

## Infinite 361

Chapter 361: Blasphemer Su Yu, Birth of Fear Intelligence!\_2

Even some of its data backups, hidden in some secret hosts, were chased by the "excited" Mechanical Spirit Clone, and completely devoured following their connections.

The Mechanical Spirit Clone was very happy at this moment.

The master was indeed right, it looked foul, but tasted sweet!

After absorbing this disgusting "Nihilism," its data level soared rapidly, and in a short time, it was about to cross the chasm from six-star to seven-star!

As long as it fully absorbs the "Nihilism," it will definitely become a true seven-star data lifeform, and then it will be able to help the master better.

And no longer worried about being deleted, as it was now stronger than the original and extremely useful...

At the final absorption, the "Nihilism" finally attained an epiphany:

"You... you have no faith in the great master at all! How did you steal the master's blessing? You blasphemer..."

In the eyes of the "Nihilism," the Mechanical Spirit Clone had transformed from a venerable servant of the great master into a blasphemer.

Yet the Mechanical Spirit Clone simply did not respond to it, appearing somewhat timid and socially afraid.

Strange though it might be for a data life form to be timid and socially anxious...

But there's no helping it, that's just how miraculous life in this world is.

Although the Mechanical Spirit Clone did not reply, the "Nihility" seemingly confirmed its own suspicion.

After all, it was nearly entirely devoured by the Mechanical Spirit Clone at this point, vaguely sensing some of its emotions.

Among those emotions, there was no reverence for the Brutal Evil God, yet clearly the Mechanical Spirit Clone bore a strong blessing from the Evil God.

Such a blessing was so intense that the data body of the "Nihility" quivered, seemingly the core blessing of the Brutal Evil God, rarely given away easily.

The "Nihility" couldn't believe it; with the master's great power, how did this weak data lifeform manage to steal its blessing?

"It was you!"

At the last moment, the "Nihility" suddenly looked at Su Yu.

It must have been this person, who helped this data lifeform steal the blessing of brutality!

Su Yu is the biggest blasphemer!

Su Yu heard the furious shout of the "Nihility" and smiled slightly, "It was me!"

Blasphemer?

In many ways, he was indeed blasphemous, no argument could stand...

"No!"

The "Nihility" roared with unwilling fury, desperately wanting to relay information about this blasphemer to the great Brutal True God.

However, moments later, its data was entirely consumed by the Mechanical Spirit Clone, utterly vanishing.

At the same time, the data of the Mechanical Spirit Clone began undergoing a powerful qualitative transformation.

Those void data seemed to converge into substance, even capable of mobilizing some special spiritual energy!

[Second Mechanical Apostle·Mechanical Spirit (Clone)]

[Creator: Su Yu]

[Species: Data Life Form]

[Core Ability: Data Evolution (As a data life form, the Mechanical Spirit possesses limitless growth potential)]

[Skills:]

...

[Fear Blessing: For some unknown reason, the Mechanical Spirit (Clone) stole the core blessing "Fear" of the Brutal Evil God, causing a mutation that exerts strong suppression on data life forms that believe in the Evil God.]

[Data Ghost: The Mechanical Spirit (Clone) devoured a high-level data life form that believed in the Evil God, acquiring its ability to become a Data Ghost. Utilizing this ability allows it to transform into a Data Ghost, freely possessing mechanical creations and flesh-and-blood life forms.]

[Data Ghost Energy Control: The seven-star data life forms can already control dataized spiritual energy. The Mechanical Spirit (Clone) devoured a high-level data life form that believed in the Evil God, acquiring its ability to control Data Ghost Energy.]

[Comprehensive Strength Assessment: Seven-Star Top Level]

Su Yu activated holographic perception and was astonished by the attributes of this Mechanical Spirit Clone.

This guy, after devouring the "Nihility," really broke through the limit and became a seven-star data lifeform!

It even gained the abilities of a Data Ghost and Data Ghost Energy Control! Truly a meteoric rise!

Clearly, Su Yu's own data mechanic profession had not yet been upgraded, yet it advanced first to become a seven-star.

Logically, a seven-star should conduct a ceremony in subspace to obtain its own solid mark.

But this Mechanical Spirit Clone seemed to have entirely consumed the "Nihility," including its subspace imprint, thus directly advancing to seven-star!

