Chapter 381: New Arrangements for Mechanical City! Exploring Invisible City!_2

After all, Su Yu has the Mechanical Spirit and various Intelligent Mechanics.

Even if he were alone, he could develop the Dead Silence Wilderness, and given enough time, even the entire planet's development wouldn't be an issue.

But Su Yu is not prepared to give up on these people.

After all, he is fundamentally human, not a cold machine. He has the ability to support many people, so why not do it?

Before Su Yu's crossing, there was a saying: the enlightened assist the world. While Su Yu can't assist the entire world for now, he still has the ability to support tens or hundreds of thousands of people.

The other seven-star powerhouses are building cities, perhaps not just for ceremonial needs but also to support more humans.

Humans are, after all, social animals.

Furthermore, although most people are weak and not very smart, Su Yu can easily sweep them aside.

But with a large enough number, and over time, there will always emerge one or two geniuses who can provide great help to Su Yu.

Even strong ones come up from ordinary people.

From this perspective, Su Yu supporting these people doesn't put him at a disadvantage.

After all, the once-mighty Human Empire that stretched across the Galaxy also supported countless ordinary people.

Since they are to be supported, it isn't right for these people to work overtime every day.

So Su Yu pondered for a moment, did not rush to explore the Invisible City, but instead instructed the Mechanical Spirit to send out a message.

All city residents and those in the development teams, attend a meeting!

However, since many people are busy in the wilderness, the meeting will be held online.

Su Yu's orders in the Mechanical City are not to be neglected by anyone.

Shortly, within ten minutes, when Su Yu opened the main screen, countless holographic projections of tens of thousands of people appeared throughout the Mechanical Space.

The computing power and information technology of the Mechanical City can now support a holographic meeting of tens of thousands of people online.

Yang Lie, Feng Tian, Tie Xin, and other high-levels of the Mechanical City were also present.

Upon seeing Su Yu's projection, all of them were visibly excited.

Su Yu recently kept himself busy, doing things unnoticed like a legendary figure, and barely paid attention to the affairs of the Mechanical City.

As a result, they hadn't seen Su Yu for weeks.

If it weren't for his meeting today, they would have suspected that Su Yu might have quietly left...

The other residents and those in the development teams, upon seeing Su Yu's projection, were instead feeling guilty.

They feared Su Yu would abandon them for not producing results at work.

"Greetings to the Administrator!"

Everyone bowed to Su Yu in unison.

"Hmm."

Su Yu nodded slightly, then sternly said, "I am very dissatisfied with your recent state!"

"If this continues, I will have to consider whether it's time to abandon you!"

With these words, everyone immediately felt a jump in their hearts.

Oh no, the Administrator is displeased with their lack of effort and is about to get angry!

Su Yu scanned the crowd and saw that many people were panicked and afraid to speak.

Yang Lie and the others seemed hesitant to speak.

Su Yu shook his head and continued, "Recently, I've gone through a lot of things..."

He briefly recounted joining the Transcendent Alliance, visiting the Illusion City, and saving the entire city's lives.

Everyone was shocked after hearing it.

It turned out the Administrator recently had accomplished such significant feats?

Joined such a powerful group with eight strongmen of seven stars or above?!

And that Illusion City?! A large city with a million people? Guarded by seven-star powerhouses?

There are seven or eight such cities!

So there are such wonderful places on this planet?

They were indeed yearning.

Could it be that the Administrator, after seeing a truly large city, looks down on them, these "country bumpkins," so he wants to abandon them?

Thinking of this made them feel even more downcast.

Seeing their expressions, Su Yu's tone suddenly became harsh, "Cities with millions could fall into mortal danger at any moment."

"What are you guys doing every day?"

"Mechanical City's Mechanical Creations all have strong intelligence and can work by themselves. Do they need you to watch them day and night?"

"I give you ample time to rest, so you can adjust your mental state, improve your strength, and boost your knowledge! Not to waste time on constant overtime!"

"The planet is full of crises, and even seven-star powerhouses may not be safe."

"Only with enough power can you protect yourselves and your families!"

"Though I already have seven-star, even eight-star combat power, I still feel it's not enough, striving daily to boost my strength!"

"What are you doing then?"

Su Yu's reprimand left everyone unable to lift their heads.

