

Infinite 291

Chapter 291: Intelligent Chipset - Brutal Enhancement_2

But ultimately, he was sealed by Zhang Chenfeng, proving that he is not invincible.

Moreover, Zhang Chenfeng's seal likely extends beyond the real world and exists in the Subspace as well.

Otherwise, given the Brutal Evil God's cunning, he would have already descended on other planets through the consciousness of living beings and wouldn't have been trapped on Ruins Star for millennia.

His true form in the Subspace is likely still under heavy seal, and what appears now is just a fraction of his power.

In fact, it's only a sliver of intention, combined with the leftover brutality from the Ghost Tribe, that created this Thousand-Handed Thousand-Eyed incarnation.

This incarnation's current power is only around seven stars.

However, because of his nature as an Evil God, it makes him extremely hard to kill.

But it's far from being invincible.

Moreover, this incarnation's ability to draw power from emotions should have a distance limitation.

Otherwise, with all the chaos on this planet and the rampant slaughter, there would be plenty of brutal emotions. If he could absorb them at will, Su Yu would have long been dead.

This means that this battle can still be fought!

"Human vermin! You're courting death!"

The Brutal Evil God, seeing his attempt to make Su Yu surrender had failed and being mocked, instantly erupted in fury again.

"I'll kill you and resurrect your corpse for use just the same!"

"Within your Mechanical Creation, I sense my aura. I can feel there are many humans where it went. Once I destroy you, I'll go there and wipe out all humans!"

"Die, perish!"

The Brutal roar was thunderous, and a thousand eyes glared, immediately unleashing terrifying Ghost Energy.

The place where Su Yu stood exploded violently, mushroom clouds rising.

This Ghost Energy explosion, though not as powerful as Su Yu's earlier shot, was nonetheless formidable.

Moreover, while Su Yu's shot took a long time to charge, the Brutal strike could be unleashed instantaneously!

And being hit directly by such a strike, as a Mechanic not proficient in direct combat, Su Yu would certainly be doomed.

The Brutal God unleashed the strike and immediately stepped forward.

He intended to follow the sensing path to the Mechanical City.

With tens of thousands of humans there, as long as he massacres them all, leveraging the brutal emotions in battle, he could recover to eight-star strength, then massacre his way through, and his incarnation's power could soon sweep across the whole planet!

The terror of an Evil God descending in an incarnation cannot even be imagined by ordinary people.

Yet, just as he took a step, he suddenly found that most of his hundreds of legs were severed.

A figure was speeding through his legs at supersonic speed—it was Su Yu.

Wielding the Chain Saw Blade, Su Yu fully activated the formidable power of the Azure Oath using his top-tier six-star Spiritual Energy and body.

With one slash, he severed one of Brutal's legs.

"Plan to massacre the residents of the Mechanical City? Have you asked me, Su Yu?"

"Do you really think I, Su Yu, am a fragile ordinary Mechanic who would be easily killed without a Mechanical Creation?"

Su Yu's blade swung like the wind, frantically cutting Brutal's legs while he thought.

The blood of the Evil God poured down like a waterfall, soaking him.

Such Evil God blood has a powerful corrosive effect.

Forget ordinary people; even regular six-star strong individuals, if soaked, would soon be eroded into frenzied monsters.

Fortunately, Su Yu had the Flame of Truth and had also activated his Undying Body.

The moment the divine blood hit him, the Flame of Truth evaporated and purified most of it, and the toxic radiation gas that rose couldn't harm his Undying Body.

"You seek death!"

The Brutal bellowed furiously, Spiritual Energy exploding again.

Yet Su Yu nimbly dodged, returning to cut the legs again once the explosion ceased.

The massive Brutal God, towering over a hundred meters, was enormous and powerful but lost flexibility, unable to catch Su Yu's figure.

Of course, this battle was also quite dangerous for Su Yu.

Just a moment's lack of timely evasion, and if struck by the terrifying Ghost Energy explosion, he would be blown to bits.

But amid such a perilous battle, Su Yu became more comfortable, his various abilities activating more smoothly, growing stronger as the fight went on!

Speaking of which, this was Su Yu's first time engaging in such an exhilarating close-combat. Mainly, he never had such opportunities before.

Now that the mechanical forces were wiped out and he had to fight personally, it made up for his shortfall in close-combat experience.

