

## **Infinite 501**

Chapter 501: Trial, the Terrifying Giant God Soldier Mecha!\_2

Su Yu heard this but did not answer. Instead, he flipped his hand and took out a metal disc.

The disc was flickering constantly, as if conveying some information.

As the disc appeared, the three Mechas seemed restless, their gaze fixed on the disc.

Su Yu held the disc, paused for a moment, seemingly decoding its information.

"This is the New Recruit Navigator of the Giant God Soldiers! Earlier, it connected with Zhang Chenfeng's creations, triggering a kind of 'trial' program."

"So, they aren't here to kill us, but are 'examiners'."

"Now, all we need to do is defeat these three Mechas to win the trial."

After a while, Su Yu raised the disc and said to Xie Yitian and Tie Long.

What Su Yu said was all the information he decoded from the disc.

When that light column blasted, the navigator of the Giant God Soldiers kept vibrating and sending out information.

Su Yu had always valued this disc greatly, and when it suddenly changed, he naturally couldn't ignore it and quickly took it out.

Xie Yitian and Tie Long were being blasted almost to death by the light column and naturally did not notice Su Yu's actions.

In the light column, Su Yu was quite relaxed, even having the leisure to decode the disc's information.

However, the information seemed to be through some kind of military channel, heavily encrypted, and it was only after some decoding that Su Yu managed to make out some useful information.

Upon decoding it, Su Yu was taken aback.

The creations of Zhang Chenfeng in the sky were actually considering giving them a trial opportunity due to this navigator!

Su Yu initially thought this disc would only be usable at the Giant God Soldiers' base ruins.

Unexpectedly, it came into play earlier.

And when Xie Yitian and Tie Long heard this, they were naturally astonished:

"What? There's such a thing?!"

"Trial?"

"No wonder earlier, they gave us so much Spiritual Energy, it turns out it was to prepare us before the trial!"

"If we pass the trial, will we get any benefits?"

Xie Yitian and Tie Long exchanged glances, simultaneously asking.

They didn't care at all where Su Yu got this amazing device from.

Nor did they care how this navigator triggered some kind of trial.

They were smart and immediately asked the crucial question: Does passing the trial have any benefits?

It wasn't out of greed that they were thinking about benefits in such a dangerous situation where their lives were at stake.

Rather, it was because...

The word trial represented so much.

Trial, denotes examination, assessment.

If they win the trial, generally, recognition and rewards follow.

As for rewards, Xie Yitian and Tie Long didn't particularly hope for much.

The main focus was that recognition!

If they pass the trial, does it mean they'd be recognized by Zhang Chenfeng's creations?

What would happen then? Could it be that...

Su Yu looked at them and smiled slightly: "If we can pass the trial, we'll gain the recognition of those creations."

"We can obtain... the right to fly and develop freely on this planet! As long as we don't attempt to enter space, they won't attack us again!"

As Su Yu said this, his expression became very serious.

Upon hearing this, Xie Yitian and Tie Long immediately became breathless, their faces lighting up with joy.

The right to fly and develop freely on this planet? That's almost like a 'Death Exemption Token'.

Although they didn't get the right to enter space as Xie Yitian and Tie Long hoped, being limited to the planet's surface.

It's enough to make them overjoyed!

For those who didn't dare to even board a hot air balloon, it was a huge leap forward.

What they thought was a life and death crisis turned out to be an unexpected twist, becoming such a huge opportunity!

No doubt, in Xie Yitian and Tie Long's minds, this trial was a grand opportunity!

They were lucky to have Su Yu; without him, Zhang Chenfeng's creations would have blasted them to death long ago. How would they ever have the mind to offer them a trial?

"Haha, thanks to Mr. Su Yu, we have this opportunity!"

"Today, we must win this trial and obtain the right to fly freely!"

Xie Yitian and Tie Long laughed heartily, with no fear or trepidation, only boundless fighting spirit.

"You're in good shape, but be careful, don't die."

Su Yu smiled slightly at the scene and gave a small reminder.

After saying that, he didn't wait for them to respond, leaping forward and flying at thirteen times the speed of sound towards the tallest Giant God Soldier Mecha.

The boundless battle fervor of Xie Yitian and Tie Long, how could Su Yu not be the same?

He was eager to see the combat power of these Giant God Soldier Mechas!

"The trial begins!"

The tallest Giant God Soldier Mecha, seeing Su Yu's arrival, immediately issued a mechanical synthetic voice.

Then it moved its arm, and a massive chain blade from its left hand swept towards Su Yu in midair.

Its blade swinging speed was incredibly fast, its massive figure was devoid of any sluggishness.

In fact, it was faster than a regular Transcendent, executing the actions of raising, aiming, and slicing down in an instant.

There was almost no gap, and the strike was upon Su Yu in no time.

"So fast!"

Su Yu was shocked in midair, the speed of this strike was actually faster than the flight speed of the Brutal Battle Armor! Even several times faster! A good fifty times the speed of sound!

Su Yu had no time to evade, only managing to raise the High-frequency Chain Blade in front of him.

Boom!

In the next moment, the giant blade of the Giant God Soldier Mecha struck him.

Then, like being shot from a high-energy electromagnetic cannon, Su Yu was slashed away, even faster, four to five times the speed he came at.

His entire being, along with the Brutal Battle Armor, rubbed against the air, heating up to tens of thousands of degrees, emitting scorching light, and disappeared like a meteor across the sky.

"Ah?"

Xie Yitian and Tie Long, whose laughter had not yet died down, watched as Mr. Su Yu, usually invincible, was struck and sent flying, whereabouts unknown.

The violent sonic boom came ten seconds after Su Yu flew off.

They stood open-mouthed, turning to see the two-hundred-meter tall Giant God Soldier Mecha, but it was nowhere to be seen; it had probably gone off to chase Su Yu.

"So fierce?!"

Xie Yitian and Tie Long suddenly thought of the words Su Yu uttered before being sent flying: "Be careful, don't die."

They broke into a cold sweat, convinced that if that strike had been aimed at them, they'd be dead!

Their earlier bravado now seemed completely ridiculous.

Meanwhile, the remaining two Giant God Soldier Mechas' eyes blazed red.

Clearly, they were preparing to attack as well.

"Let's give it all!"

Xie Yitian and Tie Long gritted their teeth and charged forward.

At the same time, over two hundred kilometers away, inside the belly of a mountain.

The mountain's body was vaporized from high-temperature impacts, forming a massive cavity.

Su Yu, dressed in a tattered Brutal Battle Armor, lay within this cavity.

"So strong! So fast!"

Su Yu couldn't help but cry out as he lay in the hole!

He finally witnessed the might of the Giant God Soldiers!

Normally, such gigantic constructs should be extremely slow.

For instance, when the Mechanical City moved, it would take a long time to take even one step.

That was because the "legs" of the Mechanical City were too long, a step was several hundred meters, and even taking a step per second approached the speed of sound.

It wasn't that Su Yu didn't want the Mechanical City to step faster.

For instance, taking two steps a second, wouldn't that be twice the speed of sound? Ten steps a second, wouldn't that be ten times the speed of sound?

A normal person can take ten steps in a second during a sprint.

But it was simply not possible.

For such colossal entities, moving too fast would be structurally unsustainable.

Thus, they could only move sluggishly.

Yet, the Giant God Soldier Mecha that slashed Su Yu and sent him flying shattered this convention!

Despite its two-hundred-meter stature, its movements were more agile and swift than ordinary Transcendents.

The swift movements paired with its enormous build resulted in unmatched speed, unbeatable strength!

Just as Su Yu exclaimed "So strong! So fast!" those words, the cavern was suddenly shadowed by a massive dark shape.

It was the Giant God Soldier Mecha, which had caught up!

The red light in its eyes was blazing hot, raising its weapon once again.

This time, it was raising both hands!

Chapter 502: Epic Battle with Giant God Warriors! Full Power Unleashed, the Terrifying Su Yu!

Boom! Hum!

The Giant God Soldier Mecha attacking Su Yu wielded a massive Chain Blade in one hand and a pure white Light Blade in the other.

