

Infinite 436

Chapter 436: Promoted to 8 Stars, Mechanical Apostle!

"Moreover, it turns out that the Evil God truly has the power to affect time..."

Su Yu recalled other content from the interpretation, and his expression became even more solemn.

This time, besides acquiring knowledge about the Evil God's origin, he learned more about the Evil God's abilities.

According to what he knew, high-ranking Evil Gods like Brutal truly can influence time! They can control the Power of Time!

However, this area of knowledge is too abstract, much more abstract than the Time Drifter theory of the Vengeful Demon.

Even though Su Yu deciphered it, he couldn't understand it all at once.

He wasn't sure how exactly the Evil God manipulated time or what kind of abilities it possessed.

But just knowing that the Evil God had such abilities was enough to astonish him.

Power of Time, this magnificent power, how can it be resisted?

It's almost impossible to resist!

Unless one possesses a power of the same level!

Otherwise, under the Power of Time, even if one achieves a temporary victory, the result could be reversed at any moment!

Su Yu even suspected that, although he had turned the Brutal Split Mind into a "fool" and extracted its memory,

if Brutal's main body discovered Su Yu's presence and activated the Power of Time, perhaps the timeline would alter, resulting in Su Yu being captured and tortured by the Brutal Split Mind.

The situation would instantly reverse.

Don't look at how Su Yu seems to have the upper hand now, the one who laughs last is still uncertain.

And the Power of Time is the power that can "laugh last"!

Of course, the time-manipulating ability mastered by the Evil God might not be that terrifying; it can't truly modify the timeline at will, otherwise, it would be invincible and wouldn't have been sealed by Zhang Chenfeng until now.

But even having just a portion of such abilities was enough to make Su Yu's heart pound with fear.

"The more I understand the enemy's power, the more terrifying it seems."

"Although I'm already at eight stars, my strength is still far from enough..."

Su Yu sighed.

The stronger his power, the more he knew, and conversely, the weaker he felt.

This is the change in mindset brought about by broadening his horizons.

Boom!

Just then, he suddenly trembled all over, and the power within him surged violently.

In a short time, he felt that his connection with the Subspace had become even closer.

His Subspace Domain also became much more solid.

His Evil God Origin simultaneously grew stronger.

For an Eight-Star Transcendent, such a change signified an enhancement in strength.

"Eight stars mid-level now..."

Su Yu murmured to himself.

Indeed, in just a short time, having just broken through eight stars a day ago, he had already reached the mid-level of eight stars!

His power was still continuously increasing!

[You have gained 100,000...]

War Mechanic Professional Experience, increased significantly out of thin air, raising his professional level by dozens of levels in a short time!

Su Yu was taken aback, not understanding why such a change suddenly occurred.

Clearly, he hadn't done anything, so why had he suddenly leveled up?

But after calming down and thinking carefully, Su Yu quickly figured out the reason.

It turned out that he had just gained knowledge and secrets about the deep layer of Subspace.

This knowledge made his connection with the Subspace more intimate.

At his level, the connection with Subspace represented the level of strength.

Therefore, simply understanding the knowledge could actually enhance his strength.

The phrase "knowledge is power" was no longer a metaphor for Su Yu, but a fact.

Merely gaining knowledge immediately increased power, which was unbelievably miraculous.

Just now, Su Yu was lamenting his insufficient strength, but now his power had increased, brightening his mood considerably.

Though this bit of enhancement was still far from enough compared to the terrifying Evil God, it was better than nothing.

After all, it was power gained for free.

"Hehe, if I were to wholesale this knowledge and spread it everywhere, wouldn't it instantly create a large number of powerful Transcendents?"

Su Yu smiled faintly and spoke to himself.

But he was just talking; he wouldn't really spread this knowledge everywhere.

Knowledge is power, that's true.

But the prerequisite is being able to bear this knowledge.

Ordinary people or Transcendents cannot endure the Evil God's memory.

