

Infinite 531

Chapter 531: A Risky Attempt_2

This is the powerful self-control of an eight-star Transcendent.

Ordinary people can close their eyes and hold their breath, which are forms of self-control.

As a Transcendent, one's self-control is naturally much stronger!

As Su Yu continuously shut off his senses, his spirit gradually became scattered because his mind couldn't find an anchor point.

At the same time, a huge sense of crisis arose in his heart.

A voice kept reminding him, don't continue!

You will die! You will die! You will definitely die!

This is probably equivalent to an ordinary person holding their breath to the limit, and their body telling them to stop, or they'll suffocate themselves!

Ordinary people naturally cannot really hold their breath to death.

Their self-control is insufficient; they would pass out at a certain point and then naturally resume breathing.

But Su Yu can! He can really "suffocate" himself!

Su Yu ignored his own warning and continued to shut off his senses.

Soon, Su Yu couldn't even sense that instinctual danger warning anymore.

Previously, there was still darkness and silence, but now even that was gone; boundless Nihilism began to envelop Su Yu!

He lost all perception, couldn't sense the outside world, couldn't sense his body, and couldn't even sense his spirit or Spiritual Energy.

He couldn't even hear the voice inside his own mind!

"Perhaps, this is what they call 'sitting still'?"

In the final moment before Su Yu's thoughts came to a halt, this thought suddenly popped up.

Then, his mind completely disappeared!

At the same time, his body, which lingered in the Subspace Analyzer, suddenly became phantom-like, starting to flicker!

Like a wisp of fog, or a virtual projection!

Or, using the terms of Quantum Mechanics, this is called... a Probability Cloud!

...

Meanwhile, outside.

The Mechanical Spirit, the Mechanical City, Tie Long, and some of Su Yu's followers all suddenly felt a jolt in their hearts, as if they had lost something important.

They all felt a tremendous sadness rising from their hearts.

They were confused, not understanding why they suddenly felt so sad.

What had happened? They seemed to have lost something important, but what?

A moment later, they simultaneously thought of a figure: Su Yu!

They were suddenly frightened and quickly tried to pray to or sense Su Yu, but to no avail.

Normally, as believers, if they prayed to the object of their faith, even without a response, there should be at least some sense of connection.

But now, these followers had no sense at all, as if they were praying to thin air.

And the Mechanical Spirit and Mechanical City, having a closer relationship with Su Yu, should be able to sense their master at any time.

But now, they felt nothing at all.

A terrifying thought suddenly sprang up in their hearts!

Su Yu... is dead!

Suddenly, these people and machines almost went insane!

A follower suddenly felt that the deity of their faith was gone, was dead!

It's no wonder they went mad!

As a piece of Mechanical Life, sensing that their master is gone, it's no wonder they went mad!

The Tie Long, who was originally wandering aimlessly in the Mechanical City, instantly unleashed maximum speed, rushing towards the underground of the Mechanical City.

He remembered that all day, Su Yu was underground studying Tang Xiaomei's Ice Tower!

And the entire Mechanical City shook with madness.

The Mechanical Spirit and the Mechanical City, both lives created by Su Yu, could no longer sense Su Yu, and these two Mechanical Apostles also fell into chaos and sorrow.

Besides them, several Mechanical Believers who had received the Mechanical Blessing began to wail in grief.

Others, who initially didn't know what was happening, quickly asked when they saw this.

A moment later, the shocking news began to spread throughout the entire Mechanical City:

Mr. Su Yu is dead!

"How is that possible?"

Xiao Shengyin, Xie Yitian, Qi Chen, Shao Lan, and others were completely at a loss when they heard this news.

Although they were seven-star and eight-star powerhouses, in the face of such a situation, they lost their stability, almost like ordinary people.

In their hearts, the mysterious ancient revival leader, the invincible Su Yu, had died?

As for Su Yu's old friends, Yang Lie, Feng Tian, and others were so shocked they almost passed out.

Since Su Yu's breakthrough to seven stars, these old friends had been unable to keep up with his pace and had little contact; recently, they couldn't even get a word in, estranged quite a bit.

However, these old friends all knew that Su Yu was very busy, tremendously busy! Every day, countless major affairs awaited Su Yu's attention.

Therefore, they bore no grudge.

Instead, they hoped that Su Yu would not waste time on them and focus all his time on handling great matters!

They believed, as long as Su Yu continued this way, he would surely lead them to break through the confinement of this planet! Accomplishing an unprecedented great achievement throughout millennia!

Yet now, they were suddenly told Su Yu died?

How could they possibly accept that?

"I don't believe Mr. Su Yu just died like that! I don't believe it!"

These old friends yelled out, also rushing towards the underground of the Mechanical City.

Soon, they all arrived in the Mechanical Furnace underground of the Mechanical City.

At that time, Tang Xiaomei was idly waiting for Su Yu to come out of the Subspace Analyzer.

Meanwhile, she was puzzled, wondering why the Mechanical City was shaking again. Could there be an external enemy? No way, or had it encountered a gale in the sky, causing it to sway a little?

Just as Tang Xiaomei was lost in thought, Tie Long rushed over like a gust of wind, and seeing Tang Xiaomei, his eyes flushed red:

"You ice woman, quickly tell me what happened to Mr. Su Yu! How is he gone and you're still here! Speak!"

Tie Long, in a hurry, sounded like he was interrogating a suspect.

Tang Xiaomei, seeing Tie Long's rude tone, immediately raised her eyebrows, ready to curse.

At this time, Xiao Shengyin, Xie Yitian, and others also rushed in, followed by Yang Lie and others.

Soon, the entire Mechanical Furnace was packed with people.

All these people had reddened eyes, breathing heavily, staring intently at Tang Xiaomei.

"Wha... what happened?"

Tang Xiaomei finally felt something was wrong, weakly asking.

"What happened? Mr. Su Yu seems to have died! Everyone has lost their sense of him!"

"Quick, tell us, what happened?"

Tie Long shouted roughly.

"Ah? What? Is this a joke?"

Tang Xiaomei was already dumbfounded.

But seeing the serious and sad expressions on everyone's faces, she finally realized that it could not be a joke.

Mr. Su Yu might really be dead!

"It's like this..."

Tang Xiaomei didn't dare delay further and quickly began explaining everything that happened earlier to everyone...

"Mr. Su Yu was just in there investigating, how could he suddenly die? If it's real, the Mechanical City has monitors; you can ask it..."

"Right! The Mechanical City is Mr. Su Yu's creation, it should be able to sense his status, maybe you've sensed it wrong."

In the end, Tang Xiaomei still found it hard to believe.

At this moment, the voice of the Mechanical City sounded with sadness: "I can feel that our master disappeared completely shortly after entering this machine..."

Upon hearing this, everyone felt a heavier heart.

They had asked the Mechanical City before, but it was in chaos and sadness at the time and did not respond.

Now, having received a direct response from the Mechanical City killed any remaining doubt.

"This iron box killed Mr. Su Yu? I'll smash it!"

Tie Long stayed silent for a moment before suddenly exploding, charging towards the Subspace Analyzer with aggression.

Seeing this, others remained silent for a moment and then suddenly joined in, channeling their anger and sorrow towards the Subspace Analyzer.

Within the entire Mechanical Furnace, Spiritual Energy surged, and the wind howled.

Tang Xiaomei opened her mouth to advise them, knowing this machine could not be broken by even Mr. Su Yu. But she reconsidered and stayed silent.

...

While turbulence reigned outside, inside the Subspace Analyzer.

Su Yu's body had already completely transformed into a blurred, flickering "Probability Cloud" state.

Moreover, his body seemed to be slowly "diffusing," like a mist continuously diluted by the air.

It seemed he was becoming part of this space, fully integrating here.

Yet, Su Yu knew none of this; he was already "dead."

Neither seeing, hearing, nor sensing, even his thoughts had fully ceased.