Previously, it had used the Chain Blade to send Su Yu flying, but now it attacked with both weapons simultaneously.

"Here we go again!"

Su Yu couldn't spare any thought; he lifted the Chain Blade in his hand to his eyes once more.

He only had time to make this move, as the terrifying attack was already upon him the next moment.

The first attack came from the Light Blade.

The pure white Light Blade seemed to not have any substance, but was truly a laser. It ignored air resistance and struck toward Su Yu's face at hundreds of times the speed of sound!

However, this Light Blade didn't have any significant impact force.

Before Su Yu could discern the effect of the Light Blade, the Chain Blade of the Giant God Soldier followed, striking Su Yu's body at tens of times the speed of sound once more.

A tremendously terrifying force erupted in front of Su Yu again.

The hill he was standing on was shattered by the attack's power, no longer existing!

Then, without exception, Su Yu was sent flying once more.

Like a meteor, he flew hundreds of kilometers away at tens of times the speed of sound.

As Su Yu was struck flying, a Light Blade continued to pursue him relentlessly. This Light Blade had actually detached from the Giant God Soldier's hand, chasing Su Yu with a long-range attack method.

This Giant God Soldier seemed to only have melee capabilities, having no guns or cannons mounted, but it could actually attack at a distance!

With its strength and speed, casually picking up a stone and throwing it would have the power of a large-caliber siege electromagnetic cannon, enough to kill an ordinary Seven-star Transcendent.

Moreover, its two melee weapons were some sort of unknown high-tech Divine Weapons, and once thrown, their power was even more terrifying.

Now this Light Blade was thrown by the Giant God Soldier, chasing Su Yu.

While flying mid-air, Su Yu finally understood the purpose of this Light Blade.

"What powerful corrosion!"

Su Yu watched helplessly as his High-frequency Chain Blade was slowly dissolved in the confrontation against the Light Blade.

This High-frequency Chain Blade, when infused with high-layer Ghost Energy, was extremely sturdy, having endured two terrifying strikes without breaking.

But this time, under the Light Blade, the High-frequency Chain Blade seemed like snow under a scorching sun, melting rapidly!

Boom boom boom!

Along the way, Su Yu crashed into and blew up several small hillocks, finally expending all his kinetic energy, landing hard on the ground, creating a large pit.

Meanwhile, the High-frequency Chain Blade in his hand had only its hilt remaining.

In just two strikes, Su Yu didn't even have a chance to fight back and had already lost his weapon!

Then, the light emitted by the Light Blade began eroding Su Yu's Brutal Battle Armor.

"Truly brutal!"

Just as Su Yu sighed inwardly, the next moment, a gigantic hand clasped the Light Blade in front of him, raising it high.

The Giant God Soldier was in pursuit once more!

This time, without weapons, Su Yu would directly face that terrifying attack with the Brutal Battle Armor!

"Enough already!"

A fierce glint flashed in Su Yu's eyes, and he mentally shouted, "Nuonuo, Mechanical Fusion!"

"Fear Intelligence! Activate the overload mode of the Brutal Battle Armor, let's go all out!"

"Yes! Master..."

Nuonuo and the Fear Intelligence, both carried on the Brutal Battle Armor, immediately began execution upon hearing Su Yu's command.

However, just halfway through the execution, Su Yu was sent flying once more.

This time, he braced with the chest of the Brutal Battle Armor, and that terrifying power instantly damaged the armor.

Meanwhile, the Light Blade in mid-air continued to corrode the battle armor relentlessly.

Additionally, during Su Yu's backward flight, the friction with the air and the impact against mountain stones were significant tests to the strength of the Brutal Battle Armor.

Another strike would likely shatter and destroy the armor, leaving Su Yu to face the Giant God Soldier's terrifying attack with his bare body! At that time, Su Yu would be facing certain death.

However, this time, Su Yu didn't keep flying endlessly.

Midway through his flight, the jet engines on the armor burst forth with immense counterforce, coming to a halt in mid-air.

Simultaneously, ten-meter-high Ghost Energy Flames rose from the armor, burning fiercely.

The armor had already become scorching hot from friction, glowing a red-hot light.

Now it was ablaze with black Ghost Energy Flames, making Su Yu in mid-air resemble a bizarre sun, emitting black and red light!

Powerful force and imposing momentum surged from this "sun".

Even the fierce, relentlessly pursuing Light Blade was blocked by the surging Ghost Energy Flames.

Nuonuo's Mechanical Fusion and the armor's overload feature had been fully activated!

Strength unleashed!

Nuonuo had now advanced to eight-star level, and under its fusion, the Brutal Battle Armor was infinitely close to nine-star.

Plus, with the overload mode activated.

Su Yu himself had also stepped into the eight-star level.

Now, with Su Yu and the armor combined, they truly possessed nine-star strength!

It was unlike Mechanical City, which relied on massive size and a ton of heavy firepower to forcibly boost its attack to nine stars.

Su Yu, with a normal human body, reaching nine-star strength, was incomparable to Mechanical City!

Mechanical City needed massive salvos of heavy firepower to reach nine-star power.

To have such power in a human body, how mighty could it be?!

Thud!

The sudden halt in mid-air and the violent burst of power subjected Su Yu inside the armor to immense pressure, causing him to cough up blood.

Chapter 503: The Battle with the Giant God Warriors! Full Strength Unleashed, The Terrifying Su Yu!\_2

The blood had just spurting out and was evaporated under the high temperature.

However, Su Yu didn't care; he clenched his fists, feeling his body brimming with endless power.

"Strength! This is true strength!"

By unleashing his full power, Su Yu had never felt so strong.

Since the Brutal Battle Armor was created, this was the first time he had pushed it to such an extent.

The extreme force extraction made the structure of the Brutal Battle Armor emit creaking sounds, unable to bear the burden.

Originally, the Brutal Battle Armor, under overload mode, could only maintain for ten minutes.

But now, because of the fusion with Nuonuo, forcibly elevated to a nine-star level, the duration has instead become even shorter.

The material of the armor cannot withstand such extreme power.

It's estimated that in less than five minutes, the Brutal Battle Armor would disintegrate.

And Su Yu's flesh, possibly, could endure for even less time, probably not even three minutes!

However, the power brought by such a large cost is also astonishing.

It elevated Su Yu's power to an unimaginable level.

Su Yu felt that now he could defeat any enemy!

At this moment, a figure rapidly expanded in Su Yu's vision, quickly moving from a figure on the horizon to right in front of him, transforming into a Giant God.

Giant God Soldier! It's chasing again!

As soon as the Giant God Soldier arrived, it immediately reached out to grab the Light Blade in front of Su Yu.

However, before its hand could grasp the Light Blade.

Su Yu moved too!

Boom!

The next second, the head of the Giant God Soldier Mecha jerked violently backward, and a fierce explosion blasted a large hole in its head.

It seemed to have been hit by an attack!

That attack wasn't a weapon, but Su Yu directly threw the handle of the High-frequency Chain Blade.

The small handle, at nearly a hundred times the speed of sound, delivered a powerful blow to the Giant God Soldier!

Indeed, with his full power unleashed, Su Yu had a speed equal to the Giant God Soldier!

No! Su Yu was even faster than the Giant God Soldier!

Because this time, he attacked the Giant God Soldier first!

Su Yu, combining multiple careers and divine positions, had astonishing mental reactions and dynamic vision.

Earlier, even though the Giant God Soldier's attack was extremely fast, Su Yu clearly saw it.

But no matter how clearly he saw it, if his body's strength couldn't keep up and he couldn't react in time, he could only watch helplessly as he was struck away.

But now, with his full strength unleashed, Su Yu finally made up for his shortcomings; he even initiated a counterattack before the Giant God Soldier's attack arrived!

"Haha! This really feels awesome!"

Seeing the power released by the thrown handle, Su Yu couldn't help but laugh heartily.

At this moment, he personally experienced why the Giant God Soldier didn't equip long-range weapons.

Because with this kind of power and speed, close combat was even more powerful!

