

## Infinite 321

Chapter 321: Breakthrough Kong Flight! Galaxy Warrior!

Su Yu chose the Radiation Land as the battlefield, considering that he primarily uses Ghost Energy in combat now.

If he were to use his full power, even if he won, he'd leave behind a lot of radiation, which might affect the Mechanical City, requiring efforts to purify afterwards.

Might as well make the battlefield the Radiation Land directly, since it's already full of Ghost Energy Radiation, a little more wouldn't make a difference.

Moreover, Su Yu had long wanted to explore the Radiation Land to find materials that can withstand high-level Ghost Energy to craft the Brutal Battle Armor.

Now it's perfect to handle both matters together, and after defeating Tie Long, he could explore the Radiation Land incidentally.

Also, choosing his own battlefield could prevent any secret schemes from Tie Long.

"Radiation Land? Seems like he really has connections with the Ghost Empire..."

"Tsk tsk, choosing the Radiation Land as the battlefield, he's trying to gain home advantage and has a deadly intent against me."

Tie Long pondered in his heart.

The cold killing intent in Su Yu's recent words made Tie Long realize that today's misunderstanding was not minor; Su Yu truly wanted a life-or-death showdown.

Tie Long, a dignified seven-star warrior, hiding his identity appeared somewhat insidious, which made Su Yu disgusted, reminding him of Li He earlier; hence, a killing intent arose.

Such an insidious seven-star warrior posed too great a threat, and he had to be eliminated.

Facing Su Yu's killing intent born out of misunderstanding, Tie Long was, on the contrary, very satisfied, indicating that this duel could be enjoyed to the fullest.

Anyway, Su Yu had just completed a ceremony and ascended to seven-star not long ago. No matter what home advantage he had, how strong could it be?

At worst, after the fight, he would explain the misunderstanding.

Tie Long never considered the possibility—what if he lost and was killed by Su Yu...

That was his overconfidence in his own strength.

Tie Long contemplated for a moment and agreed outright:

"Alright! It's settled, in the Radiation Land!"

After all, Tie Long was confident that with his strength, the Ghost Energy Radiation in the Radiation Land wouldn't affect him much.

Of course, the premise was not to go too deep.

After all, it was one of the three major forbidden zones, and if he went in too deep, even as a seven-star warrior, he might not return.

Thus, with just a few words, the battle between the two seven-star warriors was set.

Tie Long looked at the development team and casually said, "Wait here for me to return."

Then his massive figure vanished instantly, leaving only the deafening sonic boom.

He raced toward the Radiation Land at supersonic speed.

Meanwhile, in the Mechanical City, Su Yu gave a few instructions to everyone, then disappeared instantly.

Su Yu was not worried about anyone ambushing the Mechanical City after he left, as at this time, the Dead Silence Wilderness was full of Mechanical Spirit surveillance beacons. If there was any disturbance, the message would reach Su Yu immediately, and with his speed, he'd return quickly.

He didn't bring along cavalry or similar mechanical creations, after all, during the fight with Brute, all creations were scrapped.

The newly produced cavalry were only a thousand, useless for large engagements, and too slow; it would take some time to reach the Radiation Land.

With Su Yu and Tie Long gone, the people of the Mechanical City and the development team could only follow orders, quietly awaiting the outcome of the battle between the two warriors.

They were all tense and excited, yet somewhat regretful.

Such a battle, what a pity they couldn't witness it firsthand.

...

After leaving the city, Su Yu immediately unleashed the power of the Brutal Battle Armor, sprinting at full speed.

Previously, with the Azure Oath Battle Armor, he could already exceed supersonic speeds.

Now, donning the more powerful Brutal Battle Armor and having broken through to seven-star, his speed soared once more.

The faster the speed, the harder it is to increase.

The immense air resistance, the intense heat from friction, and the enormous energy consumption were all challenges.

But Su Yu sensed that, running at full force, he could at least increase his speed to three times the speed of sound!

At such speed, he was practically invincible; an ordinary seven-star warrior could only eat his dust.

However, such extreme speed could never be achieved by running on the ground.

So...

Su Yu soon discovered that under continuous acceleration, he actually flew up!

