

Infinite 296

Chapter 296: Inauguration, Ghost Hidden Blade! 7-Star Transcendent!

Boom! Boom! Boom! Boom! Boom!

The terrifying ghost energy, continuously exploding, each explosion capable of enveloping the entire battlefield.

In terms of power and range, it's no less than the shot Su Yu used to kill the High Priest before, like a nuclear explosion!

Moreover, it was launched continuously in a short period!

This is the true strength of the Brutal Evil God, named "Brutal," best at destroying everything with brutally immense power.

Previously, his energy accumulation was insufficient, so he deliberately held back, slowing down recovery speed, and then gathering the saved energy.

Now, after days of restraint, he finally reveals the power that belongs to an Evil God.

It's surprising that an Evil God was willing to let Su Yu suppress him for so many days, just for this outbreak.

The brutish restraint proved to be very effective, accumulating a wildly fierce energy.

Su Yu and the cavalry brigade had no time to dodge under such an attack.

Su Yu himself ran fast, although he didn't completely run out of the attack range, he dodged the explosion's center at the critical moment.

However, he was still injured by the violent ghost energy, a sweetness in his throat, almost spitting out blood!

It was the first time he got injured since the battle began!

If he hadn't dodged the explosion's center, who knows what would have happened.

The cavalry, however, were not so lucky, instantly all destroyed, unsure if their chips survived.

"Humans, I am a true Subspace God, having witnessed the destruction of the Human Empire! Do you think I can't see through your thoughts?"

"You are intentionally stalling for time, using our battle to conduct an ascension ritual!"

"Haha! How could I let you succeed? Now I have accumulated enough Brutal Ghost Energy, die! In the name of brutality, destroy everything..."

"I allow you to escape, but once you flee, the ritual is bound to fail, and you'll never have another chance for success! Because I will immediately slaughter all humans, gaining unlimited power!"

"Run away, wail in despair!"

The Brutal Evil God laughed crazily, simultaneously launching a deadly attack on Su Yu with ghost energy explosions and the Voice of Brutal.

It turns out, he had already seen through Su Yu's intentions, using them against him, first pretending to be weak and accumulating power, then attacking in the final moment, instantly injuring Su Yu.

If such attacks continued for three days, could Su Yu survive?

If Su Yu fled, with his mobility, Brutal wouldn't catch up with him for the time being, but then the ritual would fail.

And Brutal would then go on to massacre humans, rapidly growing stronger. Su Yu could escape for a while, but not forever, eventually still facing certain death.

So, there can be no escape!

"Indeed, one must not underestimate a true Evil God..."

"The ritual is not that simple either."

Su Yu swallowed the blood in his throat, struggling to dodge while looking at the giant with Thousand Hands and Thousand Eyes, with a solemn expression, then suddenly smiled, eyes resolute as ever.

Since escape isn't an option, face it then!

The real battle is just beginning now!

Su Yu's spiritual energy fluctuated, sending a piece of data information to the distance.

A while later, another cavalry brigade approached the battlefield!

This cavalry brigade was indeed more numerous and stronger than the ones just shattered by Brutal!

Brutal caught him off guard, but Su Yu was not unprepared.

In these over twenty days, the production lines in Mechanical City never stopped, and a hundred cavalry were produced every day.

With over twenty days passed, the cavalry under Su Yu's command had surpassed three thousand!

However, Su Yu never let all the cavalry enter the field at once, but allowed them to appear alternately, with only about one thousand each time.

When one thousand were destroyed or ran out of ammunition, they would be sent back to the Mechanical City, and replaced with another thousand to continue the battle.

Over the twenty plus days, these three thousand cavalry were all tainted with Brutal's power, significantly strengthened, tremendously powerful.

Now, they were finally put to use.

"Bring it on!"

Su Yu shouted loudly, unleashing all abilities, wildly amplifying the newly arrived cavalry, even the weakest reaching four-star top level!

Immediately, gunfire and explosions resounded!

As if cheering for this great battle, dark clouds gathered in the sky, with thunder roaring.

In the distance, the people of Mechanical City were alarmed by the huge ghost energy explosion sounds at this moment.