So...

After some time, the dignified Brutal Evil God was surprisingly chopped into a legless cripple by Su Yu!

With the current vast body of the Brutal Evil God seemingly unable to fly, losing the legs left him trapped in place by Su Yu, only able to crawl slowly, unable to enact his massacre plan.

"Hehe, it turns out such a big BOSS just needs a pedicure..."

Su Yu looked at the legless, tottering Brutal Evil God, smirking, quite satisfied with his achievements.

"You actually still have the strength!"

The Brutal Evil God roared, as Su Yu continually exceeded his expectations.

Although Su Yu's power was weak, far from the Apostle Mechanic Zhang Chenfeng of yore, the potential displayed was terrifying.

When Zhang Chenfeng was six-star, he would have been instantly killed by the Brutal Evil God, unable to stand toe-to-toe like this.

If Su Yu also became an Apostle Mechanic, who knows how strong he'd become!

Such a human, if subjugated, could be immensely useful...

The Brutal God thought, beginning the regeneration of his severed legs.

Since Su Yu was fighting, naturally there was brutal emotion, providing energy for his recovery.

But unfortunately, the leftover brutal emotion from the Ghost Tribe had long been exhausted.

Now with only Su Yu nearby, and since he remained calm, lacking much brutal emotion, his recovery was rather slow.

However, Su Yu could not genuinely kill the Brutal Evil God, given that the god's body was too massive, only able to "pedicure" and stop his movement.

The human and the Evil God were thus in a stalemate.

Yet Su Yu still had the upper hand, after all, he hadn't suffered any injuries, only lost some creations, while Brutal was bleeding heavily.

Come to think of it, since the Brutal Evil God descended, Su Yu seemed to have been on the offensive.

But the Brutal God's eyes were cold, looking at Su Yu as if gazing at a corpse: "Human vermin, merely relying on the power of armor!"

"When your energy runs out and Spiritual Energy is exhausted, that'll be your time of death!"

In the Brutal Evil God's view, how could a mortal like Su Yu compete in endurance against a True God?

Eventually, he would deplete his strength, and that would be the end.

Su Yu could win ten thousand times, but losing just once would mean total defeat!

Thus, the Brutal Evil God was determined to endure against Su Yu!

However, the Brutal Evil God didn't realize that Su Yu was thinking the same:

"Heh, you think you can wear me down? Who's afraid!"

Su Yu's armor had strong endurance, enough energy to last ten days!

His Spiritual Energy, amplified by so many professions, was incredibly deep, able to last for a long time.

Of course, no matter how strong Su Yu was, he was ultimately flesh and blood.

After a long time, he would still need to eat, sleep, and rest, not able to endure indefinitely.

And as a god surviving at least ten thousand years, if the Brutal Evil God truly intended to keep enduring, Su Yu surely could not outlast him.

Therefore, Su Yu had other plans.

...

In the distance, after so much time, the people had already returned near the Mechanical City.

They had just prepared to enter the city when they saw a steel figure, faster than them, suddenly rushing through the city gate and disappearing.

"Just now, that seemed like the administrator's cavalry? Why did it return?"

"We shouldn't concern ourselves with the administrator's arrangements. Quickly collect materials to help the administrator produce ammunition and weapons!"

The crowd recognized it was one of Su Yu's cavalry returned.

Though puzzled, they didn't give it much thought, hastily entering the city to start their work.

Su Yu was still waiting for their logistical support.

City residents, fearful for half a day, were overjoyed to see everyone return without any casualties.

But they soon discovered the administrator hadn't returned, suddenly alarmed, rushed to ask:

"You all are back?"

"How is the battle?"

"Where is the administrator? Why hasn't he returned?"

"What happened to the seven-star being in the Ghost City?"

Chapter 292: Brutality's Guess, Evil God Su Yu?

The residents at this moment were afraid that the combat personnel would say that the Administrator had already sacrificed themselves, then who could defend this Mechanical City?

The combat personnel who had just returned were taken aback by the residents' questions, not knowing how to explain.

Everything they experienced earlier was too shocking and bizarre, leaving them momentarily speechless about how to explain.

Huang Ying, being straightforward, directly said:

"Don't worry, the Administrator is fine. The seven stars of Ghost City, along with the entire Ghost City, were blasted away by the Administrator in one shot..."

