

## Infinite 406

Chapter 406: Nihilty Evil God! The Origin of Zhao Shuangming!

The so-called Aurora City doesn't exist at all.

There is an aurora, but it's just a reflection in the sky.

In the reflection, there are faintly several distorted faces.

Each face bears the appearance of Zhao Shuangming.

At this moment, those faces are speaking: "Su Yu, where are you? Do you really exist?"

No one responds.

"Su Yu is fake, I am fake too, hahaha..."

Amidst the manic laughter, one face disappeared.

"Su Yu, do you really not exist?"

Another face spoke up.

Still, there was no response.

Then another face disappeared.

"Why are you all disappearing? Do I... do I really exist?"

Another face disappeared.

At this moment, only the last face remained.

"A bunch of fools, doubting their own existence!"

"I won't do that!"

This last face seemed resolute, not at all affected by the disappearance of Su Yu.

Just then, a force of cold, lifeless nihilism suddenly descended.

The expression of this face suddenly wavered, and it slowly dissipated too.

"So, I am also fake, the whole world is fake."

At this moment, all the faces had vanished.

After an hour, a figure clad in armor suddenly appeared on the icy plain.

It was Su Yu.

With an indifferent expression, he glanced around and then chuckled softly: "Heh, playing this game with me?"

"Got yourself trapped, huh..."

Originally, after sensing danger, Su Yu suddenly thought of his Evil God Origin.

His Evil God Origin wielded the emotions of calmness and endurance.

Su Yu pondered, if these emotions were driven to the extreme, could it make spiritual thoughts temporarily disappear?

If spiritual thoughts disappeared, naturally they wouldn't be affected by spiritual illusions.

Having thought this, Su Yu promptly acted and stimulated the Evil God Origin.

Sure enough, that calm emotion, under the stimulation of the Evil God Origin, became increasingly extreme, growing cold and void.

Eventually, Su Yu felt that his thoughts, body, and the world around him... everything... vanished under this extreme calmness.

He completely detached from the real world, utterly disappeared.

This was not invisibility; it was true disappearance, true nihilism.

In neither the material world nor the Subspace was there a trace of Su Yu.

He couldn't even sense his own body.

In this situation, he naturally escaped the influence of illusions.

In fact, this situation was extremely dangerous; if he completely submerged and couldn't come out, he would essentially be dead.

However, Su Yu discovered that even in this situation, he could maintain calmness and rationality.

He did not lose self-awareness, did not become an emotionless and thoughtless stone.

This was his professional characteristic.

In this state, he also resolved that philosophical question: how to determine whether one is false?

The answer is simple: I think, therefore I am!

Everything had disappeared, but as long as Su Yu was thinking, he believed he truly existed.

With this understanding, he wouldn't agonize over his existence, wouldn't turn into a madman.

"Nihilism... is this the future upgrade path of the Ghost Hidden Blade?"

"The Power of Nihilism..."

At this moment, Su Yu also understood what power the Ghost Hidden Blade would master in future upgrades.

The power of Nihilism!

The emotion of calmness, the Hidden Blade, when developed to the extreme, becomes nihilism.

No emotion, no thought, absolute nihilism.

The "Nihilism Evil God"? This title doesn't sound bad, perhaps more formidable than Brutality...

After figuring out his own state, Su Yu, remaining in this disappeared nihilism state, began to try perceiving the outside world.

Soon, he succeeded and sensed the outside world again.

However, it wasn't through sight, hearing, spiritual power, or other senses.

It was through something very abstract: "sense of existence."

With a sense of existence, he perceived the outside world.

This sense of perception was a new ability that emerged for Su Yu in this nihility state.

In absolute nihility, he was extremely sensitive to any "existence."

With this ability, he heard those hidden voices.

Those hidden voices were hard to detect, but they undeniably "existed," so they couldn't escape Su Yu's perception.

Upon hearing those voices, Su Yu immediately understood that these voices were the masterminds behind the scenes.