But it also awakened them.

Right! To be useful, one should focus on improving strength, not piling on work!

They understood!

Seeing this, Su Yu was satisfied and announced the meeting adjourned.

Sometimes a harsh approach is necessary.

His stern words should have awakened them...

However, upon checking the monitors, Su Yu found that the residents, after the meeting, didn't rest but seemed energized, immediately preparing for combat training and starting to learn more.

They were so fervent that it was going to be another sleepless night...

The Administrator is already seven-star, even with eight-star combat prowess! If someone as strong as the Administrator is working to improve, how could they not?

"Now switching to a different kind of persistence?"

"Never mind, too lazy to care."

Watching for a while, Su Yu shook his head.

It seems this bunch cannot grasp the concept of 'rest.'

Luckily, the medical technology in the Mechanical City is decent, they shouldn't exhaust themselves to death.

But in the future, Mechanical City might have to be renamed as the City of Dark Circles under the Eyes...

"However, speaking of this population, they should indeed be utilized."

"Illusion City's brain-computer interface could be considered, along with armor..."

"Once I finish exploring the Invisible City, I'll find a way to arm these residents..."

"Since I'm preparing for war with the ceremony, let these residents join the fight as well."

The people of the Mechanical City began focusing on strengthening, and Su Yu earnestly considered how to improve their abilities.

To avoid letting them idle their days away.

After organizing the people of the Mechanical City, Su Yu then set off, activating his combat armor, flying toward the Illusion City thousands of kilometers away.

...

Over twenty minutes later, Su Yu arrived at the Illusion City once again. Xie Yitian was already waiting at the city gate and immediately approached when he saw Su Yu flying over.

"City Lord Xie, are you sure you want to go this way?"

Su Yu looked at the "Xie Yitian" before him, his expression somewhat peculiar.

"Absolutely, this form is very convenient."

Xie Yitian's voice buzzed.

At the moment, his form was... a briefcase!

Clearly, this was his other carrier, and the design was quite unique.

"Suit yourself..."

Su Yu was speechless, reaching forward to grip the briefcase's handle, lifting it up, and indeed, it was quite convenient.

Then Su Yu activated his combat armor, flying towards the Invisible City five thousand kilometers to the northwest.

The invisibility feature of Su Yu's armor covered the "briefcase" as well; otherwise, he wouldn't dare to fly with him so recklessly.

Otherwise, while Su Yu might be fine, Xie Yitian could be struck by a divine lightning out of nowhere.

A quarter of an hour later, Su Yu and Xie Yitian were hovering a hundred meters in the air, looking at a vacant lot below.

That piece of land was covered in weeds, seemingly ordinary.

But with the eyesight of a seven-star powerhouse, one could vaguely see a translucent city faintly appearing in the sunlight from above.

The scale of the city was quite large, only slightly smaller than the Illusion City.

The city was full of steel structures that were not tall but very substantial, appearing to be highly defensive at a glance.

The city was encircled by steel walls.

At the city gate, several mechanized armies were marching in and out, preparing for an unknown expedition.

These armies also maintained their invisibility, detectable only from a hundred meters in the air.

"Mr. Su Yu, this city is indeed extraordinary, it seems there's truly a seven-star powerhouse in charge!"

The "briefcase" in Su Yu's hand buzzed.

"Certainly, let's go down and take a look..."

Su Yu nodded and descended with his battle armor.

Chapter 382: The Mastermind Behind the Scenes, City of Heavenly Punishment!

After Su Yu landed the battle armor, he didn't enter the city immediately. Instead, he went to the city gate to observe the incoming and outgoing troops.

The equipment on those troops and the vehicles they rode were all high-tech weaponry, quite advanced indeed.

Especially their stealth system, the most formidable of all.

If it weren't for the flaw in the air, even Su Yu would find it difficult to detect their whereabouts.

This stealth system isn't just optical invisibility.

It even has stealth effects in various aspects like electromagnetic, infrared, spiritual energy, and data, while also concealing air fluctuations.

The stealth effect is so powerful that it's almost like the one on the Brutal Battle Armor.

However, Su Yu's Brutal Battle Armor was successfully developed using the powerful Ghost Energy of the Brutal Core, along with advanced materials obtained from the Transcendent Union, making it unique and hard to replicate.

