

Infinite 311

Chapter 311: Li Changfeng's Fear and Wariness, Evil God = Su Yu?

Yue Cheng listened to Li Changfeng's words, then looked at the hardworking rangers in front of him, and the genuine smiles on the faces of the Mechanical City's residents.

It was a scene he had never witnessed before.

Whether it was the unique mechanical creations in the Mechanical City or the expressions of its residents, even as the head of a caravan, Yue Cheng had never seen such sights.

Yue Cheng could see that the residents of the Mechanical City were extremely satisfied with the entire city. In other words, all the residents held great respect for the city's administrator, Su Yu.

After a long time, Yue Cheng nodded and said, "Indeed, the rise of the Mechanical City is unstoppable."

"It seems like it's only a matter of time before the Mechanical City develops into a major power."

At this moment, the envoys from the War City, guided by the rangers, had already arrived at the Mechanical Hall.

Su Yu was already silently waiting in the high seat symbolizing the administrator in the Mechanical Hall.

Li Changfeng glanced at Su Yu instinctively.

Just that one glimpse filled Li Changfeng with immense fear.

It was an aura he had never sensed, not even from his commander Tie Long.

Cold.

Dead silent.

Like the shrouding night over the wilderness.

Even though Su Yu was merely sitting there, Li Changfeng could still feel that lingering, chilling aura.

"Isn't this Mechanical City's administrator supposed to be an Extraordinary Mechanic? Why is his aura so identical to, yet stronger and more discomfoting than, that of the Ghost Tribe's ghost energy?"

As a six-star top-ranked Extraordinary of Physical Body, Li Changfeng's power was among the best in the War City, only below Tie Long, and he possessed an exceptionally strong sensory ability, which is why he became Tie Long's right hand.

But now, in front of Su Yu, Li Changfeng had only one thought left in his mind.

Unconquerable, absolutely unconquerable.

"This is definitely the aura of ghost energy; I couldn't possibly be mistaken."

"How could this be? According to the information gathered by the War City's spies, wasn't the owner of the Mechanical City supposed to be a mechanic with a strength level of seven stars?"

Li Changfeng was utterly shocked.

To him, the original upheaval in the Dead Silence Wilderness seemed to be just an extraordinarily talented Transcendent reaching seven stars and successfully wiping out the Ghost Tribe.

But now, it seems far from simple.

"A seven-star ghost energy Transcendent; either the administrator of the Mechanical City is a remnant of the Ghost Empire, which allows him to grasp a high-level ghost energy cultivation method, thus reaching seven stars."

"Or perhaps the previous battle was merely a farce directed and acted by the Ghost Tribe, solely to satisfy a seven-star ascension ceremony, or perhaps the Ghost Soul High Priest seized an opportunity..."

"Or even, the current administrator of the Mechanical City might have long fallen to become a believer of the Evil God..."

As a major power, Li Changfeng, being Tie Long's right hand, naturally knew some information that was hard for ordinary people to access.

At the very least, Li Changfeng understood that to achieve seven stars, one must complete the ascension ceremony and leave a mark in the Subspace.

Only in doing so can the gate to the Subspace be opened to draw in the energies within, thus achieving seven stars.

And by originally being born within the Subspace as an Evil God, becoming a believer of the Evil God has the same effect as relying on the ascension ceremony, except that one would be forever at the mercy of the Evil God.

But no matter what, Li Changfeng knew that the Su Yu in front of him, who wielded ghost energy, was far from being merely a newly ascending seven-star.

The special polluting nature of ghost energy is something no Transcendent would willingly provoke. Even the original Ghost Soul High Priest of the Ghost Tribe relied on the peculiar nature of ghost energy to turn the entire Dead Silence Wilderness into their pasture under various major powers.

At this time, sitting in a high position, Su Yu didn't know what Li Changfeng was thinking.

Instead, he waved his hand to signal everyone to take their seats.

Li Changfeng's mind was a torrent of thoughts, but his face showed no emotion; regardless of Su Yu's true identity, the current circumstances were more powerful than any individual.

