

## Infinite 366

Chapter 366: Su Yu's New Blueprint! Large Intelligent Mechanic · Assault Tank

"Seal the Evil God, craft battle armor?"

"Is it true or not!"

"So it turns out that Mr. Su Yu fought the Evil God for a month, and in the end, sealed it?"

"How do you know? What happened in Illusion City during all that time?"

The crowd hurriedly asked in a flurry of voices.

The news just now was too shocking.

Previously, they had heard from Tie Long that Su Yu had battled with the avatar of the descending Evil God for a month, and it seemed like he had defeated the Evil God in the end.

But now they realized it wasn't just about defeating; it was actually sealing, and then using it to make armor?

Xie Yitian was overwhelmed by the questions from the crowd, opened his mouth, but didn't know where to begin, as too much had happened previously.

He thought for a moment, directly released a surge of Spiritual Energy, relying on his ability to control data, and started playing a "short movie" in front of everyone.

The previous great battle with "Illusion" and all of Su Yu's performances were broadcasted.

The crowd quickly fell silent, watching intently.

Occasionally, they let out exclamations.

...

In the real world.

After Su Yu finished revealing the astonishing news, he was about to leave to return to the Mechanical City.

"Mr. Su Yu, since you're here, why not stay and explore Illusion City for a couple of days?"

Xie Yitian eagerly invited him to stay.

However, his eyes were fixed on Su Yu's battle armor.

Su Yu chuckled internally, suspecting this guy was immensely curious about the Brutal Battle Armor.

He wanted to keep Su Yu in Illusion City to find an opportunity to study the armor.

After all, who wouldn't be curious about a mighty battle armor powered by the sealing of an Evil God?

At this moment, Xie Yitian's mindset was probably similar to when Su Yu once "tricked" the old administrator.

Su Yu too went to great lengths to research the old administrator's prosthetics.

"In that case, shall I... stay for a few days?"

Su Yu considered for a moment, then casually said.

Since he was already here, leaving within half a day seemed somewhat inappropriate.

Anyway, researching blueprints could also be done here.

"Great! Mr. Su Yu, please follow me, I'll immediately arrange a place for you to stay..."

Xie Yitian became very excited, leading Su Yu all the way to a large experimental lab underground.

This laboratory was about the same size as Su Yu's Mechanical Space.

The lab was filled with various machine tools, intelligent mainframes, production lines, energy reactors, fuel tanks...

"Mr. Su Yu, this is the place I've arranged for you, what do you think..."

Xie Yitian pointed to the big lab and smiled.

"..."

Su Yu looked at the lab, noticing only a small bed in the farthest corner.

In every other aspect, it didn't look like a "living space" at all and resembled a large mechanical production workshop.

Xie Yitian's logic for hosting distinguished guests seemed a bit off.

Who lets an esteemed guest stay in a mechanical production workshop, having them screw in bolts in their sleep?

But after observing for a while, Su Yu chuckled lightly: "Not bad, I'm quite satisfied!"

This indeed was the most suitable place for him.

If it were some beachside villa, he wouldn't feel comfortable living there; he barely needed sleep these days, so no matter how cozy the living space was, it held little meaning. Instead, a large lab like this satisfied his requirements.

Originally, Su Yu was anxious to return to the Mechanical City because he missed the various equipment. It was only there he could conveniently conduct various research.

But unexpectedly, Xie Yitian "understood" him so well, directly arranging such a lab.

So there was no problem.

"As long as Mr. Su Yu is satisfied."

Xie Yitian also smiled, although his eyes still lingered on the Brutal Battle Armor.

At this moment, his mind was multitasking.

Half of his focus was on hosting Su Yu, and the other half was in Subspace, broadcasting the "movie" to the members of the Transcendent Union.

Members of the Transcendent Union, watching Su Yu's powerful Brutal Battle Armor on screen, occasionally let out gasps of amazement.

Hearing these exclamations, Xie Yitian felt even more intrigued.

