

## Infinite 416

Chapter 416: Divine Punishment Descends, Heaven After Death? Evil God Hell!

The weapons mounted on the assault tanks are all heavy war machines, so they can't be fired instantly; they need to be charged.

However, their charging speed is very fast, and in just a dozen seconds, they were fully charged.

Once charged, their barrels flickered with dazzling flowing light, which was an almost overflowing mighty energy!

Su Yu did not immediately order them to fire but instead flew above the mechanical battle group, activating various amplification skills:

Warfire Symphony! Electromagnetic Fury! Convergence! Full Firepower! Matrix Battle Group!

In a short time, these five skills were applied to the five assault tanks.

The normal combat power of the assault tanks was already six-star peak.

With these five skills, it immediately rose a full grade, with normal combat power reaching the seven-star level!

Boom!

The assault tanks fired!

Each tank simultaneously launched three thick beams of cannon light, bombarding toward the City of Heavenly Punishment!

These three beams of light were: Heavy Plasma Cannon, Heavy Fusion Laser Cannon, Heavy Pulse Shattering Cannon!

Aside from high-pollution weapons like the Heavy Ghost Energy Chip Cannon and special weapons like the Heavy Fear Spread Cannon, the assault tanks went full firepower this time!

Five tanks, a total of fifteen beams of light, each with the full force of a seven-star powerhouse's blow!

Moreover, they are from those who excel in wide-range attacks, excluding types like Tie Long of the physical school.

The beams traveled instantly, spanning tens of kilometers in a blink, pounding near the City of Heavenly Punishment.

Outside the City of Heavenly Punishment, the ten thousand troops were still confidently chatting, ready to "deliver heavenly punishment" to the Mechanical City's army.

Yet the next moment, the real "heavenly punishment" descended.

The fifteen beams of light flew in, viciously striking the City of Heavenly Punishment's shield before anyone could react.

Light!

Infinite light!

The fifteen sky-shattering beams exploded into a massive detonation upon contact with the City of Heavenly Punishment's shield.

Bear in mind, when Su Yu was not yet seven-star, with various skill amplifications, he could launch a city-destroying cannon shot that obliterated the Ghost Tribe to flat ground.

Now his power has increased manyfold.

His Mechanical Creations have also risen in strength proportionally.

Each of these fifteen beams possesses the power of that city-destroying strike back then! Even stronger!

Fifteen city-destroying strikes, all hitting the City of Heavenly Punishment at once—imagine the horror!

The exploding fireball swallowed the ten thousand troops outside, vaporizing them without leaving a trace!

At the same time, the City of Heavenly Punishment's sturdy walls and thick shield crumbled like paper under the barrage.

The exploding fireball enveloped half of the city!

Many sturdy buildings in the city, along with the Heaven's Punishment believers inside, were vaporized!

Just one volley destroyed half the city!

It's also thanks to the technological advancements of the City of Heavenly Punishment that their walls and shields were tough enough, far surpassing those of the Ghost Tribe.

If not, just this one volley could have razed the City of Heavenly Punishment to the ground!

One must admit, the people of the City of Heavenly Punishment fear death profoundly, building the city with immense solidity and strong defenses.

Otherwise, how could this salvo, equivalent to fifteen seven-star powerhouses striking together, only destroy half the city?

But no matter; just one more round of volley, and the entire City of Heavenly Punishment will be gone!

Thus, this war only requires five assault tanks, two rounds of volleys, to finish.

The remaining cavalries and combat personnel are just for show.

Such is the power of the assault tanks; such is Su Yu's current strength!

Now, even if he doesn't act, the strength of his mechanical battle group far exceeds ordinary imagination.

The annihilation of cities and nations is a mere thought away!

However, Su Yu did not let the assault tanks fire again.

Are you kidding? If two volleys wiped out the City of Heavenly Punishment, what kind of war is that?

The ceremony would be ruined too.

The assault tanks withdrew their barrels and advanced with the cavalries toward the City of Heavenly Punishment.