"However, later on, some Subspace Evil God appeared, very ferocious, standing over a hundred meters tall, covered in eyes and arms."

"The Administrator is now fighting that Evil God, intending to slay a god..."

Huang Ying continued endlessly, roughly explaining what had happened earlier.

When she finished, the scene fell silent.

The residents looked at Huang Ying with bewildered expressions.

What was she saying? They couldn't understand a word! The Administrator destroyed a city with one cannon and is now going to slay a god?

Is there something wrong with Huang Ying's head, spouting nonsense and making up stories?

The crowd thought for a moment, deciding to ignore Huang Ying.

This person seemed to be all brawn and no brains, her words not credible.

They all turned their inquiring eyes to Feng Tian, Kuang Gu, Yang Lie, and others, wanting to hear what they had to say.

Seeing everyone like this, Huang Ying was about to lose her temper.

Feng Tian, Kuang Gu, and others exchanged glances and finally spoke:

"Ahem, what Huang Ying said is correct, that's how it truly is."

"Although it seems unbelievable, the Administrator is indeed battling a legendary Evil God."

"To our shame, although we are combat personnel, we were of no use in this battle."

"Yes, that Evil God is so terrifying, just seeing its figure or hearing its voice can drive you mad. So the Administrator thought we were in the way and asked us to return first, as he fights that terrifying Evil God alone..."

"It's a pity we couldn't record it, or we would have loved to show you the Administrator's strength."

"Even if recorded, you couldn't watch it anyway; watching it might drive one insane..."

Feng Tian and the others each chimed in to substantiate Huang Ying's account.

These people were originally the high-ranking officials of various communities, possessing significant prestige.

When they spoke, the residents couldn't help but believe.

But... how is it possible?

It was clearly a war between the Mechanical City and the Ghost Tribe, two communities. Even though there were Transcendents, it was ultimately still a human struggle.

How did it become entangled with a legendary Evil God?

Is there really such a thing as an Evil God? Isn't that just a story to scare children?

And the Administrator can still battle such an existence? What level has the Administrator reached now?

The crowd was filled with doubt, puzzlement, shock, curiosity...

After a while, Yang Lie spoke up:

"Alright, let's not block here anymore!"

"The Administrator is fighting, we can't just sit idle; we need to collect materials for him, produce weapons and ammunition, and prepare the logistics!"

"Let's all go back and do our jobs!"

As a founder of the Mechanical City and Su Yu's confidant, with Su Yu not present, he acts as Su Yu's spokesperson, and no one would defy him.

Upon hearing Yang Lie's voice, everyone snapped back to reality.

"Right! Let's do our best to support the Administrator!"

"We absolutely can't hold back the Administrator!"

The crowd exclaimed, quickly making way for everyone to enter the city.

Once back in the city, they immediately started working full speed ahead.

...

Below the Mechanical City, in the Mechanical Space.

At this moment, the returning Ranger had already delivered those chips to the Mechanical Spirit, and transmitted Su Yu's orders to it.

The Mechanical Spirit received Su Yu's command and immediately started executing it, activating the production line, and assembling the Rangers.

The production of the Rangers was mainly limited by the chip output, but now the chips were readily available.

So soon, one after another, new Rangers were assembled on the production line.

In just two to three hours, over four hundred had been produced.

However, at this time, the production line stopped.

Because there was not enough material and parts, since after all, the Mechanical City's reserves weren't infinite.

Previously, Su Yu had been producing Rangers in large numbers daily, consuming many resources, and now they were finally depleted.

Fortunately, many residents were working hard to mine ores and collect materials daily, and new materials and parts would soon be delivered.

These over four hundred Rangers not only included basic Rangers but also intermediate and advanced, since the chips were of various levels.

But there were no stronger Hunters and Defenders; the materials to produce them were the shells of the Radiation Giant Scorpions, which were now exhausted and completely unavailable.

In fact, there was no need for Hunters and Defenders anymore.

Because all those chips had been enhanced by the Divine Power of the Brutal Evil God.

The Rangers equipped with these chips became sturdy and resilient, with greatly increased attack power, almost each advancing a grade without reason.

The basic Rangers equaled the previous intermediate ones, possessing three-star strength.