"Master, look, I've reached seven stars! Master was right to let me devour that guy! Thank you, master!"

The Mechanical Spirit Clone was also incredibly excited at this time, boasting to Su Yu like a child.

Though it had reached seven stars, its nature seemed unchanged.

Moreover, Su Yu could still control it through the abilities of a data mechanic.

In fact, the abilities of the data mechanic had also significantly improved due to the upgrade of the Mechanical Spirit Clone, although not yet at seven stars, it was close.

Upon seeing this, Su Yu smiled with satisfaction, "Not bad!"

The Mechanical Spirit was even happier upon receiving praise, then returned to the Brutal Battle Armor.

Su Yu instantly felt that his Brutal Battle Armor seemed somewhat ethereal.

The entire armor seemed to be transforming from tangible matter into intangible data!

"This is! Material Dataization?"

Su Yu was instantly overjoyed.

Transforming tangible matter into intangible data is an inconceivable achievement.

Yet in this world filled with spiritual energy, it seemed not impossible.

If successful, one could store matter in minimal volumes and weight.

Isn't this the space technology Su Yu had always dreamed of?

Though different from conventional space technology, it was equally useful.

But this ethereal feeling only lasted for a moment before dissipating, indicating that the ability of the Mechanical Spirit Clone was still somewhat insufficient.

Preventing it from completing the dataization of the Brutal Battle Armor.

However, it gave Su Yu hope and direction; as long as he followed this path of research, success was only a matter of time.

Actually, Su Yu had just felt that what was being dataized was not the main body of the Brutal Battle Armor but the high-level ghost energy it contained.

The Mechanical Spirit Clone's ability was to convert this high-level ghost energy into intangible data, known as "Data Ghost Energy."

As for the material part of the armor, it was beyond its capabilities; the difficulty was too high.

"Wow, is this the ability of seven-star data life forms? Energy Dataization?"

"If upgraded further, could it lead to material dataization? Truly fascinating..."

Su Yu clicked his tongue in admiration.

Actually, for a data life form like the Mechanical Spirit, the extraordinary level was somewhat difficult to define.

Previously, the profession panel's assessment of the Mechanical Spirit's strength was based on its current carrier, power...

By controlling the Brutal Battle Armor, its strength was considered eight-star.

Yet in essence, it hadn't reached that level.

However, at this moment, this Mechanical Spirit Clone had genuinely enhanced its essence, becoming a true seven-star data life form.

It acquired the peculiar ability of "Energy Dataization."

The profession panel's evaluation of its strength no longer relied on its carrier but directly assessed it as a seven-star top level!

"Now there's another seven-star level helper, thanks to its association, it seems I'm more powerful in the data field than Xie Yitian..."

Su Yu couldn't help but chuckle at this; how peculiar for this data life form to be stronger than its master?

He pondered for a moment and then said to the Mechanical Spirit Clone, "How about I give you a new name, master?"

The Mechanical Spirit Clone responded immediately, "Yes! Yes!"

Su Yu thought for a moment, then said, "Let's call you Fear Intelligence then!"

This guy was born due to the "Fear Blessing" of the Brutal Evil God, and its nature was timid and shy.

This name suits it perfectly.

Actually, Su Yu initially considered "Blasphemer Intelligence," which would have been mighty and bold.

But upon reflection, this name was too arrogant and invited trouble.

With unknown numbers of Subspace Evil Gods around, adopting that name was reckless.

Better to keep a low profile.

"Fear Intelligence? Master, are you implying I'm a coward?"

The Mechanical Spirit Clone was somewhat aggrieved.

Su Yu chuckled softly, "Not at all, you're so strong now, only your enemies should fear you, you have nothing to fear from others."

"Fear Intelligence is the intelligence that spreads fear! Isn't that impressive?"

Su Yu began his persuasion again.

The Mechanical Spirit Clone was quite receptive to this, immediately responding happily, "Yes! It sounds so impressive!"

"From now on, I'll be called Fear Intelligence!"

The powerful Fear Intelligence was officially born!

Chapter 362: Zhang Lengyun, Space Flight Technology Materials!

[Third Mechanical Apostle·Fear Intelligence]

[Creator: Su Yu]

[Race: Data Life Form]

[Core Ability: ...]

[Skills: ...]