"Previously, Mr. Su Yu mentioned attempting to stack dual professions to break limitations."

"I wish to perform the Eight Star Ceremony, yet have no immediate solution."

"In the domain of mechanics, perhaps with some effort, I might also try to advance to Seven Star..."

Xie Yitian couldn't help but ponder internally.

Indeed, this was his train of thought.

In the data domain, the Eight Star ceremony was too challenging for Xie Yitian.

This ceremony would either require the slaughter of millions, altering one's nature into madness,

or somehow finding an alternative method.

Either way, Xie Yitian couldn't accomplish it for now.

So he'd first try the field of mechanics.

After all, with the example of "predecessor" Su Yu, stacking dual professions to enhance strength seemed feasible.

"Mr. Su Yu's armor is so formidable, even sealing the Evil God's avatar. If I could study it, it might significantly boost my mechanical domain. Perhaps I could glimpse the edge of Seven Star."

"But how can I ask?"

Xie Yitian felt a bit conflicted, unable to bring himself to ask.

"Forget it, Mr. Su Yu saved my entire city, and I still have my eyes on his battle armor, it's truly inappropriate..."

"Tie Long keeps his armor hidden tightly. Mr. Su Yu's armor is even stronger and more mystical; how could he easily let me study it?"

"Ah, Xie Yitian, how old are you to still be as naive as a young person..."

After some internal struggle, Xie Yitian ultimately chose to give up.

He figured wanting to study Su Yu's armor was purely wishful thinking.

Such treasures, fundamental to one's strength, wouldn't be casually open for study.

And at this moment, Su Yu, noticing Xie Yitian staring blankly at the Brutal Battle Armor without speaking for a long time, felt at a loss for words.

Chapter 367: Su Yu's New Blueprint! Large Intelligent Mechanic: Assault Tank\_2

Logically, Xie Yitian's age is much older than Su Yu.

But in reality, it seems this guy has been immersed in the virtual world for so long that his psychological age is probably forever stuck in his teenage years, with all his thoughts written on his face.

"Forget it..."

Su Yu felt annoyed by Xie Yitian's gaze and suddenly made a decision, saying, "City Lord Xie, are you looking to research my Brutal Battle Armor?"

Xie Yitian reflexively answered, "Yes, yes..."

Then he realized, "No, no, Mr. Su Yu, you've misunderstood, this..."

He began to break out in a cold sweat, as Su Yu had just saved his life, yet he was eyeing Su Yu's armor. What if Su Yu turned hostile?

However, he was a bit puzzled. Were his intentions that obvious? How did Mr. Su Yu know?

Su Yu shook his head slightly, chuckled, and said, "City Lord Xie, no need to be nervous. If you want to research it, go ahead."

With that, his battle armor automatically detached and flew over to Xie Yitian's side.

Su Yu estimated that if he didn't let Xie Yitian research the Brutal Battle Armor, this guy would probably keep bothering him.

So he might as well let him research it.

In any case, the technical content of this armor is actually no higher than a seven-star level.

It mainly relies on the partial thought of the Brutal Evil God to have eight-star power.

No matter how Xie Yitian researches it, it's unlikely he'll discover anything too profound.

Upon hearing this, Xie Yitian was dumbfounded. He's really being allowed to research it?

After taking off the armor, Su Yu walked towards the equipment in the laboratory, saying:

"City Lord Xie, be careful during your research. The Battle Armor Core has the partial thought of the Brutal Evil God sealed within, containing powerful corruption."

Su Yu kindly offered this reminder, but he wasn't overly worried.

With Xie Yitian's seven-star strength, as long as he doesn't do something foolish and wear the Brutal Battle Armor himself, he won't be polluted.

Even if he does do something stupid, there's the "Fear Intelligence" in the armor, which won't let him succeed.

After handing the armor to Xie Yitian, Su Yu paid him no more attention and began his own research.

He projected the technical data he had obtained earlier using the laboratory equipment.