The intermediate Rangers equaled the previous advanced ones, possessing four-star strength.

The advanced Rangers, however, exceeded further, possessing five-star strength!

Moreover, these were their normal state power levels, without any enhancement, strengthening, overload, or resonance from Su Yu's various skills!

Chapter 293: Brutality's Guess, Evil God Su Yu?_2

If we add Su Yu's various skills, I really don't know how strong it would be.

After the production of these more than four hundred Cavalries was completed, the Mechanical Spirit followed Su Yu's transmitted orders and issued a task to the people of the Mechanical City.

Beep beep beep!

Many people's personal terminals sounded an alert tone.

They hurriedly opened it and immediately saw the task issued by the Mechanical Spirit, each one looking puzzled:

"Administrator, you want us to take the Cavalries to hunt Radiation Beasts?"

"Weren't all the Cavalries destroyed? How come there are more?"

"Shouldn't we go support the Administrator? Why hunt Radiation Beasts?"

"And we can't intervene, just watch? What's that about?"

It turned out that the task issued by the Mechanical Spirit instructed everyone to immediately take the more than four hundred Cavalries out of the city to hunt beasts, and the requirement was that only the Cavalries could take action, while they just watched.

Everyone was baffled, unable to understand Su Yu's intent, no matter how much they thought about it.

Wasn't everyone fighting against the Evil God? What does this have to do with Radiation Beasts?

"Forget it, the Administrator must have a deeper meaning."

"Let's go, out of the city, kill the Radiation Beasts!"

The crowd couldn't figure it out, so they stopped thinking about it.

Soon, they took the newly produced more than four hundred Cavalries, divided into about a dozen teams, and went out of the city to look for Radiation Beasts.

After a few hours, these dozen or so teams each found groups of Radiation Beasts and started battling them.

With the powerful strength of those Cavalries, facing those mostly two-star and three-star Radiation Beasts, it was like cutting through melons and vegetables, easily destroying one nest after another.

This kind of prowess naturally shocked the people of Mechanical City greatly.

They didn't expect that even in the Administrator's absence, the creations he left behind would be so ferocious.

Each Cavalry was at least three-star strength, many were four-star, and there were even five-star ones!

...

Meanwhile, Su Yu was still stalemated with the Brutal Evil God.

The Brutal Evil God kept regenerating its injuries and attempted to kill Su Yu with powerful Ghost Energy.

Su Yu used his incredibly agile movements, constantly moving at supersonic speed to evade attacks, and occasionally counterattacking, cutting off the Brutal Evil God's legs to prevent it from regaining mobility.

However, as time passed, no matter how strong Su Yu was, fighting at such high intensity tired him, although the armor provided power, his body still experienced fatigue.

The Brutal Evil God keenly noticed this and laughed wildly:

"Hahaha, human! Your fragile body is about to give out!"

"Die! Die!"

"A mere human wants to compete with me in endurance, how ridiculous!"

"How much energy does your battle suit have left? How much physical and Spiritual Energy remains?"

"Stop struggling, kneel and pray to me..."

The Brutal Evil God's voice was thunderous as it tried to disrupt Su Yu's spirit.

Under its interference, Su Yu's speed indeed seemed to slow a bit.

The Brutal Evil God roared even more energetically.

However...

[You have gained 7000 points of Professional Experience, (Data Mechanic lv7)]

[You have gained 12000 points of Professional Experience, (Data Mechanic lv7)]

[You have gained...]

[Data Mechanic level up! Data Information synchronization enhanced!]

A notification suddenly appeared before Su Yu's eyes.

It turned out the Cavalries, by hunting Radiation Beasts in the wilderness, had given Su Yu a substantial amount of experience out of nowhere.

As a result...his new profession of Data Mechanic leveled up!

Immediately, the originally somewhat fatigued Su Yu suddenly felt revitalized, full of energy.

Although the Data Mechanic is a hacker-type profession, not greatly enhancing strength,

it is, after all, a second-tier profession, and each level up would bring an all-around enhancement to body, spirit, and Spiritual Energy.

This enhancement "refreshed" Su Yu's state, restoring him to peak condition, even stronger than at the start of the battle.

This was Su Yu's plan!

Otherwise, how could he be confident to wear down the Brutal Evil God?

He is now a level 7 Data Mechanic, with over 20 potential level-ups awaiting.