Realizing something was wrong, they immediately raised their binoculars to observe the battlefield.

Yet, they discovered the situation had reversed, and the Evil God, which had been suppressed for over twenty days, suddenly made a move.

That terrifying might, even from dozens of kilometers away, made them feel suffocated.

"So, this is the true power of an Evil God!"

"Administrator, my lord..."

Everyone grew deeply worried for Su Yu again.

...

Three days later, at the original site of the Ghost Tribe.

At this moment, the terrain here had drastically changed.

The previous flatland had now turned into a large lake.

The high-intensity battles and explosions over several days had blasted this place into a huge crater.

Three days ago, torrential rain fell from the sky and had continued until now, and the rainwater accumulated in the big pit formed such a large lake.

The water in the lake was deep green near black, as a large amount of high-level ghost energy dissolved in the lake water, completely changing its nature.

At this moment, without six-star strength, one simply cannot get within ten kilometers of this great lake, or be corroded to death by the extremely intense ghost energy radiation.

The battle between Su Yu and Brutal was actually able to create such a Ghost Energy Lake, such power truly shocked everyone from the distant Mechanical City.

Chapter 297: Inauguration, Ghost Hidden Blade! 7-Star Transcendent!_2

Not just the Mechanical City.

This battle, which lasted a month, has already drawn the attention of many others.

In the shadows, those who were drawn to it were also filled with trepidation.

Everyone watched from afar, waiting for the battle's outcome, not daring to get closer.

Mainly because there was no way to get close, the Ghost Energy Radiation near the lake was too outrageous, approaching it would be death.

At this moment, under the heavy rain, at the center of the large lake, on an island composed of broken limbs and metal parts, Su Yu and the Brutal Evil God's battle continued.

Su Yu's current appearance was quite tragic, the Azure Oath Battle Armor on him was tattered.

The damaged areas occasionally sparkled with electric sparks, seeming on the verge of scrapping at any moment.

He himself, inside the battle armor, was covered in scars and blood.

Normally, with his physique, such injuries would quickly heal.

It seemed he had exhausted himself to the point where he had no energy left to heal his wounds.

The Chain Saw Blade that was originally in his hand had already broken, and now he was fighting the Brutal Evil God bare-handed.

As for his cavalry corps, they had all launched an electromagnetic fury attack against the Brutal Evil God and detonated themselves half a day ago, leaving none behind now.

At this moment, Su Yu seemed to be at his wit's end.

However, as Su Yu's opponent, the Brutal Evil God's condition wasn't much better.

The thousand arms on its body were all gone, and more than half of its thousand eyes were blind.

Over two thousand cavalymen overloading in electromagnetic fury, each with at least four-star top-level strength, had all self-destructed, nearly blowing it to dust, and it hadn't recovered since.

It seemed it too had expended much of its power, lacking the strength even to restore its body.

In order to maintain high-intensity attacks, its strength was depleted quickly, and after three days of frenzied battle, the accumulated Ghost Energy was almost gone.

Yet the Brutal Evil God still laughed maniacally:

"Human! You're out of power!"

Su Yu looked at the Brutal Evil God's state and laughed as well: "Aren't you too?"

But soon, Su Yu couldn't laugh anymore.

Because...

Snap!

Sparks suddenly flew from the battle armor he wore, and then all the indicators on the armor went dark in an instant.

It couldn't even maintain its shape, falling off from Su Yu's body.

The Azure Oath was finally completely broken.

Su Yu fell silent.

A significant part of his close combat strength depended on this battle armor.

Now that the armor was scrapped, his situation became dangerous.

The Brutal Evil God immediately burst into thunderous laughter.

All of its remaining eyes flashed a ghastly green, focusing on Su Yu's chest.

Snap!

A Ghost Energy Beam struck hard at Su Yu's now defenseless chest, and then...

Nothing happened at all.

Even the Brutal Evil God fell silent...

At this point, it had weakened to such a degree that a full-strength strike couldn't even break through Su Yu's defenses.

Under the influence of the Fighter's core ability, Adaptability, Su Yu had already developed a strong resistance to Ghost Energy.

"Hahaha!"

Su Yu was taken aback, and after a moment, he laughed loudly.

