrink.

Soon, the fog spanning twenty kilometers condensed to just around five kilometers.

But the contracted fog no longer appeared as fog, instead resembling ghostly green liquid, tightly enveloping the altar at the heart of the Ghost Tribe.

The Flame of Truth extinguished as well.

The condensed fog was incredibly tenacious, impervious to ignition.

And as the fog contracted, numerous hidden Ghost Demons emerged.

These Ghost Demons, upon appearing, immediately dispersed their formation under the High Priest's orders to avoid being incinerated all at once.

Seeing this, Su Yu and Feng Tian had to withdraw their abilities.

Everyone felt regretful, but Su Yu secretly sighed in relief.

Though the initial spectacle was grand, it was quite consuming; continuing further might exceed what he could afford.

The mechanical legion relied on ammunition and energy for attacks, whereas the Flame of Truth depended entirely on Su Yu's Spiritual Energy, a significant consumption.

Now that the fog had contracted, it's time for a true combat with real weapons!

With the flames dissipated, everyone caught sight of the Ghost Demons and was instantly alarmed.

"These... so many!"

"Surely more than a hundred thousand!"

"So many Radiation Beasts!"

Everyone felt their hearts race; facing such numerous enemies sent shivers down their spines, how would they fight?

Roar!

Before anyone could react, the Ghost Demons roared and charged like a tidal wave.

"Prepare for battle!"

Kuang Gu, Huang Ying, Hu Wen, and others shouted, raising their weapons to fire at the Ghost Demons!

The three thousand combat personnel were jolted awake and promptly began fighting.

A hail of bullets rained down on the battlefield, felling swathes of Ghost Demons under the barrage.

Everyone breathed a sigh of relief; fortunately, these Ghost Demons lacked intelligence, incapable of using long-range thermal weapons, attacking blindly instead, else it wouldn't be a battle anymore.

They carried ample ammunition this time; if these Ghost Demons were all at this level, it would be simple.

Unfortunately, things weren't that easy.

Very soon, they noticed trouble, as many Ghost Demons were slain, but numerous powerful Ghost Demons pressed on through the bullet storm.

While there were only seven to eight hundred, most of them were at three-star level, with over a hundred reaching four-star!

These formidable Ghost Demons, empowered by their Ghost Energy, completely ignored the firepower as they charged.

Three-star level was already considered strong in various settlements, now numbering seven to eight hundred Ghost Demons.

At four-star level, they were nearly commanders, or even administrators, and now there were as many as one hundred.

Such strength left everyone feeling despair just by witnessing it.

Allowing them to approach would mean a massacre for everyone!

"Prepare for close combat!"

The transcendents above three-star level of Physical Body shouted, drawing their weapons, ready to fight to the death to block them.

Chapter 283: Matrix Battle Group! Slaughter the Ghost Demon!_2

We absolutely cannot let those Ghost Demons break through.

At this moment, Su Yu, who had remained inactive, finally spoke: "Don't worry."

He had just wanted to observe everyone's performance, and now it seemed, not bad at all.

However, in the end, everyone's strength was insufficient. If he didn't take action, there would be a large number of casualties.

So, it was time to act.

Su Yu utilized his spiritual energy to send an attack signal to his mechanical army.

One thousand one hundred and fifty-seven two-star top-level Rangers, seventy-six intermediate melee Rangers, ten advanced melee Rangers, thirty Steel Defenders, thirty Shadow Hunters...

This terrifying mechanical army was fully mobilized!

Also, Steel Resonance! Warfire Symphony! Heart of Steel!

All three enhancements were activated!

With the triple amplification, how much did the strength of this mechanical army more than double?

At this moment, the Profession Panel popped up another reminder:

[Congratulations to the Host, the number of Rangers in the battle group exceeded one thousand, gaining a new trait: Matrix Battle Group]

[Matrix Battle Group lv1: Integrates the redundant computing power of a large number of Mechanical Creations to form a matrix, uniformly coordinated, thereby enhancing the strength of Mechanical Creations. Matrix Battle Group also has an amplification effect on the Steel Resonance.]

