

Infinite 316

Chapter 316: Legendary Creation, Brutal Core, 6 Major Traits!

Soon, under Li Changfeng's arrangement, a development team of over ten thousand people was dispatched to the Mechanical City.

These people were all marginalized individuals, criminals, and deserters accumulated over the years in the War City.

For these people, Tie Long was also somewhat troubled; killing them outright wasn't good, and keeping them around was an eyesore.

So this time, these people were sent out to the Mechanical City as laborers, to probe Su Yu incidentally, and also to clear out the excess population in the city, killing two birds with one stone.

Tie Long's order to these marginalized individuals was that if they performed well in developing the Dead Silence Wilderness, past sins would be forgiven.

If they tried any tricks, they would die in the wilderness, with no one to collect their bodies.

The War City is like this, with some humanity, but not much.

For ordinary residents, the War City still takes good care, but once marginalized, the outcome is often rather cruel.

This era is just like that, and the War City is considered good in comparison.

Cities like the Mechanical City, full of warmth, are the exceptions.

This time, Li Changfeng wasn't planning to go over personally; he had no interest in hanging around the Evil God's lair, a careless move could mean no return, so he just sent some trusted subordinates to gather intelligence.

More than ten thousand people left the city, in grand procession, with great momentum.

The merchants coming and going at the city gate were all shocked at the sight, wondering if the War City army was going to wage war against someone.

Moreover, why did the troops going out this time look somewhat... unsightly?

Seeing the over ten thousand leave the city, Li Changfeng breathed a sigh of relief, ready to report to Tie Long.

But then he found that Tie Long was gone...

"Oh no! Commander, could you have mixed in with the development team and run off to the Mechanical City?"

Li Changfeng thought to himself in dismay.

At this time, the message left by Tie Long sounded: "Changfeng, I went to the Mechanical City, I need to personally test Su Yu's strength."

"Whether he is an Evil God or not, we need to probe him."

"You just stay in the city and manage the War City well, wait for my return."

After listening to the message, Li Changfeng suddenly felt darkness envelop his mind.

He was extremely regretful now; earlier, he had exaggerated Su Yu's prowess, which surprisingly stoked Tie Long's fighting spirit.

So Tie Long sneaked off without a word, to fight!

Tie Long was a competent City Lord in the War City, with tremendous combat ability, calm and sensible, managing the War City to flourish.

But he had one flaw: he couldn't hold back when encountering a worthy opponent and always wanted to go for a contest.

In times like this, Deputy Corps Commander Li Changfeng, who was cautious and careful, needed to dissuade him.

But how do you persuade someone who sneaked off without a word?

"Commander, please don't get into trouble!"

Li Changfeng was deeply worried, afraid that when Tie Long came back, he'd converted to the Evil God, which would be a disaster.

...

At this moment, in the Mechanical City.

Su Yu was engrossed in researching the Brutal Battle Armor.

Although the materials were insufficient, at least the most important core had to be created first.

The technical core of this was to grind down the consciousness of Brutality to the extreme, removing its ability to think and resist, converting it into a pure energy provider.

However, purely relying on mechanical technology for this was extremely difficult.

Thus, Su Yu's Flame of Truth and high-level Ghost Energy control abilities were needed as assistance to possibly succeed.

Su Yu was wholly dedicated to the research, with ideas and inspiration bursting forth in his mind.

Finally...

[Ding!]

[Through research, you have successfully designed the blueprint: Brutal Core!]

[The quality rating of this blueprint is... Legendary! Through this blueprint, the core manufactured can seal fragments of the Brutal Evil God, extracting infinite energy!]

"Phew..."

Su Yu let out a breath, finally drafting the most crucial core blueprint!

And the quality of this blueprint turned out to be an unprecedented "Legendary" level.

It seems that Extraordinary quality is already far from sufficient to describe Su Yu's creations at the Transcendent seven-star level.

Hence, unlocking a new rating: Legendary!