If they learned this forbidden knowledge, although their power would increase, they would undoubtedly go mad, and their bodies would undergo terrifying mutations.

Only a monster like Su Yu could bear the Evil God's memory without side effects and gain strength from it.

However, even Su Yu dared not interpret too much of the Evil God's memory.

That night, the part of the memory he decoded was only a small portion.

After all, the memory of the Brutal Evil God is simply too vast.

The vast memory accumulated over tens of thousands of years is not something Su Yu can fully decipher in a short time.

Su Yu even suspected that what the Fear Intelligence extracted was only a tiny part; otherwise, how could a mere chip contain so much memory?

Even this small portion was not something Su Yu dared to fully interpret.

Otherwise, even he might not be able to withstand it.

Because the knowledge Su Yu acquired was not mere textual descriptions but abstract concepts and perceptions.

Originally, those memories were transformed into data and stored in the chip.

Logically, these memories should only be texts, images, sounds, and the like.

But after Su Yu interpreted them, these texts and images immediately turned into abstract concepts and perceptions, forcibly pouring into Su Yu's consciousness, unstoppable.

This knowledge seemed almost alive, actively burrowing into the human mind.

In other words, when Su Yu was interpreting these memories, he personally "immersed" in the Brutal Evil God, experiencing everything Brutal felt.

Chapter 437: Promotion to 8-Star, Mechanical Apostle!_2

This way of acquiring knowledge surpasses all words and images, directly reaching the depths of the soul.

Although more intuitive, it inevitably brings great impact on one's spirit and sanity.

Su Yu can withstand it, thanks to his Evil God essence, otherwise he would have gone insane.

Being able to withstand it is one thing, but there is a limit.

After a night of decoding, Su Yu had reached his limit and could not decode any further for a short while.

Thankfully, he had already decoded many key memories.

"Using the Brutal Evil God's split mind to conduct the Time Drifter ritual should be feasible."

At this moment, after decoding the Evil God's memories, Su Yu had a deeper understanding of the Power of Time.

He realized that his previous assumption was feasible.

The Brutal Split Mind is the perfect sacrifice to perform the ritual.

The premise is not to be discovered by the Brutal entity; otherwise, all would be lost.

With this thought, Su Yu quickly activated the Power of Nihilism, dragging the chip containing the Evil God's memory into the Nihilism Space.

This chip contained the Evil God's memory, and if left unchecked, it would eventually mutate, turning into a small "Brutal Evil God," possibly connecting with the Brutal entity at any time.

So it must be placed in the Nihilism Space for "antivirus" to be safe.

Meanwhile, Su Yu activated his data ability to seal off those Evil God-related memories in his mind.

After all, demons can descend through memories, and Su Yu worried the Brutal entity might have similar abilities.

Then he ordered the Fear Intelligence to seal and delete the related memories too.

But after calling twice, he realized the Fear Intelligence had no response.

"Fear Intelligence?"

Su Yu called again, looking over, and was taken aback.

At this moment, the Fear Intelligence was in a very strange state.

Its data stream was floating in the air, visibly emitting a faint green glow.

Clearly, it was just virtual data, but now it seemed to have become substance.

"Master, I feel somewhat... strange..."

Fear Intelligence trembled as it spoke to Su Yu.

"Could it be contaminated by extracting the Evil God's memory?"

Su Yu became alert.

However, after sensing it carefully, he felt relieved.

Fear Intelligence was not contaminated but... upgraded!

It had reached the eight-star level!

That's why such peculiarities like data materialization appeared!

Initially, as a Data Ghost, it needed at least a population of a million as a carrier to conduct the ritual to ascend to eight stars.

However, it successfully invaded a split mind of an Evil God earlier, which was astonishing even though it was just a split mind.

This astonishing feat was sufficient to surpass invading a million humans.

Therefore, it upgraded!

The previous invasion of the Brutal Split Mind was equivalent to its upgrade ritual.

