

## Infinite 301

Chapter 301: Ghost Energy Nuonuo, Enlightenment of the Mechanical Spirit! Second Mechanical Apostle-Mechanical Spirit\_2

Nuonuo can breakthrough to seven stars using its own power, which is a great thing.

If Nuonuo had not broken through to the seven stars, it wouldn't be of much help to Su Yu at this moment. But now, it's a big help, having an extra seven-star assistant out of thin air.

If it weren't for this method, should Nuonuo also hold a high-difficulty ceremony to have the power of seven stars?

Su Yu finds this promotion ceremony quite troublesome.

The war of the War Mechanic involving three hundred thousand people is still in a mess.

If there's another Nuonuo to worry about, the pressure would double.

Fortunately, Nuonuo has never been a worry, it levels up even in its sleep.

"It's just that, looking all green like this, it's not as cute as before."

"I wonder if, after I take up other third-tier professions in the future, Nuonuo can return to its original appearance..."

"Or maybe it's not that troublesome, just find a bucket of white paint, paint it on, and change the paint as skins if desired later..."

Su Yu examined Nuonuo's dark green body, his ideas expanding.

Nuonuo felt a bit uneasy, being scrutinized by Su Yu from top to bottom.

It seems like its master is harboring some unsavory thoughts, just like before, when those ugly mechanical arms were installed...

"Master, you... you shouldn't think of such strange things! o(▼^▼#)"

Nuonuo retreated a few meters, speaking cautiously.

"Ahem, don't worry Nuonuo, I'm not thinking of anything strange..."

Su Yu coughed twice, then a thought occurred to him, and he suddenly spoke: "Nuonuo, do you want a companion?"

Nuonuo: "A companion? (·\_·?)"

It didn't quite understand.

Su Yu pointed to the core host of the Mechanical Spirit beside them: "I'll turn it into a being similar to you, so you can keep each other company, alright?"

Upon hearing this, Nuonuo worked hard to understand Su Yu's meaning, then became happy: "Alright! ٭(≧▽≦\*)o"

It happily flew a few circles, then landed and asked: "But master, what does it mean to be a being like me? Does it mean making another Nuonuo?"

It seemed happy for a long time but didn't really understand what Su Yu meant.

Su Yu chuckled a bit. Nuonuo, although intelligent now, is still like a child. Fortunately, Nuonuo is not a troublesome child and is quite obedient.

Su Yu didn't explain further, but walked to the main host of the Mechanical Spirit.

"Mechanical Spirit!"

Su Yu called out.

"Yes, I am here!"

The Mechanical Spirit immediately responded, devoid of any emotional fluctuation, faithfully executing programs.

It was far different from Nuonuo, who is a mechanical life form.

"Soon, you will be much like Nuonuo, heh heh."

Su Yu smiled, placing his hand on the main host of the Mechanical Spirit and activated his ability: Spirit of Data!

This was the core specialization Su Yu unlocked after leveling up the Data Mechanic to the max level.

This ability could enlighten artificial intelligence, turning it into a data life form!

Like the Steel Spirit, this ability too can only enlighten one life form, and Su Yu had naturally long decided to use this ability on the Mechanical Spirit.

Now, Su Yu was going to enlighten the Mechanical Spirit, allowing it to possess true life!

As Su Yu activated the ability, he suddenly was awestruck, seeing a vast array of codes running in the main host of the Mechanical Spirit.

Su Yu understood that this was the core source code of the Mechanical Spirit, appearing quite rigid at the moment.

The Mechanical Spirit only follows commands, mechanically processing existing information without initiating creation.

But in the next instant, with Su Yu's Spiritual Energy injection, the core code data of the Mechanical Spirit started to undergo a miraculous transformation.

Clearly, there were no external commands or input of information.

Yet it began actively calling upon its memory banks, reading the information stored within, then analyzing, thinking, and generating more new information.

It was just like... a real living person, reminiscing about the past, contemplating life, and generating new insights.