"Legendary level blueprint..."

Su Yu looked at the blueprint, very satisfied.

After resting for a moment, he immediately began manufacturing.

The main material for the Brutal Core was still that piece of the Evil God's Bone.

Su Yu operated various machines, lasers, ion beams, water and fire cutting... various methods used in turns.

It took a lot of effort to fully cut a small piece of this hard bone.

Then he carefully carved it for half a day, roughly completing a core the size of a fist.

The core was meticulously crafted, inscribed with countless energy patterns, to maximize energy extraction and output.

Then, Su Yu spent another half day frantically infusing the Flame of Truth inside.

By the end, the Flame of Truth inside was so dense it was almost like liquid.

At this point, Su Yu retrieved the black sphere formed by sealing the Brutal Evil God, then directly pressed it into the semi-finished core.

Sizzle!

The Brutal Evil God encountered the intensely rich Flame of Truth, instantly reacting like cold water meeting hot oil, with violent black smoke rising.

At the same time, there were the Brutality's screams!

"Stop! Human!"

"What are you doing!"

"Kill! When I break free, I will definitely kill you..."

Brutality roared furiously, but its voice grew weaker, as so much Flame of Truth tormented it greatly, depleting its energy by more than half again.

But while Brutality was raging on the outside, it was secretly pleased inside.

Losing some energy was nothing; given time, it would quickly recover strength, possibly even corrupt and take over the core.

Chapter 317: Legendary Creation, Brutal Core, 6 Major Traits!_2

After all, this core was made from Its bones, equivalent to a part of Its body, so corroding this core would be too easy!

Its current state is one with only thoughts and consciousness but no body, so Its power is greatly limited.

However, Su Yu used Its bones to create the core, which perfectly suited Its intentions. As long as It completely takes over the core, possessing part of a body, It would certainly strike back hard at Su Yu!

Even now, Its power has already instinctively started to seep into the core, beginning to corrode it.

Yet Su Yu completely ignored Its cursing and swearing.

After forcibly embedding Brutality into the core, Su Yu began installing intelligent chips into the core.

The small core could accommodate as many as ten high-grade chips!

The energy source driving the chips was Ghost Energy, converted into electricity.

As a powerful high-level energy, Ghost Energy, once converted into electricity, became immensely strong, effortlessly powering ten chips.

After the chips were installed, Su Yu connected it to the Mechanical Spirit's mainframe, downloading the clone of the Mechanical Spirit into these chips.

With the Mechanical Spirit taking residence in these chips, they immediately gained thoughts and a sense of spirit.

Under Su Yu's command, they began using the various pre-designed mechanical structures and energy patterns within the core to manipulate the Flame of Truth, actively suppressing the Brutal Evil God.

Flame of Truth with someone controlling it is a completely different concept from one without control.

Su Yu didn't have the energy to control the Flame of Truth all the time, but the Mechanical Spirit had no such problem as it operates non-stop, twenty-four hours a day.

Especially with the precision of the Mechanical Spirit's control, any loophole would be patched up instantly.

With the assistance of the Mechanical Spirit, the pressure on Brutality suddenly multiplied, which was a crucial step!

This Brutal Core needed to thoroughly seal the Brutal Evil God, and the key lay in the assistance of the Mechanical Spirit.

Only the Mechanical Spirit could fight against and resist the corrosion of the Brutal Evil God, tirelessly, thus ensuring Brutality would never have a chance to break free!

After completing this step, Su Yu didn't stop.

He used his ability of High-level Ghost Energy Control to fiercely compress Brutality, finally reducing it to the size of only a chickpea, firmly confined within the core.

Under the heavy suppression, even the thoughts of Brutality began to become intermittent, given that it was merely a wisp of intent, not the body of the Evil God.

Nevertheless, even in such a dire state, it continued to incessantly absorb the brutal emotions from the void, generating a continuous stream of pure high-level Ghost Energy.

