

Infinite 431

Chapter 431: The Origin of the Twisted Flesh Mass! 4th Tier Profession!_2

Sure enough, they discovered that the hundreds of thousands of Heaven's Punishment followers were now moving in unison, as if carved from the same mold.

Unlike humans, they looked more like a group of machines.

"As expected, hundreds of thousands of people have been controlled!"

"It's terrifying, these people seem to have completely lost their consciousness."

In fact, Xie Yitian could design each carrier with a different style of movement to simulate a normal state, but that would consume enormous computing power.

Now that the battle is over, Xie Yitian was too lazy to disguise, so he let these carriers move in the simplest way.

This shocked the people of the City of Machinery enough.

After all, they were just battling against them, and now they suddenly turned into a group of puppets.

If Xie Yitian wanted to, they could become such puppets too; how could they not be shocked?

Fortunately, they heard some clues from Xie Yitian's tone.

Xie Yitian seemed to respect Su Yu very much?

The dignified seven-star strong, as if doing things for Su Yu, even saying, "If you need anything, feel free to ask for my help."

This was too polite, clearly giving face to Su Yu, possibly even under Su Yu's command.

Realizing this, everyone was even more shocked.

This seven-star strong seemed to be Su Yu's subordinate?

"This Xie Yitian must be a seven-star strong!"

"However, listening to his tone, he seems to respect the Administrator very much, so there's no need to worry about him being unfavorable to us."

"The Administrator has even subdued a seven-star strong, truly..."

...

While Xie Yitian was communicating with the ten thousand combat personnel of the City of Machinery, Su Yu had already returned to the City of Machinery to prepare to study that twisted flesh.

Actually, he could also conduct research in the City of Heavenly Punishment.

But after all, the City of Machinery is his old base.

Now with the departure of the Cavalry Corps, Assault Tanks, and all the ten thousand combat personnel, the city's combat strength was empty.

If he didn't return to hold the fort, it would be troublesome if any enemies attacked.

So returning was good, in any case, with his supersonic speed, the round trip wouldn't take much time.

In Mechanical Space.

Su Yu moved his thoughts and activated the Power of Nihilicity.

Instantly, a massive twisted mass of flesh slowly appeared in the air.

This was a part of the consciousness of the twisted mass of flesh he had caught with the Power of Nihilicity in the banquet hall earlier.

This thing descended from the memory of the Extraordinary Association.

As it was memory congealed, it was neither real nor illusory, only the equally mystical Power of Nihilicity could capture it.

This mass of flesh, released from the Nihilicity Space by Su Yu, floated quietly in the air, very dull.

Evidently, it had been assimilated by the emotions of nihilistic silence and turned "stupid."

This was also the ingenuity of the Power of Nihilicity.

Even the most ferocious enemy, after a turn in the Nihilicity Space, comes out as a fool, a plant man, never to cause trouble again.

This mass becoming foolish, wouldn't resist, making it easier for Su Yu to study.

"Tsk tsk, I really want to throw the Brutal Evil God's split mind into the Nihilicity Space to try..."

Su Yu hadn't begun studying this mass of flesh when a thought suddenly occurred to him.

The Brutal Evil God's split mind, though sealed in the Brutal Core, was always ready to rebel.

If it were also sent into the Nihilism Space, would it also become "stupid"?

A split mind of an Evil God turned stupid would be much safer.

He might even obtain some of the Brutal Evil God's secrets from the memory of the Brutal split mind!

The more Su Yu thought about it, the more he felt this method was feasible!

The Power of Nihilism, fundamentally, was also a powerful Evil God power and should be able to deal with the Brutal Evil God split mind!

The more Su Yu thought, the more excited he became, though he did not act rashly.

After all, the Brutal Core is his biggest reliance in combat now, and if there were an accident, there would be no Regret Medicine to take.

This matter needs to be considered at length.

"It's better to study this mass of flesh first..."

Su Yu focused his attention on the mass of flesh in the air.

"Fear Intelligence!"

Su Yu called out.

"Yes... Master..."

Fear Intelligence timidly responded.

It seemed a bit scared of this mass of flesh.

"Invade this mass of flesh and extract its memory."

Su Yu ordered.

"Yes... Master..."

Though slightly scared, Fear Intelligence faithfully executed Su Yu's command.

