

Infinite 326

Chapter 326: Dark King, Activating Ghost Energy, Transcendent Union!_2

If Su Yu insisted on killing him, then he would fight to the death.

"..."

Tie Long heard this, remained silent for a moment, and then said:

"As a Galaxy Warrior, a transcendent military class of the Empire's conquest of the Galaxy, naturally, it couldn't engage in battle bare-chested or empty-handed."

"I have powerful weapons and power armor, all hidden deep within my body. They are very damaged, so unless it's a critical moment, I don't want to use them."

Su Yu nodded upon hearing this, understanding.

That made sense. The transcendent military class of the Human Empire couldn't just be big fools only capable of using their fists.

They surely had advanced weapons and armor, with immense power.

However, I guessed they were just like the old administrator's prosthetic body back then, these armors and weapons were all badly damaged, and would be scrapped after only a few uses as Tie Long's final trump card.

So Tie Long was unwilling to use them unless Su Yu really intended to kill him.

"The power armor and weapons of a Galaxy Warrior are at least seven-star level, definitely very advanced and powerful."

"Since they're damaged, there might be an excuse for maintenance in the future to persuade them over, and perhaps comprehend a few legendary blueprints..."

Tie Long didn't know that Su Yu had already started plotting against his power armor and weapons.

While pondering, Su Yu let the hundred-meter Dark King release Tie Long.

At the same time, he tried to dispel this Dark King.

Moments later, the hundred-meter Dark King dissipated into the invisible, retransforming into Ghost Energy, merging into the surrounding air.

Seeing this Dark King dissipate, both Su Yu and Tie Long breathed a sigh of relief simultaneously.

The oppressive force of this thing was too strong, giving Su Yu the feeling that it was even stronger than the Brutal Evil God of before, almost taking out Tie Long with a single wave.

Even that Dark King, in Su Yu's perception, continued to get stronger, becoming rapidly more vivacious.

It seemed to be sensing some existences deep within the Radiation Land.

Su Yu worried that if this continued, it might actually revive the Ghost Emperor.

Fortunately, it obediently dissipated without causing any accidents.

However, Su Yu noticed that after the Dark King dissipated, the activated Ghost Energy did not return to Su Yu's body, but rather settled quietly around.

Su Yu guessed that he could only summon this Dark King here in the Radiation Land and not take it out, otherwise, wouldn't he be invincible?

Tie Long looked at Su Yu descending from mid-air, and tentatively asked, "Mr. Su Yu, are you really the reincarnation of the Ghost Emperor?"

Su Yu only replied with two words: "Heh heh."

Tie Long had a stomach full of words but had to hold them back.

But in his heart, he was wildly guessing. Looking at this attitude, Su Yu was likely nine out of ten actually the Ghost Emperor!

A strong person reborn from a thousand years ago, no wonder so formidable! Just promoted to seven stars, and almost killed him.

Su Yu was too lazy to explain, if Tie Long thought he was the Ghost Emperor, that was good.

Better to scare him into bowing down...

"Tsk, tsk, whether or not you're the Ghost Emperor, your strength, I admire!"

"Just newly promoted and already so powerful, truly a once-in-a-millennium genius."

"In the future, our War City and your Mechanical City will be firm allies, and there will be much exchange in the future..."

Tie Long clicked his tongue twice, giving Su Yu a thumbs up, his attitude very friendly.

Su Yu looked at him, finding that Tie Long was quite interesting.

He appeared outwardly to be a muscular, simple-minded brute, but actually, he was quite cunning.

He had just been heavily beaten by Su Yu, almost killed, and now he quickly cozied up, not embarrassed at all.

Seeing no reaction from Su Yu, Tie Long laughed awkwardly twice, then seemed to remember something, used both hands to tear, and actually opened up the wound on his stomach.

Then from inside his stomach, he pulled out a palm-sized metal token, intending to hand it to Su Yu.

It seemed he treated his belly as a storage space.

Otherwise, with his strength, once in battle, anything he carried could be damaged or lost.

Hiding it inside his body was foolproof unless he died and got his body searched.

Only because his recovery was so strong that he could afford to do this.

"This is..."

Su Yu looked at the bloody object, feeling a bit disgusted, and didn't take it.

Tie Long shook the token, flicking off the bloodstains, revealing mysterious patterns, then began to explain: "This is a Transcendent Association admission token!"

"Some seven-star Transcendents from the Ruins Star established this association together. It's located in a secret spot within Subspace. Seven-star Transcendents and above, if recognized, can use this token to enter with their consciousness. Everyone can communicate and exchange what they need."