This notification surprised Su Yu a bit, he hadn't expected that without upgrading, he unexpectedly gained a new skill.

But Su Yu quickly realized that this should be a trait inherent to the Legion Mechanic. Naturally, a Legion Mechanic must have a legion to live up to its name.

Previously, he had too few Mechanical Creations to reach the required number, so this trait had never been activated.

He couldn't help it; he rose too quickly, with no time to slowly accumulate a large army.

This time, the Rangers reached a thousand, meeting the standard, so as soon as the battle started, the new trait was successfully activated.

This Matrix Battle Group, judging by its appearance, has extremely high requirements for quantity, a thousand units being the minimum requirement, it's following the quantity route, truly deserving the name "battle group".

Under the amplification of this new trait, the computing power of the Rangers was connected via spiritual energy, forming a matrix, and their strength was once again enhanced.

Those junior Rangers' strength all reached three-star intermediate! More than a thousand three-star intermediate!

Seventy-six intermediate Rangers became four-star intermediate!

Ten advanced Rangers, five-star intermediate!

Thirty Steel Defenders, thirty Shadow Hunters even reached five-star top-level!

The strength increased at least a notch again!

These mechanical armies had not yet launched any attacks, but their strength was tirelessly boosting with each amplification.

An invisible momentum emanated.

Suddenly, the chaotic and noisy battlefield filled with gunfire weirdly calmed down.

Neither the humans nor the Ghost Demons attacked anymore.

They all sensed an unsettling danger, turning to look beside Su Yu, at those grim mechanical weapons.

"What is this feeling..."

The crowd looked at the mechanical battle group, whose appearance hadn't changed at all, yet it seemed infinitely more dangerous than before.

And those Ghost Demons, although already devoid of reason, still had a sense of danger, and even more acutely.

At this moment, the only thought remaining in those Ghost Demons' awareness was—run!

However, it was already too late.

Su Yu's Matrix Battle Group had already adjusted their state in a short time, and then without hesitation, attacked!

A storm of bullets and metal descended once more!

Warfire Symphony!

With Su Yu's skill enhancement, these Rangers' firepower was not only more powerful but also extremely precise.

When the Ghost Demons saw the barrage coming, they initially tried to dodge or withstand it, but were instantly riddled with holes.

Yet these Ghost Demons had strong bodies, and didn't die immediately.

However, the various powerful close combat models were also activated!

Their movements were wind-like, too fast for the crowd to perceive, and under the cover of powerful firepower, they quickly reached the Ghost Demons.

The chain saw blades roared, and powerful Ghost Demons were directly chopped into fragments.

Especially those sixty Hunters and Defenders with five-star top-level strength, their speed almost approached near sound speed, brutally fierce.

Against those Ghost Demons, no weapon was needed, just one word, crash!

Whether they were three or four stars, being hit resulted in instant obliteration!

This was a massacre!

The Ghost Demons that had once despaired the people of Mechanical City were being rapidly slaughtered!

In just two minutes, those few hundred three-star and four-star Ghost Demons were all massacred.

The crowd watched the scene, unable to help but wonder.

What on earth did they come here for?

It seemed like the Manager didn't need anyone else's power at all; he could have destroyed the Ghost City alone!

What kind of strength is this!

More than a thousand three-star, seventy-plus four-star, ten-plus five-star...

The most ruthless are those sixty Hunters and Defenders, surprisingly five-star top-level, nearly six stars!

Isn't this too ridiculous!

They were worried before, thinking that the strength of the Ghost Tribe was too strong to defeat.

But now, it seemed the ones who should be afraid were the Ghost Tribe!

In fact, before Su Yu arrived, he wasn't this strong, otherwise he wouldn't have needed to bring everyone.