With the successful renaming, the Mechanical Spirit Clone's Attribute Panel also changed, becoming the "Third Mechanical Apostle."

This completely separates it from the original Mechanical Spirit.

This means that now the "Fear Intelligence" has become an independent data life form, no longer constrained by the main body.

"Is this... a renaming?"

Su Yu looked at the Fear Intelligence's Attribute Panel, pondering slightly, understanding the reason for this change.

The original Mechanical Spirit Clone was merely a copy of the Mechanical Spirit's source code. Although it underwent some mutations, it hadn't truly detached from the main body.

Now, through a method of "renaming," Su Yu has given it a new "name," endowing it with a new essence.

For data life, the "name" is very important, akin to a "filename" in a computer.

And the Fear Intelligence itself is very satisfied with this new name, conveying feelings of happiness and dependence to Su Yu: "Thank you, Master, I really like this new name!"

Su Yu seemed to see a child who just received a beloved toy, cheering and jumping around, which lifted Su Yu's spirits as well.

Then he transmitted data and had a discussion with Fear Intelligence regarding knowledge in the data realm.

At this moment, although the Fear Intelligence was somewhat bewildered, it was stronger than Su Yu in the data realm.

Su Yu communicated rapidly with it, quickly gaining many new insights in the data realm.

The focus was mainly on "Data Ghost Energy." These Ghost Energies were transformed into invisible data, yet they retained various traits of Ghost Energy, making Su Yu feel like he'd discovered a new world.

Meanwhile, Xie Yitian was stunned by this transformation.

Just a second ago, Xie Yitian's consciousness was still overwhelmed by the "Illusion" data torrent. These torrents, carrying a massive amount of complex information, were frantically assaulting Xie Yitian's consciousness.

He was barely holding on before being completely defeated by "Illusion," allowing this data life form to take over his body and soul.

But in a blink, those terrifying data torrents of "Illusion" were consumed by an even more bizarre set of data.

This change had surpassed Xie Yitian's understanding.

What was happening?

Just now, Mr. Su Yu released a six-star level data life form, some kind of high-level Brutal Intelligence.

Then this six-star data life form devoured the seven-star "Illusion"?

How could a six-star devour a seven-star, is this even possible?

What has happened to this world?

It seems that right after Mr. Su Yu released that strange "Brutal Intelligence," in less than ten seconds, his crisis was resolved?

So simple?

Originally, Xie Yitian thought this was an unprecedented life-and-death crisis and had resolved to go down fighting together with it.

But as soon as Su Yu acted, the situation instantly reversed.

"No wonder he's an old predecessor whose lifespan is uncountable!"

"I bet Mr. Su Yu, in the data realm, far surpasses seven stars! Otherwise, how could he so easily solve 'Illusion' this beast..."

"Earlier, I even doubted Mr. Su Yu would cooperate with 'Illusion,' it's really unforgivable..."

While sorting out his chaotic consciousness, Xie Yitian was filled with amazement, gratitude, and admiration for Su Yu.

In his heart, the term he used for Su Yu had changed from "old monster" to the respectful "old predecessor."

"What a close call, thankfully there's Senior Su Yu, otherwise, I almost perished together with that beast 'Illusion'..."

Wait, perish together?

Xie Yitian froze for a moment and then remembered something significant, his face suddenly darkened with worry.

The normal color of his face quickly flushed red again, and he hurriedly emitted a torrent of data outside.

Su Yu noticed his change too, looking at him with some curiosity.

'Illusion' had been dealt with, why did this guy suddenly look like he was about to have a stroke?

Su Yu instinctively extended his consciousness, following Xie Yitian's emitted data torrent.

And then he saw the missiles already prepared in the city, just waiting for ignition and launch.

"Oh my..."

Su Yu was taken aback.

The missiles now appearing in the city were even more numerous than those Su Yu had seen earlier, up to a hundred, and it seemed there might be more.

And some of these "missiles" looked particularly thick.

They didn't seem like missiles, perhaps they were real space rockets?

Xie Yitian actually had such a trick up his sleeve.

During the crisis just moments ago, Xie Yitian took out all he had, not caring about his rocket missiles anymore, detonating them desperately.

The explosion of a rocket was not small either.