Seeing those guys were surprised at his disappearance, Su Yu immediately devised a plan.

He covertly drove that extreme nihilism emotion toward the direction of the hidden voices.

This was a form of mental pollution.

With the Evil God Origin, Su Yu could already unleash pollution on other beings.

Due to his ability trait, this pollution was extremely concealed, almost impossible to detect.

The owners of these voices had previously tormented Su Yu with spirit illusions; now it was Su Yu's turn to use his abilities to torment them.

Sure enough, Su Yu maintained the state of disappearance for three days, and the erosion lasted for three days.

Those voices immediately began to doubt whether Su Yu existed at all; otherwise, how could he vanish without a trace?

These voices were most adept in the spiritual domain.

They could clearly sense the spirit and thoughts of other beings, even Su Yu's Invisibility couldn't conceal from them.

But now, they couldn't sense Su Yu's spirit at all, as if Su Yu had never appeared.

Chapter 407: Nihilism Evil God! The Origin of Zhao Shuangming!\_2

Even in their consciousness, their memories of Su Yu started to blur.

This immediately made them question their life, wondering if Su Yu was just a fictional character they'd imagined, and never really existed.

These guys who excel at manipulating spirit illusions are actually the most prone to self-doubt.

After all, they deal with false spirit illusions every day.

Seeing too many fake things, sooner or later, they will also become distrustful of real things.

Coupled with Su Yu's secret erosion, these people slowly began to doubt even their own existence.

In the end, under Su Yu's erosion, they completely felt that they were fake.

Then, they really didn't exist anymore and disappeared.

The battle, after all, was won by Su Yu.

That's right, it was a battle, a competition on the mental front.

The spiritual ability of those guys was extremely terrifying, even Su Yu almost got deeply trapped at the beginning.

Fortunately, in the end, Su Yu found a way, using his Evil God Origin, to give those few guys a good lesson.

To resist this kind of mental power, the main reliance is on thoughts and cognition.

Those few guys were made to question their lives by Su Yu, and then they really ceased to exist.

Those few guys previously created illusions to make Su Yu doubt himself, with a similar purpose.

However, Su Yu was a bit more skillful, successfully counter-killing them.

"Spiritual ability is really frightening..."

Even though he defeated the enemy, Su Yu still felt a bit frightened.

At this moment, with the support of Brutal Battle Armor, his frontal combat power was almost invincible, and in an outburst, his power could even touch the edge of nine stars.

But in the face of that kind of spirit illusion, all of Su Yu's combat power was simply unable to be exerted.

Fortunately, he had many tricks up his sleeve.

"Who are these guys, anyway? It's a pity I didn't have time to interrogate."

Despite the shock, Su Yu also felt a bit of regret.

So far, he hadn't even seen the enemies' faces, nor did he know their origins.

He didn't even know if that Electromagnetic Vanguard Zhao Shuangming was real or fake, which was undoubtedly a bit of a regret.

"Wait, these guys might not really be dead."

Su Yu was just about to leave when suddenly an inspiration struck, and he thought of a possibility.

He activated the Evil God Origin once again, and his entire person disappeared once more.

In that Nihilism World, Su Yu carefully sensed and finally sensed an "existence".

It was those enemies!

Those enemies had actually also entered this Nihilism World.

However, outside, those enemies were several distorted human faces.

But in this Nihilism World, they had turned into one person.

Zhao Shuangming!

"So it was him after all."

When Su Yu sensed Zhao Shuangming's face, there was a sense of 'as expected' in his heart.

To date, in Jiguang City, he had only seen this one person.

Sure enough, it was still this guy.

"So it seems, it wasn't some external erosion, but Zhao Shuangming scheming against me?"

Originally, Su Yu suspected that there was an external invader, invading Jiguang City, just like how Illusion City had been eroded by the City Lord of Heavenly Punishment City.

But now it seems, there was no external invader.

From beginning to end, there was only Zhao Shuangming, this guy.

Jiguang City might never have even existed, all created as an illusion by Zhao Shuangming.