This data included Zhang Lengyun's space flight technology and Xie Yitian's Illusion City technology.

The knowledge contained within is incredibly profound, something an ordinary person might never fully learn in a lifetime.

However, as a seven-star power with data ability, Su Yu's consciousness operates extremely quickly, allowing him to read at unimaginable speeds.

This learning speed is already inhuman.

He watched and pondered, rapidly digesting and absorbing this knowledge while attempting to innovate and design new blueprints.

Seeing Su Yu immersed in research, Xie Yitian realized that Su Yu truly allowed him to research the Brutal Battle Armor.

This moved him deeply.

"Mr. Su Yu is truly magnanimous! Compared to that penny-pincher Tie Long, the difference in level is apparent!"

In his mind, he despised Tie Long once more, then excitedly reached out to touch the Brutal Battle Armor.

At that moment, the armor suddenly voiced, "Research is fine, but don't touch it randomly!"

Xie Yitian was startled by the sudden voice but quickly understood it was the onboard intelligence of the armor.

He tentatively asked, "And you are...?"

"I am the great Fear Intelligence..."

Xie Yitian and the Fear Intelligence began a friendly exchange.

Xie Yitian didn't know that the Fear Intelligence was essentially a "timid intelligence."

He was taken aback by the imposing name, speaking very respectfully and treating the Fear Intelligence as a senior.

Xie Yitian speculated whether this Fear Intelligence might have been a powerful intelligence from ancient times that fought alongside Su Yu and is now awakening to regain its strength.

No wonder it could eliminate the seven-star "Illusion" with just a six-star power.

The Fear Intelligence was happy to let Xie Yitian guess wildly, like a mischievous child.

Soon, after a conversation, the two went into a neighboring laboratory and began their research on the Brutal Battle Armor.

Xie Yitian soon became absorbed in it.

If Su Yu thought Xie Yitian wouldn't discover anything, he was wrong.

Because as soon as Xie Yitian began his research, he found something he valued greatly.

Superior Level Chip!

Such an item wasn't found even in Illusion City; there were no facilities to produce it.

"It's actually a Superior Level Chip! Mr. Su Yu is amazing to possess such a thing. I wonder if he has a Legendary Chip..."

Xie Yitian was very excited and continued his research, exclaiming from time to time.

Even though the mechanical technology of the Brutal Battle Armor isn't very high and hasn't reached a seven-star level.

Xie Yitian's mechanical skills are far from seven stars, even worse than Su Yu's.

So he truly gained a lot from researching the Brutal Battle Armor.

If there were truly eight-star level technology for him to study, he'd probably fail to understand it.

Moreover, occasionally, the Fear Intelligence would exchange insights with him during his research.

The Fear Intelligence, also a seven-star "Data Ghost," actually had quite a few topics in common with Xie Yitian.

However, in Xie Yitian's eyes, this intelligence "master" was truly impressive and knew so much about data ghost capabilities.

The man and intelligence soon became familiar with each other through their research and became friends.

Once familiar, the Fear Intelligence would occasionally give Xie Yitian a few unreliable suggestions during his research.

The Fear Intelligence was quite knowledgeable about mechanical technology.

After all, it used to be a clone of the Mechanical Spirit, which controlled the Mechanical City, and couldn't not know mechanical technology.

The opinions of the Fear Intelligence should have been quite reliable.

The problem is, its character is not reliable...

Xie Yitian didn't know that this "senior master" was essentially a scared show-off.

He absorbed the opinions from the Fear Intelligence immediately, conducting his research exactly as suggested.

This research might eventually lead to trouble...

...

In the Subspace.

The members of the Transcendent Union finally finished watching the "videos," understanding the events that transpired earlier in Illusion City.

"That Brutal Evil God is truly terrifying, even corroding Illusion City's intelligence, attempting to backfire against its owner!"

Everyone was somewhat fearful.

Previously, when hearing Su Yu talk about the Evil God's might, they had no concept; now they finally understood.