The Brutal Evil God wants to outlast him? Who's afraid of whom?

The countless Radiation Beasts of the wilderness are just his Experience Packs!

Speaking of the wilderness Radiation Beasts, there are just so many, it seems they can never be exterminated.

The main thing about these creatures is that they can eat almost anything, even stone, and survive.

Just like the previous Radiation Giant Scorpion, not only does it eat minerals, but it also grows stronger, who do you reason with?

With these endless Radiation Beasts, Su Yu can execute such a plan.

The Brutal Evil God noticed the anomaly as Su Yu suddenly leveled up and refreshed his state.

Its thousand eyes widened simultaneously:

"Human, what is going on with you? Recovering strength out of nowhere?"

"You didn't open the Subspace Gate, where did the energy come from?"

"Who are you really..."

Even with the Brutal Evil God's knowledge, it was taken aback, unable to comprehend what was happening with Su Yu.

Clearly, Su Yu's level is very low, unable to even open subspace, yet using all kinds of methods to suppress a grand Evil God like it until now.

Su Yu naturally did not answer its questions, but instead asked back: "You can recover, why can't I?"

The Brutal Evil God, upon hearing this, flashed a furious light in its hundreds of eyes:

"Human, you dare to compare with me! It's blasphemy!"

"You must wash away your sins with life!"

It was unbelievably furious, cursing Su Yu maniacally.

But at the same time, in the hundreds of its other eyes squinted, seemingly having thought of something:

"I am growing more and more interested in your secrets!"

"Could it be that you too are a high-ranking existence born from subspace? Otherwise, your uniqueness can't be explained."

"Having such a complete human body, without any corrosion... I really want to kill you quickly to torture your soul and study your secrets..."

The Brutal Evil God's wild imagination led it to actually guess that Su Yu was a subspace Evil God in human disguise...

Listening to these words, Su Yu felt speechless; himself an Evil God?

He was too lazy to respond to the Brutal Evil God's queries, focusing on the battle.

This battle lasted a whole three days!

During these three days, Su Yu neither ate nor drank, didn't sleep, fighting relentlessly; each time his state decreased, the Data Mechanic leveled up quickly to refresh his state, keeping his strength at its peak.

The physical enhancements from leveling up even suppressed normal physical needs like eating, drinking, and sleeping.

Of course, it's impossible to indefinitely sustain this, as he is still flesh and blood, unable to continually fight without eating, drinking, or sleeping.

However, he could probably continue for ten days or half a month without problem.

In addition, as he kept leveling up, his strength was slowly increasing, getting closer and closer to seven-star level.

With his increasing power, Su Yu was no longer content with chopping legs and mending feet.

Instead, he tried to intensify his efforts, attempting to completely dismember the Brutal's entire body.

But Su Yu quickly discovered that as he intensified his efforts, the Brutal's regeneration speed also increased.

It seemed that Su Yu's attempt to dismember the opponent matched the so-called "Brutality," allowing the Brutal Evil God to gain more power and regenerate faster.

"Hahaha! Be brutal! Slaughter!"

"As long as there's brutality in the world, I am undying and unextinguishable!"

"Thinking you can defeat me through battle is only a delusion..."

The Brutal Evil God laughed maniacally, while Su Yu felt quite speechless.

The Brutal Evil God's trait was simply unreasonable.

As long as you fight it, it fits the definition of "Brutality," thus providing it with power.

At this rate, it would be endless, rendering it impossible to ever defeat such an opponent.

Su Yu felt it was a tough nut to crack; this Evil God was truly undying and unextinguishable, and above it was an even stronger Sovereign of Greed.

He wondered how Zhang Chenfeng dealt with these monsters back in the day? Sealing them?

But Su Yu didn't know any sealing methods at all and had no way to handle this Brutal Evil God.

"At this point, I can only quickly level up my Data Mechanic to max level and see if it unlocks a third-tier profession..."

Su Yu thought to himself.

And so, after another three days, finally...

His Data Mechanic reached max level!

Chapter 294: Unlocking, Tier 3 Profession! Promotion Ceremony?!

[You have gained 10000 professional experience (Data Mechanic Lv Max!)]

[Data Synchronization has been enhanced...]