"I've been a member of the Transcendent Association for a long time, eligible to recruit new members."

"Mr. Su Yu, with your strength, joining is more than sufficient."

"You take this token."

Upon hearing this, Su Yu finally accepted the token, sensed it, and found it indeed had a mysterious connection with Subspace.

"Well then, I'll accept it, thank you."

He nodded and put the token into his armor.

This Transcendent Association, which allowed communication with other seven-star powerhouses and exchanges, was very useful to Su Yu, so he didn't mind that the thing was a bit dirty.

After all, it was just blood-stained...

"Heh heh, no need for thanks."

"Let me explain this association to you in detail..."

Tie Long began cheerfully.

Moments later, Su Yu understood the origins of this Transcendent Association.

The Transcendent Association is a secret organization established by eight powerhouses above seven stars, with the initial founder being the president, boasting strength even at eight stars.

Upon reaching seven stars, one's strength far exceeds ordinary people, with their powers, longevity, vitality all undergoing earth-shattering changes.

Just like Tie Long, whose head could be exploded without dying, like a monster.

The entire Ruins Star had a harsh environment, but what could threaten them, aside from the three major forbidden areas, was only a few peers of the same level.

Due to their long lifespans, there were seldom disputes among Transcendents above seven stars, mostly cooperation.

That's why they formed this association, to discuss things when necessary, avoiding unnecessary fights.

After all, being able to live well, few had the mood to fight to the death; finding a way to the Star Sea was sensible.

Only Tie Long, this battle maniac, would idle away thinking of seeking fights, but there were too few seven-star powerhouses, so he hadn't had the chance for a long time.

That's why upon hearing about Su Yu's promotion to seven stars, he couldn't help but sneak out, almost getting killed as a result...

Association members gather weekly through Subspace, with the next meeting a day away.

"Mr. Su Yu, don't miss tomorrow's meeting."

"I've been an old member of the Transcendent Association, but unfortunately, other members don't like fighting. They don't really engage with me during gatherings, leaving me quite frustrated."

"Mr. Su Yu, during your recent fight, you were really fierce, totally my type; the next gathering will be lively."

Tie Long concluded with a summary.

Su Yu was speechless internally. Who would want to meet this guy's type?

However, he was secretly surprised.

An eight-star powerhouse and seven seven-star powerhouses, the strength of this association was truly astonishing.

Su Yu already knew that any seven-star powerhouse shouldn't be underestimated, each having a background and opportunities.

Just like Tie Long, who turned out to be a transcendent military class from the Empire ten thousand years ago, a Galaxy Warrior, with formidable strength and trump cards; if Su Yu didn't have even more trump cards, he really couldn't take him down.

For the others who were seven-star, and that eight-star person, who knew what their backgrounds were?

Thinking about this, Su Yu was actually a bit eager for tomorrow's meeting.

Su Yu thought for a moment, then said to Tie Long: "I'm going to explore here. Will you stay here or come along?"

This was his original plan after dealing with Tie Long—to explore the Radiation Land.

Now that Tie Long had been subdued, it was time to get down to business.

"Explore here?"

Tie Long's expression immediately turned eager upon hearing this.

Clearly, he was also very curious about this Radiation Land, only previously fearing the danger, not daring to go deeper.

But now, with the "Ghost Emperor" leading, what was there to fear?

However, after thinking for a moment, suddenly wounds burst on Tie Long, spurting a stream of blood.

His face changed, and he quickly shook his head:

"Forget it, I'll leave first, if I stay any longer, I'll be corroded to death by Ghost Energy!"

With that, he turned around swiftly and left.

Meanwhile, Su Yu gazed into the depths of the Radiation Land, lost in thought.

Chapter 327: Truly an Evil God Now? Gathering Believers, Upgrade Again! Search for Source Core Crystal!

After Tie Long left, Su Yu did not immediately take action but carefully sensed for a moment.

He discovered that he could sense Tie Long's location at this time.

Tie Long, having fought with Su Yu for a long time earlier, had his body stained with his Ghost Energy.

Now this Ghost Energy had evolved, possessing an activating trait, becoming some sort of marker.

Even from a distance, it could allow Su Yu to sense Tie Long's location.

Su Yu sensed that after Tie Long left the Radiation Land, he did not immediately depart but found an open area to sit and recover from injuries, seemingly waiting for Su Yu to come out.

Su Yu nodded and felt slightly relieved.

He was worried that Tie Long might not mean what he said, appearing enthusiastic while holding a grudge, and after leaving the Radiation Land, would destroy Mechanical City, which would be troublesome.