Yet this Invisible City equips even its basic soldiers with advanced stealth systems, apparently at a very low cost, allowing for mass production.

Of course, the Brutal Battle Armor can maintain invisibility at speeds over ten times the speed of sound, concealing flight fluctuations.

That's beyond what this Invisible City can compare to.

Once Su Yu landed, he could no longer see those troops.

The only flaw in this stealth technology is in the air; on the ground, it's completely invisible.

Of course, those troops couldn't see the cloaked Su Yu, as his stealth ability was even stronger than theirs.

Thus, both sides were blind, unable to see each other, and there wasn't even any sound.

Yet, by listening carefully, Su Yu could pick up some faint sounds in the void.

After all, he was a seven-star powerhouse with incredibly keen senses, and at such close range, this stealth technology couldn't completely deceive him.

"Where shall we descend the Heavenly Punishment this time?"

"Let's go to the Shiguang Settlement 1,500 kilometers away. That settlement has gathered over 50,000 people. With such strength, ordinary Radiation Beasts can hardly threaten them, allowing for a stable life. So it's time to descend Heavenly Punishment and help them understand true despair."

"Haha, our City of Heavenly Punishment descends punishment on these settlements and cities everywhere, letting them realize the harshness of Ruins Star. It's truly a tremendous achievement. They will never know where the crisis comes from until they die. Watching them perish in despair and confusion is such a great pleasure!"

Listening to these conversations, Su Yu couldn't help but frown.

Heavenly Punishment City? Descending Heavenly Punishment?

Making others perish in despair and confusion, leading to extinction?

Is this what the Invisible City is doing?

What a twisted bunch.

"This city is really twisted..."

A voice, suppressed with anger, entered Su Yu's ears. It was Xie Yitian.

Xie Yitian had also heard those voices just now, and the more he listened, the angrier he became.

This so-called Heavenly Punishment City is simply insane!

Other people's settlements live stable lives, and they descend so-called "Heavenly Punishment."

With such powerful stealth technology, it's likely that after launching an attack, others wouldn't even discover where the attack comes from, truly like a Heavenly Punishment.

In the end, the entire population of the settlement can only die in despair, confusion, and fear, never knowing who the enemy was even at their death.

Meanwhile, the people of Heavenly Punishment City found twisted pleasure watching these people die in despair.

This may also be some ritualistic need.

"This so-called Heavenly Punishment City is definitely a twisted seven-star powerhouse's creation!"

"That strongman had his own city destroyed by an inexplicable 'Heavenly Punishment' and survived, but his mind was already twisted."

"He doesn't know that the 'Heavenly Punishment' came from Zhang Chenfeng's creation, and without finding the enemy, he instead unleashed so-called 'Heavenly Punishment' on other human settlements and cities to vent his inner resentment."

Xie Yitian's voice turned icy cold.

In a short time, he had analyzed the origin of the Heavenly Punishment City's creation.

Although Xie Yitian was only speculating, Su Yu knew it was highly likely to be the truth.

The founder of this Heavenly Punishment City might have been devastated by an equally terrifying "Heavenly Punishment," with fear and despair ingrained in his very soul, completely twisting this seven-star powerhouse.

At this moment, Su Yu and Xie Yitian heard those soldiers speak again.

"It's said that there's an Illusion City 5,000 kilometers away with a million population, even more than our Heavenly Punishment City. Moreover, its technology is advanced, and the residents live worry-free lives, which is infuriating!"

"The seed of Heavenly Punishment has been planted in that Illusion City! In a while, the Master of Heavenly Punishment will personally take action and make this Illusion City disappear from Ruins Star!"

"That's wonderful..."

This bunch even mentioned Illusion City.

It seems that the previous corrosion of Illusion City was indeed the work of Heavenly Punishment City!

Upon hearing them mention Illusion City, Xie Yitian was utterly enraged, his voice chillingly cold: "The people of Heavenly Punishment City, along with that City Lord, must die!"

His spiritual energy fluctuated as if to take action and obliterate these soldiers entirely.

In fact, Xie Yitian's personality was somewhat of a good-natured homebody, generally not seeking trouble with others, nor harboring any murderous intent.

But this time, he was truly angry.

