

Infinite 331

Chapter 331: Large Intelligent Chip Manufacturing Equipment, Superior Level Chip!

Though everyone was filled with doubts at this moment, no one dared to openly question Su Yu and Tie Long, these two seven-star big shots.

However, despite being shocked by the outcome of the battle, the people of Mechanical City felt a sense of "as expected."

It seemed as though Su Yu's ultimate victory was inevitable.

After all, ever since Su Yu rose to prominence, he had never lost in any battle, big or small. Even when the Evil God descended, he defeated it. So what was Tie Long in comparison?

Previously, the people of Mechanical City were worried that Tie Long, a veteran seven-star powerhouse, might be even stronger than the Brutal Evil God. Would Su Yu be unable to defeat him?

After all, seven-star powerhouses were too mysterious; no one knew what means they had.

Now, with the results of the great battle revealed, the people of Mechanical City realized they had been worrying unnecessarily.

On the other hand, the development team from War City was dumbfounded, unable to believe the reality before their eyes.

The Invincible Army Commander of War City, Tie Long, was actually defeated by Su Yu of Mechanical City, who had only recently emerged?

And Tie Long seemed to be ingratiating himself with Su Yu?

Wasn't this a dream?

Tie Long, as a Galaxy Warrior, had a long lifespan and had been a pillar of War City for over a hundred years.

All the members of War City grew up listening to his invincible legends.

Even though the development team members were peripheral figures in War City, they still held great respect and even admiration for Tie Long.

In their hearts, Tie Long was the symbol of invincibility, the lifelong goal they pursued.

Now, this invincible myth was actually defeated by a young man like Su Yu?

These people's hearts felt a sense of shattered dreams.

They couldn't understand why such a powerful person like Tie Long would willingly admit defeat and even try to please Su Yu. What about the commander's dignity?

Didn't he care about his reputation or have a competitive spirit? Was Su Yu really so strong that he subdued him?

The development team didn't understand that Tie Long truly didn't care about face.

Because he had lived for so long, longer than the original administrators of the past.

And his remaining lifespan was even longer, at least a thousand years.

Whether he would live for a thousand or two thousand more years, even Tie Long himself wasn't sure, but he would live a long life.

This inhuman lifespan made him indifferent to what so-called "face" meant to ordinary people.

After all, most of those ordinary people would be pretty much dead in a hundred years.

What did it matter how these people viewed him, Tie Long?

Only a few close individuals and seven-star powerhouses like Su Yu would matter to Tie Long.

The opinions of others were just passing smoke.

If not for the former City Lord of War City passing the heavy burden to him over a hundred years ago, Tie Long would not have bothered with these people. He would have long gone wandering everywhere, looking for strong warriors to spar with.

Usually, if there wasn't anything important, he would sometimes maintain the aura of a commander.

But at this moment, what mattered most to Tie Long was to please Su Yu, this "Ghost Emperor," and find a way to break free and step into the Galaxy.

Hence, Tie Long had behaved the way he did earlier, unexpectedly showing ingratiating behavior, shocking everyone.

While everyone was still in shock, Su Yu spoke again:

"Iron Dragon Commander, I'll be heading back first. See you at the gathering tomorrow."

Su Yu was about to return to Mechanical City.

"...See you at the gathering then."

Tie Long actually wanted to visit Mechanical City, but seeing no invitation from Su Yu, he could only reluctantly give up.

It seemed his earlier enthusiasm was all for nothing.

How could Su Yu possibly allow a seven-star powerhouse like Tie Long into Mechanical City? If Tie Long had malicious intent and suddenly attacked, within a few minutes, the entire Mechanical City would be dismantled by him.

At this point, Su Yu did not trust Tie Long enough to take the risk.

After bidding farewell, both returned to their respective places.

Leaving only the people from Mechanical City and the development team of War City staring at each other.

Finally, from Mechanical City, Yang Lie stepped forward and said, "Comrades from the alliance of War City, please follow our arrangements from now on..."

The cooperation project between Mechanical City and War City to develop the Dead Silence Wilderness was officially beginning.