If nothing unexpected happens, Su Yu will disappear completely from now on.

But amidst this eternal silence, a line of text suddenly appeared out of nowhere:

[Gained Professional Experience 10000...]

Chapter 532: Wake Up! Su Yu in Quantum State!

[Gained Professional Experience 10000 (War Mechanic lv17)]

[Heavenly Punishment War Mechanic Level Increased, Power of Dominator Synchronously Increased...]

The prompt from the Profession Panel suddenly appeared.

Su Yu, the War Mechanic, was continuously gaining experience.

The source of this experience was Tie Long and other Mechanical Believers.

Although the experience wasn't much, it was steady and required no effort, with experience being credited periodically, pushing Su Yu's War Mechanic close to level 20.

This was Su Yu's trump card!

He had confirmed beforehand, before taking action, that it was only a few minutes until the next experience gain.

So he indeed took action, shutting down all perception and letting himself die!

Then, he awaited the profession panel's experience prompt to awaken him!

Bang!

With the appearance of the profession panel's prompt, a tiny disturbance finally emerged in the absolute nihility and silence.

Originally, in normal circumstances, Su Yu would ignore the profession panel's experience prompt.

But now, in absolute nihility, no other information could exist.

The prompt from the profession panel was exceptionally vivid, like divine thunder from the sky, like the universe's initial big bang!

Su Yu, whose consciousness had scattered and was equivalent to death, suddenly awakened!

With this prompt, his consciousness found an anchor point again!

Su Yu was alive again!

"Indeed, the prompt from the profession panel can awaken me!"

Upon waking up, Su Yu was filled with the joy of having survived a disaster.

Although this "disaster" was self-inflicted.

But ultimately, he didn't succeed in killing himself, which was worth celebrating.

"So, is this what death feels like?"

Upon awakening, Su Yu didn't immediately resume his prior research.

Instead, he reminisced about the feeling of absolute nihility and silence from earlier.

That was true death, yet it seemed to be more than just death...

It was entirely different from the nihility space created by the Ghost Hidden Blade Evil God Origin, seemingly even more "nihilistic."

With this experience of death, Su Yu gained many insights.

He felt that the so-called "Power of Nihility" he used before, and the so-called nihility space he entered, were simply counterfeits.

What he just experienced was true nihility, true deathly silence.

"Having experienced true nihility, it seems that my Power of Nihility has also greatly improved..."

Although Su Yu hadn't tried, he instinctively felt that his Ghost Hidden Blade and Power of Nihility had undoubtedly improved significantly.

After all, he had died once, experienced true nihility once, almost losing his life, so no improvement would be strange.

However, the specific extent of improvement still needed verification.

And currently, there was no opportunity for him to experiment with his power.

"Let's talk about the Power of Nihility later, get on with the important matters first!"

Su Yu knew that time was tight and was unsure how long this state could be maintained, so he quickly sensed whether his quantumization was complete.

He immediately began to unseal his perception, trying to sense his body and the outside world.

As the perception was unlocked, a bizarre feeling slowly surged into Su Yu's mind.

His original flesh and blood body had become entirely imperceptible.

But it didn't mean Su Yu couldn't sense his body.

In fact, his sense of his body was stronger than ever.

So strong that... he felt his body seemed to be everywhere!

He had a sense of omnipresence, as if he had turned into air, filling every inch of surrounding space.

He seemed to be everywhere, yet nowhere, never having a fixed coordinate.

He tried to sense and control his limbs, attempted to raise a hand, take a step.

But he quickly realized this was an impossible task.

His limbs were omnipresent, positions ever-changing, and he had no idea where to send nerve signals.

Su Yu tried for a while and barely managed to move slightly.

But even he didn't know what action he just made, whether he raised a hand or stretched a foot.

"Is this what quantumization feels like? A quantum probability cloud?"

Although Su Yu felt very strange, he was extremely delighted.

Because he believed his experiment had succeeded.

During the time he shut down all perception and "died," his body had completed the transition to a quantum state.

Now, he was a "Quantum Man."

In Quantum Mechanics, there is a concept of a "probability cloud."

Subatomic particles in space have no definite position; they might be on the left, on the right, above, or below.

These states can all exist simultaneously.

However, in different positions, the probabilities of their appearance vary.

Compiling these probabilities results in the so-called probability cloud.

Where the probability cloud is denser, the probability of appearing there is higher.

At this moment, Su Yu's body had turned into a quantum state probability cloud, so he couldn't sense his precise location at all.

He didn't even know where his limbs were.

The various neural signals within his body became chaotic.

Su Yu tried to fully unlock his perception to sense the outside world.

However, he failed.

His eyes couldn't open.

They might have opened, but Su Yu didn't know, because he had no idea where his optic nerves were routed, so he couldn't see the outside.

His ears, however, could hear sounds, indicating his auditory nerves were correctly attached.

But the sounds he heard were overwhelmingly chaotic, utterly undecipherable.

He then attempted to release his spiritual power to sense the outside, as spiritual power doesn't rely on nerve signals.

But he quickly discovered his spiritual power was also in a quantum state...

Chapter 533: Wake Up! Su Yu in Quantum State!_2

Even because spiritual power is formless and shapeless, after transforming into a quantum state, it became even more abstract, making it impossible for Su Yu to control them at all.

"In this state, one cannot move at all! Unable to do anything..."

Su Yu felt somewhat helpless. Although he managed to transform himself into a quantum state as he wished, he couldn't do anything.

This bizarre state seemed fundamentally ungraspable by ordinary living beings.

Su Yu even found it strange that his thoughts could still remain normal.

If his thoughts had turned into a quantum probability cloud, that would be disastrous.

Thinking about a problem would depend on luck and probability.

Only with good luck could he think clearly; if the probability wasn't in his favor, the result of his thinking would be left to fate...

That would be even crazier than a madman.

Fortunately, Su Yu did not turn into that.

However, Su Yu didn't think his thoughts could remain stable simply because of luck.

He immediately started pondering the principle and the underlying details.

"Why didn't I become a quantum lunatic? Is it because... I am an observer myself, observing myself, which keeps my thoughts stable?"

Soon, Su Yu reached a conclusion.

The quantum probability cloud is not unchanging.

If there is an observer, the probability cloud collapses, making positions definite.

This position certainty is relative.

Even with an observer, the probability cloud still exists; it only collapses very small, making the probability of it appearing at a coordinate extremely high, seeming stable on the surface.

Su Yu believed that his thoughts remained in a stable state under this principle.

His thoughts were also observers; as the saying goes, "I think, therefore I am." When he thinks, it is equivalent to observing himself, allowing the probability cloud to collapse, preventing chaos and madness.

"Then, can I use this principle to let my body also collapse?"

After understanding why he hadn't gone mad, Su Yu immediately had an idea.

He began attempting to "observe" himself, letting his body's probability cloud also collapse into a stable state.

However, all the observation methods Su Yu had now were already useless.

He could only use his mind to imagine, recalling his previous body in the depths of his consciousness.

Not knowing if this memory and imagination counted as an observation.

Fortunately, Su Yu quickly determined, yes, it does!

He felt that with his imagination and recollection, his body's floating and pervasive state improved somewhat.

He was delighted and immediately intensified his focus.

This imagination and recollection completely relied on abstract willpower. Ordinary people couldn't control their thoughts at all, and even if successful, they'd probably collapse into a chaotic mess of a monster.

Fortunately, as an eight-star Transcendent, Su Yu's willpower was immensely strong.

This mental observation quickly proved effective.

Su Yu clearly sensed his probability cloud continuously shrinking, becoming dense and stable.

Transforming from a cloud into a solid entity.

A few minutes later, Su Yu finally felt the tangible heartbeat, felt the body and muscles.

Then he tried opening his eyes!

"So this is my current state? It looks so terrifying..."