"Is this guy an evil element lurking in the Transcendent Union?"

Su Yu wasn't too surprised.

Not all the Seven-star transcendents in the Transcendent Union could be good people.

The emergence of Zhao Shuangming was normal. There might even be other evil elements lurking.

It's just unknown why Zhao Shuangming wanted to attack Su Yu? Su Yu believed he had never offended him.

This matter was not clear, leaving Su Yu uneasy.

If Zhao Shuangming still had any accomplices, that would be troublesome.

"Is there residual memory in this guy's body?"

"If so, can I pull him back to the real world and read the memory?"

While thinking this, Su Yu tried to move his body within the Nihilicity World, aiming to grab Zhao Shuangming's body and drag him back to reality.

Soon, Su Yu mastered the technique of moving within the Nihilism World.

He grasped Zhao Shuangming and then undid the Nihilism state.

In the real world.

Bang!

Zhao Shuangming's body fell to the ground.

His eyes were tightly shut, motionless, yet he was still breathing.

His body was not dead.

But upon closer sensing, Su Yu did not detect any mental or spiritual fluctuations in his body.

Su Yu could use "sense of existence" to perceive, and with this highly sensitive form of perception, he could confirm that Zhao Shuangming's body indeed lacked consciousness.

However, his brain was intact, and it still stored memories.

"Is this... becoming a plant man?"

Su Yu chuckled slightly.

A dignified Seven-star transcendent had become a plant man, which was quite peculiar.

This also revealed the terrifying nature of Su Yu's Power of Nihilism.

It could actually turn a Seven-star transcendent into a plant man.

"Fear Intelligence, try to invade this body and read his memory. Don't worry, he's already dead, no threat."

Su Yu commanded the Fear Intelligence.

Fear Intelligence possessed the capability of a Data Ghost, able to invade a human body and read memories like Xie Yitian.

It was perfect for extracting Zhao Shuangming's memories.

"Yes, Master!"

Upon hearing this, Fear Intelligence turned into a stream of data and invaded Zhao Shuangming's body.

Although timid, it had immense trust in Su Yu.

Since Su Yu said there was no threat, it believed there was no threat.

Mere moments later, the data of Fear Intelligence had fully entered Zhao Shuangming's body.

The body no longer had consciousness and couldn't resist the invasion.

"Master..."

Zhao Shuangming opened his eyes and weakly called out to Su Yu.

Fear Intelligence had already occupied this body.

Hearing this voice, Su Yu felt somewhat uncomfortable.

For Zhao Shuangming's body to emit Fear Intelligence's voice was a bit odd.

He quickly said:

"Ahem, don't say much, just extract the memory directly."

"Yes..."

Fear Intelligence immediately fell silent and transmitted a stream of data.

This data was the memory extracted by Fear Intelligence.

Su Yu quickly received it and began reading.

After a long while, Su Yu exhaled deeply, finally understanding the background of Zhao Shuangming.

Zhao Shuangming, this fellow, turned out to be a thousand-year-old monster.

He broke through to Seven-star a thousand years ago, ruling a city with a population of a million.

Later, due to Zhang Chenfeng's creations, his city faced destruction.

He himself was seriously injured, even losing his body, existing in a purely spiritual state.

His profession at that time was called: [Illusion Wandering Soul], specializing in spirit illusions with incredibly strong spiritual power.

Because of this, he barely survived, although losing his body and grievously injured, he didn't die, barely subsisting due to his strong spiritual power.

This guy didn't turn into a charlatan like the City Lord of Heavenly Punishment City, mistaking Zhang Chenfeng's creations for some kind of divine punishment.

Zhao Shuangming treated Zhang Chenfeng's creations as some powerful transcendent.

In a way, he wasn't wrong.

No grievances or hatred, city destroyed, physical body annihilated, only his spirit left, Zhao Shuangming was filled with resentment.

Thus, he wanted to enhance his strength to seek revenge.

But at this point, he no longer had a body, enhancing his strength was easier said than done?