These energies naturally seeped out from the seal, attempting to corrode and control the core.

However, now the situation was actually not Brutality corroding the core, but rather the core actively extracting Brutality's energy.

After all, the core was made from the Evil God's Bone, and extracting Brutality's energy was an innate trait. Moreover, Su Yu used mechanical technology, engraving energy patterns, greatly enhancing this extraction effect.

It was like connecting a high-energy battery to a conductor, with energy being continuously drawn out.

Under normal circumstances, after extracting Brutality's energy, the Evil God's Bone would soon be corroded and controlled by Brutality.

But now, with the Mechanical Spirit, Flame of Truth, and Ghost Energy Control, these three layers of restrictions, Brutality would only be ruthlessly extracted.

As for controlling the core? Think again!

The energies that seeped out, under the guidance of the Mechanical Spirit, followed the carefully crafted energy channels and were guided out of the core, rising into a large cloud of ghostly green mist.

"Completed!"

Su Yu looked at the fist-sized core in his hand, showing a pleased expression.

Finally, this Evil God was taken care of.

[Brutal Core]

[Quality: Legendary]

[Trait 1: Unlimited Energy, the Brutal Core will extract brutal emotions from the surrounding void, continuously generating high-level Ghost Energy, never running out of energy. The production efficiency depends on the concentration of brutal emotions around. The current production efficiency is top tier seven stars.]

[Trait 2: Hardness. The Brutal Core, made with the Evil God's Bone, becomes extremely hard with the infusion of high-level Ghost Energy, making it difficult to damage. The hardness of the Brutal Core depends on the concentration of high-level Ghost Energy. The current hardness is top tier seven stars.]

[Trait 3: Regeneration. The Brutal Shuttle and the Brutal Core made with the Evil God's Bone possess the trait of self-healing regeneration under the infusion of high-level Ghost Energy. The regeneration speed depends on the concentration of high-level Ghost Energy. The current regeneration speed is top tier seven stars.]

[Trait 4: Brutal Enhancement, the Ghost Energy produced by the Brutal Core contains Brutal Divine Power and can perform Brutal Enhancement on Mechanical Creations. The enhancement effect depends on the concentration of brutal emotions around. The current enhancement effect is one star level up for Mechanical Creations below seven stars.]

[Trait 5: Advanced Intelligence. The Brutal Core embedded with the clone of the Data Life Form Mechanical Spirit provides it with powerful intelligence, even regarded as at least a seven-star level Transcendent. It's capable of extremely precise energy manipulation and can simultaneously drive multiple Mechanical Creations.]

[Trait 6: High-level Ghost Energy Radiation, the Brutal Core contains formidable Ghost Energy Radiation; any life below seven stars approaching the Brutal Core will soon be structurally altered by the strong radiation, turning into a Ghost Demon. Even Transcendent Life above seven stars will be affected. The radiation effect will intensify based on the depth of the brutal emotions surrounding.]

The attributes of the Brutal Core were displayed before Su Yu's eyes.

Out of the six traits, the first two, Unlimited Energy! Brutal Enhancement! are incredibly powerful traits, truly worthy of a legendary creation!

The third and fourth traits, Hardness and Regeneration, are also excellent, ensuring no worries about it being damaged in battle.

The fifth trait belongs to the Mechanical Spirit, no need to elaborate on that.

If it only had the first five traits, this Brutal Core would indeed be considered a divine artifact, in a sense, it actually is a divine artifact.

However, the last trait is quite troubling, with such strong radiation inherently, normal people simply can't use it.

In fact, the core has already begun corroding creations within the Mechanical Space, and in some time, it might start seeping to the surface and begin corroding the residents of the Mechanical City.

"Luckily it's for me to use, otherwise anyone else getting too close would drop dead."

Su Yu chuckled, activating his ability, and immediately, the strong radiation emitted from the core was absorbed and purified by him, no longer posing a danger.