Now that the walls and shield are down, the rest is left to these cavalries—and those combat personnel, if they make it in time, can snag a few "heads."

The mechanical battle group moved forward, drawing ever closer.

The people in the entire City of Heavenly Punishment were completely stunned, not reacting for a long time.

It wasn't until the mechanical battle group approached within twenty kilometers of the City of Heavenly Punishment that the fireball slowly dissipated.

The people within the City of Heavenly Punishment finally regained their senses.

Suddenly, a massive number of residents and soldiers screamed madly, frantically running and hiding everywhere.

"Heavenly punishment is here! The heavenly punishment has descended..."

These people shouted as they ran, thinking that the God of Heavenly Punishment had come to deliver punishment upon them.

The proud City of Heavenly Punishment, half-destroyed in an instant by such powerful attacks, was something they had never seen before, only heard of in legends as the power of heavenly punishment.

In fact, they weren't entirely wrong to think so.

After all, Su Yu had seized the god's position from the City Lord of Heavenly Punishment, effectively making him the genuine Heavenly Punishment Evil God now.

At this moment, he truly came to deliver real heavenly punishment upon this evil city!

In the very center of the City of Heavenly Punishment, within the "Heavenly Punishment Temple," a few high-ranking, six-star level "Heavenly Punishment Admirals" were also dumbfounded.

"How is this possible? What was that just now!"

"In one strike, half the city is gone!"

## Chapter 417: Divine Punishment Descends, Heaven After Death? Evil God Hell!\_2

"What level of attack is this? It's definitely at the seven-star level, and not just one. It seems like more than ten seven-star experts attacking simultaneously!"

Although these Heavenly Punishment Admirals hadn't reached the seven-star level, they had a sharp eye.

They immediately determined that the recent attack had reached the seven-star level and was likely the result of more than ten seven-star experts working together to create such power!

But on the whole Ruins Star, where can you find more than ten seven-star experts to join forces?

So...

"Could it really be the great God of Heavenly Punishment descending a heavenly punishment on us?"

"No! Great God, we are your believers, you cannot do this..."

They also suspected it was the legendary God of Heavenly Punishment that had truly descended!

"Quickly report to the City Lord!"

These Heavenly Punishment Admirals, in a state of panic, wanted to contact the Heavenly Punishment City Lord.

However, the Heavenly Punishment City Lord had long been turned into the "Punished City Lord" by Su Yu, suffering endlessly in Su Yu's consciousness space, having no time to deal with them.

"No... no response..."

"The City Lord is already gone without a trace!"

Several of the Heavenly Punishment Admirals turned pale.

They thought of a possibility — could it be that the City Lord had been punished in advance? Dead?

Considering such a major event, the City Lord didn't appear, making the situation very grim.

Actually, with the City Lord's disposition, if truly facing such a situation, the possibility of just running away was higher.

But these Heavenly Punishment Admirals held great reverence for the City Lord and refused to believe the City Lord would flee.

Therefore, the City Lord surely had trouble! And they guessed correctly.

Even the strongest City Lord was in trouble, so now these Heavenly Punishment Admirals were at a loss, wondering if they could only wait for death?

These few Heavenly Punishment Admirals were trusted subordinates of the City Lord, having killed countless people, usually aloof, considering themselves as "Divine Envoys," messengers of heavenly punishment to humanity.

But now, facing Su Yu's attack, they realized they were as fragile as ordinary people.

However, they were ultimately madmen, quickly comforting themselves with warped logic:

"Do not panic, the City Lord is a messenger of God, and perhaps has already been summoned by God, entering the Divine Kingdom!"

"Today is the day we enter the Divine Kingdom, this is a good thing..."

"Surely, our faith in God has been acknowledged by Him, therefore today He descends with divine might, to lead us to His kingdom, granting us true immortality!"

"Relay the message to the whole city, instruct everyone to go to the city gate, and accept the God's summoning!"