Li Changfeng still intended to follow the War City's initial strategy to form a good relationship with Su Yu, and as for Su Yu's true situation, they would discuss it upon returning to the War City.

At this moment, Li Changfeng stated his purpose of visit; he stood up and said respectfully, "Honorable administrator of the Mechanical City, I am the Deputy Corps Commander of the War City, Li Changfeng."

"This visit to the Mechanical City is primarily to thank you, the administrator, for eliminating the Ghost Tribe, effectively removing the malignant tumor in this Dead Silence Wilderness."

What Li Changfeng said was not wrong.

From the perspective of people in the War City, the Ghost Tribe was a malignant tumor, difficult to cooperate with and handle; its ghost energy pollution had already made everyone instinctively disdainful.

"Therefore, our Commander in the War City, Tie Long, as a gesture of gratitude, asked us to pay a visit to the Mechanical City."

As he spoke, Li Changfeng gave Yue Cheng a glance.

Upon seeing Li Changfeng's indication, Yue Cheng stepped forward a few paces and took out a palm-sized information storage device from his pocket.

Yue Cheng walked to the center of the Mechanical Hall, slightly bowed, and held up the information storage device.

He said, "Yes, Honorable Administrator, to express gratitude, the Iron Dragon Commander sent me to bring some small gifts."

Upon hearing Yue Cheng and Li Changfeng's words.

Su Yu nodded, as he was already aware of the War City's intentions.

Chapter 312: Li Changfeng's Fear and Wariness, Evil God = Su Yu?_2

Since the emissary group from War City had long been monitored by the Mechanical Spirit upon entering the Dead Silence Wilderness.

Every little move was observed by Su Yu, and naturally, their intentions were clear to him.

However, on the surface, Su Yu remained expressionless, calmly nodding his head, raising his left hand from the armrest of the seat.

With a gentle gesture in Yue Cheng's direction, the information storage device was drawn by Su Yu's Spiritual Energy and landed in Su Yu's hand.

Upon seeing this scene, Li Changfeng's pupils slightly contracted; he clearly sensed the presence of Ghost Energy from the aura of Su Yu's Spiritual Energy operation.

Li Changfeng thought to himself, "As expected, the manager of this Mechanical City is a Ghost Energy Transcendent."

Su Yu fiddled with it momentarily and, through the abilities of a Data Mechanic, easily obtained all the information from the information storage device.

The gift brought by War City couldn't be said to be precious.

But it is exactly what Mechanical City needs most right now.

"Two Cultivation Methods and a map currently used by War City."

"War City is quite sincere indeed."

Su Yu felt a bit surprised in his heart.

The Ghost Tribe regularly harvests the entire Dead Silence Wilderness like a pasture, strictly controlling all cultivation methods, not allowing them to spread throughout the Dead Silence Wilderness.

Under the control of the Ghost Soul High Priest, the Transcendents in the entire Dead Silence Wilderness do not have a systematic cultivation method, often becoming Transcendents only through their own talent.

Four-star beginner is the limit for these rogue Transcendents.

This is also the scenario the Ghost Soul High Priest is pleased to see.

If not for Su Yu's sudden appearance, the Dead Silence Wilderness would likely remain a pasture for the Ghost Soul High Priest to cultivate.

"Cultivation methods are indeed what Mechanical City lacks the most now. Even the former manager, despite being a cyborg from Dawn City, left no cultivation methods out of fear of the Ghost Tribe."

"The various Meditation Techniques provided by the occupation panel are hardly really meditation methods, merely those deduced based on my own situation, most suitable for me personally, and naturally cannot be spread."

"The two cultivation methods provided by War City allow Mechanical City to have a large number of Transcendents."

Su Yu knew clearly that the original Transcendents in the Dead Silence Wilderness were entirely rogues, without systematic cultivation methods, relying only on talent to progress. Reaching the four-star beginner level already speaks volumes of their talent.

Now that there is a systematic cultivation method, the Transcendents in Mechanical City who have already reached the four-star beginner level are expected to experience a transformation in their strength.