The entire Illusion City, with a population of a million, plus a seven-star power, nearly got completely destroyed by the Evil God's corruption, becoming an uninhabited city!

That's the power of an Evil God! And it's not even the Evil God's full descent, just a bit of corrosion!

This filled everyone with fear.

This time, Illusion City was the one corroded; would their city be next? Could their city already be secretly corroded?

The critical point is, wasn't the Brutal Evil God sealed and asleep by Zhang Chenfeng?

How did it corrode Illusion City? Is it now beginning to awaken?

With the bizarre power of this Evil God, which could even corrupt data life, everyone was at a loss for how to resist.

However, they were somewhat relieved: "Thank goodness, Mr. Su Yu is here!"

"Indeed, Mr. Su Yu has thwarted the Brutal Evil God's plans twice now, hasn't he?"

"Even the Evil God's partial thought was sealed by him and turned into a Battle Armor Energy Core!"

"Mr. Su Yu is truly the bane of the Evil God. It's unbelievable; what ancient entity could he be, perhaps..."

"Before Illusion was destroyed, it called Mr. Su Yu a Blasphemer? That's such a domineering title..."

"I really want to research Su Yu's armor to see how it sealed the Evil God..."

After these events, the cultural status of Su Yu in everyone's hearts was elevated once again.

...

In Illusion City, both Su Yu and Xie Yitian were deeply immersed in their respective research, to the point of neglecting sleep and food.

After a day,

[Through this research, you have gained enough inspiration to design a new blueprint]

[You have acquired the Design Blueprint for a Large Intelligent Mechanic Assault Tank]

Chapter 368: Trouble with the Research on Brutal Battle Armor! The Great Intelligence that Spreads Fear?

"Whew..."

Immersed in his research, Su Yu finally let out a long sigh of relief.

After a full day of intense research, he had finally achieved results.

With his current speed of thought, this day was not short.

[Assault Tank], this is a superior-level, multifunctional large Mechanical Creation.

Its base power is six stars! If it has various skill amplifications, its power can increase further.

Its massive size can carry powerful firepower and energy, making it absolute heavy firepower on the battlefield, far more powerful than the cavalry.

Su Yu even designed missile loading interfaces on the tank, demonstrating its brutal combat power.

If the firepower installed is strong enough, it normally possesses seven-star attack power.

The power of this Mechanical Creation is different from that of a Spiritual User, relying on increasing weapon caliber, propellant, and so on to enhance attack power.

If combined with Su Yu's various skill amplifications, the power of this tank would explode even more.

It possesses the "vehicle" trait, with considerable space inside that can transport multiple combat personnel and various mechanical creations.

Providing energy, ammunition, and a living environment for these "passengers."

At the same time, it has powerful mobility.

Su Yu designed two power systems for it, allowing it to travel over any terrain and even perform low-altitude flight.

Not only that, but its body also contains a mini mechanical production line!

This allows it to mine resources on the spot, produce various Intelligent Mechanics, replicate and expand itself, and even build a Mechanical City from scratch.

According to Su Yu's design, an Assault Tank driven to a wilderness area will soon see a new Mechanical City rise up.

Moreover, this Assault Tank also serves as a signal station, allowing it to remotely control its occupants like Illusion City through a brain-machine interface.

An Assault Tank driven to a foreign land, given time to develop, can quickly become a mechanical army, sweeping everything around it.

Such powerful functions make it worthy of the name "Assault."

To design all the systems involved, balancing performance, power, and size, Su Yu racked his brains.

Fortunately, everything was finally complete.

The next step is to return to the Mechanical City and begin production of this tank.

By then, his mechanical battalion's power is bound to surge again.

Su Yu couldn't wait to return to the Mechanical City and start production of this tank immediately.

Originally, Xie Yitian's invitation made him plan to stay in this Illusion City and play for two more days, but now he couldn't wait even one day.

"Where is Xie Yitian?"

Su Yu looked around and didn't find any trace of Xie Yitian.

