

Infinite 341

Chapter 341: The Secret of Subspace and Spiritual Energy, Completion of the Brutal Battle Armor!

This Crystal Stone was condensed by Xiao Shengyin using Spiritual Energy and contains important information obtained by Su Yu through a transaction.

However, after coming to the real world, it is evaporating rapidly and is estimated to disappear within a few hours.

Therefore, Su Yu must read it immediately.

As for setting up the altar to receive materials, there's no rush, as others still need time to prepare materials.

"Let me see, what is the Subspace and Transcendent all about..."

Su Yu began reading.

This reading lasted a full half hour.

Given Su Yu's current speed of thought, this was a long time, indicating he was reading very carefully.

After half an hour, Su Yu exhaled a long breath, thoughtfully saying: "So that's how it is..."

"This is Subspace, and this is Spiritual Energy..."

The essence of Subspace is the spiritual Universe opposite to the Material Universe.

It and the material world are both part of the grand Universe, born together with the Big Bang, no separation between them.

The material world and Subspace influence each other.

The spatial coordinates of the material world are mapped in Subspace, but this mapping is very chaotic, not one-to-one, and the mapping relationship even changes constantly, unstable.

If one can grasp this chaotic mapping relationship, they can travel quickly through Subspace, crossing vast distances in a short time.

At the same time, the emotions, intentions, thoughts, memories, and even various actions and movements of living beings in the material world cast shadows and imprints in Subspace, affecting the environment in Subspace. However, these shadows and imprints are also constantly influenced by the Subspace environment, making them difficult to stabilize.

Spiritual Energy is the essential spirituality in Subspace, influenced and fused by the thoughts, intentions, emotions, etc., of living beings, finally forming a magical energy.

This Spiritual Energy can in turn leverage the Material Universe to create various miraculous changes.

Transcendents are those who, using their talents and the mysterious connection between the two Universes, draw Spiritual Energy from Subspace to affect the material world, creating various miraculous abilities.

Whether it's the Extraordinary of Physical Body or the one of Spiritual nature, in essence, they are the same, just different in manifestation.

Upon reaching seven-star, the advantage of Spiritual Transcendents over the Extraordinary of Physical Body will also become negligible.

After all, their essence is the same, and even the Extraordinary of Physical Body, after reaching seven-star, can use some Spiritual Abilities if they are willing to train.

To become a seven-star, one must satisfy the promotion ritual.

The essence of the promotion ritual is to leave one's own strong and indelible imprint in Subspace.

The ritual is merely a method to help Transcendents leave a solid imprint.

Once the imprint is left, a Transcendent lives half in the material world and half in Subspace.

The interaction between the material world and the spiritual world induces a qualitative change, greatly increasing power, lifespan, and spirit, living for thousands of years as normal.

If there are other methods to leave a Subspace Imprint, even without a ritual, one can ascend to seven-star.

For example, aside from the promotion ritual, one could resort to believing in an Evil God and, with the help of the Evil God, leave an imprint in Subspace.

This makes ascension much easier.

However, doing so binds one to the Evil God for life, only becoming a slave to the Evil God, with life and death under the Evil God's control...

This information seems not only to be summarized by Xiao Shengyin himself but also collected from various ancient sources through multiple channels.

Some sources of the information are even annotated, such as data gathered from a particular ruin's database.

Some of this information includes notes written by Xiao Shengyin, who seems to have some understanding difficulty regarding parts about the Evil God, hence drawing a few large question marks beside them.

But Su Yu understood this part immediately upon seeing it.

The Evil God, he was too familiar. There was one in the chest Energy Core of the Battle Armor.

Turns out Brutality can help people ascend to seven-star too?

Unfortunately, the Brutal Battle Armor didn't develop this function, and even if it did, Su Yu might not dare to use it.

"Speaking of which, isn't that how Nuonuo also ascended to seven-star..."

Su Yu recalled Nuonuo.