"However, more than these two cultivation methods, the map provided by War City surprises me even more. The map contains the latest information, and even though War City might conceal some details, the map is extremely useful to me."

To Su Yu, cultivation methods are certainly suitable for the current Mechanical City, but the numbers of Transcendents do not matter much to him, as his mechanical army can already be mass-produced on a large scale.

Furthermore, after possessing the Mechanical Spirit, the intelligent machines all have significant intellect. The workforce in the entire Mechanical City is becoming increasingly insignificant to Su Yu.

"Establishing the Mechanical City was initially intended for rapid growth. Now, its utility to me is diminishing."

To Su Yu, all forces serve him personally, and the entire Mechanical City is founded on his personal strength.

Su Yu, his mind racing, calmed the surprise in his heart and looked at the emissary group from War City, speaking calmly: "There has long been enmity between the Ghost Tribe and my Mechanical City, and most of the settlements in this Dead Silence Wilderness have suffered under the Ghost Tribe for a long time."

"The establishment of the Mechanical City is nothing more than a way to keep warm together under the Ghost Tribe's threat."

"As for the grateful gift from the representative of War City, I will accept it on behalf of the residents of Mechanical City."

Hearing Su Yu's words, Li Changfeng and Yue Cheng exchanged glances and saw the surprise in each other's eyes.

In their view, Su Yu, so young and already a Seven-star Transcendent, having established such a large power, it's normal for his ambitions to be high.

However, Su Yu's words left no room for error.

Especially Li Changfeng, who looked at Su Yu with deep apprehension and fear in his eyes.

"The manager of this Mechanical City clearly has the aura of Ghost Energy, yet judging by his demeanor and appearance, he doesn't seem to suffer any side effects of Ghost Energy."

"This is impossible. Ghost Energy Transcendents, whether Evil God believers or Ghost Energy practitioners, cannot escape the negative effects of Ghost Energy. Often, contacting the Evil God makes one's personality more irritable and emotional."

"Moreover, looking at the Ghost Energy aura on the Mechanical City manager, although he concealed it very well, not affecting anyone, the Ghost Energy clearly permeated his entire body when he operated Spiritual Energy just now."

Li Changfeng contemplated in terror.

His mind conjured an unbelievable notion.

"It couldn't be a Ghost Energy practitioner, nor an Evil God believer; only one possibility remains..."

"The manager of this Mechanical City is himself an existence on par with the Evil God, or perhaps... the Evil God himself."

Chapter 313: Li Changfeng's Fear and Wariness, Evil God = Su Yu?_3

Li Changfeng thought of this, and his eyes were suddenly filled with fear.

Although the fear and apprehension were fleeting, Su Yu still caught them.

Su Yu thought to himself, "Fear me? Why would the Deputy Corps Commander of the War City fear me?"

Su Yu quickly recalled Li Changfeng's behavior since entering the Mechanical Hall and immediately realized that Li Changfeng's fear of him seemed to have started from the moment he entered the Mechanical Hall.

Moreover, that fear was not of Su Yu's power, but of Su Yu himself.

"What do I have on me that is worth fearing..." Su Yu thought for a moment and quickly understood, "Ghost Energy? Could it be that Li Changfeng can sense the aura of Ghost Energy on me?"

During the nearly month-long battle with the Brutality clone, Su Yu's entire body had been immersed in Ghost Energy, and the Fighter's Adaptability also allowed Su Yu's body to fully adapt to it.

In addition, after taking the job of Ghost Hidden Blade, Su Yu had long become a master of Ghost Energy, and in Su Yu's view, his control over Ghost Energy was at least on par with Brutality.

"The War City really cannot be underestimated." Although Su Yu guessed Li Changfeng's fear, he did not explain, instead he looked at Li Changfeng with interest.

Li Changfeng noticed Su Yu's gaze, and his heart skipped a beat, realizing that his previous behavior was a bit off.

Immediately, Li Changfeng stepped forward and said, "Honorable Administrator, these gifts are not only to express our gratitude but our War City has a request as well."

"What request? Speak up and let's hear it," Su Yu replied.