So he immediately realized he needed to find a body.

Hence, he wandered on Ruins Star, searching for a suitable body.

Being a Seven-star transcendent, his spirit was too strong, ordinary bodies simply couldn't accommodate it.

So this search process was very lengthy.

A year later, Zhao Shuangming finally found a suitable body, that of a Six-star transcendent, undergoing a seven-star ritual.

At the critical moment of the successful ceremony, Zhao Shuangming invaded this body, not only obtaining a fleshly body but also the abilities of this Seven-star transcendent.

At this point, he held dual Seven-star professions.

This inspired him, and during the following time, he kept looking for such opportunities.

Over the millennium, it allowed him to find three more opportunities, seizing three bodies, acquiring three professions.

Electromagnetic Vanguard was one of them.

Chapter 408: 7 Top Third-Tier Professions, Space Technology!

However, although Zhao Shuangming acquired multiple professions.

It caused some sort of conflict, drastically reducing the body's lifespan. In just two to three hundred years, the body would age and die.

His current body appears to be in its prime, but in fact, it doesn't have much time left. If nothing unexpected happens, he will die in a few years, with only his spirit remaining.

His profession is special, and his spiritual power is strong. Even without a body, he doesn't die easily, but he would fall into a state of split personality.

The four faces seen earlier were four split personalities of his.

The Zhao Shuangming who attended the meeting earlier was also one of these personalities.

In the past two years, Zhao Shuangming's body is nearing death, and his mental state is worsening. The different personalities are in conflict with one another, almost breaking into a fight.

He has been pondering whether to seize another body, preferably from within the Transcendent Union.

After all these years, he has the confidence not to need to find a Six-star Transcendent performing a ceremony, but to directly seize a Seven-star Transcendent's body.

But Zhao Shuangming worries that acquiring another profession might cause him to split into another personality, becoming even more insane.

While he was hesitating, Su Yu joined the Union.

Su Yu proposed the groundbreaking theory of multi-occupation stacking, which immediately thrilled Zhao Shuangming.

Zhao Shuangming thought to himself, isn't that exactly what he's doing with multi-occupation stacking?

It's just that he achieved this by seizing others' bodies, leading to various problems like his body dying quickly and his spirit splitting.

But Su Yu seemed to have none of these flaws.

So Zhao Shuangming decided right then and there to find a way to kill Su Yu and seize his body to obtain the secret of his multi-occupation stacking!

Even though Su Yu exhibited strong power and a mysterious background,

Zhao Shuangming believed that having four professions himself, his power wasn't weak, especially because he excelled in the spiritual domain, not needing to confront Su Yu directly.

Most importantly, Zhao Shuangming was already somewhat insane at that point, acting without hesitation.

This led to the confrontation earlier.

"This Zhao Shuangming is really..."

Understanding all this, Su Yu was somewhat speechless.

He had been pretending to be a big shot at the Transcendent Union and did it quite successfully, but who would've thought it'd attract such covetousness.

Moreover, Zhao Shuangming's bizarre spiritual methods were indeed formidable, and Su Yu almost suffered a serious setback.

Perhaps because Zhao Shuangming had four professions, his spiritual power was extremely strong, even stronger than Su Yu's, making it hard for Su Yu to resist.

Fortunately, Su Yu developed the Power of Nihilism through the Evil God Origin, successfully breaking free from the influence.

Plus, Zhao Shuangming's own madness led him to be eroded by Su Yu's Power of Nihilism, resulting in self-doubt and ultimately self-destruction.

"So does multi-occupation stacking really cause conflict then..."

Su Yu couldn't help but ponder.

If Zhao Shuangming hadn't had issues due to professional conflict and poor condition, Su Yu might've already failed or remained in a stalemate with Zhao Shuangming.

This made Su Yu wary, wondering if he too might face similar issues with multi-occupation stacking.

"Probably not..."

Su Yu thought it over carefully and examined his body's state meticulously without finding anything amiss.

After thinking for a while, he understood.