However, the item cannot be away from Su Yu, or else it would soon emit dangerous radiation again, and in a short while, it could transform the Mechanical City into a Radiation City.

After strategically placing the Brutal Core, Su Yu turned once more toward the remaining Evil God's Bone.

With the Brutal Core settled, it's time to craft the frame of the Brutal Battle Armor.

Thus, various methods were again employed to slice the Evil God's Bone into pieces.

Without Ghost Energy infusion, although hard, Evil God's Bone is still processable.

Otherwise, Su Yu would indeed have been in a difficult spot.

After another half-day, a set of deep green near-black battle armor was finally crafted by Su Yu, with dense engravings covering the armor, looking quite mysterious.

However, at this point, this armor is only a framework, merely a pure full-body armor.

Any power system, weapon system, information system... none of these have been installed.

Mainly because Su Yu didn't have materials resistant to corrosion, even if installed, they would quickly corrode and become scrap.

So, for now, he could only create the outer layer.

Su Yu looked at the framework, picked up the Brutal Core, and slowly placed it into the slot on the chest of the battle armor.

Buzz!

With the placement of the core, the entire battle armor suddenly trembled, the energy patterns on it lit up one by one, flowing with extremely dense high-level Ghost Energy.

Boom!

The high-level Ghost Energy flowing on the battle armor reached an extreme, suddenly overflowing, causing ghostly green Demon Flames to rise around it, emanating a fiercely intense Brutal Aura.

The energy system is at least in place.

At this moment, it could barely be called [Brutal Battle Armor]!

"Mechanical Spirit, help me put on this armor."

Su Yu called out.

Chapter 318: Big Misunderstanding, Is War City Really Going to War?

"Yes, Master."

The Mechanical Spirit responded, extending a few mechanical arms.

The Mechanical Spirit skillfully manipulated those arms to open the battle armor and precisely fitted it onto Su Yu.

After the armor was donned, Su Yu moved casually a couple of times and found that even without the power system, it didn't impede his movements much. It felt like just wearing a slightly heavier outfit.

"My craftsmanship is not bad, quite a good fit..."

Su Yu chuckled lightly and then said, "Nuonuo! Mechanical Fusion!"

"Yes, Master!"

At the sound of his words, Nuonuo immediately flew over, its spherical body instantly splitting into countless tiny fragments that merged into the battle armor.

Moments later.

Buzz...

The battle armor emitted a slight mechanical whirring sound, as it now had a real power system, which was... Nuonuo!

After the fusion, Nuonuo used its body to simulate a temporary power system.

This was because Nuonuo had upgraded to Seven-Star and also mastered Ghost Energy, evolving into Ghost Energy Nuonuo.

Otherwise, such a feat would have been impossible.

"A bit of patchwork, but it's finally usable!"

Su Yu clenched his fist, feeling the powerful force coursing through the armor, joy filling his heart endlessly.

Boom!

He punched out with one fist, striking the air.

His inherent strength, amplified by the battle armor's power system, instantly broke through to several times the speed of sound.

Under the powerful impact of several times the speed of sound, the air in front of his fist exploded, as if a bomb had been detonated, causing the surrounding mechanical arms to tremble.

Subsequently, Su Yu's other hand grabbed at the void, and in an instant, a nearly black ghostly green energy ball condensed, containing terrifying Ghost Energy. If thrown, it would cause a massive explosion.

However, he didn't throw this energy ball, fearing it would dismantle the Mechanical Space.

"This power has increased several folds..."

Su Yu's face lit up with delight.

Although this battle armor was still a semi-finished product, it was enough to increase his physical body power and Ghost Energy by several times.

In fact, Su Yu was now a Tier Three Ghost Hidden Blade, and his strength was already formidable.

But after all, he was still flesh and blood, and no matter how strong, he was limited by the physical body and would eventually tire.

Also, Su Yu had just recently ascended to Seven-Star, and the level increase wasn't much.