Li Changfeng gritted his teeth, suppressed his inner fear, and finally spoke, "Honorable Administrator, our War City hopes to form an alliance with the Mechanical City."

Although, in Li Changfeng's mind, Su Yu at this moment had almost equaled the Evil God itself.

But on the surface, Li Changfeng still had to appear normal, and the matter of alliance naturally had to be discussed. However, Li Changfeng at this moment had already elevated the priority of information concerning Su Yu to the highest level.

"When we leave the Mechanical City, we must inform the Commander of this situation immediately."

Li Changfeng had already made up his mind.

Su Yu listened and nodded but did not respond, only saying lightly, "Alliance, why an alliance?"

The implication of these words was clearly not in favor of an alliance.

This immediately made Li Changfeng secretly delighted.

Faced with Su Yu, who was suspected to be an Evil God, Li Changfeng did not want to stay even a moment longer.

Li Changfeng was about to seize the opportunity and say, "Honorable Administrator, it was presumptuous of me, regarding the alliance..."

However, at the next moment, Yue Cheng interrupted.

He remembered what Li Changfeng had previously told him: it was necessary to maintain good relations with the Mechanical City.

"Yes, an alliance."

"Honorable Administrator, if the Mechanical City is willing to form an alliance with our War City, there would be benefits for both of us."

"The range of the Dead Silence Wilderness is large enough, but currently, the only force left on the Dead Silence Wilderness is the Mechanical City, and the population of the Mechanical City is obviously insufficient to develop the entire Dead Silence Wilderness."

"Our War City has a large population, fully capable of providing manpower for the Mechanical City to develop the Dead Silence Wilderness. In exchange, our War City also needs support from the Mechanical City in mechanical technology."

Seeing that Su Yu's expression still did not change, Yue Cheng gritted his teeth and said, "Additionally, Honorable Administrator, as a newly promoted Seven-star Transcendent, you can also obtain some information about the Seven-star from our Commander."

Having said this, Yue Cheng looked smugly at Li Changfeng who remained silent, completely missing Li Changfeng's stiff expression, thinking to himself, "It still takes someone like me, a convoy leader, to step in. Otherwise, with someone as straightforward as Li Changfeng, forming an alliance would be difficult indeed."

Chapter 314: Forming an Alliance, Tie Long's Speculation

Li Changfeng at this moment wished he could slap Yue Cheng to death. What kind of trouble was he trying to stir up here? Allying with an Evil God? Are you crazy or am I?

As the Deputy Corps Commander of War City, he was strong and experienced, well aware of the terrifying and bizarre nature of Subspace Evil Gods.

If one comes into contact with an Evil God for too long, it's very likely that unconsciously, they'd become a devotee of the Evil God, losing their humanity and only dedicating themselves to pleasing the Evil God.

They'd feel that serving the Evil God is the happiest thing in the world, even willing to give their life for it.

To normal people, such a state could be said to be a fate worse than death.

Li Changfeng worried that if War City allied with an Evil God, who knows when the entire city might fall, succumbing to such a terrifying state.

That would truly be courting death.

Li Changfeng recalled the heartfelt smiles on the faces of the residents of Mechanical City he had seen earlier.

He couldn't help but shiver; could it be that all those residents were already...

He could only pray in his heart that Su Yu, this Evil God, would not agree to the alliance request...

However, what one fears most often comes to pass.

When Su Yu heard Yue Cheng's words, his eyes moved slightly, appearing to show some interest:

"Send people to help me develop the Dead Silence Wilderness?"

"The population of Mechanical City is indeed somewhat lacking; in that case, let's form an alliance."

Su Yu nodded in agreement, seemingly moved by the conditions Yue Cheng proposed.

In fact, although Mechanical City lacked population, Su Yu fundamentally did not need any such population right now.

With Mechanical Spirits around, Su Yu could develop the Dead Silence Wilderness all by himself even if he were alone.

Forming an alliance with War City might instead lead to some resources from the Dead Silence Wilderness being allocated to War City, causing Su Yu to suffer a loss of interests.