He hadn't provoked anyone, yet the people of Heavenly Punishment City, just because his people in Illusion City were living good lives, planned to unleash so-called Heavenly Punishment to exterminate the million residents of Illusion City.

This senseless malice enraged him immensely.

Chapter 383: The Puppet Master, City of Heavenly Punishment!_2

"If you're going to make a move, just do it, but don't make a fuss to avoid alarming them."

Su Yu said.

If Xie Yitian wants to act, let him act.

After all, these soldiers aren't good people either.

Moreover, if they are left alive, that Stone Light City will soon be in big trouble.

"Yes! Mr. Su Yu, rest assured, I will be careful!"

Xie Yitian responded, then his suitcase-like body suddenly transformed, assembling into a square-shaped robot.

It seems that this robot form is Xie Yitian's combat form for this carrier.

The previous suitcase state was for Su Yu's convenience during flight.

One has to admit, Xie Yitian's way of thinking is indeed rather strange...

Xie Yitian transformed into a robot, releasing a large stream of data from his body.

This data stream was extremely intense, directly striking at the brains of those soldiers.

This army, with over two thousand soldiers, was initially engaged in various actions, either conversing, checking weapons, or driving vehicles.

Under Xie Yitian's data assault, the soldiers froze for a moment before returning to normal.

"It's done."

Xie Yitian said.

Su Yu knew that Xie Yitian had used the ability of the Data Ghost to take over the soldiers' brains, turning them into his flesh-and-blood carriers.

Initially, Xie Yitian was reluctant to use such power to massively slaughter ordinary people.

He feared it might affect his sanity, making him cruel and lose his humanity, which would be more of a loss than a gain.

But now, facing these twisted soldiers from the City of Heavenly Punishment, Xie Yitian had no such concerns.

In his eyes, these people from the City of Heavenly Punishment were not humans at all, they were beasts, and killing them was serving the public good.

"A truly terrifying ability..."

Seeing Xie Yitian kill two thousand people in an instant, Su Yu couldn't help but be amazed in his heart.

Xie Yitian, in his fury, wielded a horrifying destructive force, resulting in two thousand deaths in a flash, leaving no trace.

If Xie Yitian harbored malice and one day came to Mechanical City to unleash his power, it's possible the city would change hands in a brief moment.

Though outwardly unchanged, everyone would have become Xie Yitian's carriers.

The thought of such a scenario was terrifying.

Fortunately, Su Yu also possessed a Fear Intelligence, with similar capabilities, able to guard against such data attacks and identify carriers possessed by Xie Yitian.

Otherwise, Su Yu feared he might not be able to suppress murderous intent towards Xie Yitian.

If this guy unleashed on a killing spree, his efficiency would indeed be rapid.

Moreover, as the number of flesh-and-blood carriers increased, his computing power and data would grow continuously, speeding up the slaughter!

Truly a Data Ghost!

Just like a terrifying ghost from Hell, coming to the human world.

After Xie Yitian wiped out the entire army, he controlled their bodies, continuing to march towards the city outskirts.

The elite warrior in the city must not detect abnormalities, so this army had to act naturally.

Then, Su Yu and Xie Yitian wandered around outside the city, dealing with the other two armies as well.

In the presence of two elite warriors, those mighty armies were like ants, dying without knowing how.

In a sense, Su Yu and Xie Yitian were also enacting the so-called "heavenly punishment" at this moment.

"Mr. Su Yu, shall we enter the city?"

"I just acquired intelligence about the city from the soldiers' memories."

"This so-called City of Heavenly Punishment takes pleasure in delivering heavenly punishment to other humans."

"Now it's their turn to experience heavenly punishment."

After dealing with the soldiers, Xie Yitian, still not having enough, spoke to Su Yu.

His eight-star ceremony required a population of one million as flesh-and-blood carriers, a task he initially thought hopeless to complete.

But now, seeing this City of Heavenly Punishment filled with animals, it seemed feasible!

The population of the City of Heavenly Punishment wasn't small, nearly enough for Xie Yitian's ceremony needs.

Thinking of this, Xie Yitian felt joy in his heart and couldn't help but glance at Su Yu.

Back then, Xie Yitian placed his hopes of completing the ceremony on Su Yu.

Now it seems justified; in just a week, Su Yu found this City of Heavenly Punishment for him.