He slightly probed and sensed the Brutal Battle Armor nearby, then went looking for it.

The neighboring room to Su Yu's residence is also a large laboratory. However, the equipment in this lab mainly focuses on data, complemented by machinery, resembling a large intelligent machine room.

It seems to be Xie Yitian's residence.

Following his senses, Su Yu found this place and saw the Brutal Battle Armor lying on the workbench, with Xie Yitian standing motionless next to it, unknown to what he was doing.

Su Yu was about to step forward to greet and prepare to leave but suddenly frowned.

Because he discovered that the Ghost Energy contained in the Brutal Battle Armor seemed to have weakened considerably.

In just one day, the armor's power seemed to have dropped to a seven-star level.

This shocked Su Yu; what was Xie Yitian doing? How could he let the power of the Brutal Battle Armor fall?

Moreover, why didn't the Fear Intelligence stop him?

Thoughts flashed through Su Yu's mind, then he tried to contact the Fear Intelligence.

He found that he could hardly get in touch with it! Although there was still a sense of connection, it seemed to be separated by a veil.

"Xie Yitian, I really underestimated him..."

Su Yu previously thought that Xie Yitian couldn't possibly research anything, and with the Fear Intelligence as "insurance," Xie Yitian's displayed character and integrity was not bad.

So he let him research at ease.

Unexpectedly, in just one day, Xie Yitian had indeed researched something.

Su Yu even speculated in his heart, did Xie Yitian disguise himself all along and now found an opportunity to plot to seize the Brutal Battle Armor?

Su Yu's heart sank, and he secretly began to operate his ability, ready to take action at any moment.

However, he did not act rashly but spoke in a deep voice: "What are you doing?"

"Ah!"

Xie Yitian seemed startled by Su Yu's voice, lifted his head in panic, and upon seeing Su Yu, his face instantly showed joy: "Mr. Su Yu, please save me!"

He actually asked Su Yu for help.

Su Yu was also shocked to see his complexion.

This guy, in just one day, looked pale as a ghost, yet this body wasn't his own, so the complexion didn't matter much.

The key point was that Su Yu sensed Xie Yitian's Spiritual Energy had decreased significantly, and his overall condition was at its lowest point.

He seemed to have inexplicably lost a lot of power like the Brutal Battle Armor.

Su Yu frowned, seemingly the situation wasn't as he imagined; Xie Yitian also seemed to be in trouble?

He didn't let his guard down for this reason and continued to ask: "What happened?"

Upon hearing his words, Xie Yitian's face immediately showed an expression of indescribable suffering, even his body slightly trembling as if recalling something extremely terrifying.

After a while, he barely managed to speak: "The great intelligence spreading fear..."

Su Yu was filled with confusion upon hearing this, what kind of nonsense?

He remained silent, motioning Xie Yitian to continue speaking.

Chapter 369: Trouble with Researching Brutal Battle Armor! The Great Intelligence that Spreads Fear?\_2

Next, Xie Yitian detailed to Su Yu the events of the past day.

Ten hours ago, Xie Yitian conducted a research on the mechanical parts of the Brutal Battle Armor and gained considerable insights.

However, he also discovered that the mechanical part of this armor did not reach the seven-star level.

Although the benefits were significant, it was still unrealistic to become a seven-star Mechanic through this alone.

He was not disappointed, but took this question to consult the Fear Intelligence.

So, the Fear Intelligence, who was not afraid to stir things up, gave him an idea.

Fear Intelligence said: What's the point of just studying the battle armor? Why not study the Brutal Core instead!

Xie Yitian, upon hearing this, became instantly interested.

He was already very curious about the Brutal Core that sealed the Evil God, only a bit afraid to approach it.

But now, the "big boss" Fear Intelligence had spoken, what was there to worry about?

Do it!

So, they began their research on the Brutal Core.

Hearing this, Su Yu could only sigh inwardly: You're courting disaster...