Therefore, he wasn't very keen on the idea of an alliance earlier.

However, after hearing Yue Cheng's words, he felt that War City was so sincere, it would be hard to refuse.

Moreover, he knew very little about the world outside of Dead Silence Wilderness.

By communicating more with War City, they could exchange what they have; even giving up some resources would be beneficial and not harmful.

After all, Dead Silence Wilderness wasn't something Su Yu particularly cared about right now; Ruins Star was vast, with plenty of resources.

Upon hearing Su Yu's agreement, Yue Cheng immediately became overjoyed; this mission was now perfectly completed!

"Wonderful! Esteemed Administrator!"

"Forming an alliance with War City is definitely the right decision!"

"Once we return to War City, we will immediately send personnel to assist Mechanical City in developing the Dead Silence Wilderness..."

"Of course, War City needs to take a portion of the resources developed, since we can't work for free."

"The specifics of the allocation proportions will need to be gradually discussed..."

Eager for merit, Yue Cheng rattled off his words in excitement.

In the blink of an eye, the general details of the alliance were settled, leaving Li Changfeng unable to stop it.

Yue Cheng was previously in charge of the trade caravan and was rather adept at such collaborative development matters.

After listening, Su Yu nodded: "Do as you said, the details will be discussed gradually."

Thus, the formation of the alliance between Mechanical City and War City was considered to be initially achieved.

Standing by, Li Changfeng had the impulse to cover his face.

Su Yu suddenly became interested in the alliance; could it be he was eyeing War City's development teams to use them as sacrifices?

If he'd known this would happen, he wouldn't have said so much to Yue Cheng earlier; what to do now?!

Li Changfeng pondered for a moment, finally speaking: "In that case, Yue Cheng, you stay in Mechanical City and discuss the resource allocation proportions."

"I'll return to report to the Commander and then send development teams over to jointly develop the Dead Silence Wilderness."

After some deep contemplation, Li Changfeng decisively decided... to sacrifice Yue Cheng first.

Letting Yue Cheng stay in Mechanical City as a hostage to hold Su Yu steady while he escaped back to relay the message.

Hearing this, Yue Cheng was momentarily stunned; wasn't a major decision like resource allocation something that should be negotiated and decided by Li Changfeng, the Deputy Corps Commander, representing War City?

Why was it being handed over to him?

Could it be because he had accomplished the alliance task, earned credit, and thus the Deputy Corps Commander valued him, entrusting him with yet another important task?

Thinking this, Yue Cheng was immediately delighted and promptly puffed his chest out: "Deputy Corps Commander, rest assured, by the time War City's development team arrives, I will have already settled the resource allocation matter!"

"Major matters like this alliance should indeed be reported by the Deputy Corps Commander to make it formal."

"Then I'll stay here, waiting for your good news..."

Yue Cheng's tone was excited, completely oblivious to the fact that the way Li Changfeng looked at him was as if watching someone marked for death.

Staying alone in this lair of the Evil God, could he even survive?

Even if he survived, should his personality drastically change, it would be as if he were dead.

Li Changfeng silently mourned for Yue Cheng for a moment, but he couldn't afford to hesitate; any delay and neither of them might be able to leave.

Then he immediately respectfully said to Su Yu, "Esteemed Administrator, given the gravity of the matter, I will now return to report to the Commander."

Hearing this, Yue Cheng was somewhat shocked; in such haste?

According to etiquette, coming from such a distance, shouldn't they at least have a meal and drink in Mechanical City?

However, how could Li Changfeng dare to consume anything from Mechanical City? All he wished for was to hurry and escape.

Upon hearing this, Su Yu did not respond but rather stared at Li Changfeng.

Naturally, he saw that Li Changfeng harbored hidden fears in his heart, and altogether it wasn't about going back to report news, but rather about running for his life.

"How interesting, am I really that terrifying?"

"Does this Li Changfeng have some misunderstanding about me? Is it just the Ghost Energy that scared him to this extent?"

Chapter 315: Forming an Alliance, Tie Long's Speculation_2

Su Yu secretly thought to himself.