Fortunately, nothing of the sort happened, and Tie Long behaved quite honestly.

But Su Yu would not lower his guard. How long had he known Tie Long? They had just fought a battle, so there was no trust to speak of.

Once he confirmed that Tie Long would not attack Mechanical City, Su Yu set out to explore this Radiation Land, seeking Advanced Radiation Beasts and advanced materials.

The first place he planned to go was the Source Core Crystal mine cave that Yu Ping'an went to last time, a known material production site.

Last time Yu Ping'an went there, he almost lost his life and only brought back a piece of not-so-high-quality Source Core Crystal.

This time, Su Yu went there himself, prepared to explore the mine cave to see if he could find more advanced Source Core Crystals.

If successful, he could produce more advanced chips and assemble more advanced cavalry.

The strength of the mechanical troupe would also increase significantly.

He might even be able to upgrade the Brutal Core.

The current chips used in the Brutal Core were ten advanced chips.

Honestly, it was a bit strained.

It was just relying on the Mechanical Spirit's trait and the Flame of Truth to resist the Brutal corrosion, otherwise, it would have been scrapped long ago.

If Special Grade Chips were available, the performance of the Brutal Core would presumably improve.

As for Superior Level chips, they would be quite hard to come by due to the high-quality requirements on Source Core Crystals.

As for Legendary Level chips... that kind of thing is too high-end, and Su Yu did not dare hope to casually find them.

Su Yu activated the war armor, drastically increasing his speed.

Soon, he delved over two hundred kilometers into the Radiation Land, arriving beside the mine cave Yu Ping'an visited last time.

Last time Yu Ping'an came here, it took him three days, mainly because the road was fraught with large numbers of Radiation Beasts blocking the way, with danger at every step.

But with Su Yu's current strength, he just barreled through, and within just a dozen minutes, he had arrived, not even pushing half of his speed.

At this moment, some Radiation Beasts were gathered around the mine cave, and at a glance, Su Yu saw they were some three-star or four-star Radiation Beasts, numbering in the thousands.

Gathered together, their strength was considerable, but for Su Yu, it was nothing to worry about.

These Radiation Beasts had grotesque appearances, burying their heads in stones, seemingly living off the Source Core Crystal's accompanying ore.

Radiation Beasts are such beings; they can survive by eating stones.

So no matter how adverse the environment, they still appear like wild grass, constantly emerging, endlessly.

Earlier, Su Yu nearly wiped out the Radiation Beasts in the Dead Silence Wilderness to upgrade, but after a few months, they appeared in droves again.

While thinking, Su Yu stepped forward, walking up to those Radiation Beasts.

Roar!

Seeing Su Yu's arrival, those Radiation Beasts immediately showed strong hostility.

Su Yu's eyes turned cold, ready to attack and kill all these Radiation Beasts, turning them into his Professional Experience.

His Ghost Hidden Blade had undergone a previous upgrade, reaching level 26, significantly boosting his physical attributes and mastery of Ghost Energy.

If he reached max level and faced Tie Long again, Su Yu was confident he could completely crush him, leaving him defenseless, able only to take a beating.

But the Ghost Hidden Blade is a third-tier profession, having a total of 50 levels, with the experience bar only halfway. To reach max level, who knows how long it would take.

So seeing these Radiation Beasts, Su Yu viewed them as moving Experience Packs.

However, as he was about to make a move, he suddenly stopped.

For he noticed that from time to time, a wisp of black aura would rise from the Radiation Beasts, marking activated Ghost Energy, which likely belonged to the activated Ghost Energy of the Ghost Emperor!

The black aura rose from the Radiation Beasts, quickly merging into the air and disappearing, no one knew where it went.

Upon seeing this, Su Yu pondered for a moment, then suddenly quaked all over, his body exuding a large mass of black-green Ghost Energy.

The Ghost Energy enveloped Su Yu's body, morphing like a living entity into tentacle-like things, waving aggressively.

After the previous transformation, the Ghost Energy within Su Yu's body now possessed a trace of activity.

Covered by this activated Ghost Energy, Su Yu no longer appeared human on the surface, resembling a terrifying demon lord instead.

Roar!

Seeing Su Yu's sudden "transformation," those Radiation Beasts were all taken aback, turning to flee.

They had an instinctive fear of the activated Ghost Energy on Su Yu.

But there was no way Su Yu would allow them to get away.

The activated Ghost Energy outside Su Yu's body burst forth, hundreds and thousands of black-green tentacles shot out, piercing into the bodies of those Radiation Beasts, injecting Ghost Energy into them.