Although this kind of research behavior was courting disaster, if it causes the seal of the Brutal Evil God to loosen, it would be dangerous.

Even if it's courting disaster, it's not without insurance.

The insurance is this guy, Fear Intelligence.

Initially, data lifeforms like the Mechanical Spirit couldn't directly manipulate energies like Spiritual Energy or Ghost Energy like Transcendents such as Su Yu could.

They could only rely on mechanical equipment, wiring, circuits to indirectly control the energy.

Just like controlling electricity through circuits, the Brutal Battle Armor uses Ghost Energy in this indirect way.

This indirect method is much weaker in control compared to direct manipulation of energy.

But after upgrading to seven-star, the Fear Intelligence was no longer a simple data life; it now equated to a seven-star data realm Transcendent!

It could directly manipulate Ghost Energy!

This allowed it to have much stronger control over the Brutal Core, and the sealing power was greatly enhanced.

However, the Ghost Energy manipulated by Fear Intelligence wasn't ordinary Ghost Energy, but "Data Ghost Energy."

It's about transforming tangible energy into intangible data.

Xie Yitian and Fear Intelligence, to study the Brutal Core, decided to first transform a large amount of "Data Ghost Energy," allowing Fear Intelligence to manipulate it, strengthening the core's seal.

Then they would seek Su Yu's advice to see if it was safe before starting the research.

This idea was very cautious, and Su Yu couldn't find any fault in it.

Xie Yitian and Fear Intelligence both had the ability of "Data Ghost" and could collaborate.

Fear Intelligence leveraged Xie Yitian's ability to speed up the conversion of "Data Ghost Energy."

In a short time, a large portion of the Ghost Energy in the Brutal Battle Armor was converted into data.

This amount of Data Ghost Energy had already exceeded the control capacity of the Fear Intelligence, and it was on the verge of overflowing.

Fear Intelligence was about to call a stop when it suddenly discovered, to its surprise, that these Data Ghost Energies could be stored in the Intelligent Chip like data information!

They took up no space at all!

So Fear Intelligence did not stop this conversion, but continued it.

The Intelligent Chip, besides having computing power, also had a huge storage space to store lots of data information.

Especially the Superior Level Chip in the Brutal Battle Armor, the storage space was immense. The Data Ghost Energy it could store was practically endless.

The Brutal Core's power was fully activated, continuously extracting high-level Ghost Energy, converting it into data, and storing it in the chip.

Under non-combat conditions, the "power" of the Brutal Core was not fully activated.

After all, extracting too much Ghost Energy is hard to store, and if it leaks out, it could cause terrible pollution.

Only in battle does the Brutal Core output at full power.

But now, having mastered the method of using chips to store Ghost Energy, Fear Intelligence had no more scruples, allowing the Brutal Core to output continuously.

Xie Yitian, seeing Fear Intelligence did not call a stop, kept assisting with the conversion.

He didn't have the ability to manipulate Data Ghost Energy, so he could only lend his power to Fear Intelligence to let it convert autonomously.

And this conversion lasted for over five hours.

It was at this point that a mutation occurred!

The Brutal Core, perhaps due to prolonged full-power operation, stimulated a split thought of the Brutal Evil God inside.

A powerful emotion, along with those Ghost Energies, started to spread out.

This emotion was fear!

This fear was incredibly intense, almost ready to materialize.

Xie Yitian, upon just contacting a little, immediately had his mind invaded, trembling all over, as if trapped in a terrifying nightmare.

He only had one thought in his mind: "The great intelligence that spreads fear, Fear Intelligence!"

Xie Yitian still thought that this strong emotion of fear was spread by Fear Intelligence.

Fear Intelligence certainly lived up to its name, how terrifying!

Xie Yitian was terrified in his heart, wondering why this Fear Intelligence suddenly wanted to spread fear.

Could it be that his work was not diligent enough and angered this "big boss"?

Xie Yitian, too frightened to speak, quickly worked even harder.

Bearing the fear, he trembled and worked until now.