Nuonuo's method of breaking through to seven-star, in some respects, mirrors the method of believing in an Evil God.

It's just that Nuonuo "believes" in Su Yu himself.

In a sense, he's now not much different from an Evil God.

"So, I can actually help people ascend to seven-star myself?"

"Tsk, tsk, I feel quite powerful..."

Su Yu thought to himself a bit haughtily.

"The Subspace during the Empire's rule was a period of calm Subspace. Unlike now, where the Subspace is like a chaotic soup, imprints are easily obliterated, requiring them to be strong enough to maintain."

"I suppose during the Empire period, leaving an imprint in Subspace was much simpler, and completing the ritual was much easier. Therefore, during the Human Empire era, there were many Transcendents above seven-stars, they could even mass-produce various troops."

"I wonder how this mass production worked? Using machines to hold ceremonies in batches?"

Then, Su Yu thought back to the Human Empire ten thousand years ago.

The Empire's ability to mass-produce seven-star Transcendents, Su Yu roughly understood the principle.

"By the way, could those powerful Transcendents in the Empire, like Zhang Chenfeng, also help others ascend to seven-star like the Evil Gods?"

"However, if that's the case, the strength of the ascended strong would likely have an upper limit. And they would be subject to others."

"A true genius wouldn't use such methods..."

Chapter 342: The Secret of Subspace and Spiritual Energy, Completion of the Brutal Battle Armor!_2

Su Yu's thoughts extended infinitely, and within a short time, he had thought of many things.

The information left by Xiao Shengyin resolved many of his doubts.

Of course, Su Yu wouldn't completely trust this information and planned to verify it gradually in the future.

While Su Yu was deep in thought, the token from the Transcendent Union emitted a wave of Spiritual Energy.

It seemed that other members were already prepared with materials that could endure high-level Ghost Energy and were ready to deliver them to Su Yu.

Their efficiency was really fast.

Su Yu took a glance, picked up the token, activated his battle armor, and directly left the Mechanical City.

Then he ran hundreds of kilometers to the depths of the Dead Silence Wilderness.

He wouldn't conduct a Subspace Transmission ritual in the Mechanical City to prevent Xiao Shengyin from locating him.

It's possible that if relations soured one day, Xiao Shengyin could arrive at the Mechanical City with his seven members to attack.

Although the coordinate mapping between Subspace and the material world is very chaotic and changes frequently, Su Yu had to be cautious.

Su Yu believed that Xiao Shengyin was also wary of him, which was necessary prudence.

Anyway, with his speed, running a few hundred kilometers into the wilderness doesn't take much time and doesn't delay anything.

After arriving at this wilderness, Su Yu casually glanced and found a group of Radiation Beasts, numbering in the hundreds, all one-star or two-star.

He released a burst of Ghost Energy, and those Radiation Beasts immediately fell dead without any ability to struggle.

With his current strength, these one-star and two-star Radiation Beasts were like ants, easily wiped out.

In the center of these Radiation Beast corpses, Su Yu piled up stones into a small altar and poured Radiation Beast blood over it.

Then he placed the token on it, began infusing Spiritual Energy.

This action was equivalent to performing a small ritual.

Through the act of slaughtering Radiation Beasts, it created a temporary mark in Subspace, allowing Xiao Shengyin to use the token to lock onto the real coordinates here.

Actually, other methods could work too, like having the people in Mechanical City pray sincerely, which could also complete the ritual.

But Su Yu still found it more convenient to kill Radiation Beasts.

Shortly after Su Yu completed the ritual, a pitch-black void tore open above the altar.

Endless materials fell out from inside.

There were strong Radiation Beast shells, claws, and bones.

There were also various ores, metals, and even plants.

The quantity was vast, piling up into a small mountain.

Su Yu watched this scene and couldn't help but sigh, this Subspace Delivery was truly convenient.

It's just a pity he doesn't have this kind of ability.