In the future, as he levels up, the strength and density of his physical body would greatly increase, allowing him to harness more explosive power, but there would still be a limit.

Meanwhile, the armor, being inorganic, did not have the various weaknesses of the physical body, and its capacity for energy was much greater, allowing for uninhibited exertion.

Moreover, the Brutal Battle Armor's defense was strong, its endurance infinite, and coupled with Nuonuo's mechanical fusion, achieved an effect of one plus one greater than two, significantly boosting Su Yu's strength.

With this armor on, Su Yu was confident he could defeat any Seven-Star powerhouse of the same level, and even if an Eight-Star powerhouse came, he was not afraid to face them.

Furthermore, since this armor was crafted from Evil God's Bone, its energy capacity was extraordinarily immense, and currently, with just Nuonuo's fusion for temporary use, its power had yet to reach its limit.

When the Brutal Battle Armor is finally completed, who knows what kind of power it will wield.

"I really want to find an opponent to test it out."

"Speaking of which, I haven't really upgraded much since taking the Ghost Hidden Blade position, nor have I refined my skills in using Ghost Energy for combat..."

"As a Tier Three combat profession Ghost Hidden Blade, the experience required is significantly more than before. Even relying on cavalry to scour the Dead Silence Wilderness for Radiation Beasts in recent days only raised my level by two. It's too slow..."

Su Yu felt an itch in his hand, frustrated that such a powerful armor could only be used to punch air.

Just then, the Mechanical Spirit suddenly passed some footage—it was from the surveillance beacons it had set up in the Dead Silence Wilderness.

In the footage, a large army of tens of thousands was advancing with all kinds of vehicles, surging towards the Mechanical City.

"So many people, is it the development team from War City? They came quickly."

Seeing the massive crowd, Su Yu was slightly surprised, and soon deduced the origins of this group.

"Master, there's someone very special in this group!"

At this moment, the Mechanical Spirit manipulated the footage to highlight one person in the crowd.

"Special?"

Su Yu looked at the person and discovered it was a short-statured middle-aged man who didn't seem to be anything out of the ordinary.

"Master, this person's weight doesn't match his physique. From various indications, his weight is at least ten times heavier than it appears."

The Mechanical Spirit explained.

Its observational skills were extremely acute. Out of a development team of tens of thousands, it identified the anomaly of this middle-aged man from mere clues.

This is the powerful analytical ability of the Mechanical Spirit as a Data Life.

Although it wasn't an Extraordinary Life, possessing no Spiritual Energy, its various functionalities were not inferior at all, and perhaps even stronger.

"A cyborg? An implant?"

Su Yu conjectured, assuming that a discrepancy between weight and physique most likely meant extensive cybernetic adaptation, with a body full of metal, naturally making the weight considerable.

The density of a human body is similar to water, while steel is eight times denser than water, and other metals can have even higher densities.

The density of this person's body being ten times that of an average person suggested an extremely high level of modification.

"Master, I don't think this person is a cyborg. The metal detector on the surveillance beacon hasn't detected excessive metal in his body; he seems to be purely flesh and blood."

The Mechanical Spirit provided a counter-argument.

Chapter 319: Big Misunderstanding, Is War City Really Going to War?_2

At this moment, Su Yu was suddenly puzzled. If not a cyborg, how could he be so heavy?

Solely relying on flesh and blood, it actually has the density of metal?

"Wait, could this guy be a seven-star level Extraordinary of Physical Body?"

An inspiration flashed in Su Yu's mind, thinking of a possibility.

A seven-star Extraordinary of Physical Body has incredible body strength and is extremely resilient.

If deliberately controlled, it could compress the body's density to a level comparable to metal.

While thinking this, Su Yu tried to use Ghost Energy to compress his own body.

Crack! Crack!

Moments later, within the armor, Su Yu's body inexplicably shrank, reducing from adult size to that of a child!

At the seven-star level, Transcendents indeed have some inhuman traits.

