

## Infinite 286

Chapter 286: Job Change, Data Mechanic, Evil God Descends!

The crowd covered their eyes, shouting loudly.

At this point, their ears were almost deaf; if they didn't raise their voices, they couldn't hear themselves speak, making the scene chaotic beyond measure.

However, Su Yu paid no attention to the others.

He was squinting, looking at the massive fireball and mushroom cloud.

Due to his physique, he wouldn't be harmed by the intense light and loud noise just now.

[You gained 560,000 Professional Experience (Mechanical Wanderer lv max!)]

[Mechanical Meditation Method synchronizes improvement...]

The Profession Panel refreshed with a prompt; the earth-shattering strike just now killed the enemy, gaining him a lot of experience.

Thus, he also reached the max level in Mechanical Wanderer.

At this moment, Su Yu had maxed out all three second-tier professions: Legion Mechanic, Military Mechanic, and Mechanical Wanderer.

Both his spirit and body reached the six-star top level without any amplification.

He was just a step away from truly reaching seven stars.

However, despite such achievements, Su Yu looked somewhat gloom.

Because he sensed that in that scorching fireball, something terrifying seemed to be awakening!

Su Yu knew that his blow just now undoubtedly killed the ten-meter giant.

But Su Yu faintly heard a lingering spiritual sound on-site, carrying a sense of ecstasy.

"One of the Primordial Seven Sins, the Sovereign of Greed..."

"Sovereign! You finally responded to your servant's call!"

"Hahaha, all you desecrators will die!"

Su Yu understood that before the ten-meter giant died, it did something unknown, and although it died, it seemed to awaken something even more terrifying.

So, the battle was far from over!

...

Su Yu didn't know that the High Priest worshiped a sovereign of extremely high status, with the divine name: Greed.

This evil god, born from the negative emotions of countless humans, was one of the Primordial Seven Sins.

Its might was indescribable, unimaginable, and boundlessly terrifying.

But currently, the Greedy Evil God was still in slumber, and would not bother with this small Ruins Star.

However, because the High Priest, before his total death, sacrificed his soul desperately, he slightly alerted this evil god, causing it to give an instinctive response and descend with power.

Before his complete death, the High Priest saw the arrival of the Sovereign's Divine Son, hence his ecstasy.

[Congratulations Host, as the Legion Mechanic level has maxed out, you can now take up a new profession]

[Available profession direction: Second-tier profession · Data Mechanic]

[Battlefield Mechanic (Main) + Intermediate Information Technology lv max + ... = Data Mechanic]

At this moment, the Profession Panel prompted again, indicating Su Yu could change professions.

However, the third-tier professions still hadn't unlocked and remained at the second tier.

"Change profession to Data Mechanic!"

Without hesitation, Su Yu immediately changed professions.

[Congratulations Host, profession successfully changed, current profession: Data Mechanic (lv1: 0/10000).]

[Congratulations Host, successfully awakened core ability: Data Informationization (lv1). As a hacker among Mechanics and a strong figure in internal battles, a Data Mechanic can transform his spiritual energy into intangible data information to invade various mechanical creations and seize control. He can also directly enhance the computing power of mechanical creations using spiritual energy, boosting combat power.]

After changing to Data Mechanic, Su Yu's spirit and body experienced a slight improvement, bringing him closer to seven stars.

Su Yu believed that as long as he maxed out Data Mechanic, he could surely reach seven stars and experience a substantial boost in power.

However, there was no time for him to level up now.

Because the mutation had already begun.

The massive fireball caused by Su Yu's strike was swiftly dissipating.

This spiritual explosion seemed to dissipate faster than the flames caused by explosives.

And as the fireball cleared, it revealed the original Ghost Tribe.

The Ghost Tribe was no longer present, with no buildings left behind, and the ghost energy mist had also completely dissipated.

Only a large pit remained on the spot, and the ground at the bottom of the pit had been baked by the high heat into a glass-like material, smooth as a mirror.

On this glassy surface lay black shadows, like clumsy children's drawings.

These shadows were the Ghost Demons in the mist, annihilated by Su Yu's attack, their bodies evaporated, leaving only shadows stuck to the ground.