But he has a Profession Panel, so he might have such power in the future.

Finally, when all materials had been transmitted, a booklet fell down, which described these materials.

Finally, Xiao Shengyin's voice came from the space hole: "Pleasure to cooperate!"

Then that black hole began to shrink and eventually disappeared without a trace.

And Su Yu also looked at the pile of materials, lost in thought.

He had been too hasty, never expecting there to be so much!

It seems the members of the Transcendent Union are all sincere people; these materials must weigh dozens of tons.

One should know that these materials aren't ordinary things.

Wherever they are found, there is high-level Ghost Energy, containing great danger. Ordinary Transcendents would die in such an environment within moments.

It's only because these seven-star strongmen lived for who knows how many years that they could collect so much.

Such a large amount of materials, Su Yu couldn't carry it alone.

He had the strength, but not hands large enough.

At this moment, Su Yu looked at the Radiation Beast corpses scattered around him and suddenly had an idea.

His Ghost Energy exploded once more, infiltrating those corpses.

In a moment, those corpses staggered and stood up.

He used high-level Ghost Energy to transform these corpses into Ghost Demons, to serve as laborers.

These Radiation Beasts were quite unlucky, having to work even after death...

Soon, with the help of these Ghost Demons, Su Yu transported all those materials back to the Mechanical City.

The people in the Mechanical City were astonished at the sight but dared not ask much.

In the underground Mechanical Space.

With the help of the Mechanical Spirit's arms, Su Yu sorted through those materials one by one.

"This metal has great conductivity to Ghost Energy, can be used for energy conduits."

"This bone can actually store Ghost Energy and then explosively release it? Not bad!"

"This shell actually becomes invisible in Ghost Energy, it seems the Brutal Battle Armor can also integrate a Stealth System..."

Su Yu experimented with the properties of those materials bit by bit and pondered in his mind how to use them to enhance the Brutal Battle Armor.

After a full day, Su Yu finally conceived a complete plan.

Power System: Mainly made from a mutated plant fiber called Dark Vine. This fiber is extremely tough and will contract violently after infusing Ghost Energy, generating immense power.

Defense System: Made using a type of ore called Seven-colored Ore. After infusing Ghost Energy, its surface shows no change, but when attacked or stimulated, it will erupt energy in the direction of the attack. This is attack-as-defense, a reactive armor!

Ranged Weapon System: Primarily made from the bones of a type of Radiation Beast called Bombarding Beast. These bones can store a large amount of Ghost Energy and then converge to explode with astonishing power and extremely long range.

Melee Weapon System: Made using a type of metal called Dark Demon Gold, which possesses astonishing conductivity with Ghost Energy. When infused with Ghost Energy, it becomes incredibly hard and vibrates at high speed, releasing a powerful cutting force.

Chapter 343: The Secret of Subspace and Spiritual Energy, The Completed Brutal Battle Armor!_3

Flying System: Manufactured using a mineral called Ghostly Energy Ore. Under the stimulation of high-level Ghost Energy, they eject large amounts of high-pressure gas, generating powerful propulsion. Moreover, the gas emitted has no radiation; otherwise, Su Yu really wouldn't dare to use it.

Of course, remaining Evil God's Bone is integrated into these systems to enhance their effects.

With these five major systems designed, the Brutal Battle Armor is basically complete.

Of course, there are also various other small systems.

For example, Fire Control System, Radar System, Communication System, Stealth System, Overload System, Burst System, etc...

Moreover, these systems all require strong data computing power to control them perfectly.

Fortunately, Su Yu now has a Superior Level chip, so computing power is not a concern.

Anyway, after working his brain to the point of overheating, Su Yu finally completed the various system designs.

Next comes manufacturing.

Su Yu shut out all distractions, focusing solely on crafting his battle armor.

After spending another entire day, finally, the completed Brutal Battle Armor was finished.