Truly, Mr. Su Yu!

Upon hearing this, Su Yu glanced at Xie Yitian, shook his head, and said, "This city is useful to me, to be used for a ceremony, so you better not kill them all."

"Moreover, whether everyone in this city is so evil needs to be investigated, you can't kill arbitrarily, exercise restraint."

Upon hearing this, Xie Yitian was instantly alert, realizing he had only considered his ceremony without considering Su Yu or the possibility of good people in the city.

It seems he was overwhelmed by anger and joy.

He quickly said, "I apologize, Mr. Su Yu, I was inconsiderate. This city, discovered by you, should be handled by you."

Seeing his nervousness, Su Yu chuckled lightly, "Don't worry, for my ceremony, I just need a war. Winning, not necessarily killing them all."

"After the war, the remaining will be yours to handle."

Upon hearing this, Xie Yitian's heart filled with joy, "Thank you, Mr. Su Yu!"

In just a few words, they had already allocated the lives of everyone in the city.

First, let Su Yu start a war for the ceremony.

Then let Xie Yitian invade to turn them into flesh-and-blood carriers.

Everything arranged clearly.

Such matters are extremely brutal, but both Su Yu and Xie Yitian thought it was warranted.

After all, the City of Heavenly Punishment was excessively evil, unworthy of life!

After discussing, they headed towards the city gate.

Earlier, Xie Yitian had already obtained memories and intelligence through his invasion of the soldiers' minds.

The City of Heavenly Punishment was completely covered by an invisible shield, entering by air was not an option, as it would immediately hit the shield, alerting that City Lord.

Thus, they had to go through the main gate.

The gate's defense was also very tight, with strict security checks, preventing any suspicious targets from entering the city.

However, the Brutal Battle Armor's stealth function was indeed powerful.

Xie Yitian transformed back into a suitcase, held by Su Yu, and brazenly walked to the city gate, the security devices made no noise.

Su Yu walked into the city just like that.

Upon entering the city, the sight changed dramatically.

The previously invisible city was revealed before them.

"Is this... the City of Heavenly Punishment?"

They beheld a silver-gray Steel City, fully laid before them.

In the city, all buildings were cast from silver-gray metal, extremely heavy, visibly highly defensive.

These buildings weren't high-rises, but rather bunker-like structures, half above ground, half buried underground.

On the metal bunkers were various shooting and cannon ports.

Some passersby hurried along the roads.

These people, despite being in the city, wore heavy armor, bulletproof ones, without minding the weight or heat.

As they walked, they occasionally looked up at the sky, seemingly worried about something terrifying descending from above.

"It seems the residents of this City of Heavenly Punishment feel extremely insecure..."

Su Yu, observing the scene, shook his head.

Xie Yitian sneered beside him, "Clearly, they stand atop others, delivering heavenly punishment, yet they're so cowardly themselves, truly laughable."

However, after laughing, Xie Yitian felt a bit awkward, realizing his Illusion City had a similar cowardly style, seemingly lacking the qualification to mock the City of Heavenly Punishment...

But soon, Xie Yitian understood, cowardice isn't a sin; in this perilous planet, being cowardly is a virtue.

Yet the City of Heavenly Punishment, both cowardly and arrogant, was especially detestable.

Upon understanding this, Xie Yitian felt justified.

He thought for a moment and said to Su Yu, "In the intelligence obtained earlier, there was no information about the City Lord's location. But with the City of Heavenly Punishment's style, it seems that elite warrior must be residing underground, in the most secure Sanctuary."

Xie Yitian seemed very experienced with this.

Su Yu nodded in agreement, "Makes sense."

"Let's head underground and drag this guy out."

Chapter 384: God of Heavenly Punishment!

After Su Yu finished speaking, he didn't immediately go looking for the so-called City Lord, mainly because he didn't know where the City Lord was specifically.

He wasn't in a hurry, instead, he observed the nearby residents for a while.

He noticed that these people seemed a bit strange, constantly muttering something under their breath.

Upon listening closely, it was all about the "Great God of Heavenly Punishment," "The City Lord is the incarnation of the Great God of Heavenly Punishment," "Heavenly punishment befalls upon the blasphemers," "We are the chosen subjects..."

This group of people seemed to believe in some obscure deity: the "God of Heavenly Punishment."