As the panel prompt appeared, Su Yu felt a tremor throughout his whole body. His body, spirit, and spiritual energy were strengthened once again as the Data Mechanic reached its maximum level.

At this point, Su Yu had maxed out the Legion Mechanic, Military Mechanic, Mechanical Wanderer, and Data Mechanic, all four second-tier professions.

Needless to say of the first-tier professions.

With so many professions stacked together, despite being at six-star, his strength was utterly astonishing. That's why he could suppress the Brutal Evil God for so long with his six-star power.

It's estimated that even a millennium ago, when the empire ruled the entire galaxy, it would be hard to find such a freak like him.

Su Yu felt at this moment that his strength had reached a limit and could not increase any further.

To become stronger, he must open the Subspace Gate and breakthrough to seven-star.

To be honest, Su Yu was very puzzled as to why he hadn't broken through to seven-star despite being so strong.

At this time, the profession panel prompts continued to refresh.

[Based on your maxed-out core ability (Data Synchronization), you have gained Core Specialization (Spirit of Data)]

[Core Specialization: Spirit of Data]

[Description: Data Mechanics have delved so deeply into the world of data that it is rumored they have touched the realm of gods in the data world. They can enlighten data, allowing lifeless artificial intelligence to gain true wisdom and life.]

[You can enlighten the artificial intelligence you create and transform it into a real data life, which can be bound to you. (Enlightenable quantity: 1)]

At the same time, new professions have already been unlocked!

[Available Career Path: Third-tier Profession · War Mechanic]

[Legion Mechanic (Main) + Military Mechanic + Data Mechanic + Mechanical Wanderer + Steel Meditation Lv Max... = War Mechanic]

[Introduction: Legion, Data, Wanderer... These professions, while powerful, are just part of war. War Mechanic is the true master of the battlefield, commanding the entire strategy. It's the path of advancement for Legion Mechanics and can decide the outcome of a grand war.]

[Promotion Ceremony: Initiate and lead a war involving more than 300,000 people and achieve final victory (Incomplete)]

...

[Available Career Path: Third-tier Profession · Ghost Hidden Blade]

[Mechanical Wanderer (Main) + Legion Mechanic + Military Mechanic + Data Mechanic + Mechanical Meditation Method Lv Max... = Ghost Hidden Blade]

[Introduction: A special creation from the time of the Human Empire, this unique soldier type is the only successful product of the Empire's research on ghost energy. Based on the Mechanical Wanderer, it utilizes the strong will refined through the Mechanical Meditation Method to wield the ferocious and eerie ghost energy, gaining formidable personal combat strength and strong resistance to ghost energy. The Ghost Empire, which inherited ghost energy technology, also developed this type of soldier.]

[Promotion Ceremony: Survive over thirty days under the erosion of high-level ghost energy. Face a Subspace Evil God and attempt to defeat a subspace lesser evil god, or defeat a part of a real evil god's consciousness (Incomplete)]

...

"Promotion Ceremony?"

Su Yu looked at the information on the profession panel, feeling surprised and suddenly understanding.

No wonder, despite being so powerful, he still couldn't break through to seven-star.

It turns out the third-tier professions require a ceremony for employment.

And third-tier is equivalent to seven-star.

First-tier is basically from one-star to three-star, second-tier is four-star to six-star.

Third-tier is probably from seven-star to nine-star.

Only by becoming a third-tier profession can one breakthrough to seven-star. Without completing the ceremony, you can't break this rule no matter what.

It seems that seven-star and six-star are qualitatively different and can't be broken through by simply accumulating strength.

Previously, the Ghost Soul High Priest transformed the entire tribe of 100,000 people into Ghost Demons, presumably for the ceremony's requirement.

Su Yu looked at this information, pondering deeply, understanding many doubts while frowning.

They even need to hold a promotion ceremony, which is somewhat troublesome.

He thought he could still, like before, immediately complete the job transition and start a massacre.

Su Yu quickly began to consider which ceremony could be completed quickly?

He first ruled out the War Mechanic's ceremony, as its requirements were too difficult and clearly infeasible.

Where could he find 300,000 people to fight with him now?

The other one, the Ghost Hidden Blade, while also having absurdly difficult requirements... but...

"Isn't it convenient? The Ghost Hidden Blade's ceremony seems... already half-completed."

Su Yu's expression was somewhat strange.