The rapid movement of his legs shattered the air, acting like the engine of a supersonic fighter, providing powerful thrust that freed him from gravity's pull, in an instant soaring hundreds of meters high.

Su Yu was surprised to find himself flying with just his legs, and suddenly lost balance, falling back to the ground.

Fortunately, he didn't fall over and remained in a running state.

Su Yu quickly focused, attempting flight again, but each time he hadn't gone far before losing balance and falling.

He quickly figured out the issue.

The design of the Brutal Battle Armor didn't conform to aerodynamics, and Su Yu's legs weren't jet engines.

Flying this way required precise calculations and strong balancing skills; otherwise, an unstable power burst would result in a fall.

Without experience, Su Yu fell after a short flight, like a novice learning to ride a bike, falling after a few meters.

Fortunately, Su Yu wasn't fighting alone.

"Nuonuo! Mechanical Spirit! Help me calculate!"

He called out while transmitting his flying sensations to them.

"Yes! Master!"

Two voices rang in Su Yu's mind simultaneously.

Nuonuo and the Mechanical Spirit's chips activated simultaneously, starting to calculate how to exert force to maintain balance in mid-air.

With the calculation assistance from Nuonuo and the Mechanical Spirit, it was as if Su Yu suddenly had two additional sophisticated brains, allowing him to quickly grasp the key elements.

"Now there'll definitely be no problem!"

The next moment, Su Yu soared into the sky, and this time, he didn't fall back down.

## Chapter 322: Breakthrough Kong Flight! Galaxy Warrior!\_2

The surging white airwaves cut through the sky, soaring straight into the clouds!

With the formidable power of his legs and armor, combined with the precise calculation of Nuonuo and the Mechanical Spirit, Su Yu really achieved a high-speed flight at triple the speed of sound!

"This is exhilarating!"

Flying a thousand meters high, Su Yu looked down at the Dead Silence Wilderness below and the Tie Long running wildly, feeling unprecedentedly free and unrestrained!

A veteran powerhouse like Tie Long, even with seven stars, could only run on the ground, yet he could fly in the sky!

However, Su Yu soon felt that the way his legs were paddling through the air was rather strange and awkward.

It didn't look like flying at all, but more like running in the air...

Luckily, Tie Long didn't look up, otherwise it would have been quite embarrassing.

"It seems that the Brutal Battle Armor will need a proper flying system in the future..."

Su Yu immediately decided that once he gathered enough materials, he would add flight capability to the Brutal Battle Armor.

Previously, with the Azure Oath, Su Yu had never delved into aircraft technology, hence no flight system was designed or installed.

The Azure Oath could leverage ground support to maintain sonic speed.

If a flying system was forcibly added, it would not only occupy valuable space in the armor but also reduce speed and agility, while consuming a lot of energy.

Now, with the Brutal Core providing Unlimited Energy, straightforward Powerful Brick Flying allowed high-speed flight without such issues.

Once the Brutal Battle Armor is fully perfected, Su Yu's speed is expected to increase again, with Unlimited Endurance, fearing no fall even after flying in the sky for a year!

By then, he could truly roam this planet at will.

Thinking of this, Su Yu became even more eager to go to the Radiation Land to find materials.

But as he flew, he looked up at the radiation clouds overhead, his expression darkened.

"Even at triple the speed of sound, it's still only flying within the atmosphere. Who knows when I'll be able to break through the blockade and reach outer space..."

This cloud has shrouded this planet for as long as can be remembered, keeping it in perpetual overcast, with the sun rarely seen.

Su Yu had the urge to fly up to see what was above the clouds.

But after some thought, he decided against it, to avoid courting death.

If he flew up, he might run into the powerful Mechanical Creations Zhang Chenfeng left behind and get bombarded to death unjustly.

"Speaking of which... since my rebirth, I've rarely seen any aircraft, except for Nuonuo's upgrade, which allows Spiritual Floating, but it doesn't seem very fast."

"Even flying Radiation Beasts are rare to see..."

"Logically, with the technology level of this era, it shouldn't be this way. They can create entire bodily implants, but not aircraft? Even a gyrocopter? This is overly one-sided, isn't it?"

"Could it be that the forces capable of producing aircraft all died out, leading to the loss of the technology?"

"Flying this fast now, am I being watched?"