The Brutal Evil God, hearing Su Yu's laughter, was furious beyond measure.

For its first descent to the world in millennia, it was forced to this extent by a six-star human.

Emotions of sheer brutality flickered continuously in its eyes, and a dangerous idea emerged.

"Human, I admit, you are excellent!"

"Therefore, I shall reward you, reward you by making you the vessel for my will!"

"Accept this honor, in the name of Brutality!"

The Brutal Evil God roared, and then its massive body collapsed with a bang, from which emerged a thick black fog.

This fog moved incredibly swiftly, surging towards Su Yu as soon as it appeared, enveloping him in an instant, and began boring into his head from atop him.

It intended to seize Su Yu's body!

The High Priest's methods would surely be known to it!

In truth, the Brutal Evil God was very curious about Su Yu and had long had the idea of seizing his body.

However, Su Yu was not of the Ghost Soul Clan, had no trace of Ghost Energy in his body, and previously had the protection of his battle armor, so the Brutal Evil God hadn't acted.

But now, the Brutal Evil God saw its opportunity!

After fighting the Brutal Evil God for so long, Su Yu's body had been thoroughly permeated by the powerful Ghost Energy Radiation, nearly matching that of the previous High Priest.

If not for Su Yu's formidable strength and steadfast spirit, he would have long been corroded into a Ghost Demon.

In this state, Su Yu had met the minimal requirements for the Brutal Evil God to seize his body.

Coupled with his depleted strength and the scrapping of his battle armor, with no protection for his body, it was a perfect opportunity.

Thus, the Brutal Evil God acted without hesitation!

At this moment, enveloped by the thick black fog, Su Yu's eyes were filled with hallucinations.

His entire consciousness was about to be consumed by the fog, containing extremely pure Ghost Energy.

In just a moment, Su Yu, as a human, would perish, and the Brutal Evil God would descend through his body!

However, faced with such a crisis, Su Yu still laughed:

"Actually, an hour ago, the time for the ritual had already ended!"

"Ascension! Ghost Hidden Blade!"

[Congratulations, Host, on successfully ascending, your current profession is: Ghost Hidden Blade (lv1: 0/100000).]

[Congratulations, Host, for successfully awakening the core ability: High-level Ghost Energy Control, granting Ghost Energy control comparable to a Subspace Evil God.]

[High-level Ghost Energy Control: (lv1), as a third-order transcendent profession specializing in Ghost Energy, the Ghost Hidden Blade has, through countless adaptations, battles, and research, achieved control of Ghost Energy comparable to a Subspace Lesser Evil God! Ghost Energy won't harm them, instead, it becomes their source of power!]

With the prompts from the Profession Panel, Su Yu's battered body suddenly trembled.

A portal, suspended between the ethereal and reality, manifested within his body!

As soon as it appeared, the portal swung open, connecting to an enigmatic space filled with boundless power, knowledge, and mysteries.

From this portal, vast amounts of pure High-level Ghost Energy flowed into Su Yu's body.

This Ghost Energy, initially bizarre and frenetic, would immediately corrode ordinary individuals into Ghost Demons upon contact.

But upon entering Su Yu's body, it instantly became docile, seemingly having no corrosive properties, offering only benefits, no drawbacks!

With the aid of this enormous Ghost Energy, Su Yu's injuries healed instantaneously.

Simultaneously, his bodily strength increased ceaselessly.

One fold, two folds, three folds...

Far surpassing the six-star tier, ascending into the Seven-star Transcendent realm!

Su Yu had opened the Subspace Gate! Becoming a Seven-star Transcendent!

Outside his body, the fog, which the Brutal Evil God had transformed into, was momentarily stunned! Then it let out an enraged roar:

"Human, you actually..."

Before the Brutal Evil God could finish roaring, Su Yu extended his hand, reaching into the fog, and activated the newly acquired ability: High-level Ghost Energy Control!

This fog, essentially a mass of High-level Ghost Energy, was precisely countered by Su Yu's ability!

In an instant, the fog was crazily compressed in Su Yu's hand.

In the blink of an eye, it shrank from a two-meter-wide mass to the size of a football, and then to the size of an apple...

