

## Infinite 371

Chapter 371: Data Ghost Demon·Fear, A New 7-Star Powerhouse?!\_2

However, it was filled with a "happy" emotional code.

It seemed to be using this happy emotion to combat the intense fear.

"Tut-tut, has the intelligent life been scared silly?"

Su Yu felt very curious and a bit worried.

These are clones of the Fear Intelligence; if they are scared silly, could something happen to the original body?

But these little ones, once scared silly, seemed no longer affected by that kind of fear, only joyfully chattering.

Is this why fools are not afraid?

And the original body, with the support from these little ones, was quite awake, although still a bit timid, showed no signs of becoming foolish.

So he explained to the Fear Intelligence: "These are Data Ghost Demons, extensions you created yourself..."

After a bit of explanation, the Fear Intelligence also understood.

It was very excited, directing those Data Ghost Demons to scurry around in the Brutal Battle Armor.

These Data Ghost Demons had no intelligence, only following the orders of the original body.

"Mr. Su Yu! What is that in your hand?!"

At this moment, Xie Yitian also saw the data form in Su Yu's hand and immediately backed a few steps, exclaiming in shock.

Su Yu looked back and found Xie Yitian's face full of horror, as if sensing an extremely terrifying entity.

Xie Yitian, being a Data Ghost, was very sensitive to data. Inside that Data Ghost Demon, he sensed something extremely terrifying.

"This?"

Su Yu raised his hand slightly.

Xie Yitian retreated a few more steps.

"This is [Fear]."

Su Yu said casually.

"Fear... the great intelligence that spreads fear, I see..."

Xie Yitian seemed to "understand," and then looked at Su Yu with even more awe.

Su Yu didn't know what he understood, so he casually placed the Data Ghost Demon back into the Brutal Battle Armor.

Xie Yitian immediately relaxed and breathed a sigh of relief.

"Tut-tut, these small things contain a lot of fearful emotions, although a bit silly, their lethality is huge..."

Su Yu found it amusing to see Xie Yitian, a powerful seven-star, so frightened by a Data Ghost Demon.

However, this fearful emotion originated from an Evil God, no wonder it tormented Xie Yitian like this.

It's just that Su Yu, as the Ghost Hidden Blade, containing imperial technology, wasn't afraid of the Evil God's erosion; otherwise, wearing the Brutal Battle Armor every day, he might eventually be scared silly as well.

"These Data Ghost Demons, though a bit silly, are quite useful and can be used to store [Fear]."

Su Yu secretly pondered, feeling a joy in having made a new discovery.

Originally, the intangible fearful emotion, although powerful, was difficult to utilize.

Moreover, the long-term high-power operation of the Brutal Battle Armor would diffuse fearful emotions, which was also a troublesome matter.

Now with these Data Ghost Demons, such emotions can be stored.

This is also a powerful weapon!

"With the Data Ghost Demons, the Fear Intelligence can truly spread fear now..."

Su

Su Yu never thought the name he casually gave the Mechanical Spirit Clone would come true.

The current Fear Intelligence truly lived up to the name.

It could really spread fear, even frightening a seven-star powerhouse.

Though it could also get scared itself...

Su Yu internally laughed for a while, then said seriously to Xie Yitian:

"City Lord Xie, I plan to return to the Mechanical City, I'm here to take my leave."

"Do you still want to study my battle armor?"

Upon hearing that Su Yu was leaving after just one day, Xie Yitian instinctively wanted to keep him.

But as soon as the study of the battle armor was mentioned, he quickly shook his head: "No, no!"

"I wouldn't dare study that armor again! Mr. Su Yu, have a safe journey..."

It seems he had developed a psychological shadow from the battle armor.

The fear of an Evil God is unbearable even for a seven-star powerhouse.

"Then I won't linger. City Lord Xie, goodbye!"

Su Yu smiled slightly as the Brutal Battle Armor automatically lifted and clothed him.

Then he disappeared from sight.

He had activated invisibility and flew out of Illusion City at twelve times the speed of sound.

"Mr. Su Yu is really incredible, daring to wear such a terrifying battle armor..."

Xie Yitian couldn't help but sigh.

That Brutal Battle Armor contained not only terrible ghost energy pollution but also eerie fear emotions.

Just researching it, Xie Yitian was scared half to death.

Not to mention wearing it.