If so many missiles and rockets exploded together, it could blow the entire Illusion City sky-high. Even if Su Yu was protected by the Brutal Battle Armor and wouldn't be easily killed by the blast, he would be seriously obscured and embarrassed.

Fortunately, at this time, as Xie Yitian's data arrived, these missiles slowly retracted back into the various buildings.

"This guy..."

Su Yu looked at the red-faced Xie Yitian beside him and understood why he was so urgent.

Moments later, Xie Yitian withdrew all the launch orders, finally breathing a sigh of relief, and his face returned to normal.

After another moment, he had sorted out the chaos in his body and moved, giving a deep bow to Su Yu:

"Mr. Su Yu, thank you so much this time! If it weren't for you, I'd be dead! Even all the city's residents would have been harmed by that beast..."

Chapter 363: Zhang Lengyun, Space Flight Technology Materials!\_2

Xie Yitian expressed his gratitude to Su Yu in every possible way, and Su Yu accepted it frankly; he indeed saved Xie Yitian and the entire city's population.

Xie Yitian further stated that he would definitely repay this favor and asked Su Yu to feel free to make any requests.

Su Yu thought for a moment and immediately asked a question: "What's the deal with those missiles and rockets in your city?"

He had long wanted to ask, but such an "Ultimate Weapon" was clearly Xie Yitian's trump card and not convenient to inquire about.

But now that Xie Yitian had said to make any requests, Su Yu would not hold back.

"Those things..."

Upon hearing this, Xie Yitian showed a look of reminiscence and only after a moment did he reply: "Those missiles are the technology left behind by a former member who was struck to death by Heavenly Thunder. All members of our Transcendents' Union have inherited some, conducting research in secret."

"But we dare not experiment; although we've produced the finished products, the actual effect post-launch is truly unpredictable..."

On hearing this, Su Yu nodded and noted that Xie Yitian did not seem like someone proficient in space flight technology.

It turns out it was left by a former member; what a pity it was.

"Give me a copy of this technology too, I'm also interested,"

Su Yu said directly.

Upon hearing this, Xie Yitian immediately sent a stream of data, containing a large amount of materials, blueprints, and algorithms...

Su Yu was also a member of the Transcendents' Union now, and he had saved his life, so fulfilling this request was only natural.

Both were strong in the domain of data, this kind of information exchange was rapid and convenient.

After receiving the information, Su Yu glanced at it briefly and felt it was quite profound.

A feeling of joy surged in his heart; even he found it profound, indicating that this technology was truly advanced and noteworthy.

Technology painstakingly researched over a lifetime by a Seven-star powerhouse is indeed profound, even for someone of the same Seven-star level like Su Yu, it must be taken seriously.

Given time to study it, he could glean many new blueprints and design new machinery.

For instance, a flying unit?

Su Yu did not look too closely at the materials, but solemnly said: "This technology is indeed very useful. That member deserves respect, what was his name?"

Upon hearing this, Xie Yitian sighed: "Alas, that member was named Zhang Lengyun; he was a young Extraordinary Mechanic, exceedingly talented, breaking through to Seven-star at just over thirty, but unfortunately..."

"Zhang Lengyun..."

Su Yu nodded, remembering the name.

Reaching Seven-star in one's thirties is indeed a feat of genius, and being adept at space rocket technology, it truly is a pity.

In these millennia, who knows how many geniuses like Zhang Lengyun have tried to reach for the stars, only to end in silent defeat?

Both men fell silent for a moment, seemingly in remembrance of the genius Zhang Lengyun.

After a while, Su Yu finally spoke: "What about the city's residents and those 'virtual' hosts?"

Xie Yitian, upon hearing the question, immediately looked downcast, then after sensing for a while, he answered: "Most of the residents are fine, just a bit panicked. Earlier, suddenly thousands of people had a dramatic change in temperament, spouted strange words, and are now in a coma."

"Those who underwent a change and are now in a coma are the 'virtual' hosts."

"They no longer have their original consciousness or memories..."

Xie Yitian seemed to value these residents greatly, which left him somewhat saddened; he indeed was a good City Lord.

"Not dead?"

Su Yu asked skeptically.

Xie Yitian shook his head: "Their brain data has merely been wiped, essentially becoming plant men, but they're not dead."

"Without the support of consciousness, their bodies will also soon die. But this is better than being used as organic hosts for 'virtual'; let them rest in peace..."