"..."

Li Changfeng was being stared at by Su Yu, and cold sweat was running down his back, fearing that if Su Yu made a wrong move, he would reveal his true form as an Evil God and eat him...

After looking at him for a while, Su Yu finally nodded, "I wanted to entertain the Deputy Corps Commander a bit, but since you're in such a hurry, let's not keep you any longer."

Li Changfeng felt a great sense of relief, respectfully saluted, and then turned to leave the Mechanical Hall.

He walked briskly, without saying a word.

Soon, near the city gate, he found his armored vehicle, got in, hit the gas pedal, and in no time, he was out of the city, leaving a trail of dust behind.

It left the people of Mechanical City dumbfounded.

As they watched Li Changfeng's departing figure, they couldn't help but exclaim:

"Why did this Deputy Corps Commander from War City run away so fast, as if fleeing for his life..."

After Li Changfeng left, Su Yu had the Mechanical Spirit send messages to Yang Lie, Feng Tian, Tie Xin, and other high-ranking officials.

He asked them to meet with Yue Cheng to discuss alliance cooperation and resource distribution.

Su Yu couldn't be bothered with such details and handed them over to others.

After all, with so many people and opinions in Mechanical City, they shouldn't be at a disadvantage dealing with Yue Cheng.

When the high-ranking officials of Mechanical City heard about the alliance with War City, they were taken aback.

"Alliance with War City? They're going to send a development team to help us exploit the Dead Silence Wilderness resources? Are they really so kind-hearted..."

"War City has a large population and strong forces, could this be an excuse to annex us?"

"No need to worry too much; the trade teams sent by War City before actually had a pretty good reputation."

"But we can't be careless; this is now full-scale development, involving significant interests, and it's hard for War City not to be tempted."

"They're called War City; they don't seem like a forgiving power at first glance, don't expect them to be too polite."

"Indeed, although our leader is powerful, War City also has seven-star experts and might not fear our leader!"

The crowd immediately became vigilant.

They were afraid that the so-called alliance was actually a ploy by War City to use as an excuse to annex Mechanical City.

They had finally secured such a safe and stable home in Mechanical City, and they didn't want to lose it again.

In fact, they were overthinking it; in the eyes of War City, the Dead Silence Wilderness was just a barren, insignificant place, not something they would pay much attention to.

What they cared about was the person Su Yu.

"Just after defeating the Ghost Tribe, now comes War City?"

"It's frustrating that our strength is insufficient, and we can't help our leader against such opponents!"

"Later, when discussing resource distribution, who knows how much the envoy from War City will demand..."

The more they thought about it, the more worried they became.

With one enemy after another, their strength remained stagnant, offering little help to their leader.

Originally, they could still help Su Yu develop resources, but now War City wanted to take that too.

This gave them a deep sense of powerlessness and urgency.

At that moment, Su Yu added the two newly acquired cultivation methods to the exchange list.

Everyone's personal terminals immediately alerted them.

"Gathering Spirit Meditation Method?"

"Steel Body Forging Technique?"

"These are... transcendent cultivation methods that can break through four-star, both in spirit and body categories? These are priceless treasures!"

"And each only costs 3000 points? That's incredibly cheap!"

"Where did our leader obtain these? Could this be the secret of our leader's strength?"

The crowd was overjoyed.

They had just been worried about not being able to enhance their strength, and in the next moment, their leader presented them with two precious cultivation methods.

What more could they say?

All they could do was cultivate diligently, using strength and loyalty to repay their leader's generosity!

Of course, before diving into cultivation, they still had to hold a meeting to deal with Yue Cheng first!

The people of Mechanical City were now filled with endless fighting spirit.

Yue Cheng had no idea what awaited him...

...

After leaving Mechanical City, Li Changfeng put the pedal to the metal, racing through the Dead Silence Wilderness at speeds exceeding one hundred kilometers per hour, which was the limit of his armored vehicle.

After all, there were no traffic rules or speed limits in the Dead Silence Wilderness.

In just seven hours, he returned to War City and met with Tie Long.