Zhao Shuangming's multi-occupation stacking came from seizing others' bodies, memories, powers, and Subspace Imprints to forcibly acquire new professions.

And once acquired, he immediately possessed Seven-star power.

It's no wonder he went mad under such circumstances.

But Su Yu's multi-occupation stacking grew from his own upgrades bit by bit.

Although Su Yu's upgrade speed was extremely fast, it still couldn't compare to someone like Zhao Shuangming.

Zhao Shuangming started from scratch and took a shortcut directly to completion, which carried its cost.

Just like when Su Yu faced the Evil God Origin of the City Lord of Heavenly Punishment City: if he had chosen to devour it directly, his power would naturally have increased significantly.

But the result could've been like Zhao Shuangming's, turning into a madman with split personalities.

Once he figured all this out, Su Yu was at ease. He could continue stacking multiple occupations without worrying about conflict.

Su Yu actually had another hypothesis, that even without shortcuts, there might still be professional conflicts.

But the Profession Panel would help him solve the professional conflict problems.

However, he couldn't verify this hypothesis.

"Illusion Wandering Soul, Electromagnetic Vanguard, Aurora Messenger, Storm Mage..."

Su Yu murmured softly.

These four names were the four new professions he had just acquired.

Illusion Wandering Soul was Zhao Shuangming's initial profession, specializing in various spirit illusions, both real and illusory, highly troublesome. Su Yu was almost engulfed by this ability earlier, almost questioning reality itself.

Electromagnetic Vanguard was a straightforward combat profession, able to control electromagnetic forces, and even use them to enhance the physical body, allowing one to move at four times the speed of sound, extremely formidable.

If not for Su Yu having the Brutal Battle Armor and being able to exert Eight-star power, Zhao Shuangming might really have used this profession to have a head-on battle with Su Yu.

Aurora Messenger was a profession that controls light, able to use lasers for attacks as well as creating various optical illusions with light.

It could even use light to transform the body and spirit into light, hiding inside mirrors. The faces and the illusions of Jiguang City seen by Su Yu in the aurora were influenced by this profession's abilities.

The combination of the Aurora Messenger and Illusion Wandering Soul professions truly rendered things unpredictable and elusive.

The last one, Storm Mage, was a Spiritual Energy profession controlling storms with very strong combat power. For Mechanical City's Feng Tian, if upgraded to Seven-star, this profession would be most fitting.

Chapter 409: 7 Top Third-Tier Professions, Space Technology!\_2

However, Zhao Shuangming had never used the abilities of this profession, because it allows flight!

He was even on edge for a while when he initially acquired this profession.

If he wasn't also adept at hiding, Zhang Chenfeng's creations would have found and eradicated him long ago.

Looking at all the information about these four professions, Su Yu felt a slight thrill in his heart; they were all powerful Tier 3 professions!

And what Su Yu acquired was not just the profession names, but also the meditation technique and the elevation ritual!

Zhao Shuangming's memories really did contain some valuable things.

These are four Tier 3 professions!

Complete Tier 3 professions!

With the complete information of these four Tier 3 professions, if Su Yu had the time to think of a way to take on all four, his strength would surely skyrocket.

However, Su Yu quickly realized that the Profession Panel did not unlock these four Tier 3 professions.

"It seems that taking on these professions won't be easy."

Su Yu pondered slightly and understood.

His professions all had various prerequisite professions, skills, and meditation techniques.

So when the conditions were met, the subsequent professions were immediately unlocked, and all he needed to do to take the profession was to complete the ritual.

But for these newly obtained four professions, Su Yu hadn't taken any prerequisite professions nor practiced the meditation techniques, so he naturally couldn't unlock them immediately.

Upon closer examination of the profession panel, Su Yu found that although the Tier 3 professions were not unlocked, several Foundation Professions were:

[Possible Profession Direction: Foundation Profession · Electric Shocker]

[Possible Profession Direction: Foundation Profession · Illusionist]

[Possible Profession Direction: Foundation Profession · Light Controller]

[Possible Profession Direction: Foundation Profession · Wind Watcher]

It seems that if Su Yu wants to take on those four Tier 3 professions, he needs to start with the Foundation Professions.