A moment later, the tentacles retracted, those Radiation Beasts remained in place, suddenly bowing respectfully toward Su Yu, as if devout believers had seen their master.

[You gained 2 points of Professional Experience, (Ghost Hidden Blade lv26)]

Chapter 328: Truly Became an Evil God? Gathering Believers, Upgrade Again! Searching for Source Core Crystal!_2

[You have gained 3 points of professional experience, (Ghost Hidden Blade lv26)]

[You have gained...]

The profession panel popped up a notification, showing that Su Yu's operation unexpectedly gained experience.

Although one Radiation Beast didn't provide much, the accumulation of hundreds and thousands was not insignificant.

The most crucial point was that those Radiation Beasts didn't die but became Su Yu's "Believers," continuously providing him with experience in a trickle.

"Could it be that this is the correct way to level up the Ghost Hidden Blade?"

Su Yu's heart instantly filled with joy.

Previously, whenever Su Yu leveled up his profession, it was always through fights and killing, with the profession panel immediately feeding back experience for rapid leveling up.

But ordinarily, Extraordinary Professions have their own methods of cultivation, like meditation and training.

How could slaying Radiation Beasts alone suffice to level up so conveniently?

Previously, Su Yu barely meditated at all, relying solely on battle and slaughter to level up swiftly.

Unfortunately, after taking the third-tier profession, the experience provided by low-tier Radiation Beasts was too little, inadequate for killing, and the pace of leveling slowed down.

He had to consider using a more "legitimate" method for leveling up.

However, how the Ghost Hidden Blade should normally upgrade was something Su Yu hadn't uncovered earlier, but now he finally understood.

It was about collecting "Believers" and having the Believers help him cultivate.

As long as he had enough Believers, he wouldn't need to do anything himself; the experience would grow automatically.

"Tsk, tsk, so in this light, the legitimate way to level up the Ghost Hidden Blade is quite shady, huh."

"It seems like Transcendents who master Ghost Energy all do this; I should've realized sooner."

Su Yu watched his ever-increasing experience bar with a smile on his face.

At the same time, he recalled Li He from before, as well as the Ghost Tribe.

Whether it was Li He or the Ghost Soul High Priest, it seemed that they all used "Believers" to collect power and enhance themselves.

Now that Su Yu had become the Ghost Hidden Blade, he could naturally use this method too; he just hadn't realized this layer earlier.

Moreover, Su Yu's methods were far more domineering.

Li He needed to swindle and deceive, establishing prestige among his subordinates in order to get feedback.

The Ghost Tribe High Priest, on the other hand, used overwhelming power to subdue the people of the Ghost Tribe, but eventually, things still went awry, with some strong ones unwilling to obey him.

However, Su Yu didn't need such troubles. He simply unleashed and activated Ghost Energy, instantly converting thousands into Believers.

"Doing it this way, I am almost like an Evil God."

"The Ghost Hidden Blade, on the path of Ghost Energy, is comparable to a Subspace Secondary Evil God; it's not an exaggeration."

Su Yu looked at the Radiation Beasts kneeling before him respectfully, feeling somewhat strange inside.

Has he become a cult leader just like that?

The Brutal Evil God had previously speculated that Su Yu was a Subspace Evil God in disguise with human skin. Now, it doesn't seem like an unfounded accusation.

Having become the Ghost Hidden Blade, Su Yu was hardly different from an Evil God.

Fortunately, he only collected Radiation Beasts as Believers and would not harm humans.

If not, he feared truly losing his humanity, becoming an Evil God similar to the Brutal one, which would be a lose-lose scenario.

"Thinking about it this way, the Ghost Emperor also uses similar methods, but in a more advanced and powerful way."

"This Radiation Land counts as his domain of Ghost Energy, where all Radiation Beasts become his Believers, providing him with power."

Su Yu once again thought of the Ghost Emperor.

Previously, Su Yu had unleashed Ghost Energy to form a domain and battled Tie Long.

However, this Radiation Land spanned at least a thousand square kilometers, possibly all within the Ghost Emperor's "Ghost Energy Domain."

By comparison, the gap between Su Yu and the Ghost Emperor was vast, and he had no idea what the Ghost Emperor's true level was.

However, the Ghost Emperor's condition seemed very poor, to the extent of losing control over activating Ghost Energy.

Therefore, the previously activated Ghost Energy allowed Su Yu to resonate and absorb some, leveling up and almost manifesting the Dark King's shadow, nearly crushing Tie Long.

Now that the Radiation Beast Believers were taken by Su Yu, the Ghost Emperor remained inactive.