Mainly because he awakened a new trait just now, vastly enhancing his strength, leading to this one-sided massacre.

As Su Yu's mechanical battle group finished off those three-star and four-star Ghost Demons, without stopping for a moment, they immediately set their sights on those one-star and two-star Ghost Demons.

Against these "weaker" Ghost Demons, the mechanical battle group found killing even easier, with many dying at once.

The crowd couldn't even intervene; often just as they aimed, that Ghost Demon was already dead...

They bewilderedly put down their weapons, with only one thought in their minds... can Su Yu alone kill all these hundreds of thousands of Ghost Demons?

Meanwhile, on Su Yu's side, the Profession Panel was refreshing with notifications nonstop.

[You gained 5000 points of professional experience, (Mechanical Wanderer lv5)]

[...You gained 10000 points of professional experience, (Mechanical Wanderer lv7)]

[You gained...]

[Mechanical Wanderer level up! Mechanical Meditation Method synchronously enhanced!]

Through the massacre of numerous Ghost Demons, Su Yu's recently transitioned Mechanical Wanderer level was rapidly rising.

His spiritual energy was also synchronously increasing.

Despite activating so many abilities and controlling such a battle with this army, Su Yu felt no fatigue; on the contrary, he grew stronger with combat.

He was delighted, ordering the mechanical battle group to eliminate all the Ghost Demons.

These were all experience points!

...

An hour later.

There wasn't a single Ghost Demon standing in front of the crowd.

Some had been killed by Su Yu, and another part retreated into that dense fog, never to emerge again.

"The Ghost Demons... they actually fled..."

Everyone looked at the battle results, not knowing how to evaluate them.

While Su Yu, still somewhat unsatisfied, since his profession Mechanical Wanderer needed a bit more experience to reach max level.

Mainly because those lower-level Ghost Demons provided too little experience, and many had also escaped.

...

At this time, deep within the condensed gray fog.

"Who exactly is this guy! How can he possess such power!"

"He is definitely not an ordinary Spiritual Mechanic! Clearly at a six-star level, why is he this strong!"

"What to do! Those ordinary Ghost Demons can't stop him at all!"

"How did such a monster appear on this planet!"

The High Priest at this moment was already distraught and anxious.

He could have never imagined his powerful army being nearly wiped out by Su Yu alone in a mere hour.

Clearly, the High Priest was a believer of an Evil God, a long-lived monster, but at this moment, Su Yu appeared as the true monster!

"We can't wait any longer!"

"Immediately begin advancing to seven stars!"

The High Priest hardened his heart, determined not to wait any longer!

Over a hundred thousand Ghost Demons lasted barely over an hour. How much longer could this condensed gray fog hold?

So, although he hadn't completely worn down the Ghost Clan Chief, he was going to forcibly advance to seven stars!

Chapter 284: A Shocking Blast! Annihilating Strike to the City!

The High Priest knew that the situation was extremely critical and not a minute could be wasted.

He focused his spirit, and a Subspace Gate appeared once more before him.

At that moment, the will of the Ghost Clan Chief suddenly erupted.

"Haha... You... you're in a hurry! You couldn't even wait a few days, there must... be a great enemy."

"I definitely... won't let you... succeed in breaking through!"

It was the voice of the Ghost Clan Chief.

Originally, most of him had been erased by the High Priest, and he was in despair.

He knew that no matter how hard he held on, it was meaningless, he could only delay a few days, and in the end, he would still be erased.

But now, he finally saw hope.

Because the High Priest was unwilling to wait even for those two or three days, clearly indicating that the situation was extremely urgent.

So the Ghost Clan Chief immediately mustered all his remaining strength, determined to stop the High Priest from breaking through to Seven-star.

Even though the Ghost Clan Chief was completely cut off from sensing the outside world and had no idea that Su Yu and his team were attacking.

He instinctively cooperated with Su Yu.

"You're seeking death!"