At this moment, Su Yu suddenly realized something, and his heart went cold.

On this planet, flying seems to be very dangerous!

With this thought, Su Yu instinctively lowered his altitude slightly to avoid any divine light shooting down and blasting him.

Fortunately, after just ten or so minutes, he approached the edge of the Radiation Land, and he immediately descended into the Ghost Energy Fog of the Radiation Land.

"Luckily, nothing happened for now."

"In the future, unless necessary, it's better not to fly recklessly..."

Su Yu waited quietly for a moment before heaving a sigh of relief.

He turned his head to look around, pondering that it would take some time for Tie Long to arrive and decided to think about how the Ghost Hidden Blade should battle...

...

Half an hour later, the figure of Tie Long suddenly appeared at the outskirts of the Radiation Land.

His enormous figure surpassed the speed of sound, pulling a long white airwave behind him, an awe-inspiring sight.

The next moment, his racing figure suddenly stopped, going from sonic speed to standstill in a short time, demonstrating great control over his strength.

After stopping, he glanced around patiently waiting for ten minutes before shaking his head and smiling: "Still not here? A bit slow."

He considered his rushed journey as part of the sparring competition.

Now it seemed he had the upper hand in speed.

Starting from a place over a hundred kilometers ahead of Su Yu, he waited an additional ten minutes, yet Su Yu hadn't arrived, indicating his speed was indeed lacking, possibly not even reaching the speed of sound.

"Boring, let's check out the Radiation Land first."

Tie Long lazily decided not to wait any longer and stepped towards the Radiation Land.

However, as he neared the black radiation fog, he suddenly saw a black-clad figure standing quietly ahead, as if waiting for some time.

"You're late."

Su Yu's voice emanated from the armor.

"When did you?"

Tie Long could hardly believe it.

He had clearly been running with all his might, achieving top speed.

How did Su Yu manage to get ahead of him without making a sound? How was this possible!

Even if Su Yu was incredibly fast, there should have been a great commotion. How could he have silently overtaken him?

Tie Long had no idea that Su Yu had flown over from above.

"Could it be that he's been in the Radiation Land these past two days without moving at all?"

Tie Long quickly pondered this and soon thought he had discovered the truth, laughing confidently.

Su Yu didn't know what Tie Long was laughing at and coldly said, "Let's go!"

Then turned and walked into the Radiation Land.

Tie Long leisurely followed, secretly observing Su Yu while pondering:

"This armor he's wearing wasn't in Li Changfeng's report. It looks quite impressive, emanating strong Ghost Energy. Could it be a relic of the Ghost Empire?"

"But this armor seems to lack propulsion, just a shell? What's the point?"

"Yet it's understandable, typical power armor isn't much use to a seven-star powerhouse. The seven-star level power armor is too rare, long lost, so he could only fashion a shell..."

Tie Long sharply noticed that Su Yu's armor lacked propulsion, merely ordinary armor, causing Su Yu to move somewhat sluggishly, which was rather peculiar.

Tie Long's observation was correct; Su Yu had instructed Nuonuo to disable the Power System.

Now Su Yu used his body strength to drive the armor.

Su Yu deactivated the armor's power not out of idleness but to test if he could defeat Tie Long with his own ability as a third-tier Ghost Hidden Blade.

After taking on the Ghost Hidden Blade role, he had yet to have a proper battle since sealing the Brutal Evil God with a plan, and this was his chance.

Tie Long sought to spar with Su Yu, and Su Yu wanted to use Tie Long for practice and to gain some experience.

Of course, if truly overwhelmed, Su Yu would immediately summon Nuonuo to activate the power system, massively boosting his strength severalfold, surely capable of overpowering Tie Long...

Both men bore different thoughts as they silently proceeded deeper into the Radiation Land.

Unknowingly, they had penetrated ten kilometers into the Radiation Land.

The radiation fog here was already quite dense, and ordinary Transcendents without means of resistance would corrode away within moments.

For Su Yu and Tie Long, this level of radiation was naturally no issue.

At this moment, Su Yu halted, facing Tie Long with just two words: "Come on!"

Then he was about to activate his abilities.

"Wait!"

Tie Long suddenly spoke to stop him.

Su Yu frowned, wondering what this guy wanted to say.