Xie Yitian sighed for quite a while, recalling the events of the past two days, and grew increasingly impressed with Su Yu.

What on earth is this elder Su Yu's background? What strength does he possess?

So mysterious and powerful.

After lamenting, Xie Yitian returned to his senses, looking at the various machines and mainframes around him, suddenly frowning.

He found that the efficiency of the entire Illusion City was now much lower.

Without the powerful data life "Illusion," relying solely on Xie Yitian's own ability to control such a large city was a bit challenging.

"Should I enlighten another data life?"

A thought arose in Xie Yitian's mind.

With his ability, enlightening a data life was not a difficult task.

Of course, the enlightened data life couldn't possibly be a seven-star.

Unless he advanced again, the data life would advance along with his promotion.

"No, what if it gets corrupted again?"

He immediately dismissed the thought.

He was afraid of creating another Illusion; he might not have Su Yu to save him then.

"By the way, Mr. Su Yu left so quickly, I didn't have the opportunity to ask how 'Illusion' was corrupted."

"Forget it, I'll ask next time we meet. Mr. Su Yu is so mysterious and knowledgeable about Evil Gods, he must know the inside story..."

Xie Yitian temporarily shelved the matter, then, with a turn of thought, he considered another issue.

"Should I use those bodies? Occupying others' bodies, although they're already dead, still seems somewhat..."

He was a bit conflicted...

...

After leaving Illusion City, Su Yu didn't immediately return to the Mechanical City, but circled around thousands of kilometers around Illusion City.

Earlier, Xie Yitian had given him a map showing the distribution of forces around Illusion City within a few thousand kilometers.

Su Yu circled around to verify these pieces of intelligence personally.

Indeed, there were quite a few settlements and cities around Illusion City.

This area was much more expansive and resource-rich than the Dead Silence Wilderness.

Of course, there were also many Radiation Beasts.

The battle between humans and the Radiation Beasts never ceased.

Looking down from the sky at those settlements and cities, at the residents coming and going, Su Yu couldn't help but marvel at the resilience of humanity.

These settlements and cities unexpectedly gave him a sense of prosperity.

Clearly, this was a Ruins Star covered with pollution.

After reviewing the thousands of kilometers around Illusion City, Su Yu flew toward a farther point.

Possessing such powerful mobility was a rare opportunity, naturally worth some sightseeing.

Half a day later, Su Yu finally returned to the Mechanical City.

He fell into contemplation.

Through his observations, five thousand kilometers northwest of Illusion City, there was a large city, apparently guarded by a seven-star or higher powerhouse!

This large city was actually invisible! It wasn't on the map provided by Xie Yitian at all.

If it weren't for Su Yu's flying ability and noticing something was amiss from the sky, he wouldn't have been able to find it.

This method of hiding an entire city clearly reached a seven-star level, possibly even stronger!

Moreover, this seven-star powerhouse was not a member of the Transcendent Union!

"It seems this planet does not only have these eight seven-stars of the Transcendent Union; there are other powerhouses as well."

"The Transcendent Union is fairly friendly, and the union's principles align with my preferences."

"But the attitude of other seven-star powerhouses is unknown?"

Su Yu took the discovery of the city guarded by the seven-star powerhouse seriously.

An unknown seven-star powerhouse with an unclear attitude must be taken seriously.

After all, every seven-star powerhouse has an extraordinary origin, with extremely strong abilities.

Though Xie Yitian seemed quite unfortunate this time, if pushed to his limits and he unleashed his ultimate means to perish together, even Su Yu would have a hard time.

That unknown seven-star or higher powerhouse might be even stronger than Xie Yitian! And their character and attitude might not be as friendly as the members of the Transcendent Union.

Because earlier, Su Yu noticed, in that city, large troops constantly moved in and out, attacking surrounding settlements, displaying strong aggression.

Su Yu was even considering a question, "Was 'Illusion' corrupted by the Brutal Evil God personally."

Or was there another seven-star powerhouse secretly scheming?

Chapter 372: Possible 7-Star Enemy? The Powerful Assault Tank!

In Su Yu's view, the fact that "Illusion" was corrupted is quite strange.

If the Brutal Evil God itself had targeted Illusion City and acted personally, then this crisis would be too easily resolved.

After all, last time, when Su Yu fought against the Ghost Tribe, the Brutal incarnation descended. That Brutal incarnation actually had terrifying eight-star strength, and eight-star wasn't even its upper limit.