Moreover, it was clear that Mechanical City had taken the lead role.

The development team of War City had to follow Yang Lie's arrangement.

In fact, the members of this development team were quite rebellious, or else they wouldn't have become peripheral figures of War City.

If earlier, Yang Lie had come out and said "follow our arrangement," these rebels would definitely have retorted:

"Who are you? Why should we listen to you? It should be your Mechanical City listening to us!"

Now, however, no one spoke up. After all, their idol, Commander Tie Long, had been subdued. Who would dare to resist?

...

As for Su Yu, he increased his speed and returned to Mechanical City within just a few minutes.

In fact, he could have been faster; if he activated three times the speed of sound, he would've arrived within a minute.

But now Su Yu understood the dangers of flying and didn't dare to act recklessly, traveling steadily at the speed of sound.

After returning to Mechanical City, he didn't rest a moment and immediately headed to the underground Mechanical Space.

Then he placed the Source Core Crystals and the core of the Source Core Crystal Beast he had just obtained from the Radiation Land onto the operating table!

"Mechanical Spirit, assist me!"

"Yes, Master!"

More than a dozen mechanical arms immediately extended out to surround Su Yu.

Su Yu simultaneously activated his abilities, materials, and metals of various kinds rising and falling around him.

After a full half day had passed.

A brand-new mechanical device appeared before Su Yu.

Chapter 332: Large Intelligent Chip Manufacturing Equipment, Superior Level Chip!_2

This equipment is quite large, with a volume of more than ten cubic meters.

[Large Intelligent Chip Manufacturing Equipment]

[Maker: Su Yu]

[Grade: Superior]

[Effect: Able to manufacture various intelligent chips, capable of operating continuously for 24 hours. Can produce 100 Advanced Intelligent Chips, 10 Special Grade Intelligent Chips, and 1 Superior Level Intelligent Chip per day!]

This is the result of Su Yu's half day of efforts.

He turned the harvest from the Radiation Land into this device.

"Not bad!"

Su Yu looked at this equipment, showing a look of happiness.

This chip equipment is much stronger than the previous one, capable of manufacturing three types of chips, with the lowest level being advanced.

The highest level is Superior!

Although it can only produce one Superior Level Chip per day, it is still extremely valuable.

To be honest, Su Yu has never seen what a Superior Level Chip looks like, not even a Special Grade Chip.

Once this equipment is put into production, Su Yu will be able to have a look.

Moreover, if Nuonuo is allowed to merge with this equipment, production will be doubled.

However, Su Yu did not use this equipment as the center to assemble a new Ranger production line.

Because he felt that it had been somewhat monotonous with just the Ranger class.

Moreover, the Ranger's blueprint is limited to Special Grade at most.

He needs more powerful and diverse classes!

But without a blueprint, he couldn't come up with what classes to create for the time being.

But it doesn't matter, tomorrow is the Transcendent gathering, and once there, exchanging ideas with those Seven-Star powerhouses might spark some inspiration.

If not, then he will bluff Tie Long into giving up his armor and weapons for research, which would definitely yield some gains.

However, Tie Long's armor is his lifeline, and he was almost killed by Su Yu earlier. Being persuaded won't be easy, and a long-term plan is needed.

...

Tie Long, meanwhile, soon returned to War City.

Upon returning to the city, he ignored Li Changfeng's "sullen" face and locked himself in his room.

Then he took out a token and began infusing it with Spiritual Power.

As a Seven-Star powerhouse, even if specializing in the physical aspect, Tie Long was extremely skilled in the use of Spiritual Power, even comparable to a Six-Star Spiritual Ability User.

Using Spiritual Equipment was naturally no problem for him.

Once the token was infused with Spiritual Power, it quickly emitted a faint glow.

Moments later, a voice emerged from the Subspace, entering his mind.

"What's the emergency? Why activate the emergency contact all of a sudden?"

"Let me say up front, don't bring up sparring, no time for that."

It turned out Tie Long had just activated the Transcendent Association's emergency contact to reach out to other members of the association.