And the City Lord is the incarnation of this god.

At that moment, Xie Yitian also heard the prayers of these residents and said, "These people all believe in the so-called God of Heavenly Punishment."

"According to the memories in the soldiers' minds earlier, humans are born sinful, and the so-called God of Heavenly Punishment will periodically descend to cleanse these sins."

"Only those humans who sincerely believe in this god and become agents of the City of Heavenly Punishment, bringing punishment upon others, can exempt themselves from heavenly punishment."

"This is how these guys brainwash themselves."

"...In short, they're a bunch of lunatics."

There was deep disgust and disdain in Xie Yitian's tone.

He had invaded the minds of thousands of soldiers and acquired a lot of memories.

His understanding of this City of Heavenly Punishment was already very deep.

But the more he understood, the more he realized the evil and distortion of this city.

Hearing this, Su Yu shook his head as well.

It seems that the entire city has already been brainwashed by the City Lord, becoming twisted believers.

It appears that after being struck by Zhang Chenfeng's creation, the City Lord couldn't find an enemy and imagined a "God of Heavenly Punishment," even considering himself as the incarnation of this so-called deity.

Truly insane.

After observing these residents, Su Yu looked around and then at the city's architecture.

He was pondering, where exactly was the City Lord?

At that moment, a small voice whispered in his ear, "Master... Master, I think I can feel..."

It was the Fear Intelligence speaking.

Meanwhile, from the moment he entered the city, Xie Yitian was exerting his full abilities, trying to locate the City Lord.

With Xie Yitian's Data Ghost abilities, it was incredibly useful for gathering information.

This City of Heavenly Punishment was heavily defended, but in his eyes, it was like there were no defenses at all.

Where there were smart devices and data, he would immediately invade, acquire, and gather the information from those devices.

Even living people, without completely eroding their minds, Xie Yitian could read parts of their memories and even alter some of their memories and perceptions.

His thoughts transformed into invisible data, like a ghost, sweeping across the City of Heavenly Punishment in a short time.

Xie Yitian was fully confident that he would soon locate the City Lord.

"This City Lord of the Heavenly Punishment dared to secretly mess around in my Illusion City!"

"Now I will show you what a super hacker is, what a Data Ghost is!"

Xie Yitian's purpose this time was to take revenge on the City Lord of Heavenly Punishment.

Locating the City Lord was the first step to revenge.

However, after he searched the entire city, his brow furrowed deeply.

Whether the city's intelligent hosts or the memories within the residents' minds, none contained information about the City Lord's location.

Not even the entrance to underground locations.

This made Xie Yitian feel that the City Lord of Heavenly Punishment was too well-hidden.

He even doubted whether the City Lord was in the City of Heavenly Punishment at all?

It might also be that the City Lord's hiding place was concealed by a more powerful invisible force.

Since the City Lord of Heavenly Punishment could hide such a large city, it wouldn't be surprising if his hideout had even stronger invisibility powers.

Thinking this way, Xie Yitian felt that finding the City Lord's hideout was utterly hopeless.

If he couldn't find it at all, Xie Yitian would have to consider forcibly attacking the city to force the City Lord out.

But doing so would create a big commotion, and the City Lord would most likely not show up but instead sneak away.

This City Lord is very skilled in invisibility.

If he escapes and hides somewhere, as long as he doesn't show himself, there's likely no hope for Xie Yitian to find him, so how can he get revenge?

"Moreover, even if we find his hiding place, it might be of little use."

"Because it could be that even if he stood in front of us, we couldn't see him..."

"With his skills, his invisibility is probably even more formidable, without flaws."

"If he hides anywhere, how would we find him?"

"He might even be standing right in front of me right now?"

At this thought, Xie Yitian's expression changed again.

This City Lord of the Heavenly Punishment's invisibility capability was indeed too troublesome.

It's likely that originally the City Lord of Heavenly Punishment became invisible and went to the Illusion City, secretly eroding the 'illusion.'

Despite Xie Yitian's control over the Illusion City, the fact that he never noticed anything was truly terrifying.

If it weren't for this ability, Su Yu and Xie Yitian actually wouldn't have needed to infiltrate the City of Heavenly Punishment at all.