As soon as Su Yu opened his eyes, he saw his own face and was immediately frightened.

On his face, his facial features were dislocated, constantly shifting, looking three parts human, seven parts ghost.

One eye socket on the forehead, one on the left cheek.

There were no eyeballs in the sockets, so how could Su Yu see anything?

In fact, his eyeballs had flown out of their sockets, suspended in mid-air, staring back at him.

This bizarre scene even startled him.

"..."

Su Yu quickly concentrated his thoughts to imagine his previous normal facial features.

After some effort, those two eyeballs finally flickered and returned to where they belonged.

Simultaneously, Su Yu's facial features also returned to their positions.

Though slightly skewed, it was much better than before.

"Finally, it's settled..."

Su Yu felt joyful.

Then he had time to look around.

And then, he saw those quantum state mechanical devices in the subspace analyzer.

As soon as Su Yu saw those mechanical devices, they flickered as if about to collapse and disappear due to Su Yu's observation.

These mechanical devices were very special, seemingly the opposite of normal quantum states.

Without an observer, these mechanical devices would collapse.

If there's an observer, they disappear, becoming a probability cloud.

So, under normal circumstances, they are completely unobservable.

But now, facing Su Yu's gaze, these mechanical devices only appeared somewhat illusory and did not completely disappear.

It seems Su Yu's guess was right.

He too was in a quantum state now, with observational power severely weakened, finding it hard to maintain his own stability, let alone affecting the external environment, unable to make the mechanical devices in the subspace analyzer disappear.

"Haha, now it's research time!"

Su Yu smiled slightly, and then his eyeballs almost popped out again.

He quickly pulled back his smile and pushed his eyeballs back in place, then walked towards those machines.

These mechanical devices were his ultimate goal that almost cost him his life.

Surely, these devices contained highly advanced technology and knowledge.

Researching them would certainly bring great benefits to Su Yu.

Su Yu took just one step and arrived in front of a mechanical device.

He and the device were about three or four meters apart. Obviously, his step was normal, about one meter.

Yet, with one step, he mysteriously covered three or four meters.

This wasn't due to speed but... instant teleportation!

It was true teleportation!

"Can being quantumized enable instant teleportation?"

Su Yu didn't rush to research the device but first studied the momentary teleportation.

After all, it was his first time experiencing such an advanced mode of movement.

In fact, in subspace, Su Yu had experienced teleportation several times.

But that was in the chaotic and distorted subspace, and it was the spiritual body that teleported.

Now, in the material world, his physical body experienced teleportation, making it significantly different!
Highly meaningful.

Su Yu was eager to understand the principle behind it.

"I am now just a cloud of probability."

"So... I wasn't walking here, but by self-observation, I made my probability of appearing here largest."

"That's why I collapsed here..."

Su Yu murmured to himself.

His body was somewhat illusory.

Seemingly standing there, he really was just more likely to appear there.

In other places, he had the probability of appearing as well.

His "probability cloud" still covered everything around him.

Previously, when Su Yu teleported, he unknowingly used his mental observation to make his probability cloud collapse in front of that mechanical device, making him most likely to appear there.

And so, he appeared there, achieving teleportation.

The principle was very magical, making Su Yu, an eight-star Transcendent, marvel silently.

This technique was extremely eerie, impossible to defend against.

Just for this step of teleportation, all his previous risks were worth it!

This research indeed yielded significant results!

"Is it possible that teleportation in subspace works on a similar principle?"

"Did I become some kind of quantum state upon entering subspace?"

"Forget it, such things can't be answered by guessing, it's a matter for another day..."

While pondering, Su Yu tried teleporting a few more times to become familiar with the operation.

Then he cleared his mind and began studying those devices.

"Let me see, what the principle of this subspace analyzer is all about..."

He released spiritual power, used the Mechanic's method, and began analyzing those mechanical devices.

Those mechanical devices, in regard to Su Yu's analysis, put up no resistance.

Their quantum state was their strongest defense.

However, Su Yu had already broken their defense by practically dying once!

Now, their secrets were unguarded against Su Yu!

As Su Yu's spiritual power delved deeper, overwhelmingly complex and exquisite structures appeared in his consciousness!

Chapter 534: Superposition of Life and Death, Su Yu in the Box!

"Is this the internal structure of the Subspace Analyzer?"

"Finally, I can broaden my horizons!"

Su Yu took a deep breath to calm his excited mood and immediately prepared to start his research.

However, before starting, his posture suddenly paused slightly, and he heard an illusory prayer in his consciousness.

In the space of his mind, those prayer lights were flickering.

Usually, even with prayers, Su Yu generally chose to ignore them.

But now, those prayers were completely different from what Su Yu had heard before, filled with negative emotions like grief and fear.

Su Yu felt something was wrong and listened carefully for a moment to understand the content of the prayers.

"So, it's Tie Long and those believers?"

"They think I'm dead?"

Su Yu couldn't help but chuckle slightly.

No wonder these prayers sounded so shocked, angry, and grief-stricken.

When believers find out their god has died, wouldn't they be shocked, angry, and grief-stricken?

Moreover, not just on the side of Mechanical City.

Even thousands of kilometers away in the Radiation Land, a large number of Radiation Beasts were howling to the sky.

Many Radiation Beasts in the Radiation Land were also followers of Su Yu, sensing Su Yu's disappearance, and they too became agitated.

Even some low-level Subspace Demons in the Subspace also went berserk.

It was because Su Yu had previously caught a Subspace Demon in the Subspace, converted it into a believer, and then allowed it to "preach" in the Subspace.

Over such a long period, Su Yu had managed to establish a bit of a foothold in the Subspace.

The first demon Su Yu had converted was now equivalent to Su Yu's "Archbishop", diligently preaching every day, accumulating quite a number of believers.

These believers were hoping daily for the god Su Yu to come soon, bestow them with power and glory, and then invade the material world to slaughter all beings freely.

And now Su Yu suddenly died?

These demons had never experienced emotions of sadness since their birth, but now, they were overwhelmed by grief, letting out chaotic howls...

Listening to those chaotic prayers and howls, the corners of Su Yu's mouth slightly twitched.

He didn't expect that both Subspace Demons and Radiation Beasts were "mourning" for him.

This could really be described as a "spectacular funeral", making quite a racket.

But he wasn't even dead yet!

"The commotion caused by this experiment of mine is truly significant."

"It seems that in the future, I must be more considerate before conducting research."

Su Yu reflected on this immediately in his heart.

All this chaos was caused by his failure to notify in advance.

When his research urge kicked in, he disregarded everything else.

He didn't notify his followers in advance, which caused quite a chaos.

However, Su Yu couldn't be blamed.

For the sake of research, he was willing to risk his life; he even died once, not caring about anything else.

But with this experience, Su Yu would definitely learn a lesson next time.

After reflecting, another question popped into Su Yu's mind: "I'm already alive now, why do those believers not seem to notice?"

"Is it possible that after being quantumized, even the followers can't sense me?"

"Or does it mean I am not considered alive now? Or half-alive, half-dead?"

"What is this? A half-alive, half-dead cat in a box?"

Su Yu recalled a classic thought experiment from quantum mechanics, the half-alive, half-dead cat locked in a box by Schrödinger.

However, that was just a thought experiment, no real cat was harmed.

But now, Su Yu perfectly embodies the half-alive, half-dead condition from the experiment, truly becoming the "Su Yu in the box".

By shutting down all his consciousness previously, it essentially meant he was really dead.

Even though he was later awakened by the prompts from the Profession Panel, his quantumized state didn't mean he truly came back to life.

He could only be considered in a "superposition state" of life and death.

Even the "box", the exterior of the Subspace Analyzer, perfectly matched...

All this caused that, even though Su Yu had awakened, those believers couldn't perceive their "god" had returned.

They were still howling.

"Superposition state of life and death... the secrets of the Quantum Domain are truly numerous..."