"Something big has happened, I finally found hope of leaving this planet..."

Tie Long quickly said.

"...Haha."

"If it's nothing, I'll hang up now."

"Tie Long, don't tell us it's to spar with you, help you break through Nine-Star, and then break the blockade into the Galaxy."

Upon hearing Tie Long's words, the members chuckled, thinking Tie Long was talking nonsense, and immediately wanted to hang up.

They knew better than anyone what kind of person Tie Long was.

This guy had joined the Transcendent Association for over a hundred years, and what else did he do besides always wanting to brawl with them?

Can he conduct mechanical research? Or develop Spiritual abilities?

He's just a muscle brute...

"Don't be in such a hurry to hang up, listen to my explanation..."

Tie Long quickly relayed all kinds of information about Su Yu and his speculations.

Suddenly, the other members of the association fell silent.

After a while, a few irate voices roared:

"Such an important matter, why are you saying this now! You knew about Su Yu's existence long ago, why didn't you mention it at the last meeting?!"

"The Ghost Emperor, such an ancient monster, could indeed have a way to leave this planet, but the gathering is tomorrow, we simply don't have time to prepare!"

"Facing such an ancient monster, without proper preparation, we could all end up dead!"

"Tie Long, you idiot, over a hundred years, can you ever be reliable?!"

Everyone fiercely rebuked Tie Long for a long time.

Tie Long kept the token at a distance, seemingly worried about the spit spraying over from the other side.

After a while, he nonchalantly shrugged and said:

"I originally intended to test him a little, then share the results with you, and discuss whether to bring him into the association."

"But who knew we'd end up fighting as soon as we met. Turns out, fighting is the way to get to know each other. When the mood was right, I gave him the qualification token, so he could attend tomorrow's gathering. Don't blame me, if I weren't a bit friendlier, I might have been killed by him..."

"Rest assured, I find Mr. Su Yu to be very rational and calm. As a Galaxy Warrior, I have a very strong sense of life-and-death threats; tomorrow's gathering should be safe."

"Hehe, Mr. Su Yu also said that the secrets of this planet aren't that simple! He surely knows a lot of top-secret information! Tomorrow's gathering will sure yield big rewards!"

Tie Long confidently finished, followed by another bout of fierce rebukes:

"Your sense of danger is useless, just because you're safe, doesn't mean we are..."

Tie Long pouted, these guys were really timid.

Themselves fighting to death, brain bursting once, almost being pinched to death by Su Yu, only brought in such a heavyweight member, what more could they complain about?

Finally, a hoarse voice emerged: "Quiet everyone."

Immediately, all voices fell silent.

Tie Long also solemnly stood by and respectfully said: "President!"

It turned out that the owner of this hoarse voice was the President of the Transcendent Association, the only Eight-Star Transcendent!

It's extremely difficult for a Transcendent to break through after reaching Seven-Star.

Tie Long was Seven-Star over a hundred years ago, and still is Seven-Star now.

As for how to even break through to Eight-Star, he has no clue whatsoever.

He often wants to find people to spar with to explore breakthrough methods, trying to break through by fighting.

The other members are more or less the same.

And the President was able to break through to Eight-Star, earning great respect on this strength-based planet. Not to mention, the President is the founder of the Transcendent Association, with even higher status.

Furthermore, the President's ability and profession are also very special, extremely useful for breaking the seals and entering the Star Sea.

Hearing the President's speech, everyone quieted down.

Then, the President continued, "Tie Long, you did very well this time, great merit."

"However, if Mr. Su Yu is indeed the revived Ghost Emperor, it is exceedingly dangerous."

"Today, let's have a small meeting in advance to discuss countermeasures..."

...

Tie Long and the others had this small meeting for more than an hour.

Meanwhile, the newly created chip equipment by Su Yu had also been running for over an hour.

Thanks to Nuonuo's integration, the equipment produced over a dozen Advanced Chips in that one hour.

And... one Special Grade Chip!

"Is this the Special Grade Chip?"