"It really works!"

"However, I can only compress three or four times at most, yet this guy can compress his body tenfold? He's more powerful than me, but I just recently broke through, so it's understandable."

"In the whole War City, the only one with such ability is the Commander, Tie Long!"

Su Yu lifted the compression on his body, looking at the short middle-aged man in the footage, his expression excited.

"Such a strong Extraordinary of Physical Body, who else could it be but Tie Long?"

"I didn't expect he would compress his body and sneak over with the main troops, who knows what he's up to."

"What is he planning? Testing the waters? Or launching a sneak attack to start a war?"

"I'm just looking for a strong opponent to test the power of the armor, isn't this perfect..."

Su Yu's smile quickly faded, as Tie Long, being the Commander of War City, sneaking in with the development team, showed no good intentions no matter how you looked at it.

"If he wants to start a war, so be it."

Then let him come without return!

Just as well, the War Mechanic's ritual requires initiating and leading a victorious war involving thirty thousand people. If War City insists, let it become part of the ritual!

"Mechanical Spirit, deploy the cavalry to intercept these people, don't let them approach Mechanical City."

Su Yu commanded the Mechanical Spirit, as Mechanical City is the stronghold, and if there's a battle, it's better to keep it at a distance.

Simultaneously, he shared this information with Tie Xin, Yang Lie, Feng Tian... and others, as well as the residents of Mechanical City. Telling them that the previous alliance with War City might have been a trick, using the alliance to launch a large army to start a war, urging everyone to prepare.

The people of Mechanical City were startled upon hearing the news.

A war is really about to start? And a ten-thousand-strong army is coming?

Although the numbers are not as large as the previous one hundred thousand Ghost Demons, it's still significant, considering War City's large population, this ten-thousand army might just be the vanguard.

No wonder the manager pays so much attention and notified every one of them.

The people immediately tightened their grip on their weapons, ready for battle.

They also used information terminals to view the surveillance footage returned by the Mechanical Spirit to see what the so-called development team looked like.

But after seeing the development team's appearance, everyone was puzzled, this isn't right?

This development team, why is everyone dressed in tatters, with vehicles in disrepair everywhere.

It looks less like they're here to wage war, more like they're fleeing.

...

An hour later, a hundred miles from Mechanical City.

The development team from War City suddenly stopped because there appeared a cavalry regiment ahead of them.

This cavalry regiment, although only numbering a thousand, far fewer than the ten-thousand-strong army, exuded an incredibly fierce aura.

They gave off the feeling of not being cold machines, but experienced warriors with countless kills.

The members of the development team felt that if they dared to move forward, they would be mercilessly slaughtered by this mechanical regiment!

Intimidated by the cavalry's aura, the development team dared not advance further and had to stop.

These thousand cavalry were newly manufactured by Su Yu over the past two days, after all, with the chips recovered from the previous battlefield, production was quick.

Now, with their numbers in the thousands, there was an amplification through the Matrix Battle Group.

And they were recently enhanced by Su Yu using a Brutal Core, significantly boosting their strength again, coupled with the Mechanical Spirit's control, they were incredibly nimble and thus exuded an astonishing momentum.

The development team's previous feeling was no illusion, these thousand cavalry indeed had the strength to slaughter them!

"What are these things?"

"Such a terrifying feeling!"

The members of the development team, looking at those cavalry, were all on guard.

They promptly drew their weapons, loaded their bullets.

These people, ultimately being residents of War City, despite their tattered clothes and vehicles in disrepair, had excellent weapons, clearly well-maintained life-savers for them.

In an instant, these people transformed from a group of refugees into menacing warriors.

And Su Yu and the people of Mechanical City, through the images returned by the cavalry, immediately saw this change.

"As expected, they came with bad intentions!"

They felt that the development team's previous destitution was all an act, and now they finally stopped pretending.

The scene was full of tension, ready to erupt into conflict at any moment.