Another reason was that as Su Yu's Mechanical Apostle, it naturally grew along with Su Yu's progress.

Now that Su Yu was already at eight stars, upgrading was naturally not too difficult for it.

Otherwise, simply invading the Brutal Split Mind might not be enough for its promotion.

After sensing all this, Su Yu was delighted.

He now had another eight-star level helper!

Although he didn't yet know the abilities Fear Intelligence possessed after reaching eight stars, they must be extremely powerful.

After all, just look at Xie Yitian, who was so formidable at merely seven stars.

Not to mention eight stars?

Xie Yitian had been toiling for hundreds of years, and even now, his ritual was only halfway through, unsure where to find the other half.

Yet Fear Intelligence had ascended to eight stars first, truly a marvel.

"Mas... Master..."

Fear Intelligence, seeing Su Yu not replying, became even more worried.

Despite its upgrade, it remained timid, even unaware of its promotion,

Su Yu quickly comforted, "Don't worry, nothing's wrong; you've merely ascended to eight stars..."

After Su Yu's reassurance, Fear Intelligence finally calmed down.

It carefully sensed its power, also feeling delighted inside.

"Master, I've become very powerful!"

After speaking, its data suddenly changed, completely transforming from virtual data to substance.

In the air, it transformed into a faint green sphere, quietly floating.

"What's this..."

Su Yu, startled, reached out to touch it, finding the sphere had a tactile feel and mass, resembling actual material.

"It truly materialized data..."

Su Yu understood that this was the ability Fear Intelligence gained upon reaching eight stars—Data Materialization!

This ability signified that Fear Intelligence acquired physical-level offensive power.

No longer confined to battling solely at the data level as before.

"Impressive, if fully developed, this ability will surely be extremely powerful!"

Su Yu praised.

In his mind, he had already started envisioning ways to utilize Fear Intelligence's abilities.

Data Materialization—does this mean turning virtual weapons and equipment into tangible substance?

And these data-formed weapons and equipment can revert to data anytime, ever-changing, mysterious beyond measure.

This power is indeed formidable!

[Third Mechanical Apostle·Fear Intelligence]

[Creator: Su Yu]

[Species: Data Life Form]

[Core Ability: Data Evolution (as a Data Life Form, the Mechanical Spirit possesses limitless growth potential)]

[Skills:]

...

[Fear Blessing: Due to some unknown reason, the Mechanical Spirit (Clone) stole the core blessing "Fear" of the Brutal Evil God, causing some mutation, exerting strong suppression over data life that worships Evil Gods.]

[Data Ghost: The Mechanical Spirit (Clone) devoured a high-level data life that worships the Evil God, gaining its abilities, becoming a Data Ghost. Using this ability, it can transform into a Data Ghost, freely possessing mechanical creations and flesh lives.]

[Data Ghost Energy Control: The Mechanical Spirit (Clone) devoured a high-level data life that worships the Evil God, gaining its ability to control data ghost energy.]

[Data Materialization: An eight-star data ghost, capable of turning formless data into tangible, substantial matter!]

[Comprehensive Strength Evaluation: Eight-star Beginner Level]

The attributes of Fear Intelligence on the Profession Panel had also changed.

A new ability of [Data Materialization] appeared.

"Great, I can further help the Master..."

Fear Intelligence, feeling its transformation, was also very pleased.

Despite being timid, it was very loyal to Su Yu, and merely being able to assist Su Yu made it happy.

However, while Fear Intelligence was delighted, another "sphere" was not.

An equally faint green sphere suddenly flew out, making a slightly aggrieved sound: "Master, Nuonuo also wants to help you..."

It was Nuonuo!

This little one was upset upon seeing the newly arrived Fear Intelligence surpass it in strength and receive Su Yu's praise.

After speaking, its entire spherical body suddenly changed, expanded, contracted...

In a short moment, its size expanded tenfold and then contracted tenfold.

Finally, it returned to its original size, floating in front of Su Yu.