They even concocted a theory saying Su Yu's attack was a divine summoning ceremony to take them into the Divine Kingdom!

Once this news spread, all the city's residents were liberated from fear and became excited.

They rushed towards the still dissipating explosive fireballs, eagerly hoping to welcome the next attack and accept the God's "summoning."

Some couldn't wait and directly jumped into the flames of the explosion, instantly incinerated into gas.

Seeing these people's actions from afar, Su Yu couldn't help but shake his head, "They're truly a bunch of lunatics..."

These guys had long lost normal people's thinking, their minds filled with divine punishment and summoning.

They are all scourges!

"Wait, what is this?"

Su Yu suddenly noticed many believer light dots appearing in his consciousness perception.

These believer light dots were surrounding the Punished City Lord's endlessly suffering figure, growing in number by the thousands and still increasing.

"These seem to be... the residents of the City of Heavenly Punishment!"

Su Yu quickly realized what these believer light dots were.

At this moment, the residents of the City of Heavenly Punishment perceived Su Yu's attack as the summoning of the God of Heavenly Punishment.

Namely, they mistook Su Yu for the God of Heavenly Punishment.

This actually hit the mark, coinciding with the real situation.

Su Yu was originally the Heavenly Punishment Evil God.

Hence, Su Yu received faith feedback.

With suddenly so many new believers, Su Yu's Heavenly Punishment Evil God Origin rapidly grew.

He even felt that the subspace shrine was accelerating towards subspace.

These believers were the energy source propelling that subspace movement.

Not just the living residents of the City of Heavenly Punishment.

Even those zealots who threw themselves into the fire, dying fervently, some of them actually manifested believer light dots again in Su Yu's consciousness space!

These people had died, their souls dispersed, returning to the universe.

But due to their fanatic faith, they reformed in Su Yu's consciousness space!

However, they had only a portion of consciousness, retaining only the most fervent faith, their thoughts incomplete, no longer considered human souls.

Yet, in any case, they were reborn, continuously providing Su Yu with a source of faith power.

Moreover, since they had died and devoted all their souls to faith, their faith was purer and more stable.

Unlike the living, who cease once dead.

"Is there actually such a benefit?"

Feeling the changes in the Evil God Origin, Su Yu was a bit stunned.

If this situation continued until the war was over, not only would he ascend as a War Mechanic.

Even the new godhood of the Heavenly Punishment Evil God would come to fruition.

It would be like conducting two ceremonies simultaneously!

By then, how much would his strength increase to?

This was truly an unexpected joy.

However, Su Yu looked at the light dots of the souls of the City of Heavenly Punishment residents in his consciousness space, feeling somewhat speechless.

"Did these folks actually receive divine summoning and enter the Divine Kingdom?"

These religious fanatics' nonsensical talk actually materialized?

Su Yu could sense that the believer light dots formed from those dead carried boundless delight emotions.

For these fervent believers, being reborn in the "Divine Kingdom" after death was an extremely blissful event.

But for Su Yu, seeing these religious zealots happy left him displeased.

These guys had killed countless, destroyed untold numbers of human settlements, and caused innumerable tragedies.

Yet after death, they could happily be reborn next to the "God," living cheerfully?

Su Yu, a deity, did not approve!

Thus, with a thought, Su Yu directly transferred these people's faith light dots next to the City Lord of Heavenly Punishment.

Let them suffer in endless torment alongside the City Lord!

The City Lord, every day, would be burned to death by Ghost Energy Flames, then revived, experiencing this pain endlessly.

At this moment, the newly arrived residents of the City of Heavenly Punishment also enjoyed this fate.

These guys had died, no longer considered living beings.

Hence, when the flames completely consumed them, they were immediately resurrected by faith power amidst agony, then quickly subjected to a new round of torment.

Instantly, their once joyful emotions transformed into terror and screams.

"No!"

"God, why do You!"

"So painful, so painful..."

Hearing the religious zealots' screams, Su Yu was satisfied, smiling.

The more miserably they wailed, the more content Su Yu felt.