Su Yu couldn't help but exclaim.

His first entry into the Quantum Domain felt just like the first time he entered the Subspace, everything felt novel, filled with unknown mysteries, awaiting his exploration and research.

However, before continuing with research, he had to first calm everyone's emotions.

If not appeased, these followers might become agitated and do something extreme.

Su Yu could hear Tie Long praying and shouting for revenge.

Who he intends to take revenge on, Su Yu didn't know. Was it the Subspace Analyzer he blamed?

"Could it be that Tie Long truly believes in me?"

"It seems the Power of Faith has a significant impact on humans."

Su Yu shook his head, and then, in his heart, prepared to use the Evil God Origin to transmit his voice to the believers, informing them he was still alive.

However, Su Yu quickly realized that his Evil God Origin was also in some quantum state and was very unstable.

Su Yu could only use the method of Self Observation to stabilize the Evil God Origin, and after some effort, he managed to grasp this new form of Evil God Origin.

Just as he was about to transmit his voice, his perspective suddenly shifted, appearing in the outside world, seeing Tie Long and the others.

No!

Not only did Su Yu see Tie Long and the others, but he also saw those Radiation Beasts deep within the Radiation Land.

He even saw those demons in the depths of the Subspace who had already become his followers!

Three completely different perspectives appeared simultaneously before Su Yu's eyes.

It felt like he was present in four places at once!

Chapter 535: Superposition of Life and Death, Su Yu in the Box!_2

Yes, four of them!

His true form was still inside the Subspace Analyzer and hadn't moved.

But it simultaneously appeared outside the analyzer, in the Radiation Land, and deep within the Subspace.

"What's going on?"

Su Yu was taken aback.

He was currently inside the Subspace Analyzer, completely blocked by its incredibly solid outer shell, unable to observe the outside world.

Only the power of the believers' prayers could pierce through the barrier and let him hear. But it was just sounds, not images.

But now, Su Yu felt that his consciousness, relying on the prayer light points, had appeared out of nowhere in the external world, allowing him to see the outside clearly.

Not just his consciousness, Su Yu felt as if even his body was appearing in the external world!

His body was appearing in four places at the same time!

"Is this one of the benefits of being quantumized?"

"Has my probability cloud spread to the outside world? Is that why I'm appearing in four places at once?"

Su Yu watched the various scenes in front of him, quickly thinking through the principles behind them.

This kind of remote descent was something he was experiencing for the first time, and it felt very novel to him.

In fact, as a true Evil God, he could completely descend spiritually through the bodies of believers from a distance.

Though he never tried before.

Because that kind of descent makes use of the Evil God Origin and is a spiritual descent, using the believer's body would cause great harm to them.

Letting the Evil God erode and control a body is certainly not a good thing, so Su Yu never used this method.

And now, Su Yu appeared simultaneously in four places, without using anyone else's body, just his own true form!

This is the special quality of the Quantum State, making use of the diffusion of the probability cloud.

Previously, Su Yu's probability cloud only spread within the Subspace Analyzer.

But now, the connection between the believers and Su Yu increased the probability of him appearing externally.

So he appeared in four places at once!

"This method is very useful... The commotion of the Evil God's descent is quite big, and it causes great harm to believers."

"But this descent method is much safer."

"Besides, they seem unable to see me..."

Su Yu didn't rush to reassure the believers but started researching his state first.

He discovered that although he appeared in the external world, others couldn't see him at all.

Even when Su Yu waved his hand and touched Tie Long and others beside him, they didn't react at all.

Not only could they not see him, but they couldn't even touch him!

Su Yu's hand passed right through their bodies.

Su Yu was used to using invisibility methods in the past, but that was just invisibility, where he was still touchable.

But now, even touching wasn't possible, this was no longer just normal invisibility but true invisibility.

"It seems that my current Quantum State, like those machines in the Subspace Analyzer, means that as long as observers exist, I can't be seen or touched..."

Su Yu murmured to himself.

The machines in the Subspace Analyzer weren't visible or tangible as long as observers existed.

Su Yu, relying on dying once and transforming his state, also acquired this ability!

Su Yu manipulated his quantumized body, moving around, discovering that he passed through others' bodies like a ghost, with them feeling nothing.

This feeling made Su Yu feel very novel.

Xie Yitian's profession was Data Ghost, but his data body could still be seen by those with data abilities.

But Su Yu now was a true ghost, truly invisible.

"However, although this state is concealed, the inability to contact others means I can't attack, which is a big limitation..."

After trying for a while, Su Yu quickly stopped, realizing this state's flaw.

His current quantumized state was concealed enough but lacked any attack power, which was also a problem.

Without being able to touch others, how could he attack? He could only watch helplessly.

"If I could transform myself into a state like the Subspace Analyzer's outer shell, that would be amazing..."

Su Yu's thoughts shifted as he looked at the Subspace Analyzer.

The machine's shell was also a special Quantum State.

However, unlike Su Yu's current state, the more observers there were, the stronger the shell became.

Previously, Su Yu unleashed nine-star level power, generating millions of degrees of extreme heat, and couldn't even leave a scratch on the shell.

Su Yu thought that if he could transform himself into a state like the shell, he could make up for the lack of attack power.

He could even make his power surpass nine stars!

Furthermore, if Su Yu could freely switch between the two Quantum States, he'd be invincible!

"Those mechanical devices surely contain the secret of this shell!"

"If I could figure it out, maybe I could master these two states!"

Thinking of this, Su Yu was eager to start his research!

Not wanting to delay any longer, he quickly activated the Evil God Origin, preparing to transmit a message to Tie Long and the others, to reassure these believers, and then focus entirely on his research.

At this time, he couldn't contact other people, only relying on the connection with believers to transmit messages.

However, just as Su Yu was about to transmit the message, an anomaly occurred again.

"What is that?"

Su Yu's gaze froze.

He saw some shadows slowly seeping out from the emotionally agitated crowd, merging on the ground.

Those shadows were pitch black and sinister, clearly not something good.

And the crowd seemed completely unaware of these shadows.

Su Yu's heart stirred, he stopped transmitting messages, focusing on these shadows.

He wanted to see what this thing was.

And as the shadow twisted and wriggled on the ground for a while, it slowly took shape.

Though it had no colors, it was just a mass of deep black shadow.

And its size fluctuated greatly, only about ten meters in diameter.

But with one look, Su Yu recognized what it was and almost cursed out loud:

"Avenging Demon!"

Indeed, the shadow seeping from the crowd was none other than Avenging Demon.

In the earlier battle, its form was shattered by the nine-star power of Mechanical City.

Su Yu thought that even if the thing wasn't dead, it must be gravely wounded and would lie low for some time.

Yet, within a few days, it reappeared.

And it directly infiltrated inside the Mechanical City! It just wouldn't let go!

And after the Avenging Demon finished fusing and took form, it laughed sinisterly:

"Haha, turns out Su Yu really died!"

"Luckily, I kept a card up my sleeve, hiding deep in these people's memories! Finally, I've found the opportunity!"

"Although Su Yu is dead, the legacy he left is truly abundant!"

"Especially the strong memories he left in others' minds, the best resources for me!"

"By taking advantage of this opportunity, my grand plan is sure to succeed!"

"I might even descend into the past! Become the true Su Yu!"

"By then, this Mechanical City, these loyal subordinates and believers, will all be mine!"

The Avenging Demon unabashedly revealed its plot aloud.

While Tie Long and others seemed completely ignorant of Avenging Demon's presence.

Evidently, Avenging Demon was confident in its prowess and had no fear of being discovered.

However, it never expected that the allegedly dead Su Yu was standing right in front of it, glaring at it!

It seems, even though Avenging Demon's methods were mysterious and powerful, they were still slightly inferior to Su Yu's Spiritual Quantum State.

"This guy has guts!"

"Seeking death!"

Murderous intent surged within Su Yu.