Su Yu held the recently produced Special Grade Chip, observing it carefully.

It was his first time seeing a chip of this grade.

But this chip did not look significantly different from other chips.

So Su Yu thought for a moment and summoned an Advanced Ranger, which had just been produced from the adjacent production line.

Su Yu opened its core and loaded in the Special Grade Chip.

He then downloaded the clone of the Mechanical Spirit into the chip.

Buzz...

Soon, the Ranger began to transform.

Various metal parts on its body were vibrating.

The Mechanical Spirit was utilizing the Special Grade Chip's powerful computing power to optimize various actions of the body.

Su Yu noticed that the Ranger's movements were becoming increasingly fluid and perfect.

Like a seasoned veteran on the battlefield, with no superfluous actions and no energy wasted.

Only deadly precision and strength.

This was a feeling that no previous Ranger possessed.

Even previously, when Su Yu enhanced Rangers to Six-Star levels, they never felt like this.

This was the feeling brought on by powerful "computational power".

Precise, efficient.

[Intelligent Combat Machine-Ranger I]

[Maker: Su Yu]

[Grade: Special Grade]

[Trait: Cluster (When the number of similar combat machines exceeds ten, a Combat Swarm is formed, with a 20% increase in main brain computational power)]

[Equipment...]

[Comprehensive Strength Evaluation: Five-Star Intermediate]

Chapter 333: Entering Subspace! The True Power of Ghost Hidden Blade!

"Five stars now..."

Su Yu looked at the attributes of this Ranger and nodded.

With the computational power enhancement of the Special Grade Chip, the strength of this Ranger indeed upgraded by a star level.

Actually, in terms of materials and energy power, this Ranger hasn't improved at all.

What improved was the "computational power."

Every movement, every attack of the Ranger, results from chip calculations.

The stronger the computational power, the more accurate the calculations, thus enhancing combat effectiveness.

It's like the difference between an ordinary person and a seasoned warrior trained in fighting; their basic physical strengths are similar.

But their combat abilities are worlds apart.

The warrior can easily overpower the ordinary person.

Now, a Ranger equipped with a Special Grade Chip is like a master fighter emerging from an ordinary person.

Of course, if more rigid materials and stronger energy were used, its strength would be formidable even without a Special Grade Chip.

But where could one easily acquire such sturdy materials and potent energy?

In comparison, enhancing computational power is slightly simpler.

After all, a chip is just that small, and it requires minimal resources for production.

As long as there's chip manufacturing equipment, chips can be produced continuously to enhance the strength of Mechanical Creations.

However, Su Yu was still unsatisfied. A black-green beam suddenly shot out from the Brutal Core embedded in his battle armor's chest, illuminating this Special Grade Ranger.

Shortly, the Ranger transformed again, its body becoming more rigid, its dynamic core more robust, and it carried a hint of brutality.

Its strength improved by another level, reaching six-star intermediate!

Brutal Enhancement!

It's a "no-cost trade," elevating the combat capability of creations by a star level out of thin air without requiring any resources.

Only because Su Yu kidnapped a fragment of the Brutal Evil God's consciousness could he accomplish such a divine reversal.

"This way, the mass production of six-star combat power is achievable, at least ten units daily..."

Su Yu calculated in his mind, feeling elated.

Previously, he could only barely upgrade some creations to six stars with various skill enhancements.

But now, it's direct mass production.

Ten units a day, three hundred a month, and three thousand a year!

Combining with Nuonuo, the production would double!

Moreover, during battles, further skill amplification would cause these six-star Rangers to experience a significant power surge.

Even if a single unit can't match a seven-star powerhouse,

but with hundreds or thousands swarming, even a Tie Long could be overwhelmed and defeated.

Plus, these are just Special Grade units.

Su Yu also has Superior Level Chips which haven't been utilized yet.

However, the blueprint limit of the Ranger is Special Grade.

Even if the Superior Chips are produced immediately, they can only be used in Brutal Battle Armor. The mainframe of the Mechanical Spirit can also be upgraded in passing.