At the pit's bottom was a ten-meter-long massive black shadow, left behind after the High Priest was evaporated.

These shadows were initially devoid of any power.

But suddenly, under a mysterious summons, they emitted strands of black gas, which coalesced into a twisted black sphere in the air above the pit.

No! This didn't seem to be a black sphere, but a door to space, leading to an unknown domain!

The next moment, those shadows clinging to the ground suddenly bulged up, taking corporeal form!

It seemed that the bodies of those Ghost Demons, which were supposed to be destroyed, were summoned once more by some mysterious force.

These bodies leapt up, converging toward the black sphere in the air.

In mere moments, these bodies gathered into a monstrous entity standing a hundred meters tall, thousand-handed and thousand-eyed, grotesquely twisted.

The Divine Son under the Sovereign of Greed of the Primordial Seven Sins—the God of Brutal!

Upon seeing Brutality, Su Yu instantly knew this truth, as the presence of the evil god itself seemed to contain countless information.

Everything occurred rapidly, within just a few seconds, and the Brutal Evil God had made its appearance.

Moreover, on the ground, shadows continuously spawned bodies, still converging towards Brutality's form.

Chapter 287: Job Change, Data Mechanic, Evil God Descends! \_2

With its appearance, the ghost energy fog that was about to dissipate at the scene became dense again.

And as Su Yu stared directly at this monster, thoughts of brutality, destruction, slaughter... suddenly surged in his mind.

Fortunately, Su Yu's will was strong, and his spiritual power was extremely powerful, allowing him to quickly recover.

"Not good!"

After recovering, Su Yu immediately murmured in his heart.

He could tell that this monster was unbelievably powerful, much stronger than the previous ten-meter giant.

It had definitely reached a seven-star level, and it was absorbing the corpses of ghost demons, rapidly becoming stronger!

Su Yu instinctively activated All-Knowing Perception.

[Brutal Evil God]

[Grade: Unknown]

[Type: Subspace God]

[Comprehensive Strength Assessment: Seven-star top -- Unknown]

Holographic Perception surprisingly only provided a name and couldn't determine the specific grade and strength of this monster.

"Attack!"

Su Yu immediately sent a signal for his mechanical war group to open fire and launch a salvo at the monster.

This monster was gathering the corpses of ghost demons every second, rapidly becoming stronger, seemingly without limit.

In a moment, it might break through to an eight-star level, then advance to nine-star, at which point no one could stop it.

Su Yu naturally couldn't give it such an opportunity.

Bang!

The mechanical war group launched a full attack.

At the same time, Su Yu utilized the newly acquired data information capability to enhance the mechanized group's computing power, making the attacks more precise and powerful.

But Su Yu was not targeting the body of the Brutal Evil God, but those summoned ghost demon corpses.

The main body was clearly difficult to handle, but these corpses were much easier.

As a result, those corpses were blown to pieces by the powerful firepower as soon as they were summoned.

[You gained 6000 experience points from profession (Data Mechanic lv1)]

[You gained 10000 experience points from profession (Data Mechanic lv2)]

[You gained...]

[Data Mechanic level up! Data Information synchronized upgrade!]

The profession panel kept giving prompts.

Su Yu was somewhat surprised that the shattered summoned corpses also counted as experience?

What is this?

Furthermore, those corpses were immediately summoned from the shadows on the ground again after being shattered, and once again blown apart by Su Yu, allowing him to acquire experience once more.

In a short time, the new Data Mechanic profession he had just switched to had risen several levels.

This Brutal Evil God seemed like a relentless monster farming machine. If it wasn't overly dangerous and the ammunition wasn't limited, Su Yu really wanted to farm experience here endlessly...

And because these corpses were destroyed, the Brutal Evil God couldn't absorb nourishment, and its rate of strengthening significantly slowed down.

Just then, a shout suddenly came from behind Su Yu, with even a few bullets hitting his armor.

"Kill!"

"You all must die!"

The shout was brutal and full of murderous intent, causing Su Yu to frown deeply.