He even had the impulse to have his true form burst out of the Subspace Analyzer and engage the Avenging Demon in battle!

Although Su Yu had transformed into a Quantum State and couldn't touch the outside world, it was relying on the environment within the Subspace Analyzer and wasn't truly his own ability.

Theoretically, if he moved all his probability clouds out of the analyzer, he would immediately collapse back to a normal state, naturally capable of fighting.

For Avenging Demon, the relentless adversary with countless plots against him, Su Yu held extreme hatred, feeling a burning anger upon seeing it, momentarily putting aside even his research.

However, Su Yu quickly calmed down and didn't act rashly.

Knowing full well how insidious Avenging Demon was.

And its methods were cunning, if he acted rashly and it escaped again, who knows when he'd get another chance to catch it.

This time, Su Yu wanted a one-time solution, to truly kill it!

"Looks like I'll need to plan thoroughly..."

Su Yu murmured to himself.

Chapter 536: Choumo's Ritual, Another Su Yu?

At this moment, Su Yu was contemplating while staring intently at the Qiu Demon.

He wanted to see what this guy was really up to.

He didn't continue to send messages to the believers, fearing it might be detected by the Qiu Demon.

Qiu Demon could hide within other people's memories, an ability far too insidious.

If others knew that Su Yu was not dead, it would be equivalent to the Qiu Demon knowing.

So, Su Yu thought it was better to keep it hidden for now.

At this point, the Qiu Demon was still talking to itself:

"The profession I created, [Time Drifter], requires the memories of powerful ancient Spiritual Users as anchor points to travel through time, to go back to the past."

"Su Yu, oh Su Yu, your death was just too perfect!"

"Although you're dead, you forever live in others' memories; that's my best ritual sacrifice..."

"Heh heh, once my ritual is completed, I will become the new Su Yu!"

"This entire Mechanical City and so many people will be under my control, then watch how I torture them!"

"Imagine the despair and pain these people would feel being skinned and flayed by the very respected Mr. Su Yu! Haha, I can't wait..."

The Qiu Demon chattered on about its grand scheme.

Listening to it made Su Yu's killing intent burn even hotter.

Yet, Su Yu found it a bit odd.

This Qiu Demon, if it wanted to do something, why not just do it? What's with all this babbling?

Just then, the Qiu Demon suddenly shouted: "Su Yu! Stop hiding! Do you really think your false death trick can fool me?"

Upon hearing this, Su Yu was startled.

Could it be that the Qiu Demon discovered that he wasn't dead?

However, Su Yu quickly realized that, after shouting, the eyes on the Qiu Demon's tentacles turned toward the Subspace Analyzer, seemingly believing Su Yu was hiding there.

Yet, it did not look at Su Yu's Quantum Body.

"So it was trying to bluff me."

"It seems it was worried I might be pretending to be dead and hiding in the Subspace Analyzer, so it babbled before to purposely lure me out?"

"How insidious!"

Su Yu couldn't help but shake his head.

And then, after the Qiu Demon shouted and waited for a while without any response,

it wasn't just waiting; a strange power emerged from its body, seemingly using a kind of powerful Spiritual Energy to sense everything.

"The Memory Space is completely silent; it seems this Su Yu really is dead."

The Qiu Demon seemed assured, believing in its own abilities.

"Heh heh, good riddance! No wonder, he was seeking death by researching that strange equipment, dying with no grievances!"

"Thinking back, I also acquired some Empire relics..."

"At the time, trying to research without a clue about the risks, I nearly died there. Is such a millennia-old Empire relic so easy to study? Su Yu got himself killed, he can't blame anyone else."

"That being the case, from now on, this place is my stage..."

The Qiu Demon laughed insidiously twice, then raised a tentacle and aimed it at Tie Long, Xiao Shengyin, and others.

Su Yu noticed and felt a bit tense.

He worried that the Qiu Demon might immediately harm these people.

If that happened, he might not be able to hide anymore, and would have to come out to fight this guy.

Fortunately, the Qiu Demon merely pointed a tentacle at the crowd for a while and did not unleash any aggressive power.

"It... seems to have strengthened their memories?"

Watching all this, Su Yu secretly guessed.

Just now, when the Qiu Demon aimed its tentacle at the crowd, a strange power emanated from it, covering them.

Su Yu sensed this power from afar and found it seemingly harmless.

On the contrary, this power seemed to benefit the crowd in some way.

Merely sensing it from afar, Su Yu noticed that his own memories seemed to have become clearer.

Events that had faded now appeared vividly, as if they had just happened.

It seemed the Qiu Demon's power could enhance memory.

And after being enhanced by the Qiu Demon, Tie Long, Xie Yitian, Xiao Shengyin, Yang Lie, Huang Ying, Feng Tian... all suddenly froze.

Simultaneously, they recalled Su Yu's "voice and appearance" in their minds.

They remembered the various help and benefits Su Yu had given them.

Then they remembered that the revered Mr. Su Yu was no longer with them!

Suddenly, a wave of sorrow hit them.

Tie Long, Yang Lie, and others had blood-red eyes, wishing they could immediately find the enemy and fight a battle for Su Yu's revenge.

Huang Ying, among others with rich emotions, even burst into tears.

Even the Mechanical Spirit and the Mechanical City were stirred into memories.

Even these Data Lives were immersed in sadness and remembrance.

The Qiu Demon, seeing this, sneered.

Then it raised its tentacle again, casually spreading the memory-enhancing strange power around.

Under normal circumstances, people would notice their memories being strengthened.

But now, because they were already emotionally agitated by Su Yu's "death,"

when their memories were enhanced, they just thought they were overly sorrowful, lost in past memories, without realizing anything was amiss.

As time progressed, the strange power spread by the Qiu Demon began to disperse around, spreading throughout the entire Mechanical City.

Everyone in the Mechanical City had their memories strengthened.

And the Qiu Demon's enhancements seemed targeted.

The memories in people's minds now all related to Su Yu.

These memories, vastly strengthened by the Qiu Demon, slowly overflowed from the consciousness of their minds, reaching the outside world, and began to fuse.

In the air, the memories of millions about Su Yu fused into an image of Su Yu.

Chapter 537: The Ritual of Chou Mo, Another Su Yu?_2

This image looks exactly like Su Yu, even down to the aura and power—they are identical!

In other words, this image seems to have the real Su Yu's strength too!

"What an amazing trick!"

Su Yu saw another version of himself appear in the sky and couldn't help but marvel at the methods of his foe, the Antagonist.

It actually created another version of him out of thin air!

As he looked at the Su Yu composed of combined memories in the air, the Antagonist's power shifted slightly.

It began to strengthen everyone's memories related to itself.

The entire Mechanical City, with its millions of inhabitants, had seen the war between the Mechanical City and the Antagonist.

So everyone had some memory of the Antagonist.

And these memories involved Su Yu, so when people suddenly recalled the Antagonist, it didn't seem strange.

Once these memories of the Antagonist were strengthened, they slowly overflowed into the air, forming a shape of the Antagonist.

The shape of the Antagonist gradually became more complete.

Then it began to approach the Su Yu created from fused memories!

"It looks like it intends to merge the two memory images to completely replace the version of me in everyone's mind?"

"If it succeeds, the 'Su Yu' in everyone's memory will become it."

"Is this the true ritual of the Time Drifter?"

Su Yu gazed at this scene, speaking to himself in his heart.

He had understood the Antagonist's ritual.

The Antagonist aimed to replace Su Yu through the fusion of memories.

And Su Yu, as an "Ancient Power Revived," was incredibly old.

After the Antagonist replaced Su Yu and completed the ritual of the Time Drifter,

theoretically, it could use Su Yu's ancient memories to descend into the past and travel through time.

But there's a problem; the so-called story of Su Yu's ancient revival is fabricated.

How long has Su Yu been here? Is that time really enough for the Antagonist to complete the ritual?