Su Yu had an urge: should he manifest the Dark King's shadow again to absorb some of the Ghost Emperor's activated Ghost Energy? Perhaps the Ghost Hidden Blade could directly max out?

But he quickly shook his head.

"Better not court death..."

Su Yu feared absorbing too much, causing the Ghost Emperor to resurrect inside him; that would be disastrous.

Furthermore, excessive absorption of others' energy was ultimately inappropriate.

Better to develop one's own Believers.

Although these Believers are still taken from the Ghost Emperor... the detour provides a bit more safety.

As he pondered, he stepped forward, moving towards the mine cave.

The mine cave was winding, its depth unknown, and contained not just one cave but dozens of interconnected ones, resembling a labyrinth.

A massive number of Radiation Beasts lingered in the labyrinth-like mine caves.

Su Yu accepted them all, soon gaining thousands more Believers.

His Ghost Hidden Blade finally leveled up again, reaching level 27.

Simultaneously, in the mine cave, Su Yu discovered a fist-sized Source Core Crystal.

"This one's quality is decent, probably able to produce five advanced chips a day."

Holding the crystal, Su Yu nodded slightly and continued deeper.

After half an hour, he collected more than a dozen crystals, able to produce over a hundred advanced chips a day altogether.

But he was still not satisfied.

His goal this time was to find special-grade, even excellent-grade Source Core Crystals.

However, after searching thoroughly, Su Yu found that it seemed there were only so many Source Core Crystals left in these mine caves.

This puzzled him greatly; such extensive mines should have more contents even if mined for years, unless the Radiation Beasts had consumed them all.

"Wait, something's off..."

Su Yu focused, suddenly sensing something unusual.

He sensed that the level of activated Ghost Energy within the mine caves was significantly higher than outside.

He tensed, quickly exerted high-level Ghost Energy control, and sensed carefully, suddenly the previous feeling became clearer.

Su Yu felt that the activated Ghost Energy in the mine caves seemed to have a core deep within, and that thing was actually devouring the activated Ghost Energy.

"What is that thing?"

Su Yu was shocked; besides himself, what else could "shear the wool" off the Ghost Emperor?

He hurried over but sensed that thing immediately began to move, attempting to run.

"Does this thing fear me?"

Su Yu felt reassured, this thing didn't seem strong, at least weaker than himself.

He accelerated, rushing towards the direction of the sensation.

In just a few seconds, Su Yu traversed dozens of mining paths, finally encountering the peculiar entity.

"What is this thing..."

Su Yu saw a massive heap of Source Core Crystal ore, piled together, forming a creature resembling a Radiation Beast.

This creature was constantly inhaling and exhaling the surrounding activated Ghost Energy, enhancing its power.

Su Yu promptly engaged Holographic Perception.

[Source Core Crystal Beast]

[Type: Spiritual Mutant/Half-Intelligent Life]

[Description: High-quality Source Core Crystals, even without processing, inherently possess powerful computational ability. A great amount of high-quality Source Core Crystals, encountering a large amount of activated high-level Ghost Energy, has an extremely small chance of becoming an existence of half-Ghost Demon, half-intelligent life. Once mature, it can produce numerous Intelligent Crystal Beasts, triggering a terrifying beast tide, slaughtering mass humans to complete a ritual, obtaining real flesh and advancing to seven stars. Its core can be used to manufacture excellent-grade intelligent chips!]

[Power Assessment: Six-star top-level]

The attributes revealed by Holographic Perception this time were extremely detailed.

Su Yu had a feeling that he had just utilized the mysterious connection between activated Ghost Energy to directly "read" the information from the core of that thing, thus it was so comprehensive.

"How can it be this thing, it seems the Source Core Crystals in the mine have all been consumed by it..."

Seeing the attributes of this thing, Su Yu was taken aback.

A six-star top-level Radiation Beast with the qualification to challenge seven stars was truly rare.

Moreover, this thing was a monster formed by the combination of Source Core Crystals and activated Ghost Energy, turning into a half-Ghost Demon half-intelligent being.

Allowing it to ascend to seven stars, who knows what would happen.

However, for this thing to advance, it requires the killing of humans; Su Yu would not allow such an ascent.

Roar!

The Source Core Crystal Beast saw Su Yu approaching, realizing it couldn't escape, and roared loudly, charging at Su Yu.

Bam!

Su Yu casually punched it in its crystal-stone-like head.

Immediately, its head shattered all over the place...

This thing, although bizarre, looked rather ferocious.

But compared to Su Yu's power, the gap was too huge; how could six stars stand against seven stars? Moreover, Su Yu was not just any seven-star.