Meanwhile, Su Yu reached out and removed all the long-range weapons on the Brutal Battle Armor, casually tossing them aside.

These long-range weapons, like the Ghost Energy Bombardment Cannon, were useless in this level of combat and weren't as powerful as a punch from Su Yu.

So Su Yu dismantled them, ready to engage in close combat with the Giant God Soldier!

After all, these weapons were quite heavy, and keeping them would slow down Su Yu's speed.

As Su Yu dismantled the long-range weapons, the Giant God Soldier also recovered from Su Yu's earlier attack.

The hole in its head caused by the handle was also healing.

It did not attack again, instead floating silently in the air, holding the Light Blade and Chain Blade, quietly watching Su Yu dismantle his weapons, seeming to wait.

Su Yu dismantled them extremely fast, not even a hundredth of a second, but in this level of battle, a hundredth of a second was enough for hundreds of rounds.

The Giant God Soldier was clearly waiting for Su Yu on purpose.

"Quite gentlemanly!"

After finishing the dismantling, Su Yu looked at the silent Giant God Soldier in the air and smiled slightly.

In the next moment, the silent Giant God Soldier raised its twin blades high again.

However, before its attack launched, Su Yu's figure suddenly vanished!

Then, he reappeared out of nowhere, three meters in front of the Giant God Soldier's head.

Upon seeing Su Yu suddenly appear before him, the Giant God Soldier seemed momentarily stunned, then its mech body jerked backward forcefully, seeming to want to create some distance and then attack again.

Yet in the next instant, its head exploded!

For Su Yu had directly delivered a punch, exploding its head with one blow!

The Giant God Soldier was two hundred meters tall, with a head over twenty to thirty meters big and incredibly solid, nearly a super-strong alloy clump.

Yet under Su Yu's punch, this head was as fragile as a watermelon and shattered instantly.

The aftermath of this punch extended through the Giant God Soldier's head and stretched out for hundreds of kilometers, carving a long rainbow across the sky!

The Giant God Soldier's body paused briefly, then without hesitation, its double blades slashed down mercilessly at Su Yu.

Evidently, its vulnerable spot was not its head, or rather, it didn't truly have a vulnerable spot.

In fact, a regular Giant God Soldier Mecha would certainly have a vulnerable point.

But this Giant God Soldier was materialized through Data Materialization and wasn't real to begin with, so how could it have any vulnerable spots?

So even with its head blown off, it didn't affect its attack.

But its attack was too slow for Su Yu at this moment!

Boom!

In the next instant, Su Yu reappeared tens of kilometers away, looking far into the headless Giant God Soldier.

"Not good! Overshot!"

Su Yu intended to retreat slightly and then counterattack.

As a result of a slight movement, he had already darted tens of kilometers away.

His speed was too fast, a bit uncontrollable!

How fast exactly was Su Yu now?

You must know, the speed of the Giant God Soldier's arm attack was at least fifty times the speed of sound.

The movement speed of the Giant God Soldier itself was much slower than the attack speed, estimated to be only about a third, tenfold of the sound speed.

So earlier, it took a while to catch up after striking Su Yu away.

But now, Su Yu's own movement speed was even faster than the Giant God Soldier's attack speed!

It's estimated to be at least a hundred times the speed of sound, if not faster.

With such extreme speed, even Su Yu was somewhat out of control, leading to mistakes.

And Su Yu's attack speed was even more mind-boggling.

Hence why he could deliver a punch with such power.

Imagine, with a human-sized fist of Su Yu, being able to break the air and carve out a long rainbow across hundreds of kilometers; how terrifying is that speed and power?

In such extreme speed, it was normal for Su Yu to find it somewhat uncontrollable.

"No time to worry, attack!"

Su Yu's figure moved, charging at the Giant God Soldier once more.

This time, his figure was no longer visible; only continuous explosions erupted over the Giant God Soldier's body!

Su Yu was continuously attacking.

Although Su Yu's control over his power diminished now, and his actions were less precise.

But since the Giant God Soldier's body was huge, even without precision, it wouldn't miss.

And the Giant God Soldier's twin blades swung repeatedly, but it couldn't even touch Su Yu's shadow.

Earlier, the Giant God Soldier overwhelmed Su Yu, but now, it was the opposite; under Su Yu's extreme speed, it had no power to fight back!

The fierce onslaught engulfed the entire mecha of the Giant God Soldier.

The air was crazily compressed and heated by the immense power, becoming a bright, high-temperature plasma, like a miniature star, floating in the sky.

How similar was this scene to the previous attack from the Mechanical City?

The difference is that Su Yu achieved the power of the Mechanical City's hundred or thousand cannons with hand-to-hand combat!

A minute later, Su Yu's figure appeared beside the fireball.

"Phew! The burden is really heavy..."

Su Yu took a couple of breaths, looking at the fireball in the sky, speaking to himself.

At this moment, both his armor and body were covered with cracks.

Such violent attacks were too burdensome for both the armor and his body.

Originally thinking he could last three minutes, now it seemed it would be even less.

Even though Su Yu was in poor condition right now, the Ghost Energy Flames on his body flared higher, with an even more ferocious momentum.

Before the time limit arrived, his power showed no sign of waning!

"At most, only one more minute, fortunately, under such an attack, the Giant God Soldier should have already..."

Su Yu thought to himself.

At this moment, boom!

He was unexpectedly blasted away again!

But when blasted away, he saw the source of the attack clearly!

It was a miniature Giant God Soldier, flying out of that huge fireball with the same extreme speed!

The Giant God Soldier was not defeated; instead, it unlocked a new combat form!

Chapter 504: Activated! Self-Destructive Strike!

The new form of the Giant Soldier can no longer be considered a "giant" soldier.

At this moment, its size is not much different from Su Yu's current form, standing just over five meters tall.

Although still very large, compared to its previous two-hundred-meter height, it seems rather small.

After the size reduction, the Giant Soldier's aura feels much weaker.

It seems to have lost most of its body, leaving ninety-nine percent of its energy gone.

However, given its original size, it stored a tremendous amount of energy.

Even the little energy remaining is incredibly powerful.

Moreover, after the size reduction, its speed becomes terrifyingly rapid, almost as fast as Su Yu's current speed.

It no longer suffers the previous disadvantage.

In the instant it blasted Su Yu away, it executed higher speeds, catching up to him mid-air, and launching a relentless assault.

The situation had completely reversed from before.

But Su Yu would not be outdone. After receiving several hits from the Giant Soldier, he immediately reacted.

He adjusted his position in mid-air, engaging in a fierce battle with the miniature Giant Soldier.

Without its weapons after shrinking, it's one man against one machine, engaged in hand-to-hand combat at hundreds of times the speed of sound!

No techniques, no strategies, just pure speed and power! Fists and feet clashing! Competing to see who is faster and stronger!

Boom!

In a short time in mid-air, the man and machine collided tens of thousands of times, but there was just one sound—an intense explosion, like the shockwave of a nuclear blast.

The high-temperature fireball from the collisions completely engulfed both man and machine, the air heated to emit an incredible radiance.

Su Yu felt as if he was fighting inside a star.

Surrounded by high-temperature plasma air, no normal scenery was visible.

In this high-speed, high-intensity, high-power intense battle, Su Yu's body and Brutal Battle Armor were gradually dismantling.

He was nearing his limit.

Not only him, but the miniature Giant Soldier was also covered with cracks.

It seemed like its energy was also nearly depleted, unable to maintain recovery.

At this rate, it was a matter of who, between Su Yu and the Giant Soldier, would last longer.

It had become a battle of endurance.

However...

"Wouldn't that be too dull?"

Amidst the fight, Su Yu suddenly laughed heartily.

He stopped.

The Giant Soldier, sensing something, also halted.

"Testing endurance is too dull, let's unleash all our power in a single burst for the final showdown!"

"Brutal Battle Armor, self-destruction mode, activate!"

Su Yu roared out.

Besides overload mode, the Brutal Battle Armor also has a self-destruct function.

This mode overloads the Brutal Core completely, releasing all its energy at once for a self-destructive strike.