"Haha, after waiting for an hour, I've finally caught you!"

"Don't be mad, Brutality, I learned this trick of feigning weakness from you..."

Gazing at the black sphere in his hand, Su Yu was overjoyed!

He had actually captured the Evil God!

An hour ago...

While Su Yu was battling Brutality, the Profession Panel suddenly displayed a hint that the thirty-day limit had expired, the ritual completed, and he could ascend to Ghost Hidden Blade!

One requirement of the ritual was to defeat the Subspace Evil God.

During those thirty days, Su Yu had blasted the Brutal Evil God countless times, fulfilling this requirement long ago.

Thus, as soon as thirty days elapsed, he could ascend to Ghost Hidden Blade, and with his formidable strength, definitely defeat the Brutal Evil God!

However, Su Yu withheld, not completing the ascension immediately, as it would cause too drastic a change, arousing Brutality's vigilance.

Su Yu felt that this Brutal Evil God probably still had some trump card, so he wanted to observe.

Consequently, he indeed forced out its trump card!

The black fog that Brutality transformed into just now was so fast that even Su Yu couldn't react, who knows how many times the speed of sound it was.

If not for Su Yu feigning weakness to lure the fog onto him, he really couldn't have caught it. Letting it escape would have indeed been problematic!

But now, with everything settled, Su Yu finally won this battle, sealing a Subspace Evil God's thought within his grasp!

Chapter 298: New Plan, Brutal Battle Armor!

Su Yu looked at the black sphere in his hand, sensed it, and discovered that the power contained within it wasn't actually strong, only at the six-star level.

It was just incredibly fast and had powerful spiritual erosion capabilities.

This must be Brutality's trump card, used to escape at the last critical moment, not to be used until the very end.

No wonder Brutality had persisted fighting Su Yu for a month without considering using this method to exit the battle.

If Brutality left directly in black mist form, the mist's strength would be insufficient. If it encountered other powerful Transcendents, they might capture it, which would be troublesome.

However, capturing this black mist would require at least a seven-star strength, so it's not easy to encounter, and the chances are actually low.

Brutality kept fighting with Su Yu until now, probably because he got emotional.

He, a dignified Evil God, wielding the Origin of Brutal, had just descended to the world, only to be suppressed by a mere six-star mortal for a month.

If he were forced to flee, would the Evil God still have any pride left?

So he held this ability back, planning to ambush Su Yu in the end, to seize his body and achieve a total victory.

But things turned against him, and now Su Yu held him in his palm, leaving him without any arrogance.

The black sphere compressed from Brutality was eerily silent now. It's unsure if an Evil God could feel embarrassment too.

Su Yu said nothing, just looked up at the sky, letting the rain pour over him, enjoying the joy of victory.

This battle had lasted a full month.

No matter how formidable Su Yu was, by the end, he was utterly exhausted, relying on his strong spirit to sustain himself.

Now, as he relaxed, it felt as if, across two lifetimes, he had never felt this exhilarated in all those decades.

He stood for a moment, bent down, and removed a white metal sphere from the ruined Azure Oath, which was Nuonuo.

It wasn't damaged, just out of energy and temporarily dormant.

At this moment, the Brutality sphere in Su Yu's hand suddenly spoke:

"Human, what exactly are you?"

"Why could you complete the seven-star promotion in an instant!"

"Even if the promotion ritual is completed, it should at least require some time for adaptation and preparation to truly succeed and break through seven stars!"

There was some unwillingness in Brutality's tone.

Originally, he suspected Su Yu's ritual had been completed.

But even if the ritual was done, the true promotion would take time, such violent changes couldn't deceive him at all.

By the time the promotion was completed, he would've already seized the body successfully.

So he confidently deployed his final means to take Su Yu's body.

But even as an Evil God, he couldn't have predicted that Su Yu had a Profession Panel, instantly completing the promotion and breaking through seven stars.

Su Yu's method was simply unreasonable, and thus Brutality was caught in a trap...

Brutality, as an Evil God, possessed all sorts of unreasonable abilities.

But encountering an even more unreasonable Su Yu, getting trapped wasn't unjustified...