It was just that its descent was interrupted halfway through by Su Yu's attack, forcibly suppressed for a month until the Evil God's incarnation was sealed, and it hadn't fully exerted its true power.

If the Brutal incarnation had been given a little more time back then, just half a day, to reach the eight-star level, Su Yu would have died long ago.

This is the true action of an Evil God, extremely terrifying.

But this time, Illusion had been corrupted for many years.

For such a long time, with the skills of the Brutal Evil God's true form, it would not be surprising for "Illusion" to be enhanced to nine-star level.

"Illusion" shouldn't be this weak.

Also, given the nature of the Brutal Evil God, if this was indeed its plan.

Su Yu killing "Illusion" and disrupting its plan might very well provoke another descent of an Evil God's fragment for another big battle.

Su Yu was even prepared to try and seal another Evil God fragment, giving the one in the Brutal Core a "companion".

But the result was that until the battle ended, "Illusion" was devoured by the Fear Intelligence, and there wasn't the slightest sign of activity.

Su Yu even stayed in Illusion City for an extra day and found no signs of an Evil God's descent.

Throughout the entire Illusion City, the aura of the Evil God was still most intense on Su Yu's own Brutal Battle Armor...

This inevitably led him to suspect that the corruption of "Illusion" this time was not the work of the Brutal Evil God's true form, but rather a conspiracy by someone who used some method to make "Illusion" come into contact with the power of the Brutal Evil God, resulting in the corruption.

The mastermind capable of setting up such an earth-shattering conspiracy must be at least a seven-star level powerhouse.

Actually, Su Yu had no evidence for this suspicion, it was just an instinctive premonition.

He had this premonition, and it wasn't without reason.

After all...

It couldn't be that all the seven-star powerhouses on this planet were like the members of the Transcendent Union, friendly, peaceful, and full of "dreams," could it?

There must be other seven-star powerhouses, malicious and cruel, just like Li He and the Ghost Soul High Priest of the past.

Perhaps it was some seven-star powerhouse who disliked Illusion City and Xie Yitian, thus setting up the conspiracy to wipe out the city's millions.

This conspiracy might even be part of that seven-star powerhouse's ritual.

"Haha, if that's the case..."

"Then my War Mechanic's ritual would also be set!"

Su Yu pondered for a while, a cold smile on his face.

His War Mechanic needed a sizable war.

Initially, he was considering that after joining the Transcendent Union, some untactful member might provoke him, and they would have a fight, thereby completing the ritual.

Unexpectedly, the Transcendent Union members were so friendly, treating Su Yu as a mysterious big shot, becoming increasingly courteous. How could they deliberately offend him?

Faced with such a situation, Su Yu couldn't just initiate a fight.

After all, wars result in deaths, and without sufficient reason, Su Yu didn't want to act recklessly.

But now, Su Yu finally saw hope.

He regarded the possible mastermind as a potential enemy, planning to strike when the Ghost Hidden Blade reached its maximum level!

"Just in time, in a week or two, my Ghost Hidden Blade will reach its peak level."

"I'll investigate this at the next gathering and prepare the ritual!"

"Once the ritual is completed and my power explodes, I'll head to the ruins of the Giant God Soldiers!"

Su Yu confirmed his plan in his heart.

After confirming the plan, Su Yu looked around, surveying the mountain of resources.

He ordered the Mechanical Spirit: "Assist me!"

"Yes! Master!"

The Mechanical Spirit's main body wasn't as lively as the Fear Intelligence. Upon hearing Su Yu's command, it acted immediately without any unnecessary words.

Various mechanical arms moved up and down around Su Yu, transporting various materials to him.

Su Yu also activated his abilities and began to work.

Various complex parts were constantly being shaped, assembled, and tested...

He immediately started producing the Assault Tank.

Half a day later.

The excellent-level machine that Su Yu had been longing for was finally produced.

[Intelligent Combat Machine·Assault Tank·Standard Type]

[Maker: Su Yu]

[Quality: Excellent]

[Trait: Assault (The Assault Tank has powerful firepower, heavy armor, and a sturdy shield. Whether in attack or defense, it far exceeds ordinary Mechanical Creations. It can charge across battlefields and break through enemy lines head-on.)]