In short, with this major chip manufacturing equipment, the strength of Su Yu's mechanical battle group will rapidly surge, eventually surpassing himself!

This should be normal; as a Mechanic, the battle group's strength surpassing the mechanic's body is expected.

However, Su Yu is not only an Extraordinary Mechanic but also a Ghost Hidden Blade, a third-tier physical class.

Hence, his mechanical battle group is far from being as powerful as his own. Previously encountering Tie Long, he still needed to personally engage in hand-to-hand combat.

"Indeed, compared to one-on-one combat, I still prefer gang fights."

"Next time encountering a fellow like Tie Long, I won't need to take the field myself; let him witness the might of the mechanical battle group..."

Su Yu smiled as he looked at the equipment that continuously churned out chips.

...

Ten hours later, the first Superior Level Chip was finally produced.

Visually, the Superior Level Chip bears no apparent difference from a regular chip.

Su Yu tried installing it onto the Ranger but found it ineffective, no different from a Special Grade one.

Su Yu understood this is the Ranger's limit.

No matter how strong the computational power, how optimized the actions, the blueprint design's cap remains.

"Indeed, developing stronger units is necessary..."

Su Yu pondered for a moment and then stored the Superior Level Chip away for future use.

Over the next period, Su Yu didn't engage in more activities; instead, he slept.

Even a seven-star powerhouse can't withstand continuous exhaustion; rest remains necessary.

With his current physical strength, sleeping one or two hours randomly guarantees several days of vigorous energy.

If necessary, he could go months without sleep.

But that necessity wasn't present, so he opted to sleep briefly.

Su Yu found his bed and quickly fell into a deep slumber.

Then, he dreamt...

In the dream, he seemed to become a supreme emperor holding immense power, ruling an entire planet.

The dream version of him was very cold; if the subjects displeased him slightly, they were ruthlessly massacred.

Occasionally, some couldn't stand it and chose rebellion, but against his powerful personal prowess and loyal army, they were instantly suppressed.

Under his governance, the nation grew stronger, yet its population dwindled.

He didn't care at all, for he harbored a grand plan...

"Get out!"

While asleep, Su Yu suddenly heard a roar and awoke.

"What happened?"

Turning over, he awoke, momentarily dazed.

"Just now, in my dream, was I... the Ghost Emperor?"

Moments later, Su Yu realized what he had dreamt of.

"Truly lingering spirits; even sleep isn't undisturbed."

Su Yu felt somewhat speechless about being cursed during his slumber, wondering what he had done to deserve it.

Chapter 334: Entering Subspace! The True Power of Ghost Hidden Blade!_2

In fact, Su Yu already had a suspicion in his heart.

He absorbed the activated Ghost Energy of the Ghost Emperor and made a connection with the Ghost Emperor, which is why he dreamed of him and even read a part of his memory.

However, at the critical moment, the Ghost Emperor discovered him and expelled him.

The dignified Emperor of Ghosts had his memory read by a youngster like Su Yu from the future, no wonder he yelled in anger.

"So it seems, I'm the intruder?"

As Su Yu thought about it, he suddenly started laughing, his smile relaxed.

Originally, he absorbed the activated Ghost Energy of the Ghost Emperor, and although he upgraded, he was still a bit worried.

He worried that one day the Ghost Emperor might resurrect within him through the mysterious connection of Ghost Energy and seize control for rebirth.

That would be terrible.

But now, through the recent dream, Su Yu deduced that it might be the exact opposite; he himself was the intruder.

To think he could read the Ghost Emperor's memory in a dream.

Perhaps one day, after a nap, Su Yu could, through the mysterious connection of Ghost Energy, reverse the situation and seize the Ghost Emperor, truly becoming the Ghost Emperor.

This scenario would also be quite terrible.

But for Su Yu, it's obviously a better situation.

Of course, such a situation is unlikely, as the Ghost Emperor would have already taken precautions.

"This Hidden Blade profession seems very unusual, not only can it seal a fragment of the Brutal Evil God, but it can even influence the Ghost Emperor in reverse."