Although its size returned, the aura emanating from its body had become completely different from before.

Su Yu was slightly surprised, then felt it carefully, becoming even more delighted.

Because... Nuonuo also broke through to eight stars!

Nuonuo didn't even need to invade the Brutal Split Mind to hold a ritual like Fear Intelligence.

It directly synchronized its upgrade with Su Yu's power growth.

Fear Intelligence's Data Ghost ability was obtained through devouring "Fantasies," not originally inherent.

Hence, ascending was a bit troublesome.

However, all of Nuonuo's abilities were personally crafted by Su Yu and closely tied to him.

Therefore, once Su Yu broke through to eight stars, Nuonuo simultaneously broke through too!

The strength of Nuonuo after breaking through eight stars naturally greatly advanced as well.

[First Mechanical Apostle·Ghost Energy Nuonuo]

[Creator: Su Yu]

[Species: Mechanical Life Form]

[Core Ability: Mechanical Evolution (as the mechanical life form you created, Nuonuo possesses limitless growth potential, with strength linking to your own Spiritual Energy)]

Chapter 438: 2 Great 8-Star Mechanical Apostles, Powerful Imitation Ability!

[Skill:]

[Mechanical Fusion: Nuonuo possesses abilities beyond normal Mechanical Life Forms, with a powerful Energy Core and a strong Ghost Energy Field, capable of fusing all Mechanical Creations... After advancing to eight stars, it can split its body and simultaneously fuse multiple Mechanical Creations, greatly enhancing their power. The current number it can fuse is 10.]

[Ghost Energy Field: As a Mechanical Life Form, Nuonuo, through its connection with its master, has mastered the use of Ghost Energy, possessing a specialized Ghost Energy Field. Mechanical Creations within this field, if damaged, will rapidly repair and be significantly enhanced by Ghost Energy.]

[Mechanical Simulation: After breaking through to eight stars, even without Mechanical Creations, Nuonuo can use its own body to directly simulate various bodies. The simulated bodies can have a maximum of top-level seven-star strength. Due to size limitations, it cannot simulate bodies that are too large. The current number it can simulate is 1.]

[Comprehensive Strength Assessment: Beginner Eight-star]

Nuonuo's skills have also changed.

Firstly, its Mechanical Fusion capability, which previously could only fuse one Mechanical Creation, has now directly increased to ten!

Previously, Su Yu had to choose between using Nuonuo to fuse and enhance the production line or the chip machines, thereby forgoing the enhancement of the Brutal Battle Armor.

It has to be said, this was a huge limitation, forcing Su Yu to make a choice.

For instance, when he went out, taking Nuonuo along.

The enhancement of the production line would cease, leading to a drop in the output of Mechanical Creations and chips.

But now, this limitation is gone.

Now Nuonuo can simultaneously fuse and enhance the production line, Brutal Battle Armor, Assault Tank... and various other Mechanical Creations.

Su Yu no longer has to make a choice; enhancing everything is enough.

Moreover, now that Nuonuo is eight stars, the enhancement effect will surely be more powerful than before.

Next, Nuonuo has an additional function, simulating bodies.

It can even directly simulate top-level seven-star bodies, which means Nuonuo at this point is not just providing enhancement assistance.

It can also directly participate in combat.

Both Fear Intelligence and Nuonuo were primarily auxiliary types, but upon reaching eight stars, they both gained combat abilities.

Of course, given Nuonuo's personality, it still prefers assisting, but if Su Yu truly wants it to fight, it might grumble a bit but won't refuse.

However, Su Yu hasn't tried this body simulation ability yet, unsure of its effect?

He thought for a moment, then commanded, "Nuonuo, what bodies can you simulate? Show me..."

Upon hearing this, Nuonuo floated up and down in the air.

Then its entire body suddenly split into countless small metal blocks, quickly assembling and transforming at a dizzying speed in the air.

But after busying itself for a while, Nuonuo suddenly returned to its original spherical form.