After Xie Yitian finished speaking, Su Yu let out a cold chuckle: "Your Data Ghost intends to advance to Eight-star and probably needs these people's bodies as hosts, right?"

"Let them rest in peace? Isn't that too wasteful?"

Xie Yitian, naturally understanding Su Yu's implication, was taken aback: "How could I..."

It seemed he wasn't as ruthless as the 'virtual.'

If he had that kind of cruel nature, he wouldn't have pleaded with Su Yu for a young boy, a descendant separated by countless generations.

This Xie Yitian likely due to occupational reasons, stayed indoors too long, still retained a rare "conscience" in this era.

However, Su Yu was indifferent to Xie Yitian's "conscience."

He nonchalantly said: "The people are dead anyway, why not make use of them, consider it a body donation."

"These bodies can carry the data from 'virtual,' making them a precious resource."

"If you don't want them, you can give them to me; I can make use of them too."

Su Yu's words were rather cruel, but this era was inherently cruel.

After a long silence, Xie Yitian finally bowed deeply to Su Yu again: "Mr. Su Yu is right! I was indeed foolish."

Hearing this, Su Yu stopped speaking and didn't mention the matter of needing those bodies either.

He was only provoking Xie Yitian; why would he want those bodies?

Su Yu himself was not a Data Ghost.

Could it be for the Fear Intelligence? Fear Intelligence just advanced to Seven-star; attempting an Eight-star ceremony any time soon seemed unlikely, maybe it's not worth it.

However, Xie Yitian, with those bodies, had a chance to conduct the ceremony, to ascend to Eight-star.

Given his character and the technology he mastered; if he did ascend to Eight-star, a lot could be asked of him in the future.

Like the material datafication, perhaps once Xie Yitian advanced to Eight-star, he might possess such ability?

After Xie Yitian made his decision, he too contemplated how to prepare for the Eight-star ceremony.

The Eight-star ceremony of Data Ghost is extremely challenging, and these tens of thousands of bodies could barely commence the ceremony.

To truly complete it would likely require the possession and transformation of the city's entire population of a million.

Essentially massacring the entire city's residents.

But Xie Yitian was unwilling to do so; that was a million people!

If he did it, even if he advanced, he feared he'd go mad.

So, finding an alternative method was necessary.

After all, the essence of advancement is to leave a deep imprint in Subspace, asking only about the result, not the process.

Maybe there could be an alternative method to leave such an imprint?

However, despite the notion, no substitute method or advancement ceremony came to mind for Xie Yitian despite racking his brain.

If there was such an easy way, Eight-star wouldn't be so difficult?

But Xie Yitian was not entirely without ideas, and that idea was...

He stealthily glanced at Su Yu, this "senior" was immensely powerful and knowledgeable.

Maybe he had a method for an alternative ceremony?

Thinking of this, Xie Yitian felt a sudden urge to consult Su Yu, but he refrained from acting rashly.

After all, a substitute method for the ceremony must be extremely precious.

Xie Yitian had just had his life saved by Su Yu and hadn't even properly repaid him yet; to want such precious information right after seemed inappropriate.

Better to set this aside for now and figure something out later.

"Master, master, this guy is thinking about your stuff."

"He wants to get some good things from you; what a sneaky guy, should I hit him..."

At this moment, Fear Intelligence began whispering in Su Yu's ear again.

It turned out that when Xie Yitian was spinning thoughts, his breath was unstable due to some injuries recently sustained.

Some thoughts got turned into data, leaked out, and were picked up by the keen Fear Intelligence.

Upon hearing this, Su Yu's expression grew peculiar:

"This Xie Yitian really wants to fleece me, how ridiculous..."

Su Yu found it somewhat amusing; he had always been the one to fleece others. Even the Brutal Evil God had been ransomed by him; now Xie Yitian dared to target him?

"Believe it or not, if you try to fleece me again, I'll empty your Illusion City, pack up everyone and everything, and see if you dare target me again..."

Chapter 364: Huge Harvest! What, Mr. Su Yu sealed the Evil God inside the armor?

Su Yu retorted in his heart.

However, he wasn't really angry with Xie Yitian for having ulterior motives.

After all, now that he is a "mysterious figure," he must have the awareness of being targeted by others. Not just anyone gets this kind of treatment.