"Although neither of these states are optimal, the Hidden Blade profession is also quite extraordinary. Otherwise, it couldn't achieve such feats, especially since I'm just at the seven-star level."

It was at this moment Su Yu first realized that the Hidden Blade profession was absurdly strong in the Ghost Energy domain.

It's worthy of being the only stable accomplishment in the Ghost Energy field researched by the Human Empire back in the day, truly remarkable.

"By the way, how are my believers doing..."

Su Yu recalled the thousands of Radiation Beasts he turned into "believers" using the Hidden Blade's abilities in the Radiation Land earlier.

He quickly sensed them and, as expected, those believers were still there. It seems the Ghost Emperor hadn't noticed the anomaly of these Radiation Beasts.

In fact, Su Yu felt that his believers were still increasing!

Those Radiation Beasts seemed to be actively "infecting" other Radiation Beasts, "spreading the faith."

[You have gained 30 points of Professional Experience (Hidden Blade lv28)]

[You have gained 10 points of Professional Experience (Hidden Blade lv28)]

[You have gained...]

[Hidden Blade level has increased! High-level Ghost Energy Control has simultaneously improved!]

Thanks to the efforts of those Radiation Beasts, Su Yu's Hidden Blade had leveled up once again.

At this rate, he could max out his Hidden Blade in just a month.

By then, his High-level Ghost Energy Control skill would upgrade to Core Specialization, which might become incredibly strong.

And with the Hidden Blade maxed out, he could start preparing a way to complete the ceremony and ascend to War Mechanic!

Once achieved, he would possess two major third-tier professions, and might even unlock a third third-tier profession...

"Therefore, breaking free and leaving this planet depends on me."

"Tie Long pulling me into the Transcendent Union was truly the right move..."

Buzz...

Just as Su Yu was thinking this, a Spiritual Energy fluctuation suddenly came from beside him.

He turned to look and found it was the token given to him by Tie Long vibrating.

"Is the gathering about to begin?"

Su Yu immediately understood.

He had been back in the Mechanical City for over ten hours, and it was the second day.

It was time for the gathering to begin.

He picked up the token, observed it carefully, and then tentatively infused Ghost Energy into it.

Then he discovered that the structure within the token was very simple, with just two functions.

One function was a timer; when the time came, it emitted a slight Spiritual Energy fluctuation to remind the owner.

The other function recorded a coordinate along with some related knowledge.

However, Su Yu couldn't understand the coordinate.

He could only read the knowledge first and realized the coordinate was not in the real world, but in Subspace.

According to the recorded knowledge, Subspace is very chaotic and twisted. Without coordinates, randomly entering could easily lead to getting lost.

Conversely, with definite coordinates, one usually only needed a single thought to reach the destination, almost without requiring any time.

The coordinate recorded in the token was the location of the gathering.

Su Yu needed only to allocate a part of his Spirit, pass through the Subspace Gate, enter Subspace, and then recall the coordinate in his mind to instantly arrive at the gathering spot.

Meanwhile, the token also reminded Su Yu to never enter Subspace entirely with his whole Spirit. Otherwise, he might get lost and never return to his body, becoming a wandering ghost drifting in Subspace.

As for letting the body enter Subspace, that was absolutely forbidden; it was pure suicide.

"Truly interesting."

Su Yu thoroughly read through this knowledge, feeling enlightened.

Although he had already reached the seven-star level, opening a Subspace Gate within his body long ago, he had never entered because he knew too little about Subspace.

Most importantly, Su Yu's ascendance ceremony involved pummeling a fragment of the Subspace Evil God Brutality to success.

If he entered Subspace and encountered the full body of Brutality, it would be delivering himself to the door.

However, based on the knowledge contained in this token, Su Yu realized that Subspace is too distorted, entirely different from real space.

Even if it's the true body of the Brutal Evil God, without coordinates, it should not be able to find him.

In fact, this aligns with common sense. If the true body of the Brutal Evil God could easily find him, it would have used his internal Subspace Gate to descend long ago.