Since confirming that the City Lord of Heavenly Punishment was the mastermind, they could have just gathered an army to besiege the city, bombard it into oblivion, and destroy them directly.

It was exactly because Su Yu wanted to hold a ceremony, they could commence a battle directly.

In a direct fight, Su Yu alone had the power to destroy the city.

But the issue was, causing such a big scene would likely allow the City Lord to escape.

This was the real threat.

Chapter 385: God of Heavenly Punishment!_2

"Mr. Su Yu, are you also looking for the whereabouts of the City Lord?"

"He should be underground, but I don't know the exact location."

Xie Yitian thought for a while but couldn't come up with a good solution.

He could only consult Su Yu.

Yet Xie Yitian didn't hold much hope. Even Su Yu might not have a good strategy against the powerful invisibility of the City Lord of Heavenly Punishment City.

Previously, Su Yu discovered the Heavenly Punishment City merely by taking advantage of his ability to fly, noticing a flaw in the air, not by truly breaking down this invisibility.

The invisibility of an entire city inevitably has flaws.

However, the City Lord of Heavenly Punishment City is just one person, much smaller, and his invisibility must be much stronger.

Xie Yitian specializes in Data Manipulation, and his abilities in data are terrifying.

The City Lord of Heavenly Punishment City, it seems, is a seven-star expert specializing in invisibility.

How strong his invisibility could be is really unimaginable.

What method could Su Yu have?

But upon hearing this, Su Yu casually pointed to the ground in the distance: "I've already found it, right there, 500 meters underground."

"Ah? You found it just like that?"

Xie Yitian instantly felt that all his previous analysis made him seem like a fool.

"Mr. Su Yu, could you tell me, how did you find it?"

Xie Yitian couldn't help but ask out of curiosity.

Su Yu casually explained, "There is... a taste of fear there."

"A taste of fear?"

Hearing this, Xie Yitian was a bit puzzled.

But he quickly recalled the hardships endured when researching the Brutal Battle Armor and shivered, understanding what Su Yu meant.

Fear Intelligence!

This powerful intelligence that spreads fear actually sensed the fear of the City Lord of Heavenly Punishment City and thus pinpointed his location!

Even though this City Lord specializes in invisibility, it's useless!

"Mr. Su Yu, truly possesses endless techniques..."

Xie Yitian sighed inwardly.

No matter the situation, Mr. Su Yu always seems to have a solution.

Back when he solved "Phantom," Mr. Su Yu was just as calm and leisurely, eventually casually taking action and releasing the Fear Intelligence, thereby handling that terrifying Data Life.

"I actually doubted Mr. Su Yu's abilities earlier, how naive."

"Mr. Su Yu is an elder who has lived for who knows how many years, has eaten more salt than I've eaten rice, incredibly experienced, such trivial invisibility, how could it trouble him..."

In Xie Yitian's mind, Su Yu's image was elevated once again.

Actually, Su Yu had just learned that the Fear Intelligence had this ability.

The Fear Intelligence had just informed him that it sensed a strong emotion of fear deep underground.

Su Yu immediately understood that the fear emotion serious enough to catch the attention of the Fear Intelligence was at least from a seven-star level expert.

It's likely this City Lord couldn't escape.

"Heh, this City Lord of Heavenly Punishment City sure has a loud reputation, but seems to lack courage. Even through the thick underground, fear can seep out."

"However, praise the Fear Intelligence, without it, it would indeed be troublesome."

Su Yu inwardly mocked the City Lord of Heavenly Punishment City and also praised the Fear Intelligence.

One has to admit that this little guy, the Fear Intelligence, is really useful.

Though it benefitted from the Brutal Evil God's aura, possessing the Brutal Evil God's core "Blessing."

With such special attributes, it's no surprise.

Though the City Lord of Heavenly Punishment City has powerful invisibility, it seems he cannot hide his emotions, and thus was located by the Fear Intelligence through the 500-meter-thick layers of earth.

Su Yu pondered for a moment, then spoke again:

"Since we've locked onto his position, let's head down directly."

After saying so, Su Yu took Xie Yitian to a remote area above the sensed location of the City Lord of Heavenly Punishment City.

He drew the Dark Demon Gold High-Frequency Chain Blade from the back of his battle armor, waved his arm, and casually slashed the ground, soundlessly digging out a large piece of alloy floor, leaving a big pit in its original place.