"Before the battle, let me introduce myself..."

Tie Long suggested.

At this moment, his demeanor turned incredibly cold, as if all emotions had vanished, leaving only a frenzied combat instinct.

His muscles bulged, his two-meter-five stature inexplicably growing taller, resembling a humanoid Radiation Beast.

Drum-like heartbeats emanated from his chest, and upon closer listen, there were more than one heartbeat.

It seemed he had more than one heart.

"On this planet, reaching seven stars as a Transcendent entails a certain background."

"I ascended to seven stars because I inherited a trace of the Human Empire's relic from ten thousand years ago."

"I am the Transcendent Soldier of the Human Empire from ten thousand years ago... the Galaxy Warrior!"

Chapter 323: Battle! Mutation! Is Su Yu really the Ghost Emperor?

Su Yu heard the words, his expression sharpened, and he activated holographic perception.

[Tie Long]

[Type: Extraordinary of Physical Body, Human]

[Occupation: Galaxy Warrior]

[Introduction: Galaxy Warriors are mass-produced superhuman soldiers developed by the Human Empire during its starry sky conquest ten millennia ago. Through the transformation of a Spiritual Seed, they obtain powers and vitality far beyond ordinary humans.]

[Rank: Rookie]

[Power Evaluation: Seven-star Advanced!]

"Galaxy Warrior, mass-produced superhuman soldier, a rookie?"

"Is this really a rookie?"

Su Yu looked at the information on Tie Long, and instantly, many thoughts converged in his mind.

He had previously acquired the initiation round for a new member of a Giant God Soldiers regiment.

However, Su Yu never had a clear concept of what being a rookie meant.

Now I finally understand, Tie Long! A seven-star powerhouse, yet merely a rookie!

Although this Galaxy Warrior rookie, Tie Long, might not be equivalent to a rookie in the Giant God Soldiers regiment, the difference shouldn't be much.

If rookies are all seven-star Transcendents, what about veterans? Sergeants?

Moreover, isn't a ritual required for becoming a seven-star? How were Galaxy Warriors mass-produced, Spiritual Seed?

No, that's not right, during the era of the Human Empire, it was a period of Subspace tranquility, completing such rituals compared to that time wasn't difficult.

Zhang Chenfeng, this Apostle Mechanic, the most powerful individual on the planet, just how many stars does he have as a Transcendent?

"The Human Empire at that time was truly powerful..."

The more Su Yu thought about it, the more puzzled and alarmed he became.

At this moment, Tie Long continued, "I wonder what profession Mr. Su Yu has, could you divulge it?"

Hearing this, Su Yu returned to his senses and replied, "Ghost Hidden Blade."

He did not hide it, directly revealing his profession.

After all, he had many professions, revealing one or two wasn't something he feared.

"Ghost Hidden Blade, is that also a seven-star profession? Never heard of it, but this name, could it be from the Ghost Empire..."

"Forget it, I don't want to think about it, let's fight!"

Tie Long, upon hearing those words, muttered to himself a couple of sentences, then his eyes suddenly showed fervent battle intent.

Boom!

His heart thundered like an engine, and his immensely powerful legs suddenly stomped the ground, creating a large radial crater, the whole person disappearing instantly, appearing in front of Su Yu, throwing a punch!

The fist shot through the air, the explosion of air mixed with violent spiritual energy, rampantly assaulted Su Yu.

"So fast! So fierce!"

Su Yu was startled, Tie Long's instantaneous burst of speed likely reached twice the speed of sound! Moreover, the fist speed was several times faster than the moving speed, it was like a humanoid super mecha, ferocious beyond imagination.

With bare hands, he could unleash power surpassing heavy thermal weapons, that's what a Galaxy Warrior was!

Fortunately, Tie Long's fierce attack, although rapid, was still within Su Yu's reaction range.

Therefore, when Tie Long's fist was about to strike Su Yu, Su Yu's figure also vanished.

Su Yu's disappearance was not due to speed but rather from a sudden surge of vast black-green ghost energy covering his form.

This ghost energy was extraordinarily dense and spread faster than Tie Long's attack.

After all, Tie Long was a being of flesh and blood; how could he compete with speed against formless energy?