It immediately transformed into a data stream and invaded the mass of flesh.

Soon, its data stream returned and transmitted a memory to Su Yu.

Su Yu immediately began to read these memories.

Soon, he was taken aback.

"So that's the origin of this thing..."

In the memory, this mass of flesh used to be human.

It was once a group of seven-star strong.

Yes, not one, but a group!

The quantity... as many as dozens!

Dozens of seven-star strong, even with eight-star among them!

These seven-star strong faced nearly the same fate as the Heavenly Punishment City, their cities destroyed by Zhang Chenfeng's creation, leaving only themselves barely surviving.

However, unlike the City Lord of Heavenly Punishment who had some luck, these seven-star strong were not so fortunate.

Though they survived Zhang Chenfeng's creation's attacks, they were severely wounded and difficult to recover.

Even their bodies were incomplete, with only a few organs remaining, and some only had half a brain.

These people could hardly be considered alive.

But the obsession for revenge supported them, along with their powerful life force as seven-star strong, making them undying, existing like this for countless years.

In such a state, it was already difficult to barely maintain consciousness.

Seeking revenge was as hard as ascending to the heavens, without any hope.

Not to mention, they didn't even know who their enemy was.

Day after day, year after year, they were tormented by hatred, becoming more and more twisted in mindset, on the verge of mutating into monsters.

At this time, a strong individual found them and gathered them together.

This individual was an eight-star Transcendent, also heavily injured but much better off and still retained some mobility.

He gathered those severely injured seven-star strong together and told them that to seek revenge, they needed even more powerful strength.

He had a ritual that could gather the power, wisdom, and memories of everyone together.

As a result, a new powerful life would be born, one capable of possessing the top eight-star, even nine-star power.

This new life form would replace them to seek revenge against the unknown enemy.

He asked whether everyone was willing to try.

Their minds were already twisted, and upon hearing this, they immediately agreed.

Then there was a long preparation.

After they went through a bloody ritual, sacrificing numerous lives, the remaining flesh organs of these seven-star strong fused into a new twisted life.

Which is this twisted mass of flesh.

This mass of flesh was born with top eight-star power, and quickly broke through to nine-star!

This new life form's lifetime goal was to find the murderers who destroyed those seven-star strong's cities and avenge them!

With nine-star power, combined with the fusion of multiple seven-star strong, possessing various extraordinary abilities, it quickly discovered Zhang Chenfeng's creation above the planet.

It also recognized these mechanical creations as the enemy it had sought!

But it quickly found that those terrifying mechanical creations were nowhere near matchable.

Even if its power increased tenfold or a hundredfold, it was impossible!

But it did not give up, as it was created for the goal of revenge, and abandoning that goal would result in its consciousness ceasing to exist.

Nine-star was not enough; it needed more superior power.

So, it continued to search and think, passing countless years.

Since it gathered the wisdom and strength of multiple seven-star strong, it could be considered incredibly wise, and eventually, it did find a way.

That was the "Power of Time"!

Utilizing the chaos of Subspace to gain the Power of Time.

And then using this powerful force for revenge!

After centuries of meticulous research, it designed an entirely new fourth-rank extraordinary profession, theoretically capable of possessing the Power of Time!

Chapter 432: Time Drifter, Demon of Vengeance! The Sacrifice, Su Yu!

This Fourth Rank profession is called...

[Time Drifter]!

[Fourth Rank Profession: Time Drifter]

[Description: Created with the wisdom of dozens of Seven-star Transcendents, this new Extraordinary Profession was designed after hundreds of years of dedicated research. In theory, it can harness the chaotic nature of Subspace to gain the Power of Time, enabling a limited degree of time drift to return to the past.]

[Profession Ritual: Unknown]

At the same time Su Yu learned about this Fourth Rank profession, the talent panel also popped up a prompt.

Clearly, the Profession Panel also recognized this profession.

If this profession didn't have a bit of feasibility, the Profession Panel, with its rigor, probably wouldn't pay attention to it.

This prompt is an acknowledgment! This is a real Fourth Rank profession!

"Being recognized by the talent panel, it seems this profession is truly feasible!"

"It's truly amazing to have researched and designed a new Extraordinary Profession, and a Fourth Rank one at that! It even involves the Power of Time!"

At this moment, Su Yu was even full of admiration for that twisted flesh entity.