He turned around and saw that the people from Mechanical City now had blood-red eyes and were about to kill each other in madness.

These people were unlucky, having just been blinded by directly looking at the "nuclear explosion".

Fortunately, the light from the spiritual explosion hadn't completely destroyed their sight.

So after some time, they all recovered, and each couldn't help but look towards the direction of the Ghost Tribe again, wanting to see the results of the administrator's strike.

And at that moment, the Brutal Evil God just descended. They had just witnessed the nuclear explosion and then directly faced the Evil God.

Without Su Yu's power, they were instantly overwhelmed by the immensely brutal aura, left with nothing but unending desire for slaughter.

Fortunately, it had been a short time, and after going crazy, their instincts pointed the guns at the biggest threat: Su Yu; they hadn't immediately turned on each other.

So, so far, no one had died.

"What a bother..."

Su Yu shook his head and, amidst the chaos, emitted spiritual energy to activate the Flame of Truth stored in the vehicles around them.

The white flames roared to life, enveloping everyone within.

"Ah? What was I just doing?"

"Did I actually shoot at the administrator just now?"

"Brutal God? What is that?"

"Why, when I saw it, couldn't I control myself? Why did I know its name just by seeing it?"

Enveloped in the Flame of Truth, they instantly regained clarity, all of them shocked.

Especially those who had fired at Su Yu, they were almost scared to death.

"Right, that Thousand-Handed Thousand-Eyed monster!"

"Just one look at it and I lost my mind!"

Everyone, after a moment, remembered what had just happened.

They immediately lowered their heads, no longer daring to look even once.

Just one glance would drive a person insane.

Even though they now had the Flame of Truth as protection and were bowing their heads, the madness still lingered persistently in the depths of their hearts.

What level of monster is this?

Brutal Evil God?

A truly authentic Evil God?

The administrator is actually fighting against such a monster that exists only in nightmare legends?

While everyone was feeling terrified, Su Yu's voice came: "You all hurry and leave, this is the Brutal Evil God, a genuine Subspace God, not something you can deal with."

"Leave all your weapons and ammunition, then return to Mechanical City to collect materials and produce ammunition for me!"

Su Yu was dismissing everyone, as they would only get in the way, better to return and perform logistics.

"What? Brutal Evil God? Subspace God? Is such a thing real?"

Upon hearing this name, everyone was shocked once more, feeling a sense of "so it is" at the same time.

Only a legendary Subspace Evil God could have such power.

And the administrator, surprisingly, can fight a god!

However, the administrator ordered them to go back?

"Then... Administrator, we will go back now to prepare ammunition and materials for you!"

"You must hold on!"

Everyone quickly understood that staying here would only get in the way, having no part in this level of battle.

They couldn't even look at it, let alone fight it?

They immediately deposited all the ammunition, then got in the vehicles and drove away at full speed, quickly leaving the battlefield.

"This time, we seemed to be of no use at all..."

"I wonder if the administrator can defeat that terrifying Evil God."

"Hurry back to bring weapons and ammunition to the administrator!"

As they left, everyone was worried and filled with mixed feelings.

They felt that so many of them were of no use at all.

At this moment, without any worries, Su Yu focused entirely on "farming monsters."

The ghost demon corpses summoned by the Brutal Evil God were mostly turned into experience by Su Yu, with levels constantly increasing.

In a short time, his strength increased again, reaching the peak of six-star level.

The Brutal Evil God seemed not to have truly descended with its consciousness; the Thousand-Handed Thousand-Eyed monster was temporarily just an empty shell.

Thus, allowing Su Yu to "reap" endlessly.

"I never thought I'd be reaping from an Evil God..."

Watching the constantly rising experience bar, Su Yu felt rather peculiar.

But Su Yu knew it couldn't continue like this forever.

The ammunition and energy of his mechanical war group were limited, and who knows if this Evil God had any limits.

"So..."

Su Yu ordered the mechanical war group to turn their muzzles towards those shadows on the ground.

Soon, those shadows were torn apart by a barrage of bullets, and those summoned corpses lost their source and no longer appeared.

Roar!