One day later, the slightly weary Su Yu looked at the brand-new Brutal Battle Armor in front of him, revealing a joyful smile:

[Mechanical Battle Armor·Brutality]

[Creator: Su Yu]

[Grade: Legendary]

[Trait 1: Brutal Defense (Entirely crafted from Seven-colored Ore and Evil God's Bone, providing powerful defense while launching brutal counterattacks on attackers! It can withstand attacks up to eight-star advanced and provide a stronger counterattack than the attack itself. Under eight-star advanced attacks, defense will be breached but will automatically recover. Recovery speed and counterattack intensity depend on the surrounding intensity of brutal emotions.)]

[Trait 2: Brutal Amplification (When wearing the Brutal Battle Armor, the user can exert their Physical Body Power in the most brutal state, significantly enhancing their strength, at least increasing by one star level.)]

[Trait 3: Unlimited Endurance (Through the Brutal Core at the chest, the endless energy provided allows the Brutal Battle Armor to fight indefinitely unless completely damaged.)]

[Trait 4: Supersonic Flight (With the powerful Flying System crafted from Ghostly Energy Ore, the Brutal Battle Armor can fly at up to thirteen times the speed of sound supersonically. It can even exit the atmosphere and enter outer space.)]

[Trait 5: Brutal Intelligence (The Brutal Battle Armor is equipped with three Superior Level Intelligent Chips and houses a Data Life Mechanical Spirit, endowing it with powerful intelligence. Even without

human control, it can fight on its own. When fighting on its own, it can exert at least a seven-star top-level strength.))

[Equipment:]

[Melee Weapon: Legendary Dark Demon Gold High-frequency Chain Blade·Brutal Evil God Bone Enhancement]

[Long-range Weapon: Heavy Explosive Ghost Energy Cannon·Brutal Evil God Bone Enhancement]

[Skills:]

[Ghost Energy Stealth: Consumes energy to enter stealth mode, can continue indefinitely but reduces energy output to other systems.]

[Overload Form: Overload the Brutal Core to output maximum energy, significantly increasing attack and defense power, lasting ten minutes.]

[Self-destructive Form: Completely overload the Brutal Core to launch an all-out attack, damaging the core in one strike. Cannot be used again until recovery.]

[Overall Combat Power Assessment: Base eight-star beginner, can reach eight-star advanced in overload state!]

[Overall Defense Power Assessment: Base eight-star intermediate, can reach eight-star advanced in overload state!]

Chapter 344: Explosive Increase in Strength! Massive Resource Development! Plans for the Future!

"The various attributes of the Brutal Battle Armor are extremely luxurious.

The basic attack and defense alone reach the eight-star level!

Even overload bursts can achieve eight-star advanced level.

If the self-destructive strike is triggered, it will be even stronger!"

Su Yu looked at the luxurious panel of the Brutal Battle Armor in front of him, muttering to himself.

You should know, on this Ruins Star, progressing further after reaching seven stars is extremely difficult.

Look at Tie Long, who has been stuck at seven stars for over a hundred years, still lingering at this level.

But if you have the opportunity to advance again, your strength will explode.

At that time, facing lower-ranked Transcendents is a complete crush.

The previous Transcendent Federation had seven seven-star Transcendents, plus an eight-star president, Xiao Shengyin.

Su Yu suspected that even if the seven members teamed up, they would likely still be unable to deal with Xiao Shengyin.

Eight stars, this is how terrifying it is.

Of course, Xiao Shengyin isn't a combat profession, may not be that strong, but is still extraordinary.

Earlier, Su Yu acted as a big shot at the gathering, baffling everyone, not out of boredom.

Using the Ghost Emperor's reputation, on one hand, to dominate the Subspace meeting, on the other hand, to guard against those people.

Mainly to guard against the eight-star Xiao Shengyin, wanting to deter him.

Fortunately, now that the Brutal Battle Armor is completed, Su Yu also has eight-star strength, feeling much more relaxed.