Su Yu was a bit puzzled, is that it? What did that turn into?

Nuonuo said somewhat frustrated, "Master, I wanted to simulate an Assault Tank, but it seems to have failed { *x...x* }..."

Su Yu almost laughed out loud.

Nuonuo, being so small, wanted to simulate a twenty-meter long Assault Tank, what was it thinking?

How could it possibly simulate that?

"Ahem, Nuonuo, try a smaller body, simulate a Cavalry this time." Su Yu suggested.

"Yes, Master!"

Nuonuo was very obedient, its body immediately began to reshape and assemble again.

Soon, a Cavalry appeared in front of Su Yu.

Su Yu carefully sensed this Cavalry and discovered that its internal structure was almost indistinguishable from a real Cavalry.

Su Yu asked Nuonuo to test various functions of the Cavalry and found no issues with the functions.

From any angle, this was a standard Cavalry, completely without the impression of it being Nuonuo's transformation.

If Su Yu couldn't sense Nuonuo's presence, he might have been fooled.

Nuonuo's simulation ability is indeed very impressive, capable of perfectly mimicking.

"This Cavalry's strength seems to be only top-level six-star..."

Su Yu carefully sensed it and confirmed the Cavalry's strength.

But Nuonuo's simulation limit is top-level seven-star.

The gap between top-level six-star and top-level seven-star is quite large.

"It seems that Nuonuo's simulation completely reproduces even strength. The Cavalry's limited strength thus restricts the simulation's power." Su Yu understood that this was not an issue with Nuonuo's skill, but rather the Cavalry was too weak, unable to utilize Nuonuo's full strength potential.

Nuonuo's simulation is so realistic that even the strength is genuine.

The Cavalry's limit is top-level six-star, and Nuonuo can do nothing about it.

However, if there's a suitable body for Nuonuo to simulate,

then it could exert seven-star top-level power.

But unfortunately, Su Yu currently doesn't have such a body.

The Assault Tank's power meets the criteria, but Nuonuo's body is too small, unable to simulate it.

It's not easy finding a seven-star top-level Mechanical Creation that fits the size requirement.

But that's okay, there'll be plenty of opportunities in the future.

Moreover, Nuonuo is not too concerned about combat power. After simulating the Cavalry, it was very excited and dissatisfied, and started transforming again, attempting to simulate other Mechanical Creations.

As long as the size isn't too outrageous, Nuonuo can simulate it.

Although its body doesn't look big, once split, there are indeed many "parts".

Nuonuo transformed into various creations Su Yu had made before, simulating them all.

Chapter 439: 2 Great 8-Star Mechanical Apostles, Powerful Imitation Ability!_2

Even the Azure Oath battle armor has been simulated by Nuonuo.

Su Yu looked at this battle armor he hadn't seen for a long time, and couldn't help but sigh.

This armor had long been scrapped, he didn't expect it to appear by his side again in this way.

"Tsk tsk, with Nuonuo, scrapped machines will no longer disappear, they'll just stay by my side in a different way..."

Su Yu couldn't help but exclaim.

"Master, aren't I amazing (ノ▽ノ) r?"

Nuonuo stopped transforming at this moment and sought praise from Su Yu.

"Nuonuo is truly amazing!"

Su Yu was naturally generous with his praise.

"Master is the best o(~▽~)d"

Hearing Su Yu's praise, Nuonuo visibly brightened up.

Previously, when Su Yu praised the Fear Intelligence, Nuonuo had a small sulk. Now, that little emotion had dissipated.

Speaking of it, the timid Fear Intelligence retreated into a corner as soon as Nuonuo appeared.

It seemed quite afraid of Nuonuo, this "senior".

Su Yu turned to look and found that Fear Intelligence was quietly learning to "transform" like Nuonuo.

However, it was using data materialization abilities to change its data into various machines.

It was also playing very eagerly.

This guy's temperament is like a child; seeing Nuonuo playing like this, it also wants to play.