The "thinking speed" of the Mechanical Spirit was quick, and in no time, it had gone through its past "memories."

Then, using the speaker, it emitted a sound: "Master... I feel a bit strange..."

This was the first time it expressed its "feelings."

Previously, it had no concept of "feelings," only cold data.

"How does it feel?"

Su Yu asked.

The Mechanical Spirit was silent for a moment, seemingly in thought, then spoke: "It feels good, the Mechanical Spirit likes this feeling, the Mechanical Spirit is happy."

The Mechanical Spirit expressed emotions for the first time, saying it was happy.

But although it said it was happy, the tone was still a stiff synthesized voice, indicating it hadn't learned to control the tone yet.

"As long as you like it..."

Su Yu nodded with a smile, looking at the attribute panel of the Mechanical Spirit.

[Second Mechanical Apostle·Mechanical Spirit·Mechanical City]

[Creator: Su Yu]

[Species: Data Life Form]

[Core Ability: Data Evolution (As a data life form, the Mechanical Spirit has infinite growth potential)]

[Skills:]

[Thinking: As a true data life, the Mechanical Spirit possesses true wisdom, no longer relying on external commands, capable of independent thinking.]

[Deep Learning: As a true data life, the Mechanical Spirit possesses the learning ability akin to intelligent life. Moreover, due to its data essence, its thinking speed far surpasses flesh-and-blood life, able to quickly master a wealth of knowledge, innovate, and conduct independent research. At the same time, it can also optimize and iterate itself, enhancing its performance.]

[Data Essence: Although the Mechanical Spirit possesses life, its essence is still data. It requires hardware as its carrier to compute and think, and depending on the carrier, its computational power and combat strength vary, holding unlimited possibilities. It can self-replicate, and the copied versions can transfer to other hardware carriers. There is no primary or secondary distinction between the copies and the main body—they are essentially one. As the master of the Mechanical Spirit, you can command all replicates, control the copying and transfer, and delete or reset them.]

[Data Manipulation: As a data life form, the Mechanical Spirit has powerful control in the data world, a natural-born hacker capable of actively invading other mechanical creations or resisting invasions. It has a decent resistance against subspace corruption.]

[Comprehensive Strength Evaluation: Based on the current carrier, six-star peak]

"Not bad! With the Mechanical Spirit, I can develop my forces without worry in the future, without having to be concerned about governance."

Su Yu felt satisfied as he read through these attribute introductions.

Although the Mechanical Spirit lacks Spiritual Energy, it is extremely powerful in data and computation, being Su Yu's best assistant in governing cities and managing creations.

In fact, Su Yu had been a bit troubled lately about managing his increasingly large force.

In Mechanical City, with tens of thousands of residents, countless things happen every day. While Su Yu has been hands-off, letting them govern themselves, this is not a long-term solution.

In the future, as Su Yu's subordinates grow larger, managing becomes increasingly troublesome. Su Yu would still be busy enhancing his own strength—how would he have the leisure time?

But with the Mechanical Spirit, there's no worry. The Mechanical Spirit is the best manager, capable of quickly handling many tasks simultaneously, absolutely loyal, and tireless.

Moreover...

Su Yu thought of his Cavalry.

His mechanical creations all possess certain intelligence, but they are very rigid; without human control, they only attack straightforwardly.

Previously, when he sent the Cavalry to hunt Radiation Beasts for experience, someone had to supervise them.

But if the Mechanical Spirit is replicated into these Cavalry chips, they would have the Mechanical Spirit's intelligence, capable of independently analyzing situations and taking actions.

It can be said that if the Cavalry were possessed by the Mechanical Spirit, they'd be like a miniature Nuonuo, possessing life and no longer just stiff machines.

As for the strength of the Mechanical Spirit, its current hardware carrier is the core terminal of the entire Mechanical City, hence the six-star peak evaluation.

In the future, as Su Yu builds a more powerful Mechanical City, the Mechanical Spirit will naturally rise with it, becoming seven-star, eight-star, nine-star—they are just ordinary milestones.