Upon hearing this, Su Yu just chuckled and casually said, "Heh, aren't you an Evil God? Guess it yourself..."

Of course, he couldn't possibly reveal the secret of the Profession Panel to Brutality.

Upon hearing Su Yu's words, Brutality actually laughed crazily: "Hahaha!"

"I guessed it long ago! You must be like me, a high-level being from Subspace occupying a human body!"

"Whose offspring are you? How can you disguise so perfectly? What's your scheme!"

"Capturing me is useless, I am merely a thought, I am a deity, undying and indestructible!"

"Reveal your secret to me, perhaps we can cooperate..."

Brutality rambled on ceaselessly, seemingly convinced that Su Yu was a Subspace Evil God in human disguise.

Su Yu rolled his eyes dramatically, thinking that in both of his lifetimes, he had been a thoroughly upright human, how could he become an Evil God?

Don't make baseless accusations.

Regarding Brutality's invitation to cooperate, Su Yu naturally ignored it.

However, if collaboration is not feasible, then utilization is.

Brutality said he was undying and indestructible, which was true.

When Su Yu captured Brutality, he was constantly using his High-level Ghost Energy Control capability to attempt to kill him completely.

But up until now, the guy was still very much alive.

If he couldn't kill him, couldn't cooperate, and couldn't do nothing, then utilization was the only option.

This Brutal Evil God is so formidable that just being tainted by His aura can greatly enhance the power of the mechanical army.

Now that Su Yu captured Him alive, if used well, who knows how many benefits could be obtained.

Just as Su Yu's Azure Oath Battle Armor was scrapped, there was an opportunity to figure out a way to use this Brutal Evil God to create a set of Brutal Battle Armor.

Who knows how powerful it will become...

When he thought of this, Su Yu couldn't help but sigh; he had already progressed from merely exploiting the Evil God's aura to practically holding the Evil God for ransom...

And over at Brutality's side, he continued to ramble on, inviting Su Yu to cooperate.

At this moment, Su Yu suddenly sensed something wrong.

Brutality's body now lacked any spiritual consciousness and had essentially become a corpse.

But under Brutality's rambling, it seemed that something was changing inside that massive corpse!

Bang!

Su Yu set down Nuonuo, and with a sudden push of his legs against the ground, his form vanished in an instant, already surpassing the speed of sound.

Now, Su Yu was a true Seven-star Transcendent, a close-combat profession specializing in physical prowess, capable of surpassing the speed of sound without relying on battle armor!

In the next instant, Su Yu appeared beside that Evil God's corpse, just as the corpse opened its dozens of eyes.

In those dozens of eyes now, there was no longer any thought or reason, only endless destructive brutality!

In the next moment, the dozens of remaining arms on the corpse simultaneously reached for Su Yu, seeking to restrain his movements.

Chapter 299: The New Plan, Brutal Battle Armor!_2

Meanwhile, the massive ghost energy contained within the corpse surged wildly.

Su Yu's pupils contracted as he sensed danger.

Relying on the powerful detection of the Ghost Hidden Blade for ghost energy, he immediately realized that this was another of Brutality's trump cards.

Activating all the brutal ghost energy within the corpse from the shadows, triggering a self-destruction, total obliteration!

Since he couldn't seize Su Yu's body, then destroy it!

The Brutal Evil God, with such a huge body, even though it had almost exhausted its energy, the ghost energy contained in its flesh was still astonishingly impressive.

If the self-destruction succeeded, the power would definitely far exceed all previous attacks!

Even if Su Yu has now broken through to the seven stars, without the protection of battle armor, there would still be a danger of death!

This Evil God's methods are truly endless; if you're not careful, you might fall into its trap.

But facing this impending terrifying self-destruction, Su Yu was not frightened but rather delighted!

"So, there's so much brutal ghost energy inside this corpse!"

He suddenly stretched out his hand, and with a punch, struck the enormous corpse.

With this punch, the incredibly powerful physical body power made the hundred-meter-tall corpse tremble violently.

After the punch, his fist, like a nail, deeply embedded into the Evil God's corpse.

Then he activated the high-level ghost energy control ability!

Inside the corpse, those brutal ghost energies on the verge of exploding were instantly calmed under Su Yu's power.