[Trait: Mobility (The Assault Tank has an amphibious power system for land and air operation, allowing it to traverse any terrain. While on land, its speed can reach at least 150 kilometers per hour. In low-altitude flight, it can approach the speed of sound.)]

[Trait: Multiplication (The Assault Tank is equipped with a miniature mechanical production line and carries the Mechanical Spirit's clone. It can autonomously gather resources from its surroundings and replicate itself, while also producing other Mechanical Creations without the master's control!)]

[Trait: Transport (The interior of the Assault Tank is spacious, capable of carrying a large number of creations and combat personnel, providing them with energy and survival resources)]

[Trait: Information Cover (The Assault Tank is equipped with an excellent-level chip that grants it powerful information processing capabilities, capable of covering a hundred kilometers in radius with data signals, serving as a powerful data base station)]

Chapter 373: A Possible 7-Star Enemy? The Powerful Assault Tank!\_2

[Trait: Super Energy (The assault tank utilizes data energy technology, able to store a massive amount of energy in small chips, granting it powerful endurance. The energy stored in a Superior Level Chip is enough for it to continue fighting for three months!)]

[Trait: Brutal Enhancement (Like other creations, the assault tank uses brutal enhancement technology, allowing it to exhibit six-star top-level strength without any skill amplification!)]

[Equipment:]

[Melee Weapons: The assault tank relies on its massive weight, and in close combat, it has only one tactic: ram! Its body and armor are the melee weapons!]

[Long-range Weapons: Heavy Plasma Cannon, Heavy Fusion Laser Cannon, Heavy Pulse Shattering Cannon, Heavy Ghost Energy Chip Cannon, Heavy Fear Spread Cannon!]

[Skills:]

[Spiritual Shield Type III Super Heavy · Sea Blue Source Crystal Enhancement (Greatly increased shield tenacity, significantly extended duration): Consumes energy to generate a shield that lasts for a certain period, capable of withstanding six-star top-level damage within the shield's scope of effect]

[Comprehensive Strength Assessment: Six-star top level - Seven-star top level with Brutal Enhancement]

This is a heavy tank over twenty meters long, cast entirely from alloy, full of the beauty of heavy industry.

On its chassis, there are eight pairs of load-bearing wheels and sixteen vector nozzles, allowing it to move freely over all sorts of terrain, able to run and fly!

It's entirely covered in thick alloy armor, with its size and armor thickness comparable to the city walls of the Mechanical City, extremely sturdy.

Additionally, it has a high-power shield generator inside, utilizing the Azure Oath Battle Armor's initial technology, the Sea Blue Source Crystal Shield.

Under ultra-high power, it can generate a shield far surpassing that of the Azure Oath, sufficient to defend against six-star top-level damage.

On top of it is a menacing turret, equipped with several oversized ion cannons, laser cannons, pulse generators, and ghost energy chip cannons.

Most of these weapons are technologies obtained by Su Yu in Illusion City.

Su Yu was deeply impressed by the myriad of turrets in Illusion City, so he also mounted these weapons on the tank.

Moreover, Su Yu enhanced all these weapons!

The so-called enhancement involves forcibly increasing the power by using high-intensity energy; these weapons, at full throttle, even approach seven stars! And the endurance is very long, capable of continuous bombardment without energy concerns.

Of course, the energy consumption of such a massive heavy tank is also terrifying.

If it were before, Su Yu wouldn't have been able to solve it easily.

But fortunately, with Fear Intelligence, Su Yu now mastered the method of storing large amounts of ghost energy in chips.

The chips in the assault tank store massive amounts of data ghost energy, which can be converted into normal high-level ghost energy at any time, providing energy to the tank!

This gives it almost a simplified version of the Brutal Core, with virtually limitless energy.

Just need to pay attention to pollution issues.

Fortunately, pollution can be resolved; it only needs to be converted into data and stored in the chips, and it's done.

Because of this technology, Su Yu developed a new weapon, the Ghost Energy Chip Cannon!

This weapon stores a large amount of data ghost energy in chips and uses it as ammunition to shoot out!

If it's a Superior Level Chip storing enough ghost energy, in one shot, it can destroy a city; this power has already reached up to seven-star top and even eight-star level!

This is the power of technology.

However, Su Yu won't use this destructive weapon unless it's a critical moment.

Because the consumption is too great, one shot takes a Superior Level Chip and a large amount of ghost energy, requiring the Brutal Core to accumulate energy for a period.