A group of utterly wicked individuals still wishing for "ascension" after death and "instant enlightenment," as if such a beautiful dream existed.

Going to Hell's eighteen levels was much more fitting.

Although this world had no Hell, Su Yu would simply create one himself!

At this moment, these Heavenly Punishment believers were already in Hell, atoning for their sins.

In this world, dreaming of Heaven after death was truly naive.

You worship an Evil God! Go to Hell! Haha!

"Wait a moment, am I becoming a little perverse..."

Su Yu suddenly realized that he was enjoying the screams. Could his mind be twisted, becoming perverse?

He quickly analyzed his psychological state, exhaling in relief moments later.

He had not become mentally perverse, but was slightly influenced by the rapidly growing Heavenly Punishment Evil God Origin.

He was showing signs of developing an evil-god-like personality...

This seemed even more serious than being perverse!

Su Yu was startled, promptly activating the Evil God Origin of the Ghost Hidden Blade.

The emotions of void and death soon filled his heart.

Quickly, he calmed down, all abnormalities vanishing.

The Ghost Hidden Blade profession served as his safeguard, ensuring he wouldn't become a true Evil God.

Chapter 418: Battle! The Mad Punisher Believer!

Just as Su Yu stabilized his own state, in the subspace.

Xie Yitian was broadcasting the current situation of the City of Heavenly Punishment to the members of the Transcendent Union.

The entire gathering hall had become a "live broadcast room" in subspace.

The "audience" in the broadcast room saw that with just one salvo, the Assault Tank destroyed half of the City of Heavenly Punishment, causing a chill in their hearts.

They couldn't help but evaluate in their hearts, how many such attacks could their city withstand?

Soon they concluded that they couldn't hold up for many! Maybe even one salvo could completely destroy their cities.

Because most of their cities' defenses were not even as good as the City of Heavenly Punishment!

The Assault Tank, being a Seven-Star Mechanical Creation, came out five at a time, and its power was truly terrifying.

Although these members also possessed various powerful mechanical creations, there were basically none that reached the Seven-Star level.

At most, like Xie Yitian's missiles, through material stacking, they managed to create disposable explosives that could reach the power of seven stars.

But such things, compared to real Seven-Star power like the Assault Tank, had too big of a gap.

The Assault Tank could launch continuous attacks, had powerful mobility, defensive capabilities, and could even self-replicate.

Missiles, those explosives, were just one-time weapons.

The gap between the two was huge.

Actually, what the crowd didn't know was that Su Yu also couldn't manufacture Seven-Star level mechanisms directly.

The power of this Assault Tank reached seven stars by stacking various skill amplifications.

But since Su Yu didn't mention it, others couldn't possibly understand these inside details.

They could only see the terrifying power of the Assault Tank.

"Mr. Su Yu's strength is not only powerful in himself, but his mechanical creations are also this strong."

"Each of these five tanks actually has Seven-Star power!"

"Just these few tanks feel like I can't resist them!"

The crowd couldn't help but exclaim.

Previously, they had speculated if Su Yu could single-handedly challenge their Transcendent Union.

Now it seemed that Su Yu didn't even need to act himself, relying solely on mechanical creations would suffice!

Even if these five Assault Tanks weren't enough, more of them would surely be sufficient!

Their thoughts were not actually incorrect.

Because during that week, the Mechanical City produced another seven Assault Tanks.

One Assault Tank every day, one Seven-Star power every day!

In another week or two, relying on these Assault Tanks alone would be enough to sweep the entire Union.

If the crowd knew this fact, they would probably be shocked and jump up.

If this continued, in a year or two, wouldn't it form a Seven-Star army?

"Didn't Mr. Su Yu say his Mechanic hadn't reached the Seven-Star level yet, where did these powerful tanks come from?"

"Could it be he has another Mechanic profession?"

Amidst their exclamations, the crowd couldn't help but wonder if Su Yu had another Mechanic profession that had long reached seven stars?