Then, under Su Yu's control, the massive ghost energy slowly condensed into a mass.

Finally, Su Yu pulled out his arm, holding a several-meter-long black rib.

This rib contained extremely concentrated high-level brutal ghost energy, emanating a chilling aura.

With the extraction of this rib, the massive corpse suddenly disintegrated and, moments later, turned into dust and smoke.

Su Yu looked at the rib in his hand with satisfaction, nodded: "Now, I have part of the materials needed to create battle armor!"

Just now, Su Yu extracted all the ghost energy from the corpse and condensed it into a rib.

This rib is the Evil God's Bone, incredibly hard, and rich in brutal ghost energy, perfect for making battle armor!

Now that Su Yu has reached seven stars, the Azure Oath level of battle armor, even if not scrapped, does not help him much.

But if the Brutal Battle Armor is successfully made, his strength will surely skyrocket again!

Seeing Su Yu once again neutralize his tactics, Brutality stayed silent for a moment before finally speaking: "Human, you won!"

He actually conceded.

But a moment later, he spoke again.

"However, this is merely an avatar of my consciousness. My true body still resides deep within the subspace!"

"Wait, wait for the moment you face my true form; that will be your death!"

With that, this avatar of the Brutal Evil God fell silent.

Su Yu was startled, thinking he had self-destructed.

Though unkillable, maybe he could self-destruct?

But after probing with the ghost energy control ability, he found that he had not died.

Perhaps, to him, even self-annihilation wasn't an option.

Brutality simply refused to communicate now, in simple terms, was driven into solitude by Su Yu.

Seeing that Brutality was unharmed, Su Yu felt at ease, pondering: "So it was just an avatar..."

Su Yu wasn't too surprised; after all, a dignified Evil God couldn't possibly have just that bit of power, sealed by his newly advanced seven-star Transcendent.

Even if he were stronger than the average seven stars, it wasn't enough.

But if it was just an avatar, it made sense.

"An avatar this powerful! No wonder it was considered a great enemy by Zhang Chenfeng, an Apostle Mechanic."

"I truly wonder how strong his true form must be..."

The more Su Yu thought about it, the more terrifying it seemed.

After all, right now, he's made a mortal enemy of Brutality.

Sealing the avatar's spirit, skinning and dismantling the body, even planning to use his bones for battle armor.

If one day, Brutality's true form descends, it might immediately aim to kill Su Yu...

Luckily, Brutality's true body is still sealed, the seal relinquished by Zhang Chenfeng should be unimaginably strong.

This avatar was probably the strongest force the Brutal Evil God could manifest.

For the moment, Su Yu didn't need to overly worry about this formidable enemy.

Understanding this, Su Yu smiled slightly, plunging the brutal rib into the lake water beneath his feet.

Immediately, the lake waters churned, with the ghost energy dissolved in the water being madly absorbed like a whale sucking up water.

A short while later, the entire great lake had returned to clarity.

The black hue on the rib deepened further.

Su Yu didn't stop there, continuing to activate his ability, also absorbing the scattered ghost energy in the air, all merging into the rib.

After an hour, this ghost energy-corroded battlefield had been purified by Su Yu!

The third-tier Ghost Hidden Blade, in terms of purifying ghost energy radiation, was even stronger than the Flame of Truth.

However, this purification was essentially control and absorption, so it didn't deplete but instead replenished.

Such high-level ghost energy was also a precious resource for Su Yu.

Although he had unlocked the Subspace Gate and could extract ghost energy, the efficiency was nowhere near as good as collecting it.

Moreover, to Su Yu, accessing subspace was also inherently risky.

Even with the ability to open the gates of subspace, Su Yu was very cautious about the subspace entity itself.

After absorbing all the ghost energy from around and a complete purification, Su Yu was satisfied, picking up the remnants of Nuonuo and the Azure Oath, preparing to return to the Mechanical City.

At this moment, the people from the Mechanical City, seeing the ghost energy purified, had already approached.

Upon seeing Su Yu's appearance, they were all startled.

Because Su Yu's battle armor was scrapped, his hair was disheveled, clothes torn and tattered, and he was covered in bloodstains.