Creating a profession is something that, although Su Yu now has formidable power and abundant knowledge, he still cannot achieve.

Let alone a Fourth Rank profession like the Time Drifter.

The twisted flesh entity also contains the wisdom of dozens of Seven-star Transcendents and the obsession of revenge, persevering through hundreds of years of research to achieve such astonishing accomplishments.

Of course, if Su Yu were given enough time to ponder and experiment, he might be able to develop a new profession.

After all, he currently possesses multiple professions and has accumulated a wealth of knowledge.

The Ghost Hidden Blade profession was initially researched by the Human Empire.

If others can research it, Su Yu considers himself no less intelligent. As long as he is willing to delve into it, he can certainly achieve it as well.

However, it's unknown how long that would take, and even if he succeeds, the strength of the new profession might not match Ghost Hidden Blade or Time Drifter.

After all, he is just one person.

Perhaps he could try in the future, but now he doesn't have the time for such slow research.

Regarding this [Time Drifter], Su Yu feels nothing but admiration.

Although the twisted flesh entity is an enemy, Su Yu still admires its achievements.

However, admiration is one thing, but the talent panel used the words [theoretically] when describing the abilities of the Time Drifter profession.

This is likely because although the profession has been designed, no one has successfully taken it up yet.

Therefore, its time traversal ability remains theoretical, and whether it is effective is uncertain.

As for the profession's ritual, Su Yu didn't obtain complete information and didn't have a specific ritual at all.

After all, the twisted flesh Su Yu captured was not the main body but an illusionary avatar descended from the Collective Memory of the Transcendent Union.

The memories contained within are incomplete.

Su Yu has secretly resolved to obtain this ritual.

The temptation of the Power of Time is too great, naturally, Su Yu wants to obtain it.

Though with the magic of the talent panel, perhaps in the future, it will unlock a profession related to time as well.

But who knows when that will happen.

Whereas the Time Drifter is available now.

To obtain the ritual, he must find the main body of the twisted flesh entity.

"I wonder if there is any profession that specializes in tracking. This guy's main body is not easy to find..."

Just as Su Yu was pondering how to find the main body of the twisted flesh entity,

suddenly, a mutation occurred!

The twisted flesh entity in front of him, originally eroded by the Power of Nihilism and having lost consciousness, turning into a "fool."

But now, a large number of tentacles all over its body suddenly started moving, and eyes opened at the tips of the tentacles.

It suddenly regained consciousness.

And just at the moment it opened its eyes, Su Yu suddenly felt a strange sensation.

He felt that the memories related to this twisted flesh in his mind were activated.

These memories emitted some kind of eerie power, infused into the twisted flesh entity before his eyes, granting it consciousness.

This change was very subtle.

If not for Su Yu's multiple professions and divine position, making him extremely sensitive, he would never have discovered such a change on the memory level.

"What is this..."

Facing this change, Su Yu was shocked and suspicious.

The eyes on the twisted flesh swiveled around before all looking at Su Yu.

A voice came from the flesh:

"It really is you, Su Yu!"

"Your memory is strong indeed, worthy of the revival of an ancient powerful being! I really want to know, exactly which ancient existence you are..."

"Are you investigating the secrets of the Power of Time? Haha, then come and find my main body!"

"Remember, my name is 'Mysterious Enemy'!"

After saying these words, the flesh closed its eyes, no longer moving.

Su Yu quickly sensed carefully, discovering that the twisted flesh no longer had any consciousness or memory, and even began to decay and dissipate.

It regained consciousness for a moment only to "commit suicide" and died.

Initially, it just turned into a "fool," but now it has completely died, and not even Fear Intelligence can extract any memory from it.

"Interesting..."

Su Yu, observing this, invoked the Power of Nihilism to retrieve the already dead flesh into Nihilism Space.

Although this thing is dead, it might be useful to keep it.

If an opportunity arises in the future, it could be used to track the main body of the twisted flesh.

Thus, naturally, it should be kept safe.

After storing this item carefully, Su Yu fell into deep thought.

He was contemplating that flesh entity just now...

No, it should now be called the Mysterious Enemy.

This entity was created originally without a name, born solely for revenge.

Chapter 433: Time Drifter, Demon of Vengeance! The Sacrifice, Su Yu!_2

The so-called Vengeance Demon, I suppose, is a name it gave itself later.