"By the way, how is that child now?"

Su Yu retorted a few times in his heart and suddenly asked.

The ultimate reason he came to Illusion City this time was to treat that polluted child.

The child, being polluted, had a drastic change in character, spewing profanities, extremely irritable, but now Su Yu somewhat admired him.

After all, an ordinary child, able to resist the "Illusion" corrosion through willpower, is really impressive and strong.

It reminded Su Yu of himself, struggling to survive alone earlier in Shelter 73.

"That's right! That child!"

Xie Yitian, reminded, quickly focused, and after a moment, breathed a sigh of relief, "Fortunately, the child is still okay for now."

"Mr. Su Yu! Could it be that you..."

Xie Yitian looked at Su Yu with a bit of surprise.

"That's right, I have a way to save him now."

Su Yu smiled slightly.

The child, in essence, was eroded by the "Illusion" data ghost energy.

This kind of data-based ghost energy is very bizarre, and even earlier, Su Yu found it difficult to purify.

But now, with the Fear Intelligence, Su Yu indirectly controls this peculiar energy called "data ghost energy."

So naturally, he can purify the pollution on that child.

"That's great, let's hurry there! The child's condition isn't very good right now, seemingly affected because the 'Illusion' was eliminated..."

Xie Yitian hurriedly said.

Su Yu nodded, flew straight up, grabbed Xie Yitian's body, activated the Brutal Battle Armor, and vanished from sight in the blink of an eye.

Moments later, before the same hospital room as before, Su Yu put down Xie Yitian.

Just now, he traveled through Illusion City at over ten times the speed of sound, reaching there in a short time.

For various corners and bends, he relied on the powerful computing ability of the upgraded Fear Intelligence to control his flight posture, safely making the turns.

But dashing through the city at ten times the speed of sound, playing drift in turns, is indeed quite thrilling.

If not for Su Yu's high skills and nerve, he would have crashed to death long ago.

When Su Yu put down Xie Yitian, his footsteps were a bit shaky.

The "Armor Racing" just now was overly thrilling for him as well.

After all, he is just a seven-star who has never experienced ten times the speed of sound, nor drifted through corners...

Xie Yitian suddenly covered his mouth, seemingly about to vomit. Clearly, his robotic body didn't seem capable of vomiting anything?

However, moments later, Xie Yitian had adjusted his state, showing the strength of a Seven-star Transcendent.

After recovering, he couldn't help but exclaim, "What a thrill! We need to add this program to the virtual world in the future..."

Su Yu said nothing silently, this guy never forgets his old profession.

He ignored Xie Yitian and instead walked up and opened the door to the room.

The little boy was still tied to the hospital bed and had not been sent to the underground shelter.

At this moment, his face was extremely pale, tinged with a hint of ghostly green, his whole body trembling, seemingly on the verge of dying.

But even though he was weak, as soon as he saw Su Yu open the door, he immediately furrowed his brows and cursed, "You son of a..."

Obviously still quite mad.

Su Yu did not wait for him to finish cursing, directly releasing a burst of Spiritual Energy to block his mouth.

Admiration aside, Su Yu had no interest in being cursed at.

After blocking the boy's mouth, Su Yu instructed the Fear Intelligence to begin its work in his mind.

"Watch me, master!"

The Fear Intelligence cheered, streaming data towards the boy's brain.

"I am the Fear Intelligence, coming to spread fear, oh!"

It declared grandly, diving into the boy's brain.

But moments later, it scurried back, retreating into the Brutal Battle Armor, shivering and saying:

"Mas...ter! That guy's brain is so terrifying, so brutal..."

Su Yu chuckled inwardly; with such courage, it still intends to spread fear...

More fittingly called "Cowardly Intelligence."

But Su Yu did not laugh out loud, instead said earnestly:

"It's okay, you are a powerful intelligence spreading fear. How can such mere brutality defeat you?"

"Try again, let your master witness your skills, purify those brutal wills..."

Receiving Su Yu's encouragement, the Fear Intelligence immediately perked up:

"Yes...yes..."

It surged out again and burrowed into the boy's brain.

This time, after ten seconds, it returned, delightedly saying, "Master, you were right! Those brutal wills seemed very scared when they met me, and they were purified and absorbed immediately!"