Previously, Su Yu was just too cautious and prudent, but there's no harm in being cautious.

Even with this newfound knowledge, Su Yu didn't rush into action; instead, he fell into deep thought.

"These pieces of knowledge, I don't know if they are real or fake. If there's deceit within them, entering Subspace could be dangerous."

"But if I don't enter, how can I verify the authenticity of this knowledge?"

"Moreover, if I wish to join the gathering, I have to go in."

"So then... let's try..."

After careful consideration, Su Yu decided to give it a try.

While cautious, he couldn't scare himself into inaction, creating a cocoon around himself.

After contemplating for a while, Su Yu suddenly released a large amount of Ghost Energy from his body.

This Ghost Energy floated in the air, forming a twisted human shape.

This was a conscious avatar Su Yu created by energizing a part of his Spirit with activated Ghost Energy.

This method was also recorded in the token.

While other seven-star powerhouses needed some time to master this skill,

Su Yu could quickly grasp it if he wished, as the Hidden Blade naturally excelled in this area.

Once this Spirit avatar appeared, it immediately lunged at Su Yu's body and vanished without a trace.

It had already entered Subspace through the Subspace Gate within Su Yu's body.

Upon entering Subspace, Su Yu's avatar immediately felt an infinite power surge toward it.

The power rapidly gathered, swiftly growing stronger around the avatar.

In a short time, this avatar became even stronger than his main body!

It seemed that he had another body more powerful than his real one in Subspace.

As soon as he entered, he took residence.

Before Su Yu could adapt to these changes, he suddenly keenly sensed a powerful, ancient, ferocious, brutal...

An endlessly terrifying will was dormant.

But due to his arrival, this terrifying will seemed to awaken slightly, about to cast its gaze toward him.

"I entered Subspace on the Ruins Star; naturally, it corresponds to the Subspace range of the Ruins Star."

"Zhang Chenfeng's seal obviously encompasses not just the Material Realm of the Ruins Star but also the Subspace corresponding to the Ruins Star."

So this will...

"Holy sh*t, could this be the true body of Brutality?"

Su Yu felt a chill all over.

The will felt terribly familiar, precisely the Brutal Evil God! But a thousand times more powerful than its previous fragment.

He had a premonition that if that awareness spotted him, he would undoubtedly suffer a fate worse than death.

"No, I can't let it see me!"

"Return to reality! No! It's too late, I need to hide, avoid being seen!"

At this moment, Su Yu had only one thought - to hide, avoid being seen.

Then, in the next second, Su Yu found to his surprise that, under the intense desire to evade, he seemed to have genuinely disappeared, hidden away.

The gaze of Brutality's true body swept past, but after only a moment's pause, it ignored Su Yu and returned to its slumber.

"So this is... the Ghost Hidden Blade?"

Chapter 335: Attending the Gathering, Ghost Energy Faceless Man, Su Yu Arrives!

At this moment, Su Yu finally truly understood what a Ghost "Hidden" Blade was.

It turns out that this profession can only truly exert its power in Subspace.

Under the gaze of the Brutal Evil God's true will, he actually became "invisible," making even the Brutal true body unable to detect him.

Although the Brutal true body also wasn't in optimal condition, the strength of the Ghost Hidden Blade was key.

"It seems my previous caution was correct; the moment I entered Subspace, Brutality immediately noticed."

"Probably because I fought with its avatar for too long earlier, picking up some of its aura and attracting attention."

"Fortunately, there's the special trait of the Ghost Hidden Blade."

Su Yu thought to himself with a sigh of relief, almost stepping into a trap.

One can't blame the Transcendent Union for not giving a warning.

Even Su Yu just learned about this internal situation, how would the Transcendent Union have known?

Moreover, Su Yu was destined to explore Subspace; this crisis was unavoidable, yet fortunately emerged from danger.

The Brutal Evil God true body likely only sensed a bit of abnormal aura, cast a casual glance, saw nothing, and no longer paid attention.

Su Yu suspected the Brutal true body didn't even recall battling him, otherwise it wouldn't have let it slide with a single glance.