Cavalry, Azure Oath... the various machines Nuonuo transformed into earlier, Fear Intelligence could also mimic.

It could even transform into larger machines.

After all, it was just data, without any size constraints.

For instance, now, it seemed to be straining itself to create an Assault Tank.

However, after all, it was just ephemeral data; even with data materialization capability, it was somewhat illusory.

The transformed machines weren't realistic enough, and their strength seemed to be weaker than those transformed by Nuonuo.

At this moment, Fear Intelligence had already transformed into an Assault Tank.

Su Yu discovered that this Assault Tank had none of the weight and might of a real Assault Tank.

Not to mention the fact that the several hundred tons of mass of a real Assault Tank was not something Fear Intelligence could simulate.

Even after data materialization, it had mass but felt flimsy, like foam.

This simulated Assault Tank seemed like it could be blown away by a strong gust of wind.

Although it might also exhibit the strength of a Seven-Star level, it's certainly not as powerful as a real machine.

Alas, Fear Intelligence had done its best.

It wasn't designed to excel in frontal combat; being able to transform into such a powerful machine was already impressive.

However, Su Yu was not satisfied. If it was only at Seven-Star strength, it wouldn't be very helpful to him.

Moreover, the two major Mechanical Apostles had both advanced to Eight-Star level, and was this all their combat power?

Su Yu pondered for a moment, then suddenly had inspiration and said to Nuonuo, "Nuonuo, can you fuse and enhance the Assault Tank transformed by Fear Intelligence?"

This was a sudden inspiration from Su Yu.

The machine that Nuonuo transformed into was limited and lacked power.

The machine Fear Intelligence transformed into was also limited and lacked power.

But what if the two were combined?

"Ah? Is that possible?"

Nuonuo hesitated upon hearing that.

Its Fusion Enhancement function was always used to strengthen real Mechanical Creations.

Now, it was being asked to enhance data-transformed virtual creations; could this truly work?

"Give it a try."

Su Yu encouraged.

"Okay, Master..."

Nuonuo hesitated as it flew towards Fear Intelligence.

Fear Intelligence instinctively "reversed" as Nuonuo approached.

Because of its timid nature, it was too shy and cautious, so it wasn't familiar with Nuonuo; to be precise, they hadn't even talked, as both were practically strangers.

Thus, previously when Su Yu praised Fear Intelligence, Nuonuo got a bit sulky.

Now, following Su Yu's order, Nuonuo established contact with Fear Intelligence for the first time.

It flew beside Fear Intelligence and hesitantly said, "Hello..."

Fear Intelligence hurriedly replied, "Hello, Senior Nuonuo, hello..."

From its tone, you could hear the sentiment of "nodding and bowing".

This guy had no temper at all; not communicating with Nuonuo before wasn't arrogance, it was sheer shyness.

"Senior!"

The word instantly made Nuonuo's entire body light up, showing it was pleased.

Its perspective on Fear Intelligence changed dramatically, and it developed considerable fondness.

Nuonuo spoke again, in a much friendlier tone: "Master asked me to enhance you, so I'm going to do it now..."

Fear Intelligence hurriedly replied, "Please... please proceed..."

Upon hearing this, Nuonuo immediately split a part of its machine and transformed it into a ghostly light that entered the Assault Tank transformed by Fear Intelligence.

Currently, when performing Fusion Enhancement, Nuonuo no longer needs to fully integrate; it just needs to split a part of itself.

Boom!

The phantom Assault Tank instantly became real and solid after being fused and enhanced by Nuonuo.

The previously flimsy machine suddenly had real weight, crashing heavily on the ground with a booming sound.

"This is..."

Su Yu looked at the machine resulting from the fusion of the two Mechanical Apostles, with excitement on his face.

Because, according to his perception, this "Assault Tank" was even more formidable than a real Assault Tank!