A demon born for vengeance, truly living up to its name.

What Su Yu is pondering at this moment is... how this Vengeance Demon avatar suddenly gained consciousness just now.

Moreover, after gaining consciousness, it deliberately told Su Yu its name and then self-destructed. What's the purpose of this?

A show of force? It doesn't seem like it; it didn't make any threats, only asked Su Yu to remember its name.

"It seems... it has something to do with its ability, perhaps even with the ritual?"

"Its significant ability is memory..."

After a moment of contemplation, Su Yu found the answer.

This Vengeance Demon can gain power from memories.

Earlier, Su Yu obtained a large amount of information about the Vengeance Demon from its avatar, filling his consciousness with a wealth of Vengeance Demon's memories.

Thus, it followed the mysterious connection within the memories to find him.

The ability of this creature is truly formidable and bizarre.

Just possessing memories of it would attract it, allowing it to draw power from the memories.

No wonder earlier, the people of the Transcendent Union were unknowingly influenced.

This kind of power is virtually impossible to defend against.

No wonder, from the moment it was born, it had eight-star strength, now reaching the mighty nine-star level.

Theoretically, if the Vengeance Demon hadn't revealed itself to say those words earlier and instead covertly lingered in the memories,

even Su Yu would have had a hard time discovering it for a while.

If a long time had passed, it might have found an opportunity to secretly harm Su Yu.

However, it chose not to hide but instead revealed itself, almost like it was actively reminding Su Yu.

Now with precautions, Su Yu's sensitivity would immediately detect any abnormal changes in memories, preventing any covert attacks or harm.

"The ritual of the Time Drifter is also related to memory!"

"The ritual arrangement the Vengeance Demon made in the Transcendent Union was destroyed by me."

"So it needs to find a new ritual sacrifice. And I am the new sacrifice it is looking for!"

"This ritual requires me to remember it! To deeply remember its information!"

"Previously in the Gathering Hall, when it appeared and explained its occupational ability and the Power of Time, was also to make me remember it, to strengthen the memory!"

In a flash of thought, Su Yu quickly understood.

The Vengeance Demon has already made him a ritual sacrifice.

The principle of the Time Drifter profession, Su Yu previously understood, is to traverse time through memory.

Now the Vengeance Demon has set its sights on Su Yu's memory.

Before, the Vengeance Demon made the people of the Transcendent Union sacrifices secretly.

This time, however, it's quite open about it, directly telling Su Yu in person, indicating the Vengeance Demon has changed its strategy.

After all, it's its own ritual design, estimated to be adjustable at any time.

Now the Vengeance Demon probably thinks that by openly telling Su Yu, Su Yu's memory will be deeper, and the ritual's effect will be better.

"However, this Vengeance Demon said I'm some resurrected Ancient One."

"If I indeed were a resurrected Ancient One, possessing thousands or even tens of thousands of years of memory, it would be the best sacrifice for the ritual..."

Su Yu thought of something else.

The Time Drifter profession is supposed to use the memory of the sacrifice to conduct time travel.

The longer the sacrifice lives, the more memories it has, the more ancient it is, the better the ritual's effect would probably be.

If the sacrifice's memories span only a few years, even if the ritual succeeds, it might be of no use.

Ordinary humans have limited memories, constrained by their lifespan.

So the Vengeance Demon chose the seven-star powerhouses of the Transcendent Union, after all, seven-star powerhouses have long lifespans.

But even the oldest among the Transcendent Union, Xiao Shengyin, hadn't lived for over a thousand years.

So even if the Vengeance Demon's ritual ultimately succeeded, it could perhaps only travel back a few hundred years.

Such an effect probably wouldn't be enough either.

Whereas Su Yu, this "Ancient One," probably has memories spanning thousands or even tens of thousands of years.

If Su Yu were the sacrifice, and the ritual succeeded, the Vengeance Demon could travel back to ten thousand years ago.

It might even be able to return to the battlefield of Zhang Chenfeng and Brutality and witness everything! It might even directly seek vengeance on Zhang Chenfeng himself!

Moreover, the farther back it travels, the more it could change, and the stronger the power of the Time Drifter would be.

So although the Vengeance Demon's ritual was destroyed, it didn't seem angry at all, because it found a more perfect choice for a sacrifice! Su Yu!