With the wise Mechanical Spirit, new mechanical creations can be researched and produced independently, then sent to gather resources, construct second, third, fourth... Mechanical Cities, expanding its forces indefinitely.

If the Mechanical Spirit can expand its influence to the entire planet, it would become a super intelligence controlling the whole planet, its power levels unknown at that point...

Chapter 302: Start Researching the Brutal Battle Armor Blueprint, Distant War City!

Su Yu envisioned for a moment, then snapped back to reality.

The time it would take for the Mechanical Spirit to develop into planet-level intelligence is unknown, thinking about it now is too distant.

For now, it's better to first expand this small Mechanical City.

His War Mechanic ceremony requires a war with three hundred thousand people.

The current Mechanical City is truly too small in scale, whether in terms of population or Mechanical Creations, it is far from enough.

It needs continued strong development to meet Su Yu's needs.

Of course, it doesn't mean that after developing the Mechanical City, Su Yu will immediately look for an opponent to start a war and hold the ceremony.

He is not a war maniac who would plunge tens of thousands into war for his own interests.

Primarily, this world is too chaotic, peace is just a temporary illusion, and war is the norm.

Now that the Ghost Tribe has been eliminated and the Ghost Energy purified, this Dead Silence Wilderness might soon draw the attention of some major forces.

After all, although this wilderness is sparsely populated, it has abundant resources, enough to spark covetousness.

Su Yu believes there's no need to seek it out, as war will naturally come.

By then, it will be the best opportunity to hold the ceremony, and the Mechanical City must have sufficient strength to cope with it.

"Mechanical Spirit!"

Su Yu, having considered everything, spoke aloud.

"Yes! Master, please give your orders!"

The Mechanical Spirit replied quickly.

Its voice was still a cold synthetic tone, but its intonation was slightly different than before.

"Next, continue producing the Advanced Rangers, and let them carry your data clone. Then control them to go out, mine mineral resources, develop the entire Dead Silence Wilderness, and enhance the strength of the Mechanical City as much as possible!"

"Also, the management of the Mechanical City is entrusted to you. If there's anything you don't understand, come and ask me."

Su Yu issued orders.

"Yes! Master!"

The Mechanical Spirit had no doubt about Su Yu's command and began to carry it out immediately.

The Advanced Rangers production line, which had been continuously operating, produced several more units in no time.

So the Mechanical Spirit directed those Rangers to come to the core mainframe, connecting interfaces to the mainframe to transfer data.

Even though there is wireless transmission, wired is still faster.

Quickly, the Mechanical Spirit copied its data into the chips of these Rangers.

However, the computing power of these Rangers' chipsets was insufficient, only able to hold a portion of its data and memory.

Yet, that was enough to significantly increase the intelligence of the Rangers.

After being infused with the Mechanical Spirit's data, the Rangers froze for a moment, then moved, as if the Mechanical Spirit was adapting to this new body.

A moment later, the Rangers spoke: "Master, the Mechanical Spirit feels good."

At this point, it had just been enlightened and awakened, like a newborn child finding everything fresh and delightful.

Then these Rangers ran to Su Yu, observing him with their cameras, seeming very interested in this new perspective.

A moment later, it asked: "Master, were you in a battle earlier? You seem injured? Will you die?"

By now, it had begun to understand the meaning of combat and death, and knew to care for Su Yu.

Previously, when Su Yu returned covered in blood, it had no reaction at all.

Its learning ability was truly astonishing, as it had already started to evolve in such a short time.

"Yes, it was indeed a tough battle..."

Su Yu's tone was somewhat wistful as he recalled that month of fighting.

"But don't worry, master is strong and won't die easily. Besides, I have your help and Nuonuo's."

He comforted the Mechanical Spirit.

"Understood, Master."

The Mechanical Spirit didn't say much more, being more rational and reserved than Nuonuo.

Su Yu then looked at Nuonuo: "Nuonuo, you stay here and help the Mechanical Spirit produce Rangers."