Then go through Tier 1, Tier 2, accumulating step by step.

"This is a bit troublesome..."

Su Yu shook his head.

This kind of step-by-step accumulation; who knows how much time it would take.

After all, until now, he had only taken on one Tier 3 profession.

And now he had acquired four Tier 3 professions all at once.

Even with a Profession Panel, it's this troublesome for Su Yu, so Zhao Shuangming can't really be blamed for taking shortcuts.

Normally, it's almost impossible for an ordinary Transcendent to stack multiple professions.

For each profession's elevation, not only power is needed, but also vast amounts of knowledge and experience, all requiring long periods of study and accumulation.

For example, as a Mechanic, the various mechanical knowledge cannot be gained out of nowhere; it requires study and comprehension.

And possessing knowledge and converting that knowledge into power is another arduous process.

Normally, it takes decades of diligent practice and research to reach six stars with just one profession.

To reach seven stars, fortune is required to have the opportunity to perform the ritual and pass through that threshold.

After reaching seven stars, even more knowledge and experience await to be learned and accumulated for further elevation.

How can there be any extra energy to explore other professions?

Moreover, combining multiple professions can also lead to conflicts.

Only Su Yu, who has a Profession Panel and levels up quickly, dares to pursue the path of combining multiple professions.

"Let's leave these professions aside for now and complete the War Mechanic ritual first."

Su Yu didn't take any profession for now and instead left it be.

After all, his urgent task at the moment is to quickly complete the War Mechanic ritual.

"Speaking of which, I should be able to acquire another profession..."

Su Yu thought for a moment and suddenly closed his eyes.

In his vision, dots of light appeared instantly, representing his believers.

Among them, one believer's light was particularly strong, the City Lord of Heavenly Punishment.

That guy was still being tormented painfully, and Su Yu, looking at him, suddenly converted his spirit into a spike and pierced into the mind of the City Lord of Heavenly Punishment.

A moment later, Su Yu's spirit retreated.

"Invisible Messenger."

Su Yu muttered to himself.

He had just acquired the profession information of the City Lord of Heavenly Punishment from his memory.

Given that the City Lord was now his believer, Su Yu could naturally read his memory.

In fact, if the City Lord of Heavenly Punishment were in a normal state, it wouldn't be easy for Su Yu to read.

But now, with the City Lord of Heavenly Punishment being tormented into a daze by Su Yu, he naturally couldn't resist Su Yu's reading.

However, Su Yu only glanced at the information related to the profession and withdrew immediately.

He wasn't interested in the memory of the City Lord of Heavenly Punishment; immersing himself in it might affect his mental state.

The Tier 3 profession of the City Lord of Heavenly Punishment is called Invisible Messenger.

It's indeed a profession extremely adept in invisibility.

This profession doesn't have strong combat capabilities but is rather a support profession capable of rendering an entire army invisible, penetrating deep behind enemy lines, like divine troops arriving without a trace.

The City's campaigns are mainly reliant on this ability.

This ability is extremely useful, though it seems somewhat redundant with Su Yu's Power of Nihilicity?

After Su Yu acquired the Invisible Messenger profession information, the profession panel immediately unlocked a new basic profession: [Disguiser].

In fact, the City Lord of Heavenly Punishment also had another profession: Heavenly Punishment Evil God.

But since Su Yu already acquired it and even started to condense the Evil God Origin, there's no need to spend more effort on it.

Su Yu currently has mastered seven major Tier 3 professions: Ghost Hidden Blade, War Mechanic, Electromagnetic Vanguard, Illusion Wandering Soul, Aurora Messenger, Storm Mage, and Invisible Messenger.

The entire Transcendent Union only has nine Seven-star Transcendents.

With so many professions at his disposal, Su Yu could even consider cultivating his own Seven-star Transcendent force.