After all, that Brutal avatar was sealed within the Brutal Core, possibly without transmitting the memory back to the true body.

"The Ghost Hidden Blade profession seems to excel at stealth and assassination..."

"Based on this performance, could it be specially used to assassinate Evil Gods?"

Su Yu couldn't help but mutter to himself.

He felt that using the Ghost Hidden Blade's abilities to fight with Tie Long, that brute, seemed somewhat "professionally mismatched".

Now in Subspace, under the gaze of the Brutal Evil God true body, this "profession" appears perfectly aligned...

The initial promotion ceremony for the Ghost Hidden Blade surprisingly required facing an Evil God head-on, battling, or even defeating it.

Such ceremony requirements were highly targeted.

The Empire's research into this profession back then seemed to be deeply motivated, likely designed specifically to counter Evil Gods.

The Ghost Emperor, this tyrant, seemed akin to Evil Gods, so also targeted by the Ghost Hidden Blade's abilities...

After sorting through these thoughts, Su Yu finally had the time to observe his surroundings and his own state.

Then he discovered... what on earth is this!

The landscape of Subspace was extremely abstract, filled with various distorted, chaotic images, colors, and lights, like the dream realm of a lunatic.

He couldn't see any normal scenery, let alone find direction.

Just one glance made Su Yu dizzy, and any ordinary person who came here might instantly fall into madness.

He looked down at himself, found he couldn't even discern what he looked like right now or understand his state.

But after a while, he found his consciousness slowly transforming, actually beginning to adapt to this environment.

Gradually, he could understand the images and lights around him, interpreting a wealth of information from them.

That information consisted of various emotions, thoughts, and even memories and knowledge.

These abstract entities merged together, coupled with some mysterious trait of Subspace, eventually turning into a wondrous energy...

Spiritual Energy!

"So this is Spiritual Energy."

Su Yu saw for the first time what Spiritual Energy was in a direct manner.

The thoughts, sentiments, memories, and knowledge of various beings fuse in Subspace, transforming into powerful energy that can affect the material world - Spiritual Energy!

Of course, what Su Yu saw was only the superficial aspect of Spiritual Energy in Subspace, a part of its essence.

Its true core essence must be even more mysterious and elusive, beyond what Su Yu could grasp now.

Su Yu looked down at himself again, discovering that in Subspace, he too was a mass of Spiritual Energy.

Seemingly indistinguishable from the surrounding Spiritual Energy.

No wonder when the Brutal Evil God's intent was focused on him earlier, it failed to notice - after all, he had already melded with the environment, inseparable.

"Is this my 'invisibility' state?"

Su Yu realized.

He then moved his intent, attempting to break this invisible state.

The next moment, his state changed instantly.

He transformed from a mass of ordinary Spiritual Energy into another kind of even darker, deeper, and more eerie power.

Ghost Energy!

His body in Subspace, naturally, was composed of Ghost Energy.

A large amount of high-level Ghost Energy formed a ghostly green silhouette within this bizarre Subspace.

This figure wore a long hooded robe, its face indistinct. Inside the robe, countless bizarre tentacles wriggled continuously, appearing nightmarishly eerie.

And looking at his own body, Su Yu felt boundless brutality, pain, madness, hatred, cruelty... such extreme emotions.

This is part of the essence of Ghost Energy.

This eerie energy seemed akin to Spiritual Energy.

But with emotions and intentions so extreme and ferocious, like the difference between normal people and madmen.

Additionally, because the emotions and intentions contained within were so wild, Ghost Energy was far more mysterious and aggressive than ordinary Spiritual Energy.

"Indeed, it is energy mastered by Evil Gods..."

Su Yu inwardly marveled.

The emotions and intentions embodied in Ghost Energy were excessively extreme.

Ordinary people simply couldn't touch it, lest they quickly succumb to its extreme emotions and become something neither human nor ghost, chaotic and ferocious.

Yet strangely, Su Yu wasn't affected at all and remained clear-headed and rational.