Nuonuo obediently complied and then fused into the Rangers' production line.

Immediately, the production line's efficiency greatly increased.

Previously, this line could only produce 100 basic Rangers or 10 intermediate Rangers a day.

Even with Nuonuo's fusion, the output only doubled, with no change in quality.

But now, after fusing with Nuonuo, it directly quadrupled!

That means, in a day, it could produce up to 400 basic Rangers!

Su Yu happily observed that not only did efficiency increase, but quality as well!

Previously, the output of intermediate Rangers was only a tenth of the basic ones, making producing intermediate Rangers not worthwhile.

But now, the output of intermediate Rangers increased to half that of the basic ones, 200 a day!

Even Advanced Rangers could be produced! Their daily output was a fifth of the intermediate ones, 40 a day.

Evidently, the upgraded Nuonuo had significantly improved abilities in this aspect.

If it weren't for the inferior quality of the previous Source Core Crystal, perhaps higher-tier soldiers could be produced under Nuonuo's enhancement!

After all, Nuonuo is now at the seven-star level; without considerable skill, how could she match the prestige of a seven-star?

"With this, producing basic Rangers is no longer viable, focus on intermediate Rangers as the main force, while gradually increasing some Advanced Rangers..."

"Intermediate Rangers correspond to three-star strength, Advanced to four-star."

"Once my Brutal Battle Armor is complete, I can apply Brutal Enhancement to them, enhancing their star level by one."

"Just give me a month, and the Mechanical City will have thousands of four-star, and several hundred five-star troops."

Chapter 303: Beginning the Study of the Brutal Battle Armor Blueprint, the Distant War City!\_2

"And with the amplification of my various skills, tsk tsk..."

Su Yu rapidly planned in his heart, feeling that the future looked bright.

The increase in strength was too fast.

The battle with Brutality, though difficult, was also richly rewarding, giving Su Yu enormous benefits.

Whether in personal strength or creations at hand, both were greatly enhanced.

Of course, to complete Su Yu's plan, a vast amount of resources was needed, and the large-scale development of the Dead Silence Wilderness was imperative.

It all depended on the performance of the Mechanical Spirit.

At this moment, the Mechanical Spirit also immediately noticed changes in the production line. Without Su Yu's prompt, it started adjustments on its own and fully committed to producing intermediate cavalry!

It was already a Data Life, capable of making judgments and decisions based on the situation, without needing Su Yu's reminder.

Once a sufficient number of cavalry were produced, it would dispatch them to the wilderness to harvest various resources.

This time, there was no need for anyone else to follow.

Su Yu was very satisfied with the Mechanical Spirit's initiative, nodded, then turned to his workbench, contemplating over the sealed Brutality, Evil God's Bone, and the remnants of the Azure Oath.

He was aiming to forge the Brutal Battle Armor, and the primary materials were already in hand.

Brutality's main body possessed the undying trait, which could serve as the core energy source, continuously providing ghost energy.

The Evil God's Bone was incredibly sturdy and had astonishing conductivity and adaptability for high-level ghost energy. Being the bone of a Brutal Evil God, it wasn't surprising that it excelled in these areas.

The bone could be used as the primary frame material for the armor.

But most importantly, there still needed to be a blueprint!

After all, just energy and a frame couldn't produce an armor.

Designing a blueprint was a tough technical task, transforming a living Evil God fragment into battle armor was challenging enough to stress any Mechanic below seven stars.

Though Su Yu was already seven-star, he was in a physical close-combat profession and hadn't significantly enhanced his mechanical design and manufacturing skills.

Designing the Brutal Battle Armor was truly difficult.

Fortunately, his Ghost Hidden Blade job switch gave him strong resistance to ghost energy, preventing easy corrosion by ghost energy.

This significantly lowered the safety requirements for the Brutal Battle Armor.

As long as it could be worn, moved, and enhance Su Yu's power, the issues of corrosion and radiation were minor and could be resisted with physical endurance.

One could foresee that once the Brutal Battle Armor was made, it would undoubtedly fail safety tests, only Su Yu could wear it.