Thinking of this, Su Yu became curious about what would happen if he watched the Antagonist attempt this dubious ritual.

"Forget it, better play it safe."

Su Yu thought it over and decided not to take the risk by letting the Antagonist's plan succeed.

After all, most of the mysteries of the Time Drifter's ritual were based on Su Yu's speculations.

No one knew the true insider details except the Antagonist itself.

If Su Yu let it go unchecked, allowing it to complete the ritual, who knows what might happen?

If it truly replaced the past Su Yu, that would be a huge problem.

Su Yu made up his mind and prepared to act.

He concentrated, blocking out distractions.

He intended to focus his Quantum Probability Cloud onto the Subspace Analyzer, which would allow him to exit Quantum State and attack!

However, just as Su Yu concentrated, he suddenly felt something strange.

He discovered that he seemed to have... an extra body?

At this moment, Su Yu was simultaneously present inside and outside the Subspace Analyzer, in the Radiation Land, and deep within Subspace... at these four locations.

But his actual body was just one—it was the Probability Cloud dispersed in these four regions, making them the most probable places he would appear.

So it wasn't that he had truly gained three more bodies.

But now, Su Yu sensed that there really was an additional "self."

That "self" was the Su Yu that the Antagonist constructed out of everyone's memories.

"It's actually so real?"

Su Yu was quite surprised.

He sensed that this body created by the Antagonist was almost exactly like his true form.

Not just in appearance, aura, and energy... but it also had all kinds of abilities and professions.

If it weren't for the absence of the Brutal Battle Armor, Su Yu would almost think this was his true self!

In fact, because it was so realistic, when Su Yu focused, he felt... he could control this new body?

Su Yu's heart was instantly intrigued.

He wanted to try controlling this body to see what might happen.

But he hesitated, worrying that it might be the Antagonist's plot.

If the Antagonist used this fake body to "entrap" Su Yu's actual form,

actively controlling this fake body would be like walking into a trap.

At this moment, the Antagonist and Su Yu's fake body were about to come into contact mid-air.

If they merged and initiated a fusion, the consequences could be unimaginable!

Seeing this, Su Yu quickly weighed his options.

Should he try to control the fake body and catch the Antagonist off guard? But this might lead him into a trap.

Or should he let his true form emerge for a direct confrontation with the Antagonist? That might alert the Antagonist, allowing it to escape again, making it difficult to catch later.

Both choices came with pros and cons.

As the Antagonist was about to touch Su Yu's fake body, Su Yu suddenly steeled his heart and made up his mind.

In that split second, he realized one thing clearly.

No matter what scheme the Antagonist had set, it was aimed at his normal state self.

But now Su Yu was in a quantumized state, an ancient Imperial technology.

Could the Antagonist's plot really deal with Su Yu in this state?

"So, let's do it!"

Once Su Yu made up his mind, he immediately focused all his energy on controlling the fake body in the sky.

Without any obstruction, his consciousness and Probability Cloud spread into that body, completely taking over the fake body.

On the surface, the fake body remained motionless mid-air with no apparent change.

But silently, it had already changed owners.

"Haha, I made the right bet!"

After Su Yu controlled the fake body, he did not sense any danger.

He instantly knew he had made the right bet.

He couldn't help but marvel.

This body was made so realistically! Its powers were nearly indistinguishable from his true form.

This puzzled Su Yu. Could it be that the Antagonist was also a Ghost Hidden Blade and a War Mechanic?

Otherwise, how could the fake body it created have these abilities? How did the Antagonist construct such a fake body?

"Or perhaps this fake body wasn't entirely made by the Antagonist. It's a kind of projection pulled from past history using people's memories?"

"The Antagonist may not have the powers of a Ghost Hidden Blade and War Mechanic, but time, history, and memories... they recorded my powers, like a photo from the past..."

Combining his understanding of the Time Drifter, Su Yu quickly came up with a reasonable explanation.

This fake body was a way for the Antagonist to utilize the Power of Time; it wasn't that the Antagonist had learned Su Yu's abilities.

But thinking so, the Antagonist seemed even more terrifying.

It appeared to be able, to some extent, to harness the Power of Time!

"Fortunately, it seems the Antagonist isn't very adept with this power. Although this fake body is powerful, it has no controller."

Su Yu felt relieved.

The Antagonist's tricks were strong and terrifying, but they had flaws, allowing Su Yu to exploit them.

"Now this fake body is mine!"

"With this fake body, don't I now have double the combat power?"

Feeling the immense power within the fake body, Su Yu was very satisfied.

The Antagonist was detestable, but its "craftsmanship" was impeccable.

The created fake body was just like the real thing.

This fake body's power was the same as his true form, essentially doubling his combat capabilities.

However, it's a pity that this fake body was created by the Antagonist's power.

If it loses its support, it might dissipate immediately.

"I must acquire this method of doubling my combat power! Today, the Antagonist must not escape!"

Su Yu watched the approaching Antagonist intently, ready to strike at any moment.

He prepared to have both his true form and the fake body attack simultaneously when the Antagonist fully contacted the fake body, aiming to suppress it completely!

But then, he suddenly had a thought and restrained his impulse to act immediately.

At this moment, the Antagonist's appendages were already about to entangle Su Yu's fake body. In half a second, they'd be in full contact.

But then, the Antagonist suddenly stopped, sneering, "Heh heh, in this situation, Su Yu still hasn't appeared. It seems he's truly dead. I can take my time preparing the ritual, there's no rush..."

Chapter 538: The Sinister Enemy, Su Yu's New Power! Quantum Computing! The Power of the Future!

It turns out that everything before was yet another test by the Nemesis Demon.

It was always worried that Su Yu wasn't dead!

So it pretended to create a fake body of Su Yu, making it look like it was about to perform a ritual.

In reality, it wanted to lure Su Yu out.

This guy is as insidious as ever.

And now, seeing that Su Yu wasn't reacting, is Nemesis Demon completely at ease?

Then, it stepped back, away from Su Yu's fake body, not drawing closer.

"This fake body still needs some preparation, it doesn't meet the requirements for the ritual yet..."

Nemesis Demon murmured to itself.

Then, it began to chant in a gibberish-like manner again.

This time, the language it spoke was extremely strange and eerie.

Su Yu couldn't understand a single word of it.

Even when Su Yu used the Data Mechanic's ability to "decrypt" these languages, he couldn't glean any useful information.

It didn't resemble the language of any intelligent life, or was it just meaningless noises?

"What's going on here?"

Su Yu became vigilant in his heart.

At this moment, accompanied by Nemesis Demon's bizarre muttering, a large amount of memory emerged from the minds of the people in Mechanical City.

These memories, upon appearing, instantly surged toward Su Yu's fake body, enveloping it completely in an instant, leaving no gaps.

Then, Nemesis Demon suddenly stopped its gibberish and laughed heartily:

"Su Yu! Although I cannot sense your true form, I can sense your remaining memories!"

"Your memories are now inside this fake body!"

"I can feel that the state of these memories is very strange, it seems you've really died, with only a bit of memory remaining! Haha!"

"As expected of a strong ancient resurrected one, not so easy to completely kill! Even if left alone, you'd probably revive again in the future, wouldn't you?"

"No worries, Su Yu! I'll help you, I'll let you resurrect right now!"

"How do you like this fake body I made for you? It's perfect, right? With this body, you can resurrect right now!"

"And not only will I give you this fake body, but I'll also give you all my memories!"

"With these memories, you'll definitely become stronger!"

"From now on, you'll be both Nemesis Demon and Su Yu! Hahaha!"

It turns out, Nemesis Demon had already noticed Su Yu's intrusion into the fake body!

Although it couldn't detect the quantumized Su Yu, it was highly sensitive to abstract things like memories.

When Su Yu's consciousness descended upon the fake body, the memories also descended with the consciousness.