Otherwise, how could he create such formidable creations like the Assault Tank?

"Or perhaps the Assault Tank wasn't Su Yu's creation, but an inherited 'legacy' from the past?"

The crowd thought of another possibility, that the Assault Tank might not have been created by Su Yu but was an inherited ancient "legacy."

They were now almost certain that Su Yu was the resurgence of an ancient powerhouse.

Since Su Yu himself could be awakened, it was quite reasonable that his former creations might awaken as well, right?

At the thought of this possibility, everyone got excited.

Because relying only on the current Su Yu, when manufacturing machines, there would be restrictions on resources, materials, time, and extraordinary levels...

No matter the quantity or quality of creations, there would be limits.

But if it were the inheritance of "legacy," allowing ancient creations to awaken, then the strength and quantity of creations would be limitless.

No one knew how powerful Mr. Su Yu was in ancient times.

Nor did they know how many creations he left behind, waiting to be awakened.

Perhaps every couple of weeks, Su Yu could bring out an army of Seven-Star Mechanical Creations.

Possibly even armies of eight stars, nine stars were not impossible.

"If that's the case, no matter how powerful the enigmatic antagonist is, in front of Mr. Su Yu's mechanical army, it's nothing but a clay chicken and pottery dog!"

The crowd was initially very worried about the mysterious antagonist.

But now, seeing Su Yu's immense power, much of their worry had dissipated.

They only awaited Su Yu to complete his ritual, enhance his prowess, and drag that enigmatic antagonist out for a thrashing!

"Moreover, if Mr. Su Yu's creations are numerous and strong enough, even Zhang Chenfeng's creations could possibly be defeated by Mr. Su Yu's mechanical army..."

The members of the Transcendent Union thought further, considering Zhang Chenfeng's creations.

Earlier, through Xie Yitian's projection, they had witnessed those creations of Zhang Chenfeng outside the atmosphere.

Those terrifying existences lurking outside the planet's atmosphere had left an indelible impression on them.

Those were absolute despair that couldn't be resisted.

Not only were they overwhelmingly powerful, but their numbers seemed nearly infinite.

The crowd couldn't imagine what level of prowess they would need to reach in order to defeat those creations and step into the Star Sea.

Even Su Yu, mysterious and powerful, was far less than those creations of Zhang Chenfeng.

But if the ancient creations left by the ancient powerhouse Su Yu were to also awaken, then there existed the possibility of contending with Zhang Chenfeng's creations.

In the crowd's mind, Su Yu was the resurgence of an ancient powerhouse from the same era as Zhang Chenfeng.

Even if not as strong as Zhang Chenfeng, the difference wouldn't be very much.

The awakening of Su Yu's ancient mechanical creations would then truly give the hope of defeating Zhang Chenfeng's creations and stepping into the Star Sea!

Chapter 419: Battle! The Mad Punisher Believer!\_2

The thought of this made everyone's hearts even more excited.

At this moment, however, Xie Yitian was pondering secretly to himself:

"Could these tanks also be creations left behind by Zhang Chenfeng?"

"Mr. Su Yu is highly likely to be Zhang Chenfeng resurrected. Could it be that he has already regained some authority, allowing him to control some creations?"

Xie Yitian's thoughts were different from the others; he long suspected that Su Yu might be Zhang Chenfeng reborn.

"In the future, will Mr. Su Yu even be able to control those terrifying creations outside the atmosphere?"

"If so, how powerful would that be..."

Xie Yitian thought with extreme excitement.

...

The members of the Transcendent Union were overwhelmed by the power of the Assault Tanks.

Meanwhile, in the real world.

The ten thousand combat personnel of the Mechanical City were dumbfounded.

They too saw the power of the Assault Tanks from afar.

This terrifying power made even a group of seven-star strong individuals tremble with fear.

Not to mention themselves.

Especially since they were right on the battlefield, more shocking than just watching a "live broadcast".

These people were originally advancing towards the City of Heavenly Punishment, but now they stopped in their tracks, stunned.