Seeing how weak this thing was, Su Yu smiled slightly, struck again, and with a punch shattered it completely, revealing a head-sized core.

Su Yu picked up the core, his expression excited: "This is its core? And it can manufacture excellent-grade chips?"

Chapter 329: Uprising in Radiation Land, Is the Ghost Emperor Truly Reviving? The Danger of Flight!
[Heart of the Source Core Crystal Beast]

[Quality: Superior Level]

[Function: Using it, superior-level intelligent chips can be produced.]

Looking at the core in his hand, Su Yu felt he was truly fortunate.

The intelligent chip has always been the biggest limitation in boosting the mechanical legion's strength.

A low-level chip can only produce two-star cavalry, mid-level is three-star, and high-level is four-star.

The high-level chip, four-star cavalry, is Su Yu's current limit.

He could only rely on various skill amplifications to continue boosting the mechanical legion's strength, but this was ultimately not a long-term solution.

But now, with this core, he can produce superior-level intelligent chips, which means he can directly mass-produce six-star units!

With the addition of various skill amplifications, the strength might even reach seven stars...

Mass-produced seven-star combat power?

The more Su Yu thought about it, the more excited he became.

Of course, to directly produce six-star units, the requirements for materials, energy, weapons... are extremely high, but with the key chip problem solved, the rest can be figured out slowly.

Boom!

Just as Su Yu was feeling happy, he seemed to vaguely hear a violent roar.

The surrounding activated ghost energy also started to go wild.

"What's happening!"

Su Yu was startled and quickly ran out of the mine.

Outside, he found the commotion even greater, with endless activated ghost energy converging into a vortex in the sky.

"What on earth is going on?"

Su Yu felt the Radiation Land was becoming rapidly dangerous.

He dared not linger and immediately sprinted with all his might towards the outside of the Radiation Land.

In just a few minutes, he had crossed over two hundred kilometers to the outside of the Radiation Land.

Looking back, the thousand-kilometer expanse of the Radiation Land was turbulent, as if coming alive.

It seemed as if an irritable monarch was unleashing thunderous fury.

Tie Long was waiting outside. Seeing Su Yu emerge with such a commotion, he also looked shocked and hurriedly asked:

"Mr. Su Yu, what did you do? Why is the Radiation Land suddenly in turmoil?"

Su Yu himself didn't even know what had happened, so how could he answer him? He just laughed it off with a couple of chuckles.

Tie Long's eyes flashed, and it wasn't clear what ideas his mind was conjuring.

Looking at Su Yu, his gaze became somewhat awed.

Perhaps Tie Long was imagining the set-up for the resurrection of the Ghost Emperor.

To cause such a large commotion in the Radiation Land, it might only be something like that.

Su Yu didn't bother to clarify, letting Tie Long think whatever he wanted.

"But... the Ghost Emperor's resurrection?"

Tie Long had given Su Yu an idea.

Looking at the Source Core Crystal Beast's heart in his hand, an inspiration suddenly struck Su Yu.

Could this thing really be the means for the Ghost Emperor's resurrection?

Otherwise, why would a bunch of ores suddenly come to life? What was the likelihood of such a low-probability event occurring so easily?

Remembering the earlier scene of the Source Core Crystal Beast ingesting and exhaling activated ghost energy, the more Su Yu thought, the more he felt it was possible.

Moreover, after Su Yu killed the Source Core Crystal Beast, Radiation Land immediately went into turmoil, further corroborating Su Yu's conjecture.

It's likely the Ghost Emperor's condition was too poor, possibly sealed in some way.

Therefore, he might have leaked some intentions, using such a peculiar method to resurrect with the body of the Source Core Crystal Beast.

But it was inadvertently disrupted by Su Yu, who punched the Source Core Crystal Beast to death, thus enraging the Ghost Emperor and causing the Radiation Land turmoil.

"Ha ha, Tie Long even thought I was the resurrected Ghost Emperor. Who could have guessed that I'm the one who thwarted his resurrection? That's a major grudge..."

This strange thought unavoidably sprang up in Su Yu's mind.

For this unbeknownst Ghost Emperor, Su Yu first stole his activated ghost energy, then his believers, and now ruined his resurrection.

What grudge is this?

However, Su Yu didn't regret sabotaging the Ghost Emperor's resurrection.

The Ghost Emperor isn't someone kind-hearted. From all accounts, he was a complete tyrant, with likely little humanity remaining.

The current desolation of the Ruins Star is largely due to the Ghost Emperor's "contributions."

The number of humans who died because of him is calculated in the billions.