The Thousand-Handed Thousand-Eyed Brutal Evil God roared for the first time, with thousands of eyes turning simultaneously, focusing on Su Yu who was disrupting its descent.

It seemed there was a terrifying power gathering in those eyes.

Su Yu's pupils contracted, immediately activating the ability: Electromagnetic Fury!

Immediately, the entire mechanical war group went into overload; although they would all fail in a few minutes.

But during these few minutes, their strength increased several times!

Those over a thousand primary rangers directly upgraded to four-star intermediate!

Seventy-six intermediate rangers, five-star intermediate!

Ten advanced rangers, five-star top!

Thirty Defenders, thirty Hunters, directly upgraded to six-star intermediate!

This was a terrifying force!

At this moment, they all aimed their guns and cannons at the Brutal Evil God, unleashing full firepower!

Ample ammunition, beams, and plasma beams, carrying the Flame of Truth, all shot at the Brutal Evil God with unmatched force.

The Brutal Evil God seemed to sense danger as well, releasing the accumulated power from the thousands of eyes, transforming into thousands of Ghost Energy Beams, colliding with Su Yu's attacks!

Chapter 288: The Might of the Evil God! Shearing the Evil God's Wool Again!

Seeing the thousand Ghost Energy Beams emitted by the Brutal Evil God, Su Yu's expression suddenly became solemn.

After all, this was the first move after the Brutal Evil God appeared, and Su Yu still couldn't figure out what kind of power this Brutal Evil God possessed.

He was afraid that it truly had god-like power and could annihilate the mechanical war group in one move.

However, just a moment later.

The thousand Ghost Energy Beams that the Brutal Evil God emitted, facing the barrage of the mechanical war group's fire, surprisingly crumbled upon contact and were directly blasted back.

Then, the ammunition, beams, ion beams... all fired by the mechanical war group struck the body of the Brutal Demon God, shattering most of its hands and eyes!

Roar!

The Brutal Demon God let out a roar, seemingly having taken considerable damage.

"So weak?"

Su Yu was taken aback by the scene.

He had been worried for so long, even resorting to make the mechanical war group use Electromagnetic Fury, and overclock itself.

Could it be that this Evil God was just for show?

However, Su Yu quickly realized something was wrong. Although the Brutal Evil God's body had been shattered in many places, it immediately began to regenerate and soon had mostly recovered.

Fortunately, Su Yu's mechanical war group was already in Electromagnetic Fury, and their attacks wouldn't stop until they were completely spent.

Under the relentless assault of the mechanical war group, the Brutal Evil God's body was repeatedly dealt severe blows.

Although the regeneration was extremely fast, Su Yu could see that each time it was heavily damaged, its regeneration speed slowed a bit.

This indicated that the mechanical war group's attacks were not useless and that the Brutal Evil God's regenerative ability was not unlimited!

If the mechanical war group's attacks could continue indefinitely, they might just be able to completely destroy it.

It was now a matter of whether the mechanical war group would be scrapped first or if the Brutal Evil God's restorative energy would be completely depleted.

For a moment, the situation reached a stalemate, with Su Yu coldly observing, not rushing his main body into action.

He always felt that the ease was too excessive and suspected there might be a problem.

Finally, a few minutes later, the restoration speed of the Brutal Evil God's body had slowed to the extreme.

Its whole body appeared tattered, as if it might fall apart at any moment.

If the bombardment continued for a while, it seemed it could no longer regenerate!

However, just at this moment, the Brutal Evil God's movements suddenly halted.

Even its regeneration stopped, standing like a statue, allowing the mechanical war group to attack it.

As if Su Yu had already "killed" it.

In the face of this situation, Su Yu felt a chill run down his spine.

Because he sensed that within the body of the Brutal Evil God, an ancient, evil, vast, chaotic consciousness was awakening.

If the previous Brutal Evil God was merely an empty shell of power, a beast that could only attack instinctively.

Now, this shell had finally been filled with a powerful will!

At this moment, the Brutal Evil God truly descended!

Indeed, in the next instant, the body of the Brutal Evil God trembled.

All its eyeballs began to spin wildly, and a thousand mouths opened simultaneously, emitting frenzied laughter.