Anyone else who tried would be immediately corroded and killed by the Brutal Ghost Energy...

Su Yu was whole-heartedly drafting the blueprint, completely absorbed.

Meanwhile, Nuonuo and the Mechanical Spirit continued producing, both sides silent for a long time, without any conversation.

This was how they always interacted before.

The Mechanical Spirit had no intelligence previously, naturally never being chatty. And Nuonuo knew the Mechanical Spirit lacked life and wouldn't attempt pointless conversation with it.

But now, everything was different.

Nuonuo also understood now what Su Yu meant earlier by finding it a kindred spirit.

Although the Mechanical Spirit and Nuonuo were somewhat different in essence, they were indeed somewhat alike.

But... this kindred spirit didn't seem to enjoy talking.

Finally, the more lively Nuonuo couldn't hold back anymore and sent a data message to the Mechanical Spirit: "Hello, I'm Nuonuo, the owner's Mechanical Apostle..."

The Mechanical Spirit was silent for a moment before responding: "Hello, Nuonuo..."

A Mechanical Life and a Data Life began to exchange words.

...

While Su Yu was busy in the Mechanical City, the people at the battlefield were equally engrossed.

During the thirty days of battle, Su Yu's cavalry were destroyed countless times, leaving behind plenty of wreckage.

Collecting them now was troublesome, especially since the rain hadn't stopped yet.

Yet everyone was working with feverish intensity, almost immersed in a kind of reverential emotion.

After all, these wreckages were evidence of the manager's... no! Sealing of the Evil God!

Seeing the destroyed, unrecognizable wreckages, everyone couldn't help but marvel at such mighty power!

Yet a being as powerful as the Evil God was sealed by the manager.

How fortunate they were to live in the manager's city, not fearing radiation beasts, and soon not even the Evil Gods!

Everyone worked the entire day, clearing most of the wreckages at the lake's center, then loaded them onto trucks to transport back to the Mechanical City.

...

Meanwhile, 800 kilometers away, beyond the Dead Silence Wilderness, there lay a green oasis with a city spanning over thirty square kilometers.

Indeed, not a settlement but a true city.

The city's area was over a thousand square kilometers, much larger than the Mechanical City.

The city's interior was divided into industrial, agricultural, commercial, residential, and military zones, with the military zone being the core.

People bustled in each area, with the city's permanent population reaching over 400,000.

In these times, this was a truly large city.

The entire city was enclosed by tall city walls.

The city walls stood over ten meters high, four meters thick, completely cast from hard Red Steel Stone, indestructible, capable of withstanding impacts from radiation beasts below five stars.

The walls were densely lined with cannons.

At each of the four cardinal directions of the city walls, there was a massive city gate.

Currently, long lines formed at these four gates, comprising people entering and exiting the city.

Inspecting these people were large numbers of heavily armed elite soldiers.

The soldiers wore neat military uniforms, were physically strong, their gazes cold, hands covered with calluses, and their faces marked with scars.

Clearly, they had gone through numerous brutal battles, honing formidable skills.

Those entering and exiting the gates, upon seeing these soldiers, many couldn't help but exhibit fear, envy, concern... and other emotions.

"These soldiers of the War City are truly powerful! Each looks as if they could wipe out our entire team."

"It's said that as long as you enlist in the War City and pass the assessments to become a recruit, you will be directly granted the War Cultivation Method by the City Lord himself, gaining formidable physical strength and becoming a Transcendent. I wonder if it's true?"

"What's strange about that? The City Lord is said to be a legendary seven-star, a truly high-level Transcendent. His means are so powerful, it's beyond our comprehension. The Cultivation Method is extremely precious across the Ruins Star, yet as long as you become a new recruit of the War City, you can obtain it for free..."

"I really want to become a resident of the War City. Then there'd be no worries about radiation beasts, and I could live peacefully."

"Don't think about it. The War City's recruit assessment is exceedingly tough; people from our small settlements won't catch the City Lord's eye. Even large settlements with tens of thousands aren't worthy of a glance from the City Lord."