"This set of Brutal Battle Armor, designed with the Evil God's avatar as the core, naturally features more than just eight-star basic attack and defense."

"Various traits and skills are extremely powerful, almost heavenly. Unlimited energy, unlimited endurance, needn't be elaborated." Su Yu became more delighted the more he looked at the Brutal Battle Armor before him.

"Brutal Defense can counterattack the enemy's attacks with greater force.

If confronting attacks from a seven-star Transcendent like Tie Long again, I don't even need to act; Tie Long hitting the Brutal Battle Armor would reflect enough damage to kill him."

"And Brutal Amplification can enhance my strength by a star level, reaching eight stars. This is the physical type of eight-star strength! Completely able to dominate a Galaxy Warrior like Tie Long, also of the physical type! The enhancement to my combat power is a qualitative leap!"

"Moreover, the Flying System can achieve super high-speed flight at 13 times the speed of sound. At such speed, I could cover tens of thousands of kilometers in an hour, and if I let loose, I could orbit the planet in a few hours! Its mobility within the atmosphere is unparalleled."

However, given the current situation on Ruins Star, Su Yu didn't dare to fly recklessly, could only imagine temporarily.

This 13 times the speed of sound is only what the Profession Panel calculated, Su Yu had never actually test-flown it.

"But speaking of it, with the trait of unlimited energy of the Brutal Battle Armor, the power is endless. 13 times the speed of sound is not its limit, it can accelerate further." Su Yu thought about it.

"However, at such high speeds, the friction with the air creates such high temperatures. It's a burden both on the armor and myself, and even if it could achieve higher speed, it would lead to armor damage, which is somewhat not worth it, so it has to be limited to the 13 times speed of sound maximum."

"However, if in the future I break through the blockade and reach the cosmic vacuum, without air resistance and friction, as long as I can bear it, the Brutal Battle Armor can keep accelerating relying on unlimited energy."

Su Yu's gaze fell upon the last feature, Brutal Intelligence, which also greatly delighted Su Yu.

"This means this armor can act like an Intelligent Mechanic, capable of independent combat, equivalent to at least a top-level seven-star major helper."

If there's something I can't handle myself, I can totally let the armor fly off on its own to resolve it, after all, the armor is sealed, no one knows if there's someone inside.

There are also two weapons, several skills, which are also very powerful.

"Brutal Battle Armor!"

After seeing these attributes, Su Yu immediately called out.

"Yes! Master!"

The Brutal Battle Armor made a sound, then automatically flew up, opening at the chest, and fitted snugly onto Su Yu's body.

With three Superior Level chips, plus the presence of the Mechanical Spirit, putting it on is very convenient, it dressed itself on him.

Wearing the armor, Su Yu clenched his fist, instantly feeling the boundless power gripped in his hands.

If unleashed, within a short time, I could completely destroy the entire Mechanical City.

Not to mention, just by flying a lap in the city at 13 times the speed of sound, the terrifying shockwave generated would be a huge disaster.

"Nuonuo! Mechanical Fusion!"

Su Yu felt eager to try, and called out Nuonuo again!

"Yes! Master o(" ^▽^ ")o"

Nuonuo happily responded to her master's call, rushed over, and fused into the armor as well.

Immediately, the armor's power surged once more.

Su Yu estimated that in overload mode, it could at least reach the top level of eight stars!

If the self-destructive strike is launched again, combined with skills like Hidden Kill, what kind of power would that be? Nine stars?

Moreover, with Nuonuo's fusion, even if there was no one in the armor, letting the armor fight on its own also possesses eight-star strength.

An eight-star major helper!

"Heh, with this set of armor, perhaps even the combined forces of the Transcendent Federation are helpless against me."

Su Yu, whose strength had surged, thought with some self-satisfaction.