The High Priest was enraged beyond measure, at such a critical moment of breaking through to Seven-star, disrupted by the Ghost Clan Chief, his spirit was teetering on the brink, possibly tipping into complete madness at any moment.

...

Outside the condensed mist.

Su Yu looked at the condensed gray mist and strode forward, thinking to himself, "You can run from the monk, but you can't run from the temple! I'm just a few hundred thousand experience away from max level, and you Ghost Demons have fled. Once I dispel this mist, let's see where you can run."

He strode forward and approached the condensed gray mist, employing Holographic Perception!

The condensed gray mist was only five kilometers in circumference, so Su Yu could use his perception from outside to pinpoint the exact location of the formidable Seven-star presence inside.

Soon, Su Yu sensed the High Priest's location and his expression changed at once.

Because in his perception, it was a mass of Ghost Energy condensed to the extreme, undergoing a certain qualitative change.

Su Yu was already very close to Seven-star, so he could even sense the fluctuations of the nearby Subspace, as if a gate was about to open at any moment.

With a focused expression, Su Yu thought, "Is it the critical moment for a breakthrough? I can't wait any longer!"

Su Yu knew that in just a moment, that unknown formidable presence might successfully break through, which would pose a problem.

Therefore, instead of advancing, he retreated sharply back seven to eight kilometers.

Then...

Power of Resonance!

Su Yu activated the Power of Resonance from the Steel Resonance.

Actually, he had been using this power all along, but initially, he used his own body's power to resonate and augment the Mechanical Battle Group.

Now, however, it was the other way around; he used the resonance of the Mechanical Battle Group to enhance his own body.

With this resonance, his Spiritual Level and physical qualities escalated madly!

At the same time, the newly awakened trait, Matrix Battle Group, also took effect, strengthening his body.

The Matrix Battle Group was an extension of the Power of Resonance, so it could also act on his body.

However, the Matrix Battle Group did not enhance Spiritual power and physical strength but instead boosted his computational power!

Allowing him to greatly enhance his control over power.

Under heavy amplification, a Subspace Gate forged of steel suddenly appeared before Su Yu's eyes, and under the resonance power, this gate actually opened a slight crack.

Through that crack, a sudden fleeting glimpse hit Su Yu, as if he saw a space vast beyond measure, more profound than the starry sky, more immense than the universe, containing infinite mysteries, endless knowledge, and boundless power!

This sensation lasted only for a moment before Su Yu snapped back to reality.

Then he found that the gate had already closed, but a wisp of extremely pure Spiritual Energy had leaked out!

This wisp of power was very little, but when it landed on Su Yu, it had an effect akin to turning stone into gold.

Every bit of Su Yu's power was stirred by that wisp of energy, so active it seemed poised for a qualitative change.

At this moment, Su Yu was in an unbelievably excellent state, with his power inexplicably growing by another thirty percent!

"Was that the Subspace opening just now, that's the power of Seven-star!"

Su Yu understood in his heart; with the Power of Resonance and the Matrix Battle Group, he unexpectedly opened the Subspace ahead of time, touching the power of the Seven-star level.

Even though it was only a trace, it still enhanced his strength.

Su Yu had accumulated too many professions, too much amplification.

That's why such a thing happened; even though he wasn't even close to the Six-star peak, he could open a sliver of the Subspace Gate!

And when Su Yu opened a sliver of the Subspace Gate, everyone felt the leaking aura.

"What was that aura that appeared on the Administrator's body just now? I felt like I saw the universe and stars!"

"No! That wasn't the starry sky, that was... Subspace! Only a Seven-star Transcendent can open Subspace!"

"What? The Administrator has already opened Subspace? Did he just hit Seven-star?!"

"The Administrator previously said that a Seven-star being was being nurtured in the gray mist, so he temporarily powered up for convenience in battle?"

The people in the Mechanical City were all stunned, with some even babbling nonsensically.

This battle, in such a short time, truly gave them too many "surprises" from Su Yu.

...