In no time, Su Yu's ghost energy enveloped a radius of a thousand meters, still continuously expanding.

Within a kilometer radius, it was pitch black, devoid of any light, filled only with intense high-level ghost energy.

This was the battle method Su Yu devised.

Ghost Hidden Blade, although a close-combat profession, as the name implies, wasn't one for direct confrontation.

It's skilled in stealth, surprise attacks, and assassination.

All tactics relied on the mastery of this high-level ghost energy skill.

Now, Su Yu was releasing a large amount of high-level ghost energy, creating his ghost energy domain, to fight!

Actually, Li He back then, after becoming a Ghost Demon, fought in this manner, but Su Yu was now vastly more powerful than Li He of the past, in a completely different league.

Within a kilometer blanketed by ghost energy, Su Yu immediately felt at ease.

Simultaneously, the impact from the ghost energy outburst also stalled Tie Long's attack momentarily.

Then, with a change of thought, Su Yu activated the mastery of ghost energy.

The surrounding ghost energy immediately oscillated, pushing his body to move unconcealed, dodging Tie Long's amazingly fierce punch!

This wasn't his personal movement but ghost energy pushing him to move, like a fish swimming with the current, without any sound of wind-breaking, soundless and stealthy.

Boom!

Tie Long's ferocious punch thus hit empty space, only causing minor ripples in the ghost energy, barely making any sound, as if the energy of that punch was absorbed by the ghost energy.

At the same time, the ghost energy was already enveloping Tie Long completely, seeping in and starting to corrode.

At this moment, Tie Long had lost his vision, everything around was dark, filled with endless ghost energy. His hearing was diminished to the extreme, only able to perceive faint sounds.

"Not good, this is high-level ghost energy!"

Tie Long cried inwardly.

With ordinary ghost energy radiation, he could easily fend it off, but with this high-concentration ghost energy, even he felt danger.

He quickly exerted his legs again, fiercely dashing in the direction he came from.

He knew such a ghost energy domain must have a range; with his speed, at most a dozen seconds should allow escape.

But after sprinting for half a minute, Tie Long was still within the domain's scope.

Because Su Yu had the Brutal Core, virtually limitless ghost energy, thus constantly expanding the ghost energy domain, along with Su Yu persistently moving with Tie Long.

Chapter 324: Battle! Mutation! Is Su Yu really the Ghost Emperor? \_2

No matter how hard Tie Long charged, he could not break through the perimeter.

He could only stop.

He was worried that if he continued to charge, he'd break out of the Radiation Land, which would mean escaping just at the start of the battle, quite a blow to his pride.

But if he didn't charge out, he'd lose his sight and hearing, and be corroded by endless Ghost Energy, leaving him vulnerable to attacks.

"Such a troublesome ability, clearly just beginning in the seven-star rank..."

Tie Long muttered to himself, but instead, his battle intent burned even brighter in his eyes.

Then he closed his eyes, both his ear canals shrank, sealing them off as well.

Also sealed were his nostrils, mouth, and even pores.

In an instant, Tie Long managed to completely seal his body, not revealing even a trace of breath.

The omnipresent Ghost Energy instantly lost its means of invasion, and the rate of corrosion drastically slowed, allowing Tie Long to endure longer within the Ghost Energy.

But in doing so, Tie Long could no longer breathe, holding his breath, but he didn't care at all.

As a Galaxy Warrior, the organs within his body were long different from ordinary humans.

Even as a rookie, he had the ability to survive for a short period in the cosmic vacuum, surviving without breathing.

At this moment, Tie Long sealed off his breathing and activated an alternative internal circulation system, temporarily, his strength not only did not weaken, but grew stronger!

"Come on, let me see your strength..."

Tie Long stood still, his abdomen trembled, and he spoke.

Although he wasn't afraid of the corrosion from Ghost Energy at the moment, he couldn't locate Su Yu's position and could only wait for Su Yu's attack.

As soon as he finished speaking, Tie Long felt a sharp pain in the back of his head.

A large hand, covered by battle armor, pierced from the back of his head and came out through his skull.

The hand gripped a gray-white brain, then violently crushed it!

Hidden Kill!

Su Yu, using the concealment of high-level Ghost Energy, quietly approached Tie Long and then launched Hidden Kill! Five times the attack power!