Who could be more suitable than Su Yu, this Ancient One, to be the sacrifice?

After understanding all this, Su Yu couldn't help but chuckle.

Because... the so-called ancientness of him is all fabricated, imagined by the members of the Transcendent Union.

Su Yu is actually just a young man, barely in his twenties...

Choosing Su Yu as a sacrifice might not even be as effective as picking a regular person who has lived longer.

"My memory only spans a short twenty years. Even if you add the previous life, it's at most fifty years..."

Su Yu said with a light laugh.

Thinking of this, he became slightly curious.

If the ritual eventually succeeded, genuinely letting the Vengeance Demon succeed.

Using Su Yu's memory for time travel.

Although it could only travel a few decades' worth of time, Su Yu is a transmigrator, and half of his memory comes from another world.

Then could it travel back to Su Yu's previous world?

Su Yu even felt a bit tempted; if he could use the Time Drifter's ability to travel back...

However, after pondering for a moment, Su Yu felt it was not feasible.

The world he was in before traveling didn't have Subspace.

And after all, the Time Drifter's power relies on the chaotic nature of Subspace.

Without Subspace, how could one travel?

Su Yu felt a slight disappointment, but suddenly a spark of Spirit Light flashed in his mind, like a thunderous strike: "Wait a minute, not necessarily!"

"Back then, I was just an ordinary person; if there were Subspace at that time, I wouldn't have known..."

Su Yu always felt that he lived in an ordinary world, a world without Extraordinary Power, before he traveled.

But upon a careful thought, was it really that way?

The world he was in before, was it truly ordinary?

If it were ordinary, how did he manage to transmigrate?

What if, in the world he was in before traveling, there were also Subspace, Spiritual Users, and Extraordinary Abilities!

If that's really the case, when his power becomes strong enough, maybe he could truly travel back!

However, after contemplating for a bit, Su Yu decided to abandon deep thinking.

After all, these ideas can't be verified for now.

Thinking too much would only add to the hassle.

He could only delve into it once his power is strong enough in the future.

For now, he must consider the matter of the Time Drifters first.

"Speaking of, I actually know someone truly suitable to be a sacrifice..."

"The Ghost Emperor!"

"That guy is ancient enough too!"

"If I get the ritual in the future, I'll use him as the sacrifice!"

Even if Su Yu doesn't know how to perform the ritual now, he's already started looking for sacrifices.

And the first target is surprisingly the Ghost Emperor.

This emperor indeed very much fits the requirements for the ritual.

Since Su Yu destroyed the Ghost Emperor's revival arrangement long ago, they had already become enemies, so Su Yu unhesitatingly designated the emperor as the first choice for the sacrifice.

Who knows what bad luck this emperor drew to antagonize Su Yu...

"But, shouldn't the Vengeance Demon also know about the Ghost Emperor, why didn't it target him? Is it unable to defeat him?"

"The Vengeance Demon has nine-star power, but it still doesn't dare to challenge the Ghost Emperor."

"It seems the Ghost Emperor is stronger than expected..."

After advancing to eight stars and donning the Brutal Battle Armor, in an ultimate burst, Su Yu should possess nine-star strength.

Originally, he had considered exploring the Radiation Land again to see what the Ghost Emperor was up to.

But thinking it over, he decided against it.

If even the Vengeance Demon dares not take on the Ghost Emperor, it's best not to court death for now.

It seems the Ghost Emperor isn't feasible for now.

But Su Yu quickly found another suitable target.

The Brutal Evil God!

This Evil God is even more ancient than the Ghost Emperor! Using it as a ritual sacrifice, who knows how potent the effect would be?!

However, using an Evil God as a sacrifice is indeed courting death more than using the Ghost Emperor...

But Su Yu isn't aiming to use Brutality itself as a sacrifice, he still has a sealed fragment of thought in his possession, which is much easier to handle...

Chapter 434: Invasion! Brutal Split Mind! Memory of the Evil God!

Su Yu took the Brutal Core from the chest of the Brutal Battle Armor, then prepared to unleash the Power of Nihilism!

But before he activated the power, he hesitated for a moment.

Because he was worried, what if something went wrong during the experiment with the Brutal Core?

The Brutal Battle Armor was a crucial part of his combat strength. If something happened, his power would be greatly reduced.