In the depths of the gray mist, the High Priest also sensed the Subspace aura that had just appeared.

At this moment, he was truly on the brink of madness! The enemy had opened Subspace?!

The High Priest's entire hope was to quickly open Subspace, ascend to Seven-star, and crush the enemy.

Chapter 285: Earth-shattering Shot! A City-destroying Strike! _2

However, the enemy beat him to it.

For him, it was an unimaginably heavy blow.

The Ghost Clan Chief, who was disturbing the High Priest, also sensed the subspace aura and was extremely excited.

"Ha... hahaha, what kind of enemy have you provoked, even opened the Subspace Gate!"

"You're doomed, facing such an enemy, no one can save you!"

The Ghost Clan Chief was so excited that he spoke much more fluently.

This time, the High Priest didn't curse but fell into an eerie silence.

He ignored the Ghost Clan Chief and focused all his spirit on attacking the Subspace Gate.

He knew he didn't have much time left.

At the same time, the Ghost Demons that had fled into the gray fog began to devour each other. In a short time, more than half died, and the remaining ones had greatly increased strength.

...

At this moment, Su Yu suddenly turned around and ordered everyone, "All of you, retreat!"

Upon hearing this, everyone turned and ran without hesitation.

Although they didn't know why they had to run, they had a feeling that if they didn't, they would be doomed.

Even the administrator didn't know what big move was coming? Clearly they were more than ten kilometers away from the gray fog, yet they still needed to run?

After Su Yu gave the order, he immediately activated another ability.

Shadow Cloak!

With a shift in light and shadow, Su Yu vanished into thin air, entering an invisible state!

Then, the Dawn One components on the Azure Oath Mechanical Battle Armor began charging, and the thick electromagnetic sniper cannon muzzle emitted strands of electric light.

Nuonuo had already fused into the battle armor, providing power to Su Yu.

Su Yu, fully concentrated, activated his abilities once again.

Electromagnetic Fury, triple power amplification!

Hidden Kill, five times power amplification in concealment state!

Convergence, adding spiritual energy to firearm attacks, producing an explosive effect!

Flame of Truth, Power of Purification!

Full Firepower, overloading mechanical creations, drastically enhancing firepower in a short time!

Su Yu even infused a trace of subspace force into the cannon muzzle.

With the enhancement of five major skills, the electromagnetic sniper cannon muzzle on Su Yu's chest was completely covered in plasma, emitting an incredibly dazzling light.

Even without firing, the plasma nearly melted the Azure Oath's exterior.

With so much amplification, even Su Yu didn't know the power of this shot.

Seven-star top tier? Or eight-star?

"Can't hold it, fire!"

Su Yu barely maintained it for a few minutes, infusing as much Flame of Truth as possible into the muzzle.

Then he could no longer control it, and with a roar, he fired!

BOOM!

Su Yu's long-cherished "one shot" finally blasted out.

A thick beam of light burst out in an instant.

Relying on his powerful dynamic vision, Su Yu realized it wasn't a beam of light, but a Thunder Light Ball with a diameter of one meter, containing an unimaginably terrifying amount of power.

The speed was so fast that it appeared to be a beam of light.

It flew at multiple times the speed of sound, crossing seven to eight kilometers instantly, slamming onto the condensed gray fog.

The solidified condensed gray fog offered no resistance to the Thunder Light Ball, and it blasted it into nihility, revealing the skeleton altar inside.

The High Priest's pupils shrank sharply, and in that split second, he had only one thought:

"What kind of power is this, so fast, impossible to dodge! Block it for me!"

In front of the skeleton altar were dozens of powerful Ghost Demons, guarding it fiercely.

Among these Ghost Demons, at least five stars, and some even six stars.

These Ghost Demons were made by the High Priest, regardless of cost, forcing Ghost Demons to devour each other, then standing in front to protect him.

This kind of forceful short-term enhancement made the Ghost Demons extremely unstable, surviving only for a few minutes before bursting and dying, a massive waste.