The laughter was incredibly chaotic, as if thousands of madmen were shouting crazily in a babbling chorus.

All the sounds merged into one, forcibly pouring into Su Yu's mind.

An ordinary person, hearing one sentence, would immediately fall into madness.

Although Su Yu did not go mad, he felt his forehead veins throbbing, blood pressure soaring, and his vision turning blood-red.

Yet, Su Yu, being an almost seven-star strongman, managed to withhold the erosion of this demonic sound with his strong spiritual energy and psychic power, along with the core ability of a Fighter, Adaptability.

Moreover, from the chaotic sounds, he deciphered some information:

"Hahaha, after thousands of years! I finally have a physical body again!"

"Trapped on this planet for far too long! Nearly ten thousand years!"

"Master! Father! Great God of Greed, I shall awaken you!"

"Die! All humans shall die!"

These pieces of information were all mixed together.

And each piece of information carried different emotions, making Su Yu feel as though he was about to have a mental breakdown.

Moreover, among those demonic sounds, there was more messy information.

It seemed to involve the mysteries of the Subspace Deep Layer and prayers, praises for the so-called Greedy Evil God.

Instinctively, Su Yu refrained from deciphering those deep-layered pieces of information, or he might actually go insane.

After the frenzied laughter, the thousand chaotic eyeballs of the Brutal Evil God turned, looking down at Su Yu from high above.

"This carrier is so weak, and those annoying bugs attacking..."

"It's the Human Empire's Mechanic..."

"Kill, kill, kill..."

"Slaughter, in the name of the God of Brutal..."

When the thousand mouths opened, the chaotic demonic sound rang out again.

With this demonic sound, the mechanical war group under Su Yu's command suddenly stopped attacking!

Those Mechanical Creations, which originally had no life, no emotions.

But at this moment, they started exhibiting an aura of brutality, their indicator lights flashing a piercing red.

In the next instant, they all turned their guns towards Su Yu!

Boom!

A round of volleys engulfed Su Yu's body!

The Brutal Evil God's ability, Voice of Brutal!

With just one sentence, it made lifeless Mechanical Creations imbued with brutality, betraying their master!

No, it wasn't betrayal.

But in that instant, those lifeless Mechanical Creations gained a form of vitality, a form of vitality laced with brutality.

Seeing Su Yu's silhouette being engulfed, all the mouths of the Brutal Evil God twisted into a sadistically pleased smile, though the next moment, that smile froze.

Chapter 289: The Might of the Evil God! Shearing the Evil God's Wool Again!\_2

Because whispers arose.

"As expected of an Evil God..."

It was Su Yu.

He didn't know when, but he had already vanished from his original spot and reappeared not far away, avoiding being killed by the treacherous mechanical war band.

However, he was still shaken.

The current mechanical war band, fully enveloped in electromagnetic fury, had gained the divine power of the Brutal Evil God after their betrayal, and their attack power was shockingly strong.

If he hadn't escaped quickly enough, he would certainly have been killed by their volley.

"Fortunately, Nuonuo, having bonded with me as a Mechanical Apostle, has become Mechanical Life, thus avoiding the influence of the Brutal Evil God. That was close..."

Just at that moment, the Azure Oath Battle Armor on Su Yu's body almost got infected with that brutal vitality.

Luckily, this battle armor had already been fused with Nuonuo.

Since Nuonuo is truly intelligent life and is in tune with Su Yu, it has a strong resistance to the Voice of Brutal. At the critical moment, it controlled the battle armor, allowing Su Yu to successfully escape.

"Master... Nuonuo feels uncomfortable..."

Despite not betraying, Nuonuo also felt unwell.

"You, worm, still alive!"

"Why won't you die! Just die for me already!"

"Ignorant worm, insignificant life, you are worthless..."

The Brutal Evil God roared in anger, its devilish voice rising again.

The mechanical war band immediately locked onto Su Yu again, preparing to unleash another volley.

Moreover, the brutal aura on their bodies grew even stronger, seemingly further empowered by the strength of the Brutal Evil God.

"Flame of Truth! Data... Informatization!"