Although separated by dozens of kilometers, they had the illusion that the explosive fireballs from the Assault Tanks' attacks seemed to be spreading toward them, ready to engulf them.

One step further, and it would be the abyss of Hell.

Of course, this was just an illusion; no matter how powerful the Assault Tanks were, the aftershocks wouldn't harm them from tens of kilometers away.

But indeed, there were heatwaves and shockwaves that traveled across dozens of kilometers, reaching here.

Although greatly weakened, they still made everyone break into a sweat.

"So this is the power of the Assault Tanks!"

"This power must have reached seven-star level, right?"

"No wonder the Administrator couldn't be bothered to wait, opting for a direct assault..."

They muttered to themselves.

Only then did they realize how laughable their previous worries were.

They had only known some information about the Assault Tanks, understood some of their functions, and knew they were formidable.

But they had never thought they could be this formidable!

Seven-star level! Every single one is seven-star level!

Just relying on these five tanks could sweep through the entire City of Heavenly Punishment.

What is there to worry about?

Even if the City of Heavenly Punishment had a population of millions with hundreds of thousands of combat personnel, it would only take a few volleys.

"The Administrator's power is truly unfathomable, never seeing the limit..."

Once again, they recognized Su Yu's immense power.

Every time they thought they understood Su Yu's strength, he would instantly demonstrate even more awe-inspiring power, shattering their perception.

Realizing Su Yu's strength, everyone suddenly felt extremely confused.

"Mr. Su Yu is so powerful, there's really no need for us in this war!"

"Indeed, so why did he bring us here?"

They totally couldn't fathom why Su Yu brought them along.

With their meager strength in this war, they were practically useless!

Five Assault Tanks could handle the City of Heavenly Punishment.

Su Yu never explained the ritual to them either.

They couldn't help but start questioning the point of marching thousands of kilometers.

Fortunately, having spent a long time in the Mechanical City, they were masters of mental gymnastics, quickly finding reasons to comfort themselves:

"Mr. Su Yu is unfathomable. Since he wants us to join the battle, there must be a purpose!"

They stopped dwelling on the meaning of participation; if they couldn't figure it out, they wouldn't bother thinking about it.

Then, they set off again, going full throttle towards the City of Heavenly Punishment.

"We better hurry our march, or... it might be over already!"

At this moment, everyone's fighting spirit was unprecedentedly intense, wishing they could fly to the City of Heavenly Punishment.

These combat personnel now no longer feared the enemy's strength, only worried that they would arrive too late, and the City of Heavenly Punishment would already be annihilated by the Mechanical Battle Group.

Then their thousand-kilometer trip would truly become a joke.

Were they there to clean up the battlefield? That would be too embarrassing.

If they were late, the battlefield might even have been cleared by the Mechanical Battle Group by then...

At this time, Su Yu had already returned to his normal state, regaining his composure.

He noticed the state of those combat personnel and couldn't help but chuckle.

On the City of Heavenly Punishment side, a bunch of fanatics were rushing to get themselves killed, to receive the so-called "summoning".

On the Mechanical City side, they were rushing to join the battle, afraid of being late and missing out on the fight.

This war... feels a bit odd. )

Never seen a war fought like this.

However, since this wasn't a serious war but rather a ritual, Su Yu didn't dwell on it too much.

He transmitted data, telling the Mechanical Battle Group to slow down and waited for those combat personnel for a bit, joining the battle together to ensure the ritual's effectiveness.

When both forces gathered, they arrived not far from the City of Heavenly Punishment.

By that time, the fanatics of the City of Heavenly Punishment had also gathered outside the city.

These guys had all come out of invisibility since they were there to receive the "summoning". It was a moment of glory, so they couldn't skulk around.

Now outside the City of Heavenly Punishment, there were hundreds of thousands of people gathered in a dense mass.

These individuals, upon spotting the approaching Mechanical Battle Group and the ten thousand combat personnel, immediately brightened up.