But at this moment, the High Priest was immensely grateful he made these preparations in advance. As long as they could block this stunning blow, no matter the waste, it was worth it!

The High Priest knew that if the Thunder Ball exploded on the Ghost Demons, even if the core power of the strike was wasted, the terrifying aftermath would still be something he could withstand.

In an instant, the Thunder Ball was upon those Ghost Demons.

Strangely, relief washed over the High Priest in that moment:

"Such an attack, you probably can't unleash a second strike; if I survive, it will be your doom!"

However, he was too naïve.

Su Yu wouldn't let that happen.

Just as the Thunder Ball was about to collide with the Ghost Demons, it unexpectedly curved in mid-air, bypassing them and heading straight for the altar.

Gunfighting Skill!

Su Yu chuckled to himself.

Outwitted, right? My bullet can turn!

The next moment, the Thunder Ball hit the altar, evaporating it instantly and revealing the ten-meter giant body of the High Priest inside.

The Thunder Ball continued forward, only needing to land on the High Priest's body for this earth-shattering shot to unleash its true power.

The High Priest appeared, and Su Yu also released his invisibility.

In that instant, the two formidable opponents faced each other for the first time, their gazes locking.

Though separated by more than ten kilometers, they both saw each other simultaneously.

Seeing the High Priest's ten-meter form, Su Yu was indeed surprised, not expecting such an imposing figure from this adversary.

Too bad, not even a blink, and he's about to die.

The High Priest saw Su Yu, his eyes filled with hate and despair.

He knew he was destined to die this time.

"Over a thousand years, only to end like this?"

"This level of attack, such a grade of Transcendent, how could this barren Dead Silence Wilderness possibly birth such? This can't be happening!"

The High Priest was extremely unwilling in his heart, unable to comprehend or imagine how this familiar Dead Silence Wilderness had produced a variable like Su Yu.

"Hahaha, you old monster, you're definitely dead!"

"Ye'er, people, your revenge is finally here! I can finally avenge you!"

"Old monster, after a thousand years of controlling my Ghost Tribe, finally it's all for nothing, all your schemes, everything, will turn to nothingness."

The Ghost Clan Chief laughed maniacally, filled with such joy.

Even if he too would vanish in the strike, he had no regrets, even welcoming it eagerly.

If it weren't for his relentless interference with the High Priest, the High Priest might have broken through to seven stars long ago.

Thus, the Ghost Clan Chief, having achieved his wish, had no regrets, only seeking death.

The High Priest ignored him, rapidly praying in his heart:

"Great Master, your loyal servant prays to you."

"I offer sacrifice to you! I sacrifice myself! I sacrifice my greedy and brutal soul, hoping you'll awaken from your slumber, bringing eternal destruction to this world..."

BOOM!

The Thunder Ball finally hit the High Priest, the terrifying power erupting instantly.

The ten-meter giant body was torn apart like foam, evaporating.

Then came the shocking explosion!

A blinding plasma fireball, centered on the High Priest, expanding madly.

Unmatched heat, violent shockwaves, massive amounts of Flame of Truth, sweeping everything away.

In no time, the fireball wiped out everything within a ten-kilometer radius, raising a towering mushroom cloud!

The Ghost Tribe no longer existed, erased from the map by Su Yu's single strike!

The fog was all purified away.

Su Yu's shot was practically akin to a nuclear blast in power!

"Ah!"

In the distance, the people of Mechanical City screamed simultaneously, covering their eyes.

Driven by curiosity to glance back, they nearly stared directly at the nuclear blast, almost blinding themselves, their ears almost deafened by the explosion's roar.

Before they could react, the shockwave struck, leaving them sprawled all over the place.

Fortunately, they were far enough not to suffer casualties.

"What just happened? What did the administrator do?"

"I'm blind! And deaf too..."

"It's terrifying, a city-destroying strike! Is this the administrator's power? It's simply like a deity..."