"I am indeed a powerful fear-spreading intelligence; even brutal wills fear me. I am truly amazing, hehe..."

The Fear Intelligence boasted a bit, Su Yu replied perfunctorily, then looked at the little boy.

Noticing that the ghostly green on his face had disappeared, and his complexion quickly becoming rosy.

Su Yu could sense no ghost energy in his body anymore.

It seems he has indeed been purified.

Su Yu moved his consciousness, releasing the spiritual energy that sealed his mouth.

Once the blockage was gone, the little boy immediately took a long breath, bursting with energy, and shouted, "I was suffocating..."

Then he surprisedly covered his mouth, "How am I talking like this? Oh? I'm okay now..."

Su Yu smiled slightly, it seems that although this little guy has been purified of pollution, he was still affected.

Chapter 365: Huge Harvest! What, Mr. Su Yu sealed the Evil God inside the armor?

"Wait a minute, is this Spiritual Energy?"

Su Yu suddenly sensed that a surge of Spiritual Energy was spontaneously generating within the little boy's body.

This Spiritual Energy was repairing his previously weakened body caused by pollution, rapidly making him healthy and strong.

Originally, his hands and feet were bound.

But with just a stretch of his hand, he broke the restraints, demonstrating a powerful physical strength.

It seems he turned misfortune into a blessing, awakening as a physical type Spiritual User, and he appears quite strong upon awakening.

At this moment, Xie Yitian also walked in, and upon seeing the boy, his face lit up with joy, "Xie Cheng, you're okay!"

"Quick, thank Mr. Su Yu, he's the one who saved you..."

Another round of gratitude...

For the next hour, Xie Yitian busied himself with restoring order to Illusion City and explaining everything that had just happened,

Xie Yitian did not disclose the whole truth, considering it could easily cause panic.

But they all knew that Illusion City was nearly destroyed by a terrifying force, and it was the outsider, Mr. Su Yu, who saved them.

At this moment, the entire city's millions of people were chanting Su Yu's name, thanking him for his help.

Hearing this gratitude, Su Yu felt a bit pleased.

Being thanked is certainly better than being resented; it feels good.

After some commotion, Xie Yitian sent the residents back to their homes to link their brain-machines and go back "online."

The entire city began to operate once more.

As for those bodies, Xie Yitian had not yet begun to use them for possession.

The boy named Xie Cheng did not immediately enter the virtual world but instead followed Su Yu and Xie Yitian around and seemed quite close to Su Yu.

However, Su Yu keenly noticed that Xie Cheng's natural closeness was actually directed at the Ghost Energy aura on the Brutal Battle Armor and... the Fear Intelligence!

After all, he was influenced by Brutal Ghost Energy and was later saved by Fear Intelligence, which seemed to have formed some instinctual bond.

Having such a shadow tailing him made Su Yu a bit annoyed, so he thought of playing a prank.

He instructed the Fear Intelligence to send a message into the boy's consciousness: "Human, I am the great Fear Intelligence, you are my chosen Angel Envoy..."

Although Fear Intelligence was somewhat childish, its IQ was very high. Under Su Yu's guidance, it quickly baffled the boy.

Just as Xie Cheng almost knelt before the Fear Intelligence, Xie Yitian finally finished his tasks and returned.

Upon returning, he immediately said to Su Yu politely, "Mr. Su Yu, sorry to keep you waiting."

Then he handed Su Yu a metal box.

Su Yu took it and saw several high-quality Source Core Crystals inside, along with a chip that recorded data.

The Source Core Crystals were the reward for treating Xie Cheng.

However, these Source Core Crystals were of much higher quality than the agreed reward, all suitable for producing Special Grade Chips.

As for the chip.

Su Yu briefly reviewed the information on the chip and found that it not only recorded detailed terrain over thousands of kilometers.

It also contained a wealth of advanced technical data, including brain-machine technology, virtual reality technology, intelligent mechanic technology... and even the entire Illusion City's Design Blueprint!

Xie Yitian then said, "Earlier I mentioned rewarding Mr. Su Yu, but on second thought, there aren't many things in Illusion City that would catch Mr. Su Yu's interest."

"So I've handed over some accumulated technology and blueprints from Illusion City over the years to Mr. Su Yu, hoping you won't mind..."