Without hesitation, Su Yu activated his abilities.

**BOOM!**

A massive amount of Flame of Truth rose from every member of the mechanical war band, fiercely burning and dispelling the influence of the Brutal Evil God.

However, the Flame of Truth wasn't enough.

So Su Yu's spiritual energy transformed into intangible data, pouring into their core chips, competing with the Brutal Evil God for control.

Moments later, the mechanical war band suddenly froze, and the indicator lights turned back to their normal blue color.

They again turned their guns toward the Brutal Evil God, **BOOM!**

A volley of fire blasted forth, shattering more of the Brutal Evil God's body.

"Finally got control back!"

"Luckily, I had switched to a Data Mechanic in advance and gained a wave of experience points earlier; otherwise, it would've been a big problem..."

Su Yu wiped sweat from his forehead in his mind.

The ability he had just used was precisely the core ability of the Data Mechanic: Data Informatization!

The greatest use of this ability is acting as a data hacker, able to invade enemy mechanical creations and seize control during a mechanic civil war.

Su Yu thought he wouldn't have much opportunity to use this ability.

After all, until now, he hadn't encountered any other Spiritual Mechanics, let alone enemies.

But unexpectedly, he ended up using it in the battle against the Brutal Evil God!

"Makes sense; previously I had unlocked the peculiar profession of [Mechanical Missionary]. It's clear that Evil Gods also have a strong ability to contaminate mechanical creations."

"Evil Gods aren't merely mindless killers; this special active contamination allows this Brutal Evil God itself to be seen as a top-level spiritual hacker!"

"In the previous scenes, even Zhang Chenfeng's divine body-like kilometer-long mecha was eroded, let alone my mechanical war band?"

"Becoming a Data Mechanic really was the right choice! This profession's significance is not only being a hacker in civil wars but also becoming the strongest data 'firewall' when facing Evil Gods..."

At this moment, Su Yu thought of many things.

He had a deeper understanding of the Evil God's power and his own abilities.

This data ability of Data Informatization, which seemed temporarily useless, proved to be incredibly useful in the battle against the Evil God.

If it were an ordinary Spiritual Mechanic, at first sight, they would have had all their creations' control taken by the Brutal Evil God, dying a most frustrating death.

But Su Yu was able to regain control of the war band and counterattack decisively in a very short time.

It must be said, after undergoing many career changes, Su Yu's abilities are incredibly comprehensive, with no apparent weaknesses.

Even when facing the strange and terrifying Evil God, he had ways to counteract it!

"How dare you damage the vessel of my descent, kill, kill, kill..."

"You actually can resist my divine power!"

"What! You, worm, why do you possess such strength!"

The Brutal Evil God, hit by the volley, roared in rage.

With thousands of eyes, most were filled with extreme brutality.

Yet, among them, a portion showed surprise, curiosity, deep thought:

"This is... the purification flame of the Gunfighter and the data control of the Data Mechanic!"

"Die! Just die for me!"

"You human worm, what is your profession?"

"Truly bizarre, even ten thousand years ago, this god had never seen a worm like you."

"You must die!"

"Worm, this god is very interested in you. Kneel down and pray to this god, and I shall grant you eternal life!"

After a series of analyses, the Brutal Evil God grew very interested in Su Yu, even proposing recruitment!

Though its words were contradictory, at one point wanting Su Yu dead, at another offering him eternal life.

With the ancient wisdom of the Brutal Evil God, it naturally saw that Su Yu was extraordinary.

Possessing so many abilities and deeper spiritual energy that was simply unbelievable.

Such a bizarre existence, once taken under this god's wing and cultivated, would undoubtedly play an enormous role.

"Haha..."

Hearing this, Su Yu burst into laughter.

"You are nothing but a monster; what kind of god are you? What right do you have to make me kneel!"

"You were sealed on this planet by Zhang Chenfeng for thousands of years, proving you are nothing but a loser!"

"Kneel to you? I'm going to slay you today!"

"Die!"

At this moment, Su Yu's eyes were blood-red.

While not crazed, he was influenced by the brutal aura, feeling somewhat agitated and speaking boldly.