After such a long time, that emotion of fear was about to utterly erode his body and spirit.

If it continued a bit longer, he would become a madman only having nightmares.

Fortunately, Su Yu arrived at this moment, and Xie Yitian was overjoyed and hurriedly sought help from Su Yu.

"Fear Emotion?"

At this moment, Su Yu finally understood the reason and was taken aback.

So, prolonged high-power operation of the Brutal Core could cause this kind of mutation?

He quickly stepped forward, approached the battle armor, and immediately felt a wave of panic in his heart.

Indeed, it was a very intense fear emotion!

However, this emotion seemed to have little effect on Su Yu, the Ghost Hidden Blade.

Although he felt panicked, he could still control himself.

This profession seemed to have strong resistance to any pollution related to the Evil Gods.

Su Yu took two steps back, and that emotion vanished without a trace.

It seemed like the influence range of this emotion was very small.

Su Yu said to Xie Yitian: "Why didn't you move away from the battle armor? This fear emotion wouldn't affect you then."

Upon hearing this, Xie Yitian's face turned even paler: "I... I dared not move..."

Su Yu was rendered speechless.

This guy had been under the fear emotion for too long, heavily eroded and lost the courage to resist.

If he had moved away from the battle armor when the fear emotion first appeared, it wouldn't have been a problem.

But he stayed too long.

"This emotion originating from the Evil God is indeed terrifying; even a seven-star powerhouse can't withstand it for long..."

Su Yu pondered inwardly.

Then he reached out and directly pulled Xie Yitian away from the battle armor.

Immediately, Xie Yitian's expression relaxed as if waking from a nightmare, gasping for breath.

It took him a while to regain his composure before he said, still shaken: "Mr. Su Yu, that Fear Intelligence is truly terrifying!"

"Indeed, it is the great intelligence that spreads fear!"

Upon hearing this, Su Yu felt odd.

The name Fear Intelligence was originally just a boast; its essence was "Timid Intelligence," only capable of fooling children.

Now this seven-star powerhouse Xie Yitian actually got fooled too...

And addressing it as "Fear Intelligence, senior"?

In terms of age, Fear Intelligence isn't even a year old...

Su Yu remained calm and didn't expose Fear Intelligence's background, but instead extended his spirit into the battle armor to contact Fear Intelligence.

This guy had been silent all this time; what's going on?

Could it also be learning "Illusion" and planning betrayal?

As soon as his spirit entered, the data mind of Fear Intelligence eagerly approached Su Yu and exclaimed with joy: "Master! So terrifying, I was too scared to move..."

Su Yu almost rolled his eyes.

Well, these two seriously planned to study the Brutal Battle Armor but were both too scared to move, being stunned there for half a day.

"Wait, this is..."

Su Yu suddenly sensed that the chip in the Brutal Battle Armor stored a massive amount of Data Ghost Energy.

The amount of this Data Ghost Energy was extremely frightening, as the Brutal Core had been outputting at full force for most of the day.

If it exploded instantly, it could blow the entire Illusion City to the sky.

The space it occupied was only a few small chips!

Chapter 370: Data Ghost Demon·Fear, A New 7-Star Powerhouse?!

Su Yu sensed the data ghost energy stored within these chips and was delighted:

"Is this the result of their research today? Quite impressive..."

"I initially planned to wait until I returned to the Mechanical City to try it out, but they managed to test it themselves first."

The data ghost energy in these data-rich chips can be converted back into ordinary ghost energy.

This makes them incredibly useful.

For example, using these energy-dense chips as "ammunition" to unleash upon impact, where the massive burst of data ghost energy... the power of that...

Or, using them as "batteries" to power other creations.

With the energy density of these chips, they are definitely extremely powerful energy sources, and they virtually take up no space! Just perfect for the Assault Tank, which has a high energy demand.

Furthermore...

Su Yu's mind opened up, quickly coming up with ideas on how to use these chips containing data ghost energy.