Someone shouted: "Are you followers of the God too?"

They regarded the combat personnel of the Mechanical City as followers of the God of Heavenly Punishment too.

After all, the terrifying divine punishment attack just came from that direction.

Hearing this, the combat personnel of Mechanical City looked at each other, followers of God?

What are these lunatics thinking?

After pondering for a moment, they rationally decided not to speak to these lunatics and to engage directly.

"Kill!"

With a battle cry, the people of Mechanical City launched their attack when within range.

Armed with high-power technological weapons, the thousands launched their assault at once, turning it into a rain of bullets and lasers.

In the blink of an eye, scores of fanatics from the City of Heavenly Punishment fell.

Honestly, it seemed a bit unsporting of the people from Mechanical City to do this.

But the fanatics from the City of Heavenly Punishment, welcoming these attacks, showed no anger, only immense excitement:

"You really are the Angel Envoys of the God, helping us receive God's summoning and enter the Divine Kingdom!"

These lunatics saw the attack from the people of Mechanical City as "helping".

"Come on, let's help them too..."

With a shout, these people launched their own attack.

They considered this battle to be "mutual assistance".

You kill me, I kill others, everyone dies, and then is reborn in the Divine Kingdom...

Just as the saying goes, "In death, some need help..."

The thought processes of these lunatics were truly beyond ordinary people's comprehension.

Hearing the words of these individuals made the people of Mechanical City shudder, true lunatics! Damn them!

In the minds of those from Mechanical City, the determination to kill grew stronger.

On the side of the City of Heavenly Punishment, the fervor was even more intense.

In a short time, the battle between the two sides reached a fever pitch.

Both sides wielded powerful weapons, as well as strong protective devices.

The people of Mechanical City used the protective shields on their vehicles to fend off the attacks from the believers of Heavenly Punishment.

On the side of the believers of Heavenly Punishment, these lunatics voluntarily removed their protection, using their bodies to withstand the attacks from Mechanical City.

Hundreds of thousands face the hail of bullets, turning into blood and gore.

Su Yu hadn't even commanded the Mechanical Battle Group to attack yet, and in a short time, the City of Heavenly Punishment was already suffering heavy casualties.

Yet these lunatics were ecstatically howling, seemingly in supreme bliss.

This strange and tragic battle felt somewhat peculiar to Su Yu.

"What on earth is wrong with these people?"

Su Yu noticed something was off.

These people were a bit too crazy.

What was going on? If they had always been this crazy, they would have died out long ago!

And with the death of those Heavenly Punishment believers, a multitude of believer light points appeared in Su Yu's consciousness space.

Su Yu's Heavenly Punishment Evil God Origin was rapidly growing.

Simultaneously, the progress of his War Mechanic ritual was also rapidly increasing.

Chapter 420: Inauguration Success, Mutation! Heavenly Punishment War Mechanic!

On the talent panel, the ritual progress of the War Mechanic has now exceeded 50%.

Su Yu already felt that in the Subspace, a solid imprint was rapidly forming.

That imprint is enormous, it's a city, a battlefield.

The entire battlefield of the City of Heavenly Punishment has been projected into the Subspace, becoming Su Yu's imprint.

Within that imprint, two vague opposing forces are in a fierce battle.

The entire imprint battlefield is filled with a fervent war intent.

This fervent war intent even spills over from the Subspace into the material world.

"Are these Believers of Heavenly Punishment driven mad by this war intent?"

Su Yu understood.

It turns out these Believers of Heavenly Punishment were driven mad by the war intent of the Subspace Imprint, rendering them fearless of death.

Theoretically, everyone on the battlefield is part of the ritual and is naturally affected by it.

Even Su Yu, if not for the Evil God Origin from the Ghost Hidden Blade, might also be affected at this moment.

Realizing this, Su Yu was suddenly startled.

If the Believers of Heavenly Punishment are affected, will the people in the Mechanical City, who are also participating in the ritual, change as well?

Will these fellows also seek death?