But he only hesitated for a moment before deciding to go for it!

Su Yu has now reached eight-star strength, and his main power is already quite formidable.

Compared to before, the Brutal Battle Armor wasn't as essential for him.

Even if it truly got damaged, it wouldn't be unacceptable.

Moreover, even if the Brutal Core was really damaged,

with Su Yu's current technology, using chip energy storage could still power the armor, making it barely usable.

The only downside would be a slight decrease in burst power and endurance, but it wouldn't be scrapped.

So, this experiment was doable!

Having made up his mind, Su Yu activated the Power of Nihilicity, intending to store the Brutal Core into the Nihilicity Space.

He wanted to use the miraculous Power of Nihilicity to erase the consciousness of the Brutal Split Mind, turning it completely into his Puppet.

In doing so, he could obtain the Evil God's Memory contained within the Brutal Split Mind!

In the future, he could even use this Split Mind as a sacrifice for the Time Drifter ritual.

The benefits of the experiment succeeding were too immense! That's why Su Yu dared to take the risk.

Just as Su Yu activated his power, the Brutal Split Mind within the Brutal Core immediately became alert, letting out a roar:

"Su Yu, you dare not..."

The ghost energy within the Brutal Core surged wildly, seemingly about to explode!

It seemed that the Brutal Split Mind, with the sensitivity of an Evil God, sensed the danger.

Seeing such a reaction from the Brutal Core, Su Yu immediately realized that his experiment would certainly have an effect.

The Power of Nihilicity truly posed a threat to the Brutal Split Mind! Otherwise, it wouldn't be so agitated.

He ignored the Brutal Core's nonsense and fully unleashed the Power of Nihilicity.

In no time, before the Brutal Split's words were finished, the entire Brutal Core had already been dragged into the Nihilicity Space.

At this moment, the Nihilicity Space.

This was a desolate space with no light, no sound, no life, only some items stored by Su Yu, apart from that, utter silence.

Now, in this desolate space, there suddenly appeared a Brutal Core.

The brutal aura and terrifying ghost energy fluctuations filled the entire space.

Even within this Void Space, the Brutal Core was still not calm, still fluctuating wildly, attempting rebellion.

It seemed true to being a split of the Brutal Evil God, indeed formidable.

Su Yu's consciousness also came here following, seeing this, he hurriedly released more Power of Nihilicity, suppressing the Brutal Split Mind with all his might.

It took a full half day, but finally, the Brutal Core that had been in a state of frenzy began to calm down.

Su Yu let out a long breath.

During this half-day, he manipulated the mysterious Power of Nihilicity with all his strength and was a bit fatigued, but finally managed to get things under control.

Not getting complacent, Su Yu continued to suppress it for over an hour more. Once he saw no further movement from the Brutal Core, he felt relieved.

Then he returned his consciousness to reality, once again activating the Power of Nihilism to summon the Brutal Core back from the Nihilism Space.

Upon returning to reality, the Brutal Core quietly hovered without any movement.

The ghost energy output from the core was still normal, indicating the core wasn't damaged.

But upon closer sensing, Su Yu noted that the consciousness within the Brutal Core, seemed nonexistent.

Normally, the ghost energy output by the Brutal Core would always exhibit fluctuations.

This was because the Brutal Split Mind had consciousness and emotions, naturally leading to fluctuations.

But now, while the overall power output by the Brutal Core was unchanged, it had become much more stable, without any fluctuation.

It wasn't like a being with thoughts, more like a machine.

"It really works!"

Su Yu was very excited.

Because this situation seemed to indicate that the Brutal Split Mind was assimilated by the Power of Nihilism, turning into a mindless "fool," a "Plant Evil God."

This meant that Su Yu's experiment was a success!

"Fear Intelligence!"

Su Yu called out immediately.

"Mas... Master! Can't I not go? I'm scared..."

Fear Intelligence, hearing Su Yu's call, immediately understood that it had work to do again.

Su Yu certainly wanted it to dive into the Brutal Split Mind's consciousness and retrieve memories.

But this time, Fear Intelligence was genuinely terrified, too afraid to go.

After all, entering the consciousness of an Evil God to extract memories was outrageously dangerous.

Especially when the source of Fear Intelligence's fear is precisely the Brutal Split Mind of the Brutal Evil God.