Although, based on the information known, Su Yu understands that the Ghost Emperor might have backstabbed at the last moment, trapping the Brutal Evil God on this planet.

While the Ghost Emperor, this tyrant, was brutal, he was presumably on the human side.

But a tyrant is still a tyrant.

His resurrection method involved using the Source Core Crystal Beast, which required killing a large number of humans to upgrade to seven stars.

Clearly, to the Ghost Emperor, killing people for his resurrection plan was insignificant; he wouldn't care at all.

But Su Yu cared because he might be one of those killed by the Ghost Emperor.

If this Dark King revived, Su Yu would either submit or die; there probably wouldn't be a third option.

So, it's better for the Emperor of Ghosts to keep sleeping.

"It's just a pity that for now, I can't continue exploring the Radiation Land..."

Even though Su Yu didn't regret it, he felt a bit disappointed.

He had hoped to find some high-level materials in the Radiation Land to forge the Brutal Battle Armor and recruit advanced radiation beasts as believers.

Now it's all for naught. With the Radiation Land in this state, Su Yu dared not venture in for the time being.

Otherwise, who knows what eerie methods the half-dead Ghost Emperor might still have.

He might even view Su Yu's body as a perfect vessel for his resurrection...

Seeing Su Yu in deep thought, Tie Long's eyes glittered even more intensely.

Finally, he couldn't help but cautiously ask, "Mr. Su Yu, what are your plans for the future?"

Chapter 330: Uprising in Radiation Land, Is the Ghost Emperor Truly Reviving? The Danger of Flight!_2

"What plan?"

Upon hearing this, Su Yu looked at Tie Long strangely.

His own future plans were a very personal matter; why should he tell him? Tie Long's question was quite inappropriate.

But Su Yu quickly understood that Tie Long was not asking about Su Yu, but about the "Ghost Emperor"!

Tie Long was inquiring about what plans the Ghost Emperor had after his resurrection.

After all, the Ghost Emperor was a total tyrant; if he were to revive and repeat his past massacres,

Tie Long would have to consider how to eliminate this threat.

Despite Tie Long's cautious and polite tone, addressing Su Yu as "sir" respectfully,

If Su Yu truly posed a threat, he would probably fight desperately to kill Su Yu.

The frenzied look he had during the previous battle was still vivid in Su Yu's memory.

"Of course I have a plan."

"My plan is... to quickly enhance my power, break free from limitations, leave this planet, and enter the Star Sea!"

"This Ruins Star is too dilapidated; we shouldn't be stuck here forever."

Su Yu thought for a moment, then said seriously.

This was his genuine plan, so his tone was sincere, with no falsehood.

"Whew..."

Upon hearing this, Tie Long exhaled a long breath and laughed heartily:

"Haha, Su Yu, your words resonate deeply with me!"

"I can't stand staying on this broken Ruins Star for a moment longer! As a Galaxy Warrior, I have a lifespan of at least a thousand years; must I really spend all that time here? I can't stay!"

"Galaxy Warriors should roam the Galaxy!"

Tie Long seemed to be in a good mood, and he continued:

"Su Yu, if you have such goals, joining our Transcendent Alliance was the right decision!"

"Our Transcendent Alliance shares the same goals as you. With so many Seven-star Transcendents working together, we can certainly achieve this dream quickly!"

"At tomorrow's gathering, if you have any requests, just bring them up. Although getting help from other members requires a certain price, working together is far more effective than struggling alone."

Tie Long was very enthusiastic.

Clearly, with Su Yu's addition as the "Ghost Emperor," his confidence greatly increased.

No wonder he was eager to make connections with Su Yu, despite knowing the potential danger.

It was all for the goal of reaching the Galaxy.

"So, I might be able to find materials for making the Brutal Battle Armor at the gathering..."

Listening to this, Su Yu was intrigued.

With so many Seven-star powerhouses in the Transcendent Alliance, gathering some advanced materials shouldn't be difficult, right?

But... at what cost? What could he offer?

Su Yu started to contemplate, then shook his head at Tie Long:

"Heh, I advise you not to be too optimistic; the truth about this planet is not as simple as you think."

Su Yu's tone was mysterious, stopping halfway like a true mystic.

He realized he could provide something valuable: information, the truth about this planet's seal!

This kind of paramount secret was likely unknown even to the members of the Transcendent Alliance.

Otherwise, Tie Long wouldn't say something like "achieve this dream soon."

Thinking a few Seven-stars and Eight-stars could break the seal? What a dream!

"The truth?"

Upon hearing this, Tie Long got even more excited.