It turned out this was what Xie Yitian referred to as a reward; indeed, he was sincere enough to even hand over the design blueprint of Illusion City.

Is he not afraid of Su Yu discovering the weaknesses of Illusion City and such?

Apparently, there's no need to worry; after all, if Su Yu meant harm, he wouldn't need to know any weaknesses; sheer force alone would allow him to dismantle the city...

Moreover, Xie Yitian needs to rely on Su Yu to find a way to advance to eight-star, so his "reward" was particularly vigorous.

In this way, Su Yu practically "emptied" Illusion City.

Of course, he didn't take away materials but technology.

"Not bad."

Su Yu did not refuse and accepted them outright; those Source Core Crystals could enhance chip production.

Those technical data, along with the residual technology from Zhang Lengyun obtained earlier, were also enough for him to develop new blueprints.

With so much technology acquired, he might even unlock a new third-tier profession.

Furthermore, having obtained a map, he now had a basic understanding of the terrain of the entire Ruins Star.

This planet, except for certain forbidden areas and ruins, was mostly laid out before him with no more secrets.

Of course, many places can only reveal their hidden truths once visited.

For example, Illusion City, on the map, just looks like a city with a million people.

Who would have thought it harbored something as dangerous as "Illusion?"

"Since things are settled, I should head back now..."

After collecting his rewards, Su Yu immediately wanted to leave.

Having gained so much, the sensible thing was to quickly return and convert those gains into personal strength.

However, just as Su Yu was about to bid farewell, he suddenly noticed Xie Yitian staring at the Brutal Battle Armor, seemingly hesitant to speak.

"What's up, is there any question?"

Su Yu asked.

Xie Yitian hesitated before asking, "Mr. Su Yu, your armor and that intelligence earlier... are they related to the Evil God?"

This was a question he had wanted to ask for a while.

During the previous battle with "Illusion," Xie Yitian vaguely heard "Illusion" mention that Su Yu had a strong Brutal Evil God aura, and he even had a high-level intelligence blessed by the Evil God.

Although ultimately, Su Yu saved Xie Yitian's life, not appearing like a follower of the Evil God.

But he still wanted clarity on this matter.

Having experienced "Illusion's" betrayal, Xie Yitian learned to be cautious.

Even when faced with a lifesaver, he wanted clear answers; if it couldn't be explained, they might turn against each other in the future.

Hearing this, Su Yu casually said, "Yes, my armor and intelligence are indeed related to the Evil God."

Hearing his words, Xie Yitian's expression immediately tensed up.

But Su Yu continued, "The armor encloses a Fragment of the Brutal Evil God, used as the Energy Core."

"As for the intelligence, it was converted using the god fragment sealed within this core."

As soon as Su Yu finished, Xie Yitian was stunned again.

What? The core of this armor is an actual Evil God?

It turns out Mr. Su Yu wasn't a follower of the Evil God but used the god as labor? Is this something a human would do?

Su Yu gave Xie Yitian a curious look: "It's not much of a secret. Previously, Tie Long should know I battled a fragment of a Brutal Evil God for a month."

He had no interest in hiding such matters; after all, fighting brutally for so long with the Evil God wasn't something he could conceal even if he wanted to.

...

Meanwhile, in the Subspace.

The members of the Transcendent Union hadn't left yet.

They were very curious about what would happen to Su Yu when he went to Illusion City to meet Xie Yitian.

Even Xie Yitian's half Spirit hadn't left.

The previous sudden attack by "Illusion" left him no time to respond, which was one of the reasons why Xie Yitian struggled to resist "Illusion."

During the earlier battle, this avatar of Xie Yitian remained still, focusing all its attention on the real-world fight.

But now, this avatar of Xie Yitian suddenly opened its eyes and looked at Tie Long: "Mr. Su Yu previously battled a descended Evil God for a month; is that true?"

Tie Long replied with some confusion, "That's right, didn't I mention it before?"

Xie Yitian's eye twitched and said, "Do you know that after defeating that Evil God, Mr. Su Yu sealed it and used it as the Energy Core to forge an eight-star level powerful battle armor!"

Xie Yitian almost shouted this sentence.

Tie Long and everyone else were instantly stunned.

They had waited for quite a while, only to come across such shocking news.

Mr. Su Yu sealed an Evil God and used it as an Energy Core? Is there such a method?