Entering the Brutal Split Mind's consciousness was a daunting challenge.

"Don't worry, nothing will happen, I'll protect you."

Su Yu hurriedly reassured it.

Besides, with his power at this time, even if the Brutal Split Mind retained some consciousness and posed any danger to Fear Intelligence, Su Yu could safeguard it.

After some comforting, Fear Intelligence finally conquered its fear, releasing a stream of data into the Brutal Core, passing through numerous seals, contacting the Brutal Split Mind.

If it was before, such direct contact with the Brutal Split Mind would have inevitably triggered its furious counterattack.

But now, this Evil God Split Mind had no response at all, behaving like a corpse.

Fear Intelligence was somewhat relieved and began to infiltrate the consciousness of the Brutal Split Mind.

The invasion was extremely difficult.

Although the Brutal Split Mind seemed to have lost its self-awareness, there was still instinctual resistance.

Chapter 435: Invasion! Brutal Split Mind! Memory of the Evil God! _2

This resistance actually has the level of Seven Stars, making it difficult for the Fear Intelligence to break through for a moment.

Su Yu, at this moment, was also fully concentrated, sensing everything and ready to help at any time.

Seeing the Fear Intelligence facing difficulties, he quickly infused his Spiritual Energy and Spirit into the data of the Fear Intelligence, providing it with strength.

The Fear Intelligence is Su Yu's Mechanical Apostle, thus it can borrow Su Yu's strength.

Of course, it can only borrow strength in terms of data.

Su Yu has not yet broken through the Seven Star level in terms of data.

However, because of Su Yu's strong Spirit and Spiritual Energy, this assistance was not insignificant.

With Su Yu's help, the Fear Intelligence immediately surged, breaking through that layer of obstruction and entering the deep consciousness of the Brutal Split Mind.

Then, for a long time, there was no movement.

The data of the Fear Intelligence was divided into two parts at this time, one part invaded the Brutal Split Mind, while another part remained outside.

Su Yu looked solemn, carefully watching over the part of the data of the Fear Intelligence that remained outside.

If there is any anomaly, he would immediately sever the connection between the two parts of the data.

Fear Intelligence is a Data Life, even if only half remains, it would be fine, just a little weaker.

Fortunately, after waiting for more than half an hour, Su Yu did not sense anything unusual.

Actually, with the computing power of the Fear Intelligence, extracting memories should only take a moment.

Now that it has been over half an hour without any progress, it is already considered abnormal.

But Su Yu knew that the Brutal Evil God has probably lived for an unknown amount of time, containing an immense amount of memories.

The Fear Intelligence needing more time is also reasonable.

Of course, if too much time is spent, then it would not be normal.

Su Yu was prepared, if there was no movement after waiting for another half hour, he would immediately sever the connection and stop the experiment.

Fortunately, three minutes later, a stream of data flowed out from the Brutal Core; it was exactly the Fear Intelligence.

Upon appearing, it immediately shouted, "Scared me to death, scared me to death!"

"Master, it's so frightening inside, so frightening..."

Looking at its data, it seemed to emit a green light, who knows what it encountered inside to be this terrified.

"Wait, emitting green light?"

Su Yu found it somewhat strange, how could formless data be visible and even emit a green light?

It seems like this Fear Intelligence not only got frightened but also underwent some peculiar transformation.

He remained calm and consoled, "Don't be afraid, your master is here..."

After consoling for a while, the Fear Intelligence seemed to calm down.

"Master, Fear Intelligence is no longer afraid."

"These are the memories I obtained inside..."

It transferred a huge stream of data to Su Yu.

Su Yu did not receive it directly, but took out a Superior Level Chip and stored all the data stream into it.

Actually, with his connection to the Fear Intelligence, he could directly receive these memories through his consciousness and digest them in a short time.

But these memories from the Evil God, he did not dare to directly receive them with his consciousness, to avoid contamination.

It's safer to store it on a chip.

Having stored the data, Su Yu spoke again, "Fear Intelligence, do not merge your two parts yet, wait for my command."

He was worried that the Fear Intelligence might have been contaminated while invading the Brutal Split Mind.

Thus, it is better for the two parts not to merge yet. If one part encounters a problem, it can simply be severed.

The Fear Intelligence was about to merge but immediately stopped obediently upon hearing the instruction.