He roared, and the mechanical war band's attack never ceased.

For over ten minutes, they continuously attacked, leaving the Brutal Evil God's body riddled with wounds, nearly reduced to skeletal remains.

"Worm, you seek death!"

"How dare you destroy my vessel..."

"Kill! All humans must die!"

The Brutal Evil God roared furiously, shaking the heavens.

In the distance, the departing crowd heard the roars of the Brutal Evil God. Although separated by a great distance and protected by the Flame of Truth, they nearly went mad.

But simultaneously, Su Yu's voice came through:

"...proving you are nothing but a loser!"

"Kneel to you? I'm going to slay you today!"

Hearing Su Yu's voice, everyone's heart skipped a beat, and they returned to clarity.

Did the Administrator just call the Evil God trash with such dominance?!

And plan to slay it?

The crowd, filled with curiosity, wondered how the battle was unfolding now.

Some bold ones, relying on the protection of the Flame of Truth, turned back to take a look through binoculars.

Just in time to see the Brutal Evil God blasted down to just its skeleton.

For the first time in thousands of years, an Evil God had descended, yet was beaten like this by Su Yu!

"The Administrator is truly formidable..."

"Could it be that before we even return to the Mechanical City, the Administrator will have succeeded in god-slaying?"

At this moment, only two words echoed in everyone's mind, god-slaying!

Indeed, from the crowd's perspective, Su Yu was now slaying a god!

...

As for Su Yu himself, he was thinking similarly.

This Brutal Evil God didn't seem to be that formidable...

Perhaps it had been sealed for thousands of years and had weakened to an extreme, and before its true descent, its vessel was further weakened by Su Yu, consuming most of its power.

Causing, after its descent, the only ability it could use was the Voice of Brutal.

Once this eerie ability was resolved by Su Yu, it had no power to fight back, unable to even release a single Ghost Energy Beam.

It seemed to lack even the ability to move and evade attacks, unable to leave its original spot.

It could only stand there, subject to Su Yu's relentless assault, letting out roars of powerless fury!

Its skeleton was now full of cracks, seemingly about to completely shatter at any moment.

If this continued, Su Yu might very well succeed in god-slaying today!

But... after another ten minutes...

The Brutal Evil God continued to roar, showing no signs of breaking.

And the mechanical war band was still vigorous.

They ran out of ammo but didn't stop; they now swarmed around the Brutal Evil God, engaging in melee combat.

"Wait a minute, something's not right! Why aren't these mechanical war bands trashed yet?"

Su Yu's agitation suddenly gave way to clarity, noticing something unusual.

His mechanical creations had been operating under electromagnetic fury overload, and logically, by now, they should have been rendered useless.

Why were they still fighting?

Chapter 290: Intelligent Chipset - Brutal Enhancement

With suspicion, Su Yu temporarily halted the mechanical battalion's attack and carefully observed, discovering that the machines still carried remnants of brutal energy on their bodies.

This energy seemed to protect their bodies, making them more resilient.

Even amidst the Electromagnetic Fury, they maintained strong toughness and wouldn't get scrapped easily.

Moreover, their attack power was increased once again.

After being seized by brutality once, the mechanical battalion seemed significantly strengthened, gaining substantial benefits...

"Did I just fleece the Evil God again and use it against him?"

Su Yu felt peculiar.

The Brutal Evil God truly lived up to his brutal name.

A trace of his energy could greatly enhance the mechanical battalion, boosting their combat power.

However, Su Yu frowned.

The mechanical battalion, tainted with just a trace of energy, gained such great benefits.

How could the body of the Brutal Evil God be so weak, only capable of taking hits passively?

While Su Yu was pondering, the Brutal Evil God, in a rage of impotence, seemed to sense Su Yu's change and suddenly burst into wild laughter.

"Haha, you indeed embody brutality! You are destined to be my believer!"

"Your attacks, your intense emotions will only serve as my nourishment!"

"I am a god, undying and eternal!"

The Brutal Evil God, whose skeletal body had been blasted, suddenly burst forth an immensely powerful Ghost Energy.