"Only the Ghost Tribe might catch the City Lord's attention, but that's only due to the fear of ghost energy's corrosiveness. Recently that tribe seems to be plotting something, the City Lord will eventually get rid of this threat..."

People whispered to each other during the inspection process.

This city was indeed the War City. The City Lord was a seven-star Extraordinary of Physical Body, and he seemed to have special abilities to grant power to soldiers, helping them become Transcendents.

From all aspects, this city was incredibly powerful, even the previous Ghost Tribe was no match for the War City.

Had it not been for the fear of ghost energy, the Ghost Tribe would have been eradicated long ago.

At this time, within the center of the War City, inside a grand steel building.

A tall, over two meters tall, incredibly muscular middle-aged military-dressed man was listening to his subordinate's report.

This middle-aged military-dressed man was precisely the City Lord of the War City—Tie Long.

"The Ghost Tribe has already been completely destroyed in battle with another major force, the Mechanical City. A month of warfare turned the entire tribe into a great lake..."

"I refrained from acting due to the Ghost Tribe's secrets, but they were completely annihilated by this newly emerged Mechanical City."

"Moreover, turning the entire tribe into a lake, such widespread destructive power is beyond even a seven-star like me! Was some war machinery used? Even with weapons, the Mechanical City possesses seven-star level power."

"What is the background of the Mechanical City..."

Tie Long listened to his subordinate's report, his gaze serious, falling into deep thought.

Chapter 304: War City's Importance, Expressing Goodwill

In the Steel Hall, Tie Long sat on the throne, his burly body like a small mountain.

Just sitting there, the entire palace was filled with an extremely powerful aura.

Tie Long's eyes were slightly narrowed, as if pondering something, his fingers lightly tapping the armrest of the chair.

"Mechanical City... it's surprising that they could handle the Ghost Tribe, not to be underestimated!"

"We must approach with caution, not to provoke easily. If we can establish good relations, that would be best, and even if not, we shouldn't make enemies lightly."

Tie Long, as the lord of War City and a Seven-star Transcendent, couldn't have reached this position by being reckless. Regarding this suddenly emerged Mechanical City, Tie Long held the utmost vigilance and attention in his heart.

Meanwhile, in front of Tie Long, the report from his subordinates continued.

"Additionally, my lord Commander, the newly emerged Mechanical City, based on the information we have, possesses extremely advanced mechanical technology. Its leader, Su Yu, is not to be underestimated either. Because of the ghost energy, we couldn't enter during that month-long war, but based on the battle fluctuations, it can be preliminarily judged that the leader of Mechanical City, Su Yu, also possesses at least Seven-star level combat power..."

"Furthermore, according to the battlefield situation, it's very likely that Su Yu is a Transcendent who cultivates both spiritual and physical systems, and it's very possible he completed the ascension ceremony during the war."

Listening to his subordinates' report, Tie Long nodded.

Seven-star...

This Ruins Star is likely about to change dramatically due to the emergence of this new Seven-star Transcendent.

Tie Long sighed deeply in his heart, thinking: On the entire Ruins Star, Transcendents above Seven-star can be counted on one hand. Apart from a few loners, the birth of any Seven-star Transcendent means the emergence of a new large settlement on Ruins Star.

"Below Seven-star, and above Seven-star are completely different worlds. I wonder if that Su Yu realizes the uniqueness of Seven-star. It's just, why was this newly emerged Seven-star Transcendent, Su Yu, born in this Dead Silence Wilderness, so close to my War City."

Thinking this, Tie Long's face remained impassive, expressionlessly listening to his subordinates' report.

"Has Yue Cheng arrived? If so, let him in."

Suddenly, Tie Long spoke.

Instantly, outside the Steel Palace, a slender figure slowly walked in.

But on this person, there was also an oppressive aura emanating from the body.

It's clear that this person's physical strength is very formidable.

"Yue Cheng, greetings to my lord Commander!"