Su Yu nodded, then took the Superior Level Chip, feeling slightly excited.

What kind of secrets do these memories from the Evil God hold?

He found a piece of intelligent equipment and began to read the memory data from the chip.

However, just as he started reading, he encountered difficulties.

Because the thinking pattern of the Brutal Evil God is completely different from humans, and naturally, its memories are also different from those of humans.

Those memories appeared to Su Yu like "garbled code," incredibly chaotic, distorted, and devoid of any discernible logic.

Su Yu knew that if he hadn't carefully used a chip to collect these memories, but had received these "garbled codes" directly with his consciousness, he would have already gone mad.

Even the proficiency of the Ghost Hidden Blade might not be able to save him.

After all, these garbled codes are so abundant that they could completely flood Su Yu's conscious self.

However, if he were to go mad and drastically change his thinking pattern, he might be able to directly read these garbled codes.

Then, Su Yu would essentially become a vessel for the Brutal Evil God's memories, becoming its avatar with no self left.

Using a chip to store the memories prevents him from going mad, but the issue is that he cannot directly read the information within these memories.

"It seems a 'decoding' process is needed."

Su Yu looked at those encoded characters, trying to discern the logic within.

This was not easy, even nearly impossible.

These garbled codes carry the memory of an Evil God, how crazed and twisted are they?

Even if they can't be understood, looking at them for too long could drive someone insane.

Ordinary people, even a Seven Star expert, cannot withstand the madness within them.

Even if the madness can be withstood, deciphering the information within remains as difficult as ever.

How could a mortal possibly comprehend the thinking logic of an Evil God?

Fortunately, as long as Su Yu does not directly receive these memories, he isn't afraid of madness.

He is also an Evil God, or rather a two-god-position Evil God, giving him some understanding of an Evil God's thinking pattern.

Therefore, after a period of deciphering, he actually managed to extract some valuable information.

He felt excited and hurriedly focused even more on the deciphering.

This deciphering continued for over ten hours, until the early morning of the next day.

"This is the origin of the Evil God..."

Facing the morning sunlight, Su Yu exhaled deeply.

He had already deciphered a portion of those memories.

This portion of the memory pertains to the origin of the Evil Gods.

The Brutal Evil God was born very early.

Even tens of thousands of years ago, or even earlier, it had already formed consciousness deep within Subspace.

However, upon its initial birth, it didn't have clear logical thinking, merely a Brutal intent slumbering deep within Subspace.

Until later, when humanity rose, billions of human armies conquered the Galaxy, igniting numerous wars.

The battles that swept across the Galaxy, filled with countless slaughters and fights, contained astonishing Brutal Will, which finally awakened the Brutal Evil God.

Not only it but also other ancient, powerful, evil, and inconceivable beings alongside it were awakened deep within Subspace.

Greed, Pride, Gluttony...

These formidable beings fed on the nearly endless emotions, thoughts, and ideas of humanity, constantly growing, never satisfied.

Later, the Human Empire conquered the Galaxy, wars ceased, the Universe was at peace, and the Human Empire was at ease.

Those passionate emotions and thoughts weakened accordingly.

Thus, those mighty beings in Subspace became hungry, dissatisfied, and furious.

Human peace and ease signified their weakening.

Thus they initiated terrifying Subspace storms, isolating cosmic travel routes, causing the Human Empire to split apart.

Meanwhile, they also bestowed power, seducing humans, leading them to fall and incite civil wars.

They also created large numbers of Ghost Energy Radiation Beasts to become humanity's enemies, keeping humanity perpetual in warfare.

Thus, war reignited, and the entire Galaxy once again burst into endless flames of war.

Intense emotions, ideas, the pain of death, despair...

Once more filled all of Subspace, delighting those mighty evil ancient beings to madness...

"Humanity's conquest of the Galaxy awakened these ancient evil beings."

"These ancient beings feed on human emotions and ideas, unwilling for humanity to have peace and joy, but always remaining in warfare. Thus, they stirred the Subspace storms."

"This is the source of the war from ten thousand years ago..."

Recalling this information, Su Yu couldn't help but sigh.

In the past, he had vaguely known some truths about the great war, but never had it been as clear as this moment.

After all, this time, he directly extracted the memory of the 'concerned god' of Brutality; nothing could be more real than this!