The next moment, flesh and blood were fully restored! The Thousand-Handed Thousand-Eyed body reappeared, with an aura of brutality, looking down on Su Yu from above.

Boom!

The Ghost Energy around the Brutal Evil God exploded, sending Su Yu's mechanical battalion flying, with fragments and parts scattering.

This time, they could no longer remain intact and were truly shattered.

Su Yu gestured, and over a thousand chips flew into his hand.

These chips were surprisingly undamaged.

After all, the Electromagnetic Fury doesn't consume the chips, allowing them to be recycled.

In fact, due to the power of the Evil God, these chips had been significantly enhanced.

It's uncertain whether such enhancement comes with hidden dangers.

But Su Yu didn't care; the Flame of Truth was infused into the chips, thoroughly cleansing them.

Then, using Holographic Perception, he inspected these chips:

[Intelligent Chip Set (Brutal Enhancement): Empowered by Brutal Divine Power, possessing special strength. Mechanical creations loaded with this chip are more resilient, able to withstand prolonged Electromagnetic Fury, and have stronger attack power.]

[Note: This chip must be purified by the Flame of Truth before safe use.]

The Profession Panel provided a tip.

It turns out that this enhancement comes with hidden dangers; how could the power of the Evil God be so easily used?

Fortunately, it's not a big problem; Su Yu has a solution. The purifying effect of the Flame of Truth, along with the ability of a Data Mechanic, makes these chips more useful to Su Yu than other intelligent chips.

He has fought the Evil God himself; is he afraid of leaving small tricks behind?

After dealing with the chips, Su Yu handed them over to the last surviving cavalryman.

This cavalryman was intentionally left untouched by Su Yu, not subjected to the Electromagnetic Fury, and did not participate in the battle, so it remained intact.

The cavalryman stored the chips and turned to head toward the Mechanical City.

Within the Mechanical City, there is a production line for cavalymen; given time, Su Yu can restore his mechanical battalion.

At this moment, after recovering his strength, the Brutal Evil God stretched his terrifying and twisted body, seemingly savoring this long-lost world and not in a hurry to attack Su Yu.

After dealing with the chips, Su Yu pondered for a moment and then spoke to the Brutal Evil God:

"Can you draw strength from our battle?"

"Were you doing it on purpose just now?"

Su Yu realized that although the Brutal Evil God was weakened, he could draw power from the violent emotions during combat.

Just now, as Su Yu fought fiercely, filled with brutal emotions, the Brutal Evil God instead regained power from the battle.

The existence of such an Evil God is truly bizarre and powerful, defying conventional logic.

Without fighting him, it's impossible to eradicate him; fighting him generates brutal emotions, restoring his strength.

This ability is simply unreasonable.

The Brutal Evil God, hearing this, swiveled a thousand eyeballs and burst into frenzied laughter:

"Hahaha!"

"Mortal! You are clever! Quite outstanding!"

"Indeed, I am the God of Brutality; your fighting will and brutal emotions will only become my strength!"

"As long as there is the Heart of Brutal among the beings of this universe, I am undying and eternal!"

"Give up, you have already lost your mechanical creations and are even less likely to defeat a True God!"

"Kneel, pray, and become my believer to gain supreme glory!"

Having regained strength, the brutal wicked charms grew more potent, once again tempting Su Yu.

The Brutal Evil God attached great importance to Su Yu's abilities.

If he could cultivate Su Yu into an Apostle Mechanic, Zhang Chenfeng's creations would no longer be an obstacle.

The Brutal Evil God could leave this planet and stir up endless brutal slaughter in the Star Sea!

However, as he listened to this evil chant, Su Yu indeed felt an urge to kneel and pray but managed to hold it back.

Su Yu sneered:

"Really? If you are truly unbeatable, why have you been trapped for millennia?"

"Moreover, I guess your true body is still sealed, and what has descended is only a fragment of your consciousness!"

Su Yu naturally wasn't intimidated by the Brutal Evil God.

He had already gathered much information from the Brutal Evil God's words.

This Subspace Evil God seemed to have been born from human emotions, with an eerie nature, almost invincible.