Also, one shot results in too much pollution.

Normally, conventional weapons are used.

It also has another special weapon: the Fear Spread Cannon, which loads a Data Ghost Demon into chips and fires as ammunition.

The fear emotions stored within the Data Ghost Demon are also a great weapon and are only effective against living beings, without causing damage to mechanical creations, and extremely hard to defend against!

After all, how can one defend against intangible emotions? Even Xie Yitian, a seven-star powerhouse, fell victim!

Thus, this assault tank is close to perfect. It's the most powerful combat force in the Mechanical City, aside from Su Yu and the Brutal Battle Armor, Fear Intelligence.

Su Yu admired it for a while, and with a thought, the tank opened its outer armor and transformed, revealing the internal mechanical production line!

This production line was currently in operation, producing various parts and weapons!

The parts it was producing were actually the parts of the assault tank itself!

It was self-replicating using the materials from the Mechanical City!

This means Su Yu only needs to make one assault tank, and after that, it will "spawn" on its own.

Su Yu looked at the tank before him, examining its various attributes, and felt extremely satisfied.

As soon as it was created, it already had six-star top level to seven-star top-level strength.

Of course, seven-star top-level strength is achievable with the Ghost Energy Chip Cannon; under normal circumstances, it just has six-star strength.

But if various skill amplifications are used, having seven-star strength under normal conditions wouldn't be surprising.

A mass-produced seven-star force!

Moreover, Su Yu didn't use too many high-end materials; for example, those high-end materials obtained from the Transcendent Union Meeting last time weren't used.

They are mostly ordinary alloys and minerals.

Just taking advantage of the quantity, he rigidly constructed such a monster.

Because no high-end rare materials were used, mass production is possible!

However, the Superior Level Chip it carries, Su Yu's current daily production is at most two pieces, which limits the efficiency of assault tank production.

Also, the high-level ghost energy stored in the chips needs the Brutal Core to output at full for a period to be filled, which is another limitation.

But that's okay, Su Yu believes it will be gradually resolved in the future.

Su Yu looked at its somewhat fierce and brutal exterior, his heart couldn't help but anticipate its performance on the battlefield.

However, for the time being, there is no worthy opponent for it.

"Hope the mastermind doesn't disappoint me..."

Su Yu muttered to himself.

In the days followed, the assault tank, being produced at a rate of one per day, continued without stopping.

In truth, with Nuonuo's support, Su Yu's Superior Level Chip production is two per day.

Logically speaking, two assault tanks could be produced per day.

Unfortunately, the size of the assault tank is too large, consuming materials comparable to hundreds or thousands of cavalry.

The development teams of the Mechanical City and War City, working hard every day on development, manage to produce only one tank.

Then the remaining materials barely suffice for the production of elite cavalry.

Every day, a large number of elite cavalry, along with one assault tank, are produced!

Daily, all materials are depleted, and Su Yu's power is increasing each day, expanding nearly double in just a few days!

"Fortunately, no particularly valuable and rare materials were used, and resource development was done in advance. Otherwise, I'd be bankrupt and unable to produce even one a day..."

Facing this situation, Su Yu felt somewhat relieved.

Fortunately during design, the material issue was taken into consideration.

Otherwise, how could there be one seven-star force per day?

The entire Transcendent Union has only eight seven-stars!

Of course, these seven-star powerhouses clearly accumulated other seven-star forces over the years, not just being alone.

Like Xie Yitian, possessing Illusion City plus so many missiles, should they erupt, that power would be extraordinary.

These veteran seven-star powerhouses, without some resources, wouldn't they have lived in vain all these years?

But Su Yu believes that no matter how many back-up plans these veteran seven-star powerhouses have, it won't compare to him.

One seven-star force per day, if they knew, they'd probably be scared to death!

In full production mode, Su Yu's Ghost Hidden Blade level is also continually rising.

The "believers" in Radiation Land were truly diligent, providing Su Yu with a wealth of experience each day.

Soon, the Transcendent Union's token emitted a spiritual energy fluctuation.

It's time for the meeting once again.

Chapter 374: Ghost Hidden Blade Max Level, Core Specialization, Evil God Origin!

Su Yu was about to conjure a clone to attend a gathering.

At this moment, the Profession Panel suddenly popped up with a notification.

[You gained 100 million Professional Experience (Ghost Hidden Blade lv max!)]