Once the strike occurs, regardless of the outcome, the armor will be rendered useless!

This mode was something Su Yu had never used before, considering that once activated, the armor would self-destruct.

Now, he used it without hesitation.

Su Yu found the idea of competing with the Giant Soldier in endurance too dull and wanted a decisive strike.

This battle had been the fiercest, purest, and most exhilarating one Su Yu had experienced, so he didn't want it to end in such a mundane way!

Accompanying Su Yu's loud shout, an astonishing aura emanated from his body.

The Brutal Battle Armor on him was originally a deep-green-near-black color, the color of high-level Ghost Energy.

Even during the intense battle, when it was heated to extremely high temperatures, the color hadn't changed.

But at this moment, with Su Yu's shout, the armor turned fiercely radiant, shining brightly.

Even the high-temperature plasma fireball beside Su Yu paled in comparison.

It was like a supernova explosion occurring suddenly next to a star.

In front of this light, even a blazing star seemed dim!

That was highly condensed high-level Ghost Energy, exceptionally condensed and explosively released, emitting an energy light.

"So, the gloomy and eerie Ghost Energy can shine so brilliantly?"

At that moment, Su Yu didn't launch an attack but marveled at his transformation, unable to help but feel a sense of wonder.

Ghost Energy is somber and eerie, incredibly dark.

However, amid this intense condensation and outburst, it became more radiant than the sun.

The first time Su Yu used the armor's self-destruct mode, he hadn't expected it to be so bright, so illuminating.

"Betrayal and loyalty..."

"The power of the Galaxy Battle Armor is two sides of the same coin. Now, it seems, high-level Ghost Energy also has dual nature."

"Now, after experiencing such extreme change, Ghost Energy can't be called Ghost Energy anymore. Instead, it should be called... Blazing Energy!"

Su Yu mused to himself.

He recalled the power witnessed on the Galaxy Battle Armor: betrayal and loyalty.

Such energy had dual characteristics.

The Power of Betrayal was extremely eerie, whereas the Power of Loyalty was straightforward and bright.

Now, Su Yu found that Ghost Energy also underwent a similar transformation, even more extreme.

Originally dark Ghost Energy, under the self-destruct mode of the Brutal Battle Armor, transformed into a new form, intensely blazing, shining brightly, devoid of any darkness.

Hence, he gave the new form of Ghost Energy a new name: [Blazing Energy].

Blazing Energy, this energy, seemed as if a supernova had been absorbed into the body.

Su Yu felt as if his entire body, from the inside out, was glowing, his strength increasing endlessly.

Originally, this was just the self-destruct mode of the Brutal Battle Armor, logically, the enhancement should pertain to the armor's power and not relate to Su Yu's body.

Chapter 505: Activated! Self-Destructive Strike!\_2

Once the Brutal Battle Armor activated its self-destructive mode, it stimulated a form of energy called "Blazing Energy", immersing Su Yu inside it, which also simultaneously enhanced Su Yu's power!

This even triggered a chain reaction, compressing and transforming the Ghost Energy within Su Yu into Blazing Energy.

This energy, compared to ordinary high-tier Ghost Energy, was unimaginably more powerful, not even in the same league!

His entire being was saturated with intense [Blazing Energy], making it impossible to measure his own strength.

Nine-star top level? Or even ten-star?

Su Yu couldn't accurately discern the precise level.

All he knew was, strong! Very strong! Extremely strong!

With this power, he felt he could easily defeat his former self!

Similarly, he could also easily defeat the previous giant war machine!

This feeling was overwhelmingly powerful, intoxicating!

But Su Yu was in no rush to launch an attack because he wanted to fully experience the mystery of this [Blazing Energy].

This energy, explosively condensed from high-tier Ghost Energy, was exceedingly violent and powerful.

Su Yu worried that after one strike, this energy would dissipate, so he wanted to savor the experience.

He immersed his spirit deep within the Blazing Energy, experiencing the process of Ghost Energy being intensely compressed and colliding, transforming into Blazing Energy.

He was like a parched traveler, afraid of missing even the slightest bit, as this opportunity was so rare.

Meanwhile, the giant war machine beside him observed the transformation on Su Yu's body without launching an attack, instead retreating warily.

It obviously recognized the fearsome power of the Blazing Energy on Su Yu.

In fact, it couldn't even approach Su Yu; any closer, and it would almost melt.

The power of Blazing Energy was too overwhelming!

However, this giant war machine wasn't retreating to escape; it was preparing to activate its own trump card.

After retreating a sufficient distance, its aura suddenly changed.

Originally, this giant war machine was ultimately just a virtual entity manifested from data.

Despite its immense power, it had a very obvious trait: its weight was too light!

Being a data materialization, it didn't possess the heavy mass of real material, with a very low density, like foam.

This was also one of the reasons it could move so quickly; after all, light mass naturally makes acceleration easier.

Without real mass, its body strength ultimately couldn't match real material.

Exactly!

The previous giant war machine hadn't actually unleashed its true power at all.

After all, it was just a data materialized entity, not a real giant war machine.

If it had been a real two-hundred-meter giant war machine, its power would have far exceeded nine-star, easily able to obliterate Su Yu—not a chance it would have fought him for this long!

It was precisely because it was a data materialized entity with "weak" strength that it battled Su Yu up to now.

But now, with the giant war machine initiating its trump card, its body suddenly gained a sense of heaviness.

It seemed as though it transformed from a virtual data entity into real matter!

Clearly, this was a more advanced application of data materialization, an advanced ability even Mechanical Spirits hadn't mastered! Allowing the data materialized entity to possess the strength of real matter!

At this moment, Su Yu, who was immersed in comprehending the secrets of Blazing Energy, suddenly sensed something amiss and instinctively turned to look at the giant war machine.

Then he saw the giant war machine shrinking again, becoming as large as Su Yu.

At this moment, it projected no energy outward, only exuding a massive, dormant aura.

Although it hadn't made a move, Su Yu understood that its power had been enhanced to an unknown degree.

However, more cracks appeared on its body, resembling a porcelain vase broken and glued back together.

It seemed that its trump card, although granting real mass, couldn't be sustained for long—it was also like a self-destruct mode ability.

"Looks like you too only have one strike left..."

Su Yu smiled slightly.

Now things got interesting!

The next moment, all of Su Yu's Blazing Energy erupted, charging towards the giant war machine at many times the speed of sound, swinging a light-forged fist!

Meanwhile, the giant war machine also charged towards Su Yu, ready for an outright clash!

In an instant, the fists of man and machine collided!

A collision of such magnitude should have been deafening, yet no sound was produced, only infinite light!

Then, a light column blasted directly outside the atmosphere!

Previously, Zhang Chenfeng's creation had beamed down a light column from beyond the skies.

Now, it was reversed, with Su Yu's power blasting out of the atmosphere!

Even from outer space, this light column could be seen vividly from a planetary perspective.

Although this light column seemed tiny from the universe's view, when compared with the entire planet!

This strike from Su Yu and the giant war machine actually created a planet-level phenomenon!

Who knows how long passed before the light column dissipated.

In mid-air, the giant war machine was no longer visible, leaving only Su Yu, drenched in Blazing Energy, gently descending like a falling leaf.

Clearly, it was Su Yu who won!

Though the giant war machine had also used its trump card, it was still no match for Su Yu, who possessed Blazing Energy, and was decisively obliterated by Su Yu!

"Haha! I won!"

Su Yu laughed aloud.

Launching a self-destructive strike to obliterate a formidable foe, such a feeling of exhilaration is indescribable.

At this moment, Su Yu had completely forgotten about the trial, entirely immersed in the joy of victorious battle.

Su Yu wasn't usually a battle maniac, remaining composed even after victorious fights.

But this time was different.

How many times in one's lifetime can one experience such intense battle? How could one not feel ecstatic?

The last time Su Yu felt such joy was after battling the Brutal Split Mind for a month and advancing to seven-star, achieving a counter-offensive victory.

Back then, despite being drenched in rain, his heart was joyous yet calm.

Su Yu felt similarly now.