With one strike, he pierced through a skull several times harder than steel, extracting the brain!

A single shot to the head, a guaranteed kill!

Su Yu approached without Tie Long noticing at all!

Tie Long, this seven-star powerhouse, was instantly killed by Su Yu!

However, in a fleeting moment, Tie Long, with just half his head remaining, twisted his face into a menacing grin: "Got you!"

He twisted his body and grasped Su Yu's arm firmly with a big hand.

With his other hand clenched into a fist, he madly punched into the darkness, throwing hundreds of punches in a blink, each punch carrying the force akin to heavy artillery.

Bang! Bang! Bang! Bang! Bang!

Amidst the booming sounds, the dense surrounding Ghost Energy seemed about to scatter from the shock.

Tie Long, without a brain, seemed unaffected, his attack power even more fierce.

"Hahaha! That's more like it!"

"This is what fighting is all about! Real men should face off head-on, what's the point of hiding and sneaking around!"

Tie Long roared while he attacked, seemingly on cloud nine.

Su Yu, however, was secretly amazed:

"Does this guy have more than one heart and more than one brain?"

"Is this even human, is this a Galaxy Warrior?"

Su Yu finally realized that Tie Long only looked human-shaped, but was practically a monster, not even dying from a headshot.

Who knows where his other brain is hidden.

And even if he knew where the brain was, there was no longer an opportunity for a one-hit kill, especially now being caught and unable to break free, Hidden Kill on cooldown.

"Wanna fight, huh! I'll oblige you!"

Su Yu was grasped by Tie Long, tried to struggle briefly but found he couldn't break free.

So he ceased trying to escape, raising his fist to drive his power, confronting Tie Long head-on!

Seeing Su Yu deciding to fight him head-on, Tie Long laughed out loud and released Su Yu's hand.

Both unshackled, neither taking a step back, just seeing whose fists were harder, whose strength was stronger!

Thunderous explosions rang out manically, hard to believe that such noise could come from two individuals trading punches.

Their wild powers clashed crazily at close range!

Su Yu was startled to find that his power was not at all weaker than Tie Long's, even stronger!

Su Yu's many occupations melded together, while just entering the seven-star rank, the overlapping professions rendered his physical strength astonishing, even stronger than Tie Long's.

Yet such mad exchange of blows made Su Yu feel his organs shake, if not for the protection from Brutal Battle Armor, he might have already been gravely injured.

Of course, for him, even if gravely injured, recovery was swift.

However, Su Yu only has one brain, unlike Tie Long who could live even after a headshot.

But with the Brutal Battle Armor's protection, there's no way to be headshot, the worst is a concussion, which would heal swiftly.

So, Su Yu went all out, crashing into Tie Long with no reservations, who needs Ghost Hidden Blade? Stealth and assassination? Now he was the Ghost Berserker!

Tie Long was astounded to discover himself gradually being overpowered! Overpowered in strength!

"Weren't you just promoted to seven-star not long ago? How can you be so strong?"

Tie Long found it somewhat unacceptable.

Initially, Su Yu borrowed ability and speed, stealthily attacking was one thing.

Now in a head-on clash, as an old seven-star veteran who had ascended many years prior,

Getting overpowered by a newcomer like Su Yu in direct combat?

Which meant he was getting crushed by Su Yu in both speed and strength.

Su Yu also had the capability to wield Ghost Energy, capable of sneak assassination, comprehensive skills with no weaknesses.

This was too outrageous, was Su Yu really just promoted recently?

"Enough with the nonsense!"

"Die for me!"

Su Yu went berserk too, throwing wild punches, each attack laced with berserk power and high-level Ghost Energy corrosion.

Beating Tie Long until he was covered with wounds, exposing white bones, revealing various bizarre modified organs inside.

While Tie Long's attacks landed on the Brutal Battle Armor, though they produced cracks, the armor self-repaired, equivalent to wasted blows.

However, Tie Long was basically inhuman, his body almost turned to pulp by Su Yu, yet as soon as Su Yu's attacks slacked, he began to recover quickly.

Like this, who knows how long it'll take to beat him to death.

"Still suffering for just being newly employed..."