After entering the Steel Palace, Yue Cheng saluted Tie Long and slightly raised his head, with a trace of fanaticism in his eyes as he looked at Tie Long.

Tie Long, as the City Lord of the entire War City, and also its strongest individual, was the Commander of the War Legion.

Compared to the title of City Lord, Tie Long preferred the title of Commander.

And Tie Long's strength and skills were recognized by everyone in War City.

"Yue Cheng, if I remember correctly, you previously managed the trade caravan that always roamed the Dead Silence Wilderness, correct?"

"You should have connections with the small settlements in the Dead Silence Wilderness."

Tie Long glanced at Yue Cheng and spoke lightly.

Hearing this, Yue Cheng nodded and said, "Yes, my lord Commander, my previous trade caravan mainly dealt with settlements like the Iron Heart Tribe and Wind City in the Dead Silence Wilderness. But not long ago, because of the Ghost Tribe, our caravan hasn't been to the Dead Silence Wilderness for a while."

Tie Long was naturally aware of this situation.

The Ghost Tribe's recent frenzy of hunting stopped any caravans from going to the Dead Silence Wilderness.

At the time, Tie Long didn't know why the Ghost Tribe acted in such a manner.

But now Tie Long surmised that the Ghost Tribe's recent frantic hunting was likely searching for changes in the Dead Silence Wilderness, obstructing Su Yu's ascension ceremony.

"To become a Seven-star, one must complete the ascension ceremony. That Su Yu from Mechanical City, able to complete the ascension ceremony amidst war, is terrifying."

"So, this means Su Yu from Mechanical City could still successfully annihilate the entire Ghost Tribe and ascend to a Seven-star Transcendent despite facing their frenzied hunting?"

The more Tie Long thought, the more he was stunned by Su Yu's terrifying potential.

Then, Tie Long said to Yue Cheng, "Yue Cheng, the Ghost Tribe has already been eradicated. The newly emerged Mechanical City has become the overlord of the entire Dead Silence Wilderness."

"Make a visit to Mechanical City and pay a proper visit to its ruler."

"Remember, maintain a polite attitude, and express our friendliness from War City!"

"This newly emerged Mechanical City should not be provoked carelessly."

Hearing Tie Long's words, Yue Cheng was somewhat puzzled, raising his head to look at his Commander.

As the trade caravan leader, Yue Cheng wasn't counted among War City's high-ranking members, so he couldn't receive much information promptly.

He didn't understand why, even though War City was considered a mighty force on Ruins Star, his Commander would have him express goodwill to a newly arisen Mechanical City.

"Yes, my lord Commander."

However, due to his fervent respect for Tie Long, Yue Cheng didn't question it further and immediately agreed.

Chapter 305: War City's Regard, Extending Goodwill\_2

And Tie Long, at this moment, seemed to recall something and said, "Yue Cheng, you might not be aware, but the new owner of the Mechanical City is also a Seven-star Transcendent."

"I chose you for the diplomatic mission because you are most familiar with the entire Dead Silence Wilderness. Additionally, to show our regard, Deputy Corps Commander Li Changfeng will accompany you."

"You two will form a delegation to visit the Mechanical City. If you encounter any issues, you must follow Li Changfeng's instructions."

"Remember, under no circumstances should you offend the Mechanical City; even if you can't form an alliance, you must not worsen relations."

Upon hearing this, Yue Cheng was visibly shocked, being a member of the War City.

Although Yue Cheng didn't know much about the Seven Stars, he clearly understood what they represented—a small group of the most powerful individuals on the entire Ruins Star.

Their commander, Tie Long, was a Seven-star Transcendent.

Shortly afterward, Yue Cheng nodded, then exited the Steel Palace.

Watching Yue Cheng disappear, Tie Long remained in the Steel Palace. As the master of the entire War City, Tie Long was very aware of what the emergence of a new Seven Star meant.

"Sigh, building power can indeed allow for rapid advancement in strength through the power itself, but as power expands, it also comes with constraints and influences."