The requirements for the Ghost Hidden Blade ceremony, the high-level ghost energy, Subspace Evil God...

Isn't Brutal just that?

Su Yu had been fighting with Brutal for so long, which in essence means he had already completed half of the ceremony?

Only, the ceremony requires lasting thirty days and defeating the evil god, but now the time is still far from enough.

"It seems this is destined to be a prolonged battle..."

Su Yu thought silently.

Originally, he was planning to hold on for ten days or so, unlock the third-tier profession, immediately transition, breakthrough to seven-star, exponentially increase his strength, and deal a reverse blow to kill the Brutal Evil God.

Now it seems, it can't end early, it must drag for thirty days.

In such a case, it becomes difficult.

His armor's power supply wouldn't last for a month.

His body couldn't endure a month without food and water either.

Chapter 295: Unlocking, Tier 3 Profession! Promotion Ceremony?!_2

Just as Su Yu was pondering, he suddenly heard the roar of engines.

He looked in the direction of the sound and discovered a convoy was rushing towards him at full speed, then all vehicles abruptly braked to a stop in the distance.

It turned out that the people of Mechanical City were worried about Su Yu, so they dispatched some combat personnel, along with the newly produced rangers and various weapons and ammunition, to support him.

Their vehicles also stored some Flame of Truth—be careful, keep a distance, there's no need to fear the corrosion of the Brutal Evil God.

Seeing this, Su Yu smiled slightly. Now, holding out for a month would not be a problem.

He was not fighting alone.

"Administrator! Are you alright?"

From a distance came a shout—it was Huang Ying's loud voice.

They did not dare to approach for a closer look, so they could only shout.

Su Yu's thought process shifted, and he connected to the loudspeakers on their vehicles with his Spiritual Energy as a Data Mechanic, saying: "I'm fine."

"Do not come near, stay in the vehicles."

Su Yu gave a few instructions and then immediately linked up with the rangers, directing them to move closer to him.

The Brutal Evil God naturally noticed this but laughed maniacally:

"Hahaha, humans, your reinforcement has arrived!"

"But this is also my reinforcement!"

"You will ultimately fail!"

The Brutal Evil God's words carried deep meanings, and Su Yu naturally understood what He meant.

Once the ranger squad joined the battle, Su Yu's combat power would significantly increase, but at the same time, more brutal wills would enhance the power of brutality.

Therefore, Su Yu's support was also brutality's support!

Upon hearing this, Su Yu remained unconcerned.

Support for brutality is support, otherwise, if this guy dies too soon, where would he find another Subspace Evil God to complete his ritual?

Soon, the ranger squad had arrived, and the over one thousand chips previously sent back were all produced into new rangers.

Moreover, they were fortified by brutal divine power, their strength greatly increased, at this moment they were fully equipped and unstoppable!

When approaching Su Yu, they immediately received various skill amplifications from him, their power surged once again.

Their normal state strength was almost the same as when they launched the Electromagnetic Fury and overloaded for self-destruction.

Bang!

This powerful ranger squad arrived and under Su Yu's command, launched a frenzied barrage at Brutality!

Brutality, already damaged by Su Yu for several days and with incomplete limbs, could not evade these attacks, nor was He interested in doing so.

This barrage, a storm of bullets, completely submerged Brutality's massive body and blasted it into chunks!

"..."

"Could it be dead?"

Su Yu blinked, even a bit worried.

Could the Brutal Evil God have been bluffing earlier, and was now killed outright?

That would be a problem!

...

In the distance...

All the people from Mechanical City kept their heads down, huddled within the protection of the Flame of Truth.

Only a few bold ones, including the intrepid Huang Ying, were observing the battlefield with binoculars between Su Yu and the Brutal Evil God!

"How's it looking?"

Others asked.

"The Administrator controlled the ranger squad, a single barrage, and blasted that evil god to pieces, scattered all over, can't even be reassembled..."

Huang Ying exclaimed loudly through her binoculars.

Upon hearing this, the others rolled their eyes; could Huang Ying's words be any less credible? What nonsense.

"Sister Ying, don't talk nonsense."

Feng Tian tugged Huang Ying and then lifted his binoculars too, his expression soon turned as lively: "That evil god, seems to have been blasted apart by the Administrator too..."

"What? Really? Let me see!"