However, who knows how long it would take to accomplish this.

Su Yu pondered for a while and suddenly looked down at the corpse of Zhao Shuangming on the ground.

That corpse had just been pulled out from the Nihility Space by Su Yu.

Su Yu suddenly had an idea—could he send this corpse back to the Nihility Space?

He acted on it immediately, activating the Power of Nihility and infusing it into Zhao Shuangming's corpse.

He watched as Zhao Shuangming's corpse became less and less "present," eventually turning transparent.

Finally, it vanished from Su Yu's sight.

"It actually worked! Doesn't this equate to some kind of spatial technology?"

Su Yu rejoiced immediately.

Zhao Shuangming's corpse is now "stored" in that Nihility Space.

Su Yu can retrieve it at any time.

This is equivalent to some form of spatial storage technology.

He originally intended to look for spatial technology at the Transcendent Union to carry his mechanical army with him at all times.

This endeavor hadn't borne fruit, but unexpectedly he developed such an ability himself.

Su Yu looked around, then suddenly struck and sliced a large block of solid ice from the ground.

Then he used the Power of Nihilism, attempting to send this block of ice into the Nihilism World.

After a while, the block of ice vanished.

However, Su Yu felt a major consumption.

The so-called Power of Nihilism arises from pushing the Evil God Origin of the Ghost Hidden Blade to the extreme, generating a mysterious power.

Its essence is an extreme emotion of nihilism and desolation.

If someone is infected by this extreme emotion and eroded, they would doubt themselves, fall into nihilism, disappear from the real world, and enter the "Nihilism Space."

Su Yu uses this principle to turn the Nihilism Space into a storage space.

Triggering this emotion does not consume power but spirit.

Su Yu just sent that block of ice into the Nihilism World, feeling a substantial depletion in his spirit, even more so than in the battle with Zhao Shuangming.

"Why is it like this?"

Su Yu was somewhat puzzled. An ice block, why was it more troublesome than Zhao Shuangming?

"Could it be because... the ice block has no life?"

After a careful consideration, Su Yu understood.

Zhao Shuangming had life, emotions, and was a mentally unstable lunatic, easily infected by nihilism emotions.

But an ice block is lifeless; where would it have emotions?

For Su Yu to send an ice block into the Nihilism Space would naturally be much more difficult.

It's incredible that he could even get the ice block in; could an ice block also doubt itself?

"Looks like this ability has considerable limitations and still needs development."

Even with its limitations, Su Yu didn't feel disappointed.

The beginning is always the hardest; at least now, he possesses a genuine spatial storage technology, no longer restricted like Data Ghost Energy which could only store energy!

Chapter 410: Reunion, the Shocked Members, Does Su Yu Have the Power to Dominate the Planet?!

"This ability consumes a lot of the Power of Nihilism, and can only carry some important items."

Su Yu carefully analyzed the limitations of carrying items with the Power of Nihilism, and even experimented with ice cubes.

Finally, he confirmed that with his current intensity of the Power of Nihilism, he could carry objects with a volume of no more than 100 cubic meters.

In that case, most of his mechanical legion couldn't be carried, and he could only carry a few elite units.

However, that's not bad at all. It's better than nothing; at least he can transport dozens of cavalry, with room for improvement in the future.

The other restriction is that living beings cannot be carried.

This is because the Power of Nihilism can cause living creatures to fall into an extreme state of deathly quietness, losing their thoughts and life activities.

Just like Zhao Shuangming, this guy has become a plant man, essentially dead, with only his body barely alive.

A seven-star level plant man is indeed rare.

Su Yu even tested on a Data Ghost Demon and found that even data life would be affected.

The Data Ghost Demon eroded by the Power of Nihilism showed no fluctuations, with its code static, dead silent.

To be honest, such a state of data life is somewhat peculiar.

Humans becoming plant men are common.

But for data life to become "plant data" is quite unusual.

Su Yu couldn't help but worry. If that's the case, putting Mechanical Creation into the Nihilism Space would turn them into "plant machines."