At this moment, Su Yu had no energy left, allowing himself to free fall.

As he descended, the Brutal Battle Armor gradually disassembled, turning into nihility and merging with the air.

Even the most critical Brutal Core was disintegrating!

Originally designed, the Brutal Battle Armor, after initiating self-destruct, could slowly self-recover.

Although it required time and possibly resources for full restoration, it wasn't a one-time use, obliterated entirely after usage.

But this time, the explosion was too intense, causing the entire Brutal Battle Armor to genuinely disassemble.

Nevertheless, Su Yu didn't mind too much, nor did he have regrets.

Because this time, by initiating the armor's self-destruct mode, he comprehended a new energy form [Blazing Energy].

This energy could not only be used on the armor but also on himself.

Compared to external armor, Su Yu valued his own strength more.

Bang!

Su Yu fell from a high altitude, striking the ground heavily, creating a small crater.

This level of impact was nothing to him now.

Indeed, his current state was extremely poor, with severe injuries.

His body resembled crushed porcelain, filled with cracks, seemingly about to disassemble like the Brutal Battle Armor at any moment.

This was the necessary price for bearing Blazing Energy.

That ferocious energy, borne and controlled by his body, naturally couldn't come without a price.

One could say that the previous strike was a simultaneous self-destruct mode initiated by both the Brutal Battle Armor and Su Yu's body, to pull it off!

Fortunately, the Brutal Battle Armor bore most of the pressure, coupled with Su Yu's inherent powerful strength and remarkable recovery ability.

These injuries, given time, could still be healed and hadn't truly self-destructed.

He lay on the ground, not even trying to rise, savoring the momentary tranquility.

He was utterly devoid of strength.

At this moment, a pure Spiritual Light Column suddenly descended from the sky, enveloping Su Yu.

This Spiritual Light Column was very gentle, devoid of any offensive power.

Upon contact with Su Yu, it was effortlessly absorbed into him as pure energy.

With replenishment, Su Yu's injuries rapidly healed.

Simultaneously, a mechanical voice resonated in Su Yu's consciousness:

Trial completion!

Chapter 506: Healing Light Beam, Death of the Brutal Split Mind! Shocking Truth!

This voice emanated from the disc of the New Recruit Navigator of the Giant God Soldiers.

The seemingly unremarkable disc was actually incredibly sturdy.

Previously, it was stored within Su Yu's battle armor and survived the apocalyptic battle without a scratch, continuing to function normally.

Now, through some program, it connected with the creation of Zhang Chenfeng in the sky and had determined that Su Yu had passed this trial.

Upon hearing this voice, Su Yu immediately smiled.

He finally completed it.

This meant that Su Yu had earned the acknowledgment of Zhang Chenfeng's creation and could now freely fly on this planet.

No longer needed to worry about a sudden attack from Zhang Chenfeng's creation raining down from the sky, mercilessly obliterating him.

Moreover, in future encounters with enemies, being able to fly when others couldn't would give him a significant advantage.

His hard-fought battle finally paid off.

"New recruit, please proceed to the camp and report immediately!"

At this moment, that mechanical voice from the disc sounded again.

Su Yu nodded, "I will."

Then, he struggled to sit up, and as he looked at his own body, he shook his head involuntarily.

Although passing the trial was worth celebrating, the cost was indeed quite significant.

His strongest Brutal Battle Armor had disassembled as a result.

He wasn't sure if it could be restored.

Even Su Yu himself was severely injured, covered in horrific wounds, almost unrecognizable as human.

Many of these wounds were burns.

Considering the previous battle, the temperature was extremely high, capable of vaporizing steel; even with Spiritual Energy and the battle armor's protection, Su Yu nearly got roasted.

Besides the surface injuries, his internal injuries were severe as well.

His internal organs and brain had been severely damaged, blood vessels had burst, and bones were riddled with cracks.

During the previous battle, Su Yu achieved speeds of hundreds of times the speed of sound and endured immense acceleration, which even an eight-star body couldn't withstand.

Had the battle continued for even ten more seconds, Su Yu would have disintegrated like his Brutal Battle Armor, and his body wasn't as tough as the armor; he would have exploded into a mist of blood.

Fortunately, the battle was over, and while the injuries were severe, they were recoverable over time.

As long as no parts were missing, recovery would be easier.

After checking his own condition, he asked in his heart, "Nuonuo, how are you?"

The armor was still disassembling, and he worried about the safety of Nuonuo, who had fused with the armor.

"Master, I'm fine..."

From the nearly disassembled armor, an emerald-green mechanical sphere separated, hovering in mid-air—it was Nuonuo.

At this moment, Nuonuo appeared quite miserable, wobbling as it floated.

It seemed to have endured a lot of pressure as well.

In the end, it was fused with the Brutal Battle Armor, and the armor's self-destruction was nearly equivalent to its own.

But thankfully, Nuonuo was continuously recovering, and it didn't seem to have suffered major damage.

The main body of the armor bore most of the pressure, with Nuonuo only as an adjunct.

Su Yu reached out and patted Nuonuo's round body, again asking in his mind, "Fear Intelligence, how are you?"

Although the Fear Intelligence was a Data Life, without a physical form,

its data was stored in the chips of the Brutal Core.

Those chips were almost all damaged during the battle.

Moreover, since the Giant God Soldiers were Data Manifestations, combat might have affected the data level as well.

Su Yu was unsure if Fear Intelligence was intact.

"Mas... Master..., I'm fine, just a little scared..."

The Fear Intelligence trembled as it spoke, assuring it was alright.

Su Yu felt at ease and was about to focus on healing.

Suddenly, a thick Spiritual Light Column descended from the sky.

This column of Spiritual Energy was very special; it shone upon Su Yu, and his wounds started healing rapidly.

Within less than a minute, the severe injuries were almost healed.

Su Yu was slightly startled when the light beam hit him.

He initially thought that Zhang Chenfeng's creation had launched a sneak attack, breaking its promise.

Fortunately, he quickly discovered the beneficial purpose of the light beam and felt relieved.

Assuming the dominance and power of Zhang Chenfeng's creation wouldn't resort to such petty tactics.

He speculated that this light beam was a reward for completing the trial, possibly for healing injuries post-trial, which seemed reasonable.

"Is this... healing Spiritual Energy? Such potent healing capability!"

Su Yu mused as he felt the tingling sensation of his body healing rapidly.

To be honest, Su Yu had gone through a lot, visited many cities, and met numerous Spiritual Users.

He had encountered Spiritual Users with healing abilities several times.

But he had never seen such powerful healing effects.

To descend a beam of light from outside the atmosphere and heal the severe injuries of an eight-star Transcendent within a minute was extraordinary.

This ability was simply otherworldly.

Su Yu even suspected that even if he were left with half a brain, this light beam could restore him in no time.

Indeed, Su Yu had once performed a similar act when Tie Long was left with only his head, and Su Yu used the Mechanical Blessing to save Tie Long's life.

Yet, the Mechanical Blessing was a matter of clever tactics.

This light beam, on the other hand, possessed real healing power.

It wouldn't turn Su Yu into a half-Mechanical Life, nor require him to worship some deity.

Chapter 507: Healing Light Beam, Death of the Brutal Split Mind! Shocking Truth! \_2

The light beam shone, and the injuries were completely healed—it's just that convenient!

However, it wasn't over yet.

After healing Su Yu, the light beam slightly changed in nature and shone onto the Brutal Battle Armor and the nearby Nuonuo machine.

Instantly, the Brutal Battle Armor, which was rapidly disintegrating, halted its disintegration and even started to recover quickly.

As for Nuonuo, whose body was full of dents and uneven surfaces, under the beam's illumination, it soon became smooth again.

"This is..."

Su Yu was suddenly stunned.

This Healing Light Beam can heal not just people but machines as well?

What kind of method is this?

Is it the power of a Spiritual User, or some kind of mechanical function?

It must be said, the creations of Zhang Chenfeng are truly unfathomable.

If such a method could be applied on a large scale, wouldn't it mean having an Undying Body?

Whether soldiers or machinery, if damaged or injured in battle, one beam would completely restore them...