[High-level Ghost Energy Control synchronously enhanced...]

Su Yu's face immediately lit up with joy. It was quite a coincidence that his Ghost Hidden Blade reached max level at this moment!

"It's not easy..."

Su Yu couldn't help but sigh inwardly.

This third-tier profession was really difficult to level up.

All the powerful Radiation Beasts in the Dead Silence Wilderness were almost wiped out by Su Yu, unable to provide him sufficient Professional Experience.

It was those "Believers" in the Radiation Land who prayed tirelessly, day and night, to help Su Yu accumulate experience and reach max level for this profession.

And as the profession maxed out, Su Yu suddenly felt a surge in his strength, physique, and spirit once again!

His power had already reached the pinnacle of seven-star level!

At this moment, another notification popped up.

[Ding!]

[Based on your maxed core ability (High-level Ghost Energy Control), you have gained a Core Specialization (Evil God Origin)]

[Core Specialization: Evil God Origin]

[Description: Ghost Hidden Blade, with its High-level Ghost Energy Control ability elevated to the extreme, finally comprehends a portion of the Evil God's essence, thereby truly acquiring some traits and origins of a Subspace Evil God.]

[With the Evil God Origin, Ghost Hidden Blade's ability to control Ghost Energy further advances. It can freely convert Ghost Energy between data and energy. It can freely transform Ghost Energy into regular Spiritual Energy, though with some loss. Additionally, like an Evil God, it can draw strength from emotions and faith.]

[It can fully materialize a mark in Subspace as the true form of the Evil God. It can adapt to the Subspace environment, surviving there for a long time. Even after death, it can, like an Evil God, be reborn in Subspace, but after rebirth, most of the personality and memory will be lost. (Note: Do not abandon the physical body in reality, or you might be assimilated by Subspace, becoming a true Evil God, losing humanity)]

The core ability of Ghost Hidden Blade has also evolved!

The original Ghost Hidden Blade only had mastery over Ghost Energy comparable to a sub-level Evil God.

Now it has directly evolved to possess the Evil God Origin!

"Oh my, have I really become an Evil God?"

Su Yu felt the change in his power and was momentarily at a loss for words.

The Brutal Split Mind initially speculated that Su Yu was an Evil God, and members of the Transcendent Union also speculated Su Yu might be an Evil God.

Su Yu never took it seriously.

And now, it actually became true.

After the Ghost Hidden Blade reached max level, it indeed became an Evil God.

However, despite these changes, Su Yu did not feel any inclination towards madness or corruption.

He is now an Evil God with reason and humanity!

"No wonder it belongs to the Empire's technology, it's truly amazing!"

Su Yu couldn't help but marvel inwardly.

The Empire was able to research such a profession, creating a rational Evil God for the Empire's use, an incredible achievement.

"Let's test the power of this Evil God Origin!"

Su Yu was excited and immediately began experimenting with his new power.

First is... Energy Dataization!

With a single thought, the Ghost Energy in Su Yu's body was transformed into data.

With another thought, they turned back into energy.

"Not bad!"

Su Yu nodded with satisfaction.

Previously, this ability was exclusive to Fear Intelligence, and Su Yu merely borrowed its power.

Now, he possesses this power himself, making it more convenient, flexible, and even stronger!

After all, Fear Intelligence could only manipulate Data Ghost Energy, but Su Yu can freely convert and control both types of energy.

In battle, using this energy allows for a variety of magical and strange transformations, baffling the enemy.

After testing this ability, Su Yu tried using another ability.

An emerald green Energy Ball appeared in his hand, a ball of High-level Ghost Energy.

In the next instant, the color of that energy transformed from emerald green to colorless and transparent, albeit shrinking in size.

This Ghost Energy, which contained pollution, was actually transformed into pure, unpolluted Spiritual Energy!

This isn't Purification!

When Ghost Energy is purified with the Flame of Truth, both would annihilate and disappear completely.

This is Transformation! Converting Ghost Energy into safe, harmless Spiritual Energy, albeit with some loss, but still plenty remaining!

"Approximately a quarter was lost, but it's still quite good..."

Su Yu looked at the Spiritual Energy and was overjoyed.

This ability is incredibly useful!

For a technology civilization, energy is the foundation of everything.

The production, battle, maintenance of various artifacts, and the ammunition for various weapons, the survival and production of the residents, all require energy everywhere.