Tie Long was a bit surprised to see Li Changfeng back so quickly: "What? The people of Mechanical City didn't even keep you for a meal before sending you off?"

"What about Su Yu's strength? How did the alliance talk go? And Yue Cheng?"

Tie Long fired a series of questions.

Upon hearing this, Li Changfeng hurriedly replied, "Su Yu's strength is extremely terrifying, definitely a seven-star expert."

"And astonishingly, I sensed he can wield Ghost Energy!"

"Not only that, he maintained calm and rationale in the face of Ghost Energy's corruption, which is utterly extraordinary."

"I suspect he might have been possessed by an Evil God summoned during that great war by the Ghost Tribe!"

"Right now, Mechanical City is the lair of this Evil God!"

Li Changfeng revealed his terrifying conjecture.

"What? Mastering Ghost Energy, possessed by an Evil God?"

"Tell me in detail! Describe everything you've seen and heard, every single detail of your experience."

Tie Long's expression turned serious, prompting Li Changfeng to recount all his experiences at Mechanical City in great detail.

Li Changfeng dared not slack and immediately began to explain, detailing each observation and analysis for over an hour.

Finally, he finished, feeling parched after speaking for so long.

Meanwhile, Tie Long fell into deep thought.

After waiting a while, Li Changfeng couldn't help but ask, "Commander, what do you think? With an Evil God entrenched in the Dead Silence Wilderness, it's a huge concern, how should we handle it?"

Tie Long pondered for another moment before speaking, "No need to worry too much; that Su Yu is probably not an Evil God."

"Although Evil Gods are bizarre and powerful, they are affected by human emotions, making them extremely erratic and unstable; they can't be that calm."

"I suspect he might be a remnant of the Ghost Empire, possibly a direct successor of the Ghost Emperor, which would explain why he could eradicate the Ghost Tribe and rise so quickly within such a short time."

As the Commander of War City, Tie Long's insights naturally surpassed those of Li Changfeng; he knew more secrets.

After listening to Li Changfeng's narrative, he made his own judgment.

"Is that so?"

"But that kind of terrifying presence felt nothing like a living person, seemed omnipresent, constantly watching me, seeing through everything, almost godlike..."

Li Changfeng was still somewhat skeptical despite hearing Tie Long's explanation.

His abilities were particularly suited for sensing, which was why Tie Long sent him to Mechanical City to probe into Su Yu's background.

Earlier, while at Mechanical City, Li Changfeng always felt he was facing a non-human terrifying existence.

That feeling was definitely not human!

Wielding Ghost Energy and not being human, what else could it be? Naturally, an Evil God!

In fact, Li Changfeng was confusing the Mechanical Spirit with Su Yu.

The Mechanical Spirit was indeed not human, and in Mechanical City, it was omnipresent, monitoring everything.

Su Yu, on the other hand, wielded Ghost Energy, making him powerful and terrifying.

The key issue was the deep bond between the Mechanical Spirit and Su Yu, causing Li Changfeng's senses to fail to distinguish between the two.

No wonder Li Changfeng felt Su Yu was not human, powerful, omnipresent, leaving him terribly frightened.

Tie Long seeing Li Changfeng say this, didn't refute him but gravely said, "Your intuition should not be ignored either."

He chose to partially trust Li Changfeng's sensory reports, after all, Li Changfeng had seen Su Yu in person, which was more reliable than Tie Long's speculations.

Maybe Su Yu was just a calm Evil God? Anything was possible.

Tie Long, after pondering for a moment, spoke again, "As for whether Su Yu is an Evil God or a remnant of the Ghost Empire, we still need to probe!"

"You should select a batch of people to go to Mechanical City as a development team."

"Remember, these people must be carefully selected."

"As for you, it's best not to go, to avoid danger."

Upon hearing Tie Long's command, Li Changfeng immediately understood.

This development team for the alliance definitely shouldn't include trusted individuals.

They could choose peripheral figures from War City.

That way, they could infer Su Yu's true identity from the experiences of that group in Mechanical City.