It seemed like this Ghost Emperor indeed knew a lot of secrets!

Bringing him into the Alliance was the right move!

At this moment, Tie Long was intensely curious but refrained from asking what the truth was.

He had to wait for tomorrow's gathering, where the Seven-stars would come together to see how they could trade for this paramount secret.

"I'm now looking forward to tomorrow's gathering even more."

Tie Long laughed.

"Me too. Let's go back."

Su Yu smiled.

Then the two of them stepped simultaneously, moving at supersonic speed towards the direction of the Mechanical City.

It was time to go back.

Seeing Su Yu's leisurely pace, it seemed that supersonic speed was hardly his limit.

Tie Long was curious, couldn't help but ask: "Su Yu, how did you get in front of me before? I didn't hear a sound."

"Were you actually waiting in the Radiation Land?"

Tie Long had wanted to ask this for a long time, and now he had the opportunity.

Su Yu glanced at him, chuckled, and pointed above his head.

"Above my head?"

Tie Long immediately looked up and saw a white trail in the sky, left by Su Yu's flight, yet to dissipate.

"Su Yu, you actually flew here?"

Tie Long realized and exclaimed in surprise.

Seeing this, Su Yu casually said: "I can fly, what's so strange about that."

Tie Long was silent for a moment before speaking: "This planet is too peculiar. Flying is extremely dangerous."

"In our Transcendent Alliance, we used to have not just eight members, but two others who died."

"One of them could control gravity. His power was so useful that he was recruited when he reached six stars. He soon underwent a ceremony to ascend, with the help of other members. At that time, he was fine, but the next day, he mysteriously died in his room, leaving nothing but a shadow on the floor."

"The other was an Extraordinary Mechanic researching flight to develop a spacecraft capable of reaching the Star Sea. His first low-altitude test flight was destroyed by a bolt of Heavenly Thunder from the clouds, killing him and scrapping the aircraft..."

"After that, no one dared to attempt flying easily again."

"Alas, our Transcendent Alliance talks about breaking free and entering the Star Sea, yet we don't even dare to build basic low-altitude aircraft, let alone spacecraft; it's somewhat laughable."

"Su Yu, when you say this planet's truth isn't simple, I believe you."

Tie Long's tone was somber; recalling these past events was clearly unpleasant.

Su Yu was also feeling a chill behind him.

It seemed he was lucky not to be struck dead during his flight!

Of course, it might also be that he flew too quickly, for too short a time, avoiding detection by some terrifying force.

If he flew around recklessly in the future, it could be dangerous.

Su Yu even considered whether to add a flying system to the Brutal Battle Armor; it was too risky.

But soon, he made up his mind: definitely add it!

He could refrain from using it, but he couldn't go without it!

Tie Long soon recovered from his earlier low mood, laughing heartily once more: "But maybe for someone like Su Yu, flying isn't much of a danger!"

"With Su Yu, our chances of success increase greatly!"

Tie Long's gaze towards Su Yu became even more fervent.

This "ancient monster" could fly and survive it!

Su Yu's importance increased again.

Subsequently, Tie Long more enthusiastically interacted with Su Yu, making Su Yu somewhat annoyed.

He couldn't care less about entertaining him.

Soon, they were back 100 kilometers from the Mechanical City.

The development team was still in a standoff with Su Yu's cavalry.

Even people from the Mechanical City had joined the standoff.

Everyone was anxiously awaiting the outcome of the battle between the two powerful Seven-stars.

Suddenly, the crowd saw wind and dust rising in the distance, as if a storm was approaching, but no sound reached them.

Looking closely, it was two figures approaching at supersonic speed, stopping near the crowd in just moments.

"They're here!"

Everyone grew even more tense; who had won this battle?

"Haha, Su Yu..."

Tie Long was tirelessly conversing with Su Yu before suddenly turning to the development team and the Mechanical City people, loudly proclaiming:

"In my sparring with Su Yu, I was narrowly defeated!"

"Su Yu's strength is astonishing; he's a rare genius in a millennium, and I truly admire him!"

He actually admitted his defeat directly.

After speaking, he turned to Su Yu with a smile: "Su Yu, right?"

Su Yu, somewhat helpless, nodded and then said: "Commander Tie Long indeed just wanted to spar with me, no malice."

"The alliance between the Mechanical City and War City continues."

Upon hearing these words, both the development team from War City and the people from the Mechanical City were stunned. Had Su Yu, who had just recently ascended, really won?

And most importantly, Tie Long seemed to be trying to flatter Su Yu?

Was he defeated so thoroughly?

What exactly happened?