Su Yu secretly sighed in his heart, his Ghost Hidden Blade employment wasn't long, hadn't even leveled up, combat methods far from proficient.

In terms of attack, could only rely on Hidden Kill's bonus, and only usable once before going into cooldown.

If a blow fails, the follow-up is weak.

Though suppressing Tie Long, couldn't deliver a kill promptly.

If Tie Long knew of Su Yu's thoughts, he'd probably be furious.

He, just a recently promoted assassination professional, holding down Tie Long, a seasoned face-to-face professional for years, wasn't satisfied? Is there even justice?

"Forget it..."

After exchanging more blows with Tie Long, Su Yu sighed inwardly.

It seemed based solely on his capabilities, couldn't quickly kill Tie Long.

Might as well activate the battle armor's power system; he had no interest in tangling with Tie Long, whose endurance was astonishing, possibly fighting for days without dying.

But with the armor activated, strength magnifying several times, each blow would pack the force equivalent to Hidden Kill, enough to pound Tie Long into pulp.

Then see if he survives?

Yet before Su Yu could call on Nuonuo, he suddenly paused.

Because he discovered that his released Ghost Energy had seemingly reached a concentration threshold, causing a resonance and transformation with the Radiation Land's Ghost Energy!

After pondering briefly, Su Yu activated his ability, accelerating this transformation.

Boom!

The high-level Ghost Energy Su Yu released began to rotate suddenly, forming a vortex, absorbing massive amounts of Ghost Energy Radiation from the Radiation Land.

Simultaneously, they continuously auto-compressed, compressing towards Su Yu as the center.

In just a short time, the concentrated high-level Ghost Energy covering up to ten kilometers squared was compressed to within ten meters.

These extremely compressed Ghost Energies formed a tall, majestic, semi-transparent humanoid outside Su Yu's body.

This figure stood a hundred meters tall, entirely black, donned in pitch-black battle armor, with a pair of blood-red eyes emitting an aura of supreme aloofness.

Like a proud supreme Dark King, overlooking his subjects.

When this hundred-meter figure coalesced, Tie Long was thrown back from his frenzied assault.

All surrounding Ghost Energies were absorbed by that figure, restoring Tie Long's vision.

Tie Long, his head mostly regenerated by now, gazed astonished at the figure Su Yu had formed, exclaiming, "What's happening? What is this?"

"Could it be the Ghost Emperor is resurrected? Could Su Yu truly be the Ghost Emperor?"

Chapter 325: The Dark King, Revival of Ghost Energy, The Transcendent Union!

In Tie Long's perception, this colossal figure was unbelievably powerful! It far exceeded the level of seven stars.

And Su Yu himself was floating in the air right at the heart of this figure.

Su Yu was a bit dazed, not knowing why such an unexpected transformation occurred.

[You have gained 20,000 Professional Experience Points (Ghost Hidden Blade lv4)]

[You have gained 12,000 Professional Experience Points (Ghost Hidden Blade lv5)]

[You have gained...]

[Ghost Hidden Blade Level Up! High-level Ghost Energy Control Simultaneously Enhanced!]

The notifications on the Profession Panel kept refreshing.

Su Yu was startled to discover that his Ghost Hidden Blade had actually upgraded!

And in just a short period, it increased by a dozen levels, incredibly fast.

The third-tier profession was extremely difficult to upgrade.

These days, Su Yu often sent the Wolf Riders to the Dead Silence Wilderness to hunt Radiation Beasts to gain experience.

However, the more advanced Radiation Beasts in the Dead Silence Wilderness were almost hunted to extinction, leaving only one-star and two-star ones.

The experience gained after hunting was merely 3 points, 5 points, hardly making a dent, after days of efforts, not even gaining a single level.

Originally, Su Yu planned to explore the Radiation Land after dealing with Tie Long, incidentally searching for advanced Radiation Beasts to try hunting them.

Who would have thought that at this moment, for no apparent reason, he suddenly upgraded?

He quickly focused on sensing the ghost energy figure outside his body, trying to understand what was going on.

"The ghost energy figure outside my body seems to have life... It's very similar to the ghost energy in the Radiation Land, possessing some kind of activity."

"Is this the power of the upgraded Ghost Hidden Blade? Activated ghost energy?"

Su Yu quickly realized the clue.