And since this fake body was created by Nemesis Demon, the foreign memories residing within, even as quantumized memories, still alerted Nemesis Demon.

This allowed Nemesis Demon to discover the flaw.

This guy is also cunning, silently alluring Su Yu's attention with gibberish while buying time.

Then, once prepared, it immediately launched an attack on Su Yu!

Its method of attack was those memories enveloping the fake body!

With its loud laughter, the memories near Su Yu's fake body immediately began to merge with the fake body.

The volume of these memories was extremely terrifying.

The content could be described as vast as the sea.

Such an enormous amount of memories rushing into the fake body's mind instantly caused a great impact on Su Yu's thoughts!

This impact was even more intense than when Su Yu deciphered the Brutal Split Mind before!

Because when Su Yu was deciphering the Brutal Split Mind's memories, he could control the degree actively.

When feeling uncomfortable, he could rest and adjust his condition.

But this time, Su Yu was force-fed a large amount of memory, with no room for choice.

"This is... the detailed memories of Nemesis Demon throughout its life! And also the memories of those dozens of seven-star powerhouses it inherited... So unbearable..."

Upon hearing Nemesis Demon's laughter, Su Yu immediately realized he had fallen into its trap.

Nemesis Demon's trick was to try and overwhelm Su Yu's consciousness with a massive influx of memories.

Nemesis Demon's hundreds of years of memories, plus the memories it inherited from dozens of seven-star powerhouses.

The total amount of memories accumulated over thousands of years! Maybe even close to ten thousand years!

So many memories were forcefully injected into the mind by Nemesis Demon using a special ability!

One can imagine the impact on one's thoughts.

Moreover, given Nemesis Demon's wickedness, its memories had extremely strong pollution.

On par with the Evil God in every way.

This pollution caused even greater harm to Su Yu.

If Su Yu couldn't hold on, then it was the end.

He would be completely eroded by Nemesis Demon's memories, with no trace of Su Yu left in the world!

Furthermore, at the moment, Su Yu's fake body was entirely wrapped by these memories.

Su Yu's consciousness, even if it wanted to escape, had no way out.

Once leaving the fake body, the mind without the body's protection would directly merge into these memories.

In that case, the impact would be even greater!

It can be said that this conspiracy of Nemesis Demon pushed Su Yu into a dead end!

Not quite.

At the moment the memories were injected, Su Yu sensed the danger.

Then he shifted his consciousness, the Probability Cloud dispersed, instantly returning to his true body.

His consciousness did not descend into the fake body by normal means.

It was via the dispersal of the Quantum Probability Cloud.

This method of movement rivaled Instant Teleportation, defying usual logic.

Thus, the memories surrounding the fake body couldn't prevent his departure.

Upon returning to his true body, Su Yu immediately felt relieved from his previous discomfort.

The one receiving the memory injection was Su Yu's fake body, what's it got to do with Su Yu's true body?

Nemesis Demon's attempt to harm Su Yu with this method was overthinking it.

Chapter 539: The Sinister Chou Mo, Su Yu's New Power! Quantum Computing! The Power of the Future!_2

"Tsk tsk, I was still a bit careless, almost got caught..."

Su Yu sighed slightly in his heart.

"It's not exactly carelessness; this Chou Mo is too insidious, and I know too little about it."

Su Yu wasn't too surprised about being discovered and almost caught by Chou Mo.

Nor did he feel too defeated.

His biggest problem now is knowing too little about Chou Mo.

Even now, Su Yu doesn't dare to confirm whether this Chou Mo before him is the true form.

This is why Su Yu has not taken direct action.

If Chou Mo isn't the real one, acting would only alert it.

If it escapes and hides again, it would be even more troublesome.

"Fortunately, now there's an opportunity..."

Su Yu pondered secretly in his heart.

After returning to his original body, he also brought back part of Chou Mo's memory.

These memories were deliberately carried back, chosen from the core of its memories.

Because Su Yu wants to use this to directly understand Chou Mo, its abilities, and weaknesses!

Only in this way, he might have a chance to truly defeat it!

Actually, Su Yu had caught a part of Chou Mo before and obtained some of its memories.

But those memories were incomplete, missing a lot.

Especially memories regarding the Time Drifter ritual were missing.

And now, the memories Chou Mo infused into Su Yu's false body are very detailed and complete!

This means that there is a possibility of deciphering Chou Mo's most important secrets from these memories!

Deciphering the details of the Time Drifter ritual!

Deciphering if this Chou Mo is the real form!

Deciphering how to thoroughly kill Chou Mo!

Although some of these memories might be false, it's better than nothing.

Su Yu at this moment has already fully activated the Data Mechanic's ability to begin deciphering those Chou Mo memories brought back to the body.

However, this is extremely difficult!

Because Chou Mo has lived too long, its centuries or even millennia of detailed memories contain too much information.

Moreover, as a nine-star level monster, its memory encryption method is very complex.

Deciphering it is even more difficult.

Not to mention these memories are also polluted.

Wanting to decipher so much information in a short time is easier said than done?

A little carelessness, and Su Yu's own memory could be polluted by this vast information, turning him into another Chou Mo.

This cannot be rushed, it can only be done slowly.

Su Yu is somewhat worried about whether it will be too late?

If he doesn't decipher it quickly, and Chou Mo truly holds the ritual or simply escapes.

Then should Su Yu act or not?

After interpreting for a while, Su Yu was suddenly overjoyed!

Because he found that his ability to decipher data and process information has greatly improved compared to before!

At least by tens, even hundreds of times!

Moreover, this doesn't seem to be the limit!

Su Yu feels there's still a huge room for improvement!

With such an increase in data ability, he will definitely be able to completely decipher Chou Mo's memories in a short time.

"But what's going on? My Data Mechanic is still at six-star level, hasn't advanced to seven-star at all, how has my information processing ability suddenly become so strong?"

Su Yu, aside from being pleasantly surprised, was also a bit puzzled.

How did his data ability suddenly become stronger?

"Could it be... because of quantumization?"

"It's said that the computational power of quantum computers is terrifying."

"My brain is now quantumized, theoretically, my brain is now a powerful quantum computer."

"Could this be why my data ability has greatly enhanced?"

Su Yu's mind raced, quickly coming up with a hypothesis.

Quantum computing!

Now his brain computation is quantum computing!

His data ability enhancement is brought about by quantumization.

"I didn't expect quantumization to have such benefits..."

Su Yu couldn't help but sigh.

The secrets of quantumization are just too many.

Then he concentrated, starting to fully decipher Chou Mo's memories.

And as he deciphered, his thinking spun faster and faster.

Every moment was at the level of billions of billions of complex operations.

Before crossing over, Su Yu had also heard the names of some large supercomputers.

Those supercomputers each were as huge as a building.

But even if combined, those supercomputers weren't as powerful in computational ability as Su Yu is now!

At this rate, in just a few seconds, he could fully decipher those Chou Mo memories brought back!

While deciphering, Su Yu even had spare computational power to study his own thinking.

He wanted to research the secrets of quantum computing.

After all, even though Su Yu could utilize this state of high-speed calculation now, he didn't know why he could compute so fast.

According to Su Yu's previous life's understanding, although quantum computers are immensely powerful in computation, they seem to only compute specific problems, not general ones.

But now, Su Yu's brain's quantum computing has no such restriction at all.

This made Su Yu extremely curious about its principles.

If he could understand it, it might be possible to create intelligent devices that surpass the Superior Level Chip, greatly enhancing Mechanical Creation's abilities.

However, human brain thinking processes are very complex, especially for powerful Transcendents like Su Yu, it's even more complex.

With added quantumization, it's complicated beyond measure!

In a short time, Su Yu could not figure out what was happening in his brain, nor how quantum computing was being carried out.

But, Su Yu discovered another astonishing fact!

That is, when he decoded those memories, he wasn't using normal linear thinking at all.