The various energies Su Yu now uses mainly revolve around High-level Ghost Energy, with the Brutal Core present, this energy is almost inexhaustible.

Moreover, the vital point is that on this planet, Ghost Energy pollution is everywhere, even without the Brutal Core, Ghost Energy is still inexhaustible.

The problem is, this energy's pollution is too strong, making it unsafe for large-scale use.

The newly produced Assault Tank uses Ghost Energy as its energy source, requiring Su Yu to constantly guard against pollution.

Currently, the Assault Tank has internal space, but it's not suitable for combat personnel to ride, otherwise, if pollution leaks during battle, it would be dangerous.

If Su Yu really let loose and replaced the Energy Core of the Mechanical City with Ghost Energy, within a day, all city residents would be transformed into Ghost Demons.

Su Yu obviously would not do such a thing.

But now, with this ability, Su Yu can directly convert Ghost Energy into Spiritual Energy, enabling large-scale application!

Chapter 375: Ghost Hidden Blade Max Level, Core Specialization, Evil God Origin!\_2

However, after a moment of contemplation, Su Yu attempted to activate his ability again, trying to convert this mass of Spiritual Energy into data.

Unfortunately, it failed.

He could only convert Ghost Energy into data; he was powerless when it came to Spiritual Energy.

Even the Fear Intelligence was bound by such limitations.

As a result, the transformed Spiritual Energy couldn't be stored in chips, imposing many restrictions.

The generation and storage of energy are significant challenges.

Especially for an energy like Spiritual Energy, storing it in large quantities is extremely troublesome.

However, Su Yu soon had an idea.

"Xie Yitian should be able to convert Spiritual Energy into data."

Su Yu thought of Xie Yitian.

He was a genuine Data Ghost, different from the Fear Intelligence, which was tainted with the power of an Evil God.

Xie Yitian could manipulate regular Spiritual Energy, so he should be able to convert it into data.

Thus, Su Yu could collaborate with Xie Yitian.

Su Yu would convert Ghost Energy into Spiritual Energy, and Xie Yitian would then convert the Spiritual Energy into data and store it in chips.

This way, there would be no issues with energy production and storage.

At that time, the Mechanical City, cavalry, and assault tanks could all utilize the pure Spiritual Energy stored in chips.

With such a high-quality, high-density, pollution-free Energy Core, Su Yu could confidently expand his power.

One day, expanding the entire Mechanical City across the entire planet would no longer be a dream!

He might even purify the pollution of the entire planet, converting it all into pure Spiritual Energy, a benefit that would last for generations.

But these matters would have to wait; for now, he needed to attend the gathering.

"Time to go to the gathering."

Su Yu smiled slightly, and with a thought, he had already entered the Subspace.

Having maxed out his proficiency with the Ghost Hidden Blade, he no longer needed a duplicate to enter the Subspace.

His mark in the Subspace had evolved into the Evil God Origin, carrying Su Yu's consciousness, making it a part of him.

With a mere thought, Su Yu could manipulate this Evil God Origin to conjure a body in the Subspace.

"Is this my Evil God Origin?"

After arriving in Subspace, Su Yu first observed himself.

He found that his body within Subspace had become even more bizarre.

Still with that hooded tentacle appearance, but now twice as tall, reaching six meters!

Moreover, mysterious patterns had appeared on the hood and tentacles, seemingly containing some profound secrets that would drive ordinary people insane with just a glance.

Around his body were a multitude of dark spots; upon closer inspection, these spots were numerous Radiation Beast believers, kneeling, praying, and offering everything to Su Yu.

The tentacles occasionally extended from the robes, absorbing some mysterious power from these spots.

After their power was drawn, the believers prayed even more fervently.

Su Yu could sense the emotions and thoughts of these believers through the spots.

With just a thought, he could wipe out the lives of these believers.

He could also descend his consciousness into the bodies of these followers, using them to manifest in reality.

He could even bestow his power to these followers from afar.

Around these believer spots, there was also some black mist.

This black mist seemed to be condensed from intangible emotions.

"Is this what it feels like to be an Evil God?"

Su Yu looked at his body and the believer spots, feeling very curious about the misty emotions.

Although he had believers before, he had never experienced anything like this.

Tens of thousands of followers prostrated and prayed beneath him, at his whim.

A multitude of emotions surrounded him, for him to absorb.