The Dark Demon Gold High-Frequency Chain Blade is the first legendary-level melee weapon crafted by Su Yu, extremely powerful.

Once activated, under the infusion of high-level Ghost Energy, the blade's edge vibrates at a high frequency, practically cutting through anything.

The ground of the City of Heavenly Punishment, made of extremely solid alloy, is like tofu in front of this Chain Blade.

Then Su Yu beckoned to Xie Yitian before jumping into the pit.

Xie Yitian quickly followed, and Su Yu controlled the alloy floor piece he had excavated to cover the pit, sealing it seamlessly without any flaw.

Before truly finding the City Lord of Heavenly Punishment City, it was best not to make much commotion, to avoid alerting the enemy.

Thus, Su Yu's actions were extremely cautious.

At this moment, Su Yu and Xie Yitian stood at the bottom of the pit, with the foundation of the City of Heavenly Punishment beneath their feet.

Although not made of alloy, the foundation of the City of Heavenly Punishment is extremely solid.

It is poured with hard concrete, which seems to be further reinforced by some technology and Spiritual Energy, its hardness nearly comparable to those alloys, and who knows how thick it is.

Su Yu suspected that this foundation might be 500 meters thick? After all, the City Lord is just 500 meters underground.

If the entire city had a 500-meter-thick concrete foundation, the resource expenditure would be insane.

Such a thick foundation, even with a large yield of nuclear weapons, probably wouldn't be breached without hundreds of them, its defense astonishingly strong.

It seems the City Lord of Heavenly Punishment City is extremely cautious, even the underground is heavily fortified, without any flaw.

It's unknown how that guy goes in and out?

In such solid foundations, trying to dig 500 meters deep to reach the hiding place of the City Lord of Heavenly Punishment City without creating a large commotion is rather difficult.

However, for Su Yu, it's not a problem at all.

He plunged the Dark Demon Gold High-Frequency Chain Blade into the foundation, fueling this legendary weapon with all his might.

Xie Yitian watched for a while and noticed no change, just as he was about to inquire.

Suddenly, the ground beneath them sank, as the solid foundation silently turned into extremely fine dust.

These particles vibrated at high speed, presenting a liquid-like quality due to some phenomenon and the corrosion of Ghost Energy.

Unable to bear their weight, the two immediately began sinking towards the ground.

It was the Dark Demon Gold High-Frequency Chain Blade, vibrating at hundreds of thousands of hertz, that silently pulverized the solid foundation.

Despite the hard concrete ground, Su Yu and Xie Yitian felt as if they were diving, continuously sinking with no resistance.

As they continued sinking, the pressure increased, and the foundation became more solid.

Yet, their sinking speed showed no sign of slowing.

Because the Dark Demon Gold Chain Blade kept pulverizing the foundation below.

It seemed that as long as Su Yu was willing, they could keep descending into the Earth Core.

Seeing this, Xie Yitian couldn't help but click his tongue inwardly.

He had a feeling that this Chain Blade could not only crush the foundation but also make the bodies of seven-star experts seem as fragile as tofu beneath its edge.

The two continually sank, quickly reaching a depth of 500 meters before Su Yu finally stopped activating the Chain Blade.

However, Xie Yitian wondered if Su Yu indeed wished, could they continue sinking to the Earth Core?

This deep underground, the pressure is immense, but Su Yu has the protection of the Brutal Battle Armor, and Xie Yitian, not being in his true form, doesn't mind.

"Three meters below is the hiding place of the City Lord of Heavenly Punishment City."

Su Yu stopped and surveyed around before speaking.

Deep underground, there is no light at all, but for seven-star experts, the Spirit is more useful than the eyes.

"Why do I feel like there's nothing below, still just the concrete foundation?"

Xie Yitian also sensed around carefully, feeling puzzled.

But Su Yu looked grave and said:

"It's indeed still concrete below, because the hideout of the City Lord of Heavenly Punishment City isn't in the real space but in the crevice between the material world and Subspace."

"I sensed... the aura of an Evil God!"

"It seems this City Lord of Heavenly Punishment City is no longer human but something akin to a Subspace Evil God."

"Could this be the so-called... God of Heavenly Punishment?!"