He quickly extended his Spirit to observe the combat personnel of the Mechanical City.

The result showed that although the people of the Mechanical City did not seek death, their state was somewhat abnormal.

Their gaze was determined, eyes filled with fervor, as they continuously operated weapons and launched attacks on the Believers of Heavenly Punishment.

On the surface, these people appear not to have anything abnormal, just a bit more militant.

But if observed carefully, it becomes apparent that their actions are very precise, efficient, like machines.

It's as if they are no longer human, but some kind of bionic robot.

Evidently, they too were influenced by the power of the ritual.

However, looking at their expressions, they seem not to have lost reason but have become more calm and focused, like machines.

This is indeed different from the side of the Believers of Heavenly Punishment.

"Is this what a War Mechanic is?"

Su Yu thought to himself.

It now seems that the ritual of the War Mechanic has two kinds of influences.

The side of the Believers of Heavenly Punishment is influenced by "war," so they become extremely fervent and are not afraid of death at all.

On the other hand, the side of the Mechanical City is influenced by "mechanics," so these combatants of the Mechanical City have now become like robots.

"This influence seems a bit sinister..."

After figuring all this out, Su Yu frowned slightly.

His first Third Rank profession was the Ghost Hidden Blade, whose essence is an Evil God, with various sinister facets, which is understandable.

He originally thought War Mechanic was a serious Third Rank Extraordinary Profession.

But now, it seems that this War Mechanic is also somewhat unsound.

The ritual was only halfway through before showcasing some kind of corrupting force, affecting everyone on the battlefield.

"Come to think of it, the abilities of Third Rank professions like the Data Ghost, Illusion Wandering Soul... seem to have a sinister feel."

Su Yu recalled all the Third Rank professions he knew.

A detailed analysis revealed that all these Third Rank professions, if you really think about it, are not quite normal.

They all possess some kind of sinister trait.

"It seems at the seven-star level, even normal professions have traits similar to Evil Gods."

Su Yu concluded in his heart.

As long as it's a seven-star Transcendent or Third Rank profession, regardless of whether it's proper or not, it's actually similar to the Evil God.

For example, Xie Yitian's Data Ghost can directly possess other people's bodies; such ability might as well be called that of an Evil God.

It's just that these professions are not as terrifying in their sinister degree as real Evil Gods.

The most important is that becoming an Evil God causes a loss of reason, swayed by extreme emotions.

These Third Rank professions just have terrifying abilities, but their sanity remains normal.

The craziness of the Believers of Heavenly Punishment is not merely the effect of the ritual; they are madmen to start with.

However, the people of the Mechanical City are much more normal.

After understanding all this, Su Yu eased his mind, stopped paying attention to the matter, and focused on watching the battlefield, waiting for the ritual to complete.

At the same time, he sent a signal for the Cavalry Corps to open fire, joining the battle.

Besides war, a War Mechanic naturally needs mechanics as well.

Those Cavalry Corps are purely Mechanical Creations, even though equipped with clones of Mechanical Spirits, but they lack the true human fervent battle will.

Yet, after they joined the fight, a mechanical, cold, and efficient intent coagulated in the Subspace.

Under the influence of this intent, the ten thousand combat personnel of the Mechanical City became even stranger, more like robots.

Surprisingly, many of those combatants were ordinary people, and now, influenced by the ritual, Spiritual Energy began to generate within them.

They seemed to be awakening, becoming Spiritual Users!

However, they were so focused on combat that they didn't notice this change.

With the involvement of the Cavalry Corps, the progress of the ritual accelerated rapidly.

After all, these Cavalry units were extremely powerful, with combat capabilities above Fourth Rank strength.

If not for Su Yu fearing that killing too quickly might affect the ritual, he would have restrained the Cavalry Corps a bit. Otherwise, it wouldn't have taken much time for the Cavalry Corps to slaughter the Believers of Heavenly Punishment completely.

Even so, after not long, the progress of the ritual had already exceeded 90%.