Hidden within the development team, Tie Long furrowed his brows tightly:

"How could this happen? Could it be that Su Yu is truly the Evil God, emotionally unstable, and can't hold back any longer?"

"These so-called cavalry, how strong! Indeed, they have the aura of Ghost Energy and are as nimble as living beings, not to be underestimated."

"Is it the Evil God's erosion, or the technology of the Ghost Empire?"

Tie Long pondered, feeling something wasn't right.

Chapter 320: Big Misunderstanding, Is War City Really Going to War?_3

He came this time just to secretly observe Su Yu.

When the time was right, he would reveal himself and spar with Su Yu to test his strength.

Who would have thought, they hadn't even reached the Mechanical City yet, and the enemy army rushed over. What's going on?

Could it be that Su Yu is truly the unstable Evil God?

At this moment, from within that group of cavalry, the leader stepped forward and spoke:

"Iron Dragon Commander, no need to hide anymore, show yourself."

"How could a commander of the War City hide his identity and sneak into my Mechanical City? Is he really harboring ill intent, wanting to start a war?"

"If that's the case, then let us battle!"

The tone was cold; it was Su Yu's voice.

Su Yu wasn't in a hurry to act. Slaughtering this development team was easy, but not very meaningful.

The key was to see what Iron Dragon, a seven-star powerhouse, intended.

So, Su Yu wanted to ask Iron Dragon what he meant.

Upon hearing this, Iron Dragon was shocked: "What? He actually discovered me?! When!"

"Not good, he thinks I hid my identity to launch a sneak attack and start a war!"

He also understood why Su Yu suddenly sent the cavalry legion to intercept.

This misunderstanding was huge!

"Haha, Mr. Su Yu has sharp eyes! To discern my disguise without even being on the scene!"

Thinking quickly, Iron Dragon laughed heartily and directly revealed himself.

Bang!

His body, released from a compressed state, transformed from a skinny man of about one and a half meters into a robust giant two meters and six.

His rapid body expansion made the air explode with a sound.

If not for the peculiar material of his clothes, he would have been running naked.

However, through the screen, Su Yu observed that Iron Dragon's size didn't seem to have expanded tenfold.

It appeared his body's density, even without compression, far exceeded that of an ordinary person. As expected of an old seven-star powerhouse, his body had completely mutated.

"Commander!"

The members of the development team were all startled when Iron Dragon suddenly appeared.

But Iron Dragon ignored them and stared at the cavalry unit:

"Mr. Su Yu, where are you now?"

"My War City did not intend to go to war with the Mechanical City. My intention was merely to express goodwill..."

"Since you've seen through my disguise, why not spar a bit, how about it?"

Iron Dragon thought quickly, since Su Yu already misunderstood, they might as well have a fight first.

"Test? Spar?"

"Iron Dragon Commander, hiding your identity and lurking among the development team can hardly be considered friendly."

Upon hearing this, Su Yu's expression grew colder, ready to give the order to slaughter that development team.

Iron Dragon's actions, regardless of the purpose, could not be called friendly.

Boom!

The thousand cavalry units seemed to be influenced by Su Yu's murderous intent, suddenly bursting with an extremely brutal aura, their strength increasing again.

They had all been enhanced by the Brutal Core, and such enhancement effects would be influenced by the emotion of brutality.

Now, with Su Yu's murderous intent, the concentration of brutality increased, and they sensed it immediately, synchronously boosting their power.

"Such fierce murderous intent..."

Iron Dragon's pupils shrank. He could not imagine how some Mechanical Creations could exude such insane brutality. How was it done?

Then he realized that the opponent intended to launch a massacre!

"Wait, Mr. Su Yu, I don't intend to start an all-out war, but to spar with you personally!"

Iron Dragon hurriedly said.

"Spar individually?"

Su Yu suppressed the murderous intent in his heart, pondered for a moment, and made a decision:

"Then let's go to the Radiation Land and settle this once and for all!"