He activated his Holographic Perception, and immediately, the Profession Panel popped up showing the specific attributes of this "Assault Tank":

[Intelligent Combat Machine·Assault Tank·Standard Type (Simulated)]

[Producer: Su Yu]

[Grade: Outstanding]

[Traits: Assault, Mobility, Multiplication, Transport, Information Cover, Super Energy, Brutal Enhancement]

[Equipment:]

[Melee Weapon: The Assault Tank relies on its massive weight; in melee, it only has one tactic: ram! Its body and armor are its melee weapons!]

[Ranged Weapons: Heavy Plasma Cannon, Heavy Fusion Laser Cannon, Heavy Pulse Shattering Cannon, Heavy Ghost Energy Chip Cannon, Heavy Fear Spread Cannon!]

[Skill:]

[Spiritual Shield Type III Super Heavy · Sea Blue Source Crystal Enhancement (greatly enhances shield tenacity and extends duration): Consumes energy, condenses a shield, lasts a certain time, within the shield's range, can block the damage of seven-star beginner level]

[Overall Strength Assessment: Eight-star Beginner - Eight-star Top-Level · Brutal Enhancement (Simulated)]

Indeed, this simulated Assault Tank, after fusing the two Mechanical Apostles, had all sorts of traits and functions.

The strength also skyrocketed, truly reaching Eight-Star level!

"Not bad! You've done very well."

Su Yu was pleased and praised them warmly.

The combined strength of the two Mechanical Apostles was truly terrifying, as they instantly created a machine with Eight-Star combat power.

And it's even more precious since it was the complex-functioned Assault Tank.

In the future, even if all Su Yu's Mechanical Creations are lost, with Nuonuo and Fear Intelligence, he could instantly create an Assault Tank, then quickly replenish his forces using the simulated production line.

Indeed, the simulated production line can be used!

"Moreover, with new blueprints, there's no need to manufacture immediately. Just simulate it with Fear Intelligence and Nuonuo, and it's ready for use, enabling simulated testing..."

Su Yu instantly thought of many uses for this capability.

Having new blueprints doesn't require manufacturing; the two Mechanical Apostles can simulate them directly; it's incredibly convenient.

The little Nuonuo and Fear Intelligence, when joined, have enormous utility.

He then sighed, "With Nuonuo and Fear Intelligence as aides, my strength has grown significantly again..."

Su Yu previously lamented the lack of strength, but now it seems he lamented too soon.

The speed of his strength increase surprised even himself.

In a short time, he elevated to the mid-level of Eight-Star, and gained two powerful helpers of the Eight-Star level.

If this rate of improvement continues, what enemy could possibly stand against him?

Following this, Su Yu tested the power of the two Mechanical Apostles more thoroughly.

He even designed a simple blueprint and had the two little ones simulate it, successfully testing the results.

Su Yu's previous idea was completely feasible!

Chapter 440: The Plan to Design a New Mech, Heading to War City!

Just when Su Yu was excited, the two little ones, Nuonuo and Fear Intelligence, suddenly spoke in unison:

"Master, can we stop simulating this? It's so ugly..."

Su Yu was stunned by their words: "Is it really that ugly?"

He looked at the mecha he had just designed, which was simulated by Nuonuo and Fear Intelligence.

[Mecha-Unnamed]

[Producer: Su Yu]

[Grade: Excellent]

[Traits: None]

[Overall Strength Assessment: Six-star Intermediate]

This is a six-star level mecha.

It stands over six meters tall, covered with various mechanical tentacles, and the body is dotted with many eyes and mouths with no clear purpose.

No idea what practical use these organs serve on a mechanical creation.

Designing the camera as a strange eye—what's the point? And the mouth... is it supposed to bite people?

These mechanical organs grow haphazardly and look extremely disharmonious.

When Su Yu was designing earlier, he was in a rush and drew the blueprint casually, managing to come up with this mecha in a short time.

It only took a little over ten minutes to design a six-star mechanical creation, and Su Yu was a bit smug.

He is now a War Mechanic, with significantly improved design and manufacturing capabilities.