Even if the president seems very adept at escaping, Su Yu is now equally proficient, 13 times speed of sound in this Ruins Star, where Subspace is locked, the speed of Subspace Transmission may not even be faster than Su Yu.

But Su Yu only thought about it, he had no actual plans to fight, he wasn't crazy.

Chapter 345: Explosive Increase in Strength! Massive Resource Development! Plans for the Future! _2

"However... the Brutal Battle Armor is so strong. Back when I fought with the Brutal Evil God avatar, it seemed a bit weak. I could suppress it for a month even at six-star..."

"True, at the time it had just descended, hadn't gathered much power, and I kept seizing the opportunity to wear it down. It had no chance to increase its strength."

Su Yu recalled the month-long battle with the Brutal Evil God, feeling a mix of humor and relief.

It was funny that something so brutal was suppressed by him, who was only at six-star then, for a month.

He was relieved that if he had been a bit later, allowing the Brutal Evil God's power to reach eight stars, it would have been over. Su Yu wouldn't have stood a chance.

Luckily, that didn't happen...

"With the Brutal Battle Armor, my power has greatly increased, and now I can do many things..."

Su Yu didn't remain immersed in the joy of his power surge for long. He adjusted quickly and was ready to start a new plan.

His next step... is to explore the Ruins of the Giant God Soldier Army!

When he first awakened his Profession Panel, he received a new recruit disk from the Giant God Soldier Army, which pointed to their base.

Now, that base is certainly a ruin.

The Giant God Soldier Army was a powerful mecha battalion under Zhang Chenfeng's command.

The ruins must be buried with some of the advanced technology, creations, weapons, and mecha Zhang Chenfeng once used.

Su Yu believed that if he wanted to continue improving himself and break free from planetary restraints, he had to go there at least once.

As the saying goes, only the one who ties the knot can untie it.

To defeat Zhang Chenfeng's creations and escape the constraints, he had to find a way through Zhang Chenfeng's technology.

Previously, Su Yu lacked the strength and had never explored, knowing that the ruins must be extremely dangerous.

Who knows, there might still be active Giant God Soldier Mecha. Those things are undoubtedly extremely powerful. A few of them randomly are enough to give Su Yu a hard time.

Besides, there are probably other dangers. Without eight or nine stars of strength, Su Yu dared not go.

Now that he finally has the Brutal Battle Armor, this matter can be scheduled.

However, exploring the Ruins of the Giant God Soldier Army requires some preparation.

First, it's necessary to create a mechanical battalion. At least by then, he can have cannon fodder to scout the way.

"Once a squad of six-star units crafted with special grade cores is ready, I'll start exploring..."

Su Yu had a specific plan in mind.

In the following days, Su Yu had the teams from Mechanical City and War City cooperate in developing the resources of the Dead Silence Wilderness.

It must be said that the development teams from War City were really useful.

Ever since Su Yu defeated Tie Long, those guys became quite obedient, working tirelessly and without complaint. They admired strength the most, and with Su Yu so strong, they had no choice but to submit.

Moreover, they found that this obscure little Mechanical City, not only had a manager, Su Yu, whose strength was absurd,

but the living conditions for the residents seemed even better than War City!

Those convenient intelligent mechanics and the mouth-watering exchange catalogs.

And the incredibly delicious Radiation Beast Meat, purified by the Flame of Truth...

All made them reluctant to leave.

After a few days of working, the development team members started harboring a notion.

Since they were marginalized in War City, why not take the opportunity to become part of Mechanical City?

With such traitorous thoughts, they threw themselves into their work with great enthusiasm, hoping to catch the eye of Manager Su Yu.

Even the people of Mechanical City felt pressured.

Are those guys from War City working themselves to death?

Even the portion of resources that was supposed to go to War City was being skimmed considerably by these traitors.

And the various resources they collected were transported to Mechanical City, used to create the mechanical battalion.

Su Yu's power was growing day by day.