One wonders if this method has any limitations or costs...

After a while, both Nuonuo and the Brutal Battle Armor were fully restored.

The beam also faded away.

Su Yu felt a bit disappointed; the time was too short and he hadn't had the chance to study the beam's nature and principles.

He couldn't help but look up at the sky, full of curiosity.

He really wanted to fly out of the atmosphere and find the creations of Zhang Chenfeng for a thorough study.

Surely, he would gain a lot of advanced knowledge and develop many blueprints.

Unfortunately, for now, he could only think about it, as he was acknowledged for free-flight ability but wasn't allowed to leave the atmosphere.

"No matter, there will definitely be an opportunity."

Su Yu muttered to himself.

Then he stood up and moved a bit, finding that both his body and armor were in perfect condition.

Even the damaged chips had been completely restored with no reduction in computing power.

Even if another epic battle were to occur, it would be no problem.

The healing effect of that light beam was truly miraculous.

"However... the Brutal Core seems to have some issues..."

But upon further inspection, Su Yu quickly discovered that the healing effect of the light beam was not without problems.

The Brutal Core had not fully recovered.

In fact, the Ghost Energy output functionality of the Brutal Core was unchanged.

The state of the Brutal Split Mind within the core was... somewhat off.

Su Yu couldn't pinpoint what was wrong, but after careful sensing, he felt like the Brutal Split Mind seemed... dead?

This Brutal Split Mind had long been stripped of its self-awareness by Su Yu using the Power of Nihilism and was used as a safe and stable Energy Core.

Lately, it had been very subdued; after all, without self-awareness, it had no choice but to be subdued.

But even without self-awareness, it should still be alive.

After all, a "plant man" is also alive.

But now, Su Yu felt this entity was just like... truly dead!

Reflecting on the past battles, Su Yu finally realized the Brutal Split Mind might indeed have... died!

The previous battle had been intensely fierce; Su Yu himself was severely injured, and the Brutal Battle Armor was disintegrated.

Inside the armor, the Brutal Split Mind naturally endured enormous pressure.

Especially since it lacked self-awareness and only mechanically outputted energy, unable to protect itself.

And then... it was struck dead by the battle's aftermath!

"What's this? This thing really just died like that?"

Su Yu was a bit confused.

He felt the Brutal Split Mind had completely lost its lifelike feeling and had become just a "corpse".

Of course, it did not have a physical corpse, only a peculiar form of information, energy, and concept.

"Could it be that this trial was actually an ordeal for this Brutal Split Mind?"

An inspiration struck Su Yu's mind as he thought of a possibility.

Previously, Su Yu had been puzzled by one question.

That was, he continually used the Brutal Split Mind to absorb Subspace Energy.

Whose account would this be settled against? Who would bear the Subspace backlash?

But now, Su Yu seemed to have understood.

After one intense battle, Su Yu himself was fine, but the Brutal Split Mind had perished.

The result was evident.

This account was settled against the Brutal Split Mind!

This trial was the ordeal for the Brutal Split Mind!

"Haha!"

Understanding all this, Su Yu couldn't help but laugh out loud.

This was as if the Brutal Split Mind borrowed energy from Subspace for Su Yu's use.

And yet it was the Brutal Split Mind that had to repay this debt.

Unable to repay, it was beaten to death by the creditor...

"Tsk tsk, feels like I was a bit too harsh..."

Su Yu chuckled lightly.

This Brutal Split Mind really was tormented quite pitilessly by him.

The saddest part was, even as a "corpse", it had to stay in the Brutal Core and work to supply energy for Su Yu.

Clearly just a corpse, this Brutal Split Mind continued to maintain strong Ghost Energy output, providing power to the Brutal Battle Armor, truly "dedicated".

This made Su Yu even more amused; such an Evil God deserved to be thoroughly exploited.

Moreover, after the death of the Brutal Split Mind, only leaving behind a corpse, it was even safer and more stable than before.

"But, what is the principle behind this?"

Yet Su Yu still couldn't quite figure it out.

When the Brutal Split Mind dies, it should, in theory, be reborn in the depths of Subspace, returning to its original form.

This involves the undying nature of Evil Gods, and Su Yu couldn't prevent it.

If he could, Su Yu would have killed the Brutal Split Mind long ago, instead of leaving it until now.

But now, the Brutal was killed by the aftermath of the battle, yet its "corpse" remained in the Brutal Core?

"Could it be... that light beam just now?"

Su Yu suddenly thought of a possibility.

The current strange state of the Brutal Split Mind wouldn't happen for no reason.

There must be some powerful force at play.

And there's only one possibility; it was the light beam just now.

After all, it was Zhang Chenfeng's creation that descended with power unknown in level, surely exceeding nine stars.

Only such a level of power could suppress the resurrection process of the Brutal Split Mind, letting its "corpse" remain in the Brutal Core to work.

"So, that light beam not only healed my injuries, restored the Brutal Battle Armor and Nuonuo."

"But also conveniently suppressed the resurrection of the Brutal Split Mind?"

"One beam with so many abilities, truly..."

Understanding all this, Su Yu couldn't help but be amazed. This was simply too powerful!

And not just powerful.

Zhang Chenfeng's creation managed to help Su Yu suppress the resurrection of the Brutal Split Mind.

This held more thought-provoking truths.

Su Yu couldn't help but deliberate on why Zhang Chenfeng's creation had such capability?

This ability involves the essential mysteries of Evil Gods, certainly not something easily obtained.

It requires incredibly arduous research and experimentation to achieve it.

"So, this is actually the technology of the Human Empire from back then?"

Su Yu secretly speculated.

At the same time, he thought of something else: the Galaxy Battle Armor!

According to the armor, the so-called "Betrayal" regiment was when the Empire captured a powerful entity from Subspace, using it as the regiment's power source.

And the so-called powerful entity in Subspace, isn't that just an Evil God?

"In other words, back then, the Human Empire used Evil God corpses as their energy source?"

"Killing Subspace Evil Gods, suppressing their resurrection, and then using their corpses as energy sources..."

"In this way, the Subspace backlash was borne by the Evil God corpses while they enjoyed the benefits..."

"Was it really that brutal?"

Su Yu thought carefully and realized that capturing the Brutal Split Mind as a battle armor energy source was perhaps a leftover tactic of the Human Empire from ages ago.

Moreover, the Human Empire back then played it even more ruthlessly.

Directly capturing and killing the Great Evil God's true form, using the corpse as the Energy Core.

"No wonder Zhang Chenfeng's creations are so generous, casually descending pure Spiritual Light Columns as a greeting gift."

"Could it be that the cores of those creations of Zhang Chenfeng in the sky all imprisoned an Evil God's corpse?"

Chapter 508: The Trial Ends, Energy Crystal!

Su Yu gazed at the few points of light in the sky, feeling a sense of eerie suspense in his heart.

Those points of light were all creations of Zhang Chenfeng, monitoring this planet from orbit for a full ten thousand years.

Such large Mechanical Creations would surely consume enormous amounts of energy over such a long period.

If it's really as Su Yu thought, that the energy maintaining those points of light for millennia is actually the corpses of Evil Gods!

In essence, those things are just one giant "Brutal Core" after another!

That Zhang Chenfeng from ten thousand years ago and the Human Empire were truly overwhelmingly powerful.

Originally, over-absorbing Subspace Energy would result in repercussions from the Subspace, enduring disasters.

The Human Empire wanted to develop but couldn't do without Spiritual Energy; it was a deadlock.

But the Human Empire millennia ago thought of a way, using the Evil Gods as Energy Cores.

They captured the Evil Gods from the depths of the Subspace, killed them, and used their corpses to create Energy Cores, to absorb Subspace Energy while having them bear the backlash.

Anyway, Evil Gods don't die, they can withstand infinite backlash.

This explains the Human Empire's strength ten thousand years ago, all built upon the bones of Evil Gods.

Su Yu even entertained a strange notion that the Evil Gods' revenge against humanity seemed quite reasonable.

This is simply bullying the gods too much...