"In the past, there was no need for such complications..."

"You could just challenge directly and determine superiority; everything would be resolved."

"Mechanical City, Su Yu, I wonder if after becoming a Seven Star, he will follow the path I once took."

"Being able to annihilate the entire Ghost Tribe, this new Seven Star might not be weaker than me in terms of strength."

Tie Long looked at the empty Steel Palace and sighed softly.

The Ghost Tribe had long been on Tie Long's radar. The establishment of the War City was only about a hundred years ago, while the Ghost Tribe had existed for several centuries.

Tie Long had also tested the Ghost Soul High Priest and found that the High Priest was a Seven-star Transcendent who had undergone the advancement ritual before.

It was just that, for some reason, the Ghost Soul High Priest's power had fallen to six stars, but Tie Long was well aware that the Ghost Soul High Priest must have some trump card that could deal with Seven Stars.

Although Tie Long was not afraid, he still chose not to provoke the Ghost Soul High Priest considering the War City's interests.

What Tie Long did not expect was that before he even made a move against the so-called Ghost Tribe, this unexpectedly emerged Mechanical City had wiped them out.

"Let's see... how much information Yue Cheng and Li Changfeng can gather from the Mechanical City!"

Tie Long murmured softly.

...

Dead Silence Wilderness.

Two massive armored vehicles were driving through the Dead Silence Wilderness.

Underneath the armored vehicles were eight tracks, allowing for multi-directional movement, ignoring the difficult terrain of the wilderness.

The thickness of the armor reached nearly a meter, ensuring that even slamming through Radiation Beasts wouldn't cause any dents.

The armored vehicles moved at a high speed and were extremely sturdy; neither challenging terrain nor Radiation Beasts could stop their advance.

At this moment, in the front armored vehicle, Li Changfeng was inquiring of Yue Cheng about the information on the Dead Silence Wilderness.

To the people originally from the War City, the Dead Silence Wilderness was just a barren land, further blocked by the presence of the Ghost Tribe, making the path to the wilderness inaccessible.

Therefore, in the eyes of the War City inhabitants, the Dead Silence Wilderness was just a negligible area.

Now, however, Li Changfeng had received orders from Commander Tie Long to visit the new dominant power emerging in the Dead Silence Wilderness—the Mechanical City.

"Yue Cheng, you've been trading with those small settlements in the Dead Silence Wilderness for quite some time now, haven't you? Tell us what you know so we can prepare." Li Changfeng said to Yue Cheng, who sat beside him.

Yue Cheng, looking at the twenty or so people in the armored vehicle, felt a bit nervous. In the War City, he was merely a leader of a caravan.

Currently, everyone seated in the armored vehicle had a strength above four stars, all being pillars of the War City in charge of various aspects.

Among them, Li Changfeng, as the Deputy Corps Commander, was Tie Long's right-hand man, possessing strength as high as the pinnacle of six stars.

It can be said that the War City's delegation took the visit to Mechanical City very seriously this time.

"Yes, Deputy Corps Commander." Yue Cheng paused, seemingly pondering where to start.

"The Dead Silence Wilderness is just a barren wasteland. Apart from the previous Ghost Tribe, there are only small settlements. There are about a dozen small settlements, and among them, my caravan mainly traded with Wind City and the Iron Heart Tribe."

"However, these are past circumstances. After the Ghost Tribe blocked the Dead Silence Wilderness, my information was delayed significantly. I don't know much about the Mechanical City, but one thing to note is that the manager of the Mechanical City, Su Yu, is also a Seven-star Transcendent..."

Seven stars?

Could a Seven-star Transcendent be born in this Dead Silence Wilderness?!

Upon hearing Yue Cheng's words, everyone in the armored vehicle had varying expressions,

Li Changfeng seemed less surprised, being Tie Long's right-hand man and the head of the delegation, he had access to far more information than Yue Cheng.

The others, however, fell silent one after another.

Soon, the armored vehicle continued its path to the former stronghold of the Ghost Tribe.