He had long known that the ghost energy in the Radiation Land possessed some kind of activity.

Although Su Yu had reached seven stars, he still couldn't possess such activated ghost energy.

Su Yu always suspected that this activated ghost energy was the remnant high-level power of the Ghost Emperor that hadn't died.

Now, after a great battle in the Radiation Land, Su Yu released a massive amount of ghost energy, which resonated with the activated ghost energy in the Radiation Land and directly absorbed them.

This resulted in Su Yu's ghost energy also becoming activated, enhancing its essence, which is why the Ghost Hidden Blade upgraded.

It even coalesced into a giant figure resembling a hundred-meter tall king.

"Speaking of which, the Ghost Tribe previously used the ghost energy from the Radiation Land to transform the Ghost Wolf Riders."

Su Yu remembered what the Ghost Tribe had done in the Radiation Land before.

The people of the Ghost Tribe absorbed the activated ghost energy from the Radiation Land to create the Ghost Wolf Riders.

What Su Yu was doing now seemed very similar to what the Ghost Tribe had done.

However, the Ghost Tribe could only barely absorb the activated ghost energy by using the Ghost Emperor's bloodline.

Su Yu used the ability of high-level ghost energy control to forcefully resonate and absorb it, much more domineeringly.

Therefore, Su Yu did not turn into some Wolf Rider but instead coalesced a hundred-meter tall Dark King outside his body.

"This hundred-meter tall Dark King, could it be the Ghost Emperor?"

"Did my reckless actions somehow summon the Ghost Emperor here?"

Su Yu broke out in a cold sweat.

"Could this really be the Ghost Emperor?"

"Was the battle just now too intense, did I somehow beat him out of his past life?..."

Beside him, Tie Long broke out in a cold sweat too, murmuring aloud.

Bang!

Tie Long's voice seemed to have disturbed the hundred-meter tall Dark King, causing it to lower its proud, cold eyes.

The next moment, the Dark King's right hand seemed to move slightly, and before Tie Long could react, he was grasped by a massive hand.

The next moment, as the five fingers were about to close, Tie Long was nearly squashed into minced meat.

"I surrender! I surrender!"

"Don't kill me! It's a misunderstanding, all a misunderstanding! I just wanted to spar, not start a war..."

Tie Long quickly shouted.

He hadn't expected to be forced to the point of admitting defeat and begging for mercy.

He originally thought Su Yu was just a novice who had recently advanced, and a casual spar would pose no danger.

As a result, he was first sniped with a headshot, then crushed head-on, and now he was almost squeezed to death.

What kind of monster was this Su Yu?!

"Surrender?"

Upon hearing this, Su Yu's heart moved, and the hundred-meter Dark King around him immediately stopped its actions, without crushing Tie Long to death.

He breathed a sigh of relief, not worried about Tie Long's life, but glad that this Dark King still listened to him and hadn't rebelled.

If this Dark King didn't listen, Su Yu would have to wonder if the Ghost Emperor had indeed been resurrected, which would have been a huge problem.

Fortunately, nothing so frightening occurred.

Tie Long, seeing that he hadn't been crushed to death, also breathed a sigh of relief and quickly continued speaking:

"Mr. Su Yu, I previously hid my identity because I wanted to sneak into the Mechanical City to spar with you. My Deputy Corps Commander is too nagging. If he knew I wanted to spar with you, there would surely be a bunch of nonsense."

"I found him troublesome, so I hid my identity and snuck over, I didn't mean to ambush you!"

"The development team is really a development team, not an army."

"If I wanted to start a war, why would I only send ten thousand people and take the initiative to request a duel with you?"

Tie Long spoke rapidly, trying to immediately clear up the misunderstanding.

Hearing this, Su Yu immediately thought carefully, realizing that what Tie Long said might all be true.

Judging by his actions, he genuinely didn't seem like a sinister person, just a battle fanatic.

However, Su Yu didn't release Tie Long immediately and kept staring at him, making Tie Long feel uneasy.

After a while, Su Yu suddenly spoke: "You might not be that afraid of death, right? Do you still have a trump card?"

Su Yu keenly noticed that although Tie Long admitted defeat and frantically explained, there was still fighting intent surging in his eyes.