Treat them this way, if Evil Gods don't seek revenge, they wouldn't be called Evil Gods.

"Tsk tsk, it seems that humans ten thousand years ago ultimately had a downfall."

"I must learn a lesson, in the future... use the Brutal Core more cautiously, and not let it backfire."

Su Yu muttered to himself shaking his head.

Although the Evil Gods being treated this way seems a bit miserable.

But Su Yu did not harbor any sympathy-like excessive emotions for the Evil Gods.

These Evil Gods are ruthless and chaotic, the natural enemy of any rational being.

So to Su Yu, the Human Empire dealing with the Evil Gods this way ten thousand years ago was not a problem at all.

The only issue was perhaps the humans of that time were just unlucky, or their technology was insufficient, eventually being backfired by the Evil Gods.

Su Yu naturally didn't want to one day suffer such consequences.

Nor did he want to give up the valuable energy source that was the Brutal Core.

So he had to be careful.

The current Brutal Split Mind, although already dead, has become a corpse.

But Evil Gods never die; their corpses will one day "grow" new brutal will.

Therefore, Su Yu still needed to be vigilant and cautious.

"Not just be wary, but also quickly master the relevant technology, the technology to suppress the revival of the Brutal Split Mind, I must master this, cannot always rely on Zhang Chenfeng's creations to help me."

Su Yu pondered in his heart.

He now had another goal, which was to master the technology from the Human Empire ten thousand years ago of utilizing the Evil Gods.

"Moreover, cannot completely rely on the Empire's technology, after all, the Empire eventually faced a downfall as well. The technology of those days may not be reliable."

"It's best to research on my own and master my own technology of utilizing Evil Gods..."

After carefully thinking through it, Su Yu finally collected his thoughts and looked towards the distant horizon several hundred kilometers away.

The technology of utilizing the Evil Gods is not something that can be acquired in a short while, right now the key is... how are Xie Yitian and Tie Long doing in their battle over there?

Su Yu was a bit worried; his own trial process was earth-shattering.

If Xie Yitian and Tie Long's situation was also of such intensity, could it be that the two of them were already... killed?

Fortunately, Su Yu soon, through his sense of belief, perceived that Tie Long was not yet in life-threatening danger and was relieved.

As for Xie Yitian, he was unsure, hoping he would fend for himself.

Su Yu activated his battle armor and flew towards the direction of the Mechanical City.

At thirteen times the speed of sound, Su Yu quickly returned to the vicinity of the Mechanical City.

And then he saw Tie Long engaged in a lively fight with that hundred-meter-tall Giant God.

The situation for Tie Long was basically a repeat of Su Yu's earlier battle; both sides were close combat experts, clashing rapidly at supersonic speeds in mid-air.

At this moment, Tie Long was already a semi-Mechanical Life, fused with the Galaxy Battle Armor, possessing the ability to fly, and could conduct aerial battles with that Giant God.

However, the Giant God Tie Long faced was much weaker than the one Su Yu faced, with much less aggression.

The fight between the two seemed too weak to Su Yu, too slow, not even reaching ten times the speed of sound; it wasn't even a warm-up for Su Yu.

Even so, Tie Long was drenched in sweat, when had he ever experienced such a level of combat intensity?

That Giant God had nearly eight-star top-level strength, completely overwhelming Tie Long.

Tie Long, facing such a strong adversary, was forced to roar with anger, exerting the power of the Galaxy Warrior and battle armor to the extreme.

His whole body was imbued with the power of "loyalty," continuously clashing with the Giant God.

The semi-mechanical Tie Long was being bombarded with parts and flesh flying all around; nearly half of his skin was gone, exposing the mechanical structure beneath, making him look like an unmasked "Terminator" robot, half flesh, half machine, appearing very formidable.

Meanwhile, Xie Yitian's battle was somewhat bizarre.

The Giant God he faced didn't make any movement, it just hovered quietly in place, confronting Xie Yitian.

As for Xie Yitian, he, too, stood there dazed.

He couldn't exactly be said to be standing in place because Xie Yitian's body was not there, his carrier had already been destroyed earlier in the collision between Su Yu and the Vengeful Demon.

Chapter 509: Trial Ends, Energy Crystal!\_2

Sure, here's the translation:

So at this moment, Xie Yitian here was only a data entity.

This data entity of Xie Yitian was suspended in mid-air, motionless, seemingly in a daze.

Only someone like Su Yu, who was equally skilled in data, could discover that within Xie Yitian's data entity, vast and immense data was being continuously processed at high speed.

Su Yu understood that the test Xie Yitian was facing was a battle on the data level. That small Giant Mech excelled in data information warfare and was now engaging Xie Yitian in a data field duel.

Su Yu could feel that Xie Yitian's data entity had already been invaded, with his consciousness, thoughts, and memories constantly being modified and overwritten by the Giant Mech.

The Giant Mech was inscribing various codes and commands into Xie Yitian's deep consciousness.

Xie Yitian was utterly defenseless, only able to passively defend, continuously reverting his altered consciousness back.

If he were not careful and didn't amend the changes in time, he would lose himself and become a puppet of that Giant Mech.

This battle was actually more perilous than the one Tie Long was facing, so much so that one might forget even their own name if they couldn't withstand it.

But upon witnessing this precarious scene, Su Yu merely shook his head slightly:

"Apparently, their trial intensity is much lower."

Indeed, such a perilous battle seemed too low in intensity to Su Yu.

Compared to the previous epic battles he had experienced, it was a minor scene.

Su Yu even felt that both Giant Mechs were holding back, not going all out; otherwise, Tie Long and Xie Yitian would have been already defeated.

In truth, it was Su Yu who was truly put to the test.

Tie Long and Xie Yitian benefited from Su Yu's presence, getting tested in passing.

Perhaps to the creations of Zhang Chenfeng, Tie Long and Xie Yitian appeared to be Su Yu's "new recruit" servants or the like.

And in fact, the judgments of Zhang Chenfeng's creations weren't wrong.

Tie Long was a believer of Su Yu, and Xie Yitian considered himself a follower of Su Yu, nearly tantamount to servants.

Thus, Zhang Chenfeng's creations also tested them a little, to see if they were qualified to become Su Yu's servants.

The test for servants was naturally not as brutal as for Su Yu, being much more lenient.

However, Su Yu suspected that if he failed and died in his test, Tie Long and Xie Yitian might also lose their qualifications at the same time, and the consequences for them would be uncertain...

Su Yu patiently waited for a few more minutes, and finally, the two Giant Mechs confronting Tie Long and Xie Yitian simultaneously paused and ceased their attacks.

"Trial completed!"

The voice once again emanated from Su Yu's New Recruit Navigator.

It seemed that Tie Long and Xie Yitian only needed to endure for a certain period, unlike Su Yu, who had to defeat the opponent.

Following the emergence of this voice, both Giant Mechs underwent changes simultaneously.

They rapidly shrank, condensing from massive forms of tens of meters to crystalline objects about a meter square within seconds, dropping from mid-air to the ground.

"Whew!"

Upon hearing the trial was completed, Tie Long and Xie Yitian instantly felt relieved, breathing heavily with relief as they collapsed to the ground.

Although Tie Long was a Half-Mechanical and Xie Yitian at this time was only a data entity, it was unclear what they were gasping for.

Presumably, the pressure of the previous trial was just too great.

After panting for a while, they managed to recover, showing expressions of joy.

"Hahaha... At last, I almost thought I was going to die..."

Both of them laughed heartily.

Passing the trial meant that they would no longer have to worry about aerial attacks and could fly freely.

They might even be able to openly study flight devices.

After so many years, they could finally enjoy the sky freely, how could they not be overjoyed?

Su Yu did not disturb them but instead picked up the two crystalline objects transformed from the Giant Mechs.

"What is this..."

Upon examining the two crystals, Su Yu soon showed a pleased expression.

He discovered that the crystals contained highly concentrated pure spirit energy.

This was not unexpected, as they were condensed from two Giant Mechs, containing a significant amount of energy was inevitable.

What caught Su Yu's attention was the very unusual state of its energy.