Normal people think in the linear process of [seeing the problem], [thinking over the issue], [drawing a conclusion].

However, Su Yu found that when decoding those memories, it was often [drawing a conclusion], then [seeing the problem], and then [thinking over the issue].

Or it was first [thinking over the issue], then [seeing the problem], and lastly [drawing a conclusion].

When calculating, his sense of time was confused.

Many times, Su Yu didn't even need to calculate but directly saw the [answer] in advance!

"Is this one of the reasons for the sudden surge in my computational ability?"

"The linearity of time has actually been broken!"

Su Yu was greatly amazed by the changes in his thinking.

Getting an answer before seeing the problem?

Seeing the answer to the question in advance!

What is this? How could such a thing be possible?

Could he have crossed again?

Crossed into the future to see the answer in advance?

"Could this be one of the secrets of quantumization? Being able to confuse the order of time?"

Su Yu was both shocked and very delighted.

Because now this situation already counts as a use of the Power of Time!

Su Yu didn't expect that after quantumization, even the Power of Time would be involved!

"It's truly amazing, and seems entirely different from the Power of Time that Chou Mo pursues!"

"If I can research the principles, I might even create my own Time System profession!"

Su Yu immediately thought of many things.

Chou Mo's Time Drifter utilizes the uniqueness of memory and Subspace Imprint to travel back to the past.

Whereas Su Yu's current quantum computing state exploits the peculiarities of Quantum State, allowing his mind to briefly travel to the future! Seeing the answers to questions in advance.

This is an entirely different path!

"Wait, might this power be not only useful for calculation but also for combat?"

Su Yu's mind flashed with inspiration, considering a possibility.

This ability of his now, isn't it the so-called "Future Vision"? The ability to see the answers to future questions.

If used in combat, wouldn't it be invincible?

Su Yu briefly paused from deciphering memories and looked up at the frantically laughing Chou Mo.

He focused his data mechanics, analyzing with all his computational power Chou Mo's next move.

With his computational power, analyzing to predict an enemy's actions is quite normal.

But that is merely logical analysis, not future prediction, and is not very accurate.

But now, after analyzing for a while, Su Yu suddenly blurred his vision and saw Chou Mo's tentacles waving, roaring with these words:

"Su Yu! What's going on! Why can't I sense your memories anymore? Could you really be dead?"

Then Su Yu returned to his senses, finding Chou Mo waving its tentacles and again speaking: "Su Yu, what is going on..."

So it turns out, Chou Mo hadn't even spoken these words yet, but Su Yu had seen them in advance!

Su Yu was overjoyed in his heart! It really worked!

Chapter 540: Change the Future? A Desperate Destiny!

At this moment, the Demon Foe continued, "...Why can't I sense your memory? Are you really dead?"

It's exactly the same as what Su Yu saw earlier! Word for word.

Moreover, the tone, pitch, even the wriggling of the tentacles and the fluctuation of energy, were without the slightest difference!

If it were merely predicting what the Demon Foe would say, as long as one had enough understanding of its personality, and coupled with sufficiently powerful computing power, it could still be roughly calculated.

However, the tone, pitch, tentacle movements, and spiritual energy fluctuations, such a massive amount of detail, absolutely cannot be achieved by ordinary analysis and prediction.

No matter how strong Su Yu's computational power is, it's impossible to accurately compute these details.

Besides, Su Yu would not waste computational power on these irrelevant things.

So, there's only one possibility, and that is Su Yu really saw the Demon Foe's future!

This means that this ability can be used for combat!

Upon realizing this, Su Yu was extremely excited.

The Power of Time, foreseeing the future! To suddenly obtain such a magical power, how could one not be excited?

But the next instant, Su Yu calmed down.

Because he knew that although this ability was powerful, it definitely had numerous limitations.

For instance, how far into the future could he see?

How many times could he look into the future?

Were there any costs?

And most importantly, can the future that is seen be changed?

These are all very critical, and if not figured out, this ability might even be harmful to Su Yu!

And to figure out these details, a lot of experimentation is needed.

At this moment, the Demon Foe had just finished speaking, somewhat exasperated.

It seems a living Su Yu is very important to it.

Perhaps the Time Drifter ritual works better with a living Su Yu as a sacrifice.

After all the effort to use this false body to trap Su Yu's consciousness inside, only for Su Yu to suddenly die?

Naturally, it would be exasperated.

It cursed and flew toward Su Yu's false body.

Seeing this, Su Yu slightly smiled, thoughts moving...

The next instant, Su Yu's Probability Cloud spread, and his consciousness returned inside the false body.

Upon returning to the false body, a large amount of the Demon Foe's memories surged toward Su Yu's consciousness like a tide.

Trying to completely drown his sense of self.

But now, having mastered Quantum Computing, resisting these memories was easy for Su Yu.

He temporarily didn't bother with these memories, instead mobilizing the powerful force within the false body, preparing as he watched the Demon Foe.

Just waiting for the Demon Foe to get close, to launch a thunderous strike.

However, as the Demon Foe was approaching, it suddenly retreated swiftly.

At the same time, it laughed heartily:

"Haha, Su Yu! I knew you wouldn't die so easily!"

"What? Trying to play dead to lure me over? You think I'm that stupid?"

The Demon Foe's perception was exceptionally sharp, instantly detecting Su Yu's consciousness arrival!

...

The next instant, Su Yu's vision blurred, and the scene shifted.

He realized his consciousness was still in his own body and had not arrived inside the false body.

Everything that happened just now was Su Yu using his ability to foresee the future, seeing in advance!

"Is it that I can only see 0.01 seconds into the future?"

Su Yu thought rapidly to himself.

The future he just saw was very brief, only lasting 0.01 seconds, or 10 milliseconds, before ending.

Even though Su Yu strove to extend this time, it had no effect, and as time ran out, it ended immediately.

"Fortunately, it's already quite good, 0.01 seconds is enough to do many things!"

Su Yu wasn't too disappointed.

Su Yu unleashed his full power, reaching hundreds of times the speed of sound.

0.01 seconds is enough to fight hundreds of rounds.

The Demon Foe was not slow either; in the earlier scene, it retreated and said some words in just 0.01 seconds, showing its speed.

"Having figured out the time limitation, what remains is... the cost!"

Su Yu knew that the ability to foresee the future was so heaven-defying, it couldn't come without a cost.

Even ordinary Extraordinary Abilities require the consumption of spiritual energy, spirit, and physical strength.

Let alone such a heaven-defying ability as foreseeing the future?

Su Yu immediately checked his state to see if anything was missing.

Soon, he discovered...

"No loss in spiritual energy or spirit, but a decrease in the stability of thought!"

"The Probability Cloud of thought has slightly spread..."

Su Yu found out that what he lost wasn't ordinary energy, but his thought and rationality!

Currently, Su Yu, whether in body, spiritual energy, or spirit, was all Quantumized.

His thought could remain stable, relying on Self Observation to collapse the Probability Cloud.

But now, after using the ability to foresee the future, he found that the effect of this Self Observation was weakening!

His Probability Cloud of thought had slightly spread.

If it continued to spread, Su Yu's Self Observation would ultimately be unable to prevent the dispersion of thought.

By then, thought would be fully Quantumized, turning into a chaotic Probability Cloud.

He would never be able to regain normal thought and logic, becoming a quantum lunatic.

Mentally ill patients have scattered thoughts, thinking of the sky one second and the ground the next; normal people cannot follow their train of thought at all.

But if Su Yu's thought is fully Quantumized, it would undoubtedly be thousands of times more scattered than a mentally ill person.

That state is terrifying to imagine.

"Truly, the stronger the ability, the greater the cost!"

After understanding the cost of this ability, Su Yu was not too surprised either.

If an ability like this had no consumption or cost, Su Yu would instead suspect something was amiss, worrying if there was a big pitfall waiting somewhere.