So he can casually design a six-star level blueprint.

Although somewhat shoddy, with only basic offense and defense, and no traits whatsoever.

And it's so ugly that even Nuonuo and Fear Intelligence couldn't take it anymore; they have aesthetics too.

"Master, it's really ugly..."

Nuonuo couldn't help but add.

Fear Intelligence hesitantly said: "If the master says it's not ugly, then it's not ugly..."

Hearing this, Su Yu looked again at the new mecha and suddenly became alert.

This thing doesn't fit normal human aesthetics at all.

It's indeed ugly as can be.

How did I come up with such a design?

He even felt that this thing looked quite pleasing just now...

"Ahem, it seems that being an Evil God for so long has unknowingly changed my sense of aesthetics."

Su Yu couldn't help but mock himself internally.

He reflected that every time he appeared in Subspace, he presented himself with a hooded tentacle image, startling the members of the Transcendent Union.

Over time, Su Yu himself got used to this sinister appearance and even enjoyed it.

This led him to involuntarily use similar visual elements when designing the mecha.

Making a decent mech look like a haunted house prop.

"Ahem, it is indeed a bit ugly, you two can stop the simulation."

"Rest assured, I'll design a cool mecha for you to simulate in the future."

Su Yu regained his composure and quickly said to the two little ones.

Having them simulate such a thing was indeed a bit unfair.

To them, this thing probably looks as ugly as feces...

"Okay, Master..."

Upon hearing this, Nuonuo and Fear Intelligence immediately ceased the simulation and returned to their original state.

"It seems I really need to design a new mecha for them to simulate and properly showcase their power."

Su Yu looked at them, pondering over his thoughts.

The two little ones can simulate an eight-star level Assault Tank together.

But the Assault Tank is too large, meant for heavy assault in large-scale battles.

For everyday use, it would be inconvenient in many ways.

As for the Brutal Battle Armor, it completely relies on the Brutal Core and can't be simulated.

Could Fear Intelligence simulate a Brutal Split Mind? Not realistic.

Therefore, Su Yu definitely needs to design a new mecha for Nuonuo and Fear Intelligence to simulate, to fully utilize this eight-star level strength.

Otherwise, wouldn't this eight-star level big helper be wasted?

"Moreover, if this simulation capability is further enhanced, could it eventually simulate an entire mechanical army?"

Su Yu had another idea pop into his head.

Currently, Nuonuo and Fear Intelligence together can simulate an eight-star level mecha, but unfortunately, the number is limited to just one.

But in the future, if the two Mechanical Apostles continue to upgrade, it might be different.

Perhaps by that time, the little ones could summon a mechanical army out of thin air, which would be amazing.

Actually, now Fear Intelligence can simulate multiple mechanical creations.

But no matter how many it simulates, only one can exert seven-star power, as its energy is limited.

In the future, when Fear Intelligence upgrades further and can simulate multiple seven-star mechas, and Nuonuo performs Fusion Enhancement, a mechanical army's prototype could form.

Once the two Mechanical Apostles take action, immediately a mechanical army appears.

Other mechanics wouldn't even dare to think of such a playstyle.

For normal Mechanics, wanting to possess a mechanical army would undoubtedly require painstakingly developing various resources and then honestly manufacturing them.

How many are like Su Yu, designing a blueprint and letting the two Mechanical Apostles simulate it, not even needing a steel plate, to simply "freeload"?

It's indeed somewhat excessive...

This is also why Su Yu's many professions and all-rounded capabilities allow this kind of play.

No one else has such ability.

"How should this new mecha be designed then?"

Su Yu immediately started considering how to design a new mechanical creation.

This new creation must be powerful enough, with at least a seven-star strength, and then simulated by the two machine gun Envoys to exert eight-star power.

If the mecha is designed cleverly enough, it could even be stronger.

Designing a seven-star level mechanical creation that is brilliant enough cannot be done like the previous ugly piece, in just ten minutes.