These things seemed to elevate the essence of Su Yu's existence to a higher level, allowing him to overlook all beings from a superior perspective, no longer an ordinary person.

A Seven-star Transcendent is still human, merely living longer and possessing greater strength.

But an Evil God has surpassed humanity.

This feeling is so wonderful, it's tempting to indulge in it...

However, Su Yu only indulged for a moment before regaining his senses, shaking his head with a smile:

"What Evil God? It's still being used by me as a battery. I must take this as a warning, not to become complacent or arrogant."

Su Yu was not beguiled by these wonderful feelings into truly believing he was a god elevated high above.

Though his form was eerie and terrifying, he maintained a human heart.

This was the purpose for which the Ghost Hidden Blade profession was created: an Evil God with a human heart!

Once Su Yu was back in the right mindset, he didn't look at himself anymore, but instead turned his attention to the emotional mist.

The emotions composing the mist were not brutality, nor were they common emotions like sadness, anger, and others.

It was a very calm, cold emotion.

"Is this the emotion governed by the Evil God Ghost Hidden Blade?"

Su Yu looked at the mist, lost in thought.

Evil Gods are born of emotions; a Brutal Evil God governs the emotion of "brutality," drawing power from it.

Being the Ghost Hidden Blade, Su Yu governed an emotion that was unknown to him, extremely calm and cold.

It was almost as if... there was no emotion at all?

"The Ghost Hidden Blade is an assassination profession..."

"Is it possible this emotion is stealth, lurking, calm?"

"The Ghost Hidden Blade has command over this emotion, thus gaining the ability to assassinate and lurk? While also maintaining calmness, unaffected by Ghost Energy erosion?"

After pondering for a while, Su Yu finally had a hypothesis.

Strictly speaking, calmness isn't really an emotion but rather a state of no emotion.

But when it comes to the Subspace Evil God, who can say what's certain?

Lack of emotion — could that be considered an emotion?

Also, given the technology of the Empire, perhaps they indeed considered this state of calmness an emotion, thus creating the Evil God profession of the Ghost Hidden Blade.

This would also explain why, despite having become an Evil God, Su Yu could still retain his rationality and humanity, because the essence of this Evil God is calmness and rationality, unlikely to easily lose control.

Furthermore, it explains why back when Su Yu was maintaining invisibility in Subspace, not even the Brutal Evil God could see him.

The emotion he governed was calmness and rationality, devoid of emotion.

In Subspace, having no emotion would indeed equate to being invisible, wouldn't it?

"Truly impressive..."

Upon grasping these truths, Su Yu felt immense admiration for the researchers of the Human Empire of old, managing to come up with such a method.

As he pondered, Su Yu could sense the emotional mist around him being absorbed and transformed into an unceasing flow of strength.

Despite the Ghost Hidden Blade being at full level, Su Yu had a feeling that as long as he absorbed enough of this emotional mist, he could eventually break through the limits and ascend to eight stars!

However, this required a vast amount of calm emotion, preferably provided by his followers.

This was not difficult.

Su Yu could trace the emotional mist back to its source, secretly eroding the owners of these emotions, transforming them into his followers.

As long as he was ruthless, converting a million people, he might achieve it soon.

However, doing so might thoroughly consume him with calm emotion, turning him into a creature lacking humanity, the true Evil God Su Yu.

That was not the outcome he desired.

Thus, if Su Yu wanted to advance to eight stars, he needed to find another way, steering clear of hasty greed.

Thinking this, he looked up towards the depths of the Subspace.

Instantly, he realized his "vision" within Subspace had greatly improved after leveling up!

He could even discern directions and scenery!

He could even see some scenes from reality through Subspace.

This implies that he might be able to directly manifest in various locations in the real world through Subspace.

Subspace is extremely chaotic; previously, only Xiao Shengyin, the Navigator, could discern directions and coordinates.

But now, with the Evil God Origin, having adapted to Subspace's environment, Su Yu seemed to have gained a portion of that ability.

Though Su Yu's ability might not be as powerful as Xiao Shengyin's, after all, Xiao Shengyin was a profession specialized in Subspace navigation and an eight-star powerhouse.

Yet, it was commendable; after familiarizing himself for a period, Su Yu might be able to conduct "Subspace Delivery" like Xiao Shengyin.

"Indeed, an Evil God returning to Subspace feels like coming home..."