Normally, there is a clear distinction between matter and energy.

There is also a vast gap between data, energy, and matter.

But now, these two crystals seemed to be a fusion of energy, matter, and data, quite peculiar.

This unique form allowed it to be as stable as matter, to be held directly in hand.

It could also be stored and transported using chips and various intelligent devices like data.

Su Yu tried to store the object into the chip of the Brutal Battle Armor, and indeed, one crystal disappeared instantly.

It was stored in the chip in data form.

Moreover, it occupied very little storage space on the chip, as its data form was straightforward and not complex.

Then, with a thought, Su Yu caused the crystal to reappear in his hand, having retrieved it from the chip.

Su Yu then exerted his force to snap a small piece off one of the crystals.

The detached crystal still maintained its crystalline shape.

With a swift motion of his finger, Su Yu exerted his power.

With Su Yu's strength, even the hardest high-performance alloy could be crushed to pieces, and the small crystal fragment was reduced to tiny powder under Su Yu's pinch.

Despite such violent treatment, it did not release the pure spirit energy contained within, nor did it explode; it was extremely stable.

Su Yu nodded affirmatively, and with a thought, he enveloped his hand with spiritual energy.

Instantly, the crystalline powder melted rapidly under the enveloping spirit energy, transforming into pure spiritual energy, which Su Yu held in his hand in energy form.

Once in energy form, it was pure spiritual energy, fundamentally different from matter or data.

Su Yu returned this spirit energy to the large crystal, where it quickly "settled" back into crystalline form.

"Freely transforming between three states? Truly amazing..."

After experimenting for a bit, Su Yu discovered the various wonders of this crystal.

This is incredibly convenient!

It could easily transform freely between energy, matter, and data.

Moreover, it was extremely stable and would not volatilize rapidly or cause a data explosion like data spirit power if not stored on a chip.

It might even be possible to consume this, allowing humans to easily absorb the energy within.

Clearly, this was also a crystal of extremely advanced technology, an energy technology of the Empire.

It was a reward left by the creations of Zhang Chenfeng upon completion of the trial for Su Yu and his companions.

"So, the Giant Mechs transform into such marvelous things after combat."

"What a pity that I blasted my Giant Mech to smithereens, what a waste..."

Su Yu remarked somewhat regretfully.

In terms of energy, his opponent, the 200-meter-tall Giant Mech, undoubtedly had the most and strongest energy.

But, unfortunately, it was gone.

"This thing should be able to power the entire Mechanical City as an energy source..."

Su Yu immediately determined its utility, planning to use it as an energy source for the Mechanical City in the future!

After devouring War City and the City of Heavenly Punishment, the Mechanical City had greatly increased in mass, demanding high power.

Although Su Yu could barely sustain it, if he continued to swallow another one or two cities, it might become unsustainable.

At that point, the Mechanical City would have to remain grounded, unable to move any further.

Fortunately, now there were these two crystals.

Not that these two crystals could drive the entire Mechanical City for a long time.

After all, the energy in these two crystals was limited.

However, the crucial point was the advanced energy technology contained within these two crystals. Through research on the crystals, Su Yu was confident in solving the energy problem of the entire Mechanical City!

This gift was indeed extremely significant!

Chapter 510: Su Yu's Astonishing Plan, Planetary Development!

While Su Yu was studying the two mysterious Energy Crystals, Tie Long and Xie Yitian had already recovered from their initial euphoria.

However, they had not yet noticed Su Yu, who was not far away.

Because during their previous trial, their minds were too tense to pay attention to the outside world.

In that intense battle, one could say they were blind and deaf.

All they could see and hear was their opponent, nothing else.

If they didn't focus their Spirit and give their all, they would've been dead!

Such high-intensity combat was just that brutal.

However, after experiencing such high-intensity battles, their Spirit received a baptism, enhancing their mastery over their power and slightly increasing their strength.

Not just them, but Su Yu also benefited greatly from the previous battle.

Now, as Tie Long and Xie Yitian regained their senses and awareness of their surroundings, they noticed each other in the distance, exchanged a similar smile, and began to converse:

"That was truly an intense battle, I even suspect my opponent was at a nine-star level!"

"Yes, my opponent was also terrifying, definitely eight-star level in the data field..."

"By the way, I wonder how Mr. Su Yu's trial went? Could he be in danger?"

Tie Long and Xie Yitian carried on their conversation casually, both feeling a sense of growing confidence.

Surviving an unprecedented battle and passing the trial gave them stronger confidence in their power.

"Wait, what's that?"

At this moment, they suddenly noticed a distant scene that seemed somewhat amiss.

As they raised their heads, they saw, hundreds of kilometers away, the massive plasma fireball Su Yu unleashed in battle was still lingering.

Above the fireball, the clouds were pushed aside by the battle's aftermath, revealing the blue sky above.

From afar, that hole in the clouds was immense, seemingly breaking the sky itself.

Above Tie Long and Xie Yitian, there was also a hole, caused by the previous battle between the Mechanical City and the demon adversary.

But the one in the distance was larger and more spectacular.

"Could that also be...created by Mr. Su Yu?"

Tie Long and Xie Yitian exchanged a glance, suddenly standing up, their faces full of shock.

They initially thought that their previous trial was an earth-shattering battle.

But seeing Su Yu's scene, they realized their own was just a minor skirmish.

Then, they couldn't help but feel concerned for Su Yu.

Judging by the commotion in the distance, it seemed ten times more intense than the previous battle with the demon. Could Su Yu be alright?

"Wait, is that... Mr. Su Yu?"

Only then did they finally spot Su Yu nearby, studying the Energy Crystal.

"It turns out Mr. Su Yu already completed the trial, unharmed, truly incredible..."

Tie Long and Xie Yitian both sighed in relief at this point.

Then, they noticed that Su Yu had not a single wound or damage on him.

This realization shocked them even more.

Both of them were severely injured, barely completing their trial.

Tie Long's entire flesh and blood almost obliterated, leaving only a mechanical skeleton.

Xie Yitian's core data was scrambled and unrecovered.

His projected virtual image was full of glitches and mosaics, occasionally flickering, indicating severe damage.

Meanwhile, Su Yu's battle aftermath reached outer space, demonstrating the battle's intensity.

Yet, Su Yu himself appeared unscathed.

His Brutal Battle Armor was spotless, as though freshly manufactured.

In fact, Su Yu's Brutal Battle Armor had just undergone a dismantling and Repair process, and indeed, it was like new.

However, Tie Long and Xie Yitian were unaware of this Repair benefit and thought Su Yu breezily won the trial without his armor getting dirty.

"Mr. Su Yu's power is truly unfathomable!"

"Earlier, when he dealt with the demon, he only used the power of the Mechanical City. Unexpectedly, his own combat power is much stronger than the Mechanical City."

"This is certainly already at the high or even pinnacle of nine-star level power, and it's been such a short time..."

If Mr. Su Yu's strength continues to advance at this rate, we might one day find it impossible to keep up with him..."

Tie Long and Xie Yitian exchanged another glance, once again marveling at Su Yu's strength.

Their inflated self-confidence evaporated without a trace.

They even felt a little despondent.

Because Su Yu's power was too strong, advancing too quickly.

At this rate, he might soon leave them far behind.

In the future, when Su Yu faces enemies, they, with their mere seven-star or eight-star levels, might not even have the qualification to confront them.

Just like the hundreds of thousands in the Mechanical City, who had to hide when the battle began, lacking even the ability to watch.

Tie Long and the others, being seven-star, somewhat qualified.

But if Su Yu's power continues to rise, they might not even have the qualification to watch.

After all, judging by the terrifying aftermath of Su Yu's battle with the Giant God Soldier from a distance, if Tie Long and Xie Yitian had been at the scene, they might have been obliterated by the aftermath.

"Actually, we already can't keep up with Mr. Su Yu's pace now.

"Could it be that, in the future, like those hundreds of thousands, when a major battle starts, we'll only be able to hide and take refuge?"

Tie Long and Xie Yitian couldn't help but murmur to themselves in their hearts.