"Me too..."

The group was initially apprehensive, but now they were extremely curious and concerned.

Unable to resist any longer, they raised their binoculars, and moments later, their mouths fell agape.

That evil god was indeed scattered on the ground...could it really have been killed by the Administrator?

A true god-slaying?

...

Fortunately, things did not develop as everyone imagined.

Though Brutality was blasted into bits and spread across the ground, It still remained alive.

After a while, the pile of meat on the ground began to wriggle and regenerate, meanwhile, the deep voice of the Brutal Evil God echoed:

"Human, you have angered Me..."

The voice of Brutality carried a deep chill.

Su Yu, however, breathed a sigh of relief, fortunately, Brutality was alright...

Then Su Yu felt something was off, why was he worrying about this thing?

But this guy really wasn't bluffing, truly undying?

Brutality seemed heavily injured by this volley, since the recovery process was slow, and the form had not yet been fully reconstituted.

Apparently, the "support" given by the ranger squad, these Mechanical Creations, was not as significant as imagined.

Seeing this, Su Yu commanded the rangers to continue suppressing Her with firepower, then he moved to the battlefield's edge, taking some food and water from a ranger.

This food and water was previously taken by him from those vehicles with the ranger squad.

Then Su Yu opened his visor, sat on one of the rangers, and leisurely watched the remnant body of Brutality while resting and eating.

Since it was going to be a prolonged battle, he couldn't go without food or drink.

His level was already maxed now, unable to recover state through upgrades, so eating and drinking were necessary.

Seeing Su Yu so relaxed naturally made Brutality even more furious, but the enhanced ranger squad kept Her firmly suppressed, able only to rage impotently.

Finding no issues, after eating and resting, Su Yu even distanced himself from the battlefield slightly, using the rangers as cover, to take care of his physiological needs.

However, he dared not stray too far, otherwise, without Brutality's Ghost Energy, the ritual might fail.

A moment later, Su Yu returned to the battlefield, feeling refreshed, couldn't help but smile: "Haha, this is perfect!"

Then he closed his helmet again, swung the Chain Saw Blade, hacking the dozen newly regenerated legs of Brutality into chunks!

...

In the distance, all the people from Mechanical City witnessed Su Yu's every move.

They were at a loss regarding the appropriate reaction.

For days, they had been on edge in the city, afraid that Su Yu would lose to the evil god.

Yet, Su Yu was this leisurely? Finding time to eat, drink, and even use the bathroom amidst the battle?

How ludicrous could this be?

"This evil god...doesn't seem to be much, does it?"

Such an absurd thought naturally arose in everyone's mind.

They knew well that this evil god was terrifying in the extreme, unable to even look directly, how could it be "not much"?

But, Su Yu's ease gave them the false impression that the evil god wasn't all that much.

...

In the next twenty days, Su Yu continued to alternate with the ranger squad, steadily suppressing Brutality.

Su Yu occasionally retreated from the battlefield, to eat, rest, and even take short naps, simultaneously recharging his battle armor.

The people of Mechanical City played a logistical role, delivering ammunition, weapons, food, water, and energy to Su Yu.

Occasionally, when Brutality destroyed a ranger, it would be sent back to Mechanical City for repairs.

Su Yu and the people of Mechanical City coordinated perfectly.

Even Brutality cooperated impeccably, being consistently suppressed, unable to raise a single wave over those twenty days.

The ritual, nearing completion, seemed unbelievably smooth, so smooth...that it was suspicious!

Finally, on the twenty-seventh day.

Brutality suddenly shifted from the previous weakness, withstanding the rangers' heavy bombardment, instantly recovering from all injuries, a hundred-meter divine body, Thousand-Handed Thousand-Eyed, stood once again on the battlefield, looking down upon Su Yu.

"Human, do you think you have won?"

"Do you think I am unaware of your intent to procrastinate?"

"Procrastination is exactly what I desired, I have accumulated sufficient power!"

"Die!"

Boom!

An unprecedented explosion of Ghost Energy erupted, engulfing both Su Yu and the ranger squad entirely!

Brutality's previous frailty and slow recovery were merely a façade. She had feigned weakness to accumulate power secretly, finally unleashing it!

And Su Yu's ritual still needed three more days!

This evil god was far more cunning than She appeared!