In fact, Su Yu's injuries were long healed; it just looked brutal, but he was fine.

"Administrator sir, are you alright?"

"What about that Evil God?"

The crowd didn't know Su Yu's situation and couldn't help but express their concern.

"I'm fine, I just broke through to the seven stars in the battle and have sealed that Evil God. This being cannot be killed, only temporarily sealed."

Su Yu didn't hide much, casually explained as he held up the black sphere.

"Broke through to seven stars? Sealed the Evil God?"

The crowd was stunned by Su Yu's words and didn't know what to say for a moment.

Su Yu actually broke through to seven stars during the battle!

Wait a minute... only seven stars?

During the earlier battle, everyone thought Su Yu had long reached eight or nine stars to possess such terrifying power.

Turns out Su Yu was telling them he had only just broken through to seven stars.

Does this mean, for the past month, Su Yu had been fighting the Evil God with the power of six stars? Even suppressed the Evil God for a month?

And now, upon breaking through to seven stars, he immediately sealed the Evil God?

This...

Who is the real Evil God here?

The crowd looked at Su Yu with increasingly peculiar expressions.

Luckily, they hadn't heard Brutality's earlier words; otherwise, they might have already believed that Su Yu was truly a Subspace God in human disguise...

Of course, they wouldn't consider Su Yu an Evil God, only regard him as a genuine Good God or something of the kind.

"Ahem..."

Su Yu, seeing the crowd's peculiar gaze, guessed what they were thinking.

So he cleared his throat, organized his words, and began to explain:

"This Evil God was actually just an avatar, so it's relatively weak; the true body is a thousand times more powerful than the avatar and remains deep within the subspace, unable to descend."

Upon hearing this, the crowd glanced at the nearby large lake that had been created and fell silent.

This was still an avatar? Still called "relatively weak"?

The true body is a thousand times stronger? Is that even possible?

Is the administrator too tired...

Seeing their disbelief, Su Yu didn't explain much further.

After all, the Subspace Gods were too distant for them to comprehend, which was understandable.

He pointed to the small island in the middle of the lake: "The ghost energy there has been purified; you guys collect the mechanical debris."

The machinery debris, being resources, couldn't just be left here.

With that, Su Yu's figure moved and disappeared from the crowd, returning to the Mechanical City.

In the distance, some who had been secretly observing for a long time also quietly retreated, returning to their forces to report the news.

Chapter 300: Ghost Energy Nuonuo, Enlightenment of the Mechanical Spirit! 2nd Mechanical Apostle - Mechanical Spirit

Relying on his physical strength, Su Yu surpassed the speed of sound, and within just ten minutes, he had returned to the Mechanical City.

The city's residents didn't see anyone, and he was already back in the underground Mechanical Space.

He placed the remnants of the Azure Oath Battle Armor, the Evil God's Rib, and the sealed Brutality on the workbench, temporarily not dealing with them.

He carefully observed the motionless Nuonuo in his hands.

[First Mechanical Apostle-Superpower Nuonuo]

[Creator: Su Yu]

[Race: Mechanical Life Form]

[Core Abilities: ...]

[Comprehensive Strength Assessment: Unknown]

Su Yu looked at this information, feeling somewhat worried.

Earlier, when the Azure Oath Battle Armor was scrapped, Nuonuo transmitted a message to Su Yu about energy depletion before falling into a deep sleep and hasn't woken up since.

This is somewhat unusual.

Nuonuo is not an ordinary Mechanical Creation but a Mechanical Life Form.

Its energy mainly comes from two sources.

One is the Electron Furnace, which has a very strong and lasting energy. The old managers relied on it to drive prosthetic battles for over a hundred years, showcasing its strong power.

Thirty days of battle wouldn't exhaust its energy.

The other source is Nuonuo's Spiritual Energy.

As Su Yu's Mechanical Apostle, it possesses Spiritual Energy, and it's very powerful.

Could it be that it exhausted its Spiritual Energy in the previous battle?

Su Yu carefully sensed, and indeed, there was no Spiritual Energy detectable in Nuonuo's body.

Su Yu frowned. As an Extraordinary Life Form, even if the Spiritual Energy is depleted, there shouldn't be none at all, right?