However, the resources of the entire Dead Silence Wilderness, though seemingly abundant given its vastness,

were also sparse because high-level resources were insufficient. After all, it's still a relatively barren place.

So, while everyone was busy developing the Dead Silence Wilderness, Su Yu set his sights on another place...

The Radiation Land!

Last time, in the Radiation Land, Su Yu killed the Source Core Crystal Beast, enraging the Ghost Emperor and causing a riot.

But after a few days, it had already returned to calm. After all, the Ghost Emperor couldn't stay enraged forever, his condition wasn't up to it.

So Su Yu once again extended his evil hand to this place...

Don't get me wrong, with Su Yu's caution, he wouldn't enter easily again.

He worried that the Ghost Emperor might be lurking inside, waiting for him.

But Su Yu had a solution.

Earlier in the Radiation Land, he "developed" a batch of Radiation Beasts as followers.

These followers not only provided him with experience but also proactively "preached," expanding the number of followers.

Now, Su Yu's followers in the Radiation Land numbered nearly ten thousand.

As the number of followers increased, his Ghost Hidden Blade Professional Experience kept improving, and his perception of the Radiation Land was growing daily.

Thus, across a distance, Su Yu used the connection between activated Ghost Energy and his followers to command those Radiation Beasts to develop resources in the Radiation Land! Then send them out!

The Radiation Beasts naturally feed on various resource minerals, making them particularly suitable for development.

These Radiation Beasts, turned followers, were more diligent than the development team from War City.

They were genuinely working as if their lives depended on it since their lives truly belonged to Su Yu.

Su Yu even considered having these Radiation Beasts willingly die in front of him to offer their body materials as resources.

Su Yu was startled by his own thought and couldn't help but exclaim, "I really am an evil man..."

He realized through his relationship with the Radiation Beasts what a miserable fate it would be to worship an Evil God.

At this moment, for those Radiation Beasts, Su Yu was the true Great Evil God, as evil as could be.

In the end, Su Yu didn't carry out this wicked plan.

Not because he had a change of heart or felt any pity for these Radiation Beast followers.

Radiation Beasts and humans are mortal enemies; there's no room for pity.

The main reason was that Su Yu's Ghost Hidden Blade wasn't maxed out yet, and these followers still had great use, so it was better to let them live a while longer.

As their development of the Radiation Land continued, more and more resources were being sent to Mechanical City, surpassing the previous amounts and of higher quality.

This put the War City development team under even greater pressure, prompting them to work even harder.

After noticing this change, Su Yu could only shake his head and sigh:

Why compete with the Radiation Beasts? Don't bother, you can't win.

The War City development team, no matter how hard they try, are still human in the end.

How can they compare to those relentless Radiation Beast followers?

As various resources were being developed, Su Yu's mechanical battalion gradually took shape.

There's no need to mention the three-star and four-star ones; their power is too weak and can only function as engineering machines for now.

As for the more powerful Five-Star Creations, they've already exceeded a thousand, and the six-star ones number over a hundred!

This was their power without any skill amplification, and with various skills, it would be even more terrifying.

Thanks to Nuonuo's help, he was getting at least 200 high-grade chips, 20 special grade chips, and 2 superior level chips per day, causing his strength to grow rapidly.

In just a few days, he expanded his mechanical battalion to this extent again.

In this way, he would soon begin exploring the Ruins of the Giant God Soldier Army.

However, as he looked at his growing power, Su Yu felt somewhat dissatisfied.

"These mechanical battalions are strong enough, but..."

"They take up too much space!"

In Mechanical Space, Su Yu looked at the gleaming battle mechanics, feeling a bit helpless.

These guys piled up, looked dense and endless.

If he took them along to explore the Giant God Soldier Army, the commotion would be too big, and the speed too slow.

Though Su Yu could move quickly with the Brutal Battle Armor, they couldn't.

"Is there any technology to compress and store them, to carry them in my pocket?"

Su Yu fell into deep thought.