Fortunately, after testing, Su Yu discovered that data life, after all, is data and has much more resilient "vitality."

Even if it becomes "plant data," it's not hopeless.

He had the Fear Intelligence reset the Data Ghost Demon, which immediately became active again, akin to "reinstalling the system."

With this, Su Yu could confidently place Mechanical Creation into the Nihilism Space for transport.

When taking them out, just a restart will do.

However, the main bodies of Nuonuo and the Mechanical Spirit cannot be placed inside.

Otherwise, after resetting, while their functions would remain unchanged, it would be as if they "died" once, and after "reinstalling the system," they would no longer be the original individuals.

After finishing the experiment, Su Yu waved his hand, releasing the ice cubes from the Nihilism Space.

He then looked around: "Coming here this time, I've gained quite a lot."

This time, he gained four Tier 3 professions, developed the Power of Nihilism, and learned space technology, which is an astonishing harvest.

Of course, the risks that came along with it were also significant. A slight mishap, and Su Yu could have been deeply trapped in illusions, unable to extricate himself.

Thinking of this, Su Yu gazed at the surrounding ice tundra, sighing: "Who would've thought, Jiguang City turned out to be like this..."

Jiguang City turned out to be entirely an illusion, with not a single living person besides Zhao Shuangming, and even the city was fake.

This city was constructed with the combined abilities of the Illusion Wandering Soul and the Aurora Messenger, and perhaps also some capabilities of the Electromagnetic Vanguard, creating a realistic illusion, almost indistinguishable from reality.

Zhao Shuangming had been a member of the Transcendent Union for decades, and others had visited Jiguang City before, but none had discovered its anomaly.

Even Su Yu didn't realize from the beginning that the city was fake.

Su Yu learned from Zhao Shuangming's memory that he built this City of Illusion, not out of mere perversity, but to "fish."

Zhao Shuangming intended to use this illusion city to lure out the murderer who destroyed his city long ago, and then take revenge.

This guy has never forgotten his vengeance for millennia, incredibly persistent.

It must be said that Zhao Shuangming has significant courage, unlike the City Lord of Heavenly Punishment, who long lost the courage for revenge.

This Zhao Shuangming could be considered a formidable figure.

Unfortunately, he was short-sighted and got involved with Su Yu, and all his schemes turned into nothing.

Are there other such formidable figures as Zhao Shuangming hidden in the shadows, perhaps already eyeing Su Yu?

"It's time to return."

Su Yu stood in silence for a moment, then powered his armor, soaring into the sky.

He aimed to return to the Mechanical City.

In fact, he originally planned to visit the cities of other Transcendent Union members.

But after the Jiguang City incident, Su Yu realized he shouldn't underestimate these cities, having nearly been caught himself.

So the remaining cities will have to wait until he completes the ceremony, becomes a War Mechanic, and his strength increases.

...

Soon, Su Yu returned to the Mechanical City, then delved into the Mechanical Space, researching mechanical knowledge daily, while quietly awaiting the army's arrival at the City of Heavenly Punishment to begin the ceremony.

The army's advance toward the City of Heavenly Punishment was slower than expected.

This was their first time on such a long march, encountering some unexpected issues, which delayed them significantly.

Traversing mountains and rivers for thousands of kilometers, with 10,000 people dealing with all sorts of logistical challenges.

They only just reached the outskirts of the City of Heavenly Punishment by the weekend.

And that's when the gathering began.

...

Deep within the Subspace, the extraordinary gathering was once again convened in the meeting hall.

Everyone had arrived at their destination, sitting around the round table.

All members turned their eyes to Su Yu.

Because this time, Su Yu's appearance had changed again.

Su Yu's six-meter-tall hooded tentacle figure, surrounded by Thunderfire Meteors, looked mighty and domineering, thanks to the Power of Heavenly Punishment.

Everyone was curious, wondering what had happened to Su Yu in just a week for him to seemingly have grown stronger once more.