It's almost like... it's dead!

Just as Su Yu was worried about Nuonuo, suddenly, he felt the Subspace Gate in his body, somewhere between reality and illusion, suddenly open, releasing a surge of pure Ghost Energy.

This energy, through the mysterious connection between Su Yu and Nuonuo, was infused into Nuonuo's body.

Nuonuo's body trembled slightly, and the depleted Spiritual Energy quickly filled up.

However, the originally pure white Nuonuo now had a tinge of ghostly green on its body.

Moments later, it woke up, immediately seeing Su Yu beside it, and exclaimed happily, "Master, that's great! You're okay! ($\nabla \leq$)"

It was just as lively as before.

Then, it apologized, "Master, I'm sorry, Nuonuo didn't protect the Master well... $\pi \sim \pi$ "

The ghostly green on its body dimmed.

It seemed to think that the scrapping of the Fusion Battle Armor was its responsibility.

Seeing this, Su Yu chuckled, gently patted its round body, and comforted, "You've done well enough."

For these thirty days, it was all thanks to Nuonuo continuously fusing the battle armor that Su Yu managed to hold on until now. How could Su Yu blame it?

"Thank you, Master! Master is the best! ㄨ (≧▽≦*)o"

Comforted by Su Yu, Nuonuo immediately regained its spirit, energetically floating around Su Yu.

Seeing Nuonuo recover, Su Yu felt relieved and finally had time to ponder the changes in Nuonuo.

"...Was it just the Subspace Gate? Ghost Energy?"

Su Yu looked at the green-tinted Nuonuo, pondering in his heart, and opened Nuonuo's Attribute Panel.

[First Mechanical Apostle-Ghost Energy Nuonuo]

[Creator: Su Yu]

[Race: Mechanical Life Form]

[Core Ability: Mechanical Evolution (As a Mechanical Life Form you've created, Nuonuo has unlimited growth potential, and its strength is linked to your own Spiritual Energy)]

[Skills:]

[Mechanical Fusion: Nuonuo possesses abilities beyond ordinary Mechanical Life Forms, with a powerful Energy Core and a strong Ghost Energy Field, capable of fusing any Mechanical Creation, greatly enhancing the performance of the Mechanical Creation in all aspects. During the Mechanical Fusion state, if the fused Mechanical Creation is damaged, it will be quickly repaired. Even if a Mechanical Creation is completely destroyed, as long as it retains its general integrity, it will be temporarily revived and utilized under Nuonuo's fusion.]

[Ghost Energy Field: As a Mechanical Life Form, Nuonuo, through its connection with its master, has mastered the use of Ghost Energy, possessing a special Ghost Energy Field. Mechanical Creations within this Ghost Energy Field, if damaged, will quickly repair and be enhanced by Ghost Energy.]

[Comprehensive Strength Assessment: Seven-Star Initial Level]

Nuonuo's Attribute Panel has changed significantly.

The Spiritual Energy has turned into Ghost Energy, and its strength assessment reached the Seven-Star Initial Level!

Su Yu looked at the Seven-Star strength assessment, somewhat speechless.

He worked hard, wore himself out over the course of a month, completed the ritual, attained his position, and broke through to Seven-Star.

The result: Nuonuo took a nap and woke up upgraded?

It's a bit demoralizing.

However, Su Yu quickly understood that Nuonuo isn't truly at the Seven-Star level.

Seven-Star Transcendents must rely on their strong Spirit and the function of a ritual to actively open the Subspace Gate to be considered successful.

Nuonuo doesn't have the ability to open the Subspace Gate; it relied on a deep bond with Su Yu, "borrowing" the Subspace Gate Su Yu opened.

And Su Yu's occupation, specialized in Ghost Energy, is Ghost Hidden Blade, and the Subspace Energy obtained is Ghost Energy, so Superpower Nuonuo became Ghost Energy Nuonuo.

If something happens to Su Yu in the future, like death or a drop in realm, Nuonuo would also immediately drop in strength and no longer be a Seven-Star.

This is also the downside of borrowing strength.

"That's good too..."

Understanding everything, Su Yu nodded.