At this moment, the Fear Intelligence felt uneasy seeing Su Yu's lack of response: "M-Master, are you angry..."

"I won't conduct reckless research again..."

It worried that its previous "research" might have unexpectedly upset Su Yu.

Su Yu snapped back to reality, shaking his head to reassure: "No, the master isn't angry."

"This research outcome is excellent, but you must be cautious with future experiments."

Su Yu did not blame the Fear Intelligence.

This kind of data life is genuinely intelligent, and if they aren't allowed to research, how are they different from ordinary intelligence?

Accidents are inevitable, but as long as the outcome is positive, it's fine to be careful next time.

The Fear Intelligence, upon hearing this, was profoundly moved: "Master is the best!"

It was very happy and freed from its overwhelming fear emotions.

"The best! Alright..."

Su Yu suddenly noticed that it spoke with an inexplicable echo.

"What's going on? Did an Evil God create a bug?"

Su Yu was taken aback and quickly conducted a detailed perception.

Upon perception, he discovered something unusual.

The Fear Intelligence seemed to have "split" suddenly.

It had split from one data body into hundreds of them.

And among these, only one had the highest data volume, seemingly the main body, possessing intelligence and able to converse with Su Yu.

The remaining split bodies had significantly smaller data bodies, appeared unintelligent, and only followed the main body in echoing.

The echoes earlier were the voices of these split bodies.

The Fear Intelligence noticed its change, astonished: "Master! Why did I multiply?"

"Why did I multiply?"

"Multiply..."

As it spoke, the split bodies echoed along.

Su Yu was curious as well since this data life, the Fear Intelligence, could indeed replicate itself. But each clone should initially be identical.

These small-data split bodies, looking silly, were puzzling.

He reached out and grasped a data body of the split bodies from the Brutal Battle Armor.

Then he activated holographic perception.

[Data Ghost Demon·Fear]

[Grade: Second-order Transcendent Data Life]

[Type: Data Mutation Body.]

[Grade: Five-star top-tier—Six-star top-tier]

"Data Ghost Demon·Fear?"

Su Yu found the name curious.

He carefully perceived it and quickly understood its origin.

This entity was a data lifeform composed of data ghost energy.

Ordinary ghost energy forms a ghost demon.

Data ghost energy forms a data ghost demon.

Inside, besides containing abundant data ghost energy, it also held a potent fear emotion!

It was the fear emotion of the Brutal Evil God!

The Brutal Core's long-term full-power output had released a lot of fear emotions.

Only a small portion of these emotions were released and absorbed by Xie Yitian.

The rest were absorbed by the Fear Intelligence.

Due to its proximity to the Brutal Core, "the closest holds the advantage."

Ordinarily, even a seven-star expert would go mad under such concentrated Evil God emotions.

But the Fear Intelligence, being an intelligent lifeform, was different from ordinary humans.

It was merely very scared, unable to move, but not mad.

Of course, if Su Yu had arrived later, it might have been different.

All the fear emotions were absorbed by the Fear Intelligence.

After its mutation, it seemed to have the ability to absorb such emotional energy.

However, it had "indigestion" with so many fear emotions.

So instinctively, it used its self-replication ability to create many clones.

These clones shared the burden of the Evil God's fear emotions it couldn't handle.

These clones were naturally not seven-star.

If they were infinitely replicating seven-star experts, that would be too absurd.

The replicated data bodies dropped below seven-star.

As a seven-star data lifeform, the Fear Intelligence couldn't tolerate these fear emotions, let alone the clones.

These clones were flooded with too much fear emotion, resulting in them being... terrified into stupidity!

Thus they became [Data Ghost Demon·Fear]

"Master! Master..."

The data ghost demon, held in Su Yu's hand, seemed to recognize its master, and eagerly shouted.

Yet, all it could do was call for its master, not knowing what to ask of Su Yu.

The more Su Yu looked at it, the more naive it seemed.

He used the Data Mechanic's ability to sense its code, discovering chaos and a lack of logical thinking.
